

A photograph of two students sitting on lawn chairs on a grassy lawn next to a pond. The student on the left is wearing a red shirt and glasses, and the student on the right is wearing a white shirt. They are both looking towards the pond. A small table between them holds a water bottle. The background shows a stone path and the edge of the pond.

# UNDERGRADUATE BULLETIN

---

## About this Bulletin

The University of Denver Undergraduate Bulletin has been prepared by the faculty and administration to serve as the governing document for University's undergraduate academic programs, courses and policies. The Undergraduate Bulletin represents the University's best planning at the time of publication. Course and curriculum changes; modification to tuition, fees or other charges; and unforeseen changes in other aspects of the University of Denver sometimes occur after the bulletin has been published, but before the changes can be incorporated in a later edition and apply to all students as of the date they become effective, regardless of whether they were in effect at the time the student initially enrolled at the University of Denver. Students are responsible for knowing all academic and administrative policies and regulations affecting their program of study and for abiding by all such policies and regulations during their period of enrollment at the University. The Undergraduate Bulletin does not constitute a contract between the University of Denver and its students on either a collective or individual basis.

This 2025-2026 edition is intended for students admitted to undergraduate programs during the 2025-2026 academic year. Students admitted in previous academic years should refer to the Past Bulletins (<http://bulletin.du.edu/archives/>) link for the bulletin related to that year. The Undergraduate Bulletin is published and distributed annually in both a web and a PDF version. Maintaining document fidelity, both versions remain static after publication. Corrections to published errors can be obtained on the errata page accessed through the table of contents and on the Registrar's Office website.

## About DU

### The University of Denver

Founded in 1864, the University of Denver is an independent coeducational institution located in a residential neighborhood eight miles southeast of downtown Denver. Colleges, schools and divisions of the University include the following:

- College of Arts, Humanities and Social Sciences
- College of Natural Sciences and Mathematics
- Daniel Felix Ritchie School of Engineering and Computer Science
- Daniels College of Business
- Josef Korbel School of International Studies
- Graduate School of Professional Psychology
- Graduate School of Social Work
- Morgridge College of Education
- College of Professional Studies
- Sturm College of Law

## Students

University of Denver students come from all 50 states, in addition to the District of Columbia and from several U.S. territories, and from 122 different countries. Enrollment is approximately 12,800: 6,600 undergraduates and 6,200 graduate students.

## 4D Experience

The DU 4 Dimensional Experience empowers students to lead lives of meaning and purpose that serve the public good, enabling them to thrive at and beyond the university. DU seeks to fulfill this mission by fostering an institutional commitment and culture dedicated to promoting and integrating the four dimensions of advancing intellectual growth, exploring character, promoting well-being, and pursuing careers and lives of purpose. These four dimensions serve as a holistic framework for students' educational journeys, not only instilling the understanding and frameworks to navigate their educational experience intentionally but also positioning them to serve and collaborate for the public good in their futures beyond DU.

The four dimensions are as follows:

### Advancing Intellectual Growth

- Through immersion in a dynamic learning environment in and out of the classroom, students will learn how to learn, to connect inquiry to practice, and to apply their knowledge in new contexts. They will engage with human diversity and master the intellectual building blocks of critical inquiry, problem-solving, adaptability, and creativity.

### Exploring Character

- Students will develop the ability to live, work, and collaborate across differences in backgrounds, experiences, and perspectives; to gain a greater understanding of self in relation to community and world; to strengthen their personal and social responsibility; to engage with and better their communities; and to embrace ethical leadership.

#### **Promoting Well-Being**

- Students will be supported holistically in achieving social, emotional, physical, spiritual, and financial wellness. A constellation of mentorship will nurture this development and provide a relationship-rich education.

#### **Pursuing Careers and Lives of Purpose**

- Students will learn how to integrate their experiences and connect the dots in their learning; to cultivate a constellation of mentors; to develop their skills and talents in service of the greater good; to tell their story; and to chart purposeful futures.

## **Accreditation**

### **Institutional Accreditation**

The University of Denver is accredited as a doctoral degree-granting institution by the Higher Learning Commission (HLC) and is authorized to offer post-secondary education in the state of Colorado by the Colorado Department of Higher Education.

Higher Learning Commission  
230 South LaSalle Street, Suite 7-500  
Chicago, IL 60604-1413  
312-263-0456  
800-621-7440  
<https://www.hlcommission.org/>

Colorado Department of Higher Education  
1600 Broadway, Suite 2200  
Denver, CO 80208  
303-866-2723  
<http://cdhe.colorado.gov> (<https://cdhe.colorado.gov/>)

### **Specialized Accreditation**

Individual academic programs undergo periodic review by accreditation or certification bodies in their field.

- Accreditation Association for Ambulatory Health Care
- Accrediting Board for Engineering and Technology
- American Bar Association
- American Chemical Society
- American Library Association
- American Psychological Association
- Association to Advance Collegiate Schools of Business International
- Colorado Department of Education
- Council for Accreditation of Educator Preparation
- Council on Social Work Education
- Master's in Psychology and Counseling Accreditation Council
- National Association for the Education of Young Children
- National Association of Schools of Arts and Design
- National Association of School Psychologists
- National Association of Schools of Music
- National Professional Science Master's Association
- National Security Agency - Center of Academic Excellence

John J. Sie  
J. William Sorensen

## Academic Calendar

Courses for programs other than the Sturm College of Law are offered on the quarter system; the Sturm College of Law operates on a semester calendar.

### Quarter System

The academic calendar is divided into fall, winter and spring quarters and a summer session. Each quarter is approximately ten weeks long and summer session is nine weeks. There are two interterm sessions. Students may complete degree requirements through continuous enrollment, including summers, or may arrange the normal work of a three-quarter academic year in any desirable sequence of quarters and summer session.

### Semester System

The academic calendar is divided into fall, spring and summer semesters.

### Summer Session

Summer session (<http://www.du.edu/summer/>) is an avenue for continuing undergraduate and graduate students to accelerate their programs or complete necessary coursework. Elective, Common Curriculum and required courses for majors and minors are offered in a variety of time frames. Travel and other unique courses including short, intensive workshops are part of the summer program. Visiting students, professionals and individuals from the community interested in attending for the summer only are encouraged to attend and are admitted (p. 35) under an open-enrollment policy.

### Interterms

Interterms are the periods preceding each academic quarter, during which short, innovative on-campus, online, and travel experiences for undergraduate and graduate students are offered. Hours completed in interterms are applied as credit toward graduation requirements and may be applied to the major or minor. Students can find more information about and register for interterm classes through the Academic Programs (<https://www.du.edu/interterm/>) office. Questions about interterms should be directed to Academic Programs, Mary Reed Building, Room 301, 2199 S. University Blvd., Denver, CO 80208-2360, or by emailing [uap@du.edu](mailto:uap@du.edu).

Academic Calendar: Quarter System (p. 14)

Academic Calendar: Semester System (p. 15)

## Attendance

Students are expected to attend all meetings of classes for which they are registered, including the first and last scheduled meetings and the final examination period. Students who fail to attend the first class and who have not previously notified their instructors of their absence may be withdrawn from the course by the Office of the Registrar in consultation with the instructor. Instructors have the right and responsibility to establish attendance policies for their courses.

Participation in official University activities, personal emergencies and religious observances are valid reasons for absences. Students are responsible for informing instructors about their absence and for completing assignments given during their absence. A student may not attend classes without being officially enrolled. Registrations are not processed after the designated registration period of the quarter.

## Final Exams

Any final exam for a course must be scheduled during the final exam period. Students must attend all final exams as scheduled by faculty. The final exam schedule has been created to avoid conflicting exams; however, time conflicts are possible. Students should check their final exam schedules early in the term to identify possible conflicts. Students are expected to let their instructors know when they have more than one exam being held at the same time. The Office of the Registrar will attempt to resolve conflicts whenever possible. Final exams are not rescheduled if a student has multiple exams on the same day. It is at the discretion of individual instructors to accommodate student requests for moving an exam in the event

that a student has multiple exams on the same day. Final exams are not changed to accommodate student travel plans, and students should only plan travel after the official end date of the term.

The Office of the Registrar schedules final exams for classes held during standard meeting times in fall, winter and spring quarters. Final exams are also scheduled for certain classes meeting one day per week. Since summer quarter is a truncated term, we do not schedule any final exams for that quarter.

## Bereavement Policy

### Student Bereavement Policy

A student's absence from class will be excused in the event of a death in the student's immediate family or household for up to three consecutive business days for in-state memorial services and five consecutive business days for out-of-state memorial services. If a student would like to request a bereavement notification be sent to their faculty, they can do so by filling out the notification request form.

The student is responsible for fulfilling the course requirements and for working with course instructors on an appropriate timeline to submit any missed assignments/requirements. The Office of Student Outreach & Support (SOS) is the designated office to help support the student and review all available options if the death has an impact on the student's academic progress for the term. Faculty requesting confirmation of the bereavement leave should consult with the SOS staff.

## Campus Weather Closures

Sometimes severe storms may create such a hazard that the University makes a decision to close and cancel operations for a period of time. Students can receive information about campus weather closures via email, telephone or text message by registering for the Emergency Notification System (<https://www.du.edu/emergency/notification/>).

## Academic Religious Accommodations For Students

### Academic Religious Accommodations For Students

*The information below is accurate as of the date of publication of the Bulletin. For the current version of the University's Academic Religious Accommodations Process for Students, please visit the Academic Religious Accommodations webpage (<https://studentaffairs.du.edu/get-connected-support/request-accommodation-religious-observance/>).*

*The process below addresses students' requests for religious accommodations in the academic context. Students seeking accommodations for a disability, medical, and/or mental health condition should contact Accessible DU: Student Disabilities Services (SDS) (<https://studentaffairs.du.edu/disability-services-program/>).*

The University is committed to creating and maintaining a welcoming and inclusive learning environment in which students are treated with dignity, decency, and respect. The University honors and respects students' observance of sincerely held religious beliefs or practices. As part of this commitment, the University provides reasonable accommodations for students' observance of sincerely held religious beliefs or practices through the process set forth below.

The University recognizes that some courses are regularly scheduled at times or employ overall delivery methods or pedagogies that may conflict with a student's sincerely held religious beliefs or practices. In such cases, the student is encouraged to register for alternate course sections or courses.

When considering a request for a religious accommodation, the University

- will not grant an accommodation that would fundamentally alter the educational program or academic requirements that are essential to a program of study or to fulfill licensing requirements.
- may select any accommodation that eliminates the conflict with the student's observance of sincerely held religious beliefs or practices, and the University is not required to accept the student's requested, preferred accommodation.

## Academic Religious Accommodations Process

### Student Responsibilities:

To request academic religious accommodations, a student must follow the process below:

#### 1. Identify Potential Conflicts with Observance of Sincerely Held Religious Beliefs or Practices

By the end of the second week of a course, and in advance of any requested accommodation(s), students are expected to examine the course syllabus to identify potential conflicts with the student's observance of sincerely held religious beliefs or practices. In the case of exams or assignments that are added to the syllabus or otherwise announced after the first two weeks of the course, students should identify potential conflicts with their observance of sincerely held religious beliefs or practices as soon as possible and in advance of the requested accommodation(s).

For courses that are shorter than the traditional quarter or semester, within the first week of the course, and in advance of any requested accommodation(s), students are expected to examine the course syllabus to identify potential conflicts with the student's observance of sincerely held religious beliefs or practices. In the case of exams or assignments that are added to the syllabus or otherwise announced after the first week of the course, students should identify potential conflicts with their observance of sincerely held religious beliefs or practices as soon as possible and in advance of the requested accommodation(s).

Requests for accommodations for an internship, externship, field placement, or other practical learning experience outside the classroom will be assessed on an individual, case-by-case basis in consultation with the University placement supervisor and the field placement supervisor. Students who receive an accommodation may be required to make up the hours or work that they missed from an internship, externship, field placement, or other practical learning experience. Students who have conflicts with the overall schedule for an internship, externship, field placement, or other practical learning experience are encouraged to consider scheduling the internship, externship, field placement, or other practical learning experience at another time. The student should consult with the University placement supervisor for the program regarding such scheduling needs.

## 2. Submit Religious Accommodations Request

Students must complete and submit the Student Academic Religious Accommodations Request online (<https://studentaffairs.du.edu/get-connected-support/request-accommodation-religious-observance/>), which alerts the student's instructor(s) and Director of Spiritual Life to the request. If a student does not receive a response from their instructor(s), the student should follow up with the instructor(s) or the Director of Spiritual Life. If the request is denied, the student may submit an appeal as described below.

## 3. Address Missed Material/Assignments If an Accommodation is Granted

Students are responsible for fulfilling the course requirements, including obtaining the materials and information provided during any missed class(es), and for working with course instructors in advance on an appropriate timeline to submit any missed assignments, take any exams, or complete organized activities.

# Instructor Responsibilities:

## 1. Check Email for Student Religious Accommodations Requests

Instructors will receive an email when a student in their class has submitted a Student Academic Religious Accommodations Request related to their course. The Director of Spiritual Life will also receive an email about the request and is available to consult with the instructor regarding the request.

## 2. Review the Request

Instructors must promptly consider the request and determine whether the accommodation is reasonable and does not fundamentally alter the curriculum or academic program. The instructor should evaluate the request on a case-by-case basis, taking into account relevant factors including, but not limited to:

- the fundamental requirements of the applicable academic program and/or related technical standards;
- the requirements of the course;
- the requirements of the department or major;
- the potential effects of the accommodation on the individual student and fellow students;
- the duration of the accommodation request; and
- the availability of alternative accommodations.

If an instructor needs assistance in evaluating a request, they may contact the Director of Spiritual Life.

## 3. If Granting a Requested Accommodation

If an instructor grants the requested accommodation (without modification), the instructor must notify the student that the accommodation is granted and notify the student of the opportunity to submit the missed assignments, take any exams, or complete organized activities, as applicable. In providing this opportunity to complete missed work, the instructor should provide options that are substantially equivalent to the original assignment, exam, or activity.

## 4. If Offering an Alternative Accommodation or Denying a Requested Accommodation

If an instructor is planning to offer an alternative accommodation or deny a request for religious accommodation, before contacting the student with their final decision, the instructor should consult with the Director of Spiritual Life.

# Appeals Process for Students

A student may appeal an instructor's decision denying a request for religious accommodation in writing to the department chair, or program director, as applicable, within five (5) Business Days of receiving the instructor's decision. The department chair or program director must: (a) consult with the

Director of Spiritual Life and/or the Vice Chancellor of Student Affairs or their designee; and (b) within five (5) Business Days of receiving the appeal, issue a decision in writing, which shall include the reasons for the decision.

A student may appeal the decision of the department chair or program director in writing to the dean of the appropriate academic unit (or the dean's designee) within five (5) Business Days of receiving the decision. The dean (or designee) must: (a) consult with the Director of Spiritual Life and/or the Vice Chancellor of Student Affairs or their designee; and (b) within five (5) Business Days of receiving the appeal, issue a decision in writing, which shall include the reasons for the decision.

The decision of the dean (or designee) is final.

For purposes of this appeals process, Business Day refers to any weekday Monday through Friday in which the University is in operation, including days when the University is in operation, but classes are not in session. For example, University holidays are not Business Days.

#### *CONCERNS OF DISCRIMINATION OR HARASSMENT*

*Students who believe that they have experienced discrimination or harassment may contact the Office of Equal Opportunity & Title IX (<https://www.du.edu/equalopportunity/>).*

## 2025-2026 Academic Calendar: Quarter System

### Autumn Quarter 2025

September 3 - 6	Wednesday - Saturday	New Student Orientation
September 8	Monday	Classes begin
November 15	Saturday	Last day of classes
November 17-20	Monday-Thursday	Final examination period

### Winter Interterm 2025

November 21	Friday	Classes begin
December 20	Saturday	Last day of classes

### Winter Quarter 2026

January 5	Monday	Classes begin
January 19	Monday	Martin Luther King Holiday
March 16	Monday	Last day of classes
March 17-20	Tuesday-Friday	Final examination period

### Spring Interterm 2026

March 21	Saturday	Classes begin
March 29	Sunday	Last day of classes

### Spring Quarter 2026

March 30	Monday	Classes begin
May 25	Monday	Memorial Day
June 7	Sunday	Last day of classes
June 8-11	Monday-Thursday	Final examination period
June 12	Friday	Graduate Commencement
June 13	Saturday	Undergraduate Commencement

### Summer Session 2026

June 13	Saturday	Classes begin
June 19	Friday	Juneteenth Holiday
July 3	Friday	Independence Day (observed)
August 21	Friday	Last day of classes
August 22	Saturday	Commencement

### University Holidays

September 1, 2025	Monday	Labor Day
November 27-28 2025	Thursday-Friday	Thanksgiving

December 25-31, 2025	Thursday-Wednesday	Winter Holiday
January 1, 2026	Thursday	New Year's Day
January 19, 2026	Monday	Martin Luther King Jr. Day
May 25, 2026	Monday	Memorial Day
June 19, 2026	Friday	Juneteenth
July 3, 2026	Friday	Independence Day (observed)

## 2025-2026 Academic Calendar: Semester System

### Autumn Semester 2025

August 9-15	Saturday-Friday	Orientation for first-year & JD transfer students
August 16	Saturday	Classes begin
September 1	Monday	Labor Day (no day or evening classes)
September 2	Tuesday	Last day for 100% refund
September 9	Tuesday	Last day for 50% refund
October 24	Friday	Registration for Spring 2026 (tentative)
November 10	Monday	Instructor evaluations link emailed to students
November 24	Monday	Last day of classes. Instructor evaluations close at midnight. Last day to add credit with approval/withdraw from classes. Last day for exam review--Spring/Summer 2025 finals and Fall 2025 midterms. Applications for graduation due for Spring Semester 2026 candidates
November 25 - December 2	Tuesday - Tuesday	Reading days
November 27 - 28	Thursday - Friday	Thanksgiving Holiday (observed)
December 3-17	Wednesday-Wednesday	Final examination period
December 17	Wednesday	Last day of term and graduation conferral date
December 18	Thursday	December Graduation Ceremony and Reception
December 25 - 31	Thursday - Wednesday	DU Closure for Winter Holiday
January 1	Thursday	New Year's Day
January 7	Wednesday	Grades due from faculty
January 8	Thursday	Grades released to students in My.DU.edu

### Spring Semester 2026

January 3	Saturday	Classes begin
January 19	Monday	Martin Luther King, Jr. Birthday Observed (no day or evening classes)
January 20	Tuesday	Last day to add and /or drop classes at 100% refund
January 27	Tuesday	Last day for 50% Refund
March 19	Thursday	Summer 2026 registration opens (tentative)
March 20	Friday	Fall 2026 registration opens (tentative)
March 23 - 29	Monday - Sunday	Spring Break (no day or evening classes)
April 6	Monday	Instructor evaluations link emailed to students
April 20	Monday	Last day of classes. Instructor evaluations close at midnight. Last day to add credit with approval/withdraw from classes. Applications for graduation due for Summer Semester 2026 Candidates
April 21 - 28	Tuesday - Tuesday	Reading days
April 29 - May 14	Wednesday-Thursday	Final examination period
May 14	Thursday	Last day of Spring Semester 2026 and degree conferral date
May 16	Saturday	Sturm College of Law Commencement

June 3	Wednesday	Grades due from faculty
June 4	Thursday	Grades released to students in My.DU.edu

## Summer Semester 2026

May 15	Friday	Summer Semester opens (full term/Sorrento program)
May 26	Thursday	First day Summer Session courses
June 2	Tuesday	Last day to drop classes beginning week of May 26 at 100% refund
June 8	Monday	50% Refund Period
June 19	Friday	Juneteenth-Day of Reflection (no day or evening classes)
July 2	Thursday	Instructor evaluations link emailed to students
July 3	Friday	Independence Day Observed (no day or evening classes)
July 15	Wednesday	Last day of classes. Instructor evaluations close at midnight. Last day to add credit with approval/withdraw from classes. Last day to review Spring 2026 finals and Summer 2026 midterms. Applications for graduation due for Fall Semester 2026 candidates
July 16 – 19	Thursday - Sunday	Reading days
July 20-26	Monday - Sunday	Final examination period
July 27	Monday	Last day of term and conferral date
August 9	Sunday	Grades due from faculty
August 10	Monday	Grades released to students in MyDU.edu

## University Holidays

September 1, 2025	Monday	Labor Day
November 27-28, 2025	Thursday-Friday	Thanksgiving
January 19, 2026	Monday	Martin Luther King Jr. Day
June 19, 2026	Friday	Juneteenth
July 4, 2026	Saturday	Independence Day

## Unit of Credit

### Unit of Credit

Credit hours are the unit of measure of the amount of work represented by specified learning outcomes in an academic program. Academic programs at the University of Denver are scheduled on both quarter and semester (College of Law) calendars. Each academic program specifies the number of (quarter- or semester-hour) credits required. Courses award credit based on learning outcomes for the course. For lecture courses, one credit hour represents one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-classroom student work each week the quarter or semester. Credit for non-lecture courses such as laboratories, internships, practica, studios or music performance classes represent equivalent learning outcomes. The amount of scheduled times for these courses vary.

More information regarding the University of Denver's credit guidelines and instructional methodology definitions can be found on the Registrar website (<https://www.du.edu/registrar/course/credithourguidelines.html>).

## Office of Equal Opportunity & Title IX- Policies and Procedures

The information below is accurate as of the date of publication of the Bulletin. For the current version of the University's Non-Discrimination Statement and current contact information for the Office of Equal Opportunity & Title IX (EOIX) staff members, please visit the webpages for the Non-Discrimination Statement (<https://www.du.edu/equalopportunity/non-discrimination-statement/>) and EOIX Staff (<https://www.du.edu/equalopportunity/who-we-are/>)

## University's Non-Discrimination Statement

The University of Denver prohibits discrimination and does not discriminate on the basis of an individual's actual or perceived race, color, national origin (including shared ancestry or ethnic characteristics), ancestry, age, religion, creed, disability, sex, sexual orientation, gender identity, gender

expression, marital status, pregnancy, childbirth and related medical conditions (in employment), genetic information (in employment), citizenship or immigration status (in employment), military enlistment, or veteran status, and any other class of individuals protected from discrimination under federal, state, or local law, regulation, or ordinance (each a Protected Status) in any of the University's educational programs and activities, and in the employment (including application for employment) and admissions (including application for admission), as required by Title IX of the Education Amendments of 1972; the Americans with Disabilities Act; Section 504 of the Rehabilitation Act of 1973; Title VI and Title VII of the Civil Rights Act of 1964; the Age Discrimination Act of 1975; the Age Discrimination in Employment Act of 1967; the Equal Pay Act; the Colorado Equal Pay for Equal Work Act; the Colorado Protecting Opportunities and Workers' Rights ("POWR") Act; and any other federal, state, and local laws, regulations, or ordinances that prohibit discrimination, harassment, and/or retaliation.

The University prohibits unlawful harassment of students, employees, and third parties on the basis of any applicable Protected Status identified above.

The University also prohibits retaliation against any individual for reporting, participating, administering or assisting in any matter before the Office of Equal Opportunity & Title IX (EOIX) pursuant to the University's Discrimination and Harassment Policy.

The University has designated the Associate Vice Chancellor for Equal Opportunity & Title IX/Title IX Coordinator (AVC for EOIX) to coordinate the University's compliance with federal, state, and local laws, regulations, or other ordinances referenced above:

The University's AVC for EOIX is:

Lin-Chi Wang, JD  
Interim Associate Vice Chancellor for Equal Opportunity & Title IX  
Office of Equal Opportunity & Title IX  
(303) 871-7016  
<https://www.du.edu/equalopportunity/index.html> ([https://www.du.edu/equalopportunity%22%20/t%20%22\\_blank/](https://www.du.edu/equalopportunity%22%20/t%20%22_blank/))  
[titleix@du.edu](mailto:titleix@du.edu) (%20titleix@du.edu) #orLin-Chi.Wang@du.edu

The University's Title IX Coordinator is:

Molly Hooker  
Interim Title IX Coordinator  
Office of Equal Opportunity & Title IX  
Driscoll Center South, Suite 30  
2050 E. Evans Avenue  
Denver CO 80208  
(303) 871-7016  
<https://www.du.edu/equalopportunity/index.html> (<https://www.du.edu/equalopportunity/>)  
[TitleIX@du.edu](mailto:TitleIX@du.edu) or [Molly.Hooker@du.edu](mailto:Molly.Hooker@du.edu)

The University complies with all federal and state laws that protect individuals with disabilities from discrimination based on their disability or perceived disability status. As such, the University makes available reasonable accommodations and auxiliary aids and services to individuals with disabilities when such modifications and services are necessary to access the University's programs and services.

The University's ADA/504 Coordinator is

Joshua Kaufman  
ADA Coordinator  
Office of Equal Opportunity & Title IX  
Driscoll Commons, Suite 30  
2050 E. Evans Ave.  
Denver CO 80208  
(303) 871-3941  
Accessibility | Denver (du.edu)  
<https://www.du.edu/equalopportunity/index.html> (<https://www.du.edu/equalopportunity/>)  
[ADACoordinator@du.edu](mailto:ADACoordinator@du.edu)

Inquiries about the University's prohibitions against discrimination and harassment and related retaliation under the University's Discrimination and Harassment Policy may be directed to the AVC for EOIX (for all forms of discrimination or harassment based on Protected Status) or the ADA/504 Coordinator (for disability-related questions or requests for reasonable accommodations from University Employees, applicants for employment or admission, visitors, and guests).

Complaints and inquiries regarding discrimination, harassment, and retaliation involving federal laws may be directed to:

U.S. Equal Employment Opportunity Commission  
Denver Field Office  
950 17th Street, Suite 300

Denver, CO 80202  
Telephone: (800) 669-4000  
FAX: (303) 866-1085  
TTY: (800) 669-6820

Office for Civil Rights  
U.S. Department of Education  
Denver Office  
Cesar E. Chavez Memorial Building  
1244 Speer Boulevard, Suite 310  
Denver, CO 80204-3582  
Telephone: 303-844-5695  
FAX: 303-844-4303  
TDD: 800-877-8339  
Email: OCR.Denver@ed.gov

Any person who believes the University as a federal contractor has violated nondiscrimination obligations may contact the Office of Federal Contract Compliance Programs (OFCCP) at:

OFCCP  
U.S. Department of Labor  
200 Constitution Ave. NW  
Washington, D.C. 20210  
www.dol.gov  
Telephone: (800) 397-6251  
TTY: (202) 693-133

The University provides more information about the Office of Equal Opportunity & Title IX (EOIX) on the EOIX website (<https://www.du.edu/equalopportunity/>), including the University's Discrimination and Harassment Policy (<https://www.du.edu/equalopportunity/policies-procedures/>), the EOIX Procedures (<https://www.du.edu/equalopportunity/policies-procedures/>), and the EOIX Online Reporting Form (<https://www.du.edu/equalopportunity/reporting-resources/>).

## Authorization and Disclosure

In October 2010, the Federal Department of Education issued "Program Integrity" regulations that require all Title IV eligible schools to obtain approval to operate in every state in which a student is located while receiving instruction. This is true for all educational programs, including distance education.

If an institution is offering postsecondary education through distance or correspondence education in a state in which it is not physically located, the institution must meet any state requirements for it to be legally offering distance or correspondence education in that state. In order to offer online educational opportunities to other states' residents, DU must comply with those states' policies for distance education and be able to demonstrate compliance upon request. Authorization and compliance is done through participation in State Authorization Reciprocity Agreements.

In 2014, the University of Denver was approved by Colorado to participate in the State Authorization Reciprocity Agreements (SARA) through the National Council for State Authorization Reciprocity Agreements (NC-SARA). NC-SARA is a voluntary, regional approach to state oversight of postsecondary distance education. Participating in SARA allows the university to offer online and distance education in all 49 states except California. As a private, non-profit university, the University of Denver is authorized to offer distance education within California outside of SARA.

Please direct questions about state authorization to the Office of the Registrar (<http://www.du.edu/registrar/>).

## Student Complaint State Contacts

This list below includes contact information for all 50 states, the District of Columbia and US territories and should not be construed as informative of what agencies regulate the institution or in what states the institution is licensed or required to be licensed. States, through the relevant agencies or Attorneys General Offices, may accept complaints regardless of whether the institution is required to be licensed in that state.

## Admission

Admission to the traditional bachelor's program and the bachelor of arts completion program are handled through separate offices and application processes. Requirements for both the traditional bachelor's and the bachelor of arts completion programs are outlined within this section.

## Requirements for Entrance to Special Programs and Courses

Admission to the University does not automatically admit a student to certain courses, degree programs or specialized programs. Consult the appropriate program and course descriptions in this bulletin for details concerning special admission requirements.

## Traditional Bachelor's Program

### Build the Foundation for Your Future

Open the door to a world of possibilities. As an undergraduate student at DU, you'll get a multidimensional, adventure-driven education that's rooted in a clear commitment to taking on the great issues of our time.

Enriched by distinctive learning experiences that extend from the classroom to the field, laboratory, community and professional world, your time here will be informed by diverse perspectives that deepen your understanding of local and global communities. In the end, you'll be uniquely prepared to confront an ever-evolving future and pursue a life and career of purpose.

### Innovative Degree Programs

Select from more than 100 areas of study, including both traditional and progressive offerings. We also offer compelling dual degree programs that span a variety of disciplines, including accounting, education, social work, art history, geographic information science, international studies, public policy, engineering, computer science and law.

## Admission

The University of Denver seeks students who have challenged themselves academically and who have demonstrated success in English, math, social studies, science and foreign language. In selecting each new incoming class, Undergraduate Admission considers all available information including evidence of academic achievement, contributions to school and community, extracurricular activities and leadership.

The University of Denver uses the Common Application. We encourage you to apply online at <https://www.commonapp.org/>. You can also read more about the application process and all required materials on our website at <https://www.du.edu/admission-aid/undergraduate/how-to-apply/> (<https://www.du.edu/admission-aid/undergraduate/how-to-apply/>).

Undergraduate Admission invites you to learn more about the DU experience through our many visit programs. During a campus visit, you will learn about our admission process, tour our facilities, speak with current students, investigate the different programs of study and learn about extracurricular activities and social offerings available to students.

To register for a campus visit program, go to [www.du.edu/visit](http://www.du.edu/visit) (<http://www.du.edu/visit/>) or call Undergraduate Admission at 303-871-7711.

## Admission Standards

When reviewing an application, our admission committee considers the following:

- academic achievement
- grade point average
- standardized test scores, if submitted (DU is a test-optional university)
- DU's whole-person assessment, including extracurricular activities, personal essay and letters of recommendation

### Academic Achievement

The typical accepted high school student has taken a strong, competitive class schedule, which may include honors, college preparatory, Advanced Placement and/or International Baccalaureate courses.

### Grade Point Average (GPA)

The average weighted high school GPA of students accepted for Fall 2024 was 3.77. The middle 50 percent weighted GPA ranged from 3.68–4.0.

## Standardized Tests

Academic performance in high school is the most important factor in our admission process. However, we are a test-optional university, and submitting test scores is your choice. If you choose to submit your SAT and/or ACT scores, they will be considered along with your other application materials for both admission and merit scholarships.

- DU will accept either the SAT or the ACT. SAT Code: 4842 and ACT Code: 0534.
- We do not consider subject test or writing sections.
- If you've taken either test more than once, we'll combine the best scores from the individual sections of each test to create an ideal "super score."
- If you are a student attending a non-graded high school that does not provide a letter or numerical grade, you can be considered for admission without submitting an official SAT or ACT score. However, in order to be considered for merit scholarships, you will need to submit an official ACT or SAT score.

If you have questions about the University of Denver's test-optional path, please explore the FAQs and exceptions on the [Undergraduate Admission FAQ webpage](https://www.du.edu/admission-aid/undergraduate-admission/faq/) (<https://www.du.edu/admission-aid/undergraduate-admission/faq/>) or contact your admission counselor.

The middle 50 percent test scores of students accepted for Fall 2024 were the following:

SAT	1250-1420
ACT	28-33

## Whole-Person Assessment

DU students are leaders, volunteers, artists, musicians, athletes, actors and people who contribute to their community as a whole. We want to know who you are outside the classroom, too, and we value your essays and letters of recommendation, as well as your extracurricular activities. This helps us learn how you will make a difference during your time at DU.

Overall, our committee takes a holistic approach in considering a number of factors when shaping our class each year. While academic success is the main factor in our admission decisions, we also carefully consider institutional goals and priorities. For example, to remain within our financial aid budget, and to ensure students have the financial support necessary to enroll and graduate, we are "need-aware" with some decisions (we consider a family's ability to pay, and our ability to properly fund a student).

Additionally, we sometimes consider a student's level of interest in DU, and their overall likelihood to enroll, helping our team more accurately shape and plan for a complete incoming class. Interest can be demonstrated in a number of ways, including a virtual or in-person campus visit, connecting with us at a college fair, attending a high school visit, meeting with your admission counselor, or interacting with us digitally on our website or emails.

## Programs with Additional Admission Requirements

Lamont School of Music degree programs and the Bachelor of Fine Arts in the School of Art and Art History have requirements for admission beyond the criteria listed above.

### Lamont School of Music

**For applicants to the Bachelor of Music or Bachelor of Arts in Applied Music:** In addition to being accepted for study by the University, students desiring admission to the Lamont School of Music must audition with the appropriate music faculty and complete a Lamont application. Audition requirements differ by area. Requirements can be reviewed at [www.du.edu/lamont](http://www.du.edu/lamont) (<http://www.du.edu/lamont/>). An in-person audition is preferable; however, students may submit a high quality video recording for review.

**For applicants to the Bachelor of Arts in Music Studies:** The Bachelor of Arts in Music Studies does *not* require an audition. Students pursuing that program have no additional requirements beyond those required for admission to the University.

### School of Art and Art History

If admitted to the University and the School of Art & Art History (SAAH), students interested in the Studio Art program may enter as either a BA or BFA. Studio BFA students are required to undergo the BFA Review after the completion of the Foundations sequence and should seek the guidance of studio faculty their first quarter enrolled in SAAH.

Contact the School of Art and Art History (<https://liberalarts.du.edu/art/academics-admissions/programs-ug/bfa-studio-art/>) for details.

## Early Experience Applicants

After completing their sophomore or junior year in high school, students may enroll for limited study at the University through our Early Experience Program (<https://www.du.edu/admission-aid/undergraduate/early-experience/>), provided they meet admission requirements and are recommended by a high school counselor. Courses completed can be applied toward a University of Denver degree if the student is admitted as a degree candidate.

# First-Year Domestic Student Application Options

## Application and Decision Dates

For first-year domestic students, DU offers four application programs for the fall quarter: Early Action, Early Decision I, Early Decision II and Regular Decision.

### Early Action

Early Action is a nonbinding program through which students obtain an early admission decision.

- Apply by November 1
- Decision letter: mid-December
- Deposit by May 1

### Early Decision I

Early Decision I is a binding program through which students obtain an early admission decision and commit to enrolling at the University of Denver if admitted.

- Apply by November 1
- Decision letter: early December
- Deposit by late December

### Early Decision II

Early Decision II is a binding program through which students obtain an early admission decision and commit to enrolling at the University of Denver if admitted.

- Apply by January 15
- Decision letter: early February
- Deposit by late February

### Regular Decision

Regular Decision is the final admission deadline for consideration for the fall quarter and is nonbinding.

- Apply by January 15
- Decision letter: mid-March
- Deposit by May 1

### Late Action Applications

First-year applications submitted after January 15 will be considered on a case-by-case, space-available basis.

## International Students

The University of Denver currently enrolls over 745 international students from more than 94 countries. All non-U.S. citizens applying for undergraduate admission, including U.S. permanent residents, undocumented/DACA students, and those with refugee or asylum status must complete the Common Application at <https://www.commonapp.org> (<https://www.commonapp.org/>).

### Deadlines for International Students

International first-year applicants will be considered for fall (September) admission only. Applications must be submitted by November 1 for Early Decision I or Early Action consideration or January 15 for Early Decision II or Regular Decision consideration.

The recommended application deadlines for transfer students are as follows:

Fall quarter	(September)	April 1 (priority deadline); June 1 (final deadline)
Winter quarter	(January)	November 1
Spring quarter	(March)	February 1 (limited space)
Summer quarter	(June)	May 1

All undergraduate international applicants will be automatically considered for merit-based scholarships. Applicants will be notified in their admission letter if they have been awarded a merit scholarship.

## Admission Standards for International Students

In addition to meeting all University of Denver admission requirements, non-native speakers of English must present proof of English proficiency. The University requires, at a minimum, one of the following scores:

- TOEFL (<https://www.ets.org/toefl/>) (Test of English as a Foreign Language): A TOEFL score of 80 or higher with no subscore below 18.
- IELTS (<https://www.ielts.org/>) (International English Language Testing System): An IELTS score of 6.5 or higher with no band score below 5.5.
- Duolingo English Test: (<https://englishtest.duolingo.com/>)
  - Test taken **pre-July 1, 2024**: A DET total score of 115 or higher, with no subscores below 105 for Literacy, Comprehension, and Conversation or **below 95** for Production.
  - Test taken **post-July 1, 2024**: A DET total score of 115 or higher, with no subscores below 105 for Literacy and Comprehension, and no subscores **below 115** for Conversation & Production.
- CAE (<http://www.cambridgeenglish.org/exams/advanced/>) (Cambridge Certificate in Advanced English): A grade of C or higher on the CAE.

For more information regarding English Proficiency, please visit: [www.du.edu/apply/admission/apply/international/proficiency.html](http://www.du.edu/apply/admission/apply/international/proficiency.html) (<http://www.du.edu/apply/admission/apply/international/proficiency.html>).

## English Language Courses for Non-Native Speakers

A fall quarter four-credit course, WRIT 1022 English for Academic Purposes, is required of all international students with test sub scores below the University minimum on speaking, reading, or writing. This class will assist non-native English-speaking students in developing academic writing practices and skills that they will need in their other coursework. The course will provide students with a foundational understanding of the conventions of American academic writing, peer learning and practices, and the resources needed to support their development over the course of their DU matriculation.

## Exemptions

Students who have completed academic secondary education wholly or in part in a language other than English may either take a standardized English placement test accepted by DU (TOEFL, IELTS, CAE, DUOLINGO) to determine if they need to take WRIT 1022 English for Academic Purposes, OR they may take a test, offered through the Center for World Languages and Cultures, for placement into another language in order to satisfy the DU Common Curriculum language requirement.

Students are considered for, but not guaranteed, exemption from the English proficiency score requirements and for exemption from the English for Academic Purposes course requirement if they have any of the following:

- completed final three years and earned a diploma from a secondary/high school where the language of instruction is English
- SAT Evidence-Based Reading and Writing (EBRW) score of 600 or higher
- ACT English subscore of 22 or higher
- 30 semester credits of coursework from a university or college where English is the sole language of instruction OR completion of the first-year English I and II requirements in a U.S. college or university

Students will need to complete the requirements for language as specified in the Common Curriculum (between 4-12 credits of language study). Students may work with the Center for World Languages and Cultures (<https://liberalarts.du.edu/cwlc/>) to determine language options.

For more information regarding admission of international students, see the University of Denver Office of International Student Admission website at <http://www.du.edu/apply/admission/apply/international/> or contact the office by email at [intladm@du.edu](mailto:intladm@du.edu); by telephone at +1 303-871-2790; or in person at 114 University Hall, 2197 S. University Blvd., Denver, CO ([http://bulletin.du.edu/webextlink://2197 S. University Blvd., Denver, CO](http://bulletin.du.edu/webextlink://2197%20S.%20University%20Blvd.,%20Denver,%20CO)) 80208-9401.

## Transfer Students

Each year, the University of Denver welcomes roughly 200 transfer students to our community. Qualified applicants are admitted on a rolling basis, provided space is available. An application is not considered complete until all official transcripts have been received.

### Deadlines for Transfer Applicants

Application and all supporting materials should be completed and received no later than the following dates:

Fall Quarter	April 1 (priority deadline); June 1 (final deadline)
Winter Quarter	November 1
Spring Quarter	February 1 (limited space)
Summer Quarter	May 1

### Admission Standards for Transfer Students

To be considered for admission, students transferring to DU from another regionally accredited institution must have a competitive grade point average in all college coursework. The admission committee looks for

- grades that reflect solid work at the college level—generally “B” grades or better, and
- course work that demonstrates serious intentions.

In addition, we consider any special situations or circumstances that may have influenced a student’s academic performance in college. Applicants must submit official transcripts from each college or university they have attended. If students have not successfully completed 30 college-level semester hours (45 quarter hours), they must also submit a final official high school transcript. Test scores can be submitted in this case, too, but are optional.

If you are unsure about your candidacy to the University of Denver, please call Undergraduate Admission at 303-871-2036.

## Readmitted Students

A student in academic good standing who withdraws from the University for one or more quarters (except summer session) but less than five calendar years must contact the Office of the Registrar and submit official transcripts of any college study completed during the time of absence.

Students who have not been enrolled at the University for more than five calendar years from their last term of enrollment must reapply for admission to the University through Undergraduate Admission. Students who are accepted for readmission may choose to complete their degree under the requirements of their original University bulletin or the current bulletin.

## Second Baccalaureate Degrees

A student with a bachelor’s degree from an accredited college or university who wants to earn a second bachelor’s degree from the University of Denver must meet normal admission requirements for transfer students. Please note that students pursuing a second baccalaureate degree will not be eligible for most forms of aid and will need to complete the following:

- residence requirement of at least 45 credits (one year of full-time study)
- major and minor requirements as defined by the appropriate departments and schools
- undergraduate degree requirements (p. 93)
- academic good standing (GPA of 2.0 or higher) at the time of graduation
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Consult Concurrent and Second Baccalaureate Degrees (p. 108) for specific requirements.

## Non-Degree Student

Visiting students from another college or university who wish to pursue one to three quarters of study at DU and wish to transfer the credit to their home institution may apply as a non-degree student. This also applies to students seeking limited coursework for personal interest or professional growth. A student seeking a DU degree should not use a non-degree application. Students who have previously earned a bachelor’s degree and wish to take classes should contact the Office of Graduate Education (<https://www.du.edu/graduate-education/admission/non-degree-students/>) to complete a Graduate Non-Degree Application.

A non-degree student must submit an application, official transcript from the last institution attended and a nonrefundable \$65 application fee. Coursework completed as a non-degree student may be limited and is not automatically accepted toward a degree at the University of Denver. Students wishing to pursue coursework over the summer should register as a visiting summer student (p. 35) instead.

## Visiting Summer Students

The University of Denver has open enrollment for visiting students during the summer session. Students planning to enroll for the summer without the intention of obtaining a degree from the University of Denver will be considered a visiting student. Domestic students visiting for summer quarter register directly through the Office of the Registrar; they do not apply, nor do they submit transcripts. Please visit Summer @ DU (<https://www.du.edu/summer/>) for more information.

Undergraduate level visiting students who wish to continue at the University beyond the summer session must complete an Application for Admission (<https://www.du.edu/admission-aid/undergraduate/>).

Additional information about the summer quarter is available in the academic calendar (p. 11) section of this Bulletin and on the Office of the Registrar’s website (<https://www.du.edu/registrar/>).

# Bachelor of Arts Completion Program

## Bachelor's Admission Criteria

Candidates for the Bachelor of Arts Completion Program are evaluated based on the following criteria. Entrance exams such as the ACT and SAT are not required.

1. Applicants must have completed 24 quarter hours (16 semester hours) of transferable credits in academic subjects. Applicants with between 24 and 44 quarter hours of total college credit earned may also need to submit high school transcripts or official verification of the High School Equivalency Diploma (GED) for financial aid verification purposes. Only courses where a grade of C- (1.7 on a 4-point scale) or better was earned will be eligible for transfer.
2. Applicants must have at least three years of employment/professional experience.
3. The applicant's academic and professional commitments and written language skills are evaluated through the Personal Statement, submitted as part of the admission application.
4. We consider special situations or circumstances that may have influenced previous academic performance; applicants should address these in their Personal Statement.

## Bachelor's Admission Criteria for Non-Native English Speakers

Official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), Duolingo English Test (DET) or Cambridge English: C1 Advanced are required of all College of Professional Studies applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language.

Applications will not be processed until the required TOEFL, IELTS, Duolingo, or C1 Advanced score is received. The TOEFL, IELTS, Duolingo and C1 Advanced scores are valid for two years from the test date and are considered official only when received directly from the testing agency.

- TOEFL: The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (pBT). Applicants should achieve at least 20 in all TOEFL subscores on the internet-based exam. When requesting official TOEFL scores, please refer to institutional code 4842.
- IELTS: The minimum IELTS score accepted by the University is 6.5. Each individual band score must be 6.0 or higher.
- Duolingo English Test (DET): The minimum Duolingo English Test score accepted by the University is 115. Official Duolingo scores must be received for admission review.
  - For tests taken **pre- July 1, 2024**: A DET total score of 115 or higher. Each individual subscore must be 105 or higher for Literacy, Comprehension, and Conversation and 95 or higher for Production.
  - For tests taken **post- July 1, 2024**: A DET total score of 115 or higher. Each individual subscore must be 105 or higher for Literacy and Comprehension and 115 or higher for Conversation and Production.
- Cambridge English C1 Advanced: The minimum C1 Advanced score accepted by the University is 176.
- English Language Exemption: Students are generally exempt from the English proficiency test requirement if they have one of the following:
  - Secondary/high school diploma from a school where the language of instruction is English. Or,
  - 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination.

## Bachelor's Admission Process

Bachelor of Arts Completion Program applications are reviewed for admission on a quarterly basis. Applicants will be notified of a decision via email approximately two to four weeks following receipt of all application materials. Detailed application information and application deadlines are located on the College of Professional Studies website (<https://professionalstudies.du.edu/bachelors-admission/>).

- Application: Applicants must complete the application online (<https://gradadmissions.du.edu/apply/>) ([gradadmissions.du.edu/apply](https://gradadmissions.du.edu/apply))
- Application Fee: A \$75 non-refundable application fee is required for an application to be processed.
- One Official Transcript from each Post-Secondary Institution: Applicants are required to submit an official transcript from each post-secondary institution they have attended, or are presently attending, where two quarter hours (or one semester hour) or more were completed. This includes transcripts for credit earned as transfer work and study abroad.
- Personal Statement: A statement of purpose and commitment (one to two-pages double-spaced, 300-550 words) is required. The statement should include information on how the degree will enhance professional and educational goals. Please include one example illustrating when you have been faced with a challenge and how you have overcome the challenge drawing on resources and personal strengths. In addition, please identify any obstacles that may stand in your way toward completion and ideas you have for managing these obstacles.
- Résumé/Curriculum Vitae (CV).
- English language proficiency (non-native English speakers)
- Admission Interview: An interview may be required at the program director's request.

## Undergraduate Certificate (4-Course) Admission Criteria

Candidates for the 4-course Undergraduate Certificate are evaluated based on the following criteria. Entrance exams such as the ACT and SAT are not required.

1. High school diploma or High School Equivalency Diploma (GED)

## Undergraduate Certificate (4-Course) Admission Criteria for Non-Native English Speakers

Official scores from the Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), Duolingo English Test (DET) or Cambridge English: C1 Advanced (CAE) are required of all College of Professional Studies applicants, regardless of citizenship status, whose native language is not English or who have been educated in countries where English is not the native language.

Applications will not be processed until the required TOEFL, IELTS, Duolingo, or C1 Advanced score is received. The TOEFL, IELTS, Duolingo and C1 Advanced scores are valid for two years from the test date and are considered official only when received directly from the testing agency.

- TOEFL: The minimum TOEFL score accepted by the University is 80 (iBT) or 550 (pBT). Applicants should achieve at least 20 in all TOEFL subscores on the internet-based exam. When requesting official TOEFL scores, please refer to institutional code 4842.
- IELTS: The minimum IELTS score accepted by the University is 6.5. Each individual band score must be 6.0 or higher.
- Duolingo English Test (DET): The minimum Duolingo English Test score accepted by the University is 115. Official Duolingo scores must be received for admission review.
  - For tests taken **pre- July 1, 2024**: A DET total score of 115 or higher. Each individual subscore must be 105 or higher for Literacy, Comprehension, and Conversation and 95 or higher for Production.
  - For tests taken **post- July 1, 2024**: A DET total score of 115 or higher. Each individual subscore must be 105 or higher for Literacy and Comprehension and 115 or higher for Conversation and Production.
- Cambridge English C1 Advanced: The minimum C1 Advanced score accepted by the University is 176.
- English Language Exemption: Students are generally exempt from the English proficiency test requirement if they have one of the following:
  - Secondary/high school diploma from a school where the language of instruction is English. Or,
  - 30 semester credits of coursework from a university or college where English is the sole language of instruction and examination.

## Undergraduate Certificate (4-Course) Admission Process

Undergraduate certificate applications are reviewed for admission on a quarterly basis. Applicants will be notified of a decision via email approximately two to four weeks following receipt of all application materials. Detailed application information and application deadlines are located on the College of Professional Studies website (<https://professionalstudies.du.edu/undergraduate-certificate-admission/>).

- Application: Applicants must complete the application online (<https://gradadmissions.du.edu/apply/>) ([gradadmissions.du.edu/apply](https://gradadmissions.du.edu/apply))
- Application Fee: A \$50 non-refundable application fee is required for an application to be processed.
- Official high school transcript with graduation date, official verification of the High School Equivalency Diploma (GED), or official college transcripts with credits earned after high school graduation
- Résumé
- English language proficiency (non-native English speakers)

## International Admission

### Admission Standards for International Students

In addition to meeting all University of Denver admission requirements, non-native speakers of English must present proof of English proficiency. The University requires, at a minimum, one of the following scores:

- TOEFL (<https://www.ets.org/toefl/>) (Test of English as a Foreign Language): A TOEFL score of 80 or higher with no subscore below 18.
- IELTS (<https://www.ielts.org/>) (International English Language Testing System): An IELTS score of 6.5 or higher with no band score below 5.5.
- Duolingo English Test: (<https://englishtest.duolingo.com/>)
  - Test taken **pre-July 1, 2024**: A DET total score of 115 or higher, with no subscores below 105 for Literacy, Comprehension, and Conversation or **below 95** for Production.
  - Test taken **post-July 1, 2024**: A DET total score of 115 or higher, with no subscores below 105 for Literacy and Comprehension, and no subscores **below 115** for Conversation & Production.
- CAE (<http://www.cambridgeenglish.org/exams/advanced/>) (Cambridge Certificate in Advanced English): A grade of C or higher on the CAE.

For more information regarding English Proficiency, please visit: [www.du.edu/apply/admission/apply/international/proficiency.html](http://www.du.edu/apply/admission/apply/international/proficiency.html) (<http://www.du.edu/apply/admission/apply/international/proficiency.html>).

## English Language Courses for Non-Native Speakers

A fall quarter four-credit course, WRIT 1022 English for Academic Purposes, is required of all international students with test sub scores below the University minimum on speaking, reading, or writing. This class will assist non-native English-speaking students in developing academic writing practices and skills that they will need in their other coursework. The course will provide students with a foundational understanding of the conventions of American academic writing, peer learning and practices, and the resources needed to support their development over the course of their DU matriculation.

## Exemptions

Students who have completed academic secondary education wholly or in part in a language other than English may either take a standardized English placement test accepted by DU (TOEFL, IELTS, CAE, DUOLINGO) to determine if they need to take WRIT 1022 English for Academic Purposes, OR they may take a test, offered through the Center for World Languages and Cultures, for placement into another language in order to satisfy the DU Common Curriculum language requirement.

Students are considered for, but not guaranteed, exemption from the English proficiency score requirements and for exemption from the English for Academic Purposes course requirement if they have any of the following:

- completed final three years and earned a diploma from a secondary/high school where the language of instruction is English
- SAT Evidence-Based Reading and Writing (EBRW) score of 600 or higher
- ACT English subscore of 22 or higher
- 30 semester credits of coursework from a university or college where English is the sole language of instruction OR completion of the first-year English I and II requirements in a U.S. college or university

Students will need to complete the requirements for language as specified in the Common Curriculum (between 4-12 credits of language study). Students may work with the Center for World Languages and Cultures (<https://liberalarts.du.edu/cwlc/>) to determine language options.

For more information regarding admission of international students, see the University of Denver Office of International Student Admission website at <http://www.du.edu/apply/admission/apply/international/> or contact the office by email at [intladm@du.edu](mailto:intladm@du.edu); by telephone at +1 303-871-2790; or in person at 114 University Hall, 2197 S. University Blvd., Denver, CO ([http://bulletin.du.edu/webextlink://2197 S. University Blvd., Denver, CO](http://bulletin.du.edu/webextlink://2197%20S.%20University%20Blvd.,%20Denver,%20CO%20208-9401)) 80208-9401.

## Undergraduate Programs and Requirements

The University of Denver offers bachelor's degrees through a traditional bachelor's program and a bachelor of arts completion program through the College of Professional Studies. The programs have separate application and admission processes. Each of the programs has distinct overall curriculum requirements as well as requirements associated with individual degrees.

This section of the bulletin provides information on admission and degree requirements under each program. Requirements for specific majors and minors are outlined separately in the Major and Minor Requirements (p. 115) section of the bulletin. The chart on the Degrees and Programs of Study (p. 38) page provides information about applicable degree, major and minor combinations.

## Requirements for Entrance to Special Programs and Courses

Admission to the University does not automatically admit a student to certain courses, degree programs or specialized programs. Consult the appropriate program and course descriptions in this bulletin for details concerning special admission requirements.

## Degrees and Programs of Study

The chart below lists the majors, minors, concentrations and applicable degrees available. Many majors, and some minors, may only be pursued in conjunction with specific degree programs. If a major or minor may only be pursued with a specific degree program, this is indicated by the degree acronym in the chart below.

Programs of study available as "secondary majors (p. 108)" in the traditional bachelors program, which may be pursued as a secondary curriculum regardless of the student's degree program, are also indicated below.

Program of Study	Major	Minor	Concentration	Certificate	Secondary Major
<b>Traditional Bachelors Programs</b>					
<b>School of Accountancy</b>					
Accounting	BSAcc (p. 117)	All Degrees (p. 117)			
<b>Department of Anthropology</b>					
Anthropology	BA (p. 140)	All Degrees (p. 140)			Yes

**School of Art and Art History**

Art	BA (p. 150)	All Degrees (p. 150)	Yes
Art History	BA (p. 150)	All Degrees (p. 150)	Yes

# Traditional Bachelor's Program

## Build the Foundation for Your Future

Open the door to a world of possibilities. As an undergraduate student at DU, you'll get a multidisciplinary education that's rooted in a clear commitment to taking on the great issues of our time.

Enriched by distinctive learning experiences that extend from the classroom to the field, laboratory, community and professional world, your time here will be informed by diverse perspectives that deepen your understanding of the global culture. In the end, you'll be uniquely prepared to confront the challenges and opportunities ahead.

## Innovative Degree Programs

As an undergraduate, you can choose from over 100 degree programs and focus on what inspires you. Our programs are built for exploration, meaning you can complement your degree with courses across subjects—take engineering classes as a biology major or explore international business through the lens of world history. We'll help you customize your college learning experience to match your interests and build a foundation for a career you'll love.

# Selecting a Degree Program

The University of Denver awards eleven distinct baccalaureate degrees. The curriculum for each program varies based on the major discipline and ancillary courses taken.

## BA and BS Degrees

The BA (Bachelor of Arts (p. 97)) degree is the principal undergraduate degree in the arts, humanities and social sciences and is awarded in most natural sciences as well. The BS (Bachelor of Science) degree is awarded in most natural science disciplines and Psychology.

The BA degree assures students of a breadth of study in the liberal arts and offers greater flexibility in study. For example, no more than sixty credit hours may be taken from any one department and students may declare majors in numerous disciplines. The BA degree requires 183 credits, a major (40-60 quarter hours), a minor (20-28 quarter hours) or second major as well as completion of the Common Curriculum.

The BS (Bachelor of Science (p. 100)) degree provides greater focus on the major field of study and related (cognate) subjects. The BS degree requires 183 credits. The major requires at least 45 credits, at least 25 of which must be 2000- and 3000-level courses. The BS degree requires two minors, as well as completion of the Common Curriculum. One minor must be in one of the following disciplines: Astrophysics, Biological Sciences, Chemistry, Computer Science, Electrical Engineering, Environmental Science, Geography, Geographic Information Science, Geology, Human Health Science & Systems, Mathematics, Mechanical Engineering, Medical Physics, Physics, and Psychology. Students who double major in BS programs can use the second major in place of one of the listed minors.

Academically, a Bachelor of Arts degree and a Bachelor of Science degree are equally valued. Both the BA and the BS degrees prepare students for graduate study.

## Specialized Degrees

Specialized undergraduate degrees are offered in specific disciplines, most often in fields with distinct accreditation. Specialized undergraduate degrees at the University of Denver are:

BFA Bachelor of Fine Arts (p. 98)

BM Bachelor of Music (p. 99)

BSAcc Bachelor of Science in Accounting (p. 101)

BSBA Bachelor of Science in Business Administration (p. 102)

BSCh Bachelor of Science in Chemistry (p. 104)

BSCpE Bachelor of Science in Computer Engineering (p. 105)

BSEE Bachelor of Science in Electrical Engineering (p. 106)

BSME Bachelor of Science in Mechanical Engineering (p. 107)

## Course Plans

Course plans provide a suggested progression of classes for each term. They are available for most majors under the Major and Minor Requirements (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/>) section. Course plans address course sequencing and requirements specific to each program of study.

Students will benefit from following their major course plan with additional guidance from an academic advisor. Individual course planning will vary based on incoming transfer credit, prerequisites met, course availability, multiple majors, minors, study abroad, and other scheduling factors.

Students should anticipate taking an average course load of 16 credits each fall, winter, and spring quarter to complete the minimum 183 credits required to graduate with a Bachelor of Arts (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofarts/>) or Bachelor of Science (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscience/>) degree in four years.

Students pursuing a Bachelor of Arts degree generally have the freedom to explore and discover academic interests and construct a highly personalized curriculum. Course plans in these majors tend to be flexible. Sample course plans are provided below for exploratory students interested in a non-science or engineering Bachelor of Arts major.

Students pursuing a Bachelor of Science (p. 100) or any Natural Science & Mathematics (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/divisionofnaturalscienceandmathematics/>) or Engineering & Computer Science (<http://bulletin.du.edu/graduate/schoolscollegesanddivisions/danielfelixritchieschoolofengineeringandcomputerscience/>) major need to take specific courses each term to meet prerequisites and specific course sequences. New students who are declared as or considering a science or engineering major should begin following the major specific course plan in their first quarter to maintain a four-year graduation pace.

Ideally, Common Curriculum (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegreerequirements/>) requirements other than the Advanced Seminar should be completed during the first two years. Credits earned in a Common Curriculum course may also satisfy a major or minor requirement.

### Exploratory Bachelor of Arts - Sample Course Plan 1

<sup>1</sup> SI Natural (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/selectingadegreeprogram/courseplans/si-natural-courses/>): Students not considering a science or engineering major should select a science sequence designed for non-majors. Please note that the three courses taken towards the SI Natural requirement are offered sequentially, so students should plan to take their SI Natural sequences courses in the fall, winter, and spring quarters.

<sup>2</sup> AI Natural (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/selectingadegreeprogram/courseplans/ai-natural-courses/>): Students considering a major in business should select MATH 1200 Calculus for Business and Social Science or MATH 1951 Calculus I to meet this math requirement. Otherwise, calculus is generally not required for non-science or engineering majors.

<sup>3</sup> CNP 1200 Career Decision Making is offered in fall, winter, and spring quarters and is recommended for exploratory students.

<sup>4</sup> INTS 2501 Exploring Global Citizenship is offered in fall, winter, and spring quarters and is required for any student who studies abroad. It should be taken within the year prior to studying abroad.

## Analytical Inquiry: Natural and Physical World Courses

Mathematics, formal reasoning and, more recently, computational sciences are crucial foundations for many disciplines as they enable and support formal modes of inquiry, particularly for disciplines related to the natural and physical world. For example, today's physics and engineering knowledge would be impossible without accompanying advances in mathematics. Similarly, advances in the life sciences, like genomics, rely heavily on computational sciences. Students must take one course in this area, which is designed to provide all students, regardless of the student's major area of study, the basic knowledge of how to understand and use principles of mathematics and computational sciences as a formal means of inquiry in the natural and physical world.

### COMP 1101 Analytical Inquiry I (4 Credits)

Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**COMP 1201 Introduction to Computer Science I (2 Credits)**

This course introduces the discipline of computer science and how it applies the natural and physical world and society. Topics include the history of computing, computer hardware components, the internet, ethics, and uses computation as a means to analyze, process, model, and understand our world. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Ideally taken concurrently with COMP 1351.

**COMP 1202 Introduction to Computer Science II (2 Credits)**

This course continues the introduction of the discipline of computer science by exploring major areas within it. Topics covered include examples from data structures, algorithms, databases, programming languages, parallel computing, artificial intelligence, robotics, cyber-security, data science, gaming, and ethics. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: COMP 1201.

**COMP 1351 Introduction to Programming I (3 Credits)**

This course is an introduction to fundamental aspects of computer programming. Topics covered include variables, conditional statements, iteration, functions, basic data structures, objects, file input/output and interactions. Satisfies 3 credits of Analytical Inquiry: Natural and Physical World.

**COMP 1352 Introduction to Programming II (3 Credits)**

This course continues to introduce more advanced programming topics using the Python programming language. Topics include classes, types, inheritance, methods/functions, testing, graphical-user interfaces, threads, data manipulation, functional programming, and recursion. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: COMP 1351.

**COMP 1671 Introduction to Computer Science I (4 Credits)**

Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

**MATH 1150 Foundations Seminar (4 Credits)**

The seminars offer challenging and interesting mathematical topics that require only high school mathematics. Examples of seminars are Introduction to Cryptography, Patterns and Symmetry, Mathematical Art and Patterns of Voting. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**MATH 1200 Calculus for Business and Social Sciences (4 Credits)**

This is a one-quarter course for students in business, social sciences, and liberal arts. It covers elementary differential calculus with emphasis on applications to business and the social sciences. Topics include functions, graphs, limits, continuity, differentiation, and mathematical models. Students are required to attend weekly labs. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**MATH 1951 Calculus I (4 Credits)**

Limits, continuity, differentiation of functions of one variable, applications of the derivative. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: MATH 1070 or equivalent.

**MATH 2050 Symbolic Logic (4 Credits)**

Modern propositional logic; symbolization and calculus of predicates, especially predicates of relation. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with PHIL 2160.

**PHIL 2040 Practical Logic (4 Credits)**

In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**PHIL 2160 Symbolic Logic (4 Credits)**

Principles and methods of formal reasoning, their practical and philosophical applications. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with MATH 2050.

## Analytical Inquiry: Society and Culture Courses

Through these courses, students gain knowledge essential for today's global society, recognizing that human cultures are specific to time and place and that the practices and values of different societies vary widely. By gaining greater understanding of diverse cultural products, students will be better able to understand the world today and their own place in it. Students take two courses in different subjects studied from the perspectives of the arts and humanities, exploring culture and society from different perspectives. In these courses, students learn how to analyze the products of human cultures, including works of art, music, literature, philosophy and history. Students engage critically with such works through exposure to the vocabulary, concepts and methods used to analyze those works. Students explore how ideas and creative expressions both shape and are shaped by human experiences. Students who are CAHSS majors/minors may apply one Analytical Inquiry: Society and Culture course (four credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements if that course is listed as meeting the outcomes of a section of the Common Curriculum requirements. Non-music majors may take up to four one-credit ensembles towards this requirement.

**ANTH 1910 Ancient Worlds (4 Credits)**

This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history: the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2010 Cultural Anthropology (4 Credits)**

This course is an introduction to cultural anthropology. As one of anthropology's main sub-fields, cultural anthropology provides conceptual and analytical tools for a comprehensive understanding of culture and its manifestations. It is concerned with the ways in which individual experience is inserted in social and historical contexts, providing meanings to everyday life. We will explore ideas and behaviors related to culture in different societies and social groups. Topics include culture, meaning, development, globalization, experience, kinship, identity, social hierarchy, and conflict. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of culture in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts and group discussions to apply the concepts and examine them critically. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2020 Artifacts, Texts, Meaning (4 Credits)**

How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2323 Global Health (4 Credits)**

This course is an introduction to global health. As one of the world's faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2420 Science, Technology and Human Values (4 Credits)**

This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they inform human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)**

This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARAB 1351 Tales from the Arabian Nights: Reading across Time and Space (4 Credits)**

No doubt that through their magical transformations and marvelous plots, the stories of the Arabian Nights, also known as One Thousand and One Nights, have a great entertainment value and that the imaginary setting of the tales has fascinated and inspired many authors and artists. However, this collection of stories has also significantly contributed to how the West views the Middle East: an exotic world populated by negative images such as conniving and manipulating harem women and violent and unscrupulous Arab men. The Tales of the Arabian Nights provide a unique platform for the discussion of current issues such as orientalism, stereotyping, and gender discrimination. In this course, we will select a handful of stories to serve as a catalyst for inquiry to show how this shared narrative passed on from generation to generation, has contributed to the creation of an 'exotic' East invented by the colonial West. We will show that the Middle East, like the rest of the world, is in a state of flux and the text is not a historical account of the medieval Arab world and cannot be viewed a-historically. We will unveil all the stereotypes that have been subtly, or not so subtly, implanted in the mind of the west through an often-erroneous portrayal of the Arab world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1010 Images of Culture (4 Credits)**

This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1020 Highlights of Medieval Art (4 Credits)**

The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1030 Highlights of Renaissance Art (4 Credits)**

The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1040 Sacred Spaces in Asia (4 Credits)**

This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1050 Highlights of American Art (4 Credits)**

This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterwork; learn something about the featured artist's life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 1060 Contemporary Art Worlds (4 Credits)**

Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2801 World Art I: Prehistory to c. 1000 (4 Credits)**

This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2802 World Art II: c.1000-1700 (4 Credits)**

This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2814 Medieval Art (4 Credits)**

This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expanse of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2840 Survey of Asian Art (4 Credits)**

An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)**

This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**BLST 2150 Introduction to Black Studies (4 Credits)**

Black Studies began in 1968 as a discipline dedicated to understanding and improving the lived experience of Africans and African Americans. It started with the intention of providing a safe space for Black students to exercise their intellectual creativity, while engaging in accurate portrayals of the Black experience. Introduction to Black Studies is designed for all students as a cornerstone for the Black Studies minor. This course introduces students to the breadth and depth of Black Studies as a discipline, using primary and secondary sources. Introduction to Black Studies uses historical, interdisciplinary, intersectional, and transnational grounding in the study of Black people. Focused primarily on the U.S., this course examines current theories, methods, and goals in Black Studies while allowing students to delve into some of Black Studies' most current and exciting scholarship. In this course, students will think about what freedom and democracy have meant to African American people in the United States, and the ways that they have creatively expressed these meanings over time. This interdisciplinary introduction to Black Studies combines the teaching of foundational texts in the field while reinforcing skills in reading and writing learned throughout the quarter. The course will also meet the requirements for AI-Society. This course will also be cross listed with departmental courses from the multiple programs with courses that align with the Black Studies minor (i.e. ENGL 2xxx, HIST 2xxx, and RLGS 2xxx).

**CHIN 1116 Exploring Chinese Popular Culture (4 Credits)**

Culture is a very broad and multifaceted topic. Culture is about everything, including language, art, customs, food, political and education structures, and so on. This course introduces students to Chinese popular culture through the lens of Chinese food, social media, TV shows, pop music, sports and education. Students will engage in reading and viewing texts of various media (e.g., book chapters, news articles, social media posts, television episodes, documentaries) and discussing the practices, beliefs, and stories of ordinary Chinese people. Through the in-depth exploration of a broad range of topics, students will be able to develop a deeper understanding of Chinese culture, identify and analyze the connections between Chinese culture and their personal experience, critically reflect on their own culture, and demonstrate awareness of cultural diversity. No prior knowledge of Chinese language is required. This course counts towards the Analytical Inquiry: Society and Culture requirement.

**CHIN 1516 Contemporary China in Literature and Films (4 Credits)**

This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)**

Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecoliterature and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 2516 Literary Chinatown: Stories of Chinese in America (4 Credits)**

As the oldest diasporic enclave of Chinese in the United States, Chinatown has been both a physical and historical site where Chinese immigrants have built a community and a continually contested symbolic space represented in Chinese American literature. Literary Chinatown explores the intersection of history, geography, and literature through the myriad ways of Chinatown stories by major authors in Chinese American literature across the period from the early 20th century until the contemporary moment. The focus lies on unraveling the intricate relationship between space, place, and identity, tracing the complexities of being Chinese in America at pivotal historical junctures that shed light on the U.S. nation-building process—its rejection, accommodation, and incorporation of Chinese lives. These literary works set the stage for examining the impact of war, imperialism, (neo)colonialism, and globalization on immigration, alongside domestic issues of race, class, gender, and ethnicity. We aim to unravel the Chinese American experience as portrayed in its literary recreations of Chinatown memory, fantasy, narrative, and myth within Chinese American literature. We also brought scholarly discourse on the intersectional and comparative approaches to the study of race, culture, politics, and place in Chinese American literature. The course will entail a class walking tour of the historical Chinatown area in Denver. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2020 On the Black Panther Party (4 Credits)**

This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2030 Social Movement Rhetoric (4 Credits)**

This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2210 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

**COMN 2220 Race and Popular Culture (4 Credits)**

This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Applied Communication in Personal & Public Contexts requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2400 Landmarks in Rhetorical Theory (4 Credits)**

This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2450 Between Memory & Imagination (4 Credits)**

How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2471 The Social Construction of Travel (4 Credits)**

Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2710 Critical Game Cultures (4 Credits)**

This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practices of play. This course is taught with a teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We co-construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2730 Understanding Digital Art (4 Credits)**

An exploration of digital art focused on artwork created since 2000. Topics include video art, MMO performances, interactive installations, VR, animation, and much more. Students will actively search for, share, and analyze artworks as a key component of the class. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2740 Animated Satire (4 Credits)**

This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self-discovery and vulnerability, which can contribute to empathy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2770 Exploring Digital Cultures (4 Credits)**

This course introduces fundamental concepts of digital technologies and networks from a cultural perspective. Students will critically examine the broader impact of the internet, search engines, social media platforms, algorithms, surveillance capitalism, technological bias, and online cultural exchange. How can we envision preferable futures for online cultures? What methods can be used to evaluate possible futures? Students will explore the different cultural aspects of critical speculation through theory, literature, speculative/science fiction, art, and making. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2780 Computing Culture (4 Credits)**

This course focuses on the history and theory of computing technologies, and their impact on the arts and society. Computing, in this context, ranges from ancient mechanical computers, telecommunication, and colonial infrastructure and contemporary highspeed networks, social networks, and Artificial Intelligence. How do these technologies impact modern societies? What artworks (visual art, literature, music and more) utilize computing in creative and critical ways? How can art and computing create social change? What are the negative legacies of colonialism embedded in both art and computation? What are meaningful decolonial practices stemming from the Global South and North that enable the collective stewardship of new technologies? Students will analyze technologies, art, and human creations through qualitative analysis and creative interpretations. This course fulfills the Cultures requirement for Emergent Digital Practices majors and minors. This course also counts toward the Analytical Inquiry: Society and Culture Common Curriculum requirement.

**EDPX 3770 Cybercultures: The Social Science of Virtual Spaces (4 Credits)**

This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with EDPX 4770.

**EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)**

This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated and artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 1110 Literary Inquiry (4 Credits)**

Literary Inquiry introduces students to the variety of ways that poetry, fiction, and/or drama expand our understanding of what it means to be human. Topics vary to engage students in the rewarding process of interpreting the literary art form as a unique cultural expression. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.

**ENGL 2110 The African Imagination (4 Credits)**

Focusing mainly on Africa, this course explores and connects aspects of the African imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into African aesthetics from a continental and an interdisciplinary perspective. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2120 Chaucer-Selected Poetry (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2130 World Literature (4 Credits)**

A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world—such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2221 Shakespeare Seminar (4 Credits)**

This course traces Shakespeare's development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2230 Shakespeare and Film (4 Credits)**

An examination of film adaptation and staging of Shakespeare's plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2300 English Literature III (4 Credits)**

A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2302 19th Century British Literature and the Empire (4 Credits)**

The coronavirus pandemic has intensified our focus on globalization, giving renewed urgency to matters such as human rights, racism, migration, citizenship, hospitality, and cultural difference. This course approaches these questions by looking at various reflections on globalization and "empire." While reading literary works in the nineteenth century, when the British empire extended its reach and control over literally every time zone, we also put them in dialogue with contemporary reports, databases, and fiction. We ask: How did nineteenth-century British and Anglophone authors react to issues directly relevant to and caused by imperial expansion and globalization? And how have their reflections shaped the way we think about power and inequality today? Apart from writers frequently taught in courses on British literature, we will also read British authors who are, ironically, often not classified under "British" (such as Mary Prince, an abolitionist born a slave in Bermuda, and Mary Seacole, also a woman of color, who traveled widely and served as a military nurse during the Crimean War). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2350 Early Globalisms (4 Credits)**

A study of the commonalities and connections among cultures and texts across the world from the medieval and early modern periods. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2402 Later Romantics (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2544 Globalization and Cultural Texts (4 Credits)**

The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)**

Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonialization to the Civil War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2710 American Novel-19th & 20th Century (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2718 Latina/o Literature (4 Credits)**

This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)**

This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it's for, and its forms and aesthetics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)**

This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.

**ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)**

This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2742.

**ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)**

Writers, scholars, and comedians all claim to locate an identifiable strain of "Jewish humor" running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of "Jewish humor" in American from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with JUST 2743.

**ENGL 2744 Native Americans and Indigenous Peoples in Film (4 Credits)**

In this class we will be examining a wide range of representations of native American and indigenous culture, history, and society as presented through the medium of modern cinema. We'll begin with some documentary filmmaking and critical texts to help build a foundation of applicable knowledge to assist us in formulating our critical engagements, before diving into what was one of the most influential genres in shaping perceptions of native peoples: the classic Western. From here we'll explore subsequent films increasingly positioned outside the Western genre that strived (although not always succeeding) to represent native peoples and cultures in more accurate, sensitive, and nuanced ways. These studies will lead us into the realms of filmmaking in which native and indigenous people began to assert authority and representational control over their own cinematic portrayals. First through acting, and then through the realms of writing, directing, and producing—and ultimately with native and indigenous viewers as the implied audiences. Throughout this course, we will critically view and analyze the various ways in which native American and indigenous people have been portrayed through numerous cinematic genres and forms, with attention to relevant historical, political, and social issues and contexts. This will entail a consideration of the nature of cinematic images, while thinking about the influence they exert on societal attitudes and historical understandings of native and indigenous peoples and cultures. A portion of the course we will also be dedicated to comparative representations of indigenous (Aboriginal, Māori, and First Nations) cultures in Australia, Aotearoa (New Zealand), and Canada. Of particular interest to this class will be the production and reification of prominent native/indigenous tropes, metaphors, and stereotypes, such as the conceptions of primitive culture, the binary of the noble and the bloodthirsty savage, and the romanticized figures of the so-called ecological and spiritual Indian. We will examine how these stock figures influence how native/indigenous peoples are perceived in historical and literary discourses, as well as in popular culture—while having opportunities to listen to songs and consider music videos as another site where such representations clash and merge with traditions and modern forms through their lyrical and imagistic content. Pulling back for the wide-angle shot, as it were, we will seek answer questions concerning cultural contestation and power, the relationship between film and historical and literary production, representations of the Other, cultural fetishism/colonialism, and the semiotics of popular culture.

**ENGL 2816 Advanced Writing (4 Credits)**

This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student's choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)**

This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by a range of diverse writers from Plato and Thomas More, to Charlotte Perkins Gilman, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Albert Camus, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, Claire G. Coleman, etc. \*In some years this course may count for international literature under the diversity/distribution attribute in the English curriculum. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ETHN 2104 Drumming Across the Americas (4 Credits)**

This course looks at rhythm as a fundamental organizing principle for Black music, dance, and life in the Americas. We will focus on multiple percussion-and-dance traditions from North America, South America, and the Caribbean as a window onto the people, cultures, and histories of the African diaspora. We will be especially attuned to the intersection and divergence of practices across present day national boundaries, due to political shifts and alternative cultural geographies forged through ongoing circulation of people and culture throughout the hemisphere. We will also explore trans-temporal rhythmic connections between practices originating in various eras. Overall, we will consider thematic links across genres, including issues of identity (race, gender, sexuality, ability, class), technology, freedom seeking, and spirituality. We will learn by doing, with music and dance practice at the center of our meetings. We will begin our study with the Gullah-Geechee ring shout, next engage in comparative work with Afro-Puerto Rican bomba, and finally apply the rhythmic lessons learned to the contemporary electronic practices of hip hop, reggaeton, and dance hall. Guest artists will visit some of our sessions to provide additional insight and guidance in these forms. Our practice will be supported by reading, listening/viewing, and discussion about our core styles as well as others, providing a critical framework for our creation. We will also attend several performances in order to see how these practices function in a live setting. No prior experience is necessary, only a willingness to jump in!

**ETHN 2174 Music of the Civil Rights Era (4 Credits)**

The decades of the mid-20th century were an explosion of political unrest, social change, and cultural innovation. While the world was rocked by numerous anti-colonial struggles, disenfranchised populations in the U.S. forged their own battles in what is commonly referred to as the Civil Rights Era. In this course, we engage music as a way to understand this history – both as a record and agent of change. We explore a variety of music and other art from this period, including genres related to the African American freedom movement, multiracial folk revival, and Asian American, Chicano, and Women's movements. In what ways did social movements employ culture as a political tool? What do we mean by the word "political"? How can music express politics, with or without words? How might music provide an alternative record of history? In order to address these questions and more, we will engage readings on music, politics, history, and identity. We will also view, listen to, and perform the traditions we study. Ultimately, while the tale of the Civil Rights Era is often told as separate, compartmentalized struggles based around identity, our investigations will reveal the intense interracial and intercultural political solidarities and creative dialogues that took place.

**FREN 2301 Capitalism vs. Socialism: Emile Zola (4 Credits)**

This course analyzes the complex interrelationship between the economic ideologies and practices of capitalism and socialism in the works of the nineteenth-century French novelist Émile Zola. Three novels in which these themes are a major driving force of the action will be studied. In the first, *Germinal*, the capitalist system is viewed from the outside by poor, oppressed workers who feel victimized by it. In the second novel, *Money*, the author delves into capitalism at its very heart, the Stock Exchange of Paris. He explores all its machinations but also shows the growing cracks in the system as socialist protestations make inroads at the top. The third work, *The Ladies Paradise*, proposes a possible reconciliation of capitalism and socialism, inspired in part by the writings of French socialist thinkers earlier in the century. In a new era department store, workers' rights and commercial profit are seen to be mutually beneficial. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**FREN 2302 The French Shakespeares: From Feudalism to Absolutism in 17th-Century France (4 Credits)**

This course studies the works of the three leading French playwrights of the seventeenth century: the tragedians Pierre Corneille and Jean Racine and the comic genius Molière. Each of these authors explores various forms of power play that played an important role in the society of their time. These include competitions for political dominance between the feudal aristocracy and an increasingly absolutist monarchy, between the same aristocracy and an emerging middle class, allied with the monarchy, between women and men in their conflicting assertions of rights and privileges, between traditional religion and modern secularism, between the established church and Protestants, between rival liberal and conservative factions within the established church, and between Christian Western Europe and the Muslim Ottoman Empire. Students will read and analyze two plays by each of the three dramatists. This course counts toward the fulfillment of the Analytical Inquiry- Society and Culture requirement.

**FREN 2303 Victor Hugo: Les Misérables and The Hunchback of Notre-Dame (4 Credits)**

The course deals with two famous novels by Victor Hugo: *Les Misérables* and *The Hunchback of Notre-Dame*. Though written in the nineteenth century, these works explore themes that are relevant in contemporary society, like racism, sexism, injustice, marginalization, and poverty. *Les Misérables* is the story of a man, Jean Valjean, a victim of social injustice who redeems himself to become a generous humanitarian, saving himself and everyone around him. This novel explores many social issues and calls out for reform. Discrimination against women and their mistreatment by a paternalistic system is a major theme. The inhuman exploitation of the poor, the homeless, and the marginalized is another major subject. This exploitation can lead to extreme suffering for some people and to criminal behavior for others. Hugo emphasizes the influence of the spiritual in human life. Individuals, even emperors like Napoleon, are invited in different ways to respond to divine love, but some are more able to do so than others. Hugo wrote *The Hunchback of Notre-Dame* to inspire the French public to save the famous cathedral, almost destroyed recently, from demolition back in the 1830s. He tells the story of Esmeralda, a beautiful, kindhearted, and talented young woman, who is a victim of discrimination and persecution because she is a woman and a person of color. She is loved by four men, each of whom contributes, wittingly or unwittingly, to her ultimate destruction. The cathedral itself and the Blessed Lady for whom it is named (Our Lady of Paris) are also major characters. The author shows that the same injustices, inequalities, and prejudices that he tried to combat in his own time already existed in the Middle Ages. Students will refine their critical reading and writing skills as well as substantially develop their argumentative skills. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**FREN 2304 Francophone Women Writers in Translation (4 Credits)**

Why do so many contemporary authors, whose ancestors came from various regions of Africa, Continental Southeast Asia, or the Caribbean's, choose to write their works in the French language? The reasons are to be found in the historical oppressive colonization of these parts of the world by the French Colonial empire of the 19th and early 20th centuries. In this course, we will turn our attention to four contemporary female writers, whose texts we will read and study in their English translation. We will discover the works of Guadeloupean author Maryse Condé, *Tales from the Heart*; Franco-Algerian author, Nina Bouraoui, *Tom Boy*; Vietnamese Canadian author Kim Thúy, *Ru*, and Ivorian author Véronique Tadjo, *In the Company of Men*. Each of these contemporary texts will present us with the often tragic, and also paradoxically heart-lifting, consequences of having to express oneself in the language of the historical oppressor. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**FREN 2401 Conversation et composition (4 Credits)**

This course features intensive practice in spoken and written French, combined with study of a topic in French and Francophone literature and culture. The course also serves as an introduction to critical analysis and appreciation of French and Francophone literary texts. Course content differs from FREN 2400. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills. Prerequisite: FREN#2003 or equivalent.

**FREN 2500 Qu'est-ce que la littérature? (4 Credits)**

Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or equivalent.

**FREN 2501 La Nature et les animaux (4 Credits)**

Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (*La Fontaine*) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the "normal" places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course may be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

**FREN 2502 La France et ses autres mondes (4 Credits)**

**FREN#2502 La France et ses autres mondes (4 Credits)** This course reexamines the historical relations and power dynamics between France and its "other" worlds. How and why has France built and maintained its empire in Africa, Asia, and the Americas? How do the leaders of the Francophone world cope with the politics of hegemony put in place by the (ex)rulers? How do the former question and reject the latter in their quest for self-affirmation and nation building before, during and after independence? Our wide range of Pan-Francophone textual and filmic selection from prominent writers and filmmakers will help us answer these questions and classic and newly emerging notions of civilizing mission, Francophonie, Francosphere, postcolonialism, neocolonialism, Afropeanism and Afropolitanism. This course is conducted in French. It counts toward Analytical Inquiry: Society and Culture. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills. Prerequisite: FREN#2003 or equivalent.

**FREN 2503 La Satire (4 Credits)**

This course is an introduction to satire in French and Francophone literature. A classical literary technique of denunciation, satire has been recently adopted and adapted in popular televised shows (*Les Guignols de l'info* in France, *Kouthia Show* in Senegal, *SNL* in the US) to recapture important sociopolitical events throughout the world. In our selection of literary texts, films, and sketches such as we will analyze why and how authors make use of satire to denounce the most prevailing problems faced by French and Francophone societies at given times of their historical trajectories. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN#2003 or equivalent.

**FREN 2504 La Culture au Cinema (4 Credits)**

We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of "French" culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

**FREN 3505 Masques du moi (4 Credits)**

Qui suis-je??? The question of self, identity, and discovering "who I am" has preoccupied many writers, filmmakers, or other artists. Identity, or one's sense of self, can be shaped by families, personal experiences, or social and historical forces. Writers might recount the "true" facts of their lived experience or mix in some fictions as they fashion a story of the self. This course will explore the diverse ways that autobiography and others ways of "writing the self" represent the relation of self, world and word. Examples will come from French and Francophone contexts. The class is conducted all in French and emphasizes discussion, writing, and critical thinking. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: Two courses in the 25XX series or their equivalent.

**GERM 1022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)**

This course is taught in English. It is an invitation to German film-making since the end of the First World War. In this class we will explore 20th-century German identity, culture, history, and politics through film analysis and readings. Studying the most famous and influential films in the history of German cinema, we will explore numerous topics (including "The Golden Twenties", national-socialistic propaganda, post-WWII German nation states, terrorism, reunification, multiculturalism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society at different times in German history. This course fulfills the Analytical Inquiry: Society and Culture requirement.

**GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)**

This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERM 1417 Recasting German Identity: Germany since the End of the Cold War (4 Credits)**

Recasting German Identity: Germany since the end of the Cold War examines how Germany, a once divided nation in the heart of Europe held responsible for two World Wars, has wrestled to overcome forty years of division between a capitalist West- and communist East Germany. Our class will examine both the pains and gains of 30+ years of unity in the 'Berlin Republic'. We will analyze the so-called "normalization" of Germany's contemporary internal and international affairs. At the center of our class are various political, historical, but mostly cultural developments (& intellectual debates) that have reshaped German identity in profound ways given the country's exceptionally violent 20th century history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GWST 2212 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.

**GWST 2215 Selling Sex, Gender and the American Dream: 1950 - Present (4 Credits)**

This introductory course analyzes how commercial culture has evolved into the defining cornerstone of American life over the last sixty years. The first half of the quarter will examine the key historical movements including the Cold War, the Civil Rights/Women's and Gay Liberation movements and investigate how women, ethnic minorities, and members of the LGBTQ community evolved into important "consumer citizens" in the United States. The second half of the quarter will examine these same social groups from a contemporary perspective, and the degree that globalization, "multiculturalism" and "going green" have emerged as dominant tropes in contemporary culture. By moving from past to present, students will gain an understanding of the complex connections between consumption and U.S. nation-building, as well as the consequences "shopping" and the accumulation of "stuff" has had in both the shaping and reconfiguring understandings of what it means to live the "American Dream." This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GWST 2710 Introduction to Queer Studies (4 Credits)**

This course provides an introduction to the discipline of Gender and Women's Studies by focusing on mostly queer theory. Queer theory is a comparatively new approach to understanding gender, sexuality, and the world around us, and it has created controversy and disagreement regarding its aims and approaches. What does it mean to queer something? Why is language — the words that we use and that are used on us — so important to queer theory, and what does it mean for how we approach ourselves and those around us? The world in general? How is queer theory different from, and complementary to, women's and gender studies broadly speaking? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GWST 2720 International Perspectives on Gender (4 Credits)**

Gender studies is not only an American phenomenon, but has also developed and changed as it has developed around the world. This course examines gender studies in various countries and societies worldwide through critical works and novels in order to raise new and unexpected questions about our place in the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HEBR 2370 Multicultural Israel: Food, Film and Beyond (4 Credits)**

In this course participants will examine Israeli culture and identity using a broad array of materials and topics, including popular music, film, sports, and food. Topics include Israel's society, ethnic relations, and the Arab minorities in the Jewish state. Students also discuss whether there is a unique Israeli culture and the struggle for Israel's identity. Emphasis is on interdisciplinary approaches to exploring how cultural processes and artifacts are produced, shaped, distributed, consumed, and responded to in diverse ways. Through discussion, research, writing and various media resources, class members investigate these varied dimensions of culture; learn to understand them in their broader social, aesthetic, ethical, and political contexts. This course fulfills the Analytical Inquiry - Society & Culture common curriculum requirement.

**HEBR 2380 Multicultural Israel through Popular Music (4 Credits)**

The music of Israel is a combination of Jewish and non-Jewish music traditions that have come together over the course of a century to create a distinctive musical culture. This course presents a brief cultural history of Israel through popular music. To examine the central and lively role that songs have played in the shaping of Israeli identity, this class examines a range of diverse lyrics, including selections from folk music, pop and rock music, Levant influenced music, and more. Topics covered include Shirei Eretz Israel (the songs of the land of Israel), military ensembles, song festivals and competitions, the rise of minorities, outstanding performers and songwriters, international influences, and media's impact on audience preferences. This course fulfills the Analytical Inquiry: Society and Culture common curriculum requirement.

**HIST 1110 Ancient Rome (4 Credits)**

This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1240 Comparative History of Medicine (4 Credits)**

This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1250 Food in East Asian History (4 Credits)**

This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1260 Modern South Asian History (4 Credits)**

This course will explore the modern history of the subcontinent, through the colonial experience to the postcolonial construction and division of nations, with a particular focus on India, Pakistan, and Bangladesh (although students are also welcome to take on optional readings on Sri Lanka, Afghanistan, and Nepal, among others). The course will consider the legacy of colonialism in India, and debates over whether postcoloniality is really "post." We will explore the history of nationalisms – state, ethnic, religious, and linguistic – and the ramifications of Partition and the wars over Bangladesh and Kashmir. This course will also explore the history of South Asia in the rest of the world, through the migration of its diaspora and its role in the Bandung moments of Afro-Asian solidarity in the global struggle against oppression. We will take into account discourses regarding tradition and modernity, democracy and secularity, and the terms "freedom" and "terror" – and what this means for the lived experiences of South Asians in today's world. Readings will include historical accounts, theoretical texts, films and literature, as well as primary sources. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1320 European Culture in the World Wars (4 Credits)**

This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments' attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1330 History of Ireland (4 Credits)**

We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of 'Irishness', competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland's evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1340 The British Monarchy (4 Credits)**

This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1350 History of the British Empire (4 Credits)**

This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland; explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political; the important role that women, gender, and racial ideologies placed in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1360 World War One (4 Credits)**

Historians have argued that the First World War definitively shaped the twentieth century. It set the stage for World War II; it redefined the role of government in citizens' lives; it brought technology full-force into power struggles between nations; it simultaneously birthed communism and fascism; and it desensitized entire generations to violence and brutality. In this class, students explore this very dramatic and influential war. Students unfamiliar with the war will more firmly grasp the historical significance of the event while students who may be familiar with the war will gain new insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.

**HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)**

When we think of the Middle Ages we tend to think a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words 'Here There Be Dragons.' And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)**

From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1510 War and the Presidency (4 Credits)**

This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1520 Immigrant Voices in Modern America (4 Credits)**

This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony—autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1530 History of the United States since 1865 (4 Credits)**

From the devastation left by slavery and the Civil War to the dizzying changes brought by globalization in our own time, this course sweeps through the last 150 years of the American experience. We wrestle with questions like the following: How did the Industrial Revolution, the Great Depression, two world wars and the Cold War change America, and ordinary Americans' everyday lives, and what legacies did these events leave for our own day? How have Americans defined and divided themselves—by race, gender, class, or otherwise—and how have such categories shifted over time? Where did we get our political parties and ideologies? Our work habits and habits of play? Our ideas about "big business," "big government," "American exceptionalism," or the "American dream"? As we consider these and other big questions, we also explore how historians make sense of U.S. history, and how we can make it relevant to our own times and our own lives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1550 America in the Sixties (4 Credits)**

This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes "the sixties"? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)**

The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography's 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1570 Pioneering in Colorado: Land, Bodies, & Violences in the Sand Creek Massacre (4 Credits)**

This course uses critical analysis of primary sources to understand Sand Creek as a crucial site necessary to understand the history of Colorado and Denver University. Students will critically read and analyze primary source documents including newspaper articles, testimonies from massacre participants and survivors, artwork, material culture, letters, oral history, music, and proclamations to understand Sand Creek as a place and a history related to the creation of Colorado and Denver University. Additionally, the class will visit specific sites associated with Sand Creek to understand place-making and memorialization as a function of historical meaning-making and analysis. These sites include the Sand Creek Massacre site, History Colorado, the Silas Soule memorial plaque, and Riverside Cemetery (where Silas Soule and Joseph Cramer are buried). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)**

This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)**

This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1705 Modern African History (4 Credits)**

This course is a survey and introduction to modern African history from the late 19th century to the present. We will explore the period of European colonialism and its postcolonial legacy, focusing on the experiences of Africans at this time. Themes addressed in this class will include gender, age, class, race and ethnicity, and the historical legacies of both the precolonial and colonial eras to the construction of the postcolonial nation-state. Assignments will be geared towards teaching students to think and write like historians, and understand the basic tenets of historical inquiry, such as how to use primary and secondary sources and differentiate between them, and construct a basic historical argument that advances historiographical understandings of the topic in question. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1715 Middle Passages: Atlantic World Migrations (4 Credits)**

Middle Passages examines first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians in order to trace the origins, expansion, and decline of traffic in captive Africans in addition to its impact on four continents. The course seeks to answer, among others, the following questions: Why were Europeans in Africa? Why were Africans enslaved? What did African experience on the journey to slavery in the Americas? Which came first, racism or slavery? What is the middle passage? If we want to understand how the US (and not only the South), Western Europe, parts of Latin America, and much of Africa got to be how they are now, we need to know something of the human commerce that profoundly shaped them. In this course, students consider individual, national, and institutional experiences of the Middle Passage by exploring a textbook that overviews the histories of the trans-Atlantic Slave Trade and accounts from a series of primary sources.

**HIST 1725 African American History to the Civil War Era (4 Credits)**

History 1725, African American History to the Civil War Era, is designed to introduce students to the trends, events, issues, and people that shaped African American history from Colonial America through the Civil War. In particular, this course will focus on presenting Black people as active agents in the American historical narrative that significantly shaped their lives even within the context of slavery. To this end, this course sets out to discredit American myths about people of African descent, examine critical elements of black slavery and freedom in the United States, analyze the slave experience with particular emphasis on black resistance and resiliency, and identify the economic, political, and social factors that shaped and were shaped by African slaves, their descendants, black communities and institutions, and plantation society. If we want to understand the US (and not only the South), but we also need to know something about how human commerce and those that became commodities profoundly shaped the nation. By examining first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians, we trace the origins and narratives of Africans in America and their descendants. We seek to answer, among others, the following questions: Why were Africans enslaved? What did Africans and their descendants experience in slavery in the Americas? What did free and freed African Americans experience in the Civil War era? What influence did African Americans have on the North and South conflict and its resolution? In addition to treating the above questions, I intend to return often to two major content themes. First, this class is concerned with tracing the historical contours of the African American experience in America, noting the similarities in experiences of different gender, age, and (dis)ability categories and yet important variations over time and place. Understanding this experience is crucial for a comprehensive understanding of American history. Second, we explore the changing influences of labor and capitalism and how they shape people, places and institutions. We note in this course that African Americans fundamentally affected the social and economic lives and futures of the world, underscoring the global relevance of this history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1850 20th Century LGBTQ History in the United States (4 Credits)**

This course uses a cultural history approach to explore the experiences of lesbian, gay, bisexual, transgender, and queer peoples in the "long twentieth century" (1880s-2010s) United States. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1900 Veterans Stories (4 Credits)**

This course will examine the history of Veterans and Veteran issues in the United States from the Civil War to the present. Students will learn about Veteran issues from multiple guest speakers and work to preserve and commemorate the historic contributions of Veterans. Students will participate in a variety of research projects, including conducting oral histories/interviews with members of Denver's Veteran community, regarding their life experiences and their military service. Students will also research the lives and legacies of Veterans buried at Fort Logan National Cemetery, in the service of various Veteran community projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2022 The Roman Empire (4 Credits)**

This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2260 Jewish Food: From the Bible to Bagels (4 Credits)**

"We are what we eat," the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion, consumption, and identity. The study of Jewish food practices is a study of dualities: kosher and trayf (non-kosher), meat and milk, modernity and tradition, insiders and outsiders, men and women, authentic and artificial, ethical and unethical, and more. Beginning with biblical laws about permitted and forbidden foods and ending with a study of the emergence of the modern kosher food industry in the United States, our course will examine how Jewish food and foodways have evolved over thousands of years in response to social, political, cultural, and economic change. We will explore the links between Jewish food practices and local cultures in order to understand how each one shapes the other, and to become familiar with the diversity of Jewish foodways across the Diaspora and within Israel and the Middle East. We will also explore the politics of authority and authenticity with regards to Jewish food — what makes a food "Jewish" or kosher, and who decides? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2320 US Foreign Policy in the Middle East (4 Credits)**

This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.

**HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)**

In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2910 Colonial Latin America (4 Credits)**

This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2920 The Making of Modern Latin America (4 Credits)**

This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2955 Latin America at the Movies (4 Credits)**

This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2201 Italy: Modern History, Culture (4 Credits)**

This course provides a historical and cultural approach to modern Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2355 Images of Rome in Literature & Film (4 Credits)**

The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorsteps than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)**

This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1216 Popular Culture of Japan (4 Credits)**

In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2200 Multicultural Japan (4 Credits)**

Multiculturalism in Japan has evolved significantly over the years, reflecting a blend of historical influences and contemporary shifts. Historically, Japan has been considered relatively homogeneous, with its diversity largely shaped by interactions with neighboring countries such as China and Korea. However, in the modern era, Japan has increasingly embraced multiculturalism, evidenced by its growing acceptance of foreign residents and international influences. The Japanese government and society have made strides in recognizing racial and ethnic diversity, though challenges remain, particularly for marginalized groups such as the Ainu, Ryukyuan, and other minorities. Gender diversity has seen notable progress, with movements advocating for gender equality and the rights of women gaining momentum, despite persistent traditional norms. Additionally, LGBTQ+ rights have been gradually advancing, with increasing visibility and legal recognition for sexual orientation and gender identity issues. Geographic diversity is also notable, with distinct cultural identities preserved in regions like Hokkaido and Okinawa, enriching the nation's multicultural fabric. The ongoing dialogue around race, gender, and sexual orientation continues to shape a more inclusive and varied Japanese society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2400 Hey, Girl, Hey: Japanese Girlhood from the Moga to Shōjo (4 Credits)**

This course explores the figure of Japanese girlhood from the Moga "modern girl" of the early twentieth century to the contemporary figure of the shōjo. Japanese cultural production has had a significant impact on East Asian girl's media in the pre-war period and again in the post-war to contemporary period. The course will explore the "modern girl" in all her iterations, from European modernism to East Asia, Africa, and the Americas, especially in the contexts of colonialism and nationalism. The course also considers the roles of girls and women in the formation of the modern state(s) and contemporary societies across East Asia, and juxtapose those roles to how girls and women are depicted in fiction and media. Students will trace the transition from the comparative modernisms legible in the figure of the moga to the transnationally circulated figure of the shōjo.

**JAPN 2450 Superflat: Postmodern Japanese Literature and Media (4 Credits)**

When Yoshimoto Banana won the prestigious Kaien Newcomer Writers prize in 1989, the head of the judging panel said of her novel *Kitchen*: “[*Kitchen*’s] naïve rejection of the very question of whether it does or does not conform to conventional concepts [of literature] is precisely what makes it strike me as a new sort of literature.” As confounding as *Kitchen* was for literati, it struck a chord not just within Japan but also without, ushering Japan’s postmodern literary movement. Yoshimoto, Murakami Haruki, Kanehara Hitomi, Sayaka Murata, and many more globally famous Japanese writers often write in this vein, a vein in which the effusive and maudlin introspection of previous literary generations is set aside in favor of an amorphous, consumerist literary style that might best be described by Murakami Takashi’s contemporary “superflat” artwork. In this class, through literature, visual arts, and film media, students will consider conceptions of “postmodern” in the context of Japan. What is this “new sort of literature?” Why did it emerge in the 80s and why has it persisted? Why do these works seem to circulate so well on the global market, even as critics in Japan have expressed dismay at their “naïve rejection” of what came before? By considering aspects of aesthetics, affect, consumerism, we will explore this “postmodern” “superflat” media landscape and discuss how it impacts our experiences in and of the world, especially in the realm of popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2500 Cultures of the Floating World (4 Credits)**

During the Edo period (1600-1868), the literature and visual culture of Japan flourished after centuries of devastating warfare. The floating world of kabuki theaters, woodblock print culture, and the pleasure quarters arrested the imagination of the populace and attracted the unwanted attention of governmental authorities. Over the course of the Edo period, the shogunal government expelled Christians from Japan, the city of Edo became the largest in the world, and woodblock print culture spread throughout the Japanese archipelago. Through reading various genres of literary and cultural production, students will explore how society shapes culture and culture shapes societies. Topics include: premodern literary representations of love and eros, the emergence of the “floating world print” (*ukiyo-e*), Christians as Others, representing landscapes and the past in *haikai* poetry and prose, early modern comic books, and vendetta stories. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2700 Classical Japanese Women Writers: The Poets, Priestesses & Princesses in their Literary Golden Age (4 Credits)**

The course explores the extraordinary female-centered belles-lettres of classical Japanese literature, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, *zuihitsu* and personal essays, the classic *Tale of Genji*, and literature of religious hermetic and travel diaries. The course will critically consider how women writers were able to flourish in this period and interpret their literary output through a consideration of the cultural and historical context for the texts. This course will also deploy principles of literary analysis and interpretation.

**JUST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)**

This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with HIST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 1610 The History of the Crusades: 1095-1300 (4 Credits)**

This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 1610.

**JUST 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group’s significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with RLGS 2012.

**JUST 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with ‘God’ understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre’s non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and RLGS 2014.

**JUST 2025 Coexistence (4 Credits)**

Building skills for ethical, emotionally-intelligent, and equity-minded encounter, this course is about facing neighbors responsively, responsibly, and non-violently—even when our values clash, and even as we work to defeat each other in the voting booth. Exploring new civic modes of “dialogue across difference” and serving as an antidote to polarization and rising tides of hate, the course invites students to consider new ways of holding onto their own views, values, and identities without erasing others—but also without necessarily embracing or being embraced by them. And it does so while helping them understand and utilize “phenomenology,” a philosophical method for assessing “lived feels” in complex relation to human meaning-making in a range of personal, professional, and political contexts. Focused in particular on interhuman coexistence, the course attends to the three-fold human cord of “our structures, our neighbors, and our selves.” It invites students to navigate between structural equity, interpersonal ethics, and personal authenticity. And it equips students to consider the “feels,” “flavors,” and “temperatures” of different coexistence strategies: from the lukewarm framework of tolerance to the warm embrace of friendship to the complicated contours of responsibility-without-friendship in such thinkers as BIPOC thought-leader Martin Luther King, Jr, philosopher and Holocaust Survivor Emmanuel Levinas, and political theorist Karl Marx. Helping students consider what sorts of coexistence goals are most and least appropriate for different contexts and why, the course asks questions like: When it comes to opponents, should we be aiming to befriend them or is it sometimes OK to set the bar lower? Should we try to “find common ground” or is it sometimes OK to “agree to disagree”? Is bridge-building always the best goal, or do we sometimes need to learn to live alongside one another without violence but also without bridges? Drawing on an inclusive reading list of BIPOC, Jewish, Islamic, Christian, African, Indigenous, and Japanese traditions, the course delves into Ubuntu principles of coexistence alongside Aztec principles of selfhood, BIPOC principles of justice alongside spiritual and atheist existentialisms, Queer Chicana feminism alongside the practice of Kintsugi, spiritual calls to love alongside political calls to respect, multicultural calls to recognition alongside social justice critiques of such calls, philosophical traditions of friendship alongside critiques of civility, and ancient wisdom traditions hand-in-hand with popular contemporary insights from Brené Brown’s work on vulnerability and Harvard’s near-century-long study of happiness. The course also explores the dangers of Islamophobia and Antisemitism; includes a visit to the campus’ Holocaust Memorial Social Action Site inspired by “radical ethics”; considers new modes of activism; and invites participants into a “Belonging and Expression” framework for navigating possibilities and tensions in important joint calls to social justice and freedom of expression. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is crosslisted with PHIL and JUST.

**JUST 2050 Jewish Philosophy (4 Credits)**

This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2050.

**JUST 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and RLGS 2104.

**JUST 2202 New Testament (4 Credits)**

This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2202.

**JUST 2260 Jewish Food: From the Bible to Bagels (4 Credits)**

“We are what we eat,” the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion, consumption, and identity. The study of Jewish food practices is a study of dualities: kosher and trayf (non-kosher), meat and milk, modernity and tradition, insiders and outsiders, men and women, authentic and artificial, ethical and unethical, and more. Beginning with biblical laws about permitted and forbidden foods and ending with a study of the emergence of the modern kosher food industry in the United States, our course will examine how Jewish food and foodways have evolved over thousands of years in response to social, political, cultural, and economic change. We will explore the links between Jewish food practices and local cultures in order to understand how each one shapes the other, and to become familiar with the diversity of Jewish foodways across the Diaspora and within Israel and the Middle East. We will also explore the politics of authority and authenticity with regards to Jewish food — what makes a food “Jewish” or kosher, and who decides? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2320 US Foreign Policy in the Middle East (4 Credits)**

This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America’s Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 2320.

**JUST 2360 Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life (4 Credits)**

This course analyzes fundamental aspects of Israeli-Jewish collective identity through a consideration of the trauma of the Holocaust, and explores the representation of these issues in Israeli film from the 1960s to today. The course presents and analyzes narratives of human experience in traumatic times and their after-effects via cinematic perceptions of Holocaust survivors and their offspring, the relationship between the Israeli native Sabra and the Holocaust survivor, the impact of war on soldiers and their families, and the Israeli experience of terror. Screenings of Israeli film is a central part of the course. All films are in Hebrew with English subtitles. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**JUST 2370 Multicultural Israel: Food, Film and Beyond (4 Credits)**

In this course participants will examine Israeli culture and identity using a broad array of materials and topics, including popular music, film, sports, and food. Topics include Israel's society, ethnic relations, and the Arab minorities in the Jewish state. Students also discuss whether there is a unique Israeli culture and the struggle for Israel's identity. Emphasis is on interdisciplinary approaches to exploring how cultural processes and artifacts are produced, shaped, distributed, consumed, and responded to in diverse ways. Through discussion, research, writing and various media resources, class members investigate these varied dimensions of culture; learn to understand them in their broader social, aesthetic, ethical, and political contexts. This course counts toward the common curriculum requirement of Analytical Inquiry: Society & Culture.

**JUST 2380 Multicultural Israel through Popular Music (4 Credits)**

The music of Israel is a combination of Jewish and non-Jewish music traditions that have come together over the course of a century to create a distinctive musical culture. This course presents a brief cultural history of Israel through popular music. To examine the central and lively role that songs have played in the shaping of Israeli identity, this class examines a range of diverse lyrics, including selections from folk music, pop and rock music, Levant influenced music, and more. Topics covered include Shirei Eretz Israel (the songs of the land of Israel), military ensembles, song festivals and competitions, the rise of minorities, outstanding performers and songwriters, international influences, and media's impact on audience preferences. This course counts toward the common curriculum requirement of Analytical Inquiry: Society & Culture.

**JUST 2390 Music in Jewish Spiritual Life (4 Credits)**

This course exposes students to the variety of music and musical practices encountered in contemporary Jewish worship spaces, broadly defined. In addition to standard academic modes of learning, the course has an extensive experiential component in which students sing, chant, and meditate together for long durations without inhibition. The "Jewish worship spaces" in question have diverse geographical origins, ranging from North America and Eastern Europe to communities with origins in North Africa and the Middle East, and students will learn of the musicians involved, the liturgy they sing, their historical lineages, approaches to pitch organization and meter, and relationship to past practices. Assessment is made through writing assignments (an essay on music and spirituality, an album review, and a listening journal), midterm and final exams, moderation of class discussions of reading and music, and participation in experiential components of the course. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2400 Israel Unfiltered: Identity, Humor, and Culture (4 Credits)**

In Israel Unfiltered, students will examine the rich and complex tapestry of Israeli culture and identity through interdisciplinary approaches. Topics in this course may include – but are not limited to – the concept of Israeli identity, humor, memes, innovations, startup culture, and the Israeli army, with attention to the diverse experiences of women, LGBTQ+ soldiers, Orthodox Jews, and the role of cellphones and social media in military life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2741 American Jewish Literature (4 Credits)**

This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2741.

**JUST 2742 Modern Hebrew Literature (4 Credits)**

This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2742.

**JUST 2743 Jewish Humor: Origins and Meaning (4 Credits)**

Writers, scholars, and comedians all claim to locate an identifiable strain of "Jewish humor" running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of "Jewish humor" in America from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with ENGL 2743.

**JUST 2750 Italian Jewish Literature and Cinema (4 Credits)**

This course is cross-listed with ITAL 2750. It offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**LANG 1100 You say /T##ME#.TO#/, I say /T##M##.T##/: How Linguistic Prejudice Shapes Our World (4 Credits)**

We all have accents—even as babies! We also all have opinions about the way others talk: why do we find certain accents attractive? Why do our language pet peeves irritate us? Why does this description use words like “attractive” and “irritate” rather than “sexy” and “piss us off”? These are the sort of questions this course will explore. As an introduction to sociolinguistics with an emphasis on language attitudes, it will investigate how unconscious language habits both reflect and reinforce real-world power dynamics. We will discuss why people talk the way they do, what real-world consequences that has, and how best to deal with our own linguistic prejudices. As a hands-on course, instead of listening to lectures and taking tests, you will learn by engaging in the same kinds of activities that working sociolinguists do every day: reading papers, reflecting on the language you hear in your everyday life as well as in popular culture, and carrying out investigations to dig deeper when your interest is piqued. The course focuses on English language variation in the United States, and although other languages and cultures will be discussed, no foreign language knowledge is necessary. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2000 Introduction to Film Criticism (4 Credits)**

Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2170 Globalization and Film (4 Credits)**

MFJS 2170 (Globalization and Film) explores the varying ways that globalization impacts cinema on a national and transnational level. This course is broken down into three units: theories on globalization; implications of globalization behind-the-scenes; and representations of globalization onscreen. Through a selection of assigned readings and filmic texts, you will be encouraged to think critically about what “globalization” means and how it influences films, both behind-the-scenes and onscreen. In addition to several in-class screenings, you will be required to view a few films on your own. Finally, you will have the opportunity to research and write original scholarship on one of two angles to engage further and apply course material: 1) the impact of globalization on the film industry of your choice, or 2) the impact of globalization on representational issues in the film of your choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2290 Innovations in Media, Artificial Intelligence, & Communication (4 Credits)**

This course considers information and communication technologies in relation to “the new,” exploring the ways that technological, historical, legal, economic, and social contexts combine to enable the changes that we think of as innovations in media and communication. Taking a critical/cultural historical perspective, we explore questions such as where technologies come from, who controls them, who profits from them, how they are used, and with what potential implications? We also consider how today’s artificial intelligence technologies are similar to and different from the new technologies of previous ages, how bias and misinformation are (re)produced, and countermovements such as “slow” technology, with an eye toward imagining what the future might hold. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1000 Fundamentals of Music Theory (4 Credits)**

Meant for students with little to no experience with music notation, Fundamentals of Music Theory introduces pitch, rhythm, scales, chords, and other elements of Western notation. Students will develop facility in reading and hearing music, as well as an understanding of the syntax of tonal music, ranging from the music of Mozart to film music to Miles Davis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1012 Music, Society, and Culture (4 Credits)**

This course introduces students to the music of a variety of world areas. For each unit, students examine a diverse array of genres, analyzing music’s relationship to religious life, aesthetics, politics, social organization, and identity. We also discuss the impact of globalization, transnationalism and immigration on the shaping and transformation of musical practice and meaning in each region. Reading materials, listening assignments, and discussion topics are supplemented by in-class performance workshops, designed to give students firsthand experience in non-Western performance traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1016 History of Jazz (4 Credits)**

This course examines the short history of jazz and all its sub-styles (swing, bop, cool, etc.) from its roots to the early eighties. Students have access to the entire course online, including all the fantastic listening. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1017 History of Rock and Roll (4 Credits)**

The “birth of rock” occurred in the mid 1950’s as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1018 Understanding Music (4 Credits)**

In this course, students acquire a greater appreciation of musical history, context, composers, and genres. Through listening activities, texts, movies, and live concerts, students become educated listeners, able to describe intelligently musical experiences using appropriate vocabulary. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1019 American Popular Music (4 Credits)**

American Popular Music combines the study of social and cultural history on the one hand with the analytical study of music styles on the other. Basically, it serves as an introduction to the wealth of American popular music from minstrelsy to hip hop. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class is not available to music or performance majors.

**MUAC 1024 Black Sacred Music: A Survey (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

**MUAC 1025 Hip-Hop and Rap Music (4 Credits)**

From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Autotune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music's relation with gender, race, identity, and politics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1028 Hearing the Movies (4 Credits)**

Although we usually say that we watch movies, we might more accurately say that we “see-hear” or “audioview” them. Film sound tracks feature speech, sound effects, and music that fulfill practical storytelling roles, and that combine with imagery and narrative to create powerful emotional resonance in viewers. This interdisciplinary course explores the sonic elements of film history from 1895 to the present. Course activities include weekly film viewings and reading assignments set against lecture/discussions offering a topical survey of developments in film sound as both a technical practice and an art. Graded assignments include weekly online responses, a film introduction, a midterm exam, and a final project in which each student will re-score a film clip and compose an essay reflecting on that process. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: • Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity. • Analyze the relationship between texts, ideas, or creative works and a broader context in ways appropriate to disciplines in the arts or humanities. No prior formal experience in music or film studies is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1029 Methods of Mastery (4 Credits)**

Musicians, athletes, artists, software engineers, actors, financial managers, dancers, writers, mathematicians, scientists, game designers, and even social media influencers spend their days in radically different ways, but top performers share habits and approaches that contribute to success. “Methods for Mastery” offers students an opportunity to explore the habits and mindsets of great achievers in different disciplines, ranging from classical music to creative writing to sports, finance, and more. What do writer Isabel Allende, dancer Twyla Tharp, soccer star Cristiano Ronaldo, Apple inventor Steve Jobs, cellist Yo-Yo Ma, and the artist formerly known as Prince have in common? What is required to do life-changing work? Inspiration or Perspiration? The Seven Habits of Highly Effective People? Can everyone be a virtuoso, genius, or prodigy? Through shared assignments, the class will discuss performances and research in four different areas: “Practice and Work Habits”; “Mindfulness Techniques”; “Performance Anxiety, Stage Fright, and other Mental Blocks”; and “Flow”. Videos, podcasts, live performances, trade paperbacks, websites, and academic research will inform our understanding of these topics. In addition, each student will develop two personal projects—one on cultural attitudes towards mastery, and one on a specific technique for creating better work routines, overcoming stage fright, or maintaining focus. Students from different disciplines will share their ideas with peers. Throughout, each class member will keep a daily journal, culminating in a final reflection that charts progress over the quarter. By the end of the quarter, students will integrate their research with new skills and greater awareness of their own path towards achievement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2052 Musicology: Medieval And Renaissance Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 800 to c. 1600. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2053 Musicology: Baroque Music (3 Credits)**

Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1600 to c. 1750. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2054 Musicology: Classical Music (3 Credits)**

Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1750 to c. 1820. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2055 Musicology: Romantic Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1830 to c. 1890. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2056 Musicology: Modern Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1890 to the present. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2057 Musicology: Introduction to World Musics (3 Credits)**

This course is designed as an introduction to select world music traditions and to ethnomusicology, a discipline many define as the study of music in culture. We focus on three world areas: North India, Brazil, and Senegal. For each of these units, we examine various genres and musical systems and explore music's connection to ritual, belief, aesthetic ideals, politics, and social organization, asking what makes music meaningful for practitioners and audiences. Lectures and discussions are supplemented by regular guest lecture-demonstrations, films and hands-on workshops. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2058 Jazz and Commercial Music History and Repertoire I (1900-1955) (3 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2059 Jazz and Commercial Music History and Repertoire II (1955-Present) (3 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2104 Drumming Across the Americas (4 Credits)**

This course looks at rhythm as a fundamental organizing principle for Black music, dance, and life in the Americas. We will focus on multiple percussion-and-dance traditions from North America, South America, and the Caribbean as a window onto the people, cultures, and histories of the African diaspora. We will be especially attuned to the intersection and divergence of practices across present day national boundaries, due to political shifts and alternative cultural geographies forged through ongoing circulation of people and culture throughout the hemisphere. We will also explore trans-temporal rhythmic connections between practices originating in various eras. Overall, we will consider thematic links across genres, including issues of identity (race, gender, sexuality, ability, class), technology, freedom seeking, and spirituality. We will learn by doing, with music and dance practice at the center of our meetings. We will begin our study with the Gullah-Geechee ring shout, next engage in comparative work with Afro-Puerto Rican bomba, and finally apply the rhythmic lessons learned to the contemporary electronic practices of hip hop, reggaeton, and dance hall. Guest artists will visit some of our sessions to provide additional insight and guidance in these forms. Our practice will be supported by reading, listening/viewing, and discussion about our core styles as well as others, providing a critical framework for our creation. We will also attend several performances in order to see how these practices function in a live setting. No prior experience is necessary, only a willingness to jump in!

**MUAC 2174 Music of the Civil Rights Era (4 Credits)**

The decades of the mid-20th century were an explosion of political unrest, social change, and cultural innovation. While the world was rocked by numerous anti-colonial struggles, disenfranchised populations in the U.S. forged their own battles in what is commonly referred to as the Civil Rights Era. In this course, we engage music as a way to understand this history – both as a record and agent of change. We explore a variety of music and other art from this period, including genres related to the African American freedom movement, multiracial folk revival, and Asian American, Chicano, and Women's movements. In what ways did social movements employ culture as a political tool? What do we mean by the word "political"? How can music express politics, with or without words? How might music provide an alternative record of history? In order to address these questions and more, we will engage readings on music, politics, history, and identity. We will also view, listen to, and perform the traditions we study. Ultimately, while the tale of the Civil Rights Era is often told as separate, compartmentalized struggles based around identity, our investigations will reveal the intense interracial and intercultural political solidarities and creative dialogues that took place.

**MUAC 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2251.

**MUAC 2253 Hildegard: Mystic, Musician, Muse (4 Credits)**

Hildegard of Bingen was a polymath even by the standards of her own era, the twelfth century. She was active as a musician, artist, mystic, theologian, natural healer, philosopher, and diplomat. This interdisciplinary team-taught course will read across many academic fields of study including religion, women/gender/sexuality studies, music, and art history as well as primary sources. Students will experience 12th century scholarly and every-day practices through in-class projects such as manuscript illumination or cookie baking, and participate in experiential learning through journaling, meditation, and singing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2260 Music, Race, and Ethnicity in Latin America (4 Credits)**

In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and "blackness" will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2390 Music in Jewish Spiritual Life (4 Credits)**

This course exposes students to the variety of music and musical practices encountered in contemporary Jewish worship spaces, broadly defined. In addition to standard academic modes of learning, the course has an extensive experiential component in which students sing, chant, and meditate together for long durations without inhibition. The "Jewish worship spaces" in question have diverse geographical origins, ranging from North America and Eastern Europe to communities with origins in North Africa and the Middle East, and students will learn of the musicians involved, the liturgy they sing, their historical lineages, approaches to pitch organization and meter, and relationship to past practices. Assessment is made through writing assignments (an essay on music and spirituality, an album review, and a listening journal), midterm and final exams, moderation of class discussions of reading and music, and participation in experiential components of the course. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3047 Xperimental Jazz Ensemble (0-1 Credits)**

The Xperimental Jazz Ensemble is a pan-genre ensemble with a focus on creativity expressed through improvisation, transcription, arrangement, and composition. XJE will have variable instrumentation that may include vocalists, all "classical" and "jazz" instruments, and emergent electronic instruments and software. This course counts toward the Analytical Inquiry: Society and Culture requirement. Registration requires Departmental Approval.

**MUEN 3048 Bluegrass Ensemble (0-1 Credits)**

In this class, students will receive instruction on proper bluegrass performance fundamentals with traditional bluegrass instruments, the harmony and rhythm of bluegrass music, the art of simultaneous playing and singing, the proper interpretation of the chosen repertoire per the composers' style, and the social and cultural influences that inspired the music. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3710 Opera (0-1 Credits)**

Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3712 Lamont Chorale (0-1 Credits)**

The Lamont Chorale is a select mixed voice choir that performs choral literature from the Renaissance to present and strives for a high level of artistry. The choir performs works from the great masters of music, as well as living composers, world music, and spirituals. The Lamont Chorale is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the AI-Society credit requirement for undergraduate students.

**MUEN 3730 American Heritage Chorale (1 Credit)**

This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3731 The Spirituals Project Choir (0-1 Credits)**

This ensemble will explore African American spirituals as an art form, tradition, and tool for social change through performance, reading, and listening. Because the core of this ensemble is a multi-ethnic, multi-generational community choir, students will have the unique opportunity to join with and learn from a group of singers immersed in this musical tradition. Students will participate in 2-3 performances over the course of the term, the majority of which will be outside of Lamont. Through performance and study of spirituals and related music, students will gain a musical and cultural understanding of this dynamic music and gift from African Americans to the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3740 Voces Fortes (0-1 Credits)**

Voces Fortis is a low voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

**MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3752 Lamont Wind Ensemble (0-1 Credits)**

Open to all students by audition and approval of conductor; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3753 Lamont Jazz Ensemble (0-1 Credits)**

Open to all students by audition and approval of director of jazz studies; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3760 Lamont Symphony Orchestra (0-1 Credits)**

The LSO generally performs six symphonic concerts and one opera each year. Students are exposed to orchestral repertoire from all periods and styles of music as well as appropriate performance practices associated with each period and style. The LSO is open to all university students by audition. However, because the course objective is to prepare students for successful professional orchestra careers, all participants are held to a very high standard and level of expectation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3900 Voces Aureas (0-1 Credits)**

Voces Aureas is a treble voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

**PHIL 1610 Discovering Philosophy (4 Credits)**

In this course we explore a range of philosophical questions and examine the replies that have been made by historical figures. We also think through the methods and strategies that have been used for thinking through those replies and explore these questions further on our own. Topics may include how do we know what actions are moral? What is knowledge? What is the basic structure of the world? What is justice? What assumptions are made by the disciplines that take themselves to study the natural world? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2001 Philosophy and Fiction (4 Credits)**

Examination of diverse aspects of the relationship between philosophy and fiction. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2003 Philosophy and Popular Culture (4 Credits)**

This course critically explores philosophical questions and issues in the context of contemporary popular culture. On the one hand, it considers more general questions about the nature and function of popular culture, including how popular culture has been defined and "theorized"; the connections between popular culture and the traditional and new media; the economic bases and functions of popular culture; and the political implications of popular culture. On the other, it explores particular philosophical issues—historical, ethical, political, aesthetic, and metaphysical—as they appear in selected areas or examples of popular culture: literature, film, the visual arts, digital media, graphic novels, music, television, etc. The aims are both to enhance students' critical understanding of the ways in which philosophical assumptions and ideas underlie popular culture and to present traditional and contemporary philosophical arguments, movements, and ideas using examples drawn from popular culture as reference points. As examples, we might explore ethical dilemmas posed in the "Sopranos" or "Mad Men"; mind-body problems in the "Matrix" or "Avatar"; or metaphysical issues in "Donny Darko" or "Run, Lola, Run." This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2004 Philosophy of Race (4 Credits)**

This course is a systematic study of the scientific, metaphysical, ethical, and political issues surrounding the notion of race. We undertake a critical study of the following questions: Is race a scientifically legitimate concept, or is it a social construct? Is race a legitimate census category? How should questions of race be decided, and by whom? Why do we think of humans in terms of race—for evolutionary or psychological reasons? Religious reasons? What is racism? Why is racism morally wrong? What do psychological studies show about our racist tendencies? Does affirmative action provide a morally acceptable way of achieving racial justice? What race is a mixed race person? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2005 Philosophy of Religion (4 Credits)**

What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2005.

**PHIL 2009 World Mythology (4 Credits)**

This class will introduce students to key mythological texts and traditions from around the world including but not limited to Egyptian, Mesopotamian, Indian, Greek, Chinese, Japanese, Norse, Mayan, Uralic, and Polynesian myths.

**PHIL 2010 Existentialism (4 Credits)**

Philosophical, religious, literary and psychological views of the existentialists including Kierkegaard, Sartre, and Camus. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with RLGS 2014 and JUST 2014.

**PHIL 2025 Coexistence (4 Credits)**

Building skills for ethical, emotionally-intelligent, and equity-minded encounter, this course is about facing neighbors responsively, responsibly, and non-violently—even when our values clash, and even as we work to defeat each other in the voting booth. Exploring new civic modes of “dialogue across difference” and serving as an antidote to polarization and rising tides of hate, the course invites students to consider new ways of holding onto their own views, values, and identities without erasing others—but also without necessarily embracing or being embraced by them. And it does so while helping them understand and utilize “phenomenology,” a philosophical method for assessing “lived feels” in complex relation to human meaning-making in a range of personal, professional, and political contexts. Focused in particular on interhuman coexistence, the course attends to the three-fold human cord of “our structures, our neighbors, and our selves.” It invites students to navigate between structural equity, interpersonal ethics, and personal authenticity. And it equips students to consider the “feels,” “flavors,” and “temperatures” of different coexistence strategies: from the lukewarm framework of tolerance to the warm embrace of friendship to the complicated contours of responsibility-without-friendship in such thinkers as BIPOC thought-leader Martin Luther King, Jr, philosopher and Holocaust Survivor Emmanuel Levinas, and political theorist Karl Marx. Helping students consider what sorts of coexistence goals are most and least appropriate for different contexts and why, the course asks questions like: When it comes to opponents, should we be aiming to befriend them or is it sometimes OK to set the bar lower? Should we try to “find common ground” or is it sometimes OK to “agree to disagree”? Is bridge-building always the best goal, or do we sometimes need to learn to live alongside one another without violence but also without bridges? Drawing on an inclusive reading list of BIPOC, Jewish, Islamic, Christian, African, Indigenous, and Japanese traditions, the course delves into Ubuntu principles of coexistence alongside Aztec principles of selfhood, BIPOC principles of justice alongside spiritual and atheist existentialisms, Queer Chicana feminism alongside the practice of Kintsugi, spiritual calls to love alongside political calls to respect, multicultural calls to recognition alongside social justice critiques of such calls, philosophical traditions of friendship alongside critiques of civility, and ancient wisdom traditions hand-in-hand with popular contemporary insights from Brené Brown's work on vulnerability and Harvard's near-century-long study of happiness. The course also explores the dangers of Islamophobia and Antisemitism; includes a visit to the campus' Holocaust Memorial Social Action Site inspired by “radical ethics”; considers new modes of activism; and invites participants into a “Belonging and Expression” framework for navigating possibilities and tensions in important joint calls to social justice and freedom of expression. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is crosslisted with PHIL and JUST.

**PHIL 2050 Jewish Philosophy (4 Credits)**

This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2050.

**PHIL 2100 Philosophy of Mind (4 Credits)**

Topics include nature of persons, consciousness, criteria of personal identity, the relation between mental and physical, and the role of neuroscience in the study of the mind—epistemological and ethical. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2101 Philosophy of Language (4 Credits)**

What do linguistic expressions mean, and how do we use them to communicate? What value judgments are embedded in linguistic practice? In our study of it? How can logical tools illuminate language? What are the limitations of formalism for modeling meaning and language? How might tools in philosophy of language need to be revised in light of investigating oppression and injustice in linguistic communication? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2110 Classical Greek Philosophy (4 Credits)**

The philosophical thought of classical Greece that developed between about 500 and 300 BCE is the basis of all subsequent European philosophy and, arguably, of European culture itself. Besides its indisputable historical importance, it is also rich in ideas and insights that are as striking and relevant today as they were over 2000 years ago. This course serves as an introduction to this seminal period of philosophy, its historical and cultural context, and in fact, to philosophy itself. In the course, we focus primarily on the teachings of Socrates, the dialogues of his student Plato, and the writings of Plato's student Aristotle. In addition, we begin by considering the cultural and intellectual context, including the Homeric epics and the tragedies, that enabled such thinkers to arise and concludes with a brief look at the paths Greek philosophy took after the “Golden Age of Greece” has passed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2111 Greek Moral Philosophy (4 Credits)**

In this course we examine the “Good Life” in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2120 Nature & Limits of Human Knowledge (4 Credits)**

A study of both traditional and contemporary answers to the following questions: What is knowledge? How do we acquire it? What is the extent of our knowledge? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2130 Philosophy of Early Modern Age (4 Credits)**

Problems of reason and experience, mechanistic view of human beings, new interpretations of mind from Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume and Kant. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2140 Kant to Nietzsche (4 Credits)**

German idealism; human beings as self-consciousness; counter-concept of alienated existence; Kant, Hegel, Kierkegaard, Marx, Nietzsche. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2144 20th-Century Philosophy (4 Credits)**

A general overview of prominent 20th-century philosophers and philosophical movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2145 Between Deleuze and Foucault (4 Credits)**

Gilles Deleuze and Michel Foucault are widely accepted to be central figures of post-war French philosophy. Philosophers, cultural theorists, and others have devoted considerable effort to the critical examination of the work of each of these thinkers, but despite the strong biographical and philosophical connection between Foucault and Deleuze, very little has been done to explore the relationship between them. This course addresses the critical deficit by providing rigorous comparative discussions of the work of these two philosophers. The relationship between Foucault and Deleuze, however, is as strong as it is disparate: it is perhaps best described as a parallelism. As Deleuze says, "I never worked with Foucault. But I do think there are a lot of parallels between our work (with Guattari) and his, although they are, as it were, held at a distance because of our widely differing methods and even our objectives." While the two were drawn together through their novel readings of Nietzsche, their commitment to a non-teleological theory of history, their activism in contemporary politics (with prisons, '68, Palestine, etc.), their return to the stoics, and a theory of the event, Deleuze and Foucault were often decisively divided in their methods and motivations. Through primary and secondary readings, this course focuses on the similarities and differences in between these two thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2150 Philosophy of Law (4 Credits)**

Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2180 Ethics (4 Credits)**

Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2181 Aesthetics & Philosophy of Art (4 Credits)**

Although critical reflection about art goes back at least to Plato, developments both in modern philosophy and in the arts themselves have produced an unprecedented, intense, and ongoing dialogue between artists and philosophers that has deeply affected the practices of both. Just as modern philosophers have come to view the arts as vitally important ways of experiencing and knowing, so modern artists have drawn heavily on philosophical ideas and views in creating their own works. The focus of this course is on some of the major ways in which new developments in the arts have influenced philosophical thought and have, in turn, been influenced by it. In particular, we consider some of the most representative artworks (many contemporary) that have raised the question, "Why is this art?" together with the major philosophical and critical theories that have attempted to respond to this question. Besides discussing specific works of art, we read and discuss some of the major statements and theories about them by both classical and contemporary philosophers, art historians and critics, and the artists themselves. This course is of interest both to students of philosophy wishing to explore contemporary developments in the arts as well as to art and art history students interested in a deeper understanding of the philosophical views that underlie so much modern and contemporary art. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2182 The Making of the Modern World: Science, Art, and Philosophy (4 Credits)**

A combined on-campus/travel course exploring the ways in which the complex interactions among science, the arts, and philosophy served to create and define the 'modern world.' This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2186 Feminist Ethics: Justice and Care (4 Credits)**

In the late 1950's psychologists began to theorize a notion of human moral development and they created instruments with which to measure such development. By the 1970's there were claims that even well-educated women were—on average—stunted in their moral competence according to these measures. Once a sufficient number of women were engaged in moral theory in both psychology and philosophy, they began to diagnose these theories and instruments as prejudiced by what we would today call 'while, cisgender, male privilege.' The scales were centering a detached notion of justice and equality for all, whereas researchers found that women centered notions of care and engaged in relational (rather than detached) thinking when asked ethical questions. Thus, was born the discipline of Feminist Ethics. While many women (and some men) celebrated the alternative 'ethics of care' over an 'ethics of justice,' others worried that these women had been harmed by their male dominated society and were showing signs of a 'slave mentality' in their moral reasoning that was to be overcome and not celebrated. Predictably (in hindsight), women of color complained that their perspective was not taken into account by these 'caring' white female professors. In this class we will look at this conversation as it unfolded. In the process we will evaluate these theories from a philosophical perspective and see which parts seem most helpful for thinking about current ethical issues. Many or all of the readings were probably written before you were born. In fact, there is very little philosophical literature that labels itself 'feminist ethics' or 'ethics of care' that was written in the 21st century. We will ponder why this is the case. Are these ideas outdated, or have they been sufficiently incorporated into mainstream academic thinking that they no longer wear the label of marginalization? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2200 Social & Political Philosophy (4 Credits)**

Topics covered include the relation of the "social" to the "political," the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2260 Philosophical Perspectives on Perception and Reality (4 Credits)**

An examination of the theoretical hypothesis that our perceptions match up with, and therefore give us information about, an external and independent reality (what we call "the physical world"). In order to engage this issue, we look at the philosophical explorations of a number of historical figures in the Western philosophical tradition. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2401 Theories of Justice (4 Credits)**

It is commonplace to associate justice with equality. But without specifying such a principle further, it may be an empty formality. We may say that a society is just if it treats persons as equal under the law or that a legal system is just when it treats like cases as alike. But in other contexts, it should be plain that persons are not equal, e.g., in the technical or even moral abilities. Some might simply be better than others. Still others are wealthier, and under certain conditions it may be good to that there is a class of wealthier persons. Perhaps justice also demands inequality at times. What is clear is that what justice is is itself a matter of dispute. This course examines several theories of justice. It identifies the deep sources of disputation among them and assesses their implications for the design of the most fundamental political, economic, and social institutions. Further, it asks whether a consensus or at least a convergence on a conception of justice is possible for pluralistic, democratic societies. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2555 The Philosophy of Technology (4 Credits)**

Serious thought about technology commences with the beginnings of philosophy itself, although it becomes an urgent theme and explicit field of philosophical inquiry only in the 20th century. This course will approach the theme of technology from five perspectives: (1) Historical: How did technology arise as a philosophical concern and how did the development of technology influence thought about it? (2) Metaphysical: What role does technology play in our understanding of 'reality'? Is technology one element among others in what we take to be 'real,' or does it determine our views of 'reality'? (3) Epistemological: What is the relation between science and technology? Is technology a result or application of 'scientific knowledge,' or does technology govern or drive science itself? (4) Ethical/Political: In what ways does technology influence and/or challenge our views about what is 'valuable' about our individual and collective ways of living? Is the development of technology something to be embraced or rejected/limited with respect to human values and aspirations? (5) 'Futurist': Can the 'digital revolution' be understood as continuous with the history of technology itself or does it represent some new metamorphosis of both what it means to be 'human' and of 'reality' itself? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2700 Biomedical Ethics (4 Credits)**

Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2770 Philosophy of Science (4 Credits)**

This course provides an introduction to some major topics in the philosophy of science focusing on issues concerning what science is and how it works, the scientific method, the objectivity of science and the goal of science. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2005 Philosophy of Religion (4 Credits)**

What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2005.

**RLGS 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2010 Hildegard: Mystic, Musician, Muse (4 Credits)**

Hildegard of Bingen was a polymath even by the standards of her own era, the twelfth century. She was active as a musician, artist, mystic, theologian, natural healer, philosopher, and diplomat. This interdisciplinary team-taught course will read across many academic fields of study including religion, women/gender/sexuality studies, music, and art history as well as primary sources. Students will experience 12th century scholarly and every-day practices through in-class projects such as manuscript illumination or cookie baking, and participate in experiential learning through journaling, meditation, and singing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that "Jews earn like Episcopalians, and vote like Puerto Ricans." This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with JUST 2012.

**RLGS 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and JUST 2014.

**RLGS 2022 Religion and Empire (4 Credits)**

The course will explore in both a past and present context how religious forms, traditions, and practices are integrally bound up with the rise and fall of empires. It will also explore from a theoretical standpoint certain social, political, and economic factors that explain the development and historical persistence of imperial governance as well as the role of religion in both preserving and undermining empire. It will also touch on the phenomenon of "religious nationalism" in these processes. Specific empires to be studied include the Roman empire, the "Holy Roman empire", Islamic empires, the British and American empires (including what has come to be known as "neoliberalism"). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2025 Race, Social Justice, and Religion in the US Public Square (4 Credits)**

The US public square is a fundamental aspect of civic engagement and identity construction. This course uses the lenses of race and social justice to explore how religious expression impacts the cultural, social, political, and personal narratives/discourses that comprise the modern public square. We will consider public spaces in the context of anti-Asian and anti-Black racism as well as Islamophobia and the intersectional privileges and prejudices these communities negotiate. Issues such as immigration, borders, racialization, entrenched beliefs and traditions dovetailing with structural racism in the American context will be discussed each through video modules from the Interfaith Youth Core along with supplemental readings. By centering the lived practices and discourses through which access and agency is forged within public spaces (material and virtual), I want students to learn how they are both participants in and makers of these spaces. This course asks students to interrogate the ways in which their personal identities intersectionally determine how public spaces are constructed, which public spaces we enter, and how we participate in those spaces. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2026 Race: Black, Jew, Other (4 Credits)**

In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with JUST-2026 and PHIL-2026.

**RLGS 2102 Judaism, Christianity & Islam (4 Credits)**

This course introduces students to the three major monotheistic religious traditions: Judaism, Christianity, and Islam. In the process of tracing the long and rich histories of Judaism, Christianity, and Islam, we examine the beliefs and practices that became central and definitive for Jews, Christians, and Muslims. We begin with the ancient heritage of each religion (scriptures, founders, early institutions). Then we explore how these foundational traditions were preserved and re-invigorated in response to centuries of social change and critical moments of political upheaval. Most significant, in this regard, is the Jewish, Christian, and Muslim encounter with their respective holy Scriptures—as generation after generation of adherents have attempted to understand the revealed words of God, to proclaim their continual relevance for all places and all times and to inscribe them upon their bodies and hearts through prayer, worship, and daily life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2103 Religions of China & Japan (4 Credits)**

This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and JUST 2104.

**RLGS 2106 Religious and Social Justice in Vienna (4 Credits)**

This special travel course provides an opportunity for students to learn how certain major religions are globally engaged in the promotion of social justice through humanitarian relief work and cultural exchanges. In addition to a brief survey of the historical relationship between the beliefs, teachings, and social practices of the major Western traditions, the course offers hands-on experience and interaction with Jewish, Catholic, and Protestant relief agencies as well as other non-governmental organizations in Vienna, Austria, which has become the international center for UN-directed human services and humanitarian relief efforts as well as global headquarters for leading NGOs. Students discover how the culture, history, and geography of Vienna have nurtured the vast global human services “economy” to which these religious organizations contribute and which are built around the work of the United Nations. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2108 Islam in the United States (4 Credits)**

A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with “American” accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2109 Religions of Tibet (4 Credits)**

This course explores the religious terrain of Tibet by looking at the historical and cultural development of the four main Tibetan Buddhist traditions: Nyingma, Sakya, Kagyu and Geluk, as well as the indigenous religion called Bon. Topics include the sacred landscape of Tibet; key doctrinal features; cultural artifacts like sacred biographies, art, and poetry; the 20th-century spread of Tibetan Buddhism from the Himalayas to North American communities; the future of Tibetan Buddhism in exile; and China and the West. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2110 Buddhism in the U.S.A. (4 Credits)**

Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the "two-way traffic" between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2111 Islam and United States Politics (4 Credits)**

This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans' relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2112 Major Islamic Thinkers 1900s-2000s (4 Credits)**

This course offers students a substantive introduction to major Islamic thinkers of the 20th and 21st centuries. Starting with Abu 'Ala Maududi, whose work on Qur'anic interpretation and the meaning of jihad laid the groundwork for new waves of radical activism in the modern Muslim world, this course exposes students to the works of "movers and shakers" like Sayyid Qutb and Ayatollah Ruhollah Khomeini. Students engage these thinkers through a mix of primary and secondary sources, developing a sense of context as they work through their arguments. The course continues with some of the major later 20th-century Islamic thinkers active in Muslim-minority spaces, focusing on Bosnian Grand Mufti Mustafa Cerić and the Moroccan-French scholar Mohammed Arkoun. It concludes by looking at two major figures of the early 21st century, noting how they blend intellectual and political activism: Iranian cleric Mohsen Kadivar and American scholar Amina Wadud. Throughout the course, student groups present on various contemporary issues, helping them develop presentation and writing skills while allowing them to apply course knowledge to real-world issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2114 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)**

This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the guru/śiṣya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2115 Common Figures in the Bible and Qur'an (4 Credits)**

This course offers students a thematic introduction to the key common figures in the Bible and Qur'an, focusing on the major prophets, from Adam to Jesus, as well as Eve and Mary. Grounded in the primary source texts while exposing students to classic and contemporary scholarly work on these figures, it concludes with a look at the figure of God in the two scriptures. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2116 American Mythology (4 Credits)**

Myths convey social and moral values. Myths, moreover, serve as conceptual models for society and furnish "symbolic articulation of the social patterns" of a given society. In this class, students will establish clear connections between social order and the myths that sustain it, against the view that myths are merely imaginary, misguided perceptions of reality with little social value. In this course, you will need to ask yourself, "How do each of these myths translate into social behavior? In other words, how have these myths been acted out historically and how are they "performed" today? The United States of America has always had a strong, mythic sense of identity, mission, and destiny. It is worthwhile to reflect for a semester on how the "idea of America" has taken shape and is continuing to evolve and diversify. Robert Bellah introduced the influential concept of an American "civil religion"—a secular myth of America. In addition, we must understand that America is the result of contact between at least three different groups of people: Native Americans, Europeans, and Africans. The functional equivalents of creed, scripture, prophets and religious mission are seen in the Declaration of Independence, the Founding Fathers and Manifest Destiny. Concepts of freedom, the pursuit of life, liberty, and happiness, democracy, and the right to bear arms flow from these myths. Beyond the notion of a master myth of America, we will discover that there are other myths of America that are themselves proper objects of study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2117 Religions of India (4 Credits)**

This course introduces students to the religions of India, which include Jainism, Buddhism, Islam, Sikhism, Christianity, Judaism, and Hinduism. These religious traditions are distinct but always in dialogue and often in competition with one another. Students will explore how different religious communities intersect and overlap in different contexts and historical periods, including in religious spaces: temples, monasteries, pilgrimages sites, and sacred spaces. Students will learn about histories, rituals, and literature, with a focus on lived religions, past and present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)**

This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions in the context of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the deified "feminine" and the construction of gender within modern South Asia. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2119 Caste, Race and Colonialism (4 Credits)**

This course explores intersections of social, political, and personal structures that shape the various identities we hold. We have chosen three categories: caste, race, and colonialism, to showcase how identities emerge as unique intersectional sites of contestation and negotiation between individual difference, historical context for how to understand that difference, and the ways social/political structures valorize difference. To foreground lived experience in the construction of identity, our course will draw on a number of resources including: blogs, opinion pieces, podcasts, peer-reviewed articles, selections from books, documentaries and film, and social media both within and outside the US. The goal of this course is to encourage students to consider how "identity" and "privilege" are contingent terms that operate on multiple levels (e.g. personal, social, and political) and help uncover the networks of vulnerability, power, and access/accessibility that inform identity. Furthermore, we invite students to engage with these terms through practical assessments (e.g. producing a podcast) in order for them to "see" how they both produce and are "produced" by the various public squares in which they participate. Students will deconstruct the categories of caste, race, and colonialism in the context of socio-political and cultural structures (e.g. religion, gender identity, ability, political beliefs, etc.) We ask students to consider the following questions: In what ways, do these categories shape our personal and public identities? How do these categories work within contemporary public and private spaces? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2202 New Testament (4 Credits)**

This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church's slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion's encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2202.

**RLGS 2205 Women, Gender, and the Bible (4 Credits)**

From Eve to Mary Magdalene, women play essential roles in biblical texts. While many courses, books, and Bible studies focus primarily on men, this course will focus women included in biblical and apocryphal texts as well as the way the Bible has been used to regulate gender in society, leadership, churches, and homes. Feminist and womanist biblical criticism will be used throughout this course, as will a focus on gender critical readings. Through critical reading and reflection on both primary texts and secondary texts, students will form their own views of the representations of female characters, named and unnamed, in the Bible. Additionally, students will ponder the ways that these texts still affect women today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2250 Introduction to African American Religions (4 Credits)**

This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with MUAC 2251.

**RLGS 2301 American Indian Religion (4 Credits)**

This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the "Great Plains Indians" (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2303 Lived Religions (4 Credits)**

The concept of “lived religions” has become prominent in religious studies since the 2000’s. While people may think of religions as sets of sacred writings, rules, and rituals, the “lived religions” approach focuses on the ways that people incorporate religion into their activities. The approach is new enough that scholars have not yet come to full agreement on what the term “lived religions” should include and what it implies about religions and how to study them. The course will make room, therefore, to debate the advantages and drawbacks of studying religions through the ways people use religion to shape their life. Students will examine examples of how people live their religion and trace the relationships of these practices to religious teachings and ideas. This effort will involve asking a variety of questions. How closely are religious practices related to teachings and ideas? Does a specific religion put greater emphasis on engaging in specific activities or on agreeing with particular teachings? If people’s behavior does not fit with a religion’s teachings but the people still consider it to be related to key aspects of religion, does it count as religious? Or have these people moved away from religion into a practice that is spiritually meaningful but not religious? Or is spirituality something even more sharply different from religion? Or is spirituality also part of religion? If we look closely at how people in a religious tradition live, what do we see that we would not notice if we were looking at the religion as only a system of beliefs? For instance, does the sense of time of people who adhere to the religion’s calendar of remembrances differ from the sense of time of people who do not? And what specifically would we do to learn about religion, if we concentrate on people’s actions? In opening up such inquiries students will learn both about studying religions and about major facets of religious traditions. The course will require reading and successful completion of tests. Visits to off-campus sites and completion of reports on site visits will facilitate learning through encounter and participation. Students will also undertake a project using concepts from the course to imagine and interpret lived religion in behaviors or in aspects of the physical or social world. The religions, practices, and sites for study, observation, and interpretation—as well as the assignments—may vary each time the course is offered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2310 World Christianities (4 Credits)**

This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as it’s foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)**

Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2501 Islam on Film (4 Credits)**

This course uses the medium of film to introduce students to the history, faith, practice, culture(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2600 Religion and Popular Culture (4 Credits)**

Although religion and popular culture are often seen as separate conceptual spheres—the former dealing with the “sacred” and the latter with the “profane”—these two spheres are deeply intertwined and shape one another. Religion often expresses itself in popular culture through the arts and various forms of media, while popular religion frequently expresses itself through religious memes and other representations. This course will explore the complex relationship between religion and popular culture. By studying film, comics, music, tattooing, and other cultural products, we will discover how beliefs, ideals, practices, institutions from various religious traditions shape popular culture and how symbols that are embedded in popular culture shape religious traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1416 Introduction to Russian Culture: The Wondrous and the Supernatural (4 Credits)**

How do we explain the enchanting and mysterious world of Russian Culture? How have Russians imagined their world and themselves? To answer these questions, we will examine the various manifestations of the wondrous and the supernatural in Russian art. We will begin by reading Russian fairy tales to learn about the people’s folk beliefs and their Eastern Orthodox faith. We will then trace the Russian fantastic tradition by studying the works of nineteenth- and twentieth-century writers who wrestled to explain the marvelous and the demonic myths at the foundation of Russian culture. We will focus our attention on Russia’s cultural capitals St. Petersburg and Moscow and discuss how supernatural themes reflected social and historical realities. Authors may include Pushkin, Gogol, Dostoevsky, Bely, and Bulgakov. No knowledge of Russian is necessary; all class discussions, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)**

This course surveys Russia’s cultural past and present—from the beginnings of the Russian state over a thousand years ago through the Soviet Union and, after its disintegration in 1991, to the Russian Federation. The course explores the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, music, ballet, film) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. By working across disciplines, students will discover the fascinating cultural interconnectedness of Russian politics, art, faith, and national identity. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1860 The Russian Short Story (4 Credits)**

This course will introduce students to Russian literature through some of its shorter “masterpieces” of fiction. Students will explore the lives and ideas of some of Russia’s greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 1922 The Soviet Experiment in Literature and Film (4 Credits)**

Architects of the Soviet experiment claimed to create a radically new type of society and person, superior to all that came before. What were the defining features and founding myths of the Soviet identity, as propagandized by the government? How did this imagined identity clash with realities of life in the USSR? What cultural figures opposed the official discourse, and what artistic modes of resistance did they develop? To explore these questions, we read fiction and poetry by authors central to defining and contesting the Soviet experiment, including Maiakovski, Gladkov, Ginzburg, Pelevin, Dovlatov, and Petrushevskaya, and watch ground-breaking films by Vertov, Tarkovsky, Daneliya and others. All materials are in English. No prior knowledge of Russian literature or culture is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)**

This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator’s voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country’s intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women’s place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 2461 Russian Science Fiction (4 Credits)**

This course studies the fascinating world of Russian science fiction in the twentieth and twenty-first centuries. Throughout the term, students will examine how Russian and Soviet writers and film-makers reimagined society, science, technology, and space. We will discuss Soviet futuristic utopias, interplanetary voyages, and post-apocalyptic visions. Students will further probe the figure of the alien as a dissident or cultural Other, as Soviet authors grappled with questions of cultural and ideological difference. We will examine how sci-fi writers glorify or critique Soviet society in their visions of space flight, technologically advanced societies, alien worlds, or post-nuclear disasters. Ultimately, we will reflect on the philosophical quandaries that Russian science fiction explores. Works include pre-revolutionary sci-fi texts by Bryusov and Kuprin; Soviet dystopias by Zamiatin and Bulgakov; sci-fi classics by the Strugatsky Brothers; Tarkovsky’s filmic masterpieces; and post-Soviet science fiction by Viktor Pelevin and Sergei Lukyanenko. This course is taught in English. All readings are in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2917 Russian Revolution in Literature and History (4 Credits)**

The course introduces students to the literature, history, and art of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of art and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 3232 Russian Avant-Garde (4 Credits)**

This interdisciplinary course addresses various manifestations of Russian Modernism and the Russian avant-garde in art, literature, poetry, music, theatre, and film in the late 19th – early 20th century. Its objective is to provide an understanding of the time’s rapid, drastic, and often conflicting cultural and artistic transformations by examining in depth major Russian Modernist works. Students will explore such artistic and literary movements as Symbolism, Cubo-Futurism, Neo-Primitivism, Suprematism, Rayonism, and Constructivism in the context of Russian late Imperial, revolutionary, and early Soviet social, political, and philosophical developments. We will pay special attention to the cultural dialogues between Russia and the West and investigate the aesthetic, erotic, and social utopias of Russian Modernism. The course examines philosophical essays, films, plays, poems, short stories, music, and art created during the period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2300 Iberian Culture & Civilization (4 Credits)**

Intensive study of culture of Spain; manifestations of culture found in history, art, architecture, music, literature, and politics of early and modern Spain. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2350 Latin American Culture and Societies (4 Credits)**

An introductory and interdisciplinary course on the political, historical, and cultural dynamics that have shaped Latin America, the Caribbean and U.S. Latinos. An examination of the political and intellectual movements and economic forces embedded in relations of power from pre-Colombian civilizations, colonialism, independence, nation building, and imperialism to the struggle for democracy. Analysis of diverse cultural practices such as literature, music, film, and visual art within a national and transnational context. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2400 Latino Cultures in the United States (4 Credits)**

Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2801 Writing, Memory & Terror: Post-Dictatorship Literature of the Southern Cone (4 Credits)**

This course explores the representation of violence, repression and disappearance in the post-dictatorship literature of Argentina, Chile and Uruguay in literature and memorialization projects. Students will examine literary testimony in a variety of genres: narrative, poetry, theatre, and critical essays in their social, political and historical contexts, as well as its manifestations in music and film. We will discuss the role of memory in reconstructing discourses; testimonial literature and the modern and postmodern views of representation and memorialization; and points of convergence between this literature and other survivor testimonial narratives, particularly those of the Shoah. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2802 Afro-Latinos in the US (4 Credits)**

Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2803 Religion and Violence in Latin America (4 Credits)**

The Spanish and Portuguese imposed Catholicism in the Americas during the conquest and colonization, brutally repressing indigenous religious expression through persecution and forced conversions. While Catholic doctrine officially replaced the polytheism, animism and ancestor worship of indigenous religions, in actuality, the Colonial period saw great diversity in religious practice, as indigenous populations and African slaves developed systems of religious syncretism adapting the Catholic dogma to their beliefs and practices. However, although Latin America is currently home to more than 425 million Catholics—an estimated 40% of the Catholic population worldwide—and the Roman Catholic Church now has a Latin American pope for the first time in its history, the region is far from being religiously homogeneous. Since independence, immigration, politics, and economics have played an important role in effectively changing the religious demography of Latin America. This course will examine religion and violence in Latin America, from pre-Columbian times until 1983, focusing on the relationship between religion and political power. We will explore pre-Columbian religions; the role of religion in the conquest and colonization of the Americas; African religion and slave religious ritual; religious syncretism; religious art; immigration and religion; revolution and religion; and the political implications of Protestantism and Liberation Theology. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class will be conducted in English and will not count toward the major or minor in Spanish.

**SPAN 2804 Latin American Popular Culture (4 Credits)**

This course is an introduction to the study of Latin American popular culture. Basic theoretical notions about the subject will be introduced but the emphasis of the class will be on the discussion of literature analyzing specific situations, events or expressions drawn from various Latin American countries during the nineteenth and twentieth centuries as well as the United States in the twentieth century. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2805 The Sociopolitics of a Majority-Minority Language in the U.S. (4 Credits)**

This course is an introduction and critical exploration of the sociohistorical, sociopolitical and sociolinguistic implications of Spanish as a language of use in local communities across the United States. Because the primary focus of exploration, in this case, is the social and political issues related to Spanish in the U.S., we will focus on its use and representation, rather than on its linguistic representation. Similarly, we will conceive of language—any language—as social action, particularly the ways in which people use language to convey social and political meanings. To achieve such an undertaking, students will be exposed to an interdisciplinary, sociopolitical approach to a language spoken by more than 40 million people in the United States today (American Community Survey, 2020), exploring the complex historical context that makes Spanish the de facto second language spoken locally as well as nationally. Key to this analysis will be the introduction of social constructionism and other critical sociolinguistic notions that explain social categories such as race, language, gender and class as not fixed but rather, socially constructed. In all, this course will explore how Spanish, as a minority-majority language, presents fertile ground for recognizing the social and political implications of language use. Students will engage with the material through course lectures, active discussions, and analyses of real-life examples of Spanish use on the ground. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2806 Latin American Food Landscapes (4 Credits)**

This course focuses on the ways in which Latin American food landscapes —alimentary cultivation, production, purveyance, preparation, and consumption— reveal the complexities of various political, socioeconomic, ecological, and cultural contexts. Students will be challenged to consider the ways in which, throughout the Américas and since the pre-conquest era, diverse food landscapes have often provided marginalized individuals and communities with opportunities to creatively resist policies or prejudices aimed at erasing local food and agricultural practices and preferences. Course lectures and readings are informed by key tenets of global and interdisciplinary food studies and offer students with the opportunity to explore a variety of genres and areas of knowledge. Course topics include the intersections of Latin American Food Landscapes and: notions of freedom, identity, and nationality; gastro-imperialism; culinary arts and seduction; food-related religious and spiritual practices; agroecology & Indigenous epistemologies; agrarian reform & food security activism; urban agriculture; breastfeeding practices and polemics; gastrotourism; cross-cultural food & mountain studies. No knowledge of Spanish is required or expected, although interested students may choose to complete select course readings or assignments in Spanish, Portuguese, and/or Quechua. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2807 Salvador Dalí and His Surrealist Friends (4 Credits)**

This interdisciplinary course is an exploration of Salvador Dalí's Surrealist art and life, focusing particularly on the influence that his early friendships had on his work. Students will analyze surrealist art while also learning about Dalí's fertile artistic collaborations and personal relationships with a select group of artists such as filmmaker Luis Buñuel, writer Federico García Lorca (both intimate friends of Dalí); poets André Breton and Paul Éluard (leading voices in the Surrealist group); Éluard's wife, the enigmatic Gala (who will ultimately become Dalí's wife, muse and business manager); and Sigmund Freud who personally met Dalí and whose ideas about the subconscious became the ideological foundation for this experimental movement. Students will also learn about other Avant-Garde movements such as Dadaism, Ultraism and futurism.

**SPAN 2808 Inventing Latin America (4 Credits)**

In this course we will explore the Idea of Latin America in a broader context of social constructs and social formations using theoretical frameworks from History, Anthropology, Geography and Semiotics. Students in this course will learn and assimilate theoretical tools to identify what a social construct is, how it is built, used, and how it changes. Based on readings focused on specific examples in the history of the mass of land called first new world, first America, west indies and later, Latin America, we will analyze the ways in which temporal and spatial dimensions are enforced to build these and other concepts that are part of the global process of cultural negotiations. Modernity, traditional, underdeveloped, exotic, "western" or "not western" are part of the vocabulary that informs what has been called "politics of time and politics of space". We will focus specially on the ways the binominal Latino/a and Latin America is used in the context of the multicultural idea of the USA, underlaying the difference in meaning when the term has been employed in the context of national discourses in Latin America. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2900 Introduction to Literary and Cultural Studies (4 Credits)**

Intended as a transition between 2000-level advanced language and cultural courses and 3000-level cultural and literature analysis courses, SPAN 2600 presents students with the opportunity to refine their analytical and interpretive skills, by examining a wide variety of Spanish language texts drawn from the literary cultural milieus of Latin America, Spain, and the United States. Throughout this course, students will acquire and utilize fundamental tools and strategies for contemporary literary and cultural studies in Spanish, including: gender and sexuality studies; race and ethnicity; decolonial thinking; pop culture; nationalism; ideology; and formal elements of interpreting texts. At the end of this course, students should be able to demonstrate relationships between distinct texts of varied media and genre (journalism, essay, short story, autobiography/memoir, historiography, oral tradition, film, photography, the plastic arts, etc.) in the interdisciplinary perspective that characterizes literary and cultural studies in the 21st century. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: SPAN 2100 and SPAN 2300 or SPAN 2350.

**THEA 1600 Stagecraft for Theatre (4 Credits)**

Stagecraft introduces students to the basic skills that allow us to realize the art of Theatre. Students will have the chance to learn construction, craft and design skills in the scenic and costume areas that can be applied in advanced Theatre classes, and in everyday life. Theatre technicians and artisans need breadth and problem-solving skills with a wide range of techniques and materials, and an awareness of the performance from all aspects. Having technical awareness makes all students better at what they do. 1. Learn through doing: experience the work of the theatre technician through complex hands-on projects in which the students have opportunities to work as craftsman and artist. 2. Learn and use the fundamental vocabulary and tools of design, as they apply to theatre production. 3. Learn about -and experience creating- following the process that theatre technicians use to create multi-phase artistic projects. 4. Be introduced to the intersection of theatre design and theatre production as we practice it today in the profession- personnel, practices, the collaborative nature of the art form and our industry. 5. Students will learn safety practices, including personal protection equipment, fire code, safe tool handling, and environmental health and safety practices for the beginning artist. 6. Students will learn to use power tools, including saws, sanders, pneumatic tools and hand tools. 7. Students will learn techniques for hand and machine sewing. 8. Students will learn to select materials and techniques to build projects. 9. Students will plan a project from idea to scaled drawing to realizing the project using power and hand tools. 10. Students will learn painting techniques, and plan and execute a multi-step painted surface. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1810 The Process of Theatre: Page to Stage (4 Credits)**

Exploration of the process playwrights, directors, actors, and designers use in creating a theatrical production. Individual sections may focus on single areas only—please see department for current offerings. In this course, students will demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture. They will also identify and analyze the connections between these things and the human experience/perception of the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1861 Theatre Imagination (4 Credits)**

Beginning exploration of nature of theatricality through exercises and study of specific plays; explore acting, directing, designing and writing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1862 How to Read a Play (4 Credits)**

Close analysis of selected dramatic texts from Aeschylus to Caryl Churchill. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1880 Fundamentals of Theatre Design (4 Credits)**

The work of the theatre designer is to transform a text into visual and aural expression, by planning and creating the physical environment of a live performance. Students will learn about – and learn appreciation for – theatre design in order to be better theatre artists (and audience members) themselves, through the applied practice of designing a "paper" production, collaboratively with a small team. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2200 Voice for the Actor (4 Credits)**

In this course we learn the art and craft of compelling communication. All speakers are nervous; in this course we develop skills for managing the nerves associated with public speaking as well as learn analytical skills for unearthing and sharing complicated, and uncomplicated, text. We spend a good amount of time and effort diving into vocal training to harness the power of your voice, cultivating clarity and resonance. We explore and play with rhetorical analysis, learning to decode and employ persuasive techniques. We study and embody the intricacies of meaning-making, learning how to craft messages that resonate with authenticity and impact. All public speaking is storytelling and in this class we discover the nuances that captivate audiences and breathe life into narratives. Whether you're stepping onto the stage or addressing a crowd, this course equips you with tools to communicate clearly. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2230 Movement and Voice for Actors (4 Credits)**

Actors often learn movement and vocal training separately, despite the fact that speaking is a physical act and that an actor's voice and body are constantly working in relationship to each other. This course has two main objectives: 1) to train your actor instrument through rigorous physical and vocal training, and 2) to help you understand the essential and dynamic relationship between an actor's breath, body, and voice. You'll explore how physical actor training strengthens and improves the ability to speak while ultimately allowing you to embody a character more successfully. Drawing from many areas of study in movement and voice, you will connect physical and vocal action through a series of exercises and explorations. Specifically, we'll investigate 1) how to prepare your body for performance circumstances and to successfully support your vocal needs, and 2) how your body and voice can work symbiotically during performance to deliver a more powerful, precise, engaging performance. The course will begin with extensive physical and vocal actor training; then we'll apply this training to specific theatrical texts; it will culminate in a collaborative performance that will provide opportunities for both individual and group performances. This work will strengthen stage presence and characterization and will heighten your emotional and physical power and commitment to each moment onstage. By the end of the quarter, if you do the work, you will be vocally and physically transformed, armed with a new approach to moving and speaking onstage. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2870 Acting I (4 Credits)**

Exploration of acting through physical and vocal exercises, followed by scene study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2880 Scene Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming scenic concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2881 Lighting Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming lighting concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2890 Theatre History I (4 Credits)**

This course examines the development of Western theatre and drama from the Ancient Greeks to the 19th-Century, concentrating on the intellectual, social and artistic foundations of theatre and drama. The course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among the students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from Fifth-Century B.C.E. into the early 19th-Century. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2891 Theatre History II (4 Credits)**

This course examines the development of Western theatre and drama from the 19th-Century to the present. Concentrating on the intellectual, social and artistic foundations of theatre and drama, this course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from the 19th-Century to the present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2893 History of Global Fashion Trends (4 Credits)**

In this course, students will study global fashion trends throughout human history. We will delve into how and why humans choose to cover their bodies, investigate how our contemporary fashion marketplace is affecting the planet at large, and analyze how contemporary artists influence our perceptions of global fashion.

**WRIT 2555 Diverse Rhetorics (4 Credits)**

Rhetoric's origins in classical texts, in the western canon, developed to serve early forms of democracy and civic participation. Despite classical rhetoric's formative impact, plenty of languages and cultures have their own means of persuasion and civic participation. This course introduces ways that rhetoric is practiced in diverse contexts, not as a stable idea, but as an adaptive practice situated in cultures, identities, and languages, bridging writer, audience and purpose. This course starts with classical Western rhetoric, but then explores the varied practices and theories of, for example, African American, Asian, Latinx, Indigenous, and queer rhetorics, to name a few. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**WRIT 2650 Digital Rhetorics (4 Credits)**

Digital media and online spaces have both introduced and challenged how we write and interact. This course covers contemporary theories and genres of rhetorical practice including network literacies, remix and re-appropriation, theories of social media, sonic, visual, procedural and algorithmic rhetorics. This course emphasizes through theory and practice new rhetorical skills including design thinking, multimedia production, iterative composing, and social media engagement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## Scientific Inquiry: Natural and Physical World Courses

Science and technology play increasing roles in the most profound challenges and the greatest opportunities that we face as global societies. Gaining knowledge of the practice and promise of science is an essential responsibility of each educated citizen. While science provides the most thoroughly tested tools for developing accurate knowledge of nature, developing technologies shape our daily living and provide opportunities to ask questions that were not imaginable by previous generations. Courses provide students with a three-quarter experience that builds knowledge and application of scientific approaches in one core area. The three-quarter format with accompanying laboratories allows in-depth explorations that have significant social implications and that encourage development of reasoning skills and reflective judgment. By working between classroom and laboratory to understand the nature of science in the natural and physical world, students will apply scientific methods, analyze and interpret data, and justify conclusions where evidence is conflicting. Students will also explore the strengths and weaknesses of scientific knowledge and reflect on the connections between the natural sciences, developing technologies and other ways of knowing and constructing human experiences. Students in the BM degree program may choose between eight credits in the Language requirement or eight credits in the Scientific Inquiry: The Natural and Physical World requirement. Students in the BFA meet this requirement through eight credits taken in two sequential courses.

**BIOL 1010 Physiological Systems (4 Credits)**

The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

**BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)**

The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

**BIOL 1020 Physiological Systems Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

**BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

**BIOL 1221 Molecules to Humankind II (4 Credits)**

Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1260 Sustaining Life I (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1261 Sustaining Life II (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

**BIOL 1262 Sustaining Life III (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

**BIOL 1270 Living in the Microbial World I (4 Credits)**

Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1271 Living in the Microbial World II (4 Credits)**

For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

**BIOL 1272 Living in the Microbial World III (4 Credits)**

In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

**BIOL 2010 General Ecology (4 Credits)**

Topics in ecosystems, population and community ecology, as well as behavioral ecology. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

**BIOL 2011 General Ecology Lab (1 Credit)**

Exercise and experimentation to compliment the lecture. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 2010, and Prerequisite: BIOL 1021.

**BIOL 2120 Cell Structure and Function (4 Credits)**

Chemical composition of cells; structure and function of cell organelles; interrelationship of cellular unit with its environment; mechanisms of energy conversion within cells; functions of excitability, contractility and cell growth. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1011. Corequisites: BIOL 2121 lab section. Recommended: Background in CHEM 1010 or equivalent.

**BIOL 2121 Cell Structure & Function Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 2120.

**BIOL 2510 General Genetics (4 Credits)**

Mechanisms of heredity with application to all forms of life. Topics include classical genetics (mendelian inheritance, meiosis, epistasis, recombination gene mapping, chromosomal mutations) and an introduction to modern molecular genetics (DNA structure and function, gene expression and regulation). This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: BIOL 1010 & 1010, BIOL 1011. Recommended prerequisite: BIOL 2120. Corequisite: BIOL 2511.

**BIOL 2511 General Genetics Lab (1 Credit)**

The laboratory component of BIOL 2510. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisites: BIOL 2510. Prerequisites: BIOL 1020 and BIOL 1021. Recommended Prerequisites: BIOL 2121.

**CHEM 1001 Science of Contemporary Issues I (4 Credits)**

CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 1002 Science of Contemporary Issues II (4 Credits)**

CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

**CHEM 1003 Science of Contemporary Issues III (4 Credits)**

CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

**CHEM 1010 General Chemistry I (3 Credits)**

The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.

**CHEM 1020 General Chemistry II (3 Credits)**

The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

**CHEM 1240 General Chemistry I Laboratory (1 Credit)**

Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

**CHEM 1250 General Chemistry II Laboratory (1 Credit)**

Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

**CHEM 2131 Chemistry of the Elements (3 Credits)**

Descriptive chemistry of main group and transition elements including redox and coordination chemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

**CHEM 2141 Chemistry of the Elements Lab (1 Credit)**

Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 2240 Introduction to Environmental Chemistry (4 Credits)**

An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

**CHEM 2451 Organic Chemistry I (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 2131 and CHEM 2141.

**CHEM 2452 Organic Chemistry II (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 2451 and CHEM 2461.

**CHEM 2461 Organic Chemistry Lab I (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 2451.

**CHEM 2462 Organic Chemistry Lab II (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 2452.

**GEOG 1201 Environmental Systems: Weather (4 Credits)**

First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**GEOG 1202 Environmental Systems: Hydrology (4 Credits)**

Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

**GEOG 1203 Environmental Systems: Landforms (4 Credits)**

Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.

**GEOG 1216 Our Dynamic Earth I (4 Credits)**

This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornados, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**GEOG 1217 Our Dynamic Earth II (4 Credits)**

This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

**GEOG 1218 Our Dynamic Earth III (4 Credits)**

This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

**GEOG 1264 Global Environmental Change I (4 Credits)**

First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**GEOG 1265 Global Environmental Change II (4 Credits)**

Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

**GEOG 1266 Global Environmental Change III (4 Credits)**

Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

**PHYS 1011 21st-Century Physics and Astronomy I (4 Credits)**

First class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**PHYS 1012 21st-Century Physics and Astronomy II (4 Credits)**

Second class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**PHYS 1013 21st-Century Physics and Astronomy III (4 Credits)**

Third class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**PHYS 1111 General Physics I (5 Credits)**

This is the first of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in mechanics (kinematics, dynamics) including forces, one and two dimensional motion, work, energy and momentum. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1112 General Physics II (5 Credits)**

This is the second of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1113 General Physics III (5 Credits)**

This is the third of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1112. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1211 University Physics I (5 Credits)**

First of a three-quarter sequence. Kinematics, vectors, force, energy and work, linear momentum, rotation of rigid bodies. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The course includes a rigorous calculus-based laboratory that exposes students to a broad range of the real physical phenomena studied in the lecture course. Through the use of experimental apparatus, computerized instrumentation and data acquisition, data analysis and graphical representation, students use the observed phenomena to exemplify the laws of physics. Physics theory and other relevant background information are explored individually by students in weekly prelab exercises. Students learn to write introductory-level laboratory reports and become familiar with good laboratory technique. Emphasis for this lab is on mechanics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisite: MATH 1951.

**PHYS 1212 University Physics II (5 Credits)**

Second of a three-quarter sequence. Gravitation, fluids; oscillatory motion; waves; thermal physics. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1211 lab portion and builds on laboratory skills and knowledge from that course. Emphasis for this lab is on waves, oscillations, sound, fluids and thermodynamics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: PHYS 1211. Corequisite: MATH 1952.

**PHYS 1213 University Physics III (5 Credits)**

Third of a three-quarter sequence. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1221 and 1222 lab portions and builds on the students' laboratory skills and knowledge from those labs. Emphasis for this lab is on electricity, magnetism and circuits. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1214. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

**PHYS 1214 University Physics III for Engineers (4 Credits)**

This is the third course of a three-quarter sequence and is for engineers only; this is equivalent to PHYS 1213, but does not include lab component. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all engineering majors. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1213. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

**PSYC 3625 Couple Therapy with Diverse Populations (4 Credits)**

This is a cross-listed course with both a graduate section and an undergraduate section. The primary goal of this course is to teach undergraduate students about the field of couple therapy, the different therapeutic approaches in evidence-based couple therapy and research on couple therapy and couple-focused interventions. For graduate students, the course covers these same topics with an additional goal of providing graduate students in the Clinical Psychology Ph.D. program how to conduct evidence-based couple therapy in practice. For both undergraduate and graduate students, course instruction involves a combination of didactic reading, guided practice (i.e., role-play) and case presentations / case example. For graduate students in the Clinical Psychology Ph.D. program, course instruction will also include supervised experience conducting evidence-based couple therapy with couples who present to the Center for Child and Family Psychology for treatment of relationship distress, co-morbid chronic health conditions and relationship distress, or relationship enhancement.

## Scientific Inquiry: Society and Culture Courses

Knowledge of principles of human functioning and conduct in social and cultural contexts is essential for living in a culturally diverse and interdependent society. Understanding scientific approaches to discovering these principles enhances informed decisions for the public good and provides a way of thinking about problems and issues that complements other areas of inquiry and experiences. Through taking courses in this area, students learn about principles of human functioning and conduct in social and cultural contexts and come to understand how these are studied using scientific methods. Students take two courses in different subjects studied from the perspectives of the social sciences; they are thus exposed to varying approaches and levels of analysis (e.g., physiological, evolutionary, mental, social and cultural processes). Students who are CAHSS majors/minors may apply one Scientific Inquiry: Society and Culture course (4 credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements.

**ANTH 1006 Paranormal Archaeology (4 Credits)**

This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance—Bigfoot, the Big Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthen Burial Mounds of North America, and other phenomena—in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1010 Anthropology: Humankind in Context (4 Credits)**

This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species' place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2105 Human Nature (4 Credits)****ANTH 2125 Primates (4 Credits)**

Non-human primates are used within numerous disciplines as models for understanding the evolution of our own behavior. This course examines non-human primates within the framework of anthropology and explores the ways that the study of other primates contributes to our understanding of human behavior and evolution, and serves to connect us to the living world. The course will examine three aspects of primate life (the three F's: feeding, fighting, and family) first from the non-human primate perspective and then through the lens of human behavior and social organization. To better understand the methods of primatology, students will develop their own research project to take place at the Denver Zoo. As an SI: Society course students will develop an understanding of the defining principles central to inquiry within the discipline of anthropology as well as become proficient in the use and application of anthropological, and specifically primatological, research methods. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2200 Contemporary Issues of Native North America (4 Credits)**

This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. This course explores contemporary issues within Native American communities in order for students to gain a better understanding of legal and social issues between the Federal government, reservations, and urban Indian populations. We will analyze issues facing contemporary Native American nations including, but not limited to Indian gaming and casinos, federal recognition and issues of sovereignty, blood quantum and biological race, religious freedom and sacred sites, mascots, repatriation of human remains and sacred artifacts, and stereotypical views of Native Americans. Additionally, we will also discuss efforts to reclaim traditions such as language, art, and land. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2424 The Social Determination of Health (4 Credits)**

This course is an introduction to sociocultural epidemiology. As the scientific basis of public health, epidemiology is the discipline that aims to describe the distribution and causes of health problems in a society, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, disease and health care and their manifestations around the world. This course presents an overview of epidemiology's history and methods, to then concentrate on the social and cultural aspects of health. The course offers an in-depth exploration of the notion of disease causation, with historical and current examples. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, and sociology. We will explore ideas and behaviors related to disease causation in different societies and social groups. Topics include the history of epidemiology and theories of disease causation, research methods in epidemiology, social determinants of health, and the notions of disease causation and determination. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of cases in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2525 Culture, Health, and Society (4 Credits)**

Culture, Health, and Society is an interdisciplinary course that offers students in-depth exposure to the connections between health understood broadly, and the humanities and social sciences. This course aims to expand students' understandings of health, disease, health inequalities, wellbeing, health care, and/or health systems, by offering students the opportunity to explore a variety of perspectives in key disciplines such as economics, anthropology, history, psychology, communication, philosophy and sociology. We will explore how different conceptual and methodological approaches from the humanities and social sciences shed light on different important aspects of health-related issues, ranging from the individual level to the societal and global levels. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1001 Practicing Communication (4 Credits)**

Practicing Communication introduces students to evidence-based communicative practices that aid them in enacting skillful and ethical responses to ongoing communicative dilemmas. The course introduces students to techniques for increasing their awareness of the consequences of their communicative acts and for using mindful communication practices to create and sustain meaningful relationships in interpersonal, organizational, and public settings. The course also helps students develop skills in audience analysis—with a particular focus on crafting messages that are culturally responsive to audiences composed of multiple cultural identities and positionalities. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1002 Theorizing Communication (4 Credits)**

Theorizing communication introduces students to theoretical thinking across the broad range of the communication discipline. Broadly defined, a theory is a set of principles that scholars use to explain or predict how a phenomenon works. This course will introduce students to scholars' attempts to understand and explain how human communication behavior functions in the world, from both humanistic and social scientific perspectives. In this way, the course serves the aim of Scientific Inquiry: Society and Culture courses in that it advances students' understanding of scientific approaches to principles of human functioning and conduct in social and cultural contexts. Students will learn the underlying assumptions of the various approaches to communication studies, examine and critique how these assumptions are applied in specific theories about communication, and apply their knowledge in imagining how a new theory might be constructed. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1210 Foundations of Communication Studies (4 Credits)**

This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2100 Fundamentals of Communication Theory (4 Credits)**

Basic concepts, theories and models of the communication process. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2130 Introduction to Organizational Communication (4 Credits)**

This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2140 The Dark Side of Relationships (4 Credits)**

This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2270 Intro to Health Communication (4 Credits)**

This course is designed to be an introduction to the field of health communication. Through readings, case studies, and discussions, this class is designed to provide an overview of health communication in a variety of health contexts, ranging from public health campaigns to interpersonal communication to community-based health interventions. In this class, we aim to understand how communication can play a vital role in achieving personal and public health objectives. Throughout the quarter, we will examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2600 Introduction to Political Communication (4 Credits)**

The purpose of this course is to introduce students to the subdiscipline of political communication with a focus on the United States. Through scholarship, case study development, discussion, and activities, this course surveys the major communicative actors in U.S. public and political life. Students will use theories from across political communication to understand the roles of elites, media organizations, and everyday individuals in political talk. Students should leave the course with the ability to identify and critically assess the political communication that permeates their lives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ECON 1020 Economics: A Critical Introduction (4 Credits)**

The course gives students a critical understanding of basic economic concepts, showing the importance of differences in the understanding of these concepts by different economic theories: the theories differ both in their view of the economy and its place in society; and in the potential impact of their policy recommendations on different individuals and social groups. The course begins with the immediate experience of life in the "new economy"; and then frames a critical analysis of this experience, drawing out three themes: the relation of the economy to public and private life; inequality and discrimination; globalization. The critical framework calls for a historical dimension: how did we get here? It also points to a defining feature not only of the "new economy", but of the modern, capitalist economy since its origins: capitalism generates periodic crises within itself. The most obvious crisis is the "economic" one, but equally important are the crises of inequality and discrimination, and of environmental sustainability. The course concludes by considering what kind of economic order, what agents and institutions, would be required to transform capitalism into a socially and ecologically sustainable system. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ECON 1740 Political Economy of Health and Health Care (4 Credits)**

This is an interdisciplinary and introductory level course on health, health care, medical care, and medical care systems with a special emphasis on the U.S. The course is built on a knowledge base drawing from various disciplines such as medical sciences, public health, sociology, political science, economics, anthropology, history and philosophy. It begins with a conceptual clarification regarding health, disease, health care, medical care, and biomedical and social determinants of health through an interdisciplinary perspective. This is followed by the introduction of the emergence and development of the medical profession and the US medical care system from a historical standpoint. Based on these two frameworks, we examine the financing and provision of medical care in the US medical care system. Finally, we introduce policy and reform topics in the US medical care system that have been mainly framed and shaped by the discussion on cost control and associated reform proposals and actions by highlighting their moral and ethical foundations. This course is designed specifically for Culture, Health and Society (CHeS) minor. It is not required and cannot be used as an elective for those who major in economics. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ETHN 1004 Introduction to Critical Race and Ethnic Studies (4 Credits)**

Critically examines the concept of race, ethnicity, and indigeneity as categories of social, political, historical, and cultural significance, in the United States and internationally, followed by an investigation of colorblindness, diversity ideology, and modern manifestations of racial inequality. Race and ethnicity are examined as they intersect with gender, sexuality, social class, indigeneity, and immigration status. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 1410 People, Places & Landscapes (4 Credits)**

In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 2401 The Human Population (4 Credits)**

This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 2511 Principles of Sustainability - Honors (4 Credits)**

Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

**GWST 1112 Introduction to Gender and Women's Studies (4 Credits)**

This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women's studies aims to understand how this process of 'gendering' occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of allocating power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women's studies is about studying, but it is also about meaningful engagement with the world. This class presents students with a variety of types of texts from sociological articles to literary fictions and documentary and fictional cinema to explore gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**HNRS 2701 Wildlife Conservation & Culture (4 Credits)**

The focus of the course is the intersection of conservation and culture. The goal is to generate new and creative ways to think about conservation. Students will be exposed to different examples of conservation governance, ranging from state-controlled access commonly found in national parks to indigenous communities that are assisting conservation efforts. They will inquire as to what impacts different projects are having in not only helping stem the loss of habitat and wildlife, but also the informal governance institutions managing their unique ecosystems in sustainable ways. Importantly, we will consider our main questions through a very broad and informal cost/benefit analysis that encompasses more than the limiting economic factors normally used. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**INTS 1500 Introduction to the Global Economy (4 Credits)**

Introduction to a range of pressing problems and debates in today's global economy, such as global economy, global markets and the global commons. Students will have a good understanding of the policy challenges posed by global economic integration and theoretical frameworks for understanding the functioning of the global economy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**INTS 1700 Introduction to International Politics (4 Credits)**

This course critically examines the nature of contemporary global society. It is designed to familiarize students with the broad parameters of international politics and takes into account numerous methodological and theoretical perspectives. The course explores both the historical development of international politics and how the business of international politics is "done." The course examines issues such as war and peace, human security, the politics of climate change, and international human rights. The overall goal of this course is to introduce students to the field of International Politics and to make them conversant about the major issues facing the global system in the 21st century. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2160 Sexualities and Screens (4 Credits)**

This course offers a critical introduction to the ways that sexual identities and practices are rendered (in)visible within screen-based, digital media culture: television, film, online spaces and platforms, and video games. As a socially contested, disruptive, and liberatory element of social life, sexuality's mediation offers a lens for us to think about cultural norms, ideologies, and politics, as well as issues related to the commodification of bodies. Throughout the quarter, you will immerse yourself in diverse perspectives, reflective writing exercises, textual analysis, small group discussions, and other active learning measures that will deepen your critical thinking around the intersection of media culture and sexuality. Issues such as sexualization, intimacy coordinators, the mediation of consent, queer digital activism, and the politics of casting will be explored through the lens of Media Studies, Cultural Studies and Intersectional Feminism. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2205 International & Development Communication (4 Credits)**

Virtually everywhere we look, whether we are watching a kidfluencer on YouTube, streaming music on Spotify, or scrolling through TikTok, it is evident that we are living in an increasingly interconnected and globalizing world. What does this mean for us as individuals, as Coloradans, as Americans? What does this mean for global humanity? Do we now have a transnational social order and a global culture? If so, what or who is driving this process, and who remains on the sidelines? These are some of the broader questions this class addresses, with an eye toward how media, culture, and communication fit into the larger network of globalization.

**MFJS 2210 Introduction to Media and Culture (4 Credits)**

Course introduces students to the organization of the U.S. media industries and their historical and contemporary role in U.S. culture. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2220 Popular Music and Social Justice (4 Credits)**

What makes popular music a powerful medium for us to “fight the power” and motivate social change, and what hinders it from achieving its full potential? This course examines a range of 20th and 21st century popular music (blues, folk, rock, hip-hop, musicals, etc.) to better understand the complex relationships between music and social (in)justices. Sitting at the intersection of critical media studies, critical race & ethnic studies, popular music studies, and project-based learning, this course examines an array of 20th and 21st century popular music (blues, folk, rock, hip-hop, pop, indie, etc.) to understand the complex relationships between music and social (in)justices.

**MFJS 2270 Activist Media (4 Credits)**

Various media have played roles in the social and political movements of the past, with social media platforms accelerating the possibilities for intervening in social and political life. Activist media harnesses new communication technologies to resist the domination and limitations of mainstream corporate media, creating new media strategies and messages to promote social change. This class examines the spaces of activist media that have enabled citizens, protesters, journalists, PR professionals, tech developers and hacktivists to harness a diverse range of media tools and platforms for change. It also explores how these platforms have created new risks and challenges, especially for activists. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2280 Politics and Media (4 Credits)**

We examine the nature of the media and how media institutions shape the way citizens understand politics. We discuss global media institutions and the role media play in various societies. We explore the role of media in providing information for citizens in a democracy, examine how the media influence the political process, and investigate how the goals of and changes within the media industry influence the effect media coverage has on the political process. Through our study, we explore how the media either enhance or limit the potential for citizens to contribute to democracy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1000 Introduction to American Politics (4 Credits)**

Philosophical traditions, historical background, structure and functioning of American government, and political attitudes and behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1110 Comparing Politics around the World (4 Credits)**

This course introduces students to the study of comparative politics, a sub-field within political science that uses a “comparative method” to compare and contrast countries to understand questions such as Where do ‘states’ come from? Why are only some democratic? How do states promote economic development? Why are some states increasingly rich while others remain poor? Why do people mobilize peacefully to influence politics in some places while they violently attack the established order in others? How do distinct identities rooted in ethnicity, gender, race, and religion influence politics differently around the world? How does globalization affect various countries, and why do some seem to cope with contemporary challenges more effectively than others? This course counts toward the “Scientific inquiry: Society and culture” requirement.

**PLSC 1610 Introduction to Political Thought: Citizenship and Action (4 Credits)**

This course presents an introduction to some of the key ideas and questions in the study of politics. As an introductory course, it cannot present a systematic overview of the entire study of politics; rather, it seeks to introduce students to some central concerns in the study of politics. In this course we learn about the basic principles of human conduct in social contexts and explain how social scientific methods are used to understand these underlying principles. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1810 Introduction to Law and Society (4 Credits)**

This course introduces the relationship between law and society, exploring principles of legal conduct in social contexts and explaining how social scientific methods are used to understand these principles. Questions discussed include what is the relationship between the “law-on-the-books” and “law-in-action,” and what can we learn from gaps between formal law and the “real” law that is experienced in society? Empirical examples may include international comparisons and the evolution of law over time. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 2001 Law and Politics (4 Credits)**

Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored may include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing & either PLSC 1000, 1110, 1610, or 1810.

**PLSC 2200 Politics of China (4 Credits)**

Napoleon Bonaparte allegedly said, “let China sleep, for when she wakes up, she will shake the world.” Two hundred years later, China is indeed waking up, and the world is feeling the dragon’s hot breath. In this class we will examine the fall and rise of the Chinese state, with a focus on its political and economic trajectories after the founding of the People’s Republic of China (PRC) in 1949. Some of the key issues to be examined are: China’s “economic miracle,” when, if ever, will China democratize, its potentially explosive relations with Taiwan, its challenges to America’s global hegemony, etc.

**PLSC 2480 U.S. Congress (4 Credits)**

Structure and functions of U.S. Congress and congressional behavior. Satisfies the department distribution requirement in American politics and counts toward the Scientific Inquiry: Society and Culture common curriculum requirement. Prerequisite: sophomore standing.

**PLSC 2835 European Union law and politics (4 Credits)**

This course explores the law and politics of European integration in the postwar era, examining how and why states that invented sovereignty became bound by a supranational legal system that regulates the largest single market in the world and diverse communities across European countries. Questions include the following: What is the origin and future of the European Union (EU)? Why did Russia invade Ukraine about a decade after the EU won the Nobel peace prize for its promotion of peace, prosperity, and democracy in Europe? What are the causes and consequences of the United Kingdom's (UK) withdrawal from the EU, in a process called "Brexit" (British exit)? How has the EU responded to the erosion of democracy and the rule of law in multiple member states? This course may count toward the Scientific Inquiry: Society and Culture common curriculum requirement and either the law or comparative politics sub-fields of the Political Science major.

**PPOL 1910 Introduction to Public Policy (4 Credits)**

This class will focus on three main areas. First, we will review the policy-making process in the U.S. and methods of evaluation of critical public policy issues. Second, we will review basic issues with decision-making and their relevance for public policy. Third, we will apply these analytic techniques to some of the most urgent public policy problems, solutions, and tradeoffs we as a society currently confront in the areas such as: government spending, immigration, health care, education, environment, foreign policy. In sum, we will examine a broad range of complex policy choices that our nation faces in this era of remarkable social, economic, and political change. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PPOL 2710 Demography of Public Policy (4 Credits)**

Demography is destiny." The consequences for American public policy are profound. America is aging, but becoming more diverse. A society in the midst of dynamic change is a society full of possibilities, but vulnerable to conflict. Values become indeterminate, with traditional communities vying for legitimacy with emergent cultures. Social movements, often populist in nature, challenge the established political order. This course focuses on the delineation of effective public policies to deal with demographic challenges, including (1) immigration policy; (2) the process of assimilation; (3) education; (4) geographic realignment; (5) competitive advantage of the United States relative to the European Union, Russia, and China. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PSYC 1001 Foundations of Psychological Science (4 Credits)**

The goal of this course is to provide a general introduction to psychology examining the biological basis of behavior, perception, learning, memory, developmental transitions, personality, psychopathology, treatment, and social contexts for behavior. After completing this course, students will be able to (1) demonstrate an understanding of the defining principles and perspectives central to the inquiry of psychological science, (2) understand appropriate methods, technologies, and data that social and behavioral scientists use to investigate human functioning and conduct, and (3) develop and communicate alternative explanations or solutions for social issues considering cultural and social contexts. This course has a required recitation/discussion meeting each week. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 1810 Understanding Social Life (4 Credits)**

This course is an introduction to the discipline of sociology and to the insights it provides into the human condition. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2250 Criminology (4 Credits)**

Social meaning of criminal behavior; relationship between crime and society in particular, how production and distribution of economic, political and cultural resources shape construction of law, order and crime; different types of crime, criminals and victims, and efforts to understand and control them. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2540 Current Social Problems (4 Credits)**

We often think about social problems in our social worlds. However, rarely do we consider how certain situations come to be defined as problems and why some "problems" remain a focal point of public attention while others fade, even when the circumstances around that issue have not improved. In this course, we look at these very issues. Using current social problems, we explore how a social phenomenon comes to be seen as a social problem, what is at stake in this process, and how these dynamics matter in terms of thinking about inequality. This course counts toward the Scientific Inquiry: Society and Culture requirement.

## Common Curriculum and Degree Requirements

### Major and Minor Requirements

The departmental major or minor is a program of courses taken in one department or, in the case of an interdisciplinary major or minor, a program of related courses taken in more than one department. The University offers a number of different degree options. Please review specific degree information for major and minor requirements. Students usually declare a major (or majors) by the end of their sophomore year.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of "C–" or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

## Double Majors

In certain degree programs (BA, BS and BSBA), students may complete a second major. A second major will substitute for a minor, if required. The second major must be offered in that particular degree program (p. 38); e.g., business majors are only available in the BSBA program. The University also offers the option of a secondary major (p. 108) for some programs of study. Secondary majors allow students to pursue a major outside the primary degree program.

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## Common Curriculum

The University of Denver's Common Curriculum provides students with a well-rounded education, creates context for major or minor course of study and introduces students to new areas of interest. The Common Curriculum is grounded in a breadth of experiences and ways of inquiry congruent with DU's goal of providing an outstanding educational experience that empowers students to integrate and apply knowledge from across the disciplines and imagine new possibilities for themselves, their communities and the world. Consistent with DU's mission, the Common Curriculum promotes learning by engaging with students in advancing scholarly inquiry, cultivating critical and creative thought, and generating knowledge.

Common Curriculum courses contribute to an intellectually vibrant campus community and create, in turn, a challenging, inclusive, ethical and liberating learning environment. From students' initial First-Year Seminar to the Common Curriculum's culminating Advanced Seminar, the curriculum encourages connections across modes of learning. By engaging in course work across diverse experiences and areas of knowledge, DU students cultivate critical and creative thought, preparing them for leadership and citizenship in our global society.

### Common Curriculum Requirements

The Common Curriculum at the University of Denver plays a central role in every undergraduate student's education. Please review the Common Curriculum requirements matrix below, which provides a summary of DU's Common Curriculum requirements, along with short statements that explain why the courses in the various parts of the curriculum are important in today's world. These descriptions are summaries of what students should be able to achieve through the successful completion of these classes. The matrix is followed by descriptive paragraphs that explain why each class a student takes is important and where it fits in the educational plan of the University.

An undergraduate at the University typically takes 52 to 60 credits in the Common Curriculum:

First-Year Seminar	4
Writing and Rhetoric	8
Language	4-12
Ways of Knowing	32
Advanced Seminar	4
<b>Total Credits</b>	<b>52-60</b>

Because certain programs have slightly different requirements in the Common Curriculum and because AP and IB courses or transfer courses from other universities and colleges may change the distribution of the requirements for individual students, always consult an advisor regarding Common Curriculum planning for courses at the University and abroad.

### First-Year Seminar

#### 1 course (4 credits)

First-Year Seminars (p. 348) are designed to provide students with an in-depth academic experience that will be rigorous and engaging. Students develop the kinds of academic skills that prepare them for successful college work, which might include one or more of the following:

- critical reading and thinking
- writing and discussion
- quantitative reasoning
- argument and debate

Faculty members teach their passions in which they have particular expertise and enthusiasm, and each First-Year Seminar has a unique topic, with 80–85 different First-Year Seminars offered each fall quarter. For students to be able to engage with faculty in the exploration of these topics is an extraordinary opportunity for academic and personal growth. Instructors of the First-Year Seminars also serve as students' faculty mentors for the entire first year. This course must be taken at the University of Denver. Any student who either withdraws from or fails the First-Year Seminar must meet with the Vice Provost of Academic Affairs to determine the means by which this degree requirement may be fulfilled. Students transferring to DU are exempt from this requirement if they are classified as a transfer student.

## Writing and Rhetoric

### 2 courses (8 credits)

Being able to convey written information and ideas in ways that are compelling to specific audiences is essential both in college and beyond. Beginning in the winter quarter of their first year, students take two sequenced writing courses, usually WRIT 1122 and WRIT 1133. Together, these courses teach strategies for writing in diverse academic and non-academic situations. Students learn rhetorical principles, the analysis and use of readings and source materials, and techniques for generating, revising, and editing texts for specific situations. They also learn to present and justify positions and to produce researched writing in various scholarly traditions, including textual/interpretive (the analysis of texts or artifacts such as images or events), qualitative (the analysis of observations or interviews) or quantitative (the analysis of data from surveys or other empirical studies). In each course, students complete several writing exercises and, through sustained practice and systematic instructor guidance, they complete multiple assignments, totaling some 20–25 pages. By the end of the two-course sequence, then, students have completed at least 40–50 pages of polished writing.

## Language

### 1–3 courses (4–12 credits)

The faculty of the University of Denver believe that studying culture through language at the university level is crucial in our globalized world, and courses in this area reflect that belief.

1. Students who have completed academic secondary education wholly or in part in a language other than English may either take a standardized English placement test accepted by DU (TOEFL, IELTS, CAE, DUOLINGO) to determine if they need to take WRIT 1022 English for Academic Purposes, OR they may take a test, offered through the Center for World Languages and Cultures, for placement into another language in order to satisfy the DU language requirement.
2. Students are exempt from the language requirement in the BFA, BSEE, BSME and BSCpE degree programs. [Note for Music students: Candidates for the BM degree may choose between completing eight credits in one foreign language or eight credits in a Scientific Inquiry: The Natural and Physical World sequence. If they choose language, the below rules about placement apply.]
3. Students with certain documented learning disabilities as officers our Disability Services Program determine are also exempt, although they must instead take twelve credits (three classes) taught in English from an approved list of internationalizing courses.
4. All other incoming students who know or have studied one of the languages that we offer at DU (Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Russian, or Spanish) are required to take our language placement test before registering for a class in that language, so that we may place them properly in its curriculum.
5. Students must either complete the elementary sequence of a language they have not studied before (or into *elementary* level of which they are placed) or take one four-credit course at the *higher* level into which each places. If we offer no advanced courses in their first language other than English, students who are not exempt (see 1-3 above) must take a first-year sequence of a different one.
6. Students may always choose to learn a new language and complete its first-year sequence. We offer more world languages than they will have had the opportunity to study in secondary school.

In all of our courses, students acquire linguistic skills in a language other than English. We are an internationalizing university that encourages multi-skill language learning. Students in language classes will also be studying a different expression of culture through language. By this experience they learn both about a new culture and about themselves and their personal, social, and cultural backgrounds. Our young linguists learn to appreciate human diversity as it is expressed between and among languages and nationalities in the twenty-first century.

## Analytical Inquiry: The Natural and Physical World (p. 46)

### 1 course (4 credits)

Mathematics, formal reasoning and, more recently, computational sciences are crucial foundations for many disciplines as they enable and support formal modes of inquiry, particularly for disciplines related to the natural and physical world. For example, today's physics and engineering knowledge would be impossible without accompanying advances in mathematics. Similarly, advances in the life sciences, like genomics, rely heavily on computational sciences. Students must take one course in this area, which is designed to provide all students, regardless of the student's major area of study, the basic knowledge of how to understand and use principles of mathematics and computational sciences as a formal means of inquiry in the natural and physical world.

## Analytical Inquiry: Society and Culture (p. 47)

### 2 course minimum (8 credits)

Through these courses, students gain knowledge essential for today's global society, recognizing that human cultures are specific to time and place and that the practices and values of different societies vary widely. By gaining greater understanding of diverse cultural products, students will be better able to understand the world today and their own place in it. Students take two courses in different subjects studied from the perspectives of the arts and humanities, exploring culture and society from different perspectives. In these courses, students learn how to analyze the products of human cultures, including works of art, music, literature, philosophy and history. Students engage critically with such works through exposure to the vocabulary, concepts and methods used to analyze those works. Students explore how ideas and creative expressions both shape and are shaped by human experiences. Students who are CAHSS majors/minors may apply one Analytical Inquiry: Society and Culture course (four credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements if that course is listed as meeting the outcomes of a section of the Common Curriculum requirements. Non-music majors may take up to four one-credit ensembles towards this requirement.

## Scientific Inquiry: The Natural and Physical World (p. 83)

### 3 sequential courses (12 credits)

Science and technology play increasing roles in the most profound challenges and the greatest opportunities that we face as global societies. Gaining knowledge of the practice and promise of science is an essential responsibility of each educated citizen. While science provides the most thoroughly tested tools for developing accurate knowledge of nature, developing technologies shape our daily living and provide opportunities to ask questions that were not imaginable by previous generations. Courses provide students with a three-quarter experience that builds knowledge and application of scientific approaches in one core area. The three-quarter format with accompanying laboratories allows in-depth explorations that have significant social implications and that encourage development of reasoning skills and reflective judgment. By working between classroom and laboratory to understand the nature of science in the natural and physical world, students will apply scientific methods, analyze and interpret data, and justify conclusions where evidence is conflicting. Students will also explore the strengths and weaknesses of scientific knowledge and reflect on the connections between the natural sciences, developing technologies and other ways of knowing and constructing human experiences. Students in the BM degree program may choose between eight credits in the Language requirement or eight credits in the Scientific Inquiry: The Natural and Physical World requirement. Students in the BFA meet this requirement through eight credits taken in two sequential courses.

## Scientific Inquiry: Society and Culture (p. 88)

### 2 course minimum (8 credits)

Knowledge of principles of human functioning and conduct in social and cultural contexts is essential for living in a culturally diverse and interdependent society. Understanding scientific approaches to discovering these principles enhances informed decisions for the public good and provides a way of thinking about problems and issues that complements other areas of inquiry and experiences. Through taking courses in this area, students learn about principles of human functioning and conduct in social and cultural contexts and come to understand how these are studied using scientific methods. Students take two courses in different subjects studied from the perspectives of the social sciences; they are thus exposed to varying approaches and levels of analysis (e.g., physiological, evolutionary, mental, social and cultural processes). Students who are CAHSS majors/minors may apply one Scientific Inquiry: Society and Culture course (4 credits) per major/minor program to partially satisfy both major/minor and Common Curriculum requirements.

## Advanced Seminar

### 1 course (4 credits)

While knowledge and professional skills found in a student's major and minor are important foundations for accomplishment, successful individuals also must be able to navigate a complex political, social, cultural and economic environment that challenges more traditionally limited concepts of higher education and competencies. To help students better understand the demands of contemporary life, instructors teach an Advanced Seminar (p. 123) (ASEM) based in their area of expertise and passion. The topic will be approached from multiple perspectives in a course designed for non-majors. Studying in this setting, students demonstrate their ability to integrate different perspectives and synthesize diverse ideas through intensive writing on that topic. This course must be taken at the University of Denver. Students must complete all other Common Curriculum requirements before taking the Advanced Seminar.

#### AREAS OF INQUIRY

	The Natural & Physical World	Society & Culture
<b>First-Year Seminar</b>	4 credits In these courses, students will <ul style="list-style-type: none"> <li>• demonstrate what it means to be an active member of an intellectual community by meeting rigorous academic expectations through critical reading, discussion, research and/or writing;</li> <li>• practice newly acquired skills in an active learning environment where writing, performing, laboratory experiments, quantitative analyses or other forms of experiential and/or creative activities will shape the goals and activities of the seminar.</li> </ul>	
<b>Writing &amp; Rhetoric</b>	8 credits In these courses, students will <ul style="list-style-type: none"> <li>• analyze strategies used in a variety of rhetorical situations and employ those principles in their own writings and communications;</li> <li>• analyze research and writing strategies used in a range of academic traditions and use those strategies in their own writings;</li> <li>• adapt, to specific situations, a strong repertory of writing processes, including generating, shaping, revising, editing, proofreading and working with other writers.</li> </ul>	
<b>Language</b>	4-12 sequential credits In these courses, students will <ul style="list-style-type: none"> <li>• based on writing samples at the start and end of the first year of language, students will demonstrate increased proficiency in a language of choice in a specific skill (e.g., writing, speaking, listening or reading);</li> <li>• demonstrate proficiency in learning about a culture as embodied in a skill (e.g., writing, speaking, listening or reading) in a language of choice.</li> </ul>	

<b>Ways of Knowing: Analytical Query</b>	4 credits In these courses, students will • apply formal reasoning, mathematics or computational science approaches to problem solving within mathematics or computational science, and other disciplines; • understand and communicate connections between different areas of logic, mathematics or computational science, or their relevance to other disciplines; • communicate formalisms in logic, mathematics or computing sciences.	8 credits In these courses from two different disciplines, students will • demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture; • identify and analyze the connections between texts, ideas or cultural artifacts and the human experience and/or perception of the world.
<b>Ways of Knowing: Scientific Inquiry</b>	12 sequential credits In these courses, students will • apply knowledge of scientific practice to evaluate evidence for scientific claims; • demonstrate an understanding of science as an iterative process of knowledge generation with inherent strengths and limitations; • demonstrate skills for using and interpreting qualitative and quantitative information.	8 credits In these courses from two different disciplines, students will • describe basic principles of human functioning and conduct in social and cultural contexts; • describe and explain how social scientific methods are used to understand these underlying principles.
<b>Advanced Seminar</b>	4 credits In these courses, students will • integrate and apply knowledge and skills gained from Common Curriculum courses to new settings and complex problems; • write effectively, providing appropriate evidence and reasoning for assertions.	

## Bachelor of Arts (BA)

### Total Credits Required for the BA: 183

Code	Title	Credits
<b>Common Curriculum</b>		
First-Year Seminar		4
Writing and Rhetoric		8
Languages		4-12
Analytical Inquiry: The Natural and Physical World		4
Analytical Inquiry: Society and Culture		8
Scientific Inquiry: The Natural and Physical World		12
Scientific Inquiry: Society and Culture		8
Advanced Seminar		4
<b>Major Requirements</b>		
Planned program of courses		40-60
<b>Minor Requirements</b>		
Second area of concentration		20-28
<b>Electives</b>		
Remaining hours of student's choice		51-71
<b>Total Credits</b>		<b>183</b>

## Major and Minor Requirements

The major (40–60 credits) is a planned program of courses taken in one department or, in the case of an interdisciplinary major, a program of related courses taken in more than one department. For the bachelor of arts, at least 40 credits are required in the major. Individual departments may establish a greater number of required hours. (See departmental listing for details.) Of these, at least 25 credits must be in 2000- or 3000-level (upper-division) courses.

The minor (20–28 credits) is a program of courses in a second area of concentration. Individual departments may establish a greater number of required hours. (See departmental listing for details.) Of these, at least 5 credits must be in 2000- or 3000-level (upper-division) courses.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of “C–” or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 38) section of this bulletin for information on major and minor programs of study available with the bachelor of arts degree.

## Double Major

For the bachelor of arts, students may choose majors in two departments and eliminate the minor.

## Credit Hour Policy

- A total of 60 credits earned in any one department is the maximum accepted toward meeting the minimum 183 credits for the degree. (Exception: BA with a major in music.)

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## Degree GPA Requirement

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

### Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

## Bachelor of Fine Arts (BFA)

### Total Credits Required for the BFA: 189-192

Code	Title	Credits
<b>Common Curriculum</b>		
First-Year Seminar		4
Writing and Rhetoric		8
Analytical Inquiry: The Natural and Physical World		4
Analytical Inquiry: Society and Culture		8

<b>Minor</b>		
	A minor is not required for the degree but may be completed if desired.	
<b>Electives</b>		
	Electives may be music or non-music courses.	18-22
<b>Total Credits</b>		<b>194</b>

Specific status sheets for the various BM programs may be obtained from the Lamont School of Music.

Due to the high number of credits required for this degree, students who wish to double major in the BM program are allowed to share credits & requirements across two majors.

## Non-Course Requirements

Please consult the individual pages in the Bulletin for each major within the BM degree as well as the Lamont Student Handbook for details regarding all non-course requirements.

## Major and Minor Requirements

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of "C–" or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 38) section of this bulletin for information on major and minor programs of study available with the bachelor of music degree.

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## Degree GPA Requirement

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

**Residence Requirement**

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

# Bachelor of Science (BS)

## Total Credits Required for the BS: 183

Code	Title	Credits
<b>Common Curriculum</b>		
First-Year Seminar		4
Writing and Rhetoric		8
Languages		4-12
Analytical Inquiry: The Natural and Physical World		4
Analytical Inquiry: Society and Culture		8
Scientific Inquiry: The Natural and Physical World		12
Scientific Inquiry: Society and Culture		8
Advanced Seminar		4
<b>Major</b>		
At least 25 credits must be 2000- and 3000-level courses		45
Minor 1		15-28
Minor 2		15-28
<b>Electives</b>		
Remaining hours of student's choice		42-56
<b>Total Credits</b>		<b>183</b>

## Major and Minor Requirements

In the bachelor of science curriculum, at least 45 credits are required for the major. Of these, at least 25 must be in 2000- and 3000-level courses. Minors approved for the BS degree range from 15–28 credits each. Students pursuing a BS degree must complete a major and two minors or two majors and one minor. One minor must be in one of the following disciplines: Astrophysics, Biological Sciences, Chemistry, Computer Science, Computer Engineering, Electrical Engineering, Environmental Science, Geography, Geographic Information Science, Geology, Human Health Science & Systems, Mathematics, Mechanical Engineering, Medical Physics, Physics, and Psychology. Students who double major in BS programs can use the second major in place of one of the listed minors.

- The GPA in the major and the minor must be at least 2.0 with the exception of the bachelor of science in accounting which requires a GPA of at least 2.5.
- Credits in the major and the minor must be earned at the level of “C–” or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Visit the Degree and Program of Study (p. 38) section of this bulletin for information on major and minor programs of study available with the bachelor of science degree.

## Area Major

The area major meets the needs of students whose interests require a broad program of related interdepartmental study. As such, students in area majors are not required to complete the minor requirement. At this time, the only area major available for bachelor of science students is environmental science.

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## Degree GPA Requirement

- Students must earn a minimum GPA of 2.0 with the exception of the bachelor of science in accounting which requires a minimum GPA of 2.5.

**Residence Requirement**

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

# Bachelor of Science in Accounting (BSAcc)

<b>Total Credits</b>	<b>186</b>

<sup>1</sup> This course may be used to fulfill a portion of the Scientific Inquiry: Society and Culture requirement.

<sup>2</sup> Either of these courses may be used to complete the Analytical Inquiry: The Natural and Physical World requirement.

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## General Policies

- At least 50 percent of required business courses for the degree must be completed at the University of Denver.
- Students must earn a minimum GPA of 2.5 overall, in all business courses and in the major.
- Students must earn a minimum grade of "C-" in their additional non-business and business core requirements.

### Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

## Student International Experience Requirement

Business students must be prepared to interact with persons from other cultures and manage in circumstances where business practices and social conventions are different from the student's native country. To meet this requirement, all students entering DU fall 2006 or thereafter must fulfill an international experience before they can graduate as a business major.

The preference is for a student to study abroad through the Cherrington Global Scholars program, but students may meet this requirement by completing any DU-approved study abroad program (HPM majors must study abroad). International students meet this requirement by virtue of studying at DU. If travel is not possible, a student can satisfy this requirement by earning a grade of C- in any of the following courses:

ACTG 3284	Consolidated Financial Statement	2
ACTG 3285	Accounting for Foreign Operations	2
ACTG 3701	Topics in Accounting (International Accounting travel course)	4
ACTG 4284	Consolidated Financial Statements	2
ACTG 4285	Accounting for Foreign Operations	2
ECON 2610	International Economics	4

<b>Minor</b>		
Although a minor is not required for BSBA students, they may complete any minor (except business administration)		
<b>Electives</b>		
Remaining hours of student's choice		
<b>Total Hours</b>		<b>185</b>

<sup>1</sup> This course may be used to fulfill a portion of the Scientific Inquiry: Society and Culture requirement.

<sup>2</sup> Either of these courses may be used to complete the Analytical Inquiry: The Natural and Physical World requirement.

## Major Requirements

Major requirements generally consist of 32–52 credits.

Visit the Degree and Program of Study (p. 38) section of this bulletin for information on major and minor programs of study available with the bachelor of science in business administration degree.

## Double Major

BSBA students may also complete a double major, combining two of the majors previously listed for the BSBA.

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## General Policies

- At least 50 percent of required business courses for the degree must be completed at the University of Denver.
- Students must earn a minimum GPA of 2.0 ("C") overall, in all business courses and in the major.
- Students must earn a minimum grade of "C-" in their additional non-business and business core requirements.

**Residence Requirement**

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

**Student International Experience Requirement**

Business students must be prepared to interact with persons from other cultures and manage in circumstances where business practices and social conventions are different from the student's native country. To meet this requirement, all students entering DU fall 2006 or thereafter must fulfill an international experience before they can graduate as a business major.

The preference is for a student to study abroad through the Cherrington Global Scholars program, but students may meet this requirement by completing any DU-approved study abroad program (HPM majors must study abroad). International students meet this requirement by virtue of studying at DU. If travel is not possible, a student can satisfy this requirement by earning a grade of C- in any of the following courses:

ACTG 3284	Consolidated Financial Statement	2
ACTG 3285	Accounting for Foreign Operations	2
ACTG 3701	Topics in Accounting (International Accounting travel course)	4
ACTG 4284	Consolidated Financial Statements	2

### Residence Requirement

- The last 45 credits earned prior to granting a degree must be completed at the University of Denver apart from approved study abroad participation.

## Secondary Majors and Concurrent and Second Baccalaureate Degrees

### Secondary Majors

Secondary majors offer the opportunity to earn one baccalaureate degree in one program supplemented by a rich intellectual experience in a second field of specialization outside that primary program. The “secondary major” offers the option of studying two subjects from two different degree programs while earning a baccalaureate degree in the first major without the requirement of earning a second baccalaureate degree in the secondary major.

Specifically, this option allows a student from one degree program to earn a secondary major from a participating department within a different program by fulfilling the requirements (normally 40–45 quarter hours) set forth by that participating department but without requiring students to complete additional courses that comprise that other program’s core curriculum. Through the secondary major option, upon graduation, a student earns one baccalaureate degree from DU (through the fulfillment of all requirements from the student’s primary degree program). Although that student will not be awarded a second degree, the student’s transcript will reflect that he or she earned a secondary major in that second area of study.

As an illustration, if a BS in computer science student wishes to earn a secondary major in philosophy, he or she will need to satisfy all of the requirements of both the BS degree in computer science and the secondary major in philosophy. The student will graduate with a “BS in Computer Science.” The transcript will note that the student earned a BS degree in Computer Science with a Secondary Major in Philosophy. Secondary majors are not eligible for Latin Honors.

A current list of secondary majors may be found under the Degrees and Programs of Study (p. 38) section.

### Concurrent Baccalaureate Degree

A concurrent degree is different than a double major where the majors are within the same degree. Students must work with advisors in both degree programs to establish an academic plan for completing requirements for both degrees and complete the application to complete two bachelors degrees concurrently form. ([https://www.du.edu/sites/default/files/2023-04/concurrentdegree\\_0.pdf](https://www.du.edu/sites/default/files/2023-04/concurrentdegree_0.pdf)) Students should submit the form and their academic plan to the registrar’s office for final approval.

A student who wants to pursue concurrent undergraduate degrees must complete the following:

- a minimum of 228 quarter hours (Note: Certain degrees may require additional hours.)
- all University requirements for both degrees (Common Curriculum requirements need only be completed once, but any unique requirements for each degree program must be met)
- major and minor requirements as defined by the appropriate departments and schools
- academic good standing at the time of graduation (GPA of 2.0 or higher as required by the degree programs)

### Second Baccalaureate Degree

A student with a bachelor’s degree from an accredited college or university who wants to earn a second bachelor’s degree from the University of Denver must meet normal admission requirements and complete the following:

- residence requirement of at least 45 quarter hours (one year of full-time study)
- major and minor requirements as defined by the appropriate departments and schools
- undergraduate degree requirements (p. 93)
- academic good standing (GPA of 2.0 or higher) at the time of graduation (Note: The accounting program requires a higher GPA.)
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

Courses taken for the first degree may apply as part of the University of Denver undergraduate requirements for the second degree. Courses previously taken and now being applied to the major or minor are allowed with permission of the chair of the appropriate department. In general, courses used for a minor in the first degree may be built on for a major in the second degree. However, the major in the first degree cannot count as a minor for the second.

Possession of a bachelor’s degree does not automatically fulfill the common degree requirements as defined by the University.

# College of Professional Studies Bachelor of Arts Completion Program

## Program Outcomes

The Bachelor of Arts Completion Program grew from the input of business, government, and community leaders, and the design meets learning outcomes critical for your success at work while fostering life-long learning. According to the National Association of Colleges and Employers, the top skills and qualities sought in job candidates by employers include verbal and written communication skills, strong work ethic, teamwork skills, analytical skills, and initiative. The Bachelor of Arts Completion Program enhances these skills through six critical outcomes that will have a lasting effect throughout your career and personal life:

- **Creativity:** the ability to conceptualize and rework problems and to generate solutions to those problems.
- **Critical thinking:** the skill of analyzing and defining issues, developing an appreciation for multiple viewpoints, and generating well-crafted arguments.
- **Knowledge utilization:** the ability to find useful information, ideas, concepts and theories; to synthesize them and build on them; and to apply them in the workplace as well as in personal life.
- **Decision making:** the ability to analyze options and outcomes for decisions in terms of their values and effects and to make decisions that are rational, legal, and ethical.
- **Empowerment:** the confidence that comes from knowing how to act, when to act, and how to respond to the opportunities and constraints that affect your efforts to get things done. With a sense of empowerment comes the ability to lead and to bring about change for the good.
- **Effective communication:** knowing your audience and learning how to empathize with them; reading, writing, and speaking effectively; making presentations that are persuasive and entertaining; and arguing to powerful effect.

## Bachelor of Arts Completion Program Degree Requirements

The Bachelor of Arts Completion Program (BACP) enables adult working professionals employed in business, government, and not-for-profit organizations to complete the BA degree and acquire the intellectual skills associated with a liberal arts education. It offers students an adult-level education that is interdisciplinary and problem-based, emphasizing the multiple skills needed to be creative, effective, and successful in a highly competitive and global society.

## Common Learning Experience

The Common Learning curriculum includes ten carefully selected courses in five areas where students can sharpen their skills and develop essential knowledge needed for thriving in the knowledge age. The common learning courses are a set of interdisciplinary courses for people who have been in the working world and are highly motivated. Interdisciplinary simply means that the perspectives and materials of several disciplines have been brought together in the design of each course. These courses provide a common foundational experience for instruction in advanced courses. The Common Learning Experience will help students learn how to learn, think critically, and improve communication skills, which will serve them in their future academic and professional careers.

## The Experience with Your Major

The major builds on the Common Learning Experience and provides a way for students to specialize and pursue their interests. In most colleges and universities, the major is comparable to studying in an academic discipline, but at College of Professional Studies, your major is interdisciplinary; it draws on several disciplines especially useful for exploring the topics in that major. Students will become conversant with key knowledge in the arts and sciences disciplines, and it will be packaged in a way that helps them to examine key topics in an interdisciplinary field of study. The chief purpose of the major is to provide opportunities for learning how to draw on various liberal arts and professional disciplines when addressing real-world problems within organizations and society.

There are six majors from which to choose:

- Communication Arts (p. 717)
- Global Studies (p. 719)
- Healthcare Administration (p. 721)
- Information Technology (p. 723)
- Leadership and Organization Studies (p. 725)
- Transportation and Supply Chain (p. 728)

At College of Professional Studies, students have a fresh academic start as the first 96 transferable quarter credits (64 semester hour credits) apply toward a University of Denver bachelor's degree. College of Professional Studies welcomes past undergraduate credit to be put directly toward the completion of the degree. Bachelor of Arts Completion Program students will choose a major that relates to their interests and career focus, gaining real-world skills they can begin using right away. An opportunity to complete both a bachelor's degree and a master's degree is available to Bachelor of Arts Completion Program students, who can pursue a dual degree to reduce the time and cost of earning both degrees.

The following academic policies apply to major requirements for bachelor’s students at the University.

- The GPA must be at least 2.0.
- Credits in the major must be earned at the level of “C–” or better.

# Bachelor of Arts (BA)

Total Credits Required for the BA: 180

Transfer Course Work		40-135
BACP 2050	Writing Workshop	4
Common Learning Experience (40 credits)		
CA 2050	Effective Communication	4
CA 2100	Creativity and Innovation	4
LOS 2050	Organizational Behavior	4
LOS 2100	Leadership	4
PPSS 2050	Ethical Decision Making	4
PPSS 2100	Concepts of the Public Good	4
ST 2050	Scientific & Critical Thinking	4
ST 2100	The Digital Age	4
GS 2050	21st Century Global Issues	4
GS 2100	The Past as Prologue	4
Major Requirements		40-48
Planned program of courses		
Electives		0-56
Remaining credits to meet minimum 180 for the degree		
Total Credits		180-188

## Major Requirements

- Credits in the major and the minor must be earned at the level of “C–” or better.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.

## Upper Division Requirement

- Of the total credits required for the degree, at least 75 must be upper-division courses at the 2000- or 3000-level.

## Credit Earned through Examinations

Credit for the same course will only be awarded once (i.e. no duplicate credit for the same class from two different exams)

A maximum of 45 quarter hours can be awarded for all AP and IB credit.

## Advanced Placement (AP)

Through the College Entrance Examination Board (CEEB) program, the University of Denver grants credit to secondary school students who complete an AP examination with appropriate scores. Placement and/or credit is granted in courses commonly taught at the first-year level. Departments of the University vary in their score requirements for credit and placement. The following table identifies the amount and placement of AP credit, **please pay particular attention to the footnotes<sup>1</sup>**.

Courses listed as 1XXX or 2XXX signify elective credit within that subject.

*Note:* This table was prepared based on Spring 2024 exams. The credit in this table is for students who begin classes at DU in the 2024-2025 academic year. Students who started at DU in previous academic years must refer to the tables in the catalog for that year to find the appropriate credit.

AP score	5	4	3	Common Curriculum
African American Studies <sup>2</sup>	4 credits, (HIST 1XXX)	4 credits, (HIST 1XXX)		Analytical Inquiry: Society & Culture and/or Critical Race & Ethnic Studies minor credit

Research	4 credits (WRIT 1133)	4 credits (WRIT 1133)		
Seminar	4 credits general elective	4 credits general elective		
Spanish Language <sup>5</sup> or Spanish Literature <sup>5</sup>	4 credits, (SPAN 1XXX); & 4 credits, (SPAN 1XXX); & 4 credits, (SPAN 2XXX)	4 credits (SPAN 1XXX); & 4 credits (SPAN 1XXX)	4 credits (SPAN 1XXX)	Only SPAN 2XXX counts towards the Spanish major/ minor
Statistics	4 credits (INFO 1020)	4 credits (INFO 1020)		

- <sup>1</sup> The Common Curriculum attributes listed in Notes (ex. Analytical Inquiry: Society & Culture) mean that the credits will count **towards** those requirements but might not complete them.
- <sup>2</sup> A maximum of 4 credits of HIST elective can be awarded
- <sup>3</sup> Credit for the same course will only be awarded once (i.e. no duplicate credit for the same class from two different exams)
- <sup>4</sup> Eligible to register for the advanced level of WRIT credit; additional information found here: <https://academicaffairs.du.edu/writing/first-year-writing/advanced-honors-courses>
- <sup>5</sup> Credit can be awarded for one exam (either AP or IB) in one language only; no AP credit can count towards the Foreign Language (FOLA) requirement
- <sup>6</sup> Students with a 3 on AP Calculus BC can only receive credit for MATH 1951 if they have an AB subscore of 4.

## International Baccalaureate (IB)

IB credit is granted under the guidelines stated below; **please pay particular attention to the footnotes<sup>1</sup>**.

For most subjects, credit is only awarded for Higher Level (HL) exams. For foreign languages, credit is awarded for both Standard Level (SL) and Higher Level (HL).

Courses listed as 1XXX or 2XXX signify elective credit within that subject.

IB Score	7	6	5	4	Common Curriculum
Visual Art	8 credits ARTS 1XXX	8 credits ARTS 1XXX	4 credits ARTS 1XXX		
Social & Cultural Anthropology	4 credits ANTH 1010; 4 credits ANTH 1XXX	4 credits ANTH 1010; 4 credits ANTH 1XXX	4 credits ANTH 1010		Scientific Inquiry: Society & Culture
Biology	5 credits BIOL 1011/ BIOL 1021; & 5 credits BIOL 1010/ BIOL 1020	5 credits BIOL 1011/ BIOL 1021; & 5 credits BIOL 1010/ BIOL 1020	5 credits BIOL 1011/ BIOL 1021		Scientific Inquiry: Natural & Physical World
Business Management <sup>2</sup>	4 credits BUS 1440	4 credits BUS 1440	4 credits BUS 1440		
Chemistry	4 credits CHEM 1010/ CHEM 1240; 4 credits CHEM 1020/ CHEM 1250; 4 credits CHEM 1XXX	4 credits CHEM 1010/ CHEM 1240; 4 credits CHEM 1020/ CHEM 1250; 4 credits CHEM 1XXX	4 credits CHEM 1010/ CHEM 1240		Scientific Inquiry: Natural & Physical World
Computer Science	4 credits COMP 1351; 4 credits COMP 1XXX	4 credits COMP 1351; 4 credits COMP 1XXX	4 credits COMP 1351		Analytical Inquiry: Natural & Physical World
Design Technology	4 credits, BUS 1XXX	4 credits, BUS 1XXX	4 credits BUS 1XXX		
Economics	4 credits ECON 1020 <sup>2</sup> ; 4 credits ECON 1030	4 credits ECON 1020 <sup>2</sup> ; 4 credits ECON 1030	4 credits ECON 1030		ECON 1020 earns Scientific Inquiry: Society & Culture
English A: Language & Literature	4 credits WRIT 1122 <sup>2</sup>	4 credits WRIT 1122 <sup>2</sup>	4 credits WRIT 1122 <sup>2</sup>	Advanced standing <sup>3</sup>	
English A: Literature only	4 credits WRIT 1122 <sup>2</sup>	Advanced Standing <sup>3</sup>	Advanced Standing <sup>3</sup>		
Film	4 credits MFJS 2000; 4 credits MFJS 1XXX	4 credits MFJS 2000; 4 credits MFJS 1XXX	4 credits MFJS 2000	4 credits MFJS 2000	Analytical Inquiry: Society & Culture
Language (A2 or B) <sup>4</sup>	12 credits LANG 2XXX	12 credits LANG 2XXX	8 credits LANG 2XXX	4 credits LANG 2XXX	Subject code will change to reflect specific language (ex. French = FREN 2XXX)
Geography	4 credits GEOG 1410; 4 credits GEOG 1XXX	4 credits GEOG 1410; 4 credits GEOG 1XXX	4 credits GEOG 1410		Scientific Inquiry: Society & Culture

Global Politics	4 credits PLSC 1110	4 credits PLSC 1110	4 credits PLSC 1110	Scientific Inquiry: Society and Culture
History <sup>6</sup> (Americas, Europe, Africa & ME, Asia & Oceania) <sup>6</sup>	4 credits HIST 1XXX	4 credits HIST 1XXX	4 credits HIST 1XXX	Analytical Inquiry: Society & Culture
Mathematics <sup>2</sup> (Analysis & Approaches or Applications & Interpretation)	4 credits MATH 1951	4 credits MATH 1951	4 credits MATH 1951	Analytical Inquiry: Natural & Physical World
Music	8 credits MUAC 1XXX	8 credits MUAC 1XXX	4 credits MUAC 1XXX	
Philosophy	8 credits PHIL 1XXX	8 credits PHIL 1XXX	8 credits PHIL 1XXX	Analytical Inquiry: Society & Culture
Physics	5 credits PHYS 1211; 5 credits PHYS 1213	5 credits PHYS 1211; 5 credits PHYS 1213	5 credits PHYS 1211; 5 credits PHYS 1213	Scientific Inquiry: Natural & Physical World
Psychology	4 credits PSYC 1001; 4 credits PSYC 1XXX	4 credits PSYC 1001; 4 credits PSYC 1XXX	4 credits PSYC 1001	Scientific Inquiry: Society & Culture
HL Spanish (A2 or B) <sup>4</sup>	4 credits SPAN 2XXX; 8 credits SPAN 1XXX	4 credits SPAN 2XXX; 8 credits SPAN 1XXX	8 credits SPAN 1XXX	4 credits SPAN 1XXX
SL Spanish (A2 or B) <sup>4</sup>	4 credits SPAN 2XXX; 8 credits SPAN 1XXX	8 credits SPAN 1XXX	4 credits SPAN 1XXX	Only SPAN 2XXX counts towards the Spanish major/minor
Theatre Arts	8 credits THEA 1XXX	8 credits THEA 1XXX	4 credits THEA 1XXX	

<sup>1</sup> The Common Curriculum attributes listed in Notes (ex. Analytical Inquiry: Society & Culture) mean that the credits will count **towards** those requirements but might not complete them.

<sup>2</sup> Credit for the same course will only be awarded once (i.e. no duplicate credit for the same class from two different exams)

<sup>3</sup> Eligible to register for the advanced level of WRIT credit.

<sup>4</sup> Credit can be awarded for one exam (either AP or IB) in one language only; no IB language credit can count towards the Foreign Language (FOLA) requirement

<sup>5</sup> Counts toward the Business Core

<sup>6</sup> A maximum of 4 credits of HIST elective can be awarded

## COLLEGE LEVEL EXAMINATION PROGRAM (CLEP)

The College Level Examination Program (CLEP) is a group of standardized tests created and administered by the College Board. These tests assess college-level knowledge in thirty-six subject areas and provide a mechanism for earning college credits without taking college courses. The University of Denver will consider awarding college credit for exams in disciplines we teach. All credit awarded for CLEP exams is contingent on departmental approval. Scores below 50 will not be considered.

## Transfer of Credit

### University of Denver Undergraduate Transfer of Credit Policy

#### Purpose

The University ensures that transparency in our policies exists for our students and those who administer these policies, allowing for consistent interpretation and application throughout the institution and, as new types of learning opportunities emerge, allowing for responsiveness on the part of the University in a changing educational environment.

#### Policy

Three general factors affect the transferability of credits: the subject matter, the institution where the credits were earned and the course grade.

#### Subject Matter

Usually, courses taken in baccalaureate disciplines taught at the University of Denver are readily transferable. Credits from professional programs will be examined on a course-by-course basis and are often transferable. In general, courses in vocational or occupational subjects are not transferable. Finally, applicability to the degree for which a student is a candidate and comparability to an existing University of Denver course may be used as factors for the acceptance or denial of transfer credit.

## Transferring Institution

### Domestic Institutions

Credit will be considered for courses taken at institutions that are accredited by an agency recognized by the U.S. Department of Education. Credits are more readily accepted from a collegiate institution with regional accreditation although credits earned at a collegiate institution with national or special accreditation will also be considered. Credits that meet the subject matter requirements will be considered on a course-by-course basis when earned at an institution lacking regional accreditation. Institutions that have been granted official candidacy status by a regional accrediting association will be accorded like treatment to those that are fully accredited.

### Foreign Institutions

Credit will be considered for courses taken at foreign institutions that are formally recognized as an institution of higher education by a given country's Ministry of Education. The same general parameters apply for course content and grades as they do for U.S. credit consideration.

### Two-Year Institutions

Credit from two-year institutions generally is considered lower division. Advanced courses from two-year institutions are considered upper division when validated by the appropriate departments. The maximum credit that may be accepted from a two-year institution is 96 quarter hours.

### Study Abroad

Credit earned within non-DU study abroad programs is treated as transfer credit.

## Credit for Prior Learning

### Military Courses

Military courses documented through Army/American Council on Education Registry Transcript System (AARTS), Form DD 295, "Application for the Evaluation of Learning Experiences During Military Service," or DD Form 214, "Armed Forces of the United States Report of Transfer or Discharge," may be eligible for consideration in the evaluation process. Military courses must be validated by the department with which the subject matter is most closely aligned. A maximum of 10 credits can be awarded for military courses.

### Workplace Learning & Credentials

Prior learning assessment of work-based credentials and education programs, defined as an industry credential, technical certificate, or professional license. Prior learning assessment must be applicable to an academic discipline taught at DU. In order to assess workplace learning and credentials for college credit, the University will require a copy of the credential/license/certificate, a syllabus or equivalent from the program, and instructor credentials. The University will also consider transcripts from the American Council on Education (ACE) and their credit recommendations. Workplace learning will be assessed by DU faculty and does not require standard grades to be reported. Students can be awarded up to 10 credits towards their program through workplace learning & credentials.

### Non-credit programs & Continuing Education

Credit may be awarded for non-credit programs, including continuing education courses, taught at DU or other higher education institutions. In order to award academic credit for non-credit courses, the content must align with a specific course or courses (excluding topics courses, independent study, and independent research) in the program in which the student is seeking credit. In addition to confirming completion of the non-credit course (transcript or certification will be required), the student must complete the final assessment for the credit-bearing course(s) they are seeking credit for (assessments include final exam, final paper, or portfolio). Completion of the non-credit course alone is not sufficient to award credit.

### Credit by Examination

College credit can be awarded for AP, IB, and CLEP examinations. Minimum test scores, course equivalencies, and credit recommendations are made by academic departments. A maximum of 45 quarter hours can be awarded for all AP and IB credit and a maximum of 10 hours can be awarded for CLEP exams.

## Course Grades

Only courses where a grade of C- (1.7 on a 4-point scale) or better was earned will be eligible for transfer. Transfer grades are not included in a student's DU GPA, and transfer credits cannot be used to reduce DU grade-point deficiencies.

Credit earned as pass/fail can be transferred only as elective credit. This credit does not apply to specific degree requirements other than total hours for graduation, and the University must determine that "P" (pass) equals 1.7 (C-) or better performance.

## Instructional Methodologies

Online courses and those offered electronically are not categorically restricted, but they may be refused based on instruction methodologies not equivalent to those at the University of Denver.

## Maximum Transfer Hours and Residency Requirements

The following specific transfer guidelines regarding residency and maximum transfer hours apply:

- A maximum of 135 quarter hours of credit may be transferred.
- The final 45 credits must be earned at the University of Denver.
- For students studying for one or more terms in an approved study abroad program, the residency requirement is waived.
- At least 50 percent of the required credits for the major and the minor must be completed at the University of Denver.
- At least 50 percent of required business credits for undergraduate business degrees must be completed at the University of Denver.

## Authority and Course Equivalencies

Initial transferability decisions are made by the Office of the Registrar. Approval of transfer applies toward the overall credit needed to meet degree requirements and does not necessarily guarantee or result in equivalency with specific University courses or requirements. Transfer credit appeals may be made through departmental chairs. Final authority for transfer credit and determination of course equivalency rests with the appropriate academic department.

## Transfer of Credit by Continuing Students

### Approval

Continuing students must receive approval in advance for transfer credit.

## Concurrent Registration

Students may not enroll at the University of Denver and other institutions concurrently without prior permission.

## Articulation Agreements

The University of Denver may enter into transfer articulation agreements with other institutions as deemed mutually beneficial. Such agreements are administered by the Office of the Registrar. Transfer articulation agreements will include transfer course guides. The University of Denver may establish transfer course guides independent of formal articulation agreements.

## Determination of Quarter Hour Equivalent Value Assigned

University transfer credit hour values are based on the credit hour value assigned by the originating institution. If the academic calendar of the originating institution is other than the quarter system, the appropriate conversion of the assessed credit hours of coursework will take place based on the calendar of the originating institution and the formula for converting them to quarter credit hours. While semester hours are multiplied by 1.5 to convert them to quarter hours, other formulae are used for the conversion when the originating institution is not on a standard, quarter/semester calendar. Conversion of the assessed credit hours from institutions on calendars other than a quarter calendar may result in conversions other than whole quarter credits (e.g., 3 semester credits is the equivalent of 4.5 quarter credits); conversions are not rounded up or down.

## Requests for Transfer Transcript

Students must request that official transcripts be delivered directly from other institutions to the Office of the Registrar. All transcripts must be received in an official sealed envelope or through a secure electronic sending agency. Student will be notified after transcripts have been processed.

## Transfer and International Education Reporting System

The University of Denver's Transfer and International Education Reporting System ([http://myweb.du.edu/mdb/du\\_bwcktart.P\\_DU\\_Choose\\_Geog\\_Area/](http://myweb.du.edu/mdb/du_bwcktart.P_DU_Choose_Geog_Area/)) (TIERS) allows students to access a list of approved transfer and study abroad courses. Courses that do not appear in the system are not necessarily unacceptable for transfer. Courses will continue to be added as they are evaluated and equivalents determined. You can access TIERS through MyDU under Student Tools and then Records and Requests.

For more information regarding how to utilize the TIERS system for study abroad, please see this page:

<https://www.du.edu/abroad/academics/earning-credit.html>.

## Major and Minor Requirements and Course Descriptions

- Bachelor's Majors and Minors in the Traditional Degree Program (p. 117)
  - Accounting (p. 117)
  - Advanced Seminar (p. 123)
  - Air Force Aerospace Studies (p. 139)
  - Anthropology (p. 140)
  - Army Reserve Officers' Training Corps (p. 149)
  - Art and Art History (p. 150)
  - Asian Studies Program (p. 166)

  - Leadership and Organization Studies (p. 725)
  - Transportation and Supply Chain (p. 728)

## Bachelor's Majors and Minors in the Traditional Degree Program

Most majors, and some minors, may only be pursued in conjunction with specific degree programs. The Degrees and Programs of Study (p. 38) section of this bulletin lists possible degree and major/minor combinations. Students must meet overall requirements for their degree as well as specific requirements outlined in majors and minors.

## Accounting

Office: Daniels College of Business, Suite 355

Mail Code: 2101 S. University Blvd. Denver, CO 80208

Phone: 303-871-2032

Web Site: <http://daniels.du.edu/accountancy/> (<http://daniels.du.edu/faculty-research/accountancy/>)

The School of Accountancy's mission is to foster professional excellence, lifelong learning, impactful scholarship, and commitment to community among its graduates, faculty, and others in the accounting profession.

- *Professional excellence* means ensuring that our graduates are skilled in accounting, financial analysis, and decision-making, and that they understand the impact of their actions on the organization, the profession, and society.
- *Lifelong learning* denotes motivation and commitment to continuous development at all levels of one's career.
- *Impactful scholarship* means scholarship which improves our understanding of accounting, the practice of accounting, and the process of educating future accountants.
- *Commitment to community* is the giving of one's time, skills, and resources to help create a better world.

Our programs achieve this mission by emphasizing technical knowledge and analytical ability, interpersonal skills and intercultural understanding, and ethically based leadership and social responsibility. In the School of Accountancy, students learn to integrate accounting concepts and business applications in the context of communication, ethics, values, and technology. This integration is accomplished in the undergraduate business core and in the School of Accountancy core.

The School of Accountancy's strengths include the following:

- an established reputation as a provider of quality programs
- highly qualified faculty who emphasize teaching and relevant research
- student access to faculty—both individually and in relatively small classes
- innovative curricula
- emphasis on state-of-the-art technology throughout the curricula
- emphasis on practical experience
- a rigorous educational experience

The degree prepares students to work as strategic business advisors who can analyze and understand today's complex business environment. Students gain expertise in the traditional accounting arenas of managerial accounting, financial reporting, systems, auditing and tax, as well as in the nontraditional areas of technology, marketing, strategic planning, and finance. The School of Accountancy offers a bachelor of science in accounting (BSAcc), a master of accountancy (MAcc), a STEM designated master of science in accounting, technology, and analytics (MSATA), and a dual degree option that allows completion of the bachelor's and master's degrees in five years.

Refer to the appropriate sections of this bulletin for the admission, retention, and graduation requirements for the School of Accountancy, which differ from the general requirements of the Daniels College of Business.

## Program Objectives

Objectives of the BSAcc are to prepare students for entry-level positions in accounting. In this program, students will learn how to

1. prepare and interpret financial statements for business enterprises;
2. use accounting data to evaluate performance and enable decision-making;

3. apply the principles related to the design, integrity, and effectiveness of accounting information systems;
4. explain the role of auditing in society, including auditing procedures and reporting requirements;
5. apply federal tax laws pertaining to individuals; and
6. Analyze the legal, ethical and legislative constructs that govern the conduct of business.

## Criteria for Admission to the BSAcc Program

### Continuing Students

- Students must have a minimum 2.5 GPA (overall, in ACTG, and in the following courses: ACTG 2200, FIN 2800 and ACTG 2300).
- If a student fails to meet the required GPA, he or she may still be able to qualify for the School of Accountancy. Please consult with the director of the School of Accountancy.
- Other specific admission requirements apply. Please see the School of Accountancy for details.

### Transfer Students

Undergraduate transfer students must meet the requirements listed for continuing students. Credits are considered for transfer only if they meet the following standards:

- Accounting courses beyond principles must be taken at an AACSB-accredited institution or approved by the School of Accountancy.
- Courses must be comparable to required courses offered in the School of Accountancy. Any required courses that do not meet the above criteria must either be validated by examination or retaken. In computing the GPA for purposes of admission to the School of Accountancy, work transferred from previous schools and work at the University of Denver are included.

### Retention Requirement for Bachelor of Science in Accounting

To remain in the program, a student must maintain a GPA of 2.5 or higher, both overall and in accounting courses.

## Major

### Bachelor of Science in Accounting Major Requirements

(186 credits required for the degree (p. 101))

Minimum of 40 credits. Students must earn a minimum 2.5 GPA, both overall, in all business courses, and in accounting courses. If a GPA deficiency exists at the time the prescribed program is completed, no more than 10 credits of approved additional accounting courses and non-accounting courses may be taken in an attempt to correct the deficiency.

Code	Title	Credits
<b>Accounting Core Courses <sup>1</sup></b>		
<b>Accounting Core I Requirements <sup>2</sup></b>		
ACTG 3017	Accounting Information Systems & Controls	
ACTG 3018	Intermediate Financial Accounting I	
<b>Accounting Core II Requirements</b>		
ACTG 3034	Accounting Data Analytics	
ACTG 3037	Cost Management	
ACTG 3038	Accounting Core II - Intermediate Financial Accounting II	
<b>Accounting Core III Requirements</b>		
ACTG 3068	Intermediate Financial Accounting III	
ACTG 3551	Auditing	
<b>Additional Accounting Courses <sup>3</sup></b>

ACTG 3620	Accounting Ethics	
ACTG 3740	Valuation and Modeling	
Advisor Approved FIN or INFO course		
<b>Total Credits</b>		<b>12</b>

<sup>1</sup> Core in Accountancy

The core in accountancy is a yearlong, fully integrated series of courses. Each quarter must be completed in its entirety before the student can move on to the next quarter. Any student with an ACTG GPA below 2.5 at the end of any quarter will not be permitted to continue in the accounting major.

<sup>2</sup> A prerequisite for enrollment in Accounting Core I classes is a 2.5 GPA for ACTG 2200, ACTG 2300, and FIN 2800. Either ACTG 2300 or FIN 2800 could be a corequisite for Accounting Core I; please see advisor.

<sup>3</sup> Please refer to the BSAcc degree page (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinaccounting/>) for Business Core and additional degree requirements.

## Minor

### Minor Requirements

The Accounting minor is available to students pursuing any major.

Prerequisite to all other Accounting Minor Classes:

Code	Title	Credits
ACTG 2200	Introduction to Financial Reporting <sup>1</sup>	4

16 credits, including the following:

Code	Title	Credits
ACTG 3220	Understanding Financial Statements <sup>2</sup>	4
ACTG 3440	Business and Investment Tax Issues	4
ACTG 3281	Intermediate Financial Accounting I	4
ACTG 3282	Intermediate Financial Accounting II	4
<b>Finance Majors must complete one of the following <sup>2</sup></b>		<b>4</b>
ACTG 3462	Corporate & Partnership Tax	
ACTG 3701	Topics in Accounting	
ACTG 3740	Valuation and Modeling	
<b>Total</b>		<b>16</b>

<sup>1</sup> Business Majors will take this course as part of the BSBA Business Core. Non-Business Majors must officially declare the minor to gain access to this course and subsequent courses in the minor.

<sup>2</sup> Finance majors must substitute an advisor-approved accounting course for ACTG 3220 Understanding Financial Statements. ACTG 3462 Corporate & Partnership Tax or ACTG 3740 Valuation and Modeling is recommended.

## Undergraduate/Graduate Dual Degree Program in Accounting

The School of Accountancy offers undergraduates an accelerated program leading to the master of accountancy (MAcc). Students may apply for admission to the graduate program after completing the accounting core. Admission is based on academic performance and faculty evaluation. Contact the School of Accountancy for more information. Students accepted to the program normally complete the BSAcc and MAcc in a total of five years or less.

### Requirements for Distinction in the Major in Accounting

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, admission path to Daniels, prerequisites, availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor to develop an individual graduation plan for your specific needs.

<sup>1</sup> MATH 1200 fulfills requirements for Analytical Inquiry: The Natural and Physical World.

<sup>2</sup> ECON 1020 fulfills half of the requirements for Scientific Inquiry: Society and Culture.

<sup>3</sup> Common Curriculum Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreessanddegreerequirements/>): Students are encouraged to complete Language or Scientific Inquiry: The Natural and Physical World sequences earlier in their studies; choose one for year 1 and the other for year 2.

<sup>4</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

<sup>5</sup> A prerequisite for enrollment in Accounting Core I classes is a 2.5 GPA for ACTG 2200, ACTG 2300, and FIN 2800. Either ACTG 2300 or FIN 2800 could be a corequisite for Accounting I classes; please see advisor.

#### **ACTG 1988 Study Abroad Resident Credit (0-18 Credits)**

#### **ACTG 2010 Survey of Accounting (4 Credits)**

Accounting for running a business, with modules on financial accounting and a focus on managerial accounting. Prerequisite: Sophomore standing. Business minors only.

#### **ACTG 2200 Introduction to Financial Reporting (4 Credits)**

The purpose of this course is to introduce students to accounting and its relevance in the business world. Students learn how to analyze transactions and prepare financial statements. In addition, students are introduced to publicly traded company's annual reports and 10K's. Prerequisites for Business majors: INFO 1010, MATH 1200, ECON 1020, and Microsoft Excel Certification. Prerequisites for Business Administration minors: Declared minor.

#### **ACTG 2300 Accounting for Decision Making (4 Credits)**

Introduces or reinforces concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting financial information and making business decisions, not accumulating or preparing accounting information. Students will learn the concepts of cost behavior, cost-volume-profit analysis, master budgeting, relevant factors for short-term decision making and cost allocation. Prerequisites: ACTG 2200 and Microsoft Excel Certification. Restriction: Must be pursuing BSBA or BSACC degree.

#### **ACTG 2988 Study Abroad Resident Credit (0-18 Credits)**

#### **ACTG 3014 Accounting Core I - Accounting Fundamentals (4 Credits)**

The course prepares the future accountant to understand how the accounting system and profession functions within marketplace. At the conclusion of this course the student should understand: (1) the fundamental elements and terminology of business transactions and related financial accounting (2) the accounting system of recording, classifying and summarizing information, (3) economic and ethical issues relating to financial accounting, and (4) technical and communication skills necessary for the professional accountant. The practice of technical skills is supplemented with learning concepts and techniques for effective oral and written business functions, with a focus on reinforcing speaking and writing skills through practice and feedback. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800.

**ACTG 3017 Accounting Information Systems & Controls (4 Credits)**

The objective of this course is to provide an integrated learning opportunity that encompasses financial internal controls and accounting information systems. Students will learn skills that can immediately be translated to their jobs/internships. The first part of the course focuses on advanced Excel concepts and certification, as well as learning some basic concepts for database systems using Access. The second part of the course will focus on completing the accounting cycle for a business in a manual environment. The purpose being to understand the relationship of all of the documents and the needed controls. The third part of the course focuses on the use of accounting software to automate the processes from the second part of the course. The emphasis being on understanding the impact on the controls within the system. Prerequisites: ACTG 2200, ACTG 2300, and FIN 2800.

**ACTG 3018 Intermediate Financial Accounting I (4 Credits)**

Foundations of financial statement content, including structure of financial accounting theory; accounting process and cycle; income determination and reporting; compound interest concepts and relationship to accounting; accounting and reporting for current assets. Case studies of open-ended accounting problems requiring application of GAAP guidance to fact patterns. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800. Must be a Daniels Student.

**ACTG 3019 Cost Management (4 Credits)**

This course introduces objectives, methods and problems encountered in cost accounting. Cost accounting is a broad field that often links financial and management accounting, involving communication between accountants and management. Prerequisites: ACTG 2200, ACTG 2300. Prerequisite or Co-requisite: FIN 2800.

**ACTG 3034 Accounting Data Analytics (4 Credits)**

In today's information world, accountants must be well equipped to understand and utilize the vast and varying data systems that feed a company's decision-making process. The course fosters a data analytics mindset in accounting students by providing hands on skills with software tools with a strong emphasis on interpreting and communicating the results to the business. Students will gain experience coding in SQL, loading and manipulating data files in Alteryx, and visualizing data for effective storytelling in Tableau. Projects focus on large scale business cycles and challenge students to craft appropriate questions of the data and dig beyond initial data results to identify trends and root causes. Strong focus is placed on visually and verbally communicating the results of the data analysis to a non-technical business audience.

**ACTG 3037 Cost Management (4 Credits)**

Cost Management builds upon basic concepts and techniques for using accounting information for managerial purposes. The focus is on interpreting both high-level and detailed financial information and making business decisions, not accumulating or preparing accounting information. After completing this course, the student should understand: • Cost behavior. • Techniques and uses of cost-volume-profit analysis. • Relevant factors for short-term decision-making. • Cost accumulation, tracing, and allocation. • Components and uses of the master budget. To master the course material, the student will need a basic understanding of historical financial accounting, but the course emphasizes present and future management actions. Prerequisites: ACTG 2300 and ACTG 3018.

**ACTG 3038 Accounting Core II - Intermediate Financial Accounting II (4 Credits)**

The focus of this course is the foundation and content of published financial statements. Specifically, it covers the following two modules: 1) assets: recognition, measurement and reporting issues, a) fixed assets and b) intangible assets; 2) liabilities: recognition, measurement and reporting issues, a) current liabilities, b) contingencies, and c) long-term liabilities. Common to each of the modules is an emphasis on reading GAAP and applying the GAAP guidance to fact patterns. In particular, the course is designed to enhance each student's ability to identify, discuss, and resolve open-ended problems (i.e., those having no single "correct" answer). Therefore, each student must commit to being an active participant in the class discussions. The two main reasons to participate are that (1) the class will be a richer experience if we hear a variety of views on each issue and (2) it is important to develop confidence in your ability to analyze and discuss complex technical issues, and to explain and justify your conclusions. Prerequisites: ACTG 3014, ACTG 3019 and ACTG 3018.

**ACTG 3049 Accounting Information Systems (4 Credits)**

The objective of this course is to provide an integrated learning opportunity that encompasses financial statement assurance and accounting information systems. The first part of the course exposes these issues using a hypothetical company based on an actual company. The student should develop a knowledge and understanding of this particular industry and how it provides assurance of the company's financial statements as well as address a variety of challenging accounting information systems issues. The second part of the course focuses on a conceptual framework to emphasize the professional and legal responsibility of accountants, auditors, and management for the design, operation, and control of AIS applications.

**ACTG 3068 Intermediate Financial Accounting III (4 Credits)**

This course is a continuation of ACTG 3018 and ACTG 3038 and completes the examination of the foundation and content of published financial statements. Specific topics include: stockholders' equity, investments in debt and equity securities, revenue recognition, income taxes, pensions, leases, statement of cash flows, accounting changes and errors, and interim reporting. Prerequisites: ACTG 3034, ACTG 3037, and ACTG 3038.

**ACTG 3069 Accounting Communications (4 Credits)**

This course emphasizes critical communications skills for future accounting, tax, auditing and consulting professionals. The course develops written communication skills including but not limited to technical writing, reporting the results of research and explaining complex issues. Oral communication assignments include formal presentations, development of debate skills and boardroom presence. Assignments incorporate business etiquette and team building.

**ACTG 3130 RPA in the Business and Accounting Environment (4 Credits)**

Robotic Process Automation (RPA) is an emerging technology that is changing the way businesses process data. RPA allows many business processes to be automated and remove the human from performing repetitive tasks. This course will teach the basics of the technology using one of the most popular RPA software programs, UiPath. Students will learn the theory, design an application of RPA through small projects.

**ACTG 3220 Understanding Financial Statements (4 Credits)**

Provides business majors with the necessary understanding to read, interpret, and use published financial statements. Cross listed with ACTG 4222. Prerequisite: ACTG 2200 and admission to Daniels.

**ACTG 3230 Financial Statement Analysis (4 Credits)**

Consolidated financial statements, accounting for leases, currency translation, and options and futures impacts, GAAP to restate financial statements for differences between companies. Impact of financial transactions and evaluating a firm's performance from a user's perspective.

**ACTG 3281 Intermediate Financial Accounting I (4 Credits)**

The focus of this course is the foundation and content of published financial statements. Specifically it covers the following broad topics: (1) Conceptual Framework of Financial Reporting; (2) Financial Statements and Related Disclosures; (3) Assets: Recognition and Measurement; and (4) Liabilities: Recognition and Measurement. Common to each of the topics is an emphasis on reading GAAP and applying GAAP guidance to fact patterns. Prerequisite: ACTG 2200.

**ACTG 3282 Intermediate Financial Accounting II (4 Credits)**

This course is a continuation of Intermediate Financial Accounting I. The focus of this course is the application of Generally Accepted Accounting Principles to complex business transactions. The course includes various intermediate accounting topics, including current and long-term liabilities, leases, income taxes, pensions, shareholders' equity, earnings per share, the statement of cash flows, and other financial reporting issues. Prerequisite: ACTG 3281.

**ACTG 3284 Consolidated Financial Statement (2 Credits)**

Consolidation procedures, issues in the preparation and presentation of consolidated information, and interpretation of consolidated financial statements.

**ACTG 3285 Accounting for Foreign Operations (2 Credits)**

Financial statement impact from doing business in a foreign currency, having foreign subsidiaries or operations, and certain hedging activities.

**ACTG 3340 Topics and Cases in Managerial Accounting (4 Credits)**

Topics & Cases in Managerial Accounting focuses upon contemporary methodologies used by managerial accountants. Such methodologies are examined through classroom discussions of case studies and related articles. The course is designed to develop and enhance skills that are essential for the long-term success of career in accounting and finance. Prerequisites: ACTG 2300.

**ACTG 3360 Profit, Planning & Control (4 Credits)**

Comprehensive planning in the corporate environment involving in-depth study of goals, procedures, responsibility, and coordination of planning and control process. Objectives and structuring of planning process, significant problem areas, benchmarks for alternative evaluation processes, and correction and control tools. Prerequisite: ACTG 2300.

**ACTG 3440 Business and Investment Tax Issues (4 Credits)**

Income tax conceptual framework applicable to common business and investment transactions, including tax implications of business decisions. How effective business planning depends on accurate assessment of relevant tax factors. Prerequisites: ACTG 2200.

**ACTG 3461 Individual Income Tax (4 Credits)**

Federal income tax as it applies to individuals, including discussion of rates, exemptions, deductions, and accounting methods; gross income, property transactions, tax deferred exchanges; business operating taxpayer issues. Prerequisites: ACTG 2200.

**ACTG 3462 Corporate & Partnership Tax (4 Credits)**

Federal income tax as applied to the formation, operation and dissolution of business entities. Determination of corporate taxable income, special deductions, credits, methods of computing tax liability and estimated tax requirements. Determination of partnership and S Corporation ordinary income; classification and amount of separately stated items allocable to partners and S Corporation shareholders in accordance with the conduit principle.

**ACTG 3551 Auditing (4 Credits)**

This course covers professional ethics and legal environment, generally accepted auditing standards (GAAS), internal control, audit documentation and auditors reports.

**ACTG 3620 Accounting Ethics (4 Credits)**

This course focuses on the idea of community and the ethical and social relationships of accounting leaders and business organizations in their communities. The course focus is on the role of the accounting professional and the unique and special responsibilities associated with that role. This is examined by analyzing a variety of issues that students will face during their careers. The goal is to provide students with generalized understanding and skills that can be employed in dealing with other issues that emerge directly relate to the state Code of Professional Conduct applicable to CPAs, the Code provisions are discussed and analyzed.

**ACTG 3701 Topics in Accounting (1-4 Credits)****ACTG 3702 Topics in Accounting (1-4 Credits)****ACTG 3703 Topics in Accounting (1-4 Credits)****ACTG 3704 Topics in Accounting (1-4 Credits)****ACTG 3705 Topics in Accounting (4 Credits)**

Prerequisite: ACTG 3068 or instructor's permission.

**ACTG 3740 Valuation and Modeling (4 Credits)**

Professional decisions in the face of uncertainty are made using a combination of judgment and sound analysis. Even skilled professionals in any field will make incorrect decisions when working with incorrect or insufficient information or when making careless analyses. One key to improving decision-making is superior analytical insights and skills. Given this, the ultimate purpose of the course is to: 1. Provide you with experience in identifying critical decisions that can best be improved through analysis of data and modeling. Once key issues are identified. 2. Provide you with the knowledge and insight necessary to identify appropriate (and reject inappropriate) models or analyses. Once an appropriate model or models are identified: 3. Provide you with the tools and skills necessary to correctly use those models by identifying, measuring and evaluating critical factors, data and assumptions. 4. Gain experience in critically evaluating and auditing your work and the work of other professionals. For example, has management used appropriate models, appropriate data and reasonable assumptions in their estimates of fair value for various assets. Prerequisites: INFO 1020, ACTG 2200 and FIN 2800.

**ACTG 3880 Internship - Undergraduate (0-4 Credits)**

Practical work experience.

**ACTG 3885 Undergraduate Field Experience (0 Credits)**

Compensated work experience; no academic credit. Prerequisite: instructor's permission.

**ACTG 3988 Study Abroad Resident Credit (0-18 Credits)****ACTG 3991 Independent Study (1-10 Credits)**

Independent research/study; requires written report. Prerequisite: instructor's permission.

**ACTG 3995 Independent Research (1-10 Credits)**

## Advanced Seminar

All undergraduates at the University of Denver are required to take an Advanced Seminar (ASEM), an upper-level course capped at 18-19 students. Students are eligible to register for an ASEM after they've completed all other required courses in the Common Curriculum, and this course must be taken at University of Denver.

While knowledge and professional skills found in a student's major and minor are important foundations for accomplishment, successful individuals also must be able to navigate a complex physical, ethical, social, political, cultural, aesthetic, and economic environment that challenges more traditionally limited concepts of higher education and competencies. To help students better understand the challenges, opportunities, and responsibilities of contemporary life, instructors teach an advanced seminar based in their area of expertise and passion. The topic will be approached from multiple perspectives in a capstone course designed for non-majors. Studying in this setting, students demonstrate their ability to integrate different perspectives and synthesize diverse ideas, informational sources, and ways of knowing through intensive writing on that topic. This course must be taken at the University of Denver. Students must complete all other common curriculum requirements before taking the Advanced Seminar.

Advanced Seminar courses meet four criteria in terms of writing.

1. Students will write a minimum of 20 pages (about 6000 words), some of which may be informal, but some of which must be revised, polished and intended for an educated readership.
2. Students will complete a minimum of three writing projects that are distributed over the quarter; exceptions might include a cumulative project completed in multiple stages.
3. Students will be required to revise some of their work based on feedback from their professor.
4. There will be some instructional time given to writing.

**ASEM 2402 Culture and Identity in American Political Development (4 Credits)**

This course considers the development of American politics over time, through the lens of struggles over culture and identity. We discuss how political and institutional change around these topics happens in the American political system. The first section of the course reviews broad theories in the field of American Political Development, addressing the role of culture, institutions, and policy. We then turn to closer consideration of the ways in which scholars from multiple disciplines have applied these theories to specific areas of American politics. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2403 Versions of Egypt (4 Credits)**

This course will study a handful of books that lead up to and study the recent Egyptian Revolutions. We will read Alifa Rifaat's *Distant View of the Minaret*, Amitav Ghosh's *In an Antique Land*, Alaa al Aswany's *The Yacoubian Building*, Wael Ghonim's *Revolution 2.0*, and excerpts from Peter Hessler's forthcoming book about post-revolutionary Egypt. The class will attempt to understand both 21st century Egypt and the aftereffects of the dramatic changes in Egypt since the first revolution of February 2011. Students will write both critical and creative essays for this seminar.

**ASEM 2404 Music Preference, Identity, Genre, and Recommendation (4 Credits)**

Students examine the relationship between music preferences, personality, and identity. Because music preferences are strongly mediated by cultural industries and institutions, students also examine two of the music industry's tools for connecting listeners to their preferred music: genre systems and a more recent tool, automated music recommendation engines. The course includes three medium-length papers and many written responses to scholarly writing drawn from music psychology, musicology, and music informatics.

**ASEM 2405 Decision-making and Neuroeconomics (4 Credits)**

How do you decide what to buy, who to trust, which job to take, or what you'll want to eat tomorrow? This seminar-style course integrates perspectives from psychology, neuroscience, and economics to understand decision-making, how it is affected by emotions or social contexts, and how it is implemented in the human brain. The course emphasizes active participation, and relies upon primary scientific sources (i.e. peer-reviewed empirical articles). Recommended: a familiarity with at least one of cognitive psychology, human neuroscience, or behavioral economics. Recommended: a familiarity with at least one of cognitive psychology, human neuroscience, or behavioral economics.

**ASEM 2406 Myths of Medieval Encounter (4 Credits)**

Using three case studies (Vikings, Crusaders, and Conquistadors) this course examines how pre-modern authors shaped the image of Europe by depicting foreign cultures and how we use the texts of the past to understand not just the cultures they describe, but also the changing face of Europe across the centuries.

**ASEM 2407 The Individual in Modern Economies (4 Credits)**

This course discusses the role of the individual in modern economies, and the impact that modern economic systems have on individuals and their lives. The course will include objectives that people pursue in societies, and how the structure of the economic system can help or hinder achieving them. To that end, a conceptual understanding of different perspectives on modern economies will be at the center of the class. Those perspectives will be drawn not only from economic concepts in a narrow sense, but also be informed by sociology, political science, and psychology, among other disciplines.

**ASEM 2414 Wealth, Power & Justice in the European Union (4 Credits)**

This course explores the regional integration of Europe in the postwar era. Since the European Union "began" back in 1950, the central question we consider is why states that fought devastating wars for centuries chose to put down their arms and merge their destinies with a common market, single currency, and binding "supranational" legal system. We focus on the evolution of economic and political motivations for integration and the legal pressures that erode state sovereignty today. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2420 The Cultured Ape (4 Credits)**

Examines the field of human evolutionary psychology. Evolutionary Psychology examines how human behavior is influenced by our heritage as evolved primates. It challenges the understanding of humans as "blank slates" primarily shaped by their social and cultural environments. The course considers the implications of this perspective for social policy.

**ASEM 2422 Textual Bodies: Discourse and the Corporeal in American Culture (4 Credits)**

This course explores how bodies acquire meanings, and how those meanings are created, represented, disseminated, or contested through discursive and embodied means. Course practices include close readings of literary, philosophical and visual texts; creative and auto-ethnographic writing exercises; and in-class dance-based movement drills. Prerequisite: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2423 The American Road Trip (4 Credits)**

As Frederick Jackson Turner told us back in the 19th Century, American cultural identity has hinged on the idea of an ever-receding frontier and the possibility of reaching it. We will chart how the road figures as both a promise and a burden, and how it reflects changing social and cultural issues in American life. We will consider documents of fiction, philosophy and history as well as film and aspects of popular culture as we consider the American fascination with the road and the careers of its many and diverse travelers. Enrollment restricted to students in the Honors Program.

**ASEM 2424 Poetic Minds (4 Credits)**

How do we know who we are? How do we know what is real? How do we decide what is right? In this ASEM, course participants will trace these key questions from Enlightenment philosophy to British Romantic literature and, finally, to their echoes and afterlives in contemporary literature.

**ASEM 2426 Narrating Memory, History, Space in the City (4 Credits)**

This course draws on a variety of anthropological questions, theoretical approaches, and methodological techniques to examine the city and city life. It begins with the origins and development of cities and the identification of urban areas as sites for investigation in social theory. It next turns attention to exploring how ethnographers link everyday life on the social periphery to larger historical, political, and economic processes. A major course theme is understanding how urban spaces shape identities and communities, and it uses Denver's changing urban landscape to illustrate the theme. The course considers the basic human practice of listening to stories, as well as the meaning of narration in and about the city.

**ASEM 2430 Romanticism in Germany (4 Credits)**

The German Romantic movement of the late 18th and early 19th-centuries was one of the most exciting and perilous intellectual adventures in the history of western culture. Some of the most daring, creative and prophetic work was done at this time, and it dramatically affected nearly every facet of German culture, inspiring novel, sometimes unprecedented, developments in philosophy, aesthetics, poetry, literature, music and criticism. Nor were these developments limited to German culture, but extended to its politics and efforts to form a unified national front against the deracinating effects of industrialization and modernization. The course traces these developments through an exploration of some of the seminal figures, themes and ideas of the Romantic period, primarily in relation to their intersection with philosophy, politics and art and German history. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2434 American Film Censorship and the Hollywood Production Code (4 Credits)**

This course focuses on the evolution of censorship in American cinema and its wider implications. Such focus involves careful examination of the moral, political, and social choices that impact "what" stories can be told and "how" they are told. The course emphasizes critical analyses of how social values and norms influence cinematic storytelling and aesthetics. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2436 Life and Death (4 Credits)**

In this course, students examine several of the moral issues concerning the circumstances under which it is appropriate for humans to bring about life or death. For example, is it morally permissible to bring about, and subsequently destroy, human life in a petri dish? Is it permissible to bring about the death of people who have killed others? We examine and evaluate others' responses to such issues. En route to answering these questions, we pay significant attention to the scientific and empirical factors relevant to which moral responses we should have and to the legal factors determining the actual policies we do have.

**ASEM 2440 Traumatic Encounters through the Lenses of Philosophy and Literature (4 Credits)**

The course explores the intersection of philosophy and literature in relationship to trauma, art, politics and the modern ecological crisis. The course is divided into three parts, each exploring a way that philosophy and literature address the challenges and dilemmas of our contemporary situation, from questions about human sovereignty, freedom and dignity to questions concerning technology, the natural world and global economic justice. In part one, "Sovereignty and Bare Life," questions related to state power, love, intergenerational conflict and displacement are explored through considering Shakespeare's *King Lear* and Giorgio Agamben's *Homo Sacer*. Part two, "Remembering the Future: Trauma and Time's Reminders," considers how F. W. J. Schelling's *Ages of the World* and Toni Morrison's *Beloved* respond to personal and historical traumas, and how these works redefine time, memory and belonging. Part three, "The Ends of the World: Poetry and Philosophy in a Time of Crisis," confronts the unfolding ecological crisis through an exploration of W. S. Merwin's poetry and the late, poetically inspired philosophy of Martin Heidegger. The course is multiperspectival in terms of disciplinary and thematic content and in terms of methodology. Readings highlight how concepts, methods and interpretive strategies of philosophy, can augment analysis of literary works, while literature can not only enliven philosophical argument but approach the limits of what can be communicated philosophically.

**ASEM 2441 Changing Meaning of Adulthood (4 Credits)**

When does a person reach adulthood? Age 18? Age 40? Never? What is adulthood, and how do we measure it? Is it when one's frontal lobe matures, when one starts a family of their own, or simply when one feels "mature"? This class surveys various, competing perspectives on what adulthood means and questions whether adulthood has changed. It approaches adulthood from several disciplinary perspectives, mainly neuroscience, psychology, sociology. Students also engage with the media's angst about Millennials' "failure to adult" by writing Op-eds that draw on academic research. Prerequisites: Completion of all of Common Curriculum Requirements.

**ASEM 2443 "All the world's a stage": Shakespeare Then and Now (4 Credits)**

"All the world's a stage": Shakespeare Then and Now is an ASEM team-taught by faculty from the Departments of English and Literary Arts and Theatre. It emphasizes close reading, writing and interpretation as well as acting techniques and dramatic performance of selected scenes. The four plays and two contemporary novels based on the plays are chosen to underscore the range and diversity Shakespeare displayed in his choice of plot, setting and character and to demonstrate Shakespeare's continuing relevance to political, racial, religious and gender issues. Prerequisites: Completion of all other Common Curriculum Requirements.

**ASEM 2445 Freestyle: Technology, Culture, and Improvisation (4 Credits)**

This course introduces the recent history of musical and cultural forms devoted to improvisation, including jazz, free music, psychedelic and progressive rock, and jam bands, culminating with a focus on the practice of freestyling within hip-hop. It explores the importance of civil rights and human rights discourses to these musical and cultural forms, as well as the critical role these forms have played in civil and human rights movements. The course emphasizes how diverse subcultures of artists, producers, concert organizers, and audience/listeners form around these types of musical expression. It examines improvisation as a response to emerging technological forms (new musical instruments, recording technologies, concert presentation, accessibility and distribution, particularly those enabled by networking technologies) by which musicians and listeners embody new personal as well as collective identities.

**ASEM 2446 Ethics of Creating the Impossible in Modernity and Postmodernity (4 Credits)**

In modernity and post-modernity, good intentions have not always led to good results, and even "good" results come with costs. Creating the Impossible turns to ethical studies to analyze the most amazing technological successes—and the social, ecological, and economic costs associated with scientifically and technologically engineering the impossible. Using a case study model covering topics including ecology, biomedical research, enslavement, gender reassignment, urban planning/policing, the technological singularity, internet privacy, contemporary eugenics, and cutting-edge military research and development, this course addresses a central question: "Sure, we can make that happen, but should we?"

**ASEM 2447 Arab Feminisms in Everyday Life (4 Credits)**

This course is designed to introduce students to Arab feminism. We use Arab feminism to analyze and reflect on everyday life experiences of Arabs around the world and how they relate to larger political and social structures. Feminism is represented as incompatible with Arab societies. The goal for this class is to engage with texts that privilege Arab feminist perspectives to analyze issues of social and political importance. Further, we focus on texts that resist historical and contemporary Orientalist discourses that directly link Islam to the Middle East and Arab identity. The main objective of this course is to offer an overview of the study of feminism through a non-white and underrepresented positionality taking into account religion, race, class, gender and citizenship. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2448 Letters to the History of Photography (4 Credits)**

Through presentations, readings and writing assignments, this course advances the multidisciplinary impact of photography and how photography is directly or obliquely linked to all fields of experience and knowledge. The course objectives embrace interdisciplinary learning and promote the premise that absolutely everything is connected. Employing an epistolary approach (writing letters) students respond to weekly assignments by corresponding with a diversity of practitioners and scholars related to the cultural, historical, and scientific evolution of photography. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2449 American Material Culture: Honors (4 Credits)**

The aim of the class is to engender a richer understanding of everyday life in the United States, both in the past and the present. Material culture around which the course centers is broadly defined and includes settlement structure, architecture, domestic artifacts, art, foodways, and trash disposal. These phenomena are investigated telescopically, as a way to view national structures and trends and, microscopically, to focus on individual actions and lives. Enrollment restricted to students in the Honors Program.

**ASEM 2452 Media and Terrorism (4 Credits)**

A recent Pew national survey showed that almost 3/4 of Americans rank terrorism as a major threat that should be addressed despite terrorism accounting for 0.03% of deaths worldwide in 2021. The media play a role in that disconnect. We live in a world where no single entity can exercise a monopoly over communication channels. Hence, partisan media, ideologically-driven news outlets, social networking sites, and encrypted messaging apps serve as venues harboring polarizing, contested rhetoric that catalyzes fear. Media & Terrorism is a seminar that investigates the media-terrorism nexus. The readings, online discussions, and writing projects aim to empower students to grasp how the media cover terrorism, violent actors co-opt the media, and various players craft anti-extremism messaging campaigns.

**ASEM 2454 Psychology of Religious and Spiritual Practices (4 Credits)**

This writing-intensive course focuses on understanding religious and spiritual practices integrating multiple sources of information. Examples include meditation, prayer, group worship, psychedelics, and gratitude. Students find and analyze scholarly and non-scholarly information and integrate multiple disciplines and perspectives in understanding these practices. Students communicate and extend their understandings through discussion, writing, and presentation. The goal is for students to gain a deeper understanding of these practices, learn multiple approaches to studying human activities, and improve their writing skills. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2456 Remembering Medieval Iberia, from 711 to 2020 (4 Credits)**

Medieval Iberia was home to Muslims, Christians, and Jews who lived together and interacted in complex ways that were both conflictive and cooperative. This course explores the complexities and contradictions of medieval Iberia by paying particular attention to the divergent ways that the period itself has been understood and instrumentalized in post-medieval times. The course uses a range of disciplinary perspectives, informed by religious studies, literary and cultural studies, history, political science, anthropology, and linguistics, to address some key questions. How has the 'coexistence' of Islam, Christianity, and Judaism in Iberia been interpreted in modern times? How do the categories of politics, nationalism, race, language, or faith shape opposing readings of the past? What can medieval Iberia teach us today about the world we live in? Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2457 Bioethics in Today's World (4 Credits)**

Bioethics is a field fueled by the need for information, analysis and consultation among policy makers, health-care professionals and institutions. Ethical issues related to scientific research and health care have recently gained much attention, generating significant demand for students and citizens to understand their moral, legal and risk/benefit aspects. This course operates on a cooperative learning basis, using a debate model to inform and involve students in controversies in bioethics. Course readings represent the arguments of leading philosophers and social commentators, treating such topics as death and dying; choices in reproduction; children and bioethics; and genetics. Additionally, the course examines some basic ethics tests: harm/beneficence, publicity, reversibility, code of ethics, and feasibility. Completion of all other Common Curriculum requirements is required before registering for this class.

**ASEM 2459 Anti-Social Media (4 Credits)**

This course addresses the negative effects of our connective technologies. Examining the media landscape of 100 years ago through the lenses of literary analysis, media theory, and history, it presents the 20th-century origins of our concerns with the media "bubble," with the threat that new media pose to democracy, and with loneliness. By grounding the question of media in history and in the disciplined analysis of literary form, this course seeks to generate more effective modes of thinking about the mediated life. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2462 Psychedelia in the Age of Artificial Intelligence (4 Credits)**

This course introduces the history and current status of psychedelic music. In pop, rock, electronic dance music and techno, hip-hop, and other forms, psychedelia is examined as a symptom of and response to emerging cultural, technological, and scientific ways of knowing and being in the world. Particular attention is given to the intersection of contemporary psychedelic research and recent developments in cognitive and computer science, including machine learning and artificial intelligence. Prerequisites: Completion of all other common curriculum requirements.

**ASEM 2463 Identity and Politics: Multidisciplinary Approaches (4 Credits)**

What is identity? Are some types of identity (e.g., religion or "race") more likely to influence political outcomes than other types of identity (e.g., profession or class)? If so, why? This course introduces three different approaches to the study of identity and politics, including political science, evolutionary psychology (and biology), and comparative historical sociology. We analyze what is useful and problematic about each approach, and use these periods of reflection to hone critical reading, writing, and discussion skills. Students walk away from the course with significantly greater insights into the processes by which individuals and societies construct identities, including our conscious social behavior, unconscious cognitive tendencies, and struggles over political institutions and social norms. **Enforced Prerequisites and Restrictions:** Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2466 When Love Becomes Weapon: Charm in International Relations (4 Credits)**

Scholars of international relations have long believed that it is better to be feared than to be loved. However, as America prevailed over the Soviet Union in the Cold War, a new theory emerged: America won simply because it was perceived to be more attractive than the Soviet Union. America won because of its values, not its guns. How might we assess this argument? What goes into the making of American power: missiles or Rock'n'Roll? To what extent has China, among other competitors, challenged American soft power? Where should one draw the line between soft power and propaganda? What is the future of soft power, as countries' pursuits of their national interest often collide with transnational common issues like protecting the environment? This course explores these questions through multiple perspectives drawn not only from political science and history but also from sociology, philosophy, cultural studies/popular culture, and so on. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2467 Queer Memoirs (4 Credits)**

The memoir, or the fictionalized autobiography, holds an important place in LGBTQ culture. In some ways it is the most complex and lasting form of coming out, a permanent announcement of the author's queer identity to a potentially vast audience in a way that allows for intricate explorations of the body, gender, sex, and the self. The course traces the importance and predominance of this queer art form over the past half century, starting with very recent work, such as Akwaeke Emezi's *Freshwater* and Ocean Vuong's *On Earth We're Briefly Gorgeous*, and work its way back to earlier work dealing with moments in which homosexuality was still criminalized in Great Britain and the United States, such as James Baldwin's *Giovanni's Room* and Quentin Crisp's *Naked Civil Servant*. Objects of study will include literary works as well as other art forms, such as the Magnetic Field's *50 Song Memoir*, Alison Bechdel's *Fun Home*, and Mike Nichols's adaptation of Tony Kushner's *Angels in America*. Such a topic and a trajectory will necessitate an interdisciplinary approach. In examining literary texts, music, film, and other forms of visual arts, the course will approach them with methods drawn from art history, history, legal studies, literature, media studies, music, philosophy, and sociology. Students produce different sorts of writing, including advanced scholarly and creative work. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2469 Imagining the Amazon (4 Credits)**

Representations of Amazonia often invoke images of either an earthly paradise or a green inferno. This course begins by challenging students to critically (re)frame their images of the Amazon by underscoring the unequal power dynamics that have come into play whenever outsiders have represented the landscapes and the peoples of Amazonia over the past 500 years. Using a variety of theoretical paradigms, students in this course study representations of Amazonia created both by indigenous writers and activists, as well as several widely disseminated (and critically heralded) novels, films, and journalistic essays created by 'outsider' authors and auteurs from Latin America, the U.S., and Europe.

**ASEM 2472 Islamic Art and Mysticism (4 Credits)**

This course introduces Islamic art and architecture, focusing on appreciating and understanding formal qualities of works of art, their meaning, and their cultural significance in larger contexts. The course discusses the intimate connections between art, literature, and historical events, with readings that include texts in art history, Middle Eastern history, the rise of Islam, and translated literature. The course includes units in Painting and Literature, Early Islamic Literature and Material Culture, and Islamic Mysticism and the Arts. Like all ASEM courses, Islamic Art and Mysticism is writing intensive. **Prerequisites:** Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2475 U.S. Immigrant Narratives (4 Credits)**

U.S. migrant narratives tell a story about nation-building, citizenship, and globalization. This course explores the diverse ethno-racial experiences of migration in the 20th and 21st century through literature and film. Course readings provide a nuanced lens for considering the broader policies and discourses on nativism, immigration law, media representations, and border fortification. What do these stories tell us about the past, present, and future of migration/immigration? How are these narratives encoded with popular and political practices and discourses? How do these stories disrupt, challenge, or consolidate these discourses? **Prerequisite:** Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2479 Environmental Culture in East Asia (4 Credits)**

This course explores current environmental and ecological challenges in major East Asian countries such as Korea, Japan, China and Taiwan through the lens of ancient and contemporary cultural and philosophical traditions. The course examines 1) primary traditional Asian philosophic and religious concepts about Nature, such as Confucianism, Taoism, and Buddhism, as well as traditional literatures and arts that reflect those concepts; 2) contemporary eco-literature and eco-cinema that function as responses to, and critical reflections of, the urgent environmental crises in those countries; 3) cultural practices that are officially, communally, or privately implemented for eco-preservation and environmental-protection. **Prerequisite:** Completion of all other Common Curriculum Requirements.

**ASEM 2482 Africa (4 Credits)**

In this course, we study the literature, politics and culture of Africa from pre-colonial times to the present. We begin by examining Africa as the locus of the world's oldest civilization and by discussing some key moments in African history. We then focus on the four regions of Africa, on country- or region-based examples of culture and politics in Africa—such as colonial rule in East Africa, war of independence in North Africa, military rule in West Africa, Apartheid in Southern Africa. We also discuss Africa and the world, or Africa in the context of modern-day globalization. In each case, we discuss historical accounts and literary representations as well as political and cultural contexts.

**ASEM 2483 Tabletop Games as Social Texts (4 Credits)**

Since the early 2000s, board and tabletop games have experienced a renaissance of sorts in sales and popularity. These games and the contexts in which they exist and are played provide interesting foci for cultural study and production. This ASEM focuses on possibilities and implications within the realm of physical games. It complicates traditional understandings of understand gaming or “play” in the sense of diversion, a framework in which games are viewed mostly as sold through major markets as tools for fun. This course values that form of cultural meaning but pushes class members to study and make games that serve different purposes. The course examines cultural and psychological studies of games and players, histories of gaming, statistical modeling, rhetoric and other topics and disciplinary lenses. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2484 Culture of Desire (4 Credits)**

How does desire shape the identity of a culture or society, how is it expressed, and how is it limited? This course examines four different postulated societies to see how they shape their gendered desire. Using queer theory and its impact on interpreting the body and its limitations and freedom, the course examines questions raised by these future imaginings, testing them in applications to contemporary society and our understanding of ourselves. This course brings together literature, sociology, anthropology, linguistics in queer journey through reality and the imagination.

Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2488 Exploring Contemporary Art "in situ" (4 Credits)**

Exploring Contemporary Art "in situ" is an exploration of contemporary artworks situated in galleries, museums, and public sites in greater Denver. Students will closely observe artworks by various living artists and read them as primary texts to which they will respond with their own writings in contemporary social media. The course will meet on location at least once each week to be in the presence of the source art works.

**ASEM 2492 Animals and Human Societies (4 Credits)**

This course considers human-animal relationships from a variety of disciplinary perspectives. Focusing on Western Europe and America, we explore the many ways in which people interact with non-human species—killing them for pleasure, eating them, observing them and caring for them—and the effects of these interactions on both animals and people. Thinking about animals sheds light on crucial issues in today's society, with implications for everything from environmental change to the impact of consumer culture to the ethics of euthanasia.

**ASEM 2493 Caring in a Capitalist Economy (4 Credits)**

How does a good society address the needs of members of that society who cannot fully take care of themselves? Does caring have a place in our capitalist economy? Do we organize the provision of care in a just way? How do we balance our caregiving responsibilities in our daily lives? Through course lecture, discussion and community caregiving, we explore these challenging questions using insight from economists, philosophers, sociologists and others to help us better understand how we provide care within our capitalist economy.

**ASEM 2499 Mountains: Ecology, Imagination, Aesthetics, and Challenges (4 Credits)**

Why are people drawn to mountains? What geological and biological features account for our interest, and how might the psychology and philosophy of aesthetics explain why mountains have multiple uses and effects, recreational to religious? How have writers, artists, filmmakers, climbers, skiers, and hikers historically represented mountain experiences? And what are the economic and ecological consequences of all this attention? Can we “ruin” mountains? This writing-intensive course addresses these complex questions through multiple perspectives drawn from the several disciplines noted above. Equally complementing scholarly readings are several popular personal and creative works: films, stories, adventure memoirs, diaries, and so on. Course may include, when circumstances permit, field experiences in the Colorado Rockies and archival work at the American Alpine Club Library in Golden. This ASEM course is open and accessible to advanced undergraduates from all majors, regardless of experience and academic background. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2500 Migration Politics (4 Credits)**

This seminar will focus on the political economy of international migration. Since the 1970s, many countries have liberalized trade and capital flows, however migration policies trended the opposite way. This seminar will explore how international migration have affected the political economy of both migrant-receiving and migrant-sending countries. This course will have three parts: causes of migration, the political/policy reception that immigrants face in receiving countries, and consequent effects of migration on sending countries. Doing so will allow us to examine the political economy of international migration as a process and cover specific subfields of migration research.

**ASEM 2502 Fictitious Ecologies: Envisioning Provisioning Through Science Fiction (4 Credits)**

This course uses science fiction to examine some of humankind's social and ecological ills through multiple perspectives and disciplines. These include environmental science, ecology, ecocriticism, and science fiction, especially its history, genres, and topics, for example, climate fiction (cli-fi), Afrofuturism, cyberpunk, indigenous epistemologies, ecodystopias, and post-apocalypses. The course also includes different paradigms of economic analysis, including ecological, feminist, and institutional. A goal of the course is to envision future provisioning possibilities that are in line with Earth System stabilization and reducing social disharmony. As an ASEM, the course is writing intensive. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2503 AIDS: Then and Now (4 Credits)**

HIV/AIDS is for the most part forgotten in the developed world; it has morphed into a manageable chronic disease. But it has not disappeared, and it has had an enormous impact on our lives and identities. This course will examine the ongoing cultural legacy of HIV/AIDS, concentrating on activist movements in the United States, followed by an examination of HIV/AIDS in sub-Saharan Africa today. This course brings together biology, literature, sociology, and linguistics in a queer journey through the impact of HIV/AIDS. As an Advanced Seminar, this course is writing-intensive, and you will be working on your written expression during the quarter. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2504 Land and Law in Africa: The Politics of Land Acquisition and Distribution (4 Credits)**

In settler colonies in Southern and East Africa, millions of African people were displaced from the land on which they had lived for centuries to make way for European settlement and agriculture. In the postcolonial era, these countries have attempted to redress these legacies by legally redistributing land from the descendants of white farmers to Black farmers and shareholders, with controversial results. Focusing on Kenya, Zimbabwe, and South Africa, this class considers the histories of precolonial systems of land tenure and the colonial legal mechanisms enforced in the often-forced acquisition of land, and how contested meanings over land to different communities are articulated in the postcolonial world in considering who the land belongs to today. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2505 Early Social Experiences and Health Throughout the Lifespan (4 Credits)**

This writing-intensive course focuses on how social experiences during infancy, childhood, and adolescence influence mental and physical health throughout the lifespan. It covers social experiences broadly, including close relationships, neighborhood-level factors, policy, built environments, and social stress, among others. It discusses the positive and negative experiences that can shape development directly and indirectly, and students innovate ways to enhance the public good through applying research. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2506 Creativity (4 Credits)**

The course inspires students to be creative in all facets of life and provides extensive practice, with feedback, in being creative through daily class activities, outside-of-class writing assignments, and class presentations. Students learn the classic techniques for getting novel ideas as well as how to navigate the obstacles that so often restrict creative expression. Students learn how to be creative in a wide variety of different genres so as to fashion their own personal styles.

**ASEM 2507 Earth Sound - Earth Listening (4 Credits)**

This course is an environmental humanities seminar that takes an art/science approach to the study of ecoacoustics: the relationship between human beings and their environment through sound. The seminar approaches ecoacoustics through sound studies and ecological sciences. It emphasizes transdisciplinary problem-solving and developing proficiencies in critical dialogue. The course introduces ecoacoustic literacy as an exemplary art/science toolkit for understanding noise pollution and acoustic ecology extinction as emerging environmental crises, and it develops the case for preserving personal, societal and biospheric spaces. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2508 The Cinematic Essay (4 Credits)**

As an Advanced Seminar, The Cinematic Essay is a creative and critical praxis course which focuses on formal and thematic analysis of documentary films from a wide range of international directors for the purpose of developing new methods of visual written work. Directors include filmmakers like Dziga Vertov, Anges Varda, Farrough Farakzad, Chris Marker, Abas Kiarostami, John Akomfrah, Ari Folman, and Chantal Akerman. Students watch films, read theory related to both cinematic technique and lyric essay, write both critical and creative short assignments, with the goal toward transferring cinematic documentary techniques and cinematic theoretical approach into creative, nonfiction essays, developed in a workshop environment. The course also promotes cultural knowledge, investigates hidden biases, and explores culture privilege. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2510 India: Caste/race/religion (4 Credits)**

India: Caste/race/religion explores the idea that caste is the foundational structure of Indian society and that all the modern problems that plague India—casteism and untouchability, the genocidal treatment of Dalits and Muslims, the degradation of women and queer people, communalism, and the systematic disenfranchisement of a majority of Indian society, to name a few—have their foundations in caste. We will also pay special attention to how progressive movements founded on anticast values have challenged social exclusion by drawing upon indigenous and other liberatory philosophical traditions.

**ASEM 2512 Humor Theory and Application (4 Credits)**

Students in this course study psychology of humor and practice skills in comedic performance. Students learn the psychological theories of humor and apply these theories to the work of a variety of comedians and humorists and to satires or parodies, such as mockumentaries. Additionally, students analyze humor from a cross cultural perspective and learn about humor and laughter research in experimental psychology. As the ability to understand and use humor appropriately is a key component of interpersonal and occupational success, this course additionally helps students recognize and develop their own humor styles.

**ASEM 2513 Constructing Freedom and Bondage (4 Credits)**

Historically, claims about what it means to be free – or even human – have been made through discourses about enslavement and imprisonment; some have used bondage as a trope to explore philosophical or artistic projects, while others have used it to interrogate the assumptions of various political and economic paradigms. Others, still, have used these tropes as a means of advocating for social change, notably through slavery and prison abolition movements. This course examines how writers such as Hegel, Frederick Douglass, Angela Davis, and Dylan Rodríguez define the relationship between freedom and bondage, and it examines the stakes of those definitions for an American ethos deeply invested in the concept of freedom. The course uses frameworks of critical discourse analysis to consider peer-reviewed scholarship, political speeches, reality TV, music videos, and documentary films. The course also explores conceptions of civic identity in the United States. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2521 Youth in Italian Fiction (4 Credits)**

This class explores broad questions about the representation of youth and adolescence, using the lens of fictional representations of youth in Italian literature and cinema of the 20th and 21st century, especially contemporary Italy. In addition to studying novels and films, the course will feature historical and sociological sources (including from youth studies), and will provide tools for a methodological approach to storytelling. Prerequisite: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2522 Social Change and Interview-Based Theatre (4 Credits)**

This course is an exploration of the theory, techniques and processes used to create interview-based theatre. This course will explore both the theoretical and practical side of this specific theatre form. Students will read, analyze and reflect on past examples of interview-based theatre in order to gain a stronger sense of the ethics, limitations, possibilities and aesthetics that impact this particular theatre practice. In addition to the theoretical, students will have the opportunity to craft an interview-based play as groups in class, based on an exploration of the theme of their choosing. In a small group, students will craft interview questions, facilitate interviews, transcribe interviews, craft a script and have a staged reading of the final text. Additionally, students will write short reflections and a final paper. The objective of this course is to provide students, regardless of previous experience, with a deeper understanding of how to tell stories using interview as data - through a practical and analytical lens. This course will give students a general and specific understanding of the creative process used to produce an interview-based play as well as give them an opportunity to critique and analyze the form.

**ASEM 2523 Utopian Urbanism: Reimagining the City (4 Credits)**

This course examines alternative utopian visions of the city and their impact on human behavior and psychology. It covers over 9000 years of city planning and design, beginning with ancient Mesopotamia and ending with the present day. Course material draws on anthropology, archaeology, history, sociology, political science, architecture, geography, evolutionary ecology, cognitive science, civil engineering, and other disciplines. It generates new transdisciplinary understandings of cities that students can use in their lives as citizens.

**ASEM 2527 Life's Aim (4 Credits)**

How do our everyday activities and our short-term goals, like graduating from college and finding a job, fit together with some of our less concrete and more long-term concerns like finding happiness and meaning in our lives? Is there some way to understand our daily activities as coherent with and supportive of these overarching goals? Using philosophical, literary, psychological and economic texts, this course consists of an examination of the conceptual dichotomy of means vs. ends and the role that it plays in our analysis of human activity.

**ASEM 2532 Death & Dying in Hindu Traditions (4 Credits)**

This course explores the meanings of death and dying in Hindu perspectives. The inevitability of death has led cultures throughout the world to speculate on what happens to the individual during, at the moment of, and after death. Until the modern period, religions have typically been the first or only place where people turned for answers to basic questions of existence: What happens at death? Will I and the people I love disappear forever? Or will we continue on after death in some way? Is this the only life we have? What is the relationship between the life we lead now and what happens at and after death? These kinds of universal questions have led to culturally specific and conditioned answers and speculations, some of which we will examine in this course.

**ASEM 2534 Trade Wars and Agreements (4 Credits)**

Trade between nations and its governance are as old as the history of interaction among human beings. But they have gone through major changes throughout the history since changing economic and geopolitical conditions have long challenged the international system of trade governance. This course investigates the evolution of international trade agreements as well as wars. It is about an inquiry of trade wars and agreements in the context of case studies (such as the 2018 US-China trade war) from a political economy perspective. Have the parties involved in trade been (un)fair to each other (e.g., China vs. the U.S.)? Are they (e.g., the U.S. and China) so interdependent that they must resolve trade conflicts? These questions remain valid even when countries reach a trade agreement. The course addresses those questions from the perspectives of various fields such as economics, political science, history, and cultural studies, and it illustrates the effects of trade wars on ordinary citizens. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2536 Ways of Seeing and Sensing (4 Credits)**

This interdisciplinary course explores the natural environment of DU's Kennedy Mountain Campus (KMC). Students learn and communicate content knowledge in astronomy, ecology, and filmmaking in a place- and project-based curriculum revolving around the idea that what we know about our surroundings depends on how we "see" or "sense." We examine natural systems specific to the KMC using both micro and macro approaches to seeing, and explore the ways plants and animals in this ecosystem sense their surroundings through non-visible light and other stimuli. Students collaborate to produce documentary film stories and written descriptions of the KMC sensory landscape for public audiences. The class meets one week in residence at KMC and one on the main campus with remote participation options.

**ASEM 2539 Health, Media and the Self (4 Credits)**

What are cultural beliefs about health, about prevention and about risk? We focus on how culture, media, peers, medical professionals and family influence how we construct and define health and the many key concepts scholars have linked to the notion of being healthy, preventing ill health and pursuing good health. We also examine the impact and function of these definitions on our everyday lives by exploring what health perceptions have to do with one's self concept, identity, self esteem, relationships, expectations, attitudes, beliefs and behaviors.

**ASEM 2543 Sound and Music in Early Modern England (4 Credits)**

Imagine waking to the sound of bells, getting the latest news and gossip via song, singing bawdy rounds at the tavern, or gathering in a secret location to hear forbidden music. This course examines the profound cultural changes taking place in seventeenth-century England and the English empire and how music reflected and helped create these transformations. It considers religious extremism, colonialism, political and scientific revolutions, and their connection to our own political and cultural conflicts. No prior music experience required.

**ASEM 2544 From Crisis To Solution: Indigenous Knowledge and the Path to Sustainable Living (4 Credits)**

This course wants to offer new lenses to examine the current world challenges. It is not about further examining the problems that we face, but to appreciate that we already have the solutions that we are looking for. It is about exploring the possibilities for embracing a fundamental consciousness shift that restores connection with nature, between people, and within oneself. Reconnecting with Indigenous knowledge provides the teachings that can guide our civilization back to a more balanced way of being. The first part of this course examines the fundamental sources of the imbalances that we face, which lie in the illusions of individualism and materialism, and disconnection from natural laws. The second part discusses the historical roots of our present challenges. Understanding colonization, in all of its forms, is essential to appreciate the role that decolonization (of both our way of thinking and living) plays for the future of the planet. The third section is about the meaning of sustainable living. What does it entail? What are its foundations? Learning about the indigenous way of life will help reconnect with the values and the practices that can inspire the transformation that we are looking for. The last part of the course will shed light on the seeds of change that are well underway. Grassroot initiatives, activism, collective imagination, and spiritual awakenings are not only sources of hope, but they are co-creating the shift to a just civilization.

**ASEM 2545 Medievalism in Music and Popular Culture (4 Credits)**

This course explores the phenomenon of medievalism—that is, the perception and representation of medieval culture in post-medieval eras—and examines its impact on Western (that is, primarily European-derived and influenced) popular cultures, especially in music. The course examines ways that artists past and present have used images of the medieval past to connote authenticity, spirituality, liberty, virtue, class, gender, race, rebellion, democracy, alienation, horror, romanticism, and magic. Sites of medievalism discussed in the course include novels, films, operas and musical theatre, folk songs, visual art and architecture, politics (including disturbing elements such as fascist and white supremacist movements), hip-hop, new media, and digital cultures that draw on medievalism. As are all ASEM courses, this one is writing-intensive. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2547 Writing About Music in the 21st Century (4 Credits)**

Students analyze music from a variety of disciplinary perspectives, including historical, political, and sociological approaches, and then learn to write about music in genres ranging from album reviews, musician and/or scene profiles, cultural criticism, liner notes, music blogs, performance reviews, and personal essays. Students read nonfiction about music, attend concerts, and research musicians, their music, and musical communities. With an eye toward broader publication, students craft and share their findings with public audiences. Course texts such as *How to Write About Music* will be supplemented by historical and theoretical readings and by works from music writers like Lester Bangs, Amiri Baraka, Jeff Chang, Gerald Early, bell hooks, Amanda Petrusich, Ellen Willis, and so on.

**ASEM 2548 Critical Consumer Culture (4 Credits)**

Students will engage in critical analysis of consumer culture, with a focus on how media, social media, advertising, spectacles/mega-events, and consumption spaces are a part of meaning-making in everyday life. In addition to reading historical and contemporary research articles about many facets of advertising and consumption, students will conduct their own analysis and write about various practices that make up this culture. To the extent possible, students will approach the study of consumer culture in the United States as if they were anthropologist or ethnographers, attempting to 'make strange' a set of familiar spaces and practices around consumption.

**ASEM 2549 Disease- Money, Sex, Politics, and Religion (4 Credits)**

This course will unpack human diseases from across the ages through various lenses such as power, prestige, politics, business, domination, love, morality, and culture. Diseases such as Hansen's Disease (Leprosy), Plague, Smallpox, Tuberculosis, HIV/AIDS, Syphilis, Malaria, Polio, Influenza, Cholera, and several others will be deconstructed to highlight the many societal layers of health and disease. This course will utilize historical texts, current literature, health journal articles, and multi-media content (movies, Ted Talks, etc.).

**ASEM 2557 Body & Sexuality in Religion (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modification? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective.

**ASEM 2558 Digital Gods: Media and Religion in the 21st Century (4 Credits)**

This course explores the intersections between media, religion and culture in the United States. Religion continues to hold sway in the 21st Century as a social, cultural, and political force. Religion, broadly defined, remains active in the media age and is increasingly mediated through television, film, politics, and consumer culture. This course examines TV, film, sports, social media, and more to explore digital gods of the 21st century and how they influence and inform US culture.

**ASEM 2559 Globalization and Film (4 Credits)**

This course explores the varying ways that globalization impacts cinema on a national and transnational level. Designed as a seminar, this course is broken down into three units: theories on globalization; implications of globalization behind-the-scenes; and representations of globalization onscreen. Through a selection of assigned readings and filmic texts, you will be encouraged to think critically about what "globalization" means and how it influences films, both behind-the-scenes and onscreen. To reify your understanding of globalization, you will research and write original scholarship on globalization and a select film to contribute to the academic community.

**ASEM 2560 America Through Foreign Eyes (4 Credits)**

The United States, and Americans, occupy a unique, privileged and powerful position in the contemporary world order. Indeed, according to many scholarly and public accounts, the U.S. has achieved unprecedented status as the preeminent world power. Yet, despite or, paradoxically, perhaps because of its status as what some have called a world "hyperpower," large numbers of Americans are mostly, if not totally unaware of what U.S. global preeminence means to them and to other people around the world. This course aims to inspire critical reflection on the student's part about the role of the United States - its political and economic systems and practices, its culture, and most fundamentally its social actors, meaning its people(s), in a globalizing world.

**ASEM 2566 Society Through Literature and Cinema (4 Credits)**

This course will study the interconnection of human societies (or nation states) as evident in different kinds of narratives. Discussing literary and film narratives in particular, we will examine the beliefs and influences that shape relationships within the same society as well as the beliefs and influences that shape relationships between different peoples and societies. Our examination will include an exploration of how these beliefs and influences are generated and modified. Our study will be aided by the interpretive insights of artists and visionaries. Our examples will be taken from different regions of the world.

**ASEM 2567 Violence, Law, & the State (4 Credits)**

This class is built on interrogating arguably the fundamental issue facing every state: how to deal with violence. Through a mix of academic readings, films, documentaries, and reputable media, we will consider a range of issues regarding violence and the state in the modern world. The three organizing themes for the class are understanding the lived problems of violence, the nature and value of freedom in relation to violence and the state, and the question of how law relates to violence and the state.

**ASEM 2568 Outsiders in Italian Fiction (4 Credits)**

This class addresses the recurring representation of the character as an outsider in the Italian literary and cinematic tradition of the 20th and 21st centuries. Novels, theatrical plays, and films will be supplemented by a collection of secondary sources on psychology and sociology, providing the tools for a correct thematic and methodological approach to storytelling.

**ASEM 2576 Art, Thought, Spirituality (4 Credits)**

This course examines the close and complex relationship between esthetic expression and private religiosity, or "spirituality." The course will examine how theories as well as personal accounts of artistic creativity, experience and appreciation can both broaden and deepen our understanding of the inner life that is otherwise communicated in religious terms and how artistic expression can also have a quasi-religious or "spiritual" character. The central objective will be to illumine the way in which the construction of the individual self and the formation of the personal identity are intimately tied to different quests that are artistic and spiritual at once.

**ASEM 2577 Cultural Intersections (4 Credits)**

In this course, we explore the dynamics of cultural reception or the translational dimension of modern culture, particularly the reception of narratives within particular cultures and beyond. Our main focus is the principles that integrate and divide people along the lines of race, class, ethnicity and culture. Our journey involves studies of cultural contacts, contexts and narratives from Africa and the Caribbean, Asia and the Middle East, Europe and the Americas.

**ASEM 2579 From Literature to Film (4 Credits)**

In this course, we examine the adaptation of literary works into films. We closely study selected modern literary works and the film interpretations of each work. Focusing on the transition from one narrative form to another, the course enhances the critical skill of students as well as their creative ability with respect to cinematic translations. We, therefore, also have mini scriptwriting workshops as a way of imaginatively highlighting the sort of considerations that go into the making of the film script.

**ASEM 2580 Celtic Identities and Nationalisms (4 Credits)**

Every March 17th, millions of people around the world engage in invented rituals of drinking, parades, & music in celebration of St. Patrick's Day. Summer finds Scottish Highland Games enacted by kilt-wearing, bagpipe-playing, Celtic-culture aficionados across the English-speaking world. The European Union has funded Celtic-History Trails & sites across Western Europe to link itself to an earlier period of 'unification.' Millions of people claim Celtic heritage and ancestry in the U.S.A. and across the globe. But what does that really mean? Who is entitled to claim such identities? Who is not? How do people reconcile 'Celticness' with other elements of individual, national, and group identities across the globe? This course uses Celtic identity as a means of engaging students in a critical examination of the meaning and process of identity formation. Students identify, compare, and evaluate the methods used to define and claim legitimate and illegitimate definitions of "Celtic" identity espoused by past and current nationalists, musicians, archaeologists, political scientists, historians, governments, film-makers, shopkeepers in Wales, Scotland, Ireland, Brittany, Europe.

**ASEM 2581 Forgiveness, Politics and Film (4 Credits)**

This course covers a number of reconciliation frameworks that have been employed as transformative and peacemaking strategies in various interpersonal, social and political contexts. We discuss the value (and limitations) of core reconciliation concepts, see how they have been used productively, and consider their possible application to ongoing problems in the world today.

**ASEM 2589 Thinking (4 Credits)**

This course helps students both learn how to think well and to understand why they often don't think well. The course addresses a wide range of topics in which thinking is relevant including creativity, science, argumentation, rhetoric and intelligence. Students come to understand their personal strengths and weaknesses in thinking and students spend a substantial amount of time improving their areas of both strength and weakness.

**ASEM 2596 Politics of Reconciliation (4 Credits)**

This class addresses the national and international efforts to seek justice and achieve reconciliation. It examines how state and non-state actors reflect on an unfortunate or hostile past with a designated "other": how did their relations and interactions with this targeted "other" go wrong? What were the material, philosophical and emotional grounds to breed such hostilities? What were the consequences? Has the memory of the "past self" and "past others" shaped the way the two groups interact today? Why do some actors refuse to say "sorry," and why do some victims refuse to forgive? What are the similarities and differences among various reconciliation projects? In this class, we lead students to explore these challenging yet exciting questions.

**ASEM 2600 Humans and Their Stuff: Our Relationships to Material and Immaterial Worlds (4 Credits)**

Anthropologists, art historians, artists, makers, and inventors of all sorts have long studied things in the form of material culture, such as technology, artifacts, and art. They have been interested not only in how things are made and used, but also in how things mediate social relations and interactions, shape and express identity, record and spark memories, and how they make us feel and do things. In short, they have been concerned with how "persons make things and things make persons." Anthropologists, in particular, have also been interested in people's adaptations and changing relationships to the natural environment, the extraction of natural resources for producing things, and the impact of this behavior on the planet. This interdisciplinary course explores people's diverse and multidimensional relationships with material and immaterial worlds through deep time and across cultures, through lectures, guest speakers, labs, and experiential-learning, hands-on exercises. Learning Outcomes: As a result of taking this course students are able to articulate an awareness of the importance of things in their individual and social lives; monitor, collect and record data and use basic statistical methods (frequencies, averages, percentages) for analysis of personal consumption/consumer habits; and conduct material culture and object-based research using collections from the University of Denver Museum of Anthropology; develop and use visual literacy/observational and multi-sensory skills that complement text-based learning and writing.

**ASEM 2601 Urban Economic History Through Cinema (4 Credits)**

We have recently passed the threshold where more than half of the population globally is living in urban areas. Perhaps more striking is that in 1850 only 3 cities (London, Beijing and Paris) had populations that exceeded a million people, while today there are over 300 such cities, with the largest city, Tokyo, having nearly 40 million inhabitants. Coincidentally, the growth in urban areas coincided with the emergence of cinema. In the popular imagination cities have been sites of both promise and terror and this has been well captured in movies since the early 20th century. This course will consider the economic cycle of cities from the early 20th century to the present as seen through film representations. While the films we will watch are works of art this is not a course on film appreciation. What we are interested in is how the emergence of large clusters of people living together in relatively small areas is being depicted over time. Furthermore, we want to understand how the economic arrangements that define these clusters, these cities, are documented and provide a new way of thinking about how humans decide to live and work in common spaces.

**ASEM 2606 Japanese Film (4 Credits)**

This course examines some of the most iconic films in the Japanese cinematic tradition in order to identify and critically engage in narratives of Japanese aesthetics and cultural identity, especially ones that take culture as the site for locating tradition and/or modernity. No previous knowledge of Japanese or film required.

**ASEM 2609 Literature of Nature and Apocalypse (4 Credits)**

Concern about the declining state of the environment has been a topic of longstanding interest, from Henry David Thoreau to John Muir, and writers like Edward Abbey, Ernest Callenbach, Louise Erdrich, T.C. Boyle, Octavia Butler, Cormac McCarthy and others. This writing intensive course examines questions relating to environmental activism and social structures predicated upon technological and materialist culture. It considers how American writers have reassessed the relation between religious beliefs and notions of utopia and apocalypse. It examines and analyzes timely and relevant historical, literary, and philosophical issues relating to the current state of the environment.

**ASEM 2610 The Politics of Bilingualism (4 Credits)**

While more and more college students are required to take a "foreign" language and bilingual programs grow in popularity in the K-12 systems, formal education in languages other than English in the US has often been at the heart of fierce debates claiming it is impractical, irrelevant and even "un-American". This course addresses a variety of concerns around the perception and manifestations of bi- and multilingual policies in the US. We examine how the perception of English as a "national language" and a "language of opportunity", contrasted with other languages (and the people who speak them) as a "distraction" or "threat" contribute to personal and public policies surrounding language use in the US.

**ASEM 2611 Being Human: Sex and Sexuality (4 Credits)**

Relationships are the greatest thing in the world—until they end. Many people have experienced both the exhilaration and the misery of a romantic relationship. The same can be true for other types of social relationships. How do you make sense of the relationships around you? To navigate better our complex human landscape, understanding the basis of human sexuality and sexual expression is important. This course examines behavior and emotion by introducing the results of high-quality scientific studies of sexual behavior and its evolution and expression. Prerequisites: Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2615 Disease in World History (4 Credits)**

This course examines the social and political impact of disease in global history, and also considers how understandings of disease have changed over time. We will focus on the modern period (roughly the past two hundred years) and examine demographically significant diseases such as tuberculosis, malaria, and smallpox. Themes that we'll explore together include how the distribution of power and wealth in the 19th-20th centuries helped determine global distribution of diseases today; how our ideas about a disease influence how willing and able we are to deal with it effectively; and the notion that disease is as much as socioeconomic problem as a biotechnical one.

**ASEM 2620 Inventing America (4 Credits)**

This class introduces students to exemplary public documents, primarily in the form of speeches, which address the promises set out in the preamble of the U.S. Declaration of Independence: the rights to life, liberty and the pursuit of happiness. The course traces how these promises have been articulated by a succession of public actors ranging from U.S. Presidents to members of radical political factions. The course always addresses three major political movements: (1) the movement for political inclusion of Blacks, beginning with early abolitionists and extending to the struggle for civil rights, including the black power movement; (2) the movement for the political inclusion of women, beginning with the suffragists and extending to include feminism, including the fights over sexual freedom; and (3) the struggle over economic rights, beginning with early U.S. socialist and anarchist movements and extending into the contest over the creation and pruning of the U.S. welfare system.

**ASEM 2627 Translingual Perspectives (4 Credits)**

Our languages and dialects are essential components of our identities. In an increasingly multilingual society, linguistic diversity is a personal, academic, and professional advantage. Nevertheless, linguistic justice is a more urgent issue than ever, since there is often pressure in both academic and professional communities for speakers and writers to conform to Standard English, a practice that can lead to a devaluing of one's heritage languages or dialects. "Translingual Perspectives" introduces difference in language as a resource for producing meaning. After reading framing articles from different fields—such as writing studies, sociolinguistics, and anthropology—students are invited to explore their own linguistic identities and to conduct related ethnographic and oral history research. Enforced Prerequisites and Restrictions: Completion of all other Common Curriculum Requirements. However, students may enroll under special circumstances with prior permission of the instructor.

**ASEM 2637 James Joyce's Ulysses (4 Credits)**

This Advanced Seminar will focus on James Joyce's famously difficult—but in many ways not all that difficult—modernist masterpiece Ulysses, which will in turn be the subject of three writing assignments that will allow you to explore the roles and responsibilities of the reader, the writer, and the critic. There are many reasons to devote an entire quarter to James Joyce's Ulysses, which turned 100 years old on 2/2/2022, but here are two: 1) its reputation as a "difficult" book often overshadows the fact that it's beautiful, funny, and in many ways quite accessible, and 2) it's a useful book for thinking about being with (and without) other people. In this course, we will try to find out both what this book can teach us and what we can teach one another about it.

**ASEM 2640 New England: Myth and Memory (4 Credits)**

The subject of this course is historical memory or, to put it simply, the relationship of the present to the past. Historians take for granted what has been called "the invention of tradition," but most people do not appreciate the constructed nature of the past and do not recognize the possibility that there have been (and continue to be) contests over which version of key historical events or movements is to be disseminated to the public. This course focuses on region—New England—and its racial history as a case study of the process of fabricating historical memory. New England's history is particularly useful for this purpose because the region has had an inordinate impact on our national history.

**ASEM 2641 Globalization from Above and Below (4 Credits)**

This course provides a unique and challenging opportunity for students to clarify the concept of globalization by exploring parallel and interesting forces "from above and below." This course draws widely from international studies, economics, political science, sociology, environmental studies, and feminist theory to examine processes of global social change and conflict. Through academic theorizing and activist writings, the course familiarizes students with some of the landmark debates on globalization. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2646 Dance in India (4 Credits)**

As a discipline in which the body is trained to become "naturalized" in very specific ways, dance tells us much about the culture in which it is a part. Dance movements and meanings also become sites of conflict during periods of cultural transition, and yet because of dance's ephemeral nature, its relative adherence to tradition, or lack thereof, is difficult to ascertain, and thus often hotly contested. This course explores the tension between change (innovation) and continuity (tradition) in four different forms of dance from the Indian subcontinent: Bharata Natyam, a classical dance form from South India; Kathak, a classical dance form from North India; Bhangra, a folk dance form from Northwestern India; and the mass-mediated, syncretic form of dance predominant in the Bollywood film industry.

**ASEM 2651 The Peopling of the Western Hemisphere: Science, Evidence, Controversy (4 Credits)**

The migration and colonization of North and South America is analyzed based on data and observations made from the archaeological record. While it is evident that people did arrive in the Western Hemisphere in the distant past, there is a great deal of dispute about where they came from, when they arrived, and how they adapted to the new environments they encountered. The course evaluates various claims about all these important aspects of human migration. It tests conflicting models about which people arrived first, where they first landed, and what they did when they got here. The primary tools for this analysis are archaeological materials, but the course also draws on recent DNA and linguistic evidence of living Native American groups.

**ASEM 2663 The Dark Knight Exposed: Exploring the Complicatedness of Superheroes (4 Credits)**

The 21st century has seen a rebirth of interest in fictional superheroes, and this course will explore how such characters can be seen as representing aspects of contemporary society. Especially noteworthy are conflicts between good and evil that so many superheroes embody. As Batman character Harvey Dent explains, "You either die a hero or you live long enough to see yourself become the villain." The course uses readings from psychology, literary studies, and popular culture to explore figures from the X-Men, Superman, the Avengers, and other comics and movies, with a central case study focus on Batman. The goal is for students to come away with a deep understanding of and appreciation for the complexities of superheroes and what they represent: what conflicts hide below their surfaces and our society's?

**ASEM 2665 Occupied France in Perspective (4 Credits)**

This course deals with the Occupation of France during World War II. Students, throughout the course, learn to understand, describe and articulate selected crucial aspects of this four-year period of military occupation. This course examines the question of the image of the Resistance and Occupation in cultural memory; this is a much studied and debated issue today, and forms the conclusion to the course. Forms of collaboration and resistance are very much in question in historical, cultural and literary debates today.

**ASEM 2666 Murder in America (4 Credits)**

This course draws on research from several perspectives in order to examine: (1) the definitions, scope, consequences and historical trends of homicide in America over the last century, including a case study investigation of why the murder rate dropped dramatically in New York City by the late 1990s; (2) past and current sociological/cultural and psychological explanations for lethal violence, including an in-depth look at serial, mass and spree killers; (3) crime policies and techniques aimed at reducing lethal violence, which entails a critical look at Three Strikes and You're Out laws aimed at violent offenders; and (4) media representations of homicide defendants and victims.

**ASEM 2670 Development in Latin America (4 Credits)**

This is a writing-intensive course centered on examining in a critical manner the continued efforts made by several countries in Latin America throughout the 20th century in promoting different projects of national economic and political development. Among other topics, we analyze the incorporation of Latin American countries into the international economy and the consolidation of its local oligarchic regimes (circa 1880s to 1930s); the importance of populism and elite pacts (of the 1940s and 1950s) for the promotion of industrial programs; the process of radicalization of the left, the democratic breakdowns and the ensuing military rule (of the mid-1960s and 1970s); the transitions to democratic rule (1980s); the implementation of market-reforms (1990s); and the current challenges for democratic consolidation.

**ASEM 2672 The Berlin Republic: Germany since 1990 (4 Credits)**

For roughly two decades, Germany, a once divided nation in the heart of Europe held responsible for World Wars, has been re-united. Forty years of division between West- and East-Germany—a division exacerbated by their respective geopolitical roles in the Cold War—left its mark on what many intellectuals considered a 'cultural nation' in spite of their political separation. This class examines the pains and gains of twenty years of unity, a process that has repeatedly been described as an attempt to "normalize" Germany's complicated history. We analyze various political, historical, but mostly cultural developments (and debates) that have accomplished and, at times, questioned this unification.

**ASEM 2677 The Sixties: Swinging London (4 Credits)**

Most of us are familiar with the main images of the 1960s in Britain, miniskirts, Mods, scooters, hippies, free love, the Beatles, the Rolling Stones, and James Bond. Considered the great decade of change, students' parents and other baby-boomers look back on it with nostalgia and the media continues to romanticize the period as being more innocent than today. Yet scholars continue to argue about the degree to which the Sixties really changed British society. While popular culture was clearly departing from that of the pre and immediately post-war era, many scholars from various disciplines assert that these changes, including the rise of the music industry, the teenager and youth culture, consumer-oriented society, spy literature, gender and racial issues found their roots in the post-war experience. Other scholars assert that the decade was dominated by contradictory impulses and that the major changes were uneven and often on the surface. This course traces the major themes of the period, including the rise of popular youth-based consumer culture, an unfettered media in Fleet Street, the center of world fashion-Carnaby Street, espionage literature on the page and on the screen, race and immigration issues, challenges to gender norms and sexual 'liberation', Britain's changing position in the world, the end of the British Empire, and the redefining of British national identity. These themes are investigated using a variety of sources including popular and documentary films, personal memoirs, novels, primary documents, secondary literature, fashion, poster art and other non-traditional sources.

**ASEM 2680 Jewish Latin America (4 Credits)**

This course examines Jewish presence in Latin America from colonial times to the present, focusing on Jewish writers in Spanish America throughout the 20th century and considering Jewish-Brazilian and Jewish-Latino writers, Jewish themes in non-Jewish Latin American literature, and the various waves of Jewish immigration to Latin America. This course considers how they helped shape their specific communities and their responses to assimilation, state-sponsored anti-Semitism and Aliyah. Topics to be discussed include assimilation vs. integration; the construction of Jewish and national identities; and anti-Semitism in literature, film and political discourse. The course integrates critical readings alongside the literature, specifically in the areas of trauma and representation. No knowledge of Spanish is required, as the language of instruction is English and all required texts are available in English translation.

**ASEM 2685 Religion and Filmmaking (4 Credits)**

This course examines film and television representations of religions from around the world in an effort to understand the goals of the media makers and the effects of their productions. The techniques, theory and rhetoric of the films viewed are dissected and discussed. The course enables students to participate in critical, yet respectful debates about the cinematic mediation of religious concepts.

**ASEM 2692 Philosophy of Migration and Global Citizenship (4 Credits)**

The 21st century is already being described by many as "The Age of Migration." This course explores the implications of mass global migration for the political philosophies of citizenship on which sovereign states are founded. Is something like a global citizenship possible? This seminar offers a cross-disciplinary perspective on this and other related issues. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2696 Communication and Adoption (4 Credits)**

This course explores the communicative dynamics of adoptive families. This course focuses on issues surrounding identity, cultural context, race, sexual orientation, loss and ethics. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2697 Muslims and Identity in Europe (4 Credits)**

This course introduces students to the diverse Muslim populations across Europe, taking a case study approach that focuses on the histories, national politics, and societal contexts that help form Muslim European identities. Students gain exposure to anthropological, historical, political science, and religious studies techniques and perspectives, while writings focus on real-world genres that support students' professional development. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2713 Food Culture: Foodies, Foragers and Food Politics (4 Credits)**

Culture, history, identity, sustainability, power: food is the bridge that connects us. Food is used to nourish and heal, mark celebrations, build community, and symbolize identity. This seminar investigates the connections between our food choices and political and cultural power. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2715 Belonging in America (4 Credits)**

Who belongs in America? Who is on the inside/outside, and why? How do we define, experience, maintain, reject, and embrace our own insider/outsider status? Finally, how do American novels and dramas conceptualize and dramatize the many negotiations involved in belonging? This course explores the social, cultural, and experiential aspects of belonging in America. Completion of all common curriculum requirements is required prior to registering for this class.

**ASEM 2720 Nazi Germany: History, Literature, Culture (4 Credits)**

This course explores Germany's Nazi era. It focuses on themes like redemption, temptation, national community, conflict and memory while analyzing both texts and visuals from and related to the period. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2728 Identity, Power, and Media Culture (4 Credits)**

In our contemporary cultural landscape, information is delivered in many formats, through various mediums, to global audiences. Understanding media systems as information delivery is often tied to journalism and/or financial institutions; "news" and "data," have become synonymous with what we officially learn from media culture. However, those same images and messages that help us understand our social condition are also delivering important meanings about ourselves and those around us. This course focuses on this branch of inquiry within media studies—highlighted by the work of cultural studies—and focuses on the intersections of identity and power. As a fundamental source of the signification of identity, media culture becomes a social tool, and therefore must be understood as a system that shapes our relationships to individuals and communities. This course will explore the importance of this process, will equip students with the means to critically analyze media texts and production, and will sharpen awareness to dominant norms and values in our society. Overall, this course provides students an opportunity to directly confront the questions: How do media shape our understandings of intersecting identities such as gender, race, ability and class? How can we critically identify stereotypes and misrepresentation, including our own privilege? How do dynamics of identity operate at the production level(s)? What are the implications of these representations and how are they related to power dynamics in contemporary culture?.

**ASEM 2734 Music and Spirituality (4 Credits)**

At a time when "spiritual" music appears in a wide variety of contexts such as churches, yoga studios, raves, and radio broadcasts, "Music and Spirituality" explores individual and collective perspectives on music and transcendence, and teaches how a deeper understanding of those perspectives can lead to a broader view of meaning in human experience.

**ASEM 2736 Spirituals and the Blues (4 Credits)**

This course examines spirituals and the blues, two song forms from the canon of African American music. A multifaceted approach (both historical and analytical) reveals the ways in which the music is transformative, healing, and liberating, as well as providing a vehicle for agency. The course also studies the music's larger sociopolitical landscape.

**ASEM 2738 Brands, Culture, and Identity (4 Credits)**

Brands have become ubiquitous in every aspect of life in contemporary culture. How has this come to pass and what are the social, political and cultural consequences of living in a culture saturated by brands? This course explores critically the roles and meanings of brands in the making of cultures and identities.

**ASEM 2740 Rhetorics of Belonging (4 Credits)**

This course explores how particular uses of language shape and convey historical and current understandings of American citizenship. Students examine how language creates, reinforces, and challenges the idea of "belonging." What is at stake in accepting or denying identities for certain groups? The course analyzes the role literacy has played in constructions of citizenship, pertinent relationships between culture and language, and the rhetorics of belonging. The course uses both primary and secondary texts to examine the complicated, dynamic, and nuanced history of immigration from multiple perspectives.

**ASEM 2742 Media and Marketplace Feminism (4 Credits)**

This course tracks the historical trajectory of marketplace feminism—also known as commodity feminism, lifestyle feminism, or white feminism—through its dynamic relationship to media culture. In an effort to highlight the complexities surrounding both feminism as political praxis, as well as feminism as a commodity, multiple perspectives are offered for classroom discussion and critique, including readings from feminists, pop culture/literary critics, media studies scholars and feminist media studies scholars.

**ASEM 2743 Bad Words: The Ideologies of Profanity (4 Credits)**

Students explore bad words in all of their variations (e.g., expletives, obscenities, profanities, etc.). The course combines an historical study of bad words with an examination of current usage and issues, looking at bad words through a range of readings from history, neurology, ideology, psychology, and other fields.

**ASEM 2744 The Academy Awards & Academia (4 Credits)**

This course introduces students to the history and politics of the Academy Awards, through weekly film screenings and a variety of scholarly texts from across the disciplines. From war sagas and romantic comedies to horror flicks and musicals, the films covered represent the best of the best, at least according to members of the voting Academy. The course's scholarly lenses will range from statistical analyses of features of Best Picture winners to historical, political, sociological, and cultural interpretations of how the Oscars have reflected shifting societal values.

**ASEM 2747 Complexity in the Social Sciences with a Focus on Economics (4 Credits)**

The course introduces basic approaches for the analysis of complex systems and their applications informing policy decisions, drawing particularly from an economics perspective. It addresses how complex systems approaches can be used to analyze and understand issues in the social sciences, and explains how a complexity view can change perspectives on situations that are often viewed only from a linear understanding. To illustrate characteristics such as emergence and self-organization, different theoretical methods are introduced. Key issues are addressed without extensive mathematical background. Theoretical issues as well as applications in policy are included in the class. The course introduces basic approaches for the analysis of complex systems and their applications informing policy decisions, drawing particularly from an economics perspective. It addresses how complex systems approaches can be used to analyze and understand issues in the social sciences, and explains how a complexity view can change perspectives on situations that are often viewed only from a linear understanding. To illustrate characteristics such as emergence and self-organization, different theoretical methods are introduced. Key issues are addressed without extensive mathematical background. Theoretical issues as well as applications in policy are included in the class. Completion of all Common Curriculum requirements is required prior to registering for this class.

**ASEM 2748 What We Eat Matters: The Political Economy of Food (4 Credits)**

This course examines the historical development of our global food system, its imbalances, and alternative perspectives on how to address them. In the first section, the course examines how food production and food consumption have evolved in the era of globalization, and discusses the defining features of global food markets. The second section examines the economic, social, and environmental challenges associated with the globalization of food. The third and last section discusses alternative perspectives on how to build robust, just, and sustainable food system.

**ASEM 2749 Art, Writing, and Propaganda in Occupied France (4 Credits)**

On June 22, 1940, France having been defeated, the French Maréchal Pétain signed an Armistice with Germany and became head of the "Vichy" régime which would now collaborate with the Nazis. The course takes several perspectives on Occupied France, delving into the Vichy régime's policies, practices, and propaganda; daily life under Occupation; types of collaboration and resistance; anti-Semitism in France at this period and before, the art world under Vichy, and the Liberation (1944-5). Course readings (and "viewings") are varied: including historical accounts, Vichy propaganda posters, poetry by members of the French Resistance, post-war films looking back on Vichy with new perspectives, and much more.

**ASEM 2750 Latin American Sci-fi Film (4 Credits)**

This course focuses on a new generation of Latin American independent filmmakers that offer a unique perspective on science fiction and examines how Latin American sci-fi cinema of the 21st century reflects on the present and reimagines the future. Featured films in this course are from Argentina, Chile, Bolivia, Brazil, Colombia, Costa Rica, Cuba, Guatemala, Mexico and Peru.

**ASEM 2751 Misinformation and Conspiracy Theories in America (4 Credits)**

This course focuses on the history and consequences of misinformation and conspiracy theories in the United States. Students read from multiple disciplines, including history, sociology, psychology, and political science, to understand not only why misinformation and conspiracy theories persist, but also how they affect our health, democracy, and social lives. This course takes a pluralistic approach, with readings from academics as well as political practitioners, journalists, and others to underscore the many ways the misinformation and conspiracies are concerning for the United States.

**ASEM 2752 World Migration in Literature and Film (4 Credits)**

The course examines the nature and history of contemporary world migration. Focusing on significant issues concerning migration and diaspora as well as pertinent contexts and experiences in different regions of the world (such as Africa, Asia, Europe, and the Americas), we explore a transnational process that has changed the world. An important aspect of the course is the study of narratives capable of providing insights into a global phenomenon that has been described as "the history of the world."

**ASEM 2777 Stranger Things – Monsters, Spirits, and the Supernatural from Asia (4 Credits)**

Following the Enlightenment, our modern world is supposed to be disenchanted. Supernatural beings no longer dwell among us, and individuals are governed by the principles of reason and secularism. But we know from our everyday life that modern people remain fascinated by the fantastic, the grotesque, and the monstrous. From many Asian cultures, the encounter between traditional beliefs and Western modern rationality has been historically complicated by even more extrinsic factors: colonial rule, diasporic movements, authoritarian experiences, and the Cold War. More recently, Asian naturalist thinking and philosophies are touted as a critical alternative to the environmental exploitation and the ecological crisis resulted from our capitalist present. On the other hand, religious extremism and ethnonationalism are also implicated in the anything-but-secular political life of many Asian countries. Drawing from history, anthropology, and studies of literature, cinema, visual arts and video games, this class explores how seemingly irrational, supernatural beliefs and pious practices permeate Asia's modern life as creative imaginaries and criticisms about society, as images of monstrosity channel social outcasts and marginal voices.

**ASEM 2789 Deviant Bodies (4 Credits)**

Students will explore the meanings of deviant bodies. They will examine narratives of fatness, illness, disabilities, sexualities, femininities, masculinities, race, and contamination from sociological, historical, anthropological, and feminist perspectives. Discussions and intensive writing about deviant bodies will be prompted by scholarship on embodiment, gender, and social inequality, through examinations of popular culture, social media, film, and students' own social interactions.

**ASEM 2833 Geographies of Conquest: Christian, Jewish, and Islamic societies in Andalusia (4 Credits)**

This ASEM introduces students to the cultural landscapes, former and current, of the different societies that converged in Iberia. The class will focus on medieval Al-Andalus, the Islamic kingdoms that flourished there. During medieval times, Christian, Islamic, and Jewish societies lived side by side in an environment that oscillated between tolerance and open persecution. Science, art, scholarship, and political strategy motivated tolerance while religious fundamentalism and geopolitical considerations motivated persecution. This class will cover the human-environment interactions in the landscapes medieval and modern Andalusia through an immersive field study and travel experience. Over a period of 4 online days plus 9 travel days we will visit the cities and surroundings of Madrid, Cordoba, Toledo, Seville, and Granada in Spain where we will examine and compare cultural geographic, historical, religious, and anthropological issues surrounding the communities that interacted in Al-Andalus/Andalusia (past and present). Through pre-departure lessons and preparations, observations, lectures, discussions, readings, assignments, and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of cultural diversity, tolerance, and global awareness. This class fulfills ASEM requirements.

**ASEM 2860 Critical Disability and Culture (4 Credits)**

This course explores how the concept of disability (physical, developmental, cognitive, emotional, psychosocial and so on) is constructed through a variety of lenses. Topics may include biomedical discourse of disability in everyday life; relationships and the workspace; the discourse of normalcy as it is constructed by persons with disabilities; and meaning-making process of disability in various cultural and contextual spaces. Utilizing academic research, popular culture references, visual media and writing, students deconstruct, critique, and analyze the different discourses of disability through basic character-driven gaming, using standards of Universal Design.

**ASEM 2861 Taboo Tales: Cultural Literacy through Fairy Tales (4 Credits)**

Cultural literacy requires that we grapple not only with social boundaries, but also with what lies beyond them – the taboos that frighten us, and the taboos that intrigue us. In this course, we will explore the topic of taboo through the lens of storytelling, with a particular focus on the unsettling themes represented in folklore. We will approach the study of taboo in a multi-disciplinary manner, using a blend of folklore, history, psychology, film, and textual studies to examine various tales of taboo from diverse cultures, including Native American, Chinese, Indian, European, Russian, and African fairy tales. Please note that this course will cover unsettling and violent topics; be prepared to read about these themes.

**ASEM 2862 Racism, Schooling, & Development (4 Credits)**

This course will focus on ways everyday school practices can perpetuate racial inequity in school and society as well as impacting racially minoritized youth development. Specifically, we will explore how various school practices (e.g., discipline) disproportionately impact Black and Latine youth schooling experiences as well as their social, emotional, and cognitive development. Students will read empirical and popular press articles and engage the literature with in class and out of class written assignments.

**ASEM 2863 Religion and Science Fiction (4 Credits)**

Who are we? Why are we here? Where are we going? What happens when we die? How do we define what it means to be human? What do we do when others look at us as Others? These are some of the questions that human communities have explored through philosophy and theology. Science fiction (SF) and fantasy represent a massive amount of cultural production, creating a space in which we collectively explore many of these same questions. In this course we will examine novels, short stories, film, and television programs in order to analyze the production of popular culture, meaning making, and modern-day mythology, all with an eye towards resonances with these vital questions about what it means to be human.

**ASEM 2864 Ethics of AI (4 Credits)**

Artificial Intelligence (AI) tools and technology, including robotic technology, are already widespread and only becoming more so. As these technologies are developed and integrated into human life, what are the ethical implications? In this interdisciplinary course, we will read work by philosophers, feminist and critical race and ethnic studies scholars, computer scientists, engineers, and military professionals in order to acquire a detailed, nuanced perspective on the ethics of AI. Using these multiple perspectives, we will focus several topics, including: bias in algorithms, privacy and data rights, whether we should be trying to create machines that represent and act on moral values like humans, the social impacts of AI and technology, and AI and Robotics in Warfare.

**ASEM 2865 Water in the West (4 Credits)**

Both increasing population size and the impacts of global warming have placed considerable stress on urban water resources in the arid and semi-arid west. This course provides 1) an historical review of the development of water resources in the western United States, 2) a current overview of both active and theoretical proposals to manage water resources to ensure long-term water supply sustainability, 3) highlight the difficulties in implementing sustainability strategies, focusing on questions of economics, politics and distributional equity. Prerequisites: Econ 1020.

## Air Force Aerospace Studies

University of Denver students may participate in the Air Force Reserve Officer Training Corps (AFROTC) program through an agreement with the University of Colorado at Boulder. Air Force ROTC programs lead to a commission in the U.S. Air Force upon receipt of a bachelor's degree.

### Standard Four-Year Course

This program is offered in three parts: the general military courses for lower-division (freshman and sophomore) students; the professional officer courses for upper-division students; and Leadership Laboratory (attended by all students). Completion of a two-week summer training program is required prior to entry into the professional officer courses.

### ROTC Course Credit

Air Force ROTC students may use their upper division ROTC courses to meet the requirements toward the AFROTC Leadership minor. In some cases, ROTC credit may be applied to program requirements with the approval of the specific program. Students register for AFROTC courses through regular DU registration, though they are taught on the CU-Boulder campus and follow the CU semester calendar.

### Leadership Studies Minor

Air Force ROTC courses are eligible to count towards a Leadership Studies Minor through the Pioneer Leadership Program, please visit the Pioneer Leadership Program (p. 469) for details.

### Additional Information

For further information, visit [www.afrotc.com](http://www.afrotc.com) (<http://bulletin.du.edu>[HTTP://www.afrotc.com](http://www.afrotc.com)) or the AFROTC Detachment 105 website at <http://afrotc.colorado.edu>.

**RTC2 1010 Heritage and Values I (0-1.5 Credits)**

This course provides an introduction to the Air Force, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 1020 Heritage and Values II (0-1.5 Credits)**

A continuation of RTC2 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 1234 Leadership Laboratory (0 Credits)**

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab). These courses are taken at CU Boulder. Co-requisites: One of RTC2 1010, RTC2 1020, RTC2 3010, RTC2 3030.

**RTC2 2010 Team and Leadership Fundamentals 1 (0-1.5 Credits)**

This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 2020 Team and Leadership Fundamentals 2 (0-1.5 Credits)**

A continuation of RTC2 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3010 Leading People and Effective Communication 1 (0-4.5 Credits)**

This course is designed to build on the leadership fundamentals. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3020 Leading People and Effective Communication 2 (0-4.5 Credits)**

Continuation of RTC2 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3030 National Security, Leadership Responsibilities/Commissioning Preparation 1 (0-4.5 Credits)**

This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Classes meet on CU-Boulder campus on the semester calendar.

**RTC2 3031 National Security, Leadership Responsibilities/Commissioning Preparation 2 (0-4.5 Credits)**

This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. Classes meet on CU-Boulder campus on the semester calendar.

## Anthropology

Office: Sturm Hall, Room 146

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2406

Email: [anthropology@du.edu](mailto:anthropology@du.edu)

Web Site: <http://www.du.edu/ahss/schools/anthropology/>

Anthropology is the study of the origin, history and nature of people and cultures. It examines the relationships among biology, culture and the natural and social environments in which people live. Anthropology teaches about humanity in all its complexity from its earliest beginnings to the present, and from historical, comparative, cross-cultural and holistic perspectives. The field addresses contemporary issues and problems, such as global public health, urban development and gentrification, human rights, social injustice and inequality, and the stewardship of environmental and cultural resources.

The faculty members of the Department of Anthropology are experts in analyzing human differences in the context of the material (political and economic) conditions of life. They are concerned with the interaction of gender, race, ethnicity, class and other variables in human affairs, and with the consequences of these relationships for social change and development. Drawing on the resources of the Museum of Anthropology, they are concerned with how tangible and intangible culture expresses and sustains relationships among people, ideas, things, and natural and non-human worlds.

The department has an Archaeology Lab, Ethnography Lab, Paleo Diet Lab, and the Museum of Anthropology housing collections of archaeological and ethnographic materials. The department also has computer-catalogued collections, working relationships with Denver-area museums and archaeological field opportunities. Students interested in careers in archaeology, cultural anthropology or museum anthropology can find courses designed to meet their needs.

The department provides the Thomas A. Bogard Scholarship for a senior majoring in anthropology.

## Anthropology

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

44 credits, including the following:

Code	Title	Credits
<b>Anthropology Foundations</b>		
ANTH 2000	Genealogies of Anthropology: Foundations and Futures	4
ANTH 2010	Cultural Anthropology	4
ANTH 2105	Human Nature	4
ANTH 2310	Fundamentals of Archaeology	4
ANTH 2600	Museums and Public Culture	4
ANTH 3800	Capstone Seminar Anthropology	4
Select 12 credits in 3000-level courses		12
Select eight elective credits (2000/3000)		8
<b>Total Credits</b>		<b>44</b>

## Secondary Major

44 credits. Same requirements as for BA degree.

## Minor Requirements

20 credits of anthropology.

## Requirements for Distinction in the Major in Anthropology

- Students who perform exceptionally well in their anthropology courses—achieving a GPA of at least 3.75 within anthropology, and 3.30 in their overall college coursework overall—will graduate with Distinction in Anthropology.
- Students who are part of the DU Honors Program need to give a presentation of their Anthropology Capstone Project in order to graduate with Honors in Anthropology. This presentation should be in addition to the Department of Anthropology Capstone Project Research Fair. Some examples are: poster presentation at a conference, oral presentation at a conference, or guest speaker in a class.

### BA in Anthropology

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
Language sequence or SI Natural sequence	4	Language sequence or SI Natural sequence	4	Language sequence or SI Natural sequence	4
ANTH 1010 (or another SI Society course)	4	AI Natural	4	AI Society or SI Society	4
Any Common Curriculum class, OR Major/Minor Elective, OR Elective	4	Minor or Elective	4	Minor or Elective	4
	16		16		16

Total Credits: 48

Second Year					
Fall	Credits	Winter	Credits	Spring	Credits
ANTH 2000 (or Minor or Elective)	4	ANTH 2310 (or Minor or Elective)	4	ANTH 2010	4
Language sequence or SI Natural sequence	4	Language sequence or SI Natural sequence	4	Language sequence or SI Natural sequence	4
Minor or Elective	4	AI Society or SI Society	4	Minor or Elective	4
Minor or Elective	4	Minor or Elective	4	Minor or Elective	4
INTZ 2501 <sup>1</sup>	2				
	18		16		16

Total Credits: 50

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

### ANTH 1006 Paranormal Archaeology (4 Credits)

This course explores the virtues and limitations of the scientific method for understanding human society and culture. To accomplish this goal it uses selected mysteries and puzzles from the human past that have intrigued, over many years, professional scientists and the general public alike. The course considers a wide variety of topics having anthropological relevance—Bigfoot, the Big Stone Heads of Easter Island, the Great Pyramids of Egypt, the Great Earthen Burial Mounds of North America, and other phenomena—in an effort to sort out hard facts, pure fantasies, and genuine mysteries. This course examines where the more outrageous explanations of mysterious phenomena come from, and investigates why such explanations are of continuing popularity in modern society. This course counts toward the Scientific Inquiry: Society and Culture requirement.

### ANTH 1010 Anthropology: Humankind in Context (4 Credits)

This course is a basic one in Anthropology that covers all four major subfields of the discipline including Physical Anthropology (Biological), Archaeology, Linguistics and Cultural Anthropology. It focuses on many aspects of anthropology that have applicability today in understanding our species' place in the world, the development of cultural and biological diversity over time, the growth of complex societies and analyses of contemporary cultures. This class allows us to view ourselves inclusively, taking a broad look at many aspects of our shared humanity on a world-wide basis. This is accomplished by not only studying modern cultures, but also by looking at the history of our species over millions of years. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 1910 Ancient Worlds (4 Credits)**

This particular course uses the field of archaeology to illustrate the perspectives, methods and results of humanistic inquiry. It investigates human belief, creativity and spirituality in what we'll call deep history: the 50,000 years or so between the appearance of modern Homo sapiens and the rise of the first great civilizations of the Old and New Worlds. These aspects of life are examined through the study of human material culture, including portable objects, representational art, architecture, monuments and culturally-modified landscapes. A key underlying concept of the course is that material culture forms a unique narrative or "text" about the past history of humankind. This text is unique because everyone who has ever lived has helped to write it. Students learn how to interpret this text, recognize its multiple authors, and distill its larger social and cultural meaning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 1988 Study Abroad Resident Credit (0-18 Credits)****ANTH 2000 Genealogies of Anthropology: Foundations and Futures (4 Credits)**

Explores the development of anthropology as a field of study, including important thinkers, ideas, and movements in their historical and social contexts as well as their relevance to contemporary issues.

**ANTH 2004 Anthropology of Jews & Judaism (4 Credits)**

This course is cross-listed with JUST 2004 and RLGS 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

**ANTH 2010 Cultural Anthropology (4 Credits)**

This course is an introduction to cultural anthropology. As one of anthropology's main sub-fields, cultural anthropology provides conceptual and analytical tools for a comprehensive understanding of culture and its manifestations. It is concerned with the ways in which individual experience is inserted in social and historical contexts, providing meanings to everyday life. We will explore ideas and behaviors related to culture in different societies and social groups. Topics include culture, meaning, development, globalization, experience, kinship, identity, social hierarchy, and conflict. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of culture in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts and group discussions to apply the concepts and examine them critically. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with JUST 2011 and RLGS 2011.

**ANTH 2020 Artifacts, Texts, Meaning (4 Credits)**

How is it that anthropologists can look at an object in a museum collection and state with confidence what it once was a part of, how it was used, where it came from, how old it is, and even, perhaps, what it meant to the people who made it? What is an anthropological approach to documentation, an important accompaniment to the objects held in museums? In this course, participants learn about the ways anthropologists have approached researching material items and texts (both written and oral), ranging from time-tested techniques to materials science approaches. Students in the class do original research involving museum objects. The class involves hands-on work with artifacts, lecture, discussion, and laboratory analysis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2040 Historical Archaeology (4 Credits)**

Because it is the archaeology of periods for which there is also written history, historical archaeology is a dynamic and interdisciplinary field. It also has a distinct set of concerns and methods that builds upon, but does not replicate, those of prehistoric archaeology. This course is designed to engage students in the practice of historical archaeology through readings, discussions and the hands-on analysis of archaeological materials. The first class of each week is a discussion of readings in historical archaeology. The readings introduce students to theoretical and methodological issues in the discipline, as well as important case studies. Many of the readings have a North American focus but also address international practice. The second class of each week has a hands-on focus. Backed by readings on historic materials analysis, we discuss and practice the types of research historical archaeologists perform on actual materials, focusing on different material types each week. Students in the course each process and analyze a set of materials excavated from a historic site. Cross-listed with ANTH 4040. Prerequisite: ANTH 2310 or permission of instructor.

**ANTH 2070 American Jewish Experience (4 Credits)**

This course is cross-listed with JUST 2070 and RLGS 2070. In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry's religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life.

**ANTH 2105 Human Nature (4 Credits)****ANTH 2125 Primates (4 Credits)**

Non-human primates are used within numerous disciplines as models for understanding the evolution of our own behavior. This course examines non-human primates within the framework of anthropology and explores the ways that the study of other primates contributes to our understanding of human behavior and evolution, and serves to connect us to the living world. The course will examine three aspects of primate life (the three F's: feeding, fighting, and family) first from the non-human primate perspective and then through the lens of human behavior and social organization. To better understand the methods of primatology, students will develop their own research project to take place at the Denver Zoo. As an SI: Society course students will develop an understanding of the defining principles central to inquiry within the discipline of anthropology as well as become proficient in the use and application of anthropological, and specifically primatological, research methods. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2200 Contemporary Issues of Native North America (4 Credits)**

This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. This course explores contemporary issues within Native American communities in order for students to gain a better understanding of legal and social issues between the Federal government, reservations, and urban Indian populations. We will analyze issues facing contemporary Native American nations including, but not limited to Indian gaming and casinos, federal recognition and issues of sovereignty, blood quantum and biological race, religious freedom and sacred sites, mascots, repatriation of human remains and sacred artifacts, and stereotypical views of Native Americans. Additionally, we will also discuss efforts to reclaim traditions such as language, art, and land. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2310 Fundamentals of Archaeology (4 Credits)**

This course focuses on the practice of archaeology—why and how archaeologists recover and analyze their data. By the end of this course, students have an understanding not only of the nature of the archaeological record, but also how models of the past are built and interact with general public knowledge.

**ANTH 2323 Global Health (4 Credits)**

This course is an introduction to global health. As one of the world's faster growing fields, global health presents itself with complex opportunities and challenges, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, health care and their manifestations around the world. This course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to respond to global health challenges. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, visual arts, and performing arts. We will explore ideas and behaviors related to health and health care in different societies and social groups. Topics include the evolution of primary health care and alternative strategies in global health, maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies and funding sources, and human resources development. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of global health in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2420 Science, Technology and Human Values (4 Credits)**

This course is designed to examine the nature of science and technology, and their interactions with each other and with society, with a specific focus on how they inform human values. We will examine the society-human-technology relationship as a continuum rather than as distinct, ontological entities in relationship to one another. In examining the grey areas between society-human-technology, it is important to look not only at the environmental and social-justice issues surrounding technology, but also how technologies shape our very humanity, our meaning-making practices, our value-systems, and our imaginations. In other words, how are technologies shaping human becoming? This course will address these types of questions from cultural, ethical, and philosophical perspectives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ANTH 2421 Migration Politics (4 Credits)**

This seminar will focus on the political economy of international migration. Since the 1970s, many countries have liberalized trade and capital flows, however migration policies trended the opposite way. This seminar will explore how international migration have affected the political economy of both migrant-receiving and migrant-sending countries. This course will have three parts: causes of migration, the political/policy reception that immigrants face in receiving countries, and consequent effects of migration on sending countries. Doing so will allow us to examine the political economy of international migration as a process and cover specific subfields of migration research.

**ANTH 2424 The Social Determination of Health (4 Credits)**

This course is an introduction to sociocultural epidemiology. As the scientific basis of public health, epidemiology is the discipline that aims to describe the distribution and causes of health problems in a society, which require interdisciplinary conceptual and analytical tools for a comprehensive understanding of health, disease and health care and their manifestations around the world. This course presents an overview of epidemiology's history and methods, to then concentrate on the social and cultural aspects of health. The course offers an in-depth exploration of the notion of disease causation, with historical and current examples. Disciplines included in the course include history, philosophy, bioethics, public health, anthropology, and sociology. We will explore ideas and behaviors related to disease causation in different societies and social groups. Topics include the history of epidemiology and theories of disease causation, research methods in epidemiology, social determinants of health, and the notions of disease causation and determination. Course material combines introductory readings, academic articles and films with the analysis of journalistic pieces addressing currently important issues. It also combines the study of cases in the United States with that of other countries. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2525 Culture, Health, and Society (4 Credits)**

Culture, Health, and Society is an interdisciplinary course that offers students in-depth exposure to the connections between health understood broadly, and the humanities and social sciences. This course aims to expand students' understandings of health, disease, health inequalities, wellbeing, health care, and/or health systems, by offering students the opportunity to explore a variety of perspectives in key disciplines such as economics, anthropology, history, psychology, communication, philosophy and sociology. We will explore how different conceptual and methodological approaches from the humanities and social sciences shed light on different important aspects of health-related issues, ranging from the individual level to the societal and global levels. Class meetings will consist of lectures to introduce topics and concepts, and group discussions to apply the concepts and examine them critically. Students will also work on individual and group projects. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 2600 Museums and Public Culture (4 Credits)**

A critical introduction to how cultures and peoples are presented in museums, festivals, tourism venues and the popular media. The course introduces students to the historical and contemporary role of museums and anthropology in public culture and the importance of both in civic life.

**ANTH 2988 Study Abroad Resident Credit (0-18 Credits)****ANTH 3001 Race, Sex and Evolution (4 Credits)**

The course examines the paleoanthropology of race and sex. Our focus is on the nature and evolution of human racial differences, sexual anatomy, reproductive strategies, and gender roles. We will consider the history of thinking about race and sex in anthropology and related disciplines, and the uses to which particular conceptions have been put in our culture. We will discuss and evaluate alternative models for explaining the evolution of alleged biological and behavioral differences between racial groups and between men and women. Evaluation will proceed in light of evolutionary theory, comparative primate anatomy and behavior, the human fossil record, and general anthropological knowledge. Our aim is to examine myth and reality in popular and scientific understandings of these aspects of the human condition and, in the end, the social and political (i.e., policy) consequences of this knowledge. Enforced Prerequisites and Restrictions: ANTH 2105.

**ANTH 3020 Native Religions (4 Credits)**

A cross-cultural survey of concepts used to understand and talk about "religion," "the supernatural," and associated behavior among Native peoples of Turtle Island. Topics include healing and techniques of controlling and channeling supernatural power; sacred places and their significance; myths and symbols in their cultural contexts; initiation rites; conceptualizations of male and female deities; and responses of indigenous people to attempted missionization.

**ANTH 3030 Digital Anthropology (4 Credits)**

Digital Anthropology introduces students to computer technology used in anthropological research. Students study and then produce a number of digital products useful in the analysis and interpretation of museum collections, for archaeological mapping and research, and for the dissemination of anthropological knowledge online. This process covers the use of Geographic Information Systems (GIS) for spatial analysis, three-dimensional imaging programs ranging in scale from broad landscape mapping to detailed digital artifact analysis. In addition, the use of geophysical methods for imaging what is below the surface allows students to produce images of what lies below the ground in archaeological contexts.

**ANTH 3040 Anthropologies of Place (4 Credits)**

This class is an exploration of the relationship between people and places from an anthropological viewpoint. We concern ourselves with a variety of ideas about place, emphasizing not just how places are used, but how they infuse themselves into the lives, histories and ethics of those who interact with them. The course readings include book-length anthropological case studies interspersed with interdisciplinary readings about place and landscape. The course includes seminar-style discussions of readings, workshops and observations in the field. On several occasions, we take our class on the road, working together to think about how people and place interact. By the end of the class, each student creates his or her own anthropology of a place. Must be junior standing or above.

**ANTH 3060 Cultural Narratives (4 Credits)**

Human beings are natural storytellers. Whether reciting oral traditions or recounting personal experience, people everywhere use narratives as a way to express and to understand themselves. This course approaches cultural narratives from two angles. First, it explores the ways that anthropologists, usually trained in the social sciences, make use of and study narratives, whether through ethnographic observation, conducting an interview, gathering folklore or archaeological interpretation. Second, the class investigates narratives that, although produced by non-anthropologists, engage with anthropological issues such as kinship, gender, work, tradition and identity. The narratives range broadly from fiction, to poetry, to film. These two approaches are framed by theoretically informed readings about narrativity, both from the social sciences and the humanities. The class involves intensive reading and writing, as it makes use of both discussion and workshop formats. Each student in the course completes a research and writing project culminating in his or her own cultural narrative. Must be junior standing or above.

**ANTH 3070 Folklore and Cultural Heritage (4 Credits)**

Folklore and Cultural Heritage is the study of the expressive behaviors and practices that constitute the ordinary, everyday life of communities. Folklore includes the intangible cultural heritages of all peoples, for example, the artistic expression reflected in stories and storytelling, music, dance, legends, oral history, proverbs, jokes, popular beliefs, customs, dialects and ways of speaking. Everyone has folklore and participates in the "folklore process." Prerequisite: introductory social science course. Cross-listed with ANTH 4070.

**ANTH 3080 Memory and Memorialization (4 Credits)**

The course focuses on how social groups represent, experience and commemorate the remembered past; it explores issues of construction of memory, particularly how representations of the past- and its materialization through monuments, ruins, and landscapes- are connected with issues of institutionalized perceptions of national, ethnic, racial and religious identity. Furthermore, it discusses concepts such as "authenticity," "tradition," and "modernity" in the interpretation of cultural heritage and how the interpretation of the past and of culture depend on context (political and historical), experience and point of view. The course aims to develop an interdisciplinary approach to memory and to methodologies and empirical research.

**ANTH 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and RLGS 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**ANTH 3110 The Cultured Ape (4 Credits)**

This course is an examination of human evolutionary psychology. Evolutionary Psychology deals with how contemporary human behavior is constrained by our heritage as evolved primates. It questions the standard social science and mainstream anthropological model of humans as "blank slates" who are primarily shaped by their social and cultural environments. In other words, Evolutionary Psychology views humans as "cultured apes."

**ANTH 3130 The Archaeology of Gender (4 Credits)**

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

**ANTH 3131 Visual Ethnography (4 Credits)**

What happens when we represent the results of social scientific research in images and sounds? Do we have to change our theories about humans and their social worlds? Do we have to change the methods that we use to do social science? Visual Ethnography is designed to explore these questions. Attention will be given to the use of photography, film, and video in the representation of individuals and groups. Students will be exposed to the historical, theoretical and practical perspectives of visual ethnography and its current relationship to the production of knowledge. We will read about ethnography, as a social scientific method and a representational genre, and about film.

**ANTH 3132 Digital Anthropology (4 Credits)**

This course introduces students to the theories and methods necessary for doing research in digital anthropology. Digital anthropology is the study of the impact of digital technology on social relationships and human culture. Digital technology is treated as a cultural construct, the characteristics and impacts of which are analyzed through the interplay between technology and society in everyday life. The focus will be on ethnographic work, but as this is a rapidly growing interdisciplinary field of study, we will explore a broad range of scholarship. We will employ five different strategies to address this large and varied body of research: (1) literature reviews; (2) current event assignments; (3) reading responses; (4) autoethnographic journal entries; and (5) a digital deliverable. Taken as a whole, these strategies not only structure the course, but provide tools for selecting and responding to scholarly work, writing reviews, and designing an ethnographic research project.

**ANTH 3135 Feasting, Fasting and Food: The Anthropology of Food (4 Credits)**

Feasting, Fasting and Food focuses on foodways and food culture. Food and its acquisition and preparation are tied to the historical, social and cultural lives of all peoples. By drawing on historical sources, ethnography and a number of anthropological perspectives, we look at foodways as symbols of identity, culinary tourism, food work as trade or profession, the study of food as art and theater, and food and memory. Prerequisite: ANTH 2010.

**ANTH 3155 Native American Resistance in the Digital Age (4 Credits)**

Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

**ANTH 3170 Applied Heritage Management (4 Credits)**

Considers the role of archaeology in preservation and the management of cultural resources in terms of legislation, ethics and practical application, with emphasis of the utility, necessity and reality of doing archaeology today in the public sector. Site report writing, governmental regulations and the business side of archaeology are stressed. Archaeological information from site reports and artifact analysis are compiled and presented in a digital format. Prerequisite: ANTH 2310.

**ANTH 3200 Human Origins and Evolution (4 Credits)**

Examines the fossil record for human evolution from 6 million years ago to the origin of modern Homo sapiens, including current theories, evidence and controversies. Considers the historical and sociological contexts of human evolutionary studies, popular myths and misconceptions, and alternative scenarios for the future evolution of the human species.

**ANTH 3225 Human Rights in Latin America (4 Credits)**

This course aims to provide students with an overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region's democracies. It also aims to place human rights concerns in a broader sociopolitical context. Many of today's human rights issues are rooted in the past, but others respond to new and emerging challenges. In this class, we will explore the roots and contemporary realities of human rights movements in Latin America. The examination of these topics should allow us to pose broader questions about the meaning of human rights in a globalized world, the efficacy of international instruments for rights enforcement, and the complex challenges that linger in the aftermath of authoritarianism and state-sponsored terror.

**ANTH 3232 Critical Latinidades: Current perspectives and debates on Latinx experience(s) in the U.S (4 Credits)**

This course will explore the history of the various Latinxs communities in the United States, as well as examine current debates on Latinidad. The materials for this class include film, podcasts, news articles, poetry, and academic readings. We will begin by examining the historical mass migration/mass displacement of peoples from various Latin American countries, and then dive into current debates about the pan-ethnic identity that is Latinidad. Among the current debates is who is included/excluded in the mainstream representations of Latinidad as well as highlighting voices that are denouncing the limitations of this concept/identity. The materials, class lectures, and discussions will help us to begin to understand the complexities of Latinidad in the U.S.

**ANTH 3255 Ancient North America (4 Credits)**

This course examines the history of American Indian cultures from their earliest archaeological traces on this continent up to and including contact with European explorers and colonists.

**ANTH 3290 Art and Anthropology (4 Credits)**

Study of the concept of art and its multiple roles in society from a cross-cultural and historical perspective. Commodification of culture through tourism and the global art market; arts of resistance and survival; and cultural expression and community development.

**ANTH 3310 Indigenous Environment (4 Credits)**

The purpose of this course is to introduce students to particular environmental issues that affect indigenous peoples, including subsistence and economic issues; sacred lands; cultural property dilemmas; and the impact that use of traditional cultural properties by others—including nation-state governments, corporations and tourists—have on indigenous peoples' cultural and social integrity. Particular focus is on one of these issues—travel and particularly "ecotravel" and "ecotourism."

**ANTH 3320 Medical Anthropology (4 Credits)**

This course is an introduction to medical anthropology. As a professional and academic field, medical anthropology provides conceptual and analytical tools for a comprehensive understanding of health, illness and healing. It is concerned with the ways in which individual experience is inserted in social and historical contexts and it explores ideas and behaviors related to health in different societies and social groups, as well as the ways in which different groups organize their resources to face health-related needs in the context of their social and economic realities.

**ANTH 3330 Human Rights of Indg Peoples (4 Credits)**

This course introduces students to the concept and definition of "indigenous peoples." It covers the history of resistance, revitalization, and assertion of sovereignty by Indigenous peoples, and why the United Nations felt it necessary to adopt a "Declaration on the Rights of Indigenous Peoples" in 2007. It covers how indigenous identities and indigenous rights issues do or do not "fit" with internationally accepted definitions of human rights. The course will concentrate on the intersection of indigenous autonomy with globalization, neo-liberal ideologies, and nation-state policies. Case studies focus on Iroquois, Crees, Mayans, Mapuche, Zapatistas, Maoris, and Sami.

**ANTH 3350 Latin American Archaeology (4 Credits)**

Covers the prehistory of the Western Hemisphere south of the Mexico-U.S. border, from initial colonization of the hemisphere by Paleo-Indian people, to the origins of agriculture and the rise of civilization. Olmec, Mayan, Aztec, Chavin, Moche and Inca cultures are covered in detail.

**ANTH 3370 Social Inequalities and Social Justice in Latin America (4 Credits)**

This course uses an intersectional approach to the study of gender, class and ethnicity in Latin America. Intersectionality aims at understanding the interlocking relation between these and other variables, how they are rooted in historical and social structures, and are reproduced and resisted through individual and collective experience. The course aims at understanding history, culture and peoples with a special emphasis on examining their heterogeneity, and how such heterogeneity is also related to social inequality. It examines contemporary issues such as women and LGBTQ+ rights, Indigenous movements, human rights, migrations, and economics from the perspective of intersectionality.

**ANTH 3390 Geoarchaeology (4 Credits)**

Use of geological methods to interpret archaeological sites, ancient landscape reconstruction, study of environmental change and habitation.

**ANTH 3470 Applied Anthropology (4 Credits)**

The practical application of cross-cultural knowledge and awareness to the solution of social and cultural problems. Ethnographic methodologies, a review of the history of applied anthropology and a consideration of the ideological and ethical components of applied anthropology are covered.

**ANTH 3500 City and Society (4 Credits)**

Examines the recent past and future of the city as a human built environment that reflects and reproduces social, political, economic, and cultural forces and ideals. Begins with the origin of 'modern' cities in the 19th century and ends with contemporary urban landscapes. Analysis is focused on both the technologies (physical qualities) and aesthetics of urban form. Emphasis is on re-imagining urban design to meet the social equity, cultural diversity, and environmental sustainability challenges of 21st century city life.

**ANTH 3510 The Ancient City (4 Credits)**

The archaeological study of ancient cities around the world is a booming and controversial area of research. This course investigates what we know about the nature of the earliest cities in the great original cradles of civilization: Mesopotamia, Asia, Africa, and the Americas. Our focus is on how the first cities were planned, built, and experienced by citizens.

**ANTH 3540 The Nature of Language (4 Credits)**

Language as social, psychological, cultural phenomenon; relationship between cultures, semantics; language as medium of cultural unification; relationship between dialects, social structure.

**ANTH 3620 Ethnoarchaeology (4 Credits)**

Ethnography has often been used as an illustrative device to animate archaeological remains, or to develop models of human behavior, regardless of the geographic and chronological distance between the ethnographic and the archaeological data. This course addresses different perspectives and theories concerning the use of ethnoarchaeology to complement archaeological information. It aims to define the role of ethnoarchaeology in the study of human past; to establish an agenda of issues to which their use is relevant; and to provide a critical overview of major approaches to the use of ethnographic analogies and historical information in archaeology.

**ANTH 3630 Archaeological Method and Theory (4 Credits)**

This class presents methods for gathering archaeological data in the laboratory and then using a variety of theoretical approaches in its interpretation. Students gather archaeological data using museum collections from a variety of sites. Those artifacts include stone tools and ceramics as well as other environmental data and architectural information in a variety of environmental and landscape contexts. For each site studied students are presented with a body of theoretical literature from which to interpret these data. A variety of interpretative methods can potentially be chosen for each site, and in most cases there is no right answer, only answers that can be supported by the data collected and interpreted using the theoretical constructs read. All students are required to write up complete site reports for each project including all raw data collected in the analysis and theoretical approaches used in interpretation.

**ANTH 3640 Race and Human Evolution (4 Credits)**

Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.

**ANTH 3655 Indigenous Feminisms (4 Credits)**

This course examines a wide array of Indigenous feminisms. Rather than think of Indigenous feminisms as one static thing, we will inspect the field from multiple viewpoints and perspectives. We will draw from various thematic and transnational contexts across the Americas and Native Pacific in order to analyze the scope and significance of such knowledges, particularly as they relate to broader theories and practices of decolonization. We will begin by examining the foundational inquiries and methods of Indigenous feminist scholarship. Is gender a useful category of analysis? How have Indigenous women thought of gender? How have Indigenous women thought about, and responded to, feminism? With an emphasis on Indigenous scholars and feminists, we will cover a range of topics including (but not limited to) how Indigenous feminism fits into the feminist project, the connection between colonization and violence against Native women, the reclamation of women's initiations, gender and sovereignty, queer indigeneity, Indigenous feminist allies, and decolonial love. We will draw from readings across feminist movements, and as feminist Kanaka Maoli Professor Lani Teves says, we will attempt to "make links between Indigenous feminisms and Latinx feminisms, Black feminisms, and transnational feminisms. Rather than shy away from the tensions that emerge between multiple feminisms, instead we will attempt to cultivate nodes of alliance and solidarity to diversify our feminist tactics."

**ANTH 3660 Anthropological Theory and Context (4 Credits)**

History and development of particular schools of thought, paradigms, methods and methodologies that characterize contemporary anthropology. Intellectual, artistic developments, world-wide sociopolitical and economic processes that shaped much of anthropological thinking of the times. Research methods in reconstruction of human history and qualitative ethnographical research.

**ANTH 3661 Museums and their Visitors (4 Credits)**

This course is designed to be a comprehensive introduction to museums and their approaches to serving visitors, primarily through exhibitions and education. It examines current research and museum practice as it relates to the museum as an environment for meaningful visitor experiences and learning. The course is organized around the following core issues: (1) What do visitor experiences look like in a museum context? (2) How do museums design for different audience types? (3) What do we learn from assessing visitors' experiences? (4) How do objects, ideas and spaces affect visitor learning and experiences? Cross listed with ARTH 3661.

**ANTH 3680 Quantitative Methods-Anthropology (4 Credits)**

The use of statistics in all branches of anthropology; data screening; parametric and nonparametric statistics. Prerequisite: any course in basic statistics.

**ANTH 3701 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit.

**ANTH 3702 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3703 Topics in Anthropology (4 Credits)**

Specialized topics in anthropology. Check with the Department of Anthropology or the Schedule of Classes for further information; open to students who are non-majors; may be repeated for credit. Prerequisite: ANTH 1010.

**ANTH 3742 Museum Exhibit Development (4 Credits)**

Introduces general principles of planning, development, production and evaluation of museum exhibits. Explores design elements and methods of evaluation. Students have the opportunity to do exhibit mockups and exhibit evaluation.

**ANTH 3743 Managing Collections (4 Credits)**

Principles and methods regarding acquisition, documentation, conservation and accessibility of collections. Law, registration methods, computerization, policy, development, ethics and preventive conservation are also discussed.

**ANTH 3750 Ethnographic Methods (4 Credits)**

In this course, students study the art and science of ethnographic research methods, conduct quarter-long field research projects, and write practice ethnographies. The course requires students to apply the American Anthropological Association's Code of Ethics in their research and to write Institutional Review Board applications for their projects. Course readings include texts on ethnographic methods as well as controversial and exemplary ethnographic publications for student dissection and debate.

**ANTH 3780 Anthropology of Gardening (4 Credits)****ANTH 3790 Field Methods in Archaeology (4 Credits)**

The purpose of this class is to introduce students to archaeological field methods through a combination of readings, lecture, discussion, and hands-on experience. Training begins with issues of archaeological ethics, legal mandates, and research designs. Students then transition to learning skills and methods both in the classroom and in the field. Methods you will learn will include the basics of site survey and mapping, testing, excavation, artifact recovery and field processing, and data recording in the field. Cross-listed with ANTH 1790. Prerequisite: ANTH 2310.

**ANTH 3791 Critical Perspectives in Museum Studies (4 Credits)**

This course critically explores museums and heritage complexes as sites of cultural production and consumption at different historical moments and in diverse cultural and national settings. Special attention is given to contemporary issues, debates, and approaches in the context of museum anthropology and heritage studies. The term museum is used to include a wide range of heritage projects that do not rely only on the traditional institution established to collect, conserve and exhibit material culture, but includes intangible heritage, historic built environment and even natural environment that was used and marked by human action.

**ANTH 3800 Capstone Seminar Anthropology (4 Credits)**

This seminar brings anthropology to bear on a topic of special significance. It assesses grasp of the key concepts, theories and insights of anthropology, and critically reflects on the nature and history of the discipline. Prerequisite: Senior standing.

**ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)**

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures. These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

**ANTH 3875 Research Methods in Anthropology (4 Credits)**

This course offers an in-depth introduction to anthropological research methods with the aim of providing students with the tools necessary to design a coherent research proposal. Starting with the notion that anthropological research is a scientific endeavor, the course offers knowledge and skills that allow for a systematic application of qualitative and quantitative methods to respond to research questions. Students will learn when and how to use one method, as well as the implications of doing it. Students will also learn how to critically read research reports that use qualitative, quantitative, or mixed methods. The course is organized in two portions. The qualitative portion will focus on a detailed exploration of the continuum that goes from posing a research question, choosing a methodology, carrying it on, and reporting the results. The quantitative portion is concentrated on collecting numerical data, methods of which are often based on a qualitative understanding of people. Quantitative analysis will present tools used to take readings, acquire data, observations, and other information necessary to test hypotheses about people, cultures and how we can understand them from their material remains. The purpose of the quantitative part of the class is to determine what is statistically significant and what ideas about people are supportable using the scientific method. This course is required for all anthropology graduate students, and suggested for advanced undergraduates who are working on senior theses, and have an interest in anthropological research. The course is also open to non-anthropology students interested in anthropological research.

**ANTH 3880 Culture, Ecology, Adaptation (4 Credits)**

This course is organized around these concepts: "ecology," "adaptation," "landscape," "technology," "artifact," and "architecture." The course focuses on defining and examining adaptation and the role of culture and technology in achieving adaptations, or in not achieving them. This focus will be especially pursued with respect to the concept of landscape—that is, culturally defined physical space—and the cultural artifacts that interpret and modify it in the course of human adaptation to its ecological components.

**ANTH 3890 Context of Material Culture (4 Credits)**

Examines how material culture both reflects and actively structures political, economic and cultural life. Considers the relationship between people and their material culture (portable objects, non-portable objects, buildings, socially-created landscapes) in Western, non-Western, ancient, and contemporary cultural contexts. Reading materials draw from the fields of ethnology, archaeology, folklore, geography, history, art and architecture.

**ANTH 3980 Internship (1-8 Credits)****ANTH 3981 Museum Internship (1-6 Credits)****ANTH 3988 Study Abroad Resident Credit (0-18 Credits)****ANTH 3990 Summer Field School-Archaeology (4-6 Credits)**

Archaeological excavation, survey and recordings; analysis and conservation of artifacts in the field.

**ANTH 3991 Independent Study (1-15 Credits)****ANTH 3995 Independent Research (1-10 Credits)**

## Army Reserve Officers' Training Corps

University of Denver students may participate in the Army Reserve Officers' Training Corps (AROTC) program through an agreement with the University of Colorado Boulder. Army ROTC programs lead to a commission in the Active Army, National Guard or Army Reserve. Classes may be taken at the University of Colorado Boulder, Colorado School of Mines in Golden or the Metropolitan State University of Denver on the Auraria campus in downtown Denver.

### Four-Year Program

The standard four-year program consists of two phases. The basic course, normally completed during the freshman and sophomore years, includes topics in military science, officer career development, leadership theory and management. The advanced course coincides with the junior and senior years. Subject areas include leadership techniques, methods of instruction, tactics and unit operations, military law, history, national strategy and Army policies. Completion of a four-week Advanced Camp in the summer is required prior to commissioning, with attendance at this camp normally between the junior and senior years. Students should check with the military science department at the University of Colorado Boulder about the required courses.

### Two-Year Program

The abbreviated two-year program consists of the same courses offered in the advanced course; however, both undergraduate and graduate students may become qualified for this program through successful completion of a four-week summer basic camp. Students should contact a professor of military science at the University of Colorado Boulder for specific requirements and options available based on each student's status at the time of program entry. Students who are veterans of military service or who have participated in Junior ROTC or similar organizations may have a portion or all the basic requirements waived by a professor of military science at the University of Colorado Boulder.

### Scholarships

Students enrolled full time may compete for three-year and two-year scholarships. The scholarship also pays a book allowance of \$1,200 per year and a monthly tax-free stipend ranging from \$300 to \$500.

### Guaranteed Reserve Forces Duty (GRFD) and Dedicated Army National Guard (ARNG) Scholarships

The GRFD and Dedicated ARNG scholarships are two and three-year scholarships available for members of the Army Reserve (AR) and Army National Guard (ARNG) who desire to commission in the Reserve Forces. Applicants must join or be members of the AR or ARNG and participate in the Simultaneous Membership Program (SMP) as a cadet. Scholarships are awarded on a competitive basis. Students apply for this scholarship during the spring semester of their freshman or sophomore year. Contact the Army ROTC enrollment officer at 303-492-3549 for more information.

### ROTC Course Credit

Students register for AROTC classes listed as RTC1 courses through regular DU registration, though they are taught on other campuses in the Denver metro area and follow the semester calendar.

### Leadership Studies Minor

Army ROTC courses are eligible to count towards a Leadership Studies Minor through the Pioneer Leadership Program, please visit the Pioneer Leadership Program (p. 469) for details.

## Additional Information

Interested students may contact the professor of military science, University of Colorado Boulder, 303-492-6495. For further information, visit the Army ROTC web page at [www.goarmy.com/rotc/](http://www.goarmy.com/rotc/) (<http://www.goarmy.com/rotc/>), or the Army ROTC Golden Buffalo Battalion Web page at [www.colorado.edu/arotc/](http://www.colorado.edu/arotc/) (<http://www.colorado.edu/AROTC/>), or email [armyrotc@colorado.edu](mailto:armyrotc@colorado.edu).

### **RTC1 1011 Adventures in Leadership 1 (1-3 Credits)**

Introduces fundamentals of leadership and the United States Army. Examines its organization, customs and history as well as its current relevance and purpose. Students also investigate basic leadership and management skills necessary to be successful in both military and civilian settings. Includes fundamentals of Army leadership doctrine, team-building concepts, time and stress management, an introduction to cartography and land navigation, marksmanship, briefing, techniques and some basic military tactics.

### **RTC1 1021 Adventures in Leadership 2 (0-3 Credits)**

Continues the investigation of leadership in small organizations. Covers selected topics such as basic troop leading procedures, military first aid and casualty evacuation concepts, creating ethical work climates, an introduction to Army organizations and installations, and a further examination of basic military tactics. Introduces students to effective military writing styles.

### **RTC1 2031 Methods of Leadership and Management 1 (1-4.5 Credits)**

Comprehensively reviews advanced leadership and management concepts including motivation, attitudes, communication skills, problem solving, human needs and behavior, and leadership self development. Students continue to refine effective written and oral communications skills and to explore topics such as the basic branches of the Army, and officer and NCO duties. Students conduct classroom and practical exercises in small unit light infantry tactics and are prepared to perform as midlevel leaders in the cadet organization.

### **RTC1 2041 Methods of Leadership and Management 2 (0-4.5 Credits)**

Focuses on leadership and management functions in military and corporate environments. Studies various components of Army leadership doctrine to include the four elements of leadership, leadership principles, risk management and planning theory, the be-know-do framework, and the Army leadership evaluation program. Continue to refine communication skills.

### **RTC1 3052 Military Operations and Training 1 (0-4.5 Credits)**

Further explores the theory of managing and leading small military units with an emphasis on practical applications at the squad and platoon levels. Students examine various leadership styles and techniques as they relate to advanced small unit tactics. Familiarizes students with a variety of topics such as cartography, land navigation, field craft and weapons systems. Involves multiple, evaluated leadership opportunities in field settings and hands-on experience with actual military equipment. Students are given maximum leadership opportunities in weekly labs. Instructor permission required.

### **RTC1 3062 Military Operations and Training 2 (0-4.5 Credits)**

Studies theoretical and practical applications of small unit leadership principles. Focuses on managing personnel and resources, the military decision making process, the operations order, and oral communications. Exposes the student to tactical unit leadership in a variety of environments with a focus on preparation for the summer advance camp experience. Instructor permission required.

### **RTC1 3072 Adaptive Leadership (0-4.5 Credits)**

This course focuses on developing leaders of character that will excel in a complex, ambiguous and dynamic future operating environment. While centered on leadership within the military, and designed to ensure future second lieutenants are prepared for their professional responsibilities, the course develops universal leadership attributes. We will discuss personal growth, effective communication, critical thinking, problem solving, and ethical leadership. The objectives of the course are to understand basic leadership principles – to include knowledge of one's self as well as techniques to effectively influence others, improve communication – both written and oral, enhance the ability to analyze issues, articulate a problem, extrapolate pertinent information, make valid assumptions to overcome knowledge gaps, identify potential solutions and develop a way forward, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

### **RTC1 3082 Leadership in a Complex World (0-4.5 Credits)**

Continues RTC1 3072 study by focusing on developing leaders of character that will excel in a complex, ambiguous, and dynamic future operating environment. The course will center on Students' understanding of their environment. The objectives of the course are to understand organizational leadership principles – to include leading diverse teams, leading change, and creating a vision, improve communication – both written and oral, enhance one's understanding of the contemporary operating environment, gain an appreciation for other actors in the national security arena; appreciate cultures of other military services as well as civilian organizations and agencies, and improve inter-personal dynamics; work effectively as a team. Instructor permission required.

### **RTC1 3090 Military Theory and Tactical Leadership (0 Credits)**

Application of military domain knowledge, small unit leadership skills and education on various subjects germane to military operations. Examination of military tactics, techniques and procedures to better understand how to successfully accomplish multiple military requirements. Instructor consent required. Co-requisites: One of RTC1 1011, RTC1 1021, RTC1 2031, RTC1 2041, RTC1 3062, RTC1 4072 or RTC1 4082.

## Art and Art History

Office: Shwayder Art Building, Room 132  
 Mail Code: 2121 E. Asbury Ave. Denver, CO 80208  
 Phone: 303-871-2846  
 Email: [AboutArt@du.edu](mailto:AboutArt@du.edu)

Web Site: <http://www.du.edu/art/>

The School of Art and Art History (SAAH) teaches the technical processes of art, methods of analyzing and criticizing visual culture and the diverse histories of art. We educate students to think critically and conceptually, to express themselves creatively, to articulate their ideas clearly and to make significant contributions to the society in which they live. Our faculty promote these qualities through their creative activity, scholarship and public service.

The School of Art and Art History grants the following degrees:

- Bachelor of arts (BA) and bachelor of fine arts (BFA) degrees in studio art. Both studio degrees include exposure to ceramics, drawing, painting, photography, printmaking and sculpture.
- Bachelor of fine arts (BFA) degree in pre-art conservation.
- Bachelor of arts (BA) and master of arts (MA) degrees in art history. The master of arts offers the option of a museum studies concentration.
- Two 4+1 options that allow motivated students to complete both an undergraduate and graduate degree in five years. In art history, a BA and MA in art history with a museum studies concentration is available. In studio art, a BA or a BFA in studio art and MA in curriculum and instruction with certification to teach K–12 art is offered in partnership with the Morgridge College of Education.

Students seeking to transfer to the University of Denver with admission to SAAH are encouraged to contact the School with questions about degree programs and transfer credit options prior to applying. If admitted to the University and SAAH, all students enter as a BA in either art history or studio, depending on their interest. Students interested in pursuing a BFA in studio art or pre-art conservation apply under the guidance of a faculty member once enrolled in SAAH. Upon admission to SAAH for the fall quarter, students will be provided with instructions on how to submit a portfolio for merit-based scholarship consideration. Flexible options to minor in SAAH are also available.

## Art

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

60 credits of art, including the following:

Code	Title	Credits
<b>Art Foundations (must be completed before proceeding to upper-level studio courses)</b>		
ARTS 1100	2-D Approaches	4
ARTS 1200	3-D Approaches	4
ARTS 1250	Drawing	4
ARTS 1300	Concepts	4
<b>Art History</b>		
12 credits in art history, as follows:		12
ARTH 2801	World Art I: Prehistory to c. 1000	
or ARTH 2802	World Art II: c.1000-1700	
or ARTH 2803	World Art III: 1700 to the Present	
A modern or contemporary art history course		
An upper-division art history course <sup>1</sup>		
<b>Art electives</b>		
32 credits of studio art courses of which two need to be at the 3000 level.		32
<b>Total Credits</b>		<b>60</b>

BA students may combine majors or minors within the School of Art and Art History, but no reduction in total credits will be allowed.

<sup>1</sup> May be fulfilled with another world art course.

## Secondary Major

60 credits. Same requirements as for BA degree.

## Minor Requirements

The Studio Art Minor offers students the opportunity to focus on Studio Art courses specifically. Six courses are required for the minor, consisting of

- ARTS 1250 Drawing
- ARTS 1100 2D Approaches **or** ARTS 1200 3D Approaches

- four elective ARTS courses, at least two of which are upper-division (2XXX or above)
- one Art History upper-division course may be substituted for an upper-division Studio Art course if desired.

One of the 1000-level Common Curriculum classes can be applied to either the major or minor. BA students may combine majors or minors within the School of Art & Art History, but no reduction in total credits will be allowed.

## Art History

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

60 credits, including the following:

Code	Title	Credits
<b>Art History</b>		
<b>Required Courses</b>		
ARTH 2801	World Art I: Prehistory to c. 1000	4
ARTH 2802	World Art II: c.1000-1700	4
ARTH 2803	World Art III: 1700 to the Present	4
ARTH 3300	Seminar in Art History	4
Pre-17th Century art history course		4
Post-17th Century art history course		4
<b>Art History Elective Courses</b>		
Select 24 credits of art history		24
<b>Studio Art</b>		
Select 12 credits of studio art		12
<b>Total Credits</b>		<b>60</b>

BA students may combine majors or minors within the School of Art and Art History, but no reduction in total credits will be allowed. Only one 1000-level ARTH course may be counted toward the major. Students need at least two 3000-level ARTH courses in addition to ARTH 3300.

### Secondary Major

60 credits. Same requirements as for BA degree.

### Minor Requirements

Code	Title	Credits
<b>At Least One of the Following:</b>		<b>4</b>
ARTH 2801	World Art I: Prehistory to c. 1000	
ARTH 2802	World Art II: c.1000-1700	
ARTH 2803	World Art III: 1700 to the Present	
<b>Five Art History Elective Courses:</b>		<b>20</b>
No more than one course may be 1000-level		
At least one course must be 3000-level		
One ARTS course may be used towards the elective		
<b>Total Credits</b>		<b>24</b>

#### Additional Information:

- AP credit is apportioned according to University guidelines (<http://www.du.edu/registrar/media/documents/apib20152016.pdf>). Any impact on the world art course requirement will be determined by the undergraduate art history advisor, Scott Montgomery.

## Pre-Art Conservation

If admitted to the University and the School of Art & Art History (SAAH), students interested in the Studio Art program may enter as either a BA or BFA. Studio BFA students are required to undergo the BFA Review after the completion of the Foundations sequence and should seek the guidance of studio faculty their first quarter enrolled in SAAH.

Contact the School of Art and Art History (<https://liberalarts.du.edu/art/academics-admissions/programs-ug/bfa-studio-art/>) for details.

## Bachelor of Fine Arts Major Requirements

(189-192 credits required for the degree (p. 98))

Minimum of 116 credits of art. In addition to major coursework, 24 credits of chemistry, including the organic chemistry sequence (CHEM 2451, CHEM 2461, CHEM 2452, CHEM 2462, CHEM 2453, CHEM 2463) and 24 credits of language are required.

Art coursework includes the following:

Code	Title	Credits
<b>Art Foundations (must be completed before proceeding to upper-level studio courses)</b>		
ARTS 1100	2-D Approaches	4
ARTS 1200	3-D Approaches	4
ARTS 1250	Drawing	4
<b>Studio Art</b>		
44 credits including the following required courses:		44
ARTS 2045	Intermediate Drawing (or ARTS 3065)	
ARTS 2115	Introduction to Oil Painting	
ARTS 2215	Relief Printmaking (or another 2000 level Printmaking course)	
ARTS 2415	Introduction to Photography	
ARTS 2515	Introduction to Ceramics	
ARTS 2615	Introduction to Sculpture	
<b>Art History</b>		
44 credits including the following required courses:		44
ARTH 2801	World Art I: Prehistory to c. 1000	
ARTH 2802	World Art II: c.1000-1700	
ARTH 2803	World Art III: 1700 to the Present	
<b>Pre-Art Conservation Studies</b>		
12 credits of pre-art conservation studies		12
ARTH 3872	Introduction to Conservation	
ARTS 3865	Senior Project: Conservation	
ARTS 3915	Advanced Problems in Art (junior or senior standing)	
<b>Total Credits</b>		<b>112</b>

Students complete a senior project working with a conservator. For complete requirements, contact the School of Art and Art History.

## Studio Art

If admitted to the University and the School of Art & Art History (SAAH), students interested in the Studio Art program may enter as either a BA or BFA. Studio BFA students are required to undergo the BFA Review after the completion of the Foundations sequence and should seek the guidance of studio faculty their first quarter enrolled in SAAH.

Contact the School of Art and Art History (<https://liberalarts.du.edu/art/academics-admissions/programs-ug/bfa-studio-art/>) for details.

## Bachelor of Fine Arts Major Requirements

(189-192 credits required for the degree (p. 98))

110 to 135 credits of art, including the following:

Code	Title	Credits
<b>Art Foundations (must be completed before proceeding to upper-level studio courses)</b>		
ARTS 1100	2-D Approaches	4
ARTS 1200	3-D Approaches	4
ARTS 1250	Drawing	4
ARTS 1300	Concepts	4
<b>Art History</b>		
20 credits in art history:		20
ARTH 2801	World Art I: Prehistory to c. 1000	

ARTH 2802	World Art II: c.1000-1700	
ARTH 2803	World Art III: 1700 to the Present	
ARTH 3834	Global Contemporary Art (or another Modern/Contemporary ARTH course)	
ARTH 3701	Topics in Art History (or any other ARTH course)	
<b>Studio Art</b>		
Minimum 70 credits in studio art including the following required courses:		70
ARTS 2000	Integrated Practice: Open Media Studio	4
ARTS 2045	Intermediate Drawing (or ARTS 3065)	
ARTS 2115	Introduction to Oil Painting	
ARTS 2215	Relief Printmaking (or another 2000-level printmaking course)	
ARTS 2415	Introduction to Photography	
ARTS 2515	Introduction to Ceramics	
ARTS 2615	Introduction to Sculpture	
ARTS 3347	Professional Practice	
ARTS 3348	Senior Practicum in the Visual Arts	
ARTS 3349	Senior Seminar in the Visual Arts	
<b>Total Credits</b>		<b>110</b>

### Requirements for Distinction in the Major in Art

- Minimum of 3.3 major GPA
- Minimum 3.5 cumulative GPA
- Completion of three classes studio art classes beyond the introductory level
- Completion of a special project with distinction

### Requirements for Distinction in the Major in Art History

- Minimum of 3.3 major GPA
- Minimum 3.5 cumulative GPA
- Completion of three 3000-level art history courses with A- or higher
- Completion of a senior paper with distinction

### Requirements for Distinction in the Major in Pre-Art Conservation

- Minimum of 3.3 major GPA
- Minimum 3.5 cumulative GPA
- Completion of three classes studio art classes beyond the introductory level
- Completion of a special project with distinction and accompanying paper

### Requirements for Distinction in the Major in Studio Art

- Minimum of 3.3 major GPA
- Minimum 3.5 cumulative GPA
- Completion of three classes studio art classes beyond the introductory level
- Completion of a special project with distinction and accompanying paper

### BA in Art

The following course plan is a suggested four-year schedule. The School of Art & Art history (SAAH) strongly recommends completion of the Art Foundations requirements to best prepare them for 2000-level studio coursework.

Individual course plans will vary based on incoming transfer credit, prerequisites, availability of courses, minors, and other scheduling factors. We welcome all students, including first-years, to attend quarterly open advising at the SAAH Advising Day to meet faculty and staff for recommendations about studio courses!

SAAH encourages first-year students to begin taking art major requirements immediately! The Art Foundations program consists of ARTS 1100 2D Approaches, ARTS 1200 3D Approaches, ARTS 1250 Drawing, ARTS 1300 Concepts. Multiple sections of 2D, 3D, and Drawing are offered every quarter. 2D and 3D are prerequisites for Concepts.

## Art History (ARTH)

### ARTH 1010 Images of Culture (4 Credits)

This course looks at artistic creations as an expression of cultural traditions and beliefs. Instead of viewing art as the result of unique geniuses, the fruit of inspired individuals, we explore how artistic objects reflect the ideas of the times and social values held by the society in which they appear. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### ARTH 1020 Highlights of Medieval Art (4 Credits)

The era known as the Middle Ages spans over a thousand years and includes many significant works in the history of art. This class endeavors to investigate the ways in which works of medieval art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### ARTH 1030 Highlights of Renaissance Art (4 Credits)

The period known as the Renaissance witnessed the production of a tremendous number of artistic masterpieces, but also the formulation of the study of the history of art and the development of art theory. This class endeavors to investigate the ways in which works of Renaissance art construct and convey meaning. In order to explore these ideas in greater depth, the class focuses on specific works of art that illustrate the rich complexities of the ways in which images convey meaning and the ways of understanding these meanings. As such, it is intended to provide an introduction to ways of reading and interpreting images. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### ARTH 1040 Sacred Spaces in Asia (4 Credits)

This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### ARTH 1050 Highlights of American Art (4 Credits)

This course introduces American art by focusing on a single work of art each week. Through readings, illustrated lectures, discussion and museum visits, we explore the social, political, historical and cultural contexts of each masterwork; learn something about the featured artist's life and artistic processes; and discover related examples of fine and popular art from the seventeenth century to the present. In the process, participants refine their ability to look, describe, analyze and critique the visual. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### ARTH 1060 Contemporary Art Worlds (4 Credits)

Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### ARTH 1988 Study Abroad Resident Credit (0-18 Credits)

### ARTH 2801 World Art I: Prehistory to c. 1000 (4 Credits)

This is the first quarter in a three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from the Paleolithic era to approximately the year 1000. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2802 World Art II: c.1000-1700 (4 Credits)**

This is the second quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1000 to 1700. Students will consider the crucial role of these images and objects in the formation of their respective historical and cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2803 World Art III: 1700 to the Present (4 Credits)**

This is the third quarter of the three-quarter foundation course in world art. Students will become familiar with significant examples of art, architecture and material culture emerging out of Europe, the Americas, Asia and Africa from approximately the year 1700 to the present. Students will consider the crucial role of these image and objects in the formation of their respective historical and cultural contexts.

**ARTH 2814 Medieval Art (4 Credits)**

This course examines the art produced in Western Europe and the eastern Mediterranean from the 4th to 14th centuries. From the transition of the Late Roman Empire into new political and artistic climates of the Early Medieval period up through the lavish expanse of Late Gothic art we will explore the religious, political, cultural and artistic forces that shaped the creation of artistic monuments for over an thousand years. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2840 Survey of Asian Art (4 Credits)**

An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 3035 Whitewalling: Racial Politics of the Art World (4 Credits)**

Aruna D'Souza defines whitewalling as "a neologism that expands in many directions: the literal site of contention, i.e., the white walls of the gallery; the idea of 'blackballing' or excluding someone; the notion of 'whitewashing,' or covering over that which we prefer to ignore or suppress; the idea of putting a wall around whiteness, of fencing it off, of defending it against incursions." By examining the state of the art world through the lens of critical race and ethnic studies, this course will investigate a series of case studies that highlights these many manifestations of whitewalling in modern and contemporary art. Through lectures, readings, discussions, and written assignments, the course aims to explore the following questions: How does race intersect with art and art history? How do the shifting racial politics of the art world map histories of racial construction, systemic oppression, and subversive resistance? Should artistic freedom be prioritized, limited, or censored when an artwork includes harmful racial representations or ideologies? How can art institutions be critiqued as sites of contention? And perhaps most importantly, how can art scholars, workers, and creators collectively move towards a politics of racial justice? In this course, students will not only engage in art historical debates that address the critical role that art has played in shaping perceptions of race and racism, but students will also consider how the art world can provide platforms for anti-racist solidarity and protest.

**ARTH 3300 Seminar in Art History (4 Credits)**

This seminar is primarily designed to introduce students to the advanced research techniques and methods of art history. The thematic content of this course changes. Students develop skills to analyze scholarly literature, to refine research papers and to deliver oral presentations.

**ARTH 3400 Portfolio\* Professional Development and Creative Practices in Art History (4 Credits)**

Portfolio is a professional development and creative practices course, introducing the practicalities of staple jobs for Art History majors and minors as well as the range of other possible career tracks and additional academic studies. The course combines an inquiry-based classroom experience with a signature seminar format and guest lecture series. Such a teaching+learning approach will not only improve your criticality but also strengthen your adeptness at investigation and analysis; deepen your knowledge of concepts, principles, and platforms for today's creative industries; expand your professional networks; and provide hands-on, career-oriented experiences as you prepare your own portfolio for the contemporary marketplace.

**ARTH 3652 Internship (1-4 Credits)**

By arrangement, advanced undergraduate art history students may intern in an art gallery, small museum, historic house, non-profit art organization, archive or library. See guidelines and contract form in the School of Art and Art History office.

**ARTH 3656 Curatorial Practicum (4 Credits)**

Students will work in curatorial teams to plan and execute an effective exhibition of contemporary art. This process may include choosing a theme and selecting works of art, researching artists and themes, budgets, scheduling, developing an exhibition checklist, modeling the gallery, visual exhibition design, conservation and collections management factors, shipping, installation, educational outreach to the public, publicity and other issues related to exhibition planning.

**ARTH 3661 Learning in Museums (4 Credits)**

Comprehensive introduction to museum education. Examines informal education, learning theories, interactive education, exhibits and programs. Cross-listed with ANTH 3661.

**ARTH 3701 Topics in Art History (1-4 Credits)**

Selected themes and topics from the history of art. Content changes and course may be repeated to a maximum of 12 credits.

**ARTH 3702 Topics in Contemporary Art (4 Credits)**

This course offers an in-depth exploration of contemporary art and critical theory from a cross-disciplinary, global perspective beginning in the 1960s. We couple intensive reading and writing assignments to meetings with guest creatives and thinkers, visits to local art spaces, and roundtable discussions about new research. The particular art historical topic varies from year to year.

**ARTH 3813 Arts of the American West (4 Credits)**

This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.

**ARTH 3815 Puritan, Shaker, Hindu: Material Religion in North America (4 Credits)**

The diversity of religious experience and spirituality is emphasized in this historical examination of image and artifact in North America. Beginning with sacred indigenous arts and including Puritans, Shakers, Judaism, Mormons, Ghost Dance religion, Buddhists, Hindus, and others, this class considers the ways in which different spiritual worldviews are expressed through and shaped by the art and objects people create and the environments they build. It looks at the encounters between cultures in colonial and post-colonial contexts that result in ever changing material forms of religion. Students learn through slide-lecture-discussions, reading, small group discussions, research papers or presentations, and field trips.

**ARTH 3817 Gothic Art (4 Credits)**

This course examines the art of the Late Middle Ages in Europe, from roughly 1140 to 1400. Gothic architecture, sculpture, painting, stained glass and the sumptuous arts (metal, textiles) are examined within their broader social, political and religious contexts. Particular attention is paid to the Gothic Cathedral - that quintessential window into the medieval world—its beliefs, aspirations, social and political realities.

**ARTH 3818 Art of Renaissance Europe (4 Credits)**

This course provides an examination of the artistic cultures in Europe during the Renaissance (15th and 16th centuries). Depending upon the quarter, this course will be a general survey of European art during the Renaissance or a more focused exploration of a sub-period, such as painting in fifteenth-century Italy. Chronological and geographic factors determine the overall theme and structure of the course. Students gain both a sound knowledge of key artistic monuments of the period, as well as a conceptual framework according to which they may organize their knowledge. This class may be repeated for a maximum of 8 credits.

**ARTH 3822 Northern Renaissance Art (4 Credits)**

This course explores the dramatic developments in the arts (particularly panel painting, manuscript illumination and sculpture) in Northern Europe from around 1350 to 1550. From lavishly decorated Books of Hours and the development of stunningly naturalistic oil paintings on panel in the early 15th century through the development of printing and the rise of self-portraiture, genre and landscape depictions, this class traces the important role played by Dutch, Flemish, German and French artists in the transition from late medieval to early modern artistic forms and practices. The role of art in shaping and expressing religious, civic, political and economic concepts are explored, as well as the rise of the social and intellectual standing of the artist. Among the artists examined include Jan van Eyck, Rogier van der Weyden, Albrecht Dürer, Hieronymus Bosch and Pieter Bruegel the Elder.

**ARTH 3823 17th-Century European Art (4 Credits)**

This course considers European arts of the 17th century. Depending upon the quarter it may be a general survey of European art during the seventeenth century or a more focused exploration of a sub-period, such as Italian Baroque or the Old Dutch Masters: Rembrandt, Vermeer and Frans Hals. This class may be repeated for a maximum of 8 credits.

**ARTH 3825 Abstract Expressionism (4 Credits)**

In the years immediately following World War II, American art flourished through a generation of artists whose work successfully moved beyond (and at its best, matched) the substantial innovations of modern artists working in Europe around the time of World War I. From richly varied backgrounds and equipped with a deep understanding of art history, these artists forged careers during the Depression and, though fiercely independent, united in the late 1940s with the goal of establishing a new American modern art. Their monumental, highly singular, expressive abstractions (and near-abstractions) gave rise to the movement called Abstract Expressionism, which dominated American painting in the 1950s and beyond.

**ARTH 3832 19th-Century Art (4 Credits)**

This course surveys the major art movements in Europe from the late 18th century to the end of the 19th century. Major painters, sculptors, printmakers and architects of the following movements will be presented: Neo-classicism, Romanticism, Academic Painting, Realism, the Pre-Raphaelites, Impressionism, Post-Impressionism, Symbolism and Art Nouveau. Their works will be studied in light of the social, political and cultural milieu in which they appeared. Special attention will be paid to representations of race, class, gender and colonialism.

**ARTH 3834 Global Contemporary Art (4 Credits)**

This class explores contemporary art, including but not limited to painting, sculpture, performance art, installations, and new media, through the lenses of identity, the body, time, place, language, and spirituality. These narratives provide threads of continuity across time and place, but we will also focus on individual artistic interpretations as we delve deeper into cultural specificities and audience reception around the world. We will identify and analyze connections between recent art theoretical perspectives and the emergence of various art trends. This course considers the role of the international art market, global art fairs, artist retrospectives, and recent museum and gallery exhibitions as participatory elements in the construction and discussion of contemporary art.

**ARTH 3838 Connoisseurship (4 Credits)**

In this class the historical roots, theoretical and philosophical underpinnings, and actual practice of connoisseurship are studied using objects from the museum's collection.

**ARTH 3839 Topics in Modern Art (4 Credits)**

Selected themes and topics from the 18th century to the present. Topics change, and the course may be repeated to a maximum of 12 credits.

**ARTH 3840 Sacred Arts of Asia (4 Credits)**

This course explores the sacred art and architecture of Asia, including but not limited to India, China, and Japan. Major religious traditions, including Buddhism, Hinduism, and Islam, are viewed through the lens of artistic development; indigenous religious traditions and philosophical constructs, including Shintoism, Daoism, Confucianism, and Bon are also explored for their influence in art, architecture, and visual culture more broadly in and between Asian regions.

**ARTH 3862 Olmec to Aztec: Mesoamerica (4 Credits)**

This course is an introduction to the art and archaeology of the indigenous peoples of Mesoamerica from about 2000 BC to AD 1521. The course explores the early royal art of the Olmec, the colossal pyramids of Teotihuacan, the manuscripts of the Mixtec, and the imperial power of the Aztecs. This class presents a timeline of Mesoamerica and investigates how the various civilizations of Mesoamerica shared aspects of world-view, cosmology and daily life. Students will be able to identify and discuss how these elements manifested in the art and architecture of Mesoamerican cultures. Furthermore, the course investigates issues of shamanism, kingship and power, warfare, gender, and human sacrifice.

**ARTH 3863 Kings and Cosmology: Maya Art (4 Credits)**

This course is an introduction to the art and archaeology of the Maya from about 300 BCE to 1200 CE, although the beliefs and traditions of the living Maya will inform this study of the past. The Maya are perhaps the most famous of the several cultures comprising what is known as Mesoamerica. A highly advanced culture, they built soaring temples, carved elaborate portraits of their kings and developed a complex writing system including a calendar. The course explores these things with a constant eye to understanding the Maya worldview, cosmology and daily life. By the conclusion of the class, students should be able to read their intricate pictures, discuss the strategies of powerful Maya rulers and understand how Maya art and architecture reflect their concepts of time and the cosmos.

**ARTH 3864 Buddhism(s) and Arts (4 Credits)**

This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

**ARTH 3867 The Circle and the Four Corners: Native North American Art (4 Credits)**

This course is designed as an introduction to the art and architecture of the native peoples of North America from the earliest signs of humans in North America to the present. Cultures covered include those from the Southwest, the Northwest, the Southeast Ceremonial Complex, the Plains and contemporary Native American artists. By the conclusion of the class, students will understand the cultural sequence and geographic dispersion of native North America. Students will also understand how the various civilizations of North America shared aspects of world-view, cosmology and daily life, and be able to identify and discuss how these elements manifested in the art and architecture of native North American cultures.

**ARTH 3868 Art of the Andes (4 Credits)**

This course is designed as an introduction to the art and architecture of the native Pre-Columbian peoples of the Andes. Cultures covered include Chavin, Nasca, Wari and the Inca.

**ARTH 3871 Women in Art (4 Credits)**

This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

**ARTH 3872 Introduction to Conservation (4 Credits)**

This lecture course familiarizes the student with the concepts and challenges of conservation, its role in museums and the care of collections. Specific emphasis is given to the materials, structure, deterioration and preservation of material culture. Field trips to various museums and/or workshops to make appropriate display mounts and storage containers enhance the understanding gained from readings and lectures.

**ARTH 3875 History of Collections (4 Credits)**

This course traces the history of collections from the Renaissance to the present, addressing the interconnections between artists, patrons, dealers, art markets, provenance, connoisseurship and the historical development of museums and private collections. Each week's readings of journal articles and chapters focus on different types of collections or themes, including royal and imperial collections, cabinets of curiosities, excavating and transporting antiquities, British country estates and the Grand Tour, the establishment of national museums, the relationship between American collectors and dealers, ethnographic objects in Western collections, Nazi looting, restorers and forgers, and artists' collections, to name a few.

**ARTH 3880 Mosques and Aniconism: Islamic Art and Architecture 650-1250 (4 Credits)**

What is 'Islamic' in Islamic art? An introduction to art and architecture in the Islamic lands from the days of the Prophet Muhammad in the 7th century until the Mongol conquest of the Middle East in the mid-13th century. The course surveys mosques, palaces, madrasas, and tombs, and also calligraphy, sculpture, ceramics, and painting in historical and literary contexts. It covers a vast geographical area, from Spain in the west to Iran and Central Asia in the east, and discusses both common and unique characteristics of architecture and figurative representations in these regions. Emphasis will be given to the early Islamic period in Greater Syria and to artists' response to Byzantine and Sassanid (pre-Islamic Persian) art and architecture.

**ARTH 3881 Dragons and Sultans: Islamic Art and Architecture 1250-1600 (4 Credits)**

Art and architecture in the Islamic lands from Genghis Khan in the 13th century to the Ottoman Sultan Suleyman the Magnificent in the 16th century. The course consists of three parts. First, it examines the changes that occurred in Islamic art as a result of artists' acquaintance with East Asian art and culture (14th century). Second, it discusses art and architecture in Central Asia and Afghanistan under Timurid rule (late 14th-15th century), followed by an overview of the artistic achievements in the Early Modern Islamic lands under the Ottomans, Safavids, and Mughals (16th century). The course explores works of art in historical, cultural, and literary contexts, and points to the unique characteristics of each geographical region, as well as to pan-Islamic form and content. Among the topics that will be discussed: the architect Sinan and his legacy, the response of Islamic painting to European art, and representations of royal and religious concepts.

**ARTH 3910 Art History Travel (4 Credits)**

A travel course to selected locations to study major monuments and collections of art and architecture. Location and content change. This class may be repeated for a maximum of 8 credits. Prerequisite: instructor's permission.

**ARTH 3988 Study Abroad Resident Credit (0-18 Credits)****ARTH 3991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

**ARTH 3995 Independent Research (1-4 Credits)****ARTH 4301 Seminar in Art History Methods (4 Credits)**

This seminar considers the history of art history and the development of various methods that art historians use to interpret and understand art. Required of all MA candidates in art history.

**ARTH 4302 Research Practicum (4 Credits)**

The major goal of this course is to learn methods and resources for doing primary research in the history of art. In this practicum, students will gain practical research experience by carrying out original research on two projects: research on an object from the DU collection and research on a contemporary artist. Students will learn to track down biographical information, locate and examine works of art, and reconstruct historical context using archival, material, human, and electronic sources. Students will learn to develop research questions, create and follow through on a research strategy, organize research data, and document the research process. This course will help you prepare for many aspects of your graduate papers, including the Master's Research Paper. Required of all MA students in art history.

**ARTH 4312 Seminar: Indigenous American Art (4 Credits)**

Selected topics in Indigenous American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4313 Seminar in Islamic Art (4 Credits)**

Selected topics in Islamic Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4314 Seminar in Medieval Art (4 Credits)**

Selected topics in Medieval Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4321 Seminar in Renaissance Art (4 Credits)**

Selected topics in Renaissance Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4333 Seminar in 20th Century Art (4 Credits)**

Selected topics in 20th century Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4334 Selected Topics in Contemporary Art (4 Credits)**

Selected topics in contemporary art. Advanced research papers and presentations. Content changes. May be repeated for a maximum of 8 credits.

**ARTH 4336 Seminar in American Art (4 Credits)**

Selected topics in American Art. Advanced research papers and presentations. Content changes. May be repeated to a maximum of 8 credits.

**ARTH 4651 Museum Methods and Principles (4 Credits)**

This class surveys the major activities, goals, and organization of the art museum within today's world. Students meet with a variety of museum professionals to discuss the changing dynamics within art museums, as well as ethical and practical issues of museum work. The class reads both classic and current literature on museum issues and practice, and participates in research, collection, and exhibition projects. Required of all M.A. art history students pursuing the Museum Studies option.

**ARTH 4652 Museum Internship (0-10 Credits)**

Arranged internship in student's area of specialization. Students should take ARTH 4651 Museum Methods and Principles first. Prerequisite: instructor's permission.

**ARTH 4801 World Art I for Graduates (0 Credits)**

Survey of World Art Prehistory-1000 for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4802 World Art II for Graduates (0 Credits)**

Survey of World Art 1000-1700 for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4803 World Art III for Graduates (0 Credits)**

Survey of World Art 1700-present for graduate students who are required to take this course due to performance on the art history Qualifying Exam.

**ARTH 4991 Independent Study (1-10 Credits)**

This class should be used for individual study of a special topic that is not offered in the art history curriculum described in this catalog. Permission/registration form is available from the Office of the Registrar.

**ARTH 4995 Independent Research (4 Credits)**

Students should see their advisor for guidelines regarding the Master's Research Paper class.

## Art - Studio (ARTS)

**ARTS 1015 Thinking & Making in the Visual Arts (4 Credits)**

This course explores the language of the visual arts and how it can be used to communicate ideas about culture, history and the personal. Through hands-on exercises and experimentation in different media students create visual art works that interpret the world around them. This course focuses on different areas of the visual arts that change its focus depending on the area of expertise of the faculty teaching it. (Example: drawing, painting, printmaking, photography, ceramics, sculpture.) Students leave the course with a broader understanding of the visual arts, past and present. Students also leave with a more in-depth understanding of the creative process that will inform other areas of studies throughout the University and which will enrich their lives long into the future. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTS 1100 2-D Approaches (4 Credits)**

Students are introduced to the elements of design, vocabulary of art and visual analysis. Explorations of the formal language of two-dimensional media include color, digital processes and mark making. Students also develop an understanding of compositional strategies, materials and processes. Verbal and written exercises supplement group activities and visual learning. Students explore across material boundaries. Increasing emphasis is placed on subjectivity, content and conceptual development. Lab fee. No prerequisites.

**ARTS 1200 3-D Approaches (4 Credits)**

Students are introduced to spatial thinking, the fundamentals of structure and construction, and the formal language of three dimensional forms. Applying a variety of materials, explorations include additive and subtractive methods, basic mold making, and an introduction to hand and power tools. Verbal and written exercises supplement the Studio environment and visual learning, and basic digital methods and color relationships are explored. Emphasis is placed on subjectivity, artistic choice and craft, alongside the beginnings of content and conceptual development. Lab fee. No prerequisites.

**ARTS 1250 Drawing (4 Credits)**

Fundamental drawing practice and history based on selected exercises, slide presentations, comprehensive group/individual critiques and workshops. Still-life and figure drawing are covered in this course. Projects focus on ways to comprehend and draw three-dimensional forms, with emphasis on conceptual issues and use of materials. This class is required of all majors in studio art prior to taking upper-level courses. It is also required of all EDP students.

**ARTS 1300 Concepts (4 Credits)**

Students integrate the skills and principles acquired from ARTS 1100 and ARTS 1200. Two topics are explored: 'Culture & Context' and 'Time, Space & Duration'. A greater complexity of studio activity is stressed through collaborative exercises and individual approaches to themes. Greater exploration of context and concept is expected, with emphasis on visual communication and personal awareness. Lab fee. Prerequisites: ARTS 1100 and ARTS 1200.

**ARTS 1400 4D Approaches (4 Credits)**

Students are introduced to the fundamental principles of four-dimensional art and design through a survey of concepts, techniques, and practices. Emphasis is placed on critical thinking, creative problem-solving, and experimentation through investigations of technological form and innovation, time and motion, and the ephemeral. Verbal and written exercises supplement group activities and visual learning. Lab fee. No prerequisites.

**ARTS 1988 Study Abroad Resident Credit (0-18 Credits)****ARTS 2000 Open Media Studio (4 Credits)**

This course is a topic driven, interdisciplinary research studio. Students investigate the topic and their relationship to it in a variety of media, and supplement their inquiry with research that occurs outside the classroom. An exploration of different processes, materials, expression and connection with the larger world is emphasized. Lab fee. All students must complete ARTS 1300 first.

**ARTS 2045 Intermediate Drawing (4 Credits)**

This course covers a wide range of materials and ideas, both traditional and experimental. Emphasis is divided between technical and conceptual issues, building on the skills established in ARTS 1250 Drawing. Lab fee. Prerequisite: ARTS 1250 or permission of instructor.

**ARTS 2055 Color (4 Credits)**

Color is a studio-based course focused on developing a more sophisticated and practical understanding of how colors act on us and vice versa, physiologically, psychologically, emotionally and culturally. It is designed specifically to enhance the abilities of people who work with color, be they painters, web designers, video artists, art historians, art therapists or conservators. However, because of the intentionally basic level of art skills involved, this is a course that is also taken by non-art majors with success. It includes in-class color work that retrains students in their ability to "see" more color and to become confident in their ability to interpret and manipulate color for any specific need. In addition, there is required reading on the physics of color, and discussion of the historical influences and legacy of color in primarily Western culture. Lab fee. Majors should complete ARTS 1250 and ARTS 1300 first.

**ARTS 2115 Introduction to Oil Painting (4 Credits)**

Introduction to Oil Painting builds on the ideas and skills learned in Drawing. Working with oil paint, students explore the possibilities of creating the illusion of three-dimensional form and space on the flat surface of a canvas. Emphasis is on really looking to heighten one's visual awareness of the physical world and seeing the effects light has on form, color and space. Students work from objects, the human form (models), imagination and art history. Critical abilities will be developed as students learn to think, speak and write about art. Discussions and critiques explore the social, political and the expressive possibilities of art-making. Students are given individual work-space to focus and develop their paintings. Students complete paintings in and out of class; contemporary and historical artists' work is explored, and students visit an area museum or gallery. Lab fee.

**ARTS 2215 Relief Printmaking (4 Credits)**

Concentration on selected areas of relief printmaking and related contemporary attitudes. This course covers relief, ranging from linoleum and woodcut processes to experimental approaches. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

**ARTS 2225 Intaglio Printmaking (4 Credits)**

Concentration on selected areas of Intaglio printmaking. Emphasis is placed on conceptual and technical development, and on personal expression through this medium. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

**ARTS 2235 Screen Printing (4 Credits)**

This course focuses on water-based screen printing and its applications in a workshop/studio intensive atmosphere. Group and individual critiques. Digital image presentations. Examination of actual prints. Lab fee. Prerequisite: ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first.

**ARTS 2415 Introduction to Photography (4 Credits)**

This class presents the basic concepts of photographic practice and discourse regarding; the historical, cultural and personal impact of photography. The goals are: introduce camera basics: digital photography workflow; (camera, image processing and digital printing); creative cell phone photography; online book publishing; development of an artistic and aesthetic way of seeing; engagement in critical analysis of photography; and most importantly, have fun learning a new skill. Participants will practice basic principles of photography, such as; camera, lighting and composition. Basics of Adobe Photoshop and Lightroom will be presented as post-production editing tools. Emphasis will be on the production of socially engaged photography projects, from conception to print. Creation of a final portfolio will be required, either as an edited selection of prints, or published online. Creation of a personal website will be encouraged. Community engaged collaboration may be a component of this course. Collaboration with another DU class may also be a component. No prerequisites. MUST HAVE A DIGITAL CAMERA WITH MANUAL METERING CAPABILITY. If you are unable to meet this requirement, please contact the professor. Lab fee. Art majors must complete ARTS 1250 and ARTS 1300 first.

**ARTS 2445 Digital Photography and Experimentation (4 Credits)**

This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. Students gain an understanding of digital photography and the use of Adobe Photoshop in the process of making art. Through labs and classroom demonstrations this course is designed to improve student's skill level as an artist/photographer, both technically and conceptually. Projects are viewed and discussed in critique sessions. Students must have a digital camera with manual metering capabilities. Lab fee. Prerequisite: ARTS 2415 Intro to Photography or permission of instructor (this requires demonstrating your proficiency in photography via a portfolio or website).

**ARTS 2515 Introduction to Ceramics (4 Credits)**

This course investigates the unique, material nature of clay as a medium for exploring artistic concepts and ideas. Studio assignments and demonstrations introduce several basic handbuilding methods as well as glazing and firing techniques. This course provides the fundamentals upon which students build their own direction and invention. Emphasis is on experimentation and individuality. Lab fee. Majors must complete ARTS 1250 and ARTS 1300 first.

**ARTS 2535 Ceramics: Food and Function (4 Credits)**

Gastronomy is the study of the relationship between culture and food. In this class, we explore gastronomic objects associated with food, both functional and sculptural. The importance of food is intimately involved with our concepts and design choices. Studio assignments and demonstrations serve as springboards for the student's own research and interpretations. Students use many different technical approaches such as throwing, handbuilding, casting as well as mixed media. Ultimately, students investigate, create and EAT! Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

**ARTS 2555 Ceramics: Multiples (4 Credits)**

This course investigates the many aspects of working with repetition and multiples. Assignments fall under the headings of Repetition, The Series, The Unit and The Collection. Students learn mold making and slipcasting techniques in addition to handbuilding and glazing. Students develop ideas on a conceptual level first and then move into building their pieces, combining the appropriate construction methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

**ARTS 2565 Ceramics: Surface (4 Credits)**

This course explores the ceramic surface as a canvas for decoration and narrative in both functional and sculptural forms. Students do extensive exploration and experimentation combining traditional ceramics techniques with those of drawing and printmaking. Students develop ideas on a conceptual level first and then move into creating their pieces, combining the appropriate methods to realize their ideas. Lab fee. Prerequisite: ARTS 2515 or permission of instructor.

**ARTS 2615 Introduction to Sculpture (4 Credits)**

This course offers a supportive but critical context to extend students' understanding of three dimensional form and its creation. Building on construction methods and spatial relationships formed in ARTS 1200, the course emphasizes the experiential and conceptual aspects of sculpture, and the interrelationship of ideas, form, material and technical means. Lab fee. Prerequisite: ARTS 1200. Majors should complete foundations sequence first (ARTS 1100, ARTS 1200, ARTS 1250, ARTS 1300).

**ARTS 2645 Mold Making and Casting (4 Credits)**

This course explores moldmaking and casting as a way to reproduce sculptural form and generate meaning. In this class, students are introduced to techniques for reproducing form such as open face molds, two-part molds, and castings from life. Students learn to express ideas by exploring the conceptual significance of material and form. Assignments teach technical skills while fostering conceptual development. Course content introduces students to contemporary artists and critical dialog.

**ARTS 2701 Topics in Studio Art (4 Credits)**

Selected topics in studio art research. May be repeated to a maximum of 12 credits.

**ARTS 2775 Integrated Practice (4 Credits)**

The overall approach of Integrated Practice (IP) is to offer students ways to articulate their individual "non-art" degree interests and knowledge as artistic outcomes. Modeled as a Studio course in format (curiosity, research, and making) the course encourages the expression of knowledge in other areas (Biology or International Studies, for example) through the vehicle of art. Additionally, the course offers students opportunities to pursue and further existing art skills and experiment with new ones, so choices of medium and process are flexible. For example, if a student enjoys photography or sculpture, there will be options to explore the projects using those mediums or technical approaches. Projects in IP will examine different means to translate non-visual knowledge to that which is visual or tangible. Examples may include ways to visualize "data" (broadly), exploring the approaches of mapping to examine the real and the imaginary, and more site-specific/interactive means of addressing ideas of place. There are options for 2 dimensional, 3 dimensional and virtual explorations of ideas, building further bridges between disciplines. Overall, the course encourages a holistic synthesis between "non-art" knowledge (academic or otherwise) and art making practice. Course pre-requisites include at least two prior ARTS (Studio) courses and/or permission of the instructor.

**ARTS 2988 Study Abroad Resident Credit (0-18 Credits)****ARTS 3055 Advanced Drawing (4 Credits)**

Working with a variety of materials and techniques, students hone their drawing skill and at the same time create finished drawings defined by content. Problems posed encourage independent thinking, experimentation and the development of a personal technical base. Lab Fee. Prerequisite: ARTS 2045 or ARTS 3065 or permission of instructor.

**ARTS 3065 Life Drawing (4 Credits)**

An intensive course in drawing the human figure, clothed and unclothed, to explore the human form in terms of proportion, movement, light and shadow, composition, color and personal expression. Students experiment with a range of materials. Lab Fee. Prerequisite: ARTS 1250 or permission of instructor.

**ARTS 3125 Figure Painting (4 Credits)**

An intensive course in painting the human body—the most timeless subject of art. Students work mainly in oils and experiment with a variety of surfaces and techniques. Students also investigate line, proportion, light and shadow, composition and color. Final project: life-size painting of two figures. Lab fee. Prerequisite: ARTS 2115 or ARTS 3065 or permission of instructor.

**ARTS 3145 Painting Workshop (4 Credits)**

Concentration on selected techniques and approaches to painting. Topics change. Course may be repeated to a maximum of 12 credits. Lab Fee.

**ARTS 3245 Printmaking Workshop (4 Credits)**

This upper-level course focuses on various topics and processes as the definition of contemporary printmaking evolves. Subjects such as lithography or intermediate screen printing, photo-based prints, or current themes relevant to printmaking are possible core formats for the course. Group and individual critiques, digital image presentations and examination of prints and reproductions. Lab fee. Prerequisites: sophomore standing and ARTS 1250 or permission of instructor. Art majors must also complete ARTS 1300 first. Course may be repeated to a maximum of 12 credits.

**ARTS 3347 Professional Practice (4 Credits)**

This course is required of BFA studio art majors and is open to BA art majors. It covers practical artist survival skills, including resume and cover letter writing, exhibition proposals, documentation of art work, artist statements, portfolio development and professional presentation of self and work. The course is reinforced by field trips and guest speakers who introduce both academic and non-academic art experiences and professions. Lab fee.

**ARTS 3348 Senior Practicum in the Visual Arts (4 Credits)**

Required for all studio BFA candidates. Students are expected to begin research and investigation for work that may be included in the BFA exhibitions. Emphasis is placed on a three-pronged assessment consisting of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.

**ARTS 3349 Senior Seminar in the Visual Arts (4 Credits)**

Required for all studio BFA candidates. Students pursue work individually and demonstrate a synthesis of ongoing research, demonstrate development and participate in structured weekly critiques with other studio BFAs and faculty. This work is a meaningful extension of fall and winter quarters and extends beyond the installation of BFA exhibition. Emphasis is placed on discussions and critiques centered on the three-pronged assessment initiated in winter quarter of Idea/Concept/Voice, Theory/History/Research and Craft/Technique. Lab fee.

**ARTS 3450 Portrait Photography (4 Credits)**

This course continues to build upon the concepts and techniques investigated in ARTS 2415 Introduction to Photography. The class focuses on the genre of photographic portraiture. Through labs and classroom lectures, many interpretations of portraiture are covered. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera with manual metering capabilities. Lab fee. Prerequisites: ARTS 2415 and any one of the following: ARTS 2425, ARTS 2435, ARTS 2440, ARTS 2445, or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

**ARTS 3452 Photography and Society (4 Credits)**

This course celebrates the enduring tradition of social documentary photography and visual storytelling. Participants will practice basic principles of photography, such as; camera, lighting and composition. Basics of Adobe Photoshop and Lightroom will be presented as post-production editing tools. Contemporary Social Documentary Photography practice will be positioned within the context of the history of photography. Emphasis will be on the production of socially engaged photography projects, from conception to print. Creation of a final portfolio will be required, either as an edited selection of prints, or published online. Creation of a personal website will be required. Community engaged collaboration will be a component of this course. Collaboration with another DU class may also be a component. No prerequisites. This course may satisfy one requirement for a Photography and Society Certificate. "Photography and Society." Students must have a digital camera with manual metering capability; contact the professor if you cannot meet this requirement.

**ARTS 3455 Photography Workshop: Alternative Processes in Photography (4 Credits)**

Concentration on selected techniques and approaches to photography. Topics change. Projects are viewed and discussed in critique sessions. Students must have a film or digital camera. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisites: ARTS 2415 Introduction to Photography or permission of the instructor (requires demonstrating proficiency in photography via a portfolio or website).

**ARTS 3555 Ceramic Workshop (4 Credits)**

Concentration on selected techniques and experimental approaches to ceramics. Topics change. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: ARTS 2515 or approval of instructor.

**ARTS 3635 Advanced Sculpture (4 Credits)**

This advanced course emphasizes the experiential and conceptual aspects of sculpture, and the interrelationship of ideas, form, material and technical means. Course content supports in-depth student research into contemporary art and fosters critical dialog. Lab fee. Prerequisites: ARTS 2615. Majors should complete the foundations sequence first (ARTS 1100, ARTS 1200, ARTS 1250, ARTS 1300).

**ARTS 3645 Advanced Mold Making & Casting (4 Credits)**

This course explores moldmaking and casting as a way to reproduce sculptural form and generate meaning. In this class, students are introduced to advanced techniques for reproducing form such as multiple part molds and rotocasting. Students hone their ideas by exploring the conceptual significance of material and form. Assignments teach technical skills while fostering conceptual development. Course content supports in-depth student research into contemporary art and fosters critical dialog.

**ARTS 3655 Sculpture Workshop (4 Credits)**

Concentration on selected techniques and experimental approaches to sculpture. Topics change. Course may be repeated to a maximum of 12 credits. Lab fee.

**ARTS 3701 Topics in Studio Art (4 Credits)**

Selected topics in advanced studio art research. Course may be repeated to a maximum of 12 credits. Lab fee. Prerequisite: instructor's permission.

**ARTS 3865 Senior Project: Conservation (4 Credits)**

Required for, and limited to, BFA pre-art conservation majors. It is normally taken spring quarter of the senior year. The student works with a professional art conservator on a major conservation project that will become part of his or her portfolio and will be exhibited in the senior BFA exhibition.

**ARTS 3915 Advanced Problems in Art (1-5 Credits)**

This course is for students who have completed all 3000-level courses in a given area of concentration to show proficiency and wish to pursue more advanced work. A proposal form must be obtained from the art office and signed by the instructor and the Director of the School of Art and Art History before the student registers for this course. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

**ARTS 3960 Conservation Internship (4 Credits)**

The internship is normally taken during the fall of a major's senior year, under the direction of a professional Conservator, either in private practice or in a conservation department. Students should work closely with their advisor to arrange the Conservation Internship during the quarter before it will be taken. The student works on a wide variety of materials and problems in conservation during this internship, gaining as varied an experience as possible and developing a professional portfolio. Must be a BFA major in Pre-Art Conservation.

**ARTS 3966 Studio Art Travel (1-4 Credits)**

A travel course to selected locations to visit galleries, museums and artists' studios. Location and content of course change. Variable credit. May be repeated to a maximum of 12 credits. Lab fee.

**ARTS 3980 Studio Art Internship (1-4 Credits)**

The student is responsible for locating the internship and gaining approval for it, using the internship guidelines and contract form in the art office. Typical internships have been located in commercial galleries, fine art printmaking houses, professional artists' studios and non-profit arts organizations.

**ARTS 3988 Study Abroad Resident Credit (0-18 Credits)****ARTS 3991 Independent Study (1-6 Credits)**

Supervised studies not addressed in this catalog of classes. Advanced projects must be faculty approved. Permission/registration form is available from the Office of the Registrar.

**ARTS 3995 Independent Research (1-10 Credits)****ARTS 3999 Exit Survey (0 Credits)**

All majors in the School of Art and Art History are required to register for ARTS 3999 during their final quarter of study at the University of Denver. The course is completed by taking the online exit survey. It does not bear credit; no tuition is assessed and no grade is given. Majors cannot graduate until they complete this requirement. The information from this anonymous survey is used by the school to improve its programs. We greatly appreciate our students' help in this regard.

**ARTS 4991 Graduate Independent Study (1-12 Credits)**

This course is for MFA candidates who wish to pursue graduate-level independent work under the guidance of a studio art faculty member. Permission of the student's graduate advisor and the studio art instructor must be obtained before enrolling. May be repeated to a maximum of 12 credits.

## Asian Studies Program

Office: Sturm Hall, Room 346A

Mail Code: 2000 E. Asbury Ave, Denver, CO 80208

Phone: 303-871-2554

Email: [orna.shaughnessy@du.edu](mailto:orna.shaughnessy@du.edu)

Web Site: <https://liberalarts.du.edu/asian-studies>

The Asian Studies Program takes a multi-disciplinary approach to the cultures, history, literature and languages of East Asia, with an additional focus on South Asian music and religion. We train students to think and write critically about Asian cultures; to conduct original research on issues that are relevant to one or more parts of Asia; and to develop international and intercultural knowledges and skills that are necessary in order to engage meaningfully with people and issues relevant to Asia.

Majors may find their training valuable in a wide range of careers, given that the tiny minority of graduates of American universities who are skilled in Asian languages and cultures rank among the most desirable employees for many public- and private-sector organizations. Careers for majors include government service, education, journalism, international business and any other job requiring knowledge of and cultural understandings about Japan or China. The academic training that majors receive is competitive with similar programs at peer institutions across the United States, providing a firm basis for applying to graduate programs.

Students are required to take at least two years of intermediate Japanese or Chinese, or another approved Asian language by special arrangement.

First-year language courses may not be used to fulfill this requirement. However, the requirement may be waived for transfer students who have already had at least three years of Asian language training or for students who demonstrate competency in the language. The requirement is also waived for native speakers of Japanese, Chinese or another approved Asian language; such students complete 60 credits of non-language study instead.

Asian Studies majors are strongly encouraged to study in Asia for up to one year; excellent programs exist in several Asian countries; the largest program offerings are in Japan. In many cases, students can use their financial aid and receive University of Denver course credit for successfully completing study abroad programs. Interested students should consult with their Asian Studies advisor and the Study Abroad Office.

A student wishing to pursue an Asian studies major must make an appointment with the program director, Orna Shaughnessy, who will serve as advisor to the student's main interests. The student meets quarterly with their advisor for approval of courses taken for the major.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

60 credits, including the following:

Code	Title	Credits
<b>Humanities</b>		<b>12</b>
Select three courses from the following:		
ARTH 1040	Sacred Spaces in Asia	
ARTH 2840	Survey of Asian Art	
CHIN 1516	Contemporary China in Literature and Films	
CHIN 1616	Asian Ecocinema and Ecoliterature	
CHIN 2516	Literary Chinatown: Stories of Chinese in America	
HIST 1250	Food in East Asian History	

HIST 1260	Modern South Asian History
HIST 2850	Imperial China
HIST 2870	Modern China
JAPN 1216	Popular Culture of Japan
JAPN 1416	Postwar Japan: Changing Perspectives in Literature and Culture
JAPN 2200	Multicultural Japan
JAPN 2450	Superflat: Postmodern Japanese Literature and Media
JAPN 2616	Cultures of Tokugawa Japan
JAPN 2700	Classical Japanese Women Writers: The Poets, Priestesses & Princesses in their Literary Golden Age
RLGS 2103	Religions of China & Japan
RLGS 2109	Religions of Tibet
RLGS 2110	Buddhism in the U.S.A.
RLGS 2114	Roots of Yoga and Tantra: Methodologies and Modern Practice
RLGS 2117	Religions of India

**Two years of intermediate and advanced Japanese, Chinese or another approved Asian language** **24**

**Advanced Coursework and Research** **8**

Select EITHER two courses below from the same discipline (e.g. two ARTH courses, or two CHIN, or two JAPN, or two RLGS), OR any class from the list below PLUS ASIA 3901. Note that ASIA 3901 requires permission by the Director of Asian Studies

ARTH 3840	Sacred Arts of Asia
ARTH 3864	Buddhism(s) and Arts
ASIA 3901	Asian Studies Directed Readings
ASIA 3902	Asian Studies Senior Thesis
CHIN 3300	Chinese Society in Transition
CHIN 3400	Chinese Cinema and Chinese Society
HIST 3875	Chinese Science and Global History
JAPN 3701	Topics in Japanese Culture
JAPN 3782	Cosmopolitan Cosplay: Japanese fashion, costume and sartorial expression
JAPN 3800	Robots and Posthumanism in Japanese Visual Culture
JAPN 3810	Sexuality and Gender in Japanese Culture
JAPN 3820	Frogs in a Pond: Japanese Translation Theory and Practice
RLGS 3814	Modern Hinduism
RLGS 3832	Religious Lives: The Dalai Lamas
RLGS 3820	Buddhism
RLGS 3893	Buddhism and Social Justice
RLGS 3898	Dharamsala: Myth, Land, and Traditions

**Electives** **16**

Select four courses from the following list. Alternatively, you may choose courses listed in the "Humanities" or "Advanced Coursework and Research" categories above but not already used to fulfill the required credits in those categories. An ASEM counted as an Asian Studies elective cannot also be used to fulfill the common curriculum ASEM requirement:

ASEM 2510	India: Caste/race/religion
ASEM 2532	Death & Dying in Hindu Traditions
ASEM 2606	Japanese Film
ASEM 2646	Dance in India
ASEM 2777	Stranger Things – Monsters, Spirits, and the Supernatural from Asia
ECON 2330	China and the Global Economy
ECON 2510	The Asian Economies
PLSC 1110	Comparing Politics around the World
PLSC 2200	Politics of China
PLSC 2220	Comparative Democratization: East and West
PLSC 2260	Politics of Japan

**Total Credits**

**60**

## Minor Requirements

24 credits, including the following. Please consult the list of courses under the major requirements above for approved Asian Studies courses. Note: Up to eight credits of intermediate or advanced language study may be used to fulfill requirements for the minor.

Code	Title	Credits
<b>Humanities</b>		<b>12</b>
Select three courses from the following:		
ARTH 1040	Sacred Spaces in Asia	
ARTH 2840	Survey of Asian Art

## Requirements for Distinction in the Asian Studies Major

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Nomination by an Asian Studies faculty member or the program director
- Submission of a portfolio of representative work completed in the major
- Completion of a thesis project that goes beyond a normal Asian Studies senior thesis

## BA in Asian Studies

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111		4 WRIT 1122		4 WRIT 1133	4
SI Natural sequence		4 SI Natural sequence		4 SI Natural sequence	4
SI Society		4 AI Society or SI Society		4 AI Society or SI Society	4
Language sequence <sup>1</sup>		4 Language sequence <sup>1</sup>		4 Language sequence <sup>1</sup>	4
	16		16		16
Total Credits: 48					

**Second Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
Language sequence <sup>1</sup>		4 Language sequence <sup>1</sup>		4 Language sequence <sup>1</sup>	4
Approved RLGS Course		4 AI Natural		4 Major Elective	4
Minor or Elective		4 Major Elective		4 Minor or Elective	4
INTZ 2501 <sup>2</sup>		2 Minor or Elective		4 Minor or Elective	4
		<b>14</b>		<b>16</b>	<b>16</b>
<b>Total Credits: 46</b>					

<sup>1</sup> Majors are required to take two years of intermediate and advanced Japanese, Chinese or another approved Asian language. Please note that 1st-year language study may NOT be counted for credit toward the major.

<sup>2</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

**ARTH 1040 Sacred Spaces in Asia (4 Credits)**

This course explores a variety of natural and man-made "Sacred Spaces" as it introduces the civilizations and major artistic traditions of India, China and Japan. Illustrated lectures consider public and private environments, their philosophical contexts and religious functions as well as the changing nature of their use and perceived meanings over time. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 2840 Survey of Asian Art (4 Credits)**

An introduction to major monuments, traditions and civilizations of India, China and Japan. This class may be used to fulfill the non-Western requirement for majors in the School of Art and Art History. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 3864 Buddhism(s) and Arts (4 Credits)**

This survey examines the history, practices, ritual contexts, aesthetics and artistic traditions of Buddhism including architecture, calligraphy, sculpture and painting, in terms of its social and historical context, political and religious functions, as well as issues including artistic production, changing techniques and symbols, and the market/audience. The primary goal is to understand Buddhism as reflected in art and culture.

**ASEM 2479 Environmental Culture in East Asia (4 Credits)**

This course explores current environmental and ecological challenges in major East Asian countries such as Korea, Japan, China and Taiwan through the lens of ancient and contemporary cultural and philosophical traditions. The course examines 1) primary traditional Asian philosophic and religious concepts about Nature, such as Confucianism, Taoism, and Buddhism, as well as traditional literatures and arts that reflect those concepts; 2) contemporary eco-literature and eco-cinema that function as responses to, and critical reflections of, the urgent environmental crises in those countries; 3) cultural practices that are officially, communally, or privately implemented for eco-preservation and environmental-protection. Prerequisite: Completion of all other Common Curriculum Requirements.

**ASEM 2532 Death & Dying in Hindu Traditions (4 Credits)**

This course explores the meanings of death and dying in Hindu perspectives. The inevitability of death has led cultures throughout the world to speculate on what happens to the individual during, at the moment of, and after death. Until the modern period, religions have typically been the first or only place where people turned for answers to basic questions of existence: What happens at death? Will I and the people I love disappear forever? Or will we continue on after death in some way? Is this the only life we have? What is the relationship between the life we lead now and what happens at and after death? These kinds of universal questions have led to culturally specific and conditioned answers and speculations, some of which we will examine in this course.

**ASEM 2606 Japanese Film (4 Credits)**

This course examines some of the most iconic films in the Japanese cinematic tradition in order to identify and critically engage in narratives of Japanese aesthetics and cultural identity, especially ones that take culture as the site for locating tradition and/or modernity. No previous knowledge of Japanese or film required.

**ASEM 2646 Dance in India (4 Credits)**

As a discipline in which the body is trained to become "naturalized" in very specific ways, dance tells us much about the culture in which it is a part. Dance movements and meanings also become sites of conflict during periods of cultural transition, and yet because of dance's ephemeral nature, its relative adherence to tradition, or lack thereof, is difficult to ascertain, and thus often hotly contested. This course explores the tension between change (innovation) and continuity (tradition) in four different forms of dance from the Indian subcontinent: Bharata Natyam, a classical dance form from South India; Kathak, a classical dance form from North India; Bhangra, a folk dance form from Northwestern India; and the mass-mediated, syncretic form of dance predominant in the Bollywood film industry.

**ASEM 2777 Stranger Things – Monsters, Spirits, and the Supernatural from Asia (4 Credits)**

Following the Enlightenment, our modern world is supposed to be disenchanted. Supernatural beings no longer dwell among us, and individuals are governed by the principles of reason and secularism. But we know from our everyday life that modern people remain fascinated by the fantastic, the grotesque, and the monstrous. From many Asian cultures, the encounter between traditional beliefs and Western modern rationality has been historically complicated by even more extrinsic factors: colonial rule, diasporic movements, authoritarian experiences, and the Cold War. More recently, Asian naturalist thinking and philosophies are touted as a critical alternative to the environmental exploitation and the ecological crisis resulted from our capitalist present. On the other hand, religious extremism and ethnonationalism are also implicated in the anything-but-secular political life of many Asian countries. Drawing from history, anthropology, and studies of literature, cinema, visual arts and video games, this class explores how seemingly irrational, supernatural beliefs and pious practices permeate Asia's modern life as creative imaginaries and criticisms about society, as images of monstrosity channel social outcasts and marginal voices.

**ASIA 3701 Topics in Asian Studies (1-4 Credits)**

Specialized topics in Asian Studies. Topic varies per offering. Check with the Asian Studies program director for more information. Open to majors and non-majors May be repeated for credit.

**ASIA 3901 Asian Studies Directed Readings (4 Credits)**

Students will read deeply in a specific field of scholarship directed by a core faculty member in the Asian Studies program and will write a methodological essay that discusses the scholarship in their chosen field of research. This is the first part of a required, two-quarter sequence that will culminate in the senior thesis. Enrollment is restricted to Asian Studies majors.

**ASIA 3902 Asian Studies Senior Thesis (4 Credits)**

Students will pursue a primary document research project under the supervision of their core faculty member in Asian Studies. The goal of this course is the writing and completion of the senior thesis in Asian Studies. Prerequisite: ASIA 3901.

**ASIA 3980 Asian Studies Internship (1-4 Credits)**

Provides academic credit for off-campus internships in areas related to the Asian Studies major. The purpose of the internship is the gain valuable work experience, explore various career options, develop job competencies and/or apply theoretical knowledge to practical concerns of the world. Must be an Asian Studies major and have cumulative GPA of 3.0 and have taken at least two Asian Studies content courses, not counting language training. Requires approval of Asian Studies director.

**ASIA 3991 Independent Study (1-4 Credits)****CHIN 1116 Exploring Chinese Popular Culture (4 Credits)**

Culture is a very broad and multifaceted topic. Culture is about everything, including language, art, customs, food, political and education structures, and so on. This course introduces students to Chinese popular culture through the lens of Chinese food, social media, TV shows, pop music, sports and education. Students will engage in reading and viewing texts of various media (e.g., book chapters, news articles, social media posts, television episodes, documentaries) and discussing the practices, beliefs, and stories of ordinary Chinese people. Through the in-depth exploration of a broad range of topics, students will be able to develop a deeper understanding of Chinese culture, identify and analyze the connections between Chinese culture and their personal experience, critically reflect on their own culture, and demonstrate awareness of cultural diversity. No prior knowledge of Chinese language is required. This course counts towards the Analytical Inquiry: Society and Culture requirement.

**CHIN 1516 Contemporary China in Literature and Films (4 Credits)**

This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)**

Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecoliterature and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 2516 Literary Chinatown: Stories of Chinese in America (4 Credits)**

As the oldest diasporic enclave of Chinese in the United States, Chinatown has been both a physical and historical site where Chinese immigrants have built a community and a continually contested symbolic space represented in Chinese American literature. Literary Chinatown explores the intersection of history, geography, and literature through the myriad ways of Chinatown stories by major authors in Chinese American literature across the period from the early 20th century until the contemporary moment. The focus lies on unraveling the intricate relationship between space, place, and identity, tracing the complexities of being Chinese in America at pivotal historical junctures that shed light on the U.S. nation-building process—its rejection, accommodation, and incorporation of Chinese lives. These literary works set the stage for examining the impact of war, imperialism, (neo)colonialism, and globalization on immigration, alongside domestic issues of race, class, gender, and ethnicity. We aim to unravel the Chinese American experience as portrayed in its literary recreations of Chinatown memory, fantasy, narrative, and myth within Chinese American literature. We also brought scholarly discourse on the intersectional and comparative approaches to the study of race, culture, politics, and place in Chinese American literature. The course will entail a class walking tour of the historical Chinatown area in Denver. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 3650 Chinese-English Translation I (4 Credits)**

This seminar is designed for students with advanced-level proficiency in Chinese and English to learn basic translation theories and to develop fundamental skills in translating, from Chinese to English and vice versa, texts which primarily deal with general social needs and everyday communications. Prerequisite: CHIN 3300 or above, equivalent, or permission of instructor.

**CNP 1850 Counseling Psychology: Asian American Psychology (4 Credits)**

In this course, we will examine psychological theory and research centered on Asian American individuals and the community, including the historical, sociopolitical, cultural, and interpersonal processes that shape the psychological experience. Although we will sometimes be discussing “Asian Americans” and general trends in this class, it is important to recognize that Asian Americans are not a monolithic group, but rather are many different groups and individuals with diverse historical and cultural backgrounds. We begin the course by exploring the history of Asian Americans in the US (e.g., immigration, communities), as well as the history, evolution, and methodologies of the field of Asian American Psychology. We then engage in an in-depth discussion of various prominent social stereotypes faced by Asian Americans, such as the Model Minority Myth (MMM), being seen as a perpetual foreigner, and so on. We also discuss what an Asian American identity entails, and the acculturation/enculturation process of bicultural and multicultural individuals. Later in the course, we visit topics such as gender and sexuality, mental health, relationships with other minoritized groups, and end the course with current issues (e.g., anti-Asian American racism during the COVID-19 pandemic).

**ECON 2330 China and the Global Economy (4 Credits)**

This course provides a comprehensive overview of the Chinese economy and China's role in the global economy. The course covers the economic interactions between China and the world economy over the past two centuries, evaluates ongoing social, economic and environmental challenges, and evaluates future development possibilities for China and the global economy as a whole. The topics addressed include: the Chinese economy before 1949; the socialist era, 1949-1978; economic reform and market transition; the role of state enterprises; foreign investment; foreign trade; China's role in the global imbalances; the impact of the recent global economic crisis. Prerequisite: ECON 1030.

**ECON 2510 The Asian Economies (4 Credits)**

This course is based on a comparative approach, examining several Asian economies' colonial background, their primary producing sectors, the developmental state in these countries, attempts at industrialization, trade policies, technological development, liberalization to attract foreign capital, currency and financial crises. Prerequisite: ECON 1030.

**HIST 1250 Food in East Asian History (4 Credits)**

This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1260 Modern South Asian History (4 Credits)**

This course will explore the modern history of the subcontinent, through the colonial experience to the postcolonial construction and division of nations, with a particular focus on India, Pakistan, and Bangladesh (although students are also welcome to take on optional readings on Sri Lanka, Afghanistan, and Nepal, among others). The course will consider the legacy of colonialism in India, and debates over whether postcoloniality is really “post.” We will explore the history of nationalisms – state, ethnic, religious, and linguistic – and the ramifications of Partition and the wars over Bangladesh and Kashmir. This course will also explore the history of South Asia in the rest of the world, through the migration of its diaspora and its role in the Bandung moments of Afro-Asian solidarity in the global struggle against oppression. We will take into account discourses regarding tradition and modernity, democracy and secularity, and the terms “freedom” and “terror” – and what this means for the lived experiences of South Asians in today's world. Readings will include historical accounts, theoretical texts, films and literature, as well as primary sources. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2335 Early Islamic Empires in Comparative Perspective, 632 CE - 1300 CE (4 Credits)**

This course looks at the social, economic, political, and environmental histories of Islamic empires from the 7th through the 13th centuries CE. In doing so, this course also examines how early Islamic empires ruled over both Muslim and non-Muslim, especially Christian and Jewish, populations. Additionally, this course aims to compare these Islamic empires with non-Islamic Afro-Eurasian empires from the same general time periods. Students should be aware that this course will not cover every early Islamic empire but will adopt a case-study approach, meaning the professor will select key empires to examine.

**HIST 2870 Modern China (4 Credits)**

In this class we focus on China from the nineteenth century to the present. We examine historical change and continuity, including the revolutions that created the Republic of China and the People's Republic of China, the transformation of traditional values, economic liberalization in the post-Mao Zedong era, and the challenges that China has faced in recent years.

**HIST 2940 Sports and Empire (4 Credits)**

This course will look at the history of sports and colonialism over the past two centuries, considering the ways in which imperialism led to the dissemination of Western sporting traditions and culture to the global south, focusing in particular on British and French colonies in Africa and Asia (although we also take a few trips to the Caribbean, too). Each week, we will look at the history of a different sport, including cricket, tennis, soccer, golf, rugby, and hockey, and explore the intersection of race, class, and gender in how these sports were played and transformed in the imperial world. We will consider the ways in which sport was used not only as an element of the racialized "civilizing" mission of imperial ventures, but also how sport was coopted by indigenous populations to resist colonial structures of segregation and oppression. This class will ask us to reconsider the intersections and divergences in the way sports are both played and viewed by national sporting teams, local leagues and schools, and transmitted to audiences through live viewing, television, radio, and other forms of media. We will also look at the representations of sports and colonialism through films, fiction, and television shows. Finally, we will analyze the postcolonial legacies of colonial sporting cultures after decolonization, looking at the ways in which countries in the global south have taken over transnational leagues and institutions to make what were once colonial and European-dominated sporting cultures their own.

**HIST 3875 Chinese Science and Global History (4 Credits)**

This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected.

**JAPN 1216 Popular Culture of Japan (4 Credits)**

In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)**

This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world. Prerequisites: JAPN 1001.

**JAPN 2200 Multicultural Japan (4 Credits)**

Multiculturalism in Japan has evolved significantly over the years, reflecting a blend of historical influences and contemporary shifts. Historically, Japan has been considered relatively homogeneous, with its diversity largely shaped by interactions with neighboring countries such as China and Korea. However, in the modern era, Japan has increasingly embraced multiculturalism, evidenced by its growing acceptance of foreign residents and international influences. The Japanese government and society have made strides in recognizing racial and ethnic diversity, though challenges remain, particularly for marginalized groups such as the Ainu, Ryukyans, and other minorities. Gender diversity has seen notable progress, with movements advocating for gender equality and the rights of women gaining momentum, despite persistent traditional norms. Additionally, LGBTQ+ rights have been gradually advancing, with increasing visibility and legal recognition for sexual orientation and gender identity issues. Geographic diversity is also notable, with distinct cultural identities preserved in regions like Hokkaido and Okinawa, enriching the nation's multicultural fabric. The ongoing dialogue around race, gender, and sexual orientation continues to shape a more inclusive and varied Japanese society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2400 Hey, Girl, Hey: Japanese Girlhood from the Moga to Shōjo (4 Credits)**

This course explores the figure of Japanese girlhood from the Moga "modern girl" of the early twentieth century to the contemporary figure of the shōjo. Japanese cultural production has had a significant impact on East Asian girl's media in the pre-war period and again in the post-war to contemporary period. The course will explore the "modern girl" in all her iterations, from European modernism to East Asia, Africa, and the Americas, especially in the contexts of colonialism and nationalism. The course also considers the roles of girls and women in the formation of the modern state(s) and contemporary societies across East Asia, and juxtapose those roles to how girls and women are depicted in fiction and media. Students will trace the transition from the comparative modernisms legible in the figure of the moga to the transnationally circulated figure of the shōjo.

**JAPN 2450 Superflat: Postmodern Japanese Literature and Media (4 Credits)**

When Yoshimoto Banana won the prestigious Kaien Newcomer Writers prize in 1989, the head of the judging panel said of her novel *Kitchen*: "[Kitchen's] naïve rejection of the very question of whether it does or does not conform to conventional concepts [of literature] is precisely what makes it strike me as a new sort of literature." As confounding as *Kitchen* was for literati, it struck a chord not just within Japan but also without, ushering Japan's postmodern literary movement. Yoshimoto, Murakami Haruki, Kanehara Hitomi, Sayaka Murata, and many more globally famous Japanese writers often write in this vein, a vein in which the effusive and maudlin introspection of previous literary generations is set aside in favor of an amorphous, consumerist literary style that might best be described by Murakami Takashi's contemporary "superflat" artwork. In this class, through literature, visual arts, and film media, students will consider conceptions of "postmodern" in the context of Japan. What is this "new sort of literature?" Why did it emerge in the 80s and why has it persisted? Why do these works seem to circulate so well on the global market, even as critics in Japan have expressed dismay at their "naïve rejection" of what came before? By considering aspects of aesthetics, affect, consumerism, we will explore this "postmodern" "superflat" media landscape and discuss how it impacts our experiences in and of the world, especially in the realm of popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2500 Cultures of the Floating World (4 Credits)**

During the Edo period (1600-1868), the literature and visual culture of Japan flourished after centuries of devastating warfare. The floating world of kabuki theaters, woodblock print culture, and the pleasure quarters arrested the imagination of the populace and attracted the unwanted attention of governmental authorities. Over the course of the Edo period, the shogunal government expelled Christians from Japan, the city of Edo became the largest in the world, and woodblock print culture spread throughout the Japanese archipelago. Through reading various genres of literary and cultural production, students will explore how society shapes culture and culture shapes societies. Topics include: premodern literary representations of love and eros, the emergence of the "floating world print" (*ukiyo-e*), Christians as Others, representing landscapes and the past in haikai poetry and prose, early modern comic books, and vendetta stories. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2700 Classical Japanese Women Writers: The Poets, Priestesses & Princesses in their Literary Golden Age (4 Credits)**

The course explores the extraordinary female-centered belles-lettres of classical Japanese literature, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, *zuihitsu* and personal essays, the classic *Tale of Genji*, and literature of religious hermetic and travel diaries. The course will critically consider how women writers were able to flourish in this period and interpret their literary output through a consideration of the cultural and historical context for the texts. This course will also deploy principles of literary analysis and interpretation.

**JAPN 3701 Topics in Japanese Culture (4 Credits)**

Selected topics in Japanese culture. Texts and films in both Japanese and English, with a focus on modern and contemporary Japanese culture. May be repeated for credit. Prerequisite: JAPN 3100 or equivalent.

**JAPN 3800 Robots and Posthumanism in Japanese Visual Culture (4 Credits)**

Automata and robots lumber, glide, rampage and ambulate their way through Japanese visual culture. Robots, cyborgs and other posthuman bodies and subjectivities have offered visions of new future worlds and have critiqued past and present social conditions. In this course, students will investigate representations of robots and posthumans in Japanese visual culture of the 20th and 21st centuries. Completion of JAPN 2003 or equivalent required.

**JAPN 3810 Sexuality and Gender in Japanese Culture (4 Credits)**

Sexuality and Gender in Japanese Culture is designed for students who have completed JAPN 2001-2003 or the equivalent. In this class, we will focus on developing reading, discussion, speaking, and critical thinking skills centered around representations of gender and sexuality in Japanese culture. Students will read texts by poets, critics, manga artists, and bloggers. In doing so, students will not only expand their critical vocabulary in Japanese, but also critically contend with representations of gender and sexuality in the Japanese context. Prerequisite: JAPN 2003 or equivalent.

**JAPN 3820 Frogs in a Pond: Japanese Translation Theory and Practice (4 Credits)**

This course takes a multi-pronged approach to literature and translation, considering aspects of translation theory, methodology, and practice; literature in translation; and the function of translation in global dynamics of canon, colonization, power, and literary stylistics. With a language like Japanese, which shares no linguistic roots with European languages, questions of translation are magnified and problematized by linguistic difference, histories of Orientalism and colonization, and fundamentally different literary aesthetics, especially in literatures of premodern Japan and early modern Europe. Questions this course considers include: with what modes of translation practice might we approach Japanese literature? How has the translation of European literature into Japanese impacted Japanese literary aesthetics and vice versa? How might we more equitably represent Japanese literature to a global Anglo audience? By what processes does the business of translation occur and how do those processes impact the actual production of literary canon and study? This class requires Japanese language ability of intermediate and higher. Prerequisites: JAPN 1416 and JAPN 2003 or equivalent required.

**MUEN 3041 North Indian Classical Ensemble (0-1 Credits)**

The arts of India are distinguished by their close interrelationship; rhythm, melody and movement are all encompassed by the term "sangeet." In keeping, DU's North Indian Classical Ensemble is dedicated to the practice of all three of these arts, through singing, rhythmic recitation and dance. Participation in this ensemble involves studying the ornate and highly refined systems of Hindustani music and Kathak dance. No prior experience is necessary; all that is required is a positive attitude and a desire to learn!.

**PLSC 1110 Comparing Politics around the World (4 Credits)**

This course introduces students to the study of comparative politics, a sub-field within political science that uses a "comparative method" to compare and contrast countries to understand questions such as Where do 'states' come from? Why are only some democratic? How do states promote economic development? Why are some states increasingly rich while others remain poor? Why do people mobilize peacefully to influence politics in some places while they violently attack the established order in others? How do distinct identities rooted in ethnicity, gender, race, and religion influence politics differently around the world? How does globalization affect various countries, and why do some seem to cope with contemporary challenges more effectively than others? This course counts toward the "Scientific inquiry: Society and culture" requirement.

**PLSC 2200 Politics of China (4 Credits)**

Napoleon Bonaparte allegedly said, "let China sleep, for when she wakes up, she will shake the world." Two hundred years later, China is indeed waking up, and the world is feeling the dragon's hot breath. In this class we will examine the fall and rise of the Chinese state, with a focus on its political and economic trajectories after the founding of the People's Republic of China (PRC) in 1949. Some of the key issues to be examined are: China's "economic miracle," when, if ever, will China democratize, its potentially explosive relations with Taiwan, its challenges to America's global hegemony, etc.

**PLSC 2220 Comparative Democratization: East and West (4 Credits)**

This course brings the contested notion of democratization into the East Asian context and tests its relevance for countries at various stages of political and economic development in the region. After introducing the general debates over what democratization is and tracing its emergence in Western Europe and North America, class explores the rise of democratization movements in East Asia and examines the various forms of democratization in different political and economic settings. Satisfies the department distribution requirement in comparative/International politics. Prerequisite: Sophomore standing.

**PLSC 2260 Politics of Japan (4 Credits)**

How did Japan rapidly catch up with more advanced industrial powers? Can other developing countries copy the Japanese model? What was the "darker side" behind Japan's economic miracle? How do we come to terms with the sudden burst of Japan's "Bubble Economy?" Will Japan's current economic recovery process, which started in 2002, be sustainable? Is a genuine international reconciliation between Japan and its neighbors possible? These are just some of the questions we will examine in this class. Prerequisite: sophomore standing.

**RLGS 2103 Religions of China & Japan (4 Credits)**

This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2109 Religions of Tibet (4 Credits)**

This course explores the religious terrain of Tibet by looking at the historical and cultural development of the four main Tibetan Buddhist traditions: Nyingma, Sakya, Kagyu and Geluk, as well as the indigenous religion called Bon. Topics include the sacred landscape of Tibet; key doctrinal features; cultural artifacts like sacred biographies, art, and poetry; the 20th-century spread of Tibetan Buddhism from the Himalayas to North American communities; the future of Tibetan Buddhism in exile; and China and the West. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2114 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)**

This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the guru/shi#ya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2117 Religions of India (4 Credits)**

This course introduces students to the religions of India, which include Jainism, Buddhism, Islam, Sikhism, Christianity, Judaism, and Hinduism. These religious traditions are distinct but always in dialogue and often in competition with one another. Students will explore how different religious communities intersect and overlap in different contexts and historical periods, including in religious spaces: temples, monasteries, pilgrimages sites, and sacred spaces. Students will learn about histories, rituals, and literature, with a focus on lived religions, past and present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)**

This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions in the context of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the deified "feminine" and the construction of gender within modern South Asia. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 3814 Modern Hinduism (4 Credits)**

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism.

**RLGS 3820 Buddhism (4 Credits)**  
Buddhist life and thought from origins to present in India, Tibet, Japan and China.

**RLGS 3832 Religious Lives: The Dalai Lamas (4 Credits)**  
This course explores the many lives of the Dalai Lamas and the transformation of a reincarnated religious teacher into the political leader of Tibet and, eventually, a worldwide religious personality. In order to understand that transformation, the course investigates the institution of the Dalai Lamas from historical, doctrinal, and ritual perspectives. We will look at the role of the Dalai Lama as an embodiment of the bodhisattva of compassion at the center of a tapestry of religious ceremony and ritual performances. The course will also consider the religious, ethical, and political thought of several of the most prominent Dalai Lamas, with significant attention given to the writings and work of the current, fourteenth, Dalai Lama.

**RLGS 3893 Buddhism and Social Justice (4 Credits)**  
This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

**RLGS 3898 Dharamsala: Myth, Land, and Traditions (4 Credits)**  
This course explores the myths and stories that root cultural, religious, social and political traditions in the material landscape of India. It will explore the sacred spaces, images, rituals, and belief-traditions of the Himalayan region surrounding Dharamsala, India. As a study-abroad course, the materials, site visits, and community-engaged learning projects interrogate how myths operate as both cultural "glue" and demarcations of difference. Students participate in community-engaged learning placements to learn how myth creates and fosters cultural communities. Through site visits and readings we will learn how the "lived experience" of cultural belief-traditions, social and political practices, and sacred images and spaces are products of a unique marriage of land, story, and community. We will also have lectures and a Canvas site with pre-travel readings that will prepare you for the cultural and social belief-traditions we will encounter within Dharamsala. While in India, we will continue to read about ritual, devotion, stories of the land, social and political identities rooted in the land, and more. This course will be cross-listed with INTS for undergraduate and graduate elective credit.

# Biological Sciences

Office: F.W. Olin Hall, Room 102  
Mail Code: 2190 E. Iliff Ave. Denver, CO 80208  
Phone: 303-871-3661  
Fax: 303-871-3471  
Email: [biology@du.edu](mailto:biology@du.edu) ([Biology@du.edu](mailto:biology@du.edu))  
Web Site: <http://biology.du.edu> (<https://www.du.edu/nsm/departments/biologicalsciences/>)

The Department of Biological Sciences offers five distinct life sciences majors provided by a nationally recognized faculty that excels in teaching and research. Many faculty members have received University and nation-wide recognition for outstanding teaching. Research programs are funded by grants from agencies such as the National Institutes of Health and the National Science Foundation.

The innovative and highly integrated curriculum provides a sound foundation in molecular, cellular, developmental, organismal, ecological and evolutionary biology. The curriculum prepares students for futures in medicine, dentistry, veterinary medicine, graduate programs in the life sciences, graduate programs in health-related fields like physical therapy or physician assistant programs, ecology, evolutionary biology, conservation biology and science education at the secondary school level.

## Programs of Study from the Department of Biological Sciences

The department offers majors in the following areas: biological sciences, molecular biology, physiology in health and disease, ecology and biodiversity, and integrated sciences. We also offer minors in biological sciences and human health science and systems.

# Biological Sciences

The Biological Sciences major provides a curriculum that encompasses the spectrum of disciplines in the life sciences.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

45 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5

BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab	5
Additional Biology electives at the 2000 or 3000 level <sup>1</sup>		20
<b>Total Credits</b>		<b>45</b>

### Additional Requirements

Code	Title	Credits
------	-------	---------

The BA in Biological Sciences requires either one year of Chemistry or a minor in Chemistry. In addition, eight credits of Mathematics is required.

#### Chemistry

Chemistry coursework requirements include: 12-20

CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	
CHEM 2000 or 3000 level course (at least 4 credits)		

#### Mathematics

Select one of the following combinations: 8

MATH 1951 & MATH 1952	Calculus I and Calculus II	
or		
MATH 1951 & BIOL 2090	Calculus I and Biostatistics	
or		
MATH 1951 & PSYC 2300	Calculus I and Introduction to Statistics	

**Total Credits** 20-28

<sup>1</sup> Only five credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the credit requirement for the major.

## Bachelor of Science - Biological Sciences Major Requirements

(183 credits required for the degree (p. 100))

45 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab	5

Additional Biology electives at the 2000 or 3000 level <sup>1</sup>	20
<b>Total Credits</b>	<b>45</b>

### Additional Requirements

Code	Title	Credits
------	-------	---------

Two minors are required for the BS in Biological Sciences, one of which must be Chemistry. In addition, one year of Physics and one year of Mathematics is required.

#### Chemistry

A chemistry minor is required. Refer to the Department of Chemistry and Biochemistry	20
--	----

#### Physics

One year of Physics with lab. Select one of the following:	15
--	----

PHYS 1111 & PHYS 1112 & PHYS 1113	General Physics I and General Physics II and General Physics III
---	--

or

PHYS 1211 & PHYS 1212 & PHYS 1213	University Physics I and University Physics II and University Physics III
---	---

#### Mathematics

One year of Mathematics. Select one of the following:	12
---	----

MATH 1951 & MATH 1952 & MATH 1953	Calculus I and Calculus II and Calculus III
---	---

or

MATH 1951 & MATH 1952 & BIOL 2090	Calculus I and Calculus II and Biostatistics
---	--

or

MATH 1951 & MATH 1952 & PSYC 2300	Calculus I and Calculus II and Introduction to Statistics
---	---

<b>Total Credits</b>	<b>47</b>
----------------------	-----------

<sup>1</sup> Only five credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the 45-credit requirement for the major.

## Molecular Biology

The Molecular Biology major features upper-division courses that share the common theme of gene expression in biological systems and cellular function. This major is intended for students interested in professional postgraduate programs (medicine, dentistry, veterinary medicine), graduate programs in the life sciences and careers in the biotech industry.

### Bachelor of Arts - Molecular Biology Major Requirements

(183 credits required for the degree (p. 97))

44 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
BIOL 3800	Human Molecular Biology	4

BIOL 3560	Molecular Biology Laboratory	4
<b>Category Elective Courses (minimum of three courses)</b>		<b>12</b>
BIOL 3145	Cellular and Molecular Biology of Cancer	
BIOL 3150	Intracellular Dynamics	
BIOL 3160	Biophysics: Ion Channels & Disease	
BIOL 3570	Proteins in Biological Systems	
BIOL 3610	Developmental Biology	
BIOL 3615	Blood Vessel Development and Disease	
BIOL 3630	Cell Biology of Development	
BIOL 3640	Introductory Neurobiology	
BIOL 3642	Neuropharmacology	
BIOL 3648	Molecular Mechanisms of Neurological Disease	
BIOL 3650	Endocrinology	
BIOL 3656	Cellular Aspects of Diabetes and Obesity	
BIOL 3670	Molecular Immunology	
BIOL 3675	Virology	
BIOL 3690	Cellular Microbiology	
BIOL 3701	Topics in Genetics	
BIOL 3703	Advanced Topics in Developmental Biology	
BIOL 3704	Advanced Topics in Cell Biology	
BIOL 3705	Advanced Topics in Molecular Biology	
BIOL 3850	Genetic Engineering	
BIOL 3855	Genetic Model Organisms in Health & Disease	
BIOL 3910	Viruses & Infectious Human Diseases	
Any 3000-level BIOL course, may include category electives from above. <sup>1</sup>		4
<b>Total Credits</b>		<b>44</b>

### Additional Requirements

Code	Title	Credits
The BA in Molecular Biology requires a minor in Chemistry. In addition, eight credits of Mathematics is required.		
<b>Chemistry</b>		
A Chemistry minor is required, see Department of Chemistry and Biochemistry.		20
<b>Mathematics</b>		
Select one of the following combinations:		8
MATH 1951 & MATH 1952	Calculus I and Calculus II	
or		
MATH 1951 & PSYC 2300	Calculus I and Introduction to Statistics	
or		
MATH 1951 & BIOL 2090	Calculus I and Biostatistics	
<b>Total Credits</b>		<b>28</b>

<sup>1</sup> Only five credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the credit requirement for the major.

## Bachelor of Science - Molecular Biology Major Requirements

(183 credits required for the degree (p. 100))

50 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
BIOL 3800	Human Molecular Biology	4
BIOL 3560	Molecular Biology Laboratory	4
<b>Category Elective Courses (minimum of three courses)</b>		<b>12</b>
BIOL 3145	Cellular and Molecular Biology of Cancer	
BIOL 3150	Intracellular Dynamics

or	
MATH 1951 & MATH 1952 & PSYC 2300	Calculus I and Calculus II and Introduction to Statistics
<b>Total Credits</b>	
<b>47</b>	

<sup>1</sup> Only five credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the credit requirement for the major.

## Ecology and Biodiversity

The Ecology and Biodiversity major focuses on topics in the life sciences at the organismal, genomic and ecosystem levels. It is intended for students interested in graduate programs or careers in ecology, conservation biology, evolution or environmental sciences.

### Bachelor of Arts - Ecology and Biodiversity Major Requirements

(183 credits required for the degree (p. 97))

44 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
<b>Field course requirement</b>		
BIOL 3055	Ecology of the Rockies	4
<b>Category elective courses</b>		
Select four courses from the following		16
BIOL 2320	Andean Landscapes	
BIOL 2825	Biogeographies of Conservation in Serengeti & Zanzibar	
BIOL 3007	Computing for Biologists	
BIOL 3009	Scientific Writing	
BIOL 3010	Evolution	
BIOL 3035	Invasive Species Ecology	
BIOL 3074	Forest Ecology	
BIOL 3076	Ecosystem Ecology	
BIOL 3085	Insect Ecology	
BIOL 3090	Microbial Ecology	
BIOL 3095	Global Change Ecology	
BIOL 3110	Special Topics: Biology	
BIOL 3120	General Microbiology	
BIOL 3253	Environmental Physiology of Animals	
BIOL 3350	Conservation Biology	
BIOL 3410	Animal Behavior	
BIOL 3700	Topics in Ecology	

Additional Biology electives at the 2000 or 3000 level <sup>1</sup>	4
---	---

<b>Total Credits</b>	<b>44</b>
----------------------	-----------

### Additional Requirements

Code	Title	Credits
<b>Chemistry</b>		
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
<b>Mathematics</b>		
8 credits of Mathematics are required. Select one of the following combinations:		8
MATH 1951 & BIOL 2090	Calculus I and Biostatistics	
or		
MATH 1951 & PSYC 2300	Calculus I and Introduction to Statistics	
<b>Total Credits</b>		<b>12</b>

<sup>1</sup> Only 5 credits of Undergraduate Research (BIOL 3995) and/or Independent Study (BIOL 3991) may be counted toward the credit requirement for the major.

## Bachelor of Science - Ecology and Biodiversity Major Requirements

(183 credits required for the degree (p. 100))

49 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
BIOL 2090	Biostatistics	4
<b>Field course requirement</b>		
BIOL 3055	Ecology of the Rockies	4
<b>Category elective courses <sup>1</sup></b>		
Minimum of four courses.		16
BIOL 2320	Andean Landscapes	
BIOL 2825	Biogeographies of Conservation in Serengeti & Zanzibar	
BIOL 3007	Computing for Biologists

BIOL 3120	General Microbiology	
BIOL 3253	Environmental Physiology of Animals	

BIOL 3350	Conservation Biology	
BIOL 3410	Animal Behavior	
BIOL 3700	Topics in Ecology	
Additional Biology electives at the 2000 or 3000 level <sup>1</sup>		5
<b>Total Credits</b>		<b>49</b>

### Additional Requirements

Code	Title	Credits
------	-------	---------

In addition, students must complete one year of Chemistry and one year of Physics. The BS in Ecology and Biodiversity requires two minors, one of which must be from the following list: Chemistry, Computer Science, Geography, Geographic Information Science, Geology, Mathematics, Medical Physics, or Physics.

#### Chemistry

One year of Chemistry with lab is required. 12

CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	

CHEM 2000 or 3000 level course (at least 4 credits)

#### Physics

One year of Physics with lab is required. Select one of the following combinations: 15

PHYS 1111 & PHYS 1112 & PHYS 1113	General Physics I and General Physics II and General Physics III	
---	--	--

or

PHYS 1211 & PHYS 1212 & PHYS 1213	University Physics I and University Physics II and University Physics III	
---	---	--

#### Mathematics

One year of Mathematics is required. Choose one of the following combinations: 12

MATH 1951 & MATH 1952 & PSYC 2300	Calculus I and Calculus II and Introduction to Statistics	
MATH 1951 & MATH 1952 & BIOL 2090	Calculus I and Calculus II and Biostatistics	

or

MATH 1951 & MATH 1952 & MATH 1953	Calculus I and Calculus II and Calculus III	
---	---	--

**Total Credits** **39**

<sup>1</sup> Only 5 credits of Undergraduate Research (BIOL 3995) and/or Independent Study (BIOL 3991) may be counted toward the credit requirement for the major.

## Physiology in Health & Disease

### Bachelor of Science - Physiology in Health & Disease Major Requirements

(183 credits required for the degree (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscience/>))

50 credits of biology. Requirements include the following:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5

BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 3241	Anatomy and Physiology of the Skeletal, Nervous and Muscular systems	0-5
BIOL 3242	Human Anatomy and Physiology - Systems of homeostasis	0-5

**Category Elective Courses: Physiological Electives & Cellular Electives. Four courses total, at least one from each group. 14-20**

**Physiological Electives: at least one course**

BIOL 3251	Exercise Physiology
BIOL 3252	High Altitude Physiology
BIOL 3254	Advanced Cardiovascular and Pulmonary Physiology
BIOL 3256	Advanced Human Anatomy & Physiology
BIOL 3258	Research Techniques in Exercise Physiology
BIOL 3259	Electrocardiogram Interpretation
BIOL 3260	Nutritional Physiology
BIOL 3261	Exercise Testing and Prescription
BIOL 3280	Intro to Pathophysiology
BIOL 3647	Neuroscience of Movement
BIOL 3708	Topics in Integrative Physiology

**Cellular Electives: at least one course.**

BIOL 3120	General Microbiology
BIOL 3145	Cellular and Molecular Biology of Cancer
BIOL 3150	Intracellular Dynamics
BIOL 3160	Biophysics: Ion Channels & Disease
BIOL 3610	Developmental Biology
BIOL 3615	Blood Vessel Development and Disease
BIOL 3641	Systems Neuroscience
BIOL 3642	Neuropharmacology
BIOL 3648	Molecular Mechanisms of Neurological Disease
BIOL 3649	Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics
BIOL 3650	Endocrinology
BIOL 3656	Cellular Aspects of Diabetes and Obesity
BIOL 3670	Molecular Immunology
BIOL 3675	Virology
BIOL 3690	Cellular Microbiology
BIOL 3910	Viruses & Infectious Human Diseases

Additional Biology electives at the 2000 or 3000 level <sup>1</sup> 5

**Total Credits 50**

**Code Title Credits**

**Additional Requirements**

Two minors are required for the BS Physiology in Health & Disease, one of which must be Medical Physics.

In addition, one year of Chemistry and one year of Mathematics are required.

Medical Physics minor is required. Refer to the Department of Physics and Astronomy. 21

PHYS 1111 & PHYS 1112 & PHYS 1113	General Physics I and General Physics II and General Physics III
---	--

or

PHYS 1211 & PHYS 1212 & PHYS 1213	University Physics I and University Physics II and University Physics III
PHYS 2300	Physics of the Body
PHYS 2340	Medical Imaging Physics

**Chemistry**

Chemistry coursework requirements include:

CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	
CHEM 2000 or 3000 level course (at least 4 credits)		
Mathematics. Select one of the following sequences:		12
MATH 1951 & MATH 1952 & MATH 1953	Calculus I and Calculus II and Calculus III	
or		
MATH 1951 & MATH 1952 & BIOL 2090	Calculus I and Calculus II and Biostatistics	
or		
MATH 1951 & MATH 1952 & PSYC 2300	Calculus I and Calculus II and Introduction to Statistics	

<sup>1</sup> Only five (5) credits of BIOL 3995 Undergraduate Research and/or BIOL 3991 Independent Study may be counted toward the 50-credit requirement for the major.

## Cognitive Neuroscience Concentration

### Requirements for the Cognitive Neuroscience Concentration - Biological Sciences Majors

45 credits of biology. Required coursework includes those listed for the BA or BS major program in biological sciences. Students BIOL coursework must include:

Code	Title	Credits
BA or BS Biological Sciences major required coursework		25
BIOL 3646	Seminar: Cognitive Neuroscience	2
Any three of the following:		12
BIOL 3160	Biophysics: Ion Channels & Disease	
BIOL 3640	Introductory Neurobiology	
BIOL 3641	Systems Neuroscience	
BIOL 3642	Neuropharmacology	
BIOL 3644	Neuromuscular Pathophysiology	
BIOL 3647	Neuroscience of Movement	
BIOL 3648	Molecular Mechanisms of Neurological Disease	
BIOL 3649	Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics	
BIOL 3650	Endocrinology	
Additional Biology electives at the 2000 or 3000 level <sup>1</sup>		6
<b>Total Credits</b>		<b>45</b>

### Additional Requirements: Bachelor of Arts with Cognitive Neuroscience Concentration

Code	Title	Credits
The Psychology minor is required for the BA. In addition, one year of Chemistry and eight credits of Mathematics are required.		
Psychology minor for Cognitive Neuroscience students		20
See Psychology department for requirements.		
<b>Chemistry</b>		
Chemistry coursework requirements include:		12-20
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	

CHEM 2000 or 3000 level course (at least 4 credits)

## Mathematics

Select one of the following combinations:

3

MATH 1951 & MATH 1952	Calculus I and Calculus II
--------------------------	-------------------------------

or

MATH 1951 & BIOL 2090	Calculus I and Biostatistics
--------------------------	---------------------------------

or

MATH 1951  
& PSYC 2300

### Total Credits

**40-48**

**Additional Requirements: Bachelor of Science with Cognitive Neuroscience Concentration**

Code	Title	Credits
------	-------	---------

Two minors are required for the BS, one of which must be Chemistry with the second minor in Psychology. In addition, one year of Physics and one year of Mathematics are required.

Psychology minor for Cognitive Neuroscience students 20

See Psychology department for requirements

## Chemistry

A chemistry minor is required. 20

## Physics

One year of Physics with lab. Select one of the following: 15

PHYS 1111	General Physics I
& PHYS 1112	and General Physics II
& PHYS 1113	and General Physics III

or

PHYS 1211	University Physics I
& PHYS 1212	and University Physics II
& PHYS 1213	and University Physics III

## Mathematics

One year of Calculus. Select one of the following: 12

MATH 1951	Calculus I
& MATH 1952	and Calculus II
& MATH 1953	and Calculus III

or

MATH 1951 & MATH 1952 & BIOL 2090	Calculus I and Calculus II and Biostatistics
---	--

or

MATH 1951 & MATH 1952 & PSYC 2300	Calculus I and Calculus II and Introduction to Statistics
---	---

### Total Credits

67

<sup>1</sup> Only five credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the credit requirement for the major.

## Cognitive Neuroscience Concentration - Molecular Biology Major

44 credits of biology (BA); 50 credits of biology (BS). Required coursework includes those listed for the BA or BS major program in molecular biology, including molecular biology category electives. In addition for the concentration in cognitive neuroscience, students must complete the following cognitive neuroscience requirements:

Code	Title	Credits
BA or BS Molecular Biology major required coursework		28
BIOL 3646	Seminar: Cognitive Neuroscience	2
<b>Cognitive Neuroscience: Category Elective Courses</b>		
Note: A course can count both as a Molecular Biology Category elective and a Cognitive Neuroscience Category elective.		
Any three of the following:		12
BIOL 3160	Biophysics: Ion Channels & Disease	
BIOL 3640	Introductory Neurobiology	
BIOL 3641	Systems Neuroscience	
BIOL 3642	Neuropharmacology	
BIOL 3644	Neuromuscular Pathophysiology	
BIOL 3647	Neuroscience of Movement	
BIOL 3648	Molecular Mechanisms of Neurological Disease	
BIOL 3649	Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics	
BIOL 3650	Endocrinology	
Additional Biology courses at the 2000 or 3000 level for a total of at least 44 credits of biology (BA); 50 credits of biology (BS). <sup>1</sup>		2-8
<b>Total Credits</b>		<b>44-50</b>

### Additional Requirements for the Bachelor of Arts Degree - Molecular Biology Major with Cognitive Neuroscience Concentration

Code	Title	Credits
The BA requires a minor in Chemistry as well as the Psychology minor. In addition, eight credits of Mathematics are required.		
<b>Psychology</b>		<b>20</b>
Refer to Psychology for requirements.		
<b>Chemistry</b>		
A chemistry minor is required. Refer to Department of Chemistry and Biochemistry.		20
<b>Mathematics</b>		
Select one of the following combinations:		8
MATH 1951 & MATH 1952	Calculus I and Calculus II	
or		
MATH 1951 & PSYC 2300	Calculus I and Introduction to Statistics	
or		
MATH 1951 & BIOL 2090	Calculus I and Biostatistics	
<b>Total Credits</b>		<b>48</b>

### Additional Requirements for the Bachelor of Science Degree - Molecular Biology Major with Cognitive Neuroscience Concentration

Code	Title	Credits
The BS requires two minors - which must include a minor in Chemistry and a minor in Psychology. In addition, one year of Mathematics and one year of Physics are required		
<b>Psychology</b>		<b>20</b>
Refer to Psychology for requirements.		
<b>Chemistry</b>		
A chemistry minor is required. Refer to Department of Chemistry and Biochemistry.		20
<b>Physics</b>		
One year of Physics with lab. Select one of the following combinations:		15
PHYS 1111 & PHYS 1112 & PHYS 1113	General Physics I and General Physics II and General Physics III	
or		
PHYS 1211 & PHYS 1212 & PHYS 1213	University Physics I and University Physics II and University Physics III	

**Mathematics**

One year of Mathematics is required.

Select one of the following combinations

12

MATH 1951 & MATH 1952 & MATH 1953	Calculus I and Calculus II and Calculus III
---	---

or

MATH 1951 & MATH 1952 & BIOL 2090	Calculus I and Calculus II and Biostatistics
---	--

or

MATH 1951 & MATH 1952 & PSYC 2300	Calculus I and Calculus II and Introduction to Statistics
---	---

**Total Credits**

67

<sup>1</sup> Only five credits of BIOL 3995 Independent Research and/or BIOL 3991 Independent Study may be counted toward the credit requirement for the major.

## Cognitive Neuroscience Concentration with Biological Sciences Minor (with Psychology Major)

The minor requirements listed below apply only to students completing a Psychology major with a Cognitive Neuroscience concentration. Please see the Department of Psychology (p. 618) for Psychology minor requirements associated with this concentration.

Minimum of 20 credits for the minor. The additional cognitive neuroscience concentration with a Biology minor requires a total of 25 credits as follows.

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 3646	Seminar: Cognitive Neuroscience	2

At least two of the following courses:

8

BIOL 3160	Biophysics: Ion Channels & Disease
BIOL 3640	Introductory Neurobiology
BIOL 3641	Systems Neuroscience
BIOL 3642	Neuropharmacology
BIOL 3644	Neuromuscular Pathophysiology
BIOL 3647	Neuroscience of Movement
BIOL 3648	Molecular Mechanisms of Neurological Disease
BIOL 3649	Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics
BIOL 3650	Endocrinology

**Total Credits**

25

## Minors

### Biological Sciences - Minor Requirements

20 credits of biology. Requirements include:

Code	Title	Credits
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5

10 credits of courses at the 2000 or 3000 level, including one from the following courses: <sup>1</sup> 10

BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab	
BIOL 3241	Anatomy and Physiology of the Skeletal, Nervous and Muscular systems	
BIOL 3242	Human Anatomy and Physiology - Systems of homeostasis	
<b>Total Credits</b>		<b>20</b>

<sup>1</sup> Only 4 credits of Undergraduate Research (BIOL 3995) and/or Independent Study (BIOL 3991) may be counted toward the credit requirement for the minor.

## Human Health Science & Systems - Minor Requirements

Code	Title	Credits
<b>Required Courses (10 Credit hours)</b>		<b>10</b>
HLTH 2000	Science of Human Health	
HLTH 2010	Health Systems Science	
HLTH 3000	Seminar in Health Science	
<b>Electives (10 Credit hours) <sup>1</sup></b>		<b>10</b>
HLTH 2200	Medical Terminology: Fundamentals and Applications	
HLTH 2210	Health Education and Promotion	
HLTH 3155	Leadership in Health	
HLTH 3600	Cultural Responsiveness in Health Care	
HLTH 3700	Topics in Health	
HLTH 3870	Medical Ethics	
HLTH 3991	Independent Study in Human Health Science and Systems	
HLTH 3993	Internship in Human Health Science & Systems	
HLTH 3995	Independent Research in Human Health Science and Systems	
BIOL 3025	Science and the Law	
GEOG 3755	Geography of Health	
<b>Total Credits</b>		<b>20</b>

<sup>1</sup> Only 4 credits of Undergraduate Research (HLTH 3995), Internship (HLTH 3993) and/or Independent Study (HLTH 3991) in total may be counted toward the credit requirement for the minor.

## Requirements for Distinction in the Major in Biological Science

- Minimum 3.5 cumulative GPA
- Completion of a thesis approved by the Department of Biological Sciences.

## Requirements for Distinction in the Major in Molecular Biology

- Minimum 3.5 cumulative GPA
- Completion of a thesis approved by the Department of Biological Sciences.

## Requirements for Distinction in the Major in Ecology and Biodiversity

- Minimum 3.5 cumulative GPA
- Completion of a thesis approved by the Department of Biological Sciences.

## Requirements for Distinction in the Major in Physiology in Health and Disease

- Minimum 3.5 cumulative GPA
- Completion of a thesis approved by the Department of Biological Sciences.

The course plans below are intended to give students an example of how they might complete their degree requirements in the first two years. Please note that plans can vary greatly in year 2, and students should work with their Biology advisor to determine their academic path.

## BS in Biological Sciences

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
CHEM 1010	3	CHEM 1020	3	CHEM 2131	3
CHEM 1240	1	CHEM 1250	1	CHEM 2141	1
MATH 1951 or BIOL 2090	4	MATH 1951 or 1952	4	MATH 1952 or 1953	4
Common Curriculum Requirement/Elective <sup>1</sup>	4	BIOL 1011	4	BIOL 1010	4
		BIOL 1021	1	BIOL 1020	1
	16		17		17

### Second Year

Fall	Credits	Winter	Credits	Spring	Credits
BIOL 2120 & BIOL 2121 (or BIOL 2010 & BIOL 2011)	5	BIOL 2510 & BIOL 2511	5	BIOL upper level elective	4
CHEM 2451	3	CHEM 2452	3	BIOL upper level elective or general elective	4
CHEM 2461	1	CHEM 2462	1	Language sequence	4
Language sequence	4	Language sequence	4	General Elective or PHYS 1113	4
General Elective or PHYS 1111	4	General Elective or PHYS 1112	4		
	17		17		16

Total Credits: 100

<sup>1</sup> This "slot" will be needed for biology in Winter and Spring quarters, so do not start another full-year sequence during Fall quarter

## BA in Biological Sciences

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
CHEM 1010	3	CHEM 1020	3	CHEM 2131	3
CHEM 1240	1	CHEM 1250	1	CHEM 2141	1
MATH 1951 or BIOL 2090	4	MATH 1951 or 1952	4	MATH 1952 (or general elective)	4
Common Curriculum Requirement/Elective <sup>1</sup>	4	BIOL 1011 & BIOL 1021	5	BIOL 1010 & BIOL 1020	5
	16		17		17

### Second Year

Fall	Credits	Winter	Credits	Spring	Credits
BIOL 2120 & BIOL 2121 (or BIOL 2010 & BIOL 2011)	5	BIOL 2510 & BIOL 2511	5	BIOL Upper Level Elective	4
Language sequence	4	Language sequence	4	Language sequence	4
Common Curriculum Requirement/Elective	4	Common Curriculum Requirement/Elective	4	Common Curriculum Requirement/Elective	4
Common Curriculum Requirement/Elective	4	Common Curriculum Requirement/Elective	4	Common Curriculum Requirement/Elective	4
	17		17		16

Total Credits: 100

<sup>1</sup> This "slot" will be needed for biology in Winter and Spring quarters, so do not start another full-year sequence during Fall quarter

## BS in Molecular Biology

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
CHEM 1010	3	CHEM 1020	3	CHEM 2131	3

CHEM 1240	1	CHEM 1250	1	CHEM 2141	1
MATH 1951 or BIOL 2090	4	MATH 1951 or 1952	4	MATH 1952 or 1953	4
Common Curriculum Requirement/Elective <sup>1</sup>	4	BIOL 1011 & BIOL 1021	5	BIOL 1010 & BIOL 1020	5
	16		17		17
<b>Second Year</b>					
<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
BIOL 2120 & BIOL 2121	5	BIOL 2510 & BIOL 2511	5	BIOL 3560	4

	14		14		18

Total Credits: 96

<sup>1</sup> This "slot" will be needed for biology in Winter and Spring quarters, so do not start another full-year sequence during Fall quarter

## Biology (BIOL)

### **BIOL 1005 Perspectives-Veterinary Medicine (2 Credits)**

Introduction to career areas in veterinary medicine through lectures, guest speakers and demonstrations. The credits for this course are general elective only. They do not apply to any major or minor in NSM or to SI-NPW of the common curriculum. Prerequisites: BIOL 1010 and BIOL 1020, or by departmental permission.

### **BIOL 1010 Physiological Systems (4 Credits)**

The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

### **BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)**

The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

### **BIOL 1020 Physiological Systems Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

### **BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

### **BIOL 1221 Molecules to Humankind II (4 Credits)**

Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

### **BIOL 1260 Sustaining Life I (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

### **BIOL 1261 Sustaining Life II (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

### **BIOL 1262 Sustaining Life III (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

**BIOL 1270 Living in the Microbial World I (4 Credits)**

Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1271 Living in the Microbial World II (4 Credits)**

For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

**BIOL 1272 Living in the Microbial World III (4 Credits)**

In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

**BIOL 1988 Study Abroad Resident Credit (0-18 Credits)****BIOL 1990 Independent Study (1-5 Credits)****BIOL 2010 General Ecology (4 Credits)**

Topics in ecosystems, population and community ecology, as well as behavioral ecology. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

**BIOL 2011 General Ecology Lab (1 Credit)**

Exercise and experimentation to compliment the lecture. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 2010, and Prerequisite: BIOL 1021.

**BIOL 2055 Ways of Seeing and Sensing in Biological Systems at Kennedy Mountain Campus (4 Credits)**

Ways of Seeing and Sensing represents a new collaboration between the departments of Biological Sciences, Physics & Astronomy, and Media, Film & Journalism Studies at DU's Kennedy Mountain Campus (KMC). As part of this course, students will collaborate as part of multidisciplinary teams; to compile and apply new content knowledge in biology/ecology, film-making, science communication and story-telling in a project-based curriculum unique to the KMC. The class is a place-based exercise revolving around the idea that what we know about our surroundings depends on how we "see" or "sense." We will examine various aspects of natural systems specific to the Kennedy Mountain Campus (KMC) using both micro and macro approaches to "seeing" through a variety of technologies, including microscopes, trail cameras, photo and video cameras, night vision glasses, and telescopes. To further develop the concept of "sensing," we will explore the soundscapes of the KMC as well as the ways plants and animals in this ecosystem sense their surroundings. We will also explore the KMC using human senses other than sight to navigate the nighttime environment. Students will work in teams of 3-4 to develop and produce documentary stories unique to the ecology and astronomy of the KMC. Students choosing to participate for credit in Biological Sciences will complete additional reading and assignments focusing on the various ways that biological systems (from cells, to organisms, to communities) sense and respond to changes in their environment, including light, heat, sound, chemical cues, and physical forces such as electricity and gravity. This course will meet together with PHYS 2050 and MFJS 2050 courses, which each have different prerequisites and discipline-specific assignments. Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 2090 Biostatistics (4 Credits)**

Statistics in biological research. Computer-aided statistical analysis and hypothesis testing focusing on experiments and data unique to the biological sciences. Cross listed with BIOL 4090.

**BIOL 2120 Cell Structure and Function (4 Credits)**

Chemical composition of cells; structure and function of cell organelles; interrelationship of cellular unit with its environment; mechanisms of energy conversion within cells; functions of excitability, contractility and cell growth. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1011. Corequisites: BIOL 2121 lab section. Recommended: Background in CHEM 1010 or equivalent.

**BIOL 2121 Cell Structure & Function Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 2120.

**BIOL 2320 Andean Landscapes (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in the Andes of Peru through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits and occurs during winter interterm. Over a period of 11 days we will visit the cities and surroundings of Lima, Arequipa, and Cusco, Peru where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The Andean environment offers unique challenges for environment and societies and by understanding the locations and patterns of human activity in the Andes, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in situ critical thinking skills and the promotion of cultural diversity and global awareness. Prerequisite: BIOL 1011.

**BIOL 2510 General Genetics (4 Credits)**

Mechanisms of heredity with application to all forms of life. Topics include classical genetics (mendelian inheritance, meiosis, epistasis, recombination gene mapping, chromosomal mutations) and an introduction to modern molecular genetics (DNA structure and function, gene expression and regulation). This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: BIOL 1010 & 1010, BIOL 1011. Recommended prerequisite: BIOL 2120. Corequisite: BIOL 2511.

**BIOL 2511 General Genetics Lab (1 Credit)**

The laboratory component of BIOL 2510. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisites: BIOL 2510. Prerequisites: BIOL 1020 and BIOL 1021. Recommended Prerequisites: BIOL 2121.

**BIOL 2825 Biogeographies of Conservation in Serengeti & Zanzibar (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem and Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfills biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 1011.

**BIOL 2988 Study Abroad Resident Credit (0-18 Credits)****BIOL 3005 Science Communication (4 Credits)**

Science communication has shaped, and continues to shape, the world in which we live (e.g., why you wash your hands, why we don't feed bears in U.S. national parks anymore, and why some students imagine themselves becoming scientists or not). Sharing how science is conducted and how new knowledge is generated through the scientific method also plays a critical role in our future: creating engaged citizens, shaping the next generation of scientists, increasing diversity and diverse perspectives in the sciences, informing policy-makers and lawyers, combatting misconceptions, increasing trust of scientists, and guiding our own individual behaviors. But, like any other complex skillset, science communication takes practice. This course provides students with a range of resources and skills for effective, ethical, and evidence-based communication of complex socio-scientific issues. It provides a supportive environment in which students will practice and refine their science communication through peer feedback and engagement with real audiences. The focus is on cultivating practical communication skills, with emphasis on effective speaking, writing and exhibition of scientific topics with the variety of audiences students will encounter in their future careers. Course readings, activities, and final projects also examine how identity shapes both the science we do and the lenses we and other stakeholders bring to communication tasks. The course is hybrid, highly interactive, and writing-intensive. This course is restricted to Junior or Senior Standing UG majoring in the College of Natural Sciences and Mathematics.

**BIOL 3007 Computing for Biologists (4 Credits)**

This course will introduce you to critical computing skills for working with biological data. The course is applicable to any field in biology, and we will use a combination of ecological and genome datasets as examples of how to analyze large biological datasets. You will gain a foundation in navigating computing environments (unix), basic programming (bash and R), and managing data, plotting, and basic statistics in R. We will also cover some tools for sharing and reproducing datasets. Pre-requisites: BIOL 1010 and BIOL 1011.

**BIOL 3009 Scientific Writing (4 Credits)**

In this course, students learn how to write scientific papers and grants. Importantly, students learn not only how to create these products, but they also learn to build writing momentum and complete projects on time. During the course students make major progress in their writing project(s) through a variety of homework assignments and dedicated time in class to writing. Pre-requisite: BIOL 1011 and BIOL 1010.

**BIOL 3010 Evolution (4 Credits)**

Evolution is the central concept in biology. This course examines the foundations of evolutionary theory. We will cover the history of life on earth, the genetic basis for evolution, evolutionary processes (natural and sexual selection), the origin of species, and medical applications of evolutionary theory. Prerequisite: BIOL 1010 and BIOL 1011.

**BIOL 3025 Science and the Law (2,4 Credits)**

This course will focus on the intersection of science and US law. Four major areas of focus that will be covered are the admissibility of expert witnesses / scientific evidence in court; how advances in forensic genetics and national DNA databases raise legal issues pertaining to expectations of privacy and the standards for reaching a verdict; the impact of US Supreme Court opinions on the patenting of genes used as diagnostic markers for human disease and the legal landscape surrounding issues of evolution and creationism/intelligent design. Students will then explore how the law impacts their own areas of scientific interest. The goal of this course is to increase our understanding as scientists of how advances in science impact and are impacted by the US judicial system. PREREQUISITES: BIOL 1010 AND BIOL 1011.

**BIOL 3035 Invasive Species Ecology (4 Credits)**

This course investigates those plants and animal species that have dramatically expanded their ranges and cause ecological harm. Topics covered include the mechanisms of ecological impacts across the globe, how invasive species are used to test basic ecological theory, the application of this research for managing real species, and related issues such as the debate within the scientific community about the term "invasive." We use a case-study approach, and students have the opportunity to go into the field as a class to observe the real invasions and learn sampling methods.

**BIOL 3044 Coral Reef Ecology (3 Credits)**

Ecology of coral reefs; organization and distribution of reefs; review of reef organisms and their interactions with each other and their physical environment; threats to coral reef conservation. This course counts as a category elective for Ecology and Biodiversity majors. Prerequisite: (BIOL 2010 or BIOL 2050) OR (GEOG 1201, GEOG 1202, and GEOG 1203).

**BIOL 3045 Coral Reef Ecology Lab (1 Credit)**

Ecology of coral reefs laboratory to supplement lecture material; travel to the Caribbean over spring break to observe coral reefs firsthand; introduction to research methods. SCUBA certification and permission of instructor required. A travel and dive fee is associated with this course.

**BIOL 3055 Ecology of the Rockies (4 Credits)**

A week in residence at the Mt. Evans Field Station prior to the start of fall quarter includes field projects dealing with ecology and environmental issues. On campus classes involve data analysis and interpretation and formal scientific communication. Themes include terrestrial and aquatic ecosystems, taxonomic groups ranging from conifer stands to aquatic insects and mountain goats. Lab fee associated with this course. Prerequisite: BIOL 2010 or permission of instructor.

**BIOL 3070 Ecological Field Methods (4 Credits)**

Series of field exercises for students to learn principles and procedures of field methodology, data analysis and technical writing in ecology; problems drawn from population, community and ecosystem ecology. Lab fee associated with this course. Prerequisite: BIOL 2010.

**BIOL 3074 Forest Ecology (4 Credits)**

This course provides an overview of the distribution, structure, function, and dynamics of forest ecosystems. Topics include: paleoecology, ecophysiology, disturbance, succession, community analysis, forest hydrology, primary productivity, and nutrient cycling. Throughout, we maintain an emphasis on the scientific process and how it is used to study the controls on the distribution and abundance of organisms.

**BIOL 3076 Ecosystem Ecology (4 Credits)**

This course provides an overview and introduction to general and topical themes on ecosystem ecology. Topics include: biotic energy, nutrient cycling, trophic interactions, food webs, hydrology, primary productivity, and soils science. Throughout, we maintain an emphasis on the scientific process and how it is used to study the controls on the cycling of energy, matter, and nutrients in terrestrial and aquatic ecosystems across tropical, temperate and boreal settings.

**BIOL 3085 Insect Ecology (4 Credits)**

A general introduction to insect biology and the science of entomology. Arthropods are the most diverse group of animals on Earth and insects account for more than half of all known living organisms. This course explores the biodiversity of insects on Earth, insect morphology and physiology. The evolutionary history and taxonomy of key orders of insects is emphasized as well as the importance of insects to our everyday lives. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010.

**BIOL 3090 Microbial Ecology (4 Credits)**

Interactions among microorganisms and their environment. Impact of ecological principles on microbial diseases, pollutant degradation, nutrient cycles and global change. Prerequisites: BIOL 1010, BIOL 1020, AND BIOL 2510.

**BIOL 3095 Global Change Ecology (4 Credits)**

Over the past century, the mean surface temperature of our planet has increased slightly less than 1°C. While this may seem like a small increment, this change is already profoundly affecting Earth's organisms and ecological communities, and predictions for the impacts of continued change range from severe to catastrophic. Humans are also changing the environment through alteration of nutrient and water regimes. Topics include cause of climate change, comparison to past climatic change, human contribution to change and effect on organisms, communities and ecosystems. Prerequisites: BIOL 1010, BIOL 1011, AND BIOL 2010. Recommended Prerequisites/Corequisite: BIOL 2090.

**BIOL 3110 Special Topics: Biology (1-5 Credits)**

Topics of special interest to teaching/research faculty of department presented as needed to complement and expand existing curriculum. May be repeated for credit. PREREQUISITES: BIOL 1010.

**BIOL 3120 General Microbiology (4 Credits)**

Fundamental principles of microorganisms in the world and in disease; role of bacteria in biological phenomena. Includes laboratory. Lab fee associated with this course. Prerequisite: BIOL 2120.

**BIOL 3145 Cellular and Molecular Biology of Cancer (4 Credits)**

This course examines the mechanisms that underlie the development and progression of cancer. The cellular and molecular events that drive uncontrolled cell proliferation and eventual metastasis of tumors are discussed. Prerequisite: BIOL 2120.

**BIOL 3150 Intracellular Dynamics (4 Credits)**

Focuses on spatial and temporal control of intracellular processes with an emphasis on neuronal and endocrine cells. Topics include vesicular traffic, protein targeting, dynamics and spatial organization of signaling complexes. Emphasis on modern techniques of cell and molecular biology with examples from primary literature. Prerequisite: BIOL 2120.

**BIOL 3160 Biophysics: Ion Channels & Disease (4 Credits)**

Examines ion channel structure and function and the ways in which this information provides insight into human disease. The focus is on the use of biophysical techniques in combination with molecular and genetic analysis of channel genes. General Physics recommended. Prerequisite: BIOL 2120.

**BIOL 3230 Nutrition (3 Credits)**

Investigation of metabolism, all nutrients and various applications of nutrition to sports and healthy living. Prerequisite: BIOL 3250.

**BIOL 3241 Anatomy and Physiology of the Skeletal, Nervous and Muscular systems (0-5 Credits)**

This course is designed to introduce students to the fundamental concepts, content and scientific bases of Skeletal, Muscular, and Nervous system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Lab fee associated with this course. Prerequisites: BIOL 2120.

**BIOL 3242 Human Anatomy and Physiology - Systems of homeostasis (0-5 Credits)**

This course is designed to introduce students to the fundamental concepts, content and scientific bases of Cardiovascular, Respiratory, Urinary, Digestive, Immune and Reproductive system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Lab fee associated with this course. Prerequisites: BIOL 2120.

**BIOL 3251 Exercise Physiology (4 Credits)**

This course will cover exercise physiology topics included but not limited to: energy systems, physiological response to exercise/training, and exercise programming. A strong background in human physiology is recommended. Prerequisite: BIOL 1010.

**BIOL 3252 High Altitude Physiology (4 Credits)**

This course is an advanced course in physiology for those interested in both the impacts of altitude exposure on health and athletic performance. We live at altitude in Denver, and in fact there are many factors affecting our bodies (which we may or may not realize) that impact our daily lives. This course aims to provide insight on the acute and chronic physiological responses of altitude as well as to provide a deeper understanding into the use of hypoxic environments for improving health and benefiting athletic performance. We will explore the physiological mechanisms related to these reduced oxygen environments as well as develop projects that contribute to the understanding of using this environment as a stimulus. Prerequisite: BIOL 3242.

**BIOL 3253 Environmental Physiology of Animals (4 Credits)**

By studying species across the animal kingdom, we will learn about the vast array of physiological strategies that have evolved to help animals maintain homeostasis in the face of varied environmental challenges. We will cover foundational principals of animal physiological ecology and evolution, as well as new and exciting discoveries through weekly discussions of primary literature. We will focus primary literature discussions on "extreme environments," as Earth's harshest landscapes provide exciting and powerful examples of adaptations of physiological systems. This course will be delivered through a combination of lectures, active learning assignments, readings from the scientific literature, and group discussions. By the end of this course, you will develop a new perspective on the ecological and evolutionary factors that shape physiological similarities and differences among the animals of our planet (including humans). Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 3254 Advanced Cardiovascular and Pulmonary Physiology (4 Credits)**

This course provides a deeper level of physiological knowledge of the cardiac, vascular, circulatory, and pulmonary systems and their functions. With both lecture materials as well as in-class discussion of concepts and research articles, we will go deep into the basic levels of composition and function and facilitate the understanding of mechanisms that limit disease populations, elderly, etc. How can we adapt our lifestyles to improve our cardiovascular health? Prerequisite: BIOL 2120 or BIOL 3242.

**BIOL 3256 Advanced Human Anatomy & Physiology (0-5 Credits)**

This one quarter course is intended for advanced biology and physiology majors with an interest in the anatomical structure and physiological functioning of body systems. This course builds upon the Human Anatomy and Human Physiology courses that are prerequisites. This advanced course will explore in greater depth understanding mechanisms of action of major body systems and elaborate on the relationship between structure and function. In addition to didactic content, students will complete evaluation of primary literature and design laboratory experiments to test hypotheses of interest. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, models, dissections, inquiry-based learning, experimentation and a variety of assessments. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. Please note that the lab portion of this course requires dissection. Lab fee is associated with this course. Prerequisites: BIOL 3241 and BIOL 3242.

**BIOL 3257 Clinical Exercise Physiology (5 Credits)**

This is an upper-level course in clinical physiology for those interested in understanding fundamental practices and assessments within clinical settings. We will work to combine knowledge from various backgrounds in physiology and tie theoretical and practical concepts together for assessing body function and developing methods for improving health and performance. We will relate daily experiences with class content to deepen our knowledge and retain this information for future reference. We will connect the physiological concepts related to the cardiovascular, respiratory, muscle systems as well as develop projects that require combining knowledge of the assessment skills and evaluation for clear communication and exercise prescription to special populations. Prerequisite BIOL2120 or BIOL 3242.

**BIOL 3258 Research Techniques in Exercise Physiology (4 Credits)**

This upper-level course is designed to give you exposure to several methods of research within the area of exercise physiology. This is a hands-on course that combines theory and literature with practical research experiences in physiology. For those interested in understanding more about research, this is the course for you as we will perform data collection and analysis of differing topics. These may include the following topics: pulse and tissue oxygenation, signaling (heart rate variability, oxygen kinetics), respiratory loops, Doppler ultrasound (blood flow and tissue structure), etc. Our aims will focus on understanding how and why the method works, how to collect data, as well as the analysis and reporting of variables for proper interpretation.

**BIOL 3259 Electrocardiogram Interpretation (2 Credits)**

This course is an advanced course in cardiac physiology for those interested in understanding principles associated with cardiac function, electrical physiology of the heart, and interpretation of the electrocardiogram. This is applicable for several pre-med career paths especially within clinical settings. As the functions related to our heart drive our cardiovascular system, we will find ways to relate our experiences of daily life to the concepts and principles learned throughout this course to deepen our knowledge and retain this information. We will explore the physiological mechanisms related to the cardiac system as well as develop projects that require combining knowledge of the electrical pathways and of use of electrocardiography for proper interpretation. Prerequisite: BIOL 2120, BIOL 3241, BIOL 3242, or equivalent.

**BIOL 3260 Nutritional Physiology (4 Credits)**

This course is designed to introduce the fundamental concepts, content and scientific bases of nutritional physiology at the levels. This course will examine the scientific structure and properties of carbohydrates, proteins and lipids as the major macronutrients required for human health. In addition, it includes exploration of the digestion, absorption and metabolism of both macronutrients and micronutrients. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, inquiry-based learning, experimentation and a variety of assessments. Prerequisite: BIOL 2120.

**BIOL 3261 Exercise Testing and Prescription (4 Credits)**

The purpose of this upper-level course is to develop knowledge combined with hands-on skills for integration of exercise testing and prescription concepts. Material in this course will be applicable for performance as well as clinical considerations. This is an active course which will require your participation as both the subject and technician, giving perspective and understanding of methods and protocols along with their justification for various purposes. Recommended prerequisite course: Clinical Exercise Physiology.

**BIOL 3280 Intro to Pathophysiology (4 Credits)**

This course is designed as an introduction of the mechanisms and consequences of disease based on physiological dysfunction in the major organ systems. The course will focus on the fundamental concepts and processes of human pathophysiology through exploration of the unique physiological roles of several body systems, how these systems have important integrative relationships that underlie the overall physiological functioning of healthy humans, and how system function is altered in disease and the clinical manifestations of these changes. Prerequisite: BIOL 2120. A course in human physiology is recommended.

**BIOL 3350 Conservation Biology (5 Credits)**

Conservation Biology is the study of documenting the earth's biodiversity, its threats, and how it may be protected. It is a multidisciplinary science within ecology with contributions from environmental chemistry, geography, sociology, and political science, among other fields. In this class students learn the language of conservation biology, the methods used by conservation biologists, and the nuances of current issues. In class, material is learned through both lecture and interactive exercises in the classroom portion, with hands-on practice in techniques and applications during the lab. Lab fee associated with this course. Prerequisite: BIOL 2010.

**BIOL 3410 Animal Behavior (4 Credits)**

This class examines animal behavior from an evolutionary and ecological perspective. The course provides the background needed to understand behavioral evolution, including a focus on the inheritance of behavior, natural selection, sexual selection, and kin selection. This class studies the evolution of a variety of behaviors, including communication and displays, mate choice, parental care, cooperation, mating systems, social behavior, habitat selection, foraging, and anti-predator behavior. The emphasis is on theoretical principles, design of experiments, and interpretation of data. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010. Recommended Prerequisite: BIOL 2090.

**BIOL 3560 Molecular Biology Laboratory (4 Credits)**

Laboratory based course that covers techniques in gene excision, cloning and reinsertion and gene sequencing. Lab fee associated with this course. Prerequisite: BIOL 2510, or permission of instructor.

**BIOL 3570 Proteins in Biological Systems (4 Credits)**

Proteins considered in their biological setting; protein synthesis and degradation; survey of protein functions in vivo; introduction to protein biotechnology. Prerequisites: BIOL 2120.

**BIOL 3610 Developmental Biology (4 Credits)**

Processes and mechanisms of development, exemplified by higher animal embryogenesis, with consideration of microbial model systems. Prerequisite: BIOL 2120 and 2510.

**BIOL 3615 Blood Vessel Development and Disease (4 Credits)**

This course details the underlying biological programs during blood vessel development and mechanisms that lead to vascular pathologies. The class will incorporate aspects embryology, signaling transduction, and genetics as well as current techniques in developmental biology to comprehensively cover how blood vessels are formed embryonically. Additionally, we will discuss in detail how defects in blood vessel-related signaling programs later manifest into disease. Prerequisite for this course is Cell Structure and Function (BIOL2120/2121).

**BIOL 3630 Cell Biology of Development (4 Credits)**

Every organism has a stereotypical shape, but how does this shape arise? This course examines the cellular and molecular mechanisms that direct the forming of body and tissue shape. Prerequisite: BIOL 2120.

**BIOL 3640 Introductory Neurobiology (4 Credits)**

Organization and function of vertebrate central nervous system; nature of action potential, biochemistry of neurotransmitters, neuropeptides, functional anatomy of nervous system, phylogeny of nervous system. Prerequisite: BIOL 2120.

**BIOL 3641 Systems Neuroscience (4 Credits)**

Structure and function of the brain and spinal cord, emphasis on functional systems including sensory perception, motor control and consciousness. Prerequisite: BIOL 3640 or 3241.

**BIOL 3642 Neuropharmacology (4 Credits)**

How psychoactive drugs exert their effects on the nervous system; drugs of abuse and drugs used in the treatment of psychotic and neurodegenerative disorders. Prerequisite: BIOL 2120. Recommended prerequisites: BIOL 3640.

**BIOL 3644 Neuromuscular Pathophysiology (4 Credits)**

Cellular and molecular basis for normal nerve and muscle functions and the alteration of these functions by toxins, trauma and diseases of the brain, nerves and muscles; how specific insults produce clinical symptoms and pathology. Prerequisite: BIOL 2120.

**BIOL 3646 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is the capstone course for the neuroscience portion of the cognitive neuroscience program. Seminar topics include but are not limited to neurological disorders, model systems in neuroscience and sensory systems.

**BIOL 3647 Neuroscience of Movement (4 Credits)**

Producing the vast array of movements that humans (and many animals) use everyday represents one of the body's greatest challenges and greatest successes. These various movements require that the nervous, muscular, and skeletal systems work in concert to achieve a common goal. This course will explore the scientific basis of movement production, with particular emphasis on the neuroscience of motor control. We will explore how the nervous system drives the development of movement strategies at an early age, modifies movement strategies to adapt to changing demands throughout life, and how injury, dysfunction, and/or aging can lead to movement challenges. Required prerequisite: Cell Structure & Function (BIOL 2120); Recommended prerequisite (1 or more of the following): Human Anatomy (BIOL 2450), Human Physiology (BIOL 3250), Introduction to Neuroscience (BIOL 3640) or permission of instructor.

**BIOL 3648 Molecular Mechanisms of Neurological Disease (4 Credits)**

This course will be an in-depth study into some of the key molecular mechanisms involved in the pathogenesis of human neurological disease. A particular emphasis will be placed on the role of RNA regulation and metabolism. The primary focus will be on five devastating diseases: 1.

**BIOL 3649 Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics (4 Credits)**

Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics covers the following disorders: Alzheimer's disease, Parkinson's disease, amyotrophic lateral sclerosis, Huntington's disease, spinocerebellar ataxia, Creutzfeldt-Jakob disease, multiple sclerosis, traumatic brain injury and spinal cord injury. Course literature includes primary journal articles and review papers describing the etiology and pathophysiological mechanisms of these disorders. Potential therapeutic approaches to treatment are also investigated. The course format typically includes a lecture reviewing the basic biology, symptoms, and current treatments for each disorder, followed by a thorough analysis of primary research papers focused on novel molecular mechanisms and new targets for therapeutic development. Grading is based on 3 exams throughout the academic quarter and participation in discussing journal articles in class. Prerequisite: BIOL 2120 Cell Structure and Function. Recommended: BIOL 3640 Introductory Neurobiology. For Graduate Students: an additional term paper is required with the exact topic to be agreed upon by the student and instructor.

**BIOL 3650 Endocrinology (4 Credits)**

Mechanisms of hormone action, evolution of vertebrate endocrine systems, analysis of function integration of hormonal responses in maintenance of homeostasis. Prerequisite: BIOL 2120.

**BIOL 3656 Cellular Aspects of Diabetes and Obesity (4 Credits)**

This course focuses on specific cellular and molecular events key to the understanding of the pathological conditions of diabetes and obesity. Topics include the endocrine pancreas, adipose tissue and neuroendocrine control energy expenditure and feeding behavior. Prerequisite: BIOL 2120.

**BIOL 3670 Molecular Immunology (4 Credits)**

The ability to distinguish self from non-self is crucial to all organisms. In humans Organs, cells and other higher animals, this task fall to the immune system. Suppression of this system is key to numerous pathogenic viruses including Ebola and human immunodeficiency virus. The failure to adequately regulate immune response underlies allergic reactions, arthritis and diabetes. This course will introduce students to the organs, cells and molecules that underlie mammalian immune response; immunogenetics and the fundamental mechanisms of cell mediated and humoral immune response; and the relationship of immune system to human disease. Prerequisite: BIOL 2510.

**BIOL 3675 Virology (4 Credits)**

Viruses are the ultimate cell biologists. They usurp essential cellular components to create new virus progeny leading to pathological cellular physiology. This course will delve into the genetic and cellular principles that govern virus entry, replication, and assembly and cover a broad range of DNA and RNA-based virus families. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3690 Cellular Microbiology (4 Credits)**

The field of cellular microbiology broadly defines the interface between commensal or pathogenic microbes, prokaryotes or lower eukaryotes, and their host. The burgeoning field of cellular microbiology has seen an explosion of new knowledge related to the feedback regulation between commensal microbes and their hosts. Furthermore, our knowledge of virulence factors that promote host and pathogenic microbe niches has continued to expand. This topics course will build a medically relevant and coherent picture of the host-microbe interface on genetic, molecular, cellular, and organismal scales by surveying relevant literature that has uncovered interspecies communication and control pathways. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3700 Topics in Ecology (1-4 Credits)**

Topics vary; may include plant, animal, biochemical, alpine or aquatic; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: one quarter of undergraduate ecology and/or instructor's permission.

**BIOL 3701 Topics in Genetics (1-4 Credits)**

Topics vary; may include genetic methods, molecular genetics, human genetics, chromosomes or population genetics; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: BIOL 2510 and/or instructor's permission.

**BIOL 3702 Advanced Topics in Regulatory Biology (1-4 Credits)**

Topics vary; may include endocrinology, physiology or immunology; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: varies with topic and instructor; instructor's permission usually required.

**BIOL 3703 Advanced Topics in Developmental Biology (1-4 Credits)**

Topics vary; may include gene expression in development, developmental immunogenetics, developmental biochemistry or aging; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: instructor's permission.

**BIOL 3704 Advanced Topics in Cell Biology (1-4 Credits)**

Topics vary; may include supramolecular structure, microscopy, membranes and techniques. May be repeated for credit. Taught from original literature. Prerequisites: BIOL 2120.

**BIOL 3705 Advanced Topics in Molecular Biology (1-4 Credits)**

Topics vary, but may include biochemistry, supramolecular structure and function, molecular genetics, membrane biology. May be taken more than once for credit. Taught from original literature. Prerequisite: varies with course and instructor; instructor's permission usually required.

**BIOL 3706 Topics in Evolution (1-4 Credits)**

Topics vary, but may include molecular evolution, plant evolution and animal evolution. Prerequisite: BIOL 2120 and BIOL 2510.

**BIOL 3707 Advanced Topics in Conservation Biology (1-4 Credits)****BIOL 3708 Topics in Integrative Physiology (2-4 Credits)**

Topics for this course include, but are not limited to, human physiology and disease, integrative physiology, environmental or social impacts on human physiology and health, and comparative physiology. Students will gain knowledge of a specific topic in physiology and/or pathophysiology through discussion of current literature and research. May be repeated for credit. Prerequisite: BIOL 2120.

**BIOL 3800 Human Molecular Biology (4 Credits)**

Medical Genetics is the 24th member of the American Board of Medical Specialties. This course will introduce students to the fundamentals of molecular biology with an emphasis on understanding of how the field is applied in the context of medical diagnostics, personalized/precision medicine and other commercial applications. Students will be introduced to published research reports and provided with opportunities to critically examine the application of molecular biology to central questions in such areas as oncology, inherited diseases and genetically engineered organisms. Prerequisite: BIOL 2510.

**BIOL 3850 Genetic Engineering (4 Credits)**

This course will cover principles in gene manipulation and its application in research, medicine and industry. More specifically, this course will explain emerging technologies in genetic engineering and its practical and ethical implications. Topics will incorporate historical and emerging aspects of developmental biology, chemistry, and genetics as well as current techniques in genetic manipulation that are related to genomic editing. Additionally, students will be trained to interface with genomic databases and employ DNA sequence editing software to manipulate DNA sequences to achieve novel cloned products. Prerequisite: BIOL 2510.

**BIOL 3910 Viruses & Infectious Human Diseases (4 Credits)**

From sexually transmitted viruses to bacterial pneumonia, infectious pathogens are the number one threat to human health. This course will introduce students to prions, viruses and bacterial pathogens with an emphasis on those commonly encountered in clinical medical practice. Through the use of technical/scientific research journals students will be encouraged to investigate the etiology, pathogenesis and treatment of human infectious disease with an emphasis on the clinical, molecular diagnostic and therapeutic aspects of the disease. Prerequisite: BIOL 2510. Recommended prerequisite: BIOL 3800.

**BIOL 3920 Forensic Pathology (2-4 Credits)**

In its broadest definition, forensic science represents a fusion of the natural sciences, criminology and jurisprudence. The field of forensic pathology in particular focuses on the investigation of sudden, unnatural, unexplained or violent deaths. Using the most authoritative books available and a multimedia lecture format, students in this course gain an introductory understanding of the pathophysiology of wounding and death as well as the clinical antemortem symptomology of physical abuse, neglect and extrajudicial wounding. Students also learn about the processes responsible for the decomposition of corpses as well as the use of molecular and geometric tools for the reconstruction of crime scenes from bloodstain evidence. Finally, students learn how to integrate a variety of forensic tools in investigations of sexual assault, serial killers, traffic fatalities and mass deaths. Prerequisite: BIOL 2120 or permission of instructor.

**BIOL 3988 Study Abroad Resident Credit (0-18 Credits)****BIOL 3991 Independent Study (1-10 Credits)**

Topic in biology studied under faculty supervision. Student's responsibility to identify faculty supervisor before registering for class. Maximum of 5 quarter hours of BIOL 3991 and/or BIOL 3995 may be applied toward the 45-quarter-hour requirement for a major in biological sciences.

**BIOL 3995 Independent Research (1-10 Credits)****Health Sciences (HLTH)****HLTH 2000 Science of Human Health (4 Credits)**

This keystone course focuses on individual, community and population health. Students will be introduced to topics including health & wellness through the lifespan, population and public health, health promotion and education, and social determinants of health and health equity. This course will provide students not only the insight about the scientific basis, but also the social and cultural contexts of human health and health care. Students will gain an understanding about how behavioral health and social factors affect human biology and health. In addition, students will learn to effectively employ the critical skills and competencies necessary for understanding and evaluating human health and health care, as well as to effectively identify and learn to contribute to evidence-based health care.

**HLTH 2010 Health Systems Science (4 Credits)**

This keystone course will provide knowledge about how education, policy and healthcare delivery function within health care systems. Students will be introduced to topics including healthcare delivery systems and management, health policy and economics, and health informatics and technology. Students will gain an understanding about the healthcare delivery organizations and systems in the United States, contributions of government and public policy to health care, and the economics that drive healthcare systems. These content areas will be presented within the themes of the 3 pillars of health equity: access to health care, quality of care, and health outcomes. Students will gain an appreciation of a perspective from the patient experience in the healthcare system. Furthermore, this course will challenge students to effectively identify and critically consider the interactions and conflicts between these entities.

**HLTH 2200 Medical Terminology: Fundamentals and Applications (4 Credits)**

This course presents fundamentals and applications of medical terminology. This review and application of human anatomy and physiology is suitable for students who have completed some introductory biology and who are working toward a career in medicine or for whom communication with healthcare providers is essential. Students study basic anatomy and physiology at a level that is intermediate between introductory and advanced courses, discover the medical history behind medical terminology, analyze medical case studies, and work to develop skills for clear and concise articulation of the basic concepts of anatomy and physiology behind medical diagnosis and treatment. This mastery of medical terminology helps to build a strong foundation for advanced coursework in anatomy and physiology.

**HLTH 2210 Health Education and Promotion (4 Credits)**

This course will provide students foundational knowledge about how to deliver health education and promote healthy behaviors to community. Students will focus on integrating evidence-based research into instructional strategies including preparing culturally sensitive presentations, leading difficult conversations, and activities to reinforce healthy behaviors. This course includes a weekly service-learning activity, where students will present approved workshops to youth on topics such as: mental health, sexual health, healthy behaviors and harm prevention, and accessing health care. The content delivered to youth aligns with the National Health Education Standards.

**HLTH 3000 Seminar in Health Science (1-2 Credits)**

This seminar is the capstone course for the Human Health Science & Systems program. This class will focus on the current understanding of several topics in human health. Emphasis will be on critical reading and discussion of current scientific literature related to human health and health care. Students will learn to recognize and appreciate different approaches and methods of health-related research. Students will utilize and integrate knowledge from previous courses to understand to present effective discussions on current topics in health. For students' continued development of strong oral communication skills, student presentations of primary literature will generate the basis of discussion. Prerequisites: HLTH 2000 and 2010.

**HLTH 3155 Leadership in Health (1 Credit)**

This course addresses the basic leadership skills necessary to succeed in the dynamic professional environment of health science and healthcare. Topics covered include individual and team leadership strategies and professional skills related to communication, management, strategic planning, implementation of change, negotiation, conflict resolution, and team building. Students will determine leadership strengths and weaknesses and learn to adapt their leadership approach to meet specific situations and challenges. Students will strengthen their leadership practices through a series of lectures, case studies, guided interactions and group exercises. Prerequisites: HLTH 2000 and 2010.

**HLTH 3600 Cultural Responsiveness in Health Care (2 Credits)**

To contribute to reducing health inequities and improving health outcomes, this course will promote an improved understanding and responsiveness to the realities of social and structural impacts that influence the health of an individual or community. Topics will include health care delivery and access, political economy of health care, implicit biases, professionalism, relational leadership, dealing with patients in difficult situations, and health equity. The course will help students learn to provide more informed and effective care and promote a more culturally sensitive and responsive future workforce in healthcare, while also serving community needs.

**HLTH 3700 Topics in Health (1-4 Credits)**

Topics in the area of, but are not limited to, human health and disease, environmental or social impacts on health, healthcare delivery, evidence-based medicine. Students will gain knowledge of a specific topic in human health and/or health care through discussion of current literature and research. May be repeated for credit. Prerequisites: HLTH 2000 or 2010.

**HLTH 3870 Medical Ethics (4 Credits)**

This course will present knowledge and discussion of ethical issues that arise from advances in the biomedical sciences and medicine. Several specific ethical issues and policies related to methodologies and procedures, emerging medical technologies, treatment decisions, doctor-patient relationship, informed consent, medical experimentation/clinical research, and health care reform. The overall objective of this course is to enhance awareness and critical thinking skills for future science professionals who are able to express their views in a culturally-responsive manner and listen to and appreciate others' perspectives. This course will focus on discussions, case studies, and projects. Prerequisites: BIOL 2120, or HLTH 2000.

**HLTH 3991 Independent Study in Human Health Science and Systems (1-4 Credits)**

In this course, students can engage in independent study focused on a topic in human health science and/or human health system science under faculty supervision. The independent study in Human Health Science and Systems provides individualized opportunities to gain knowledge on a specific health topic of interest to the student. This course complements the student's didactic coursework in established health topics and provides an opportunity for students to delve deeper into a specific health-related topic. The student is responsible for identifying a faculty supervisor before registering for class. Maximum of 5 quarter hours of HLTH 3991 and/or HLTH 3993 and/or HLTH 3995 may be applied toward the 20-quarter-hour requirement for a minor in Human Health Science & Systems. Prerequisites: HLTH 2000 or HLTH 2010.

**HLTH 3993 Internship in Human Health Science & Systems (0-4 Credits)**

An internship is the opportunity to engage in a unique educational experience outside of the didactic setting of the classroom. This course includes a structured practical and productive internship experience that allows for the integration and application of coursework in a professional setting. The internship can be administrative, clinical, programmatic, or research focused. The internship must be a new experience for the student. If the proposed internship is within same setting as previous experience, the internship activities must be clearly different from past experiences. The course credit is variable (1-5 credits) depending on the rigor and time commitment required to complete the internship. Prerequisites: HLTH 2000 or 2010.

**HLTH 3995 Independent Research in Human Health Science and Systems (1-4 Credits)**

Independent research is an opportunity for students to be engaged in research within the fields of human health science or health systems studied under the guidance of a faculty member. This course complements the student's didactic coursework in established health topics and provides an opportunity for students to engage in focused research on health-related question. research. Students will effectively employ the critical research skills and competencies necessary critique and understand current literature, identify gaps in current knowledge, and understand and employ appropriate research approaches and methods for addressing the health-related research question. The student is responsible for identifying a faculty supervisor before registering for class. Maximum of 5 quarter hours of HLTH 3991 and/or HLTH 3993 and/or HLTH 3995 may be applied toward the 20-quarter-hour requirement for a minor in Human Health Science & Systems. Prerequisites: HLTH 2000 or 2010.

## Black Studies

Office: Anderson Academic Commons 282B

Mail Code:

Phone: 303-871-7448

Email: sheila.carter-tod@du.edu

This interdisciplinary undergraduate minor, housed in the College of Arts, Humanities, and Social Sciences (CAHSS), provides students with in depth and substantive exposure to the historical, cultural, political, economic, and social development of the African Diaspora through a variety of humanities, and social sciences approaches. This minor aims to augment the scholarly understandings of students by cultivating informed thinkers who are intellectually prepared to offer clarity and insight on ongoing academic and public debates centered around conversations on justice, equity, diversity, and inclusion. Additionally, this minor provides students with knowledge on the history, primary methodologies, and interdisciplinary breadth of the field of Black Studies by providing them with opportunities to learn to analyze, critique, and translate comprehensive themes concerning interactions related to the work of Black scholars, writers, artists, economists, musicians, etc. Students who successfully complete the 20 credit-hour coursework requirements will have the Black Studies minor noted on their transcript.

The Black Studies minor will provide undergraduate students with:

1. an understanding of the Africana and Diasporic through a wide range of perspectives and disciplines, from anthropology, economics, education, history, history of art, international studies, literature, political science, sociology.
2. tools to analyze the ancestries, foundations, and issues of forced or chosen migration, decolonization, political economy, anti-Black racism, institutional power, oppression, resistance, and liberation.
3. an understanding of communities of inquiry of the Black experiences and the African continent and Diaspora, within and beyond the University of Denver.
4. enhancement of a student's major program of study to support future graduate work and professional development.

The minor offers courses taught by recognized experts in their field, an interdisciplinary approach that provides students with a three-dimensional view—historical, theoretical, and philosophical—that prepares students for a global future. Students will be able to use this minor to market themselves more successfully for government and non-governmental organization careers, as well as academic careers.

This interdisciplinary undergraduate minor, housed in College of Arts, Humanities, and Social Sciences, provides students with in-depth and substantive exposure to the historical, cultural, political, economic, and social development of the African Diaspora through a variety of humanities, and social sciences approaches. This minor aims to augment the scholarly understandings of students by cultivating informed thinkers who are

intellectually prepared to offer clarity and insight on ongoing academic and public debates centered around conversations on justice, equity, diversity, and inclusion. Additionally, this minor will provide students with knowledge on the history, primary methodologies, and interdisciplinary breadth of the field of Black Studies by providing them with opportunities to learn to analyze, critique, and translate comprehensive themes concerning interactions related to the work of Black scholars, writers, artists, economists, musicians, etc. Students who successfully complete the 20 credit-hour coursework requirements will have the Black Studies minor noted on their transcript.

The Black Studies minor offers students in any major the opportunity to demonstrate competency in Black Studies. It requires that students complete five, four credit courses as follows:

- 1. BLST 2150 Introduction to Black Studies
- 2. WRIT 3255 Black Studies Capstone Final Portfolio
- 3. Any three courses from the Content Courses listed below

Students must take content courses in at least two departments/schools (e.g. they cannot take all their courses from HIST)

Please note that no more than 4 credit hours may be taken at the 1000 level.

Upon approval, students can transfer into the minor up to 8 credit hours from appropriate study abroad courses.

Learning Objectives

Students who successfully complete the coursework required for this minor will be able to:

- 1. Demonstrate undergraduate level an understanding of the Africana and Diasporic through a wide range of perspectives and disciplines, from anthropology, economics, education, history, history of art, international studies, literature, political science, sociology.
- 2. Explain and analyze Black ancestries, foundations, forced or chosen migration, colonization and decolonization, political economy, anti-Black racism, institutional power, oppression, resistance, and liberation drawing upon the appropriate tools from the humanities and social sciences.

Minor in Black Studies

Minimum of 20 credits

Code	Title	Credits
Required Courses		
BLST 2150	Introduction to Black Studies	4
WRIT 3600	Black Studies Capstone	4
Electives		
Select three from the following for a minimum of 12 credits:		12
COMN 2020	On the Black Panther Party	
ENGL 2717	African American Writers	
ENGL 2719	The Harlem Renaissance	
ENGL 3744	African American Literature	
HIST 1725	African American History to the Civil War Era	
INTS 3017	The Revolutions of Black, Brown, and Indigenous Peoples: Violence and Nonviolence	
MUAC/RLGS 2251	Contemporary Gospel Music: Religion, Culture, and the Black Church	
RLGS 2250	Introduction to African American Religions	
RLGS 3453	Is God a Racist Sexist?: Black Liberation and Womanist Theology	
RLGS 3642	Martin Luther King, Jr., Malcolm X and Civil Rights	
Total Credits		20

BLST 2150 Introduction to Black Studies (4 Credits)

Black Studies began in 1968 as a discipline dedicated to understanding and improving the lived experience of Africans and African Americans. It started with the intention of providing a safe space for Black students to exercise their intellectual creativity, while engaging in accurate portrayals of the Black experience. Introduction to Black Studies is designed for all students as a cornerstone for the Black Studies minor. This course introduces students to the breadth and depth of Black Studies as a discipline, using primary and secondary sources. Introduction to Black Studies uses historical, interdisciplinary, intersectional, and transnational grounding in the study of Black people. Focused primarily on the U.S., this course examines current theories, methods, and goals in Black Studies while allowing students to delve into some of Black Studies' most current and exciting scholarship. In this course, students will think about what freedom and democracy have meant to African American people in the United States, and the ways that they have creatively expressed these meanings over time. This interdisciplinary introduction to Black Studies combines the teaching of foundational texts in the field while reinforcing skills in reading and writing learned throughout the quarter. The course will also meet the requirements for AI-Society. This course will also be cross listed with departmental courses from the multiple programs with courses that align with the Black Studies minor ( i.e. ENGL 2xxx, HIST 2xxx, and RLGS 2xxx).

**COMN 2020 On the Black Panther Party (4 Credits)**

This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2110 The African Imagination (4 Credits)**

Focusing mainly on Africa, this course explores and connects aspects of the African imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into African aesthetics from a continental and an interdisciplinary perspective. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2717 African American Writers (4 Credits)**

Defines, describes and analyzes the African-American aesthetic.

**ENGL 3744 African American Literature (4 Credits)**

This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

**FREN 2502 La France et ses autres mondes (4 Credits)**

IFREN#2502 La France et ses autres mondes (4 Credits) This course reexamines the historical relations and power dynamics between France and its "other" worlds. How and why has France built and maintained its empire in Africa, Asia, and the Americas? How do the leaders of the Francophone world cope with the politics of hegemony put in place by the (ex)rulers? How do the former question and reject the latter in their quest for self-affirmation and nation building before, during and after independence? Our wide range of Pan-Francophone textual and filmic selection from prominent writers and filmmakers will help us answer these questions and classic and newly emerging notions of civilizing mission, Francophonie, Francosphere, postcolonialism, neocolonialism, Afropeanism and Afropolitanism. This course is conducted in French. It counts toward Analytical Inquiry: Society and Culture. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills.##Prerequisite:##FREN#2003 or equivalent.

**FREN 3501 L'Afrique aux Antilles (4 Credits)**

FREN#3501 L'Afrique aux Antilles (4 Credits) This seminar examines the literary and political enterprises undertaken by Francophone Caribbean novelists, essayists, filmmakers, and artists in re-rooting/routing Africa in the Caribbean. We will particularly focus on how and why the Afro-Caribbean tradition is captured in the distinctive movements of Negritude, Antillanité and Créolité. We will use the latter as standpoints from which to examine the affective, historical, and political implications of Africa in the social lives of Caribbean people. We will also discuss the visions and stances of these writers and theorists on the Black Experience and the correlations that exist between the historical and the fictional in essays as well as novels and films. The seminar is conducted in French and emphasizes discussion, writing and critical thinking. Courses at the FREN 3150 through 3701 level combine a seminar approach to a topic in literature and/or culture with advanced language study, including translation, grammar, or other exercises. Prerequisite: 8 credits of courses numbered 2400-2701 or their equivalent.

**FREN 3503 Voix/Voies Postcoloniales (4 Credits)**

This seminar is an introduction to Francophone postcolonial theory. Revisiting the postcolony, we will analyze how and why slavery and colonialism have left indelible marks on the lives of people living in the "former" French empire, socially, politically, and culturally. Through a diverse selection of pan-Francophone fictional and theoretical materials, we will examine the literary and political forms of resistance undertaken by the postcolonial authors to reject the status quo. Courses at the FREN 3150 through 3701 combine a seminar approach to a topic in literature and/or culture with advanced language study, including translation, grammar, or other exercises. Prerequisite: 8 credits of courses numbered 2400-2701 or their equivalent (Connect with the Instructor for approval).

**HIST 1705 Modern African History (4 Credits)**

This course is a survey and introduction to modern African history from the late 19th century to the present. We will explore the period of European colonialism and its postcolonial legacy, focusing on the experiences of Africans at this time. Themes addressed in this class will include gender, age, class, race and ethnicity, and the historical legacies of both the precolonial and colonial eras to the construction of the postcolonial nation-state. Assignments will be geared towards teaching students to think and write like historians, and understand the basic tenets of historical inquiry, such as how to use primary and secondary sources and differentiate between them, and construct a basic historical argument that advances historiographical understandings of the topic in question. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1715 Middle Passages: Atlantic World Migrations (4 Credits)**

Middle Passages examines first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians in order to trace the origins, expansion, and decline of traffic in captive Africans in addition to its impact on four continents. The course seeks to answer, among others, the following questions: Why were Europeans in Africa? Why were Africans enslaved? What did African experience on the journey to slavery in the Americas? Which came first, racism or slavery? What is the middle passage? If we want to understand how the US (and not only the South), Western Europe, parts of Latin America, and much of Africa got to be how they are now, we need to know something of the human commerce that profoundly shaped them. In this course, students consider individual, national, and institutional experiences of the Middle Passage by exploring a textbook that overviews the histories of the trans-Atlantic Slave Trade and accounts from a series of primary sources.

**HIST 1725 African American History to the Civil War Era (4 Credits)**

History 1725, African American History to the Civil War Era, is designed to introduce students to the trends, events, issues, and people that shaped African American history from Colonial America through the Civil War. In particular, this course will focus on presenting Black people as active agents in the American historical narrative that significantly shaped their lives even within the context of slavery. To this end, this course sets out to discredit American myths about people of African descent, examine critical elements of black slavery and freedom in the United States, analyze the slave experience with particular emphasis on black resistance and resiliency, and identify the economic, political, and social factors that shaped and were shaped by African slaves, their descendants, black communities and institutions, and plantation society. If we want to understand the US (and not only the South), but we also need to know something about how human commerce and those that became commodities profoundly shaped the nation. By examining first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians, we trace the origins and narratives of Africans in America and their descendants. We seek to answer, among others, the following questions: Why were Africans enslaved? What did Africans and their descendants experience in slavery in the Americas? What did free and freed African Americans experience in the Civil War era? What influence did African Americans have on the North and South conflict and its resolution? In addition to treating the above questions, I intend to return often to two major content themes. First, this class is concerned with tracing the historical contours of the African American experience in America, noting the similarities in experiences of different gender, age, and (dis)ability categories and yet important variations over time and place. Understanding this experience is crucial for a comprehensive understanding of American history. Second, we explore the changing influences of labor and capitalism and how they shape people, places and institutions. We note in this course that African Americans fundamentally affected the social and economic lives and futures of the world, underscoring the global relevance of this history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2885 Migration, Mobility, and Movement in Africa (4 Credits)**

This course will span the precolonial, colonial, and postcolonial eras of African history to consider narratives of historical migration within and beyond the continent. Central to these narratives are ideas of indigeneity and foreignness, firstcomer and newcomer status, articulated in the colonial and postcolonial period as differences of race and ethnicity. Through this course, students will be introduced to the historiography of migration in Africa, as well as theories and methodologies based on linguistics, oral traditions, and archaeology. We will begin with the Bantu expansion patterns of second millennium BCE up to 1500 CE, considering the linguistic trajectory that this migration took in considering the origins of modern language groups on the continent. We will then move on to Indian and Atlantic Oceanic networks of trade and migration, including the slave trades that led to the dispersion of peoples both within and outside of the continent, and the creation and recreation of kinship groups and polities. We will consider the history of the mfecane in southern Africa, or the period of dispersal and warfare that led to wide-scale migration throughout the region in the nineteenth century. We will also explore the histories of migration to the continent by European colonizers as well as the settlement of communities from the Middle East and South Asia as part of systems of indentured labor as well as free migration. Finally, this course will take a look at contemporary issues of citizenship and xenophobia in postcolonial nations. All required readings for the course will be posted online.

**INTS 3017 The Revolutions of Black, Brown, and Indigenous Peoples: Violence and Nonviolence (4 Credits)**

This course focuses on revolutions of black, brown and indigenous people in the Americas, ones historically forgotten in academia, as well as the issue of violence and nonviolence in the Chinese, Indian, Tibetan and South African revolutionary movements. It will set this glaring omission and rich discussion in the context of the eugenics which marked the study of international relations and sociology, including of revolutions, in the United States in the 1920 and 1930s and whose influence continues until now. We will begin from Robert Vitalis's surprising *White World Order*, *Black Power* which underlines the central role of W.E.B. Dubois in challenging these racist disciplines. We will also read Aldon Morris's *The Scholar Denied* on Dubois' founding of an anti-racist American sociology and how, for political reasons, this came to be denied by the famous, egregiously racist "Chicago" school of Robert Park. We will begin from the great struggles – black soldiers on both sides in the American Revolution and how black Patriots played the decisive role on the American side, benefiting all revolutionaries (Gilbert, Black Patriots and Loyalists), the great insurrection of people who were enslaved which made Haiti (CLR James, *Black Jacobins* and Elizabeth Fick, *The Making of Haiti*), and the role of pardos (blacks) and indigenous people in Venezuela (Robin Blackburn, *The Overthrow of Colonial Slavery*) – in the New World. We will trace the role of those who were enslaved in forging many great revolutions – each of which is vital to creating a free society for all - which have been hidden academically and historically, by a kind of amnesia. We will then explore the debates about violence and nonviolence central in mass uprisings against colonial racism and domination in China, Tibet, India, and South Africa. We will consider explanations of why such major revolutionary movements have been long "forgotten" in academic study and ask what new light these revolutions cast on the standard trajectory of European revolutions. At the end of the 19th century, W.E.B. Dubois, for example, refers to the "color line" in projecting twentieth century movements. In academia, the past is often interpreted in a "too European" and, unselfconsciously, "White" (often "forgetting" colonialist and racist crimes...; hostile to ordinary white folks) idiom. In addition, we will discuss the revolution from below in China - rarely considered with dispassion or even sympathetically, though Theda Skocpol and William Hinton do - as well as the oppression/ethnic cleansing of minorities in China, particularly in Tibet. We will thus contrast some strengths and weaknesses of regimes emerging from violent revolutions in the Americas, Haiti, and China, and look at attempts to forge mass nonviolent revolutions and learn from/modify Gandhi in India, Tibet and South Africa. We will also compare movements of indigenous people in the Americas, Palestinians, and Tibetans against settler colonialism. Finally, we will ask to what extent the nonviolent transition to a new regime actually limits future oppression and violence in India and South Africa. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3365 African Development (4 Credits)**

This is an undergraduate course on Development in sub-Saharan Africa (SSA). It introduces the student to the main issues and themes confronting contemporary African development. It draws on literature from development economics, history, comparative politics, sociology, anthropology, geography and international relations, as well as a broad range of country case studies. The course reviews patterns of development in the SSA region. It then engages with the main theories of economic growth and development and evaluates their application to Sub-Saharan Africa. The main issues include the impact of Africa's geography, natural resources endowments and climate; the legacy of slavery and colonialism; independence, state formation and failure; patrimonialism, clientelism and corruption; Africa's economic crisis and reform efforts; foreign aid and debt; democratization and; reflections on Africa and the sustainable development goals. The course will equip the student with knowledge and skills to be a positive and effective player in the area of African development. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3590 Politics in Africa: A Theoretical Approach with a Comparative Perspective (4 Credits)**

This course introduces students to basic concepts and arguments in the study of contemporary African politics. The focus is on the politics in Africa post-independence. The course emphasizes theory in a comparative perspective as a way to understand politics in Africa. The basic question is whether politics differ so much in Africa as to be in a category by itself or is it simply a variation on patterns, habits, and institutions found in other regions and countries in the world? The course goal is to provide students with important concepts so as to gain a better understanding of processes in Africa and the problems that in some fashion or other account for the continent's current marginality in the world and persistent underdevelopment. In addition, the course exposes students to the application and usefulness of general theories of development in comparative politics. Prerequisites: INTS 1500 and INTS 1700.

**MUAC 1024 Black Sacred Music: A Survey (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

**MUAC 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2251.

**MUEN 3730 American Heritage Chorale (1 Credit)**

This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3731 The Spirituals Project Choir (0-1 Credits)**

This ensemble will explore African American spirituals as an art form, tradition, and tool for social change through performance, reading, and listening. Because the core of this ensemble is a multi-ethnic, multi-generational community choir, students will have the unique opportunity to join with and learn from a group of singers immersed in this musical tradition. Students will participate in 2-3 performances over the course of the term, the majority of which will be outside of Lamont. Through performance and study of spirituals and related music, students will gain a musical and cultural understanding of this dynamic music and gift from African Americans to the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2026 Race: Black, Jew, Other (4 Credits)**

In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, "negritude," "the wandering Jew," and "otherness" by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman's work on the "Jew's Body" and "Jewish Self-Hatred," Bernasconi's work on the phenomenology of race, and discourses of "Other-as-disease" in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with JUST-2026 and PHIL-2026.

**RLGS 2108 Islam in the United States (4 Credits)**

A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with "American" accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2116 American Mythology (4 Credits)**

Myths convey social and moral values. Myths, moreover, serve as conceptual models for society and furnish "symbolic articulation of the social patterns" of a given society. In this class, students will establish clear connections between social order and the myths that sustain it, against the view that myths are merely imaginary, misguided perceptions of reality with little social value. In this course, you will need to ask yourself, "How do each of these myths translate into social behavior? In other words, how have these myths been acted out historically and how are they "performed" today? The United States of America has always had a strong, mythic sense of identity, mission, and destiny. It is worthwhile to reflect for a semester on how the "idea of America" has taken shape and is continuing to evolve and diversify. Robert Bellah introduced the influential concept of an American "civil religion"—a secular myth of America. In addition, we must understand that America is the result of contact between at least three different groups of people: Native Americans, Europeans, and Africans. The functional equivalents of creed, scripture, prophets and religious mission are seen in the Declaration of Independence, the Founding Fathers and Manifest Destiny. Concepts of freedom, the pursuit of life, liberty, and happiness, democracy, and the right to bear arms flow from these myths. Beyond the notion of a master myth of America, we will discover that there are other myths of America that are themselves proper objects of study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2250 Introduction to African American Religions (4 Credits)**

This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with MUAC 2251.

**RLGS 3453 Is God a Racist Sexist?: Black Liberation and Womanist Theology (4 Credits)**

What is God's race? Does God have a gender? Is God on the side of the oppressed? Black liberation and Womanist theologies have asked these questions based on experience of black oppression in the context of the United States. African Americans have compelled to make sense of God in light of chattel slavery, Jim Crow laws, the Civil Rights Movement, and the Black Power Movement. This questioning continues in light of today's social environment. This seminar course will discuss the many strands of liberation theology in the United States, including Womanist theology. In addition to black liberation theology's methodologies and its challenges to the theological discipline, we will explore the origins and development of theological discourse in the late 1960s during the later part of the Civil Rights Movement and the emergence of the Black Power Movement. Black Theology is a theological perspective which draws on the diverse sources, including religious experience, art, literature, music, and lived narratives. These sources will inform our study. Students will engage critical voices that have shaped the movement such as James Cone, but also engage critiques of Cone and Black Theology. The course will also explore how liberation theologies attempt to deal with the problems of race, class, and gender. Student will be introduced to theological construction in African American communities and analyze the similarities and differences between these theological constructions.

**RLGS 3642 Martin Luther King, Jr., Malcolm X and Civil Rights (4 Credits)**

In this course, students will explore the lives and religious thought of Martin Luther King, Jr. and Malcolm X, two of the most prominent black religious leaders during the height of the US Civil Rights Movement, often perceived as ideological opposites. Through engaging with their autobiographies, speeches, students will compare and contrast their thoughts on religion, race, and politics in the United States. During the course, students will be able to identify religious and political similarities and differences between the two leaders. We will also explore the development of their religious and ideological shifts in the context of the struggle for civil rights. Ultimately, we explore how their vision for racial justice developed into a call for social and economic equality and human rights.

**SPAN 2802 Afro-Latinos in the US (4 Credits)**

Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 3600 Caribbean Blackness: Confictive Identity (4 Credits)**

Introduces the student to the Caribbean region, particularly examining cultural characteristics of the Spanish speaking Caribbean, with an emphasis on race relations and the contributions of peoples of African descent. The focus is interdisciplinary and includes readings on anthropology, religion, and history among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3800 Central American Blackness: Forgotten Roots (4 Credits)**

Introduces the student to the Central American region, with an emphasis on race relations and the cultural contributions of peoples of African descent. The focus is interdisciplinary and includes readings in history and demography among other subjects, together with close readings of literary texts.

Prerequisite: SPAN 2350 or equivalent.

**WRIT 2555 Diverse Rhetorics (4 Credits)**

Rhetoric's origins in classical texts, in the western canon, developed to serve early forms of democracy and civic participation. Despite classical rhetoric's formative impact, plenty of languages and cultures have their own means of persuasion and civic participation. This course introduces ways that rhetoric is practiced in diverse contexts, not as a stable idea, but as an adaptive practice situated in cultures, identities, and languages, bridging writer, audience and purpose. This course starts with classical Western rhetoric, but then explores the varied practices and theories of, for example, African American, Asian, Latinx, Indigenous, and queer rhetorics, to name a few. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**WRIT 3600 Black Studies Capstone (4 Credits)**

This capstone course is designed for students completing the Minor in Black Studies at the University of Denver. The primary goal of this course is to create an original capstone project that demonstrates synthesis of their study in the field and deepens their skills in research. Black Studies minors should plan to enroll in BLST 3600 after completing all course work for the minor. As part of this capstone course, each student will complete a capstone project, of their own design, that explores some aspect of Black/African American life, history, culture, or experience. This course encourages creative capstone projects that allow students to present their work in a form other than the standard written thesis model. This course will guide the capstone projects for students conducting intensive research on topics in Black Studies. Drawing from disciplinary and interdisciplinary methodologies, theories, and concepts in the humanities and social sciences, capstone project topics will cover broadly defined themes in Black Studies such as the effects of Atlantic slavery on the United States, the Americas, Africa, and Europe; the Black freedom struggle in the United States; and women, gender, and sexuality in Black America. Through a collaborative learning process, students will define clear project objectives, refine their analytical skills, effectively engage major issues in their research materials, and make critical intellectual interventions. Students will be encouraged to critically explore topics from courses they have taken in Black Studies and related disciplines as topics for their capstone research projects.

## Business Administration Program

The Business Administration minor, which is only open to non-business majors, requires coursework in business law, accounting, finance, management and marketing. This minor allows students to learn basic knowledge about all business areas.

The Business Administration minor, which is only open to non-business majors, requires coursework in business law, accounting, finance, management and marketing. This minor allows students to learn basic knowledge about all business areas.

### Requirements for the Minor

24 credits, including:

Code	Title	Credits
BUS 1440	The Fourth Industrial Revolution <sup>1</sup>	4
MGMT 2100	Leading High Performance Organizations	4
LGST 2000	Foundations of Business Law <sup>2</sup>	4
MKTG 2800	Introduction to Marketing <sup>3</sup>	4
ACTG 2200	Introduction to Financial Reporting	4
FIN 2800	Financial Decision Making	4
<b>Total Credits</b>		<b>24</b>

<sup>1</sup> Students pursuing both the Business Administration minor and the Entrepreneurship minor will **not** be able to count BUS 1440 toward both minors simultaneously. Instead, an additional 4-credit EVM course will be needed in the Entrepreneurship minor.

<sup>2</sup> Students pursuing both the Business Administration minor and the Business Ethics and Legal Studies minor will **not** be able to count LGST 2000 toward both minors simultaneously. Instead, an additional 4-credit LGST course will be needed in the BELS minor.

<sup>3</sup> Students pursuing both the Business Administration minor and either the Marketing minor or Sales Leadership minor will **not** be able to count MKTG 2800 toward both minors simultaneously. Instead, an additional 4-credit MKTG course will be needed in the Marketing minor or Sales Leadership minor.

**BUS 1099 Daniels Professional Development Program Part I (0 Credits)**

Some experiences are essential to a student's development, but don't fit well within the confines of a traditional course. This is a face-to-face zero-credit course intended to provide students with a framework to master professional development through experiential-based learning opportunities that will give them the necessary tools to identify a career path prior to graduation and succeed in their career development. Key topics include resume and cover letter development, understanding the business majors and associated career paths, and professional skill development such as appropriate business dress, communication, and etiquette.

**BUS 1440 The Fourth Industrial Revolution (4 Credits)**

This course provides a practical glimpse into the future of the global and competitive nature of business. From product ideation to product deployment, this course introduces students to business's role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in teams, and product/service innovation and creativity are introduced. Key 4th industrial revolution technologies such as artificial intelligence (AI), the Internet of Things (IoT), distributed ledger technology and cryptocurrency, augmented/mixed/virtual reality, additive manufacturing, and autonomous, robotics, and drones are also introduced.

**BUS 2099 Daniels Professional Development Program Part II (0 Credits)**

This course is the second part of the Daniels Professional Development Program (DPDP). Similar to DPDP I, this course will expose students experiential-based learning opportunities that will provide the necessary tools and skills to successfully land an internship and full-time position prior to graduation. This will include attending a career fair, completing a mock interview and receiving real-time feedback, creating a professional LinkedIn profile, and attendance to career services workshops focused on professional development. Prerequisite: BUS 1099. Restriction: Must be pursuing BSBA or BSACC degree.

**BUS 3000 Strategic Business Communications (4 Credits)**

Leading CEOs know what multiple studies confirm: competence in communication is an essential skill for entry-level positions in business, and excellence in communication is necessary to become an industry leader. This course is designed to allow extensive time to practice and receive expert coaching. Since communication skills develop over time, you will build proficiency through multiple oral and written assignments that increase in rigor and complexity. The assignments will give you the individual and team skills you will need to be successful in both your academic and professional career. The quarter culminates in a client project addressing real campus or community issues. Prerequisite: BUS 1099 (with Passing - "P" grade). Restriction: Must be pursuing BSBA or BSACC degree.

**BUS 3099 Daniels Professional Development Program Part 3 (0 Credits)**

Some skills and certifications are essential to student success in landing an internship and full-time job at graduation but do not fit well within the confines of a traditional course. This zero-credit course will provide students with a platform to master skills to prepare them for a career in the Fourth Industrial Revolution. Relevant skills and certifications will vary based on a student's major and career interests. Common examples include Google Analytics, the Advanced Excel Certification, Python, Salesforce, and Robotic Process Automation.

**BUS 3350 Overview of Outdoor Recreation Industry (4 Credits)**

This course is a survey of the outdoor recreation industry, providing an overview of the size, growth, sectors and economic impacts of the industry. This course will lay the foundation for the LORI Program, as the remaining courses will dive deeper into the topics. This course will also begin to examine external drivers for the industry, including the connection between policy and outcomes, the inherent tension between access and conservation, as well as economic trends driving the industry. This course will provide an overview of all facets of the outdoor recreation industry, including an examination of the economic impacts by industry sector. In order to better understand the intersection of the recreation economy and quality of life, this course will focus on the five common principals of the outdoor industry as codified in the Confluence of States accords: 1) Conservation & Stewardship; 2) Education & Workforce Training; 3) Economic Development; 4) Health & Wellness; and 5) Opportunity & Experience. As the program develops, students will also have an experiential learning component early in the quarter at the University of Denver Kennedy Mountain Campus focused on developing leadership skills.

**BUS 3353 Business Models and Operations in Outdoor Rec Industry (4 Credits)**

This course introduces students to the concept of a business model canvas, what goes into the revenue and cost streams, and the necessary factors that need to be controlled to sustain a business. Students will be introduced to emerging models in the outdoor, retail and hospitality sectors, and will learn how to differentiate between business models in the product based vs. services-based industries. They will also get an appreciation of the capital structure needed to sustain a business in the outdoor recreation industry, and the implications of capital intensity for business models. This course also addresses key considerations for operating a business in the outdoor industry - including budgeting and forecasting the business, as well as the legal and business methods by which operators in the outdoor industry manage their enterprise risk. Topics to be addressed in the risk management portion of the course include releases, signage, preventative measures (e.g., avalanche reduction and patrolling), insurance, compliance, and workers' compensation. Students enrolled in this course will learn these concepts through a case study that will run the length of the course, selecting an actual business in the industry and then apply those concepts to a newly created business model.

**BUS 3355 Sustainability and Markets in Outdoor Recreation Industry (4 Credits)**

This course provides an overview of environmental and social sustainability issues through a business lens, and shares insights on sustainability risks, strategy, and markets for enterprises in the outdoor industry. These issues are important for leaders in the outdoor recreation industry because a high percentage of their current and future customers care about sustainable business practices and environmental stewardship. We will review sustainability issues, emerging trends, regulatory changes, and innovative practices in the outdoor industry to integrate sustainability into enterprise risk management, operations, and strategy. Students will gain an overview of the main issues and challenges in sustainability, explore priorities and strategies being used in the outdoor industry, and learn frameworks and tools to help lead organizational change. We will review sustainability trends, material ESG risks, approaches to carbon and natural resource management, and how good data and information can improve sustainability management, collaboration, and communication. Organizations are increasingly focused on creating sustainable and inclusive growth that builds competitive advantage by providing value to customers, adapting to climate-related risks, and addressing community and social challenges in a sustainable way.

**BUS 3380 Legal Framework of Outdoor Recreation Industry (4 Credits)**

This course explores the complex legal and regulatory landscape that governs the outdoor recreation industry. Students will examine various laws, regulations, and legal principles that affect outdoor recreation activities, including land use, public policy, environmental impacts and various regulatory regimes. Planning, developing and operating outdoor recreation facilities requires an understanding of how to obtain multiple private, federal state and local authorizations. Students will become familiar with these regulatory regimes beginning with land use authorizations from inception through operations and expansions. The course will also analyze public policy at the federal, state and local levels of government and how individuals or organizations can impact the outcomes through advocacy.

**BUS 3399 Outdoor Rec Industry Capstone (4 Credits)**

This culmination/capstone course integrates knowledge and skills acquired throughout the academic progression for Leadership in the Outdoor Recreation Industry. For the minor, students will complete work on their business case created in BUS 3353 Business Modeling and Operations in the Outdoor Recreation Industry, a significant project that addresses real-world challenges in the outdoor recreation industry. The course will emphasize critical thinking, business strategy, marketing, sustainability, and community engagement. For the graduate concentration, this culmination/capstone course will provide graduate students with an opportunity to synthesize and apply their knowledge and skills they've learned through coursework and professional experience and apply that to the context of the outdoor recreation industry. Students will engage in a comprehensive strategic management project that addresses complex industry challenges. The capstone/culmination course emphasizes critical analysis, strategic planning, leadership, and legal and regulatory framework preparing students for leadership roles in the industry. Pre-requisite: BUS 3350 and BUS 3353.

**BUS 3441 The IoT Build (2 Credits)**

The Internet of Things (IoT) is moving rapidly toward "The Internet of All Things." From water bottles to clothing to furniture, everything in our everyday world will be connected to the Internet, sharing information about our lives. In this course, you'll get hands-on experience building IoT applications. You'll learn how to gather data from sensors such as weight, occupancy, sound, proximity, pressure, gas, and infrared. By 2030, there will be 500 billion devices connected to the Internet. This class will show you how.

**BUS 3442 Python Programming (4 Credits)**

Python is a general-purpose, high-level programming language suitable to a wide variety of tasks in today's interconnected and technology-based world. Python is also an object-oriented language, a necessity for real-time, dynamic, and web-based applications. In this course, you'll learn how to apply Python to basic programming elements such as data types, arithmetic operations, control structures, methods/functions, arrays, and file handling.

**BUS 3446 Blockchain and Cryptocurrency (2 Credits)**

Bitcoin was created in 2009 and eight years later it reached a record high of \$20,000 per coin. Bitcoin is a virtual currency, or more commonly known as a cryptocurrency, that is managed by a decentralized network of users instead of a government or central bank. Anonymity, low transaction fees, built-in scarcity, and borderless transactions are some of the benefits that Bitcoin provides. This course will provide a high-level overview of blockchain and cryptocurrency, starting from the beginning with the basic fundamentals of blockchain technology. You will gain a comprehensive understanding of blockchain, what it is, and how it is used in cryptocurrency and the opportunities available with decentralized applications. We will explore the concept of money as a medium of exchange for goods and services and how cryptocurrencies such as Bitcoin aim to replace traditional Fiat currencies.

**BUS 3450 Blockchain, Cryptocurrency & FinTech: What You Need To Know (4 Credits)**

Bitcoin made blockchain technology famous, it highlighted a transformative technology that facilitates the transfer of value between two entities without a trusted 3rd party. Blockchain technology has the potential to disrupt industries, financial systems and social norms. This course will study the fundamentals of Blockchain, cryptocurrency and financial technology (FinTech). We will begin with a high-level overview on the origin and concept of money and how it is valued. It will progress through an in-depth dive into the business of Blockchain, Bitcoin, Smart-Contracts and Financial Technology. This course will expose students to the opportunities, risks and challenges an immutable, decentralized system based on consensus presents. We will explore the consequence and application of blockchain technology in decentralized applications, DAOs, non-fungible tokens (NFTs), and the Metaverse. No prior knowledge of Blockchain, Cryptocurrency, and FinTech is required to take this course.

**BUS 3700 Topics in Business (0-10 Credits)****BUS 3800 Business for the Public Good (4 Credits)**

The vision of Business for the Public Good is to provide an impactful culminating experience in the Daniels Core in which students think critically and creatively to address a societal issue through the lens of business. In this course, students will identify a real-world problem and use business tools and knowledge to address the issue. Topics include stakeholder management, corporate social responsibility, models of business, globalization, the natural environment, technology, public policy, innovative design thinking, among others. This course is designed to explore the place of business in the context of society. The course will familiarize students with the relationships among the private, public and nonprofit sectors. The course will challenge students by engaging them in projects focused on pioneering business to achieve public good and public benefit. Enforced Prerequisite: Business Core 3099 (P). Enforced Prerequisite or Co-Requisite: MGMT 3000.

**BUS 3980 Internship (0-4 Credits)**

Initial for-credit internship experience for students pursuing a business major, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

## Business Ethics and Legal Studies

Office: Daniels College of Business, Suite 687

Mail Code: 2101 S. University Blvd. Denver, CO 80208

Phone: 303-871-3213

Email: [nikol.harder@du.edu](mailto:nikol.harder@du.edu)

Web Site: <https://daniels.du.edu/business-ethics-legal-studies/>

Today's managers, professionals and entrepreneurs operate in a complex legal environment that affects all facets of an organization. Firms need business graduates with knowledge of the legal and regulatory climate for jobs in human resources, marketing, purchasing and environmental affairs. Business and trade associations depend on staff members who monitor legislative and judicial decisions. A Business Ethics and Legal Studies minor provides a foundation for careers in the public or private sector.

## Minor Requirements

The Business Ethics & Legal Studies minor is available to all undergraduate students. To complete the minor, business majors must take 16 credits of coursework, and non-business majors must take 20 credits of coursework.

"LGST 2000 Foundations of Business Law" is a prerequisite for all other Business Ethics & Legal Studies (LGST) courses unless permission is received in advance from the BELS Department Chair. Business students take LGST 2000 as part of the Business Core, and thus only require an additional 16 credits in order to complete the minor.

Credits towards the minor may come from any LGST course, including the following courses:

Code	Title	Credits
<b>Prerequisite Course <sup>1</sup></b>		
LGST 2000	Foundations of Business Law	4
<b>Legal Studies Courses</b>		
Any "LGST" course can be counted toward the minor. Examples include:		16
LGST 2570	Contracts for Business	
LGST 2910	Daniels Ethics Fellows I: Community Impact	
LGST 2920	Daniels Ethics Fellows II: Business Impact	
LGST 2960	Employment Law & Ethics	
LGST 3020	Sports Law & Ethics	
LGST 3030	The Supreme Court & Your Life	
LGST 3100	Business Ethics & Social Responsibility	
LGST 3200	Ethics & Your World	
LGST 3330	Advanced Constitutional Law	
LGST 3400	White Collar & Corporate Crime	
LGST 3440	The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century	
LGST 3450	Impact of Driverless Mobility: Business, Legal & Ethical Implications	
LGST 3510	CEOs and Corporate Governance	
LGST 3550	Topics in Business Law II	
LGST 3600	Business and Global Values <sup>2</sup>	
LGST 3650/4650	Artificial Intelligence: Ethics & Governance	
LGST 3700	International Business Law <sup>2</sup>	
LGST 3701	Topics in Legal Studies	
LGST 3720	Negotiation & Conflict Resolution in Business	
LGST 3740	Daniels Fund Ethics Consortium Case Competition Seminar	
LGST 3980	Internship	
LGST 3991	Independent Study	
<b>Additional Coursework</b>		
Up to one relevant course from another department may be counted towards the BELS minor with prior written approval from the BELS department chair.		
<b>Total Credits</b>		<b>20</b>

<sup>1</sup> LGST 2000 will not show up in the minor area for business students. Business students take this course as part of the Business Core, and only require 16 additional hours in order to complete the minor.  
Students with a minor in both Business Administration and Business Ethics and Legal Studies (BELS) will **not** be able to count LGST 2000 toward both minors simultaneously.

<sup>2</sup> International Business majors pursuing a minor in Business Ethics and Legal Studies will have LGST 3600 count toward their International Business major requirements and must take a different BELS course to meet their credit requirements for the BELS minor. Additionally, such

students who take LGST 3700 must decide whether to count that course towards the BELS minor or International Business major, as it cannot count towards both.

**LGST 2000 Foundations of Business Law (4 Credits)**

Managerial perspective on the role of law and its relationship to business environment; emphasis on American legal system (history of law, courts and civil procedure), private law (business torts, contracts, corporate responsibilities and business ethics), and governmental intervention (constitutional law, employment law, white collar criminal law and corporate/securities law). Prerequisites: Grade of C- in BUS 1440 and sophomore standing.

**LGST 2570 Contracts for Business (4 Credits)**

This course includes a comprehensive discussion of major contractual topics—including drafting and negotiation - and how they relate to legal and ethical elements of business. Prerequisites: LGST 2000.

**LGST 2910 Daniels Ethics Fellows I: Community Impact (2 Credits)**

This course comprises the first half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact their community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent community leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and community leaders, and (5) engage in a series of online quizzes designed to evaluate ethical reasoning and growth.

**LGST 2920 Daniels Ethics Fellows II: Business Impact (2 Credits)**

This course comprises the final half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact the business community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent business leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and business leaders, and (5) engage in a serious writing assignment designed to evaluate ethical reasoning and growth. Prerequisite: LGST 2910.

**LGST 2960 Employment Law & Ethics (4 Credits)**

This course will introduce students to the key laws, rules and regulations governing employment in the United States. The course will explore workplace issues that arise because of the intersection of the hierarchical nature of organizations and the diversity of employees. As such, we will discuss workplace policies, practices and operations and their interactions with employment laws. This is an interactive course that will address issues such as: What is work? How do we value it? Who is an employee? What are the rights of employers? What are the rights of individuals in the workplace? What are some of the ethical issues faced by employers and employees, and how can both groups successfully navigate them? Graduate students will be assigned an independent study project focused on issues(s) faced by the Chief Human Resources Officer of an organization - a leader and strategic business partner in the organization. Prerequisites: LGST 2000 for undergraduate students; no prerequisite for graduate students.

**LGST 3020 Sports Law & Ethics (4 Credits)**

Sports Law and Ethics offers a comprehensive examination of the legal considerations pertaining to amateur (NCAA and Olympic Movement) and professional sports (NFL, NHL, NBA, MLS, EPL) in North America and Europe. The course delves into the laws and regulations that impact athletes and the leagues they play. The curriculum includes in-depth topic overviews, interactive class discussions, and guest lectures on contemporary issues and sports law jurisprudence.

**LGST 3030 The Supreme Court & Your Life (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3100 Business Ethics & Social Responsibility (4 Credits)**

The purpose of this course is to introduce students to ethical concepts, theories and issues as they relate to business and managerial decision making. A primary focus includes topics such as employee privacy, sales responsibility, sexual harassment, discrimination, intellectual property, whistle blowing, and career/family conflicts. The course is also designed to introduce students to more general approaches or ways of thinking about ethics, and students grapple with some of the basic and fundamental problems of ethics. Cross listed with MGMT 3100. Prerequisites: LGST 2000.

**LGST 3200 Ethics & Your World (2 Credits)**

This course evaluates the how ethical decision-making can benefit a person professionally, personally, and as part of a community operating under a social contract more generally. This holistic approach evaluates ethics from many different viewpoints such as: (1) a professional calling, (2) happiness versus joyfulness, (3) moral sacrifices, (4) money and ethics, (5) beauty and ethics, (6) popularity and esteem and ethics, (7) priorities, (8) daily motivation, (9) ethical decision-making frameworks, and (10) a consistent and moral worldview. The ethical decision-making frameworks include Utilitarianism, Deontology, Virtue Ethics, Ethical Egoism, Libertarianism, and the Real Rabbits approach.

**LGST 3330 Advanced Constitutional Law (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution applies to each case and how the case makes its way to the Court, (2) each case is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion resonate in the business world. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and "white collar" crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3510 CEOs and Corporate Governance (4 Credits)**

The course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Each student will complete four papers or projects during the quarter, which will focus on a single corporate case study. The course projects will be designed to address and research the major dimensions of the course. Guest speakers will include corporate CEOs, board members, corporate general counsel, regulators, and investors.

**LGST 3540 Impact of Driverless Mobility (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3550 Topics in Business Law II (4 Credits)**

Law relating to general and limited partnerships, corporations, property, securities law, professional responsibilities and related studies. Accounting students only. Prerequisites: LGST 2000.

**LGST 3600 Business and Global Values (4 Credits)**

This course explores the current state of globalization and its impact on business. In the context of ethical and legal norms, the course will examine how formal governmental and intergovernmental organizations (IGOs), as well as non-governmental organizations (NGOs), pressure business and affect business strategy and decisions. The course will also examine how business can adapt to comparative values and cultures in the international system, as well as universal values, and analyze issues and cases from both idealist and realist perspectives. Students will apply analytical tools from ethics, law, and public policy in examining leading business cases on the following topics: global terrorism and political risk. Prerequisite: LGST 2000.

**LGST 3700 International Business Law (4 Credits)**

Introduction to public international law (rights and duties of states and intergovernmental organizations) and to private international law (rights and duties of individuals, businesses and nongovernmental organizations) in international affairs. Key issues include alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of business and legal issues. Prerequisites: LGST 2000.

**LGST 3701 Topics in Legal Studies (1-4 Credits)**

Exploration of various topics and issues related to business ethics and legal studies. Prerequisites: LGST 2000.

**LGST 3720 Negotiation & Conflict Resolution in Business (4 Credits)**

This course is a rigorous exploration of negotiating business deals. Students will learn to develop strategies in a variety of conflict situations. Students will work closely with the professor and each other in simulations to address negotiation challenges, engage in mediation and arbitration, and become effective masters at resolving conflict. Prerequisites: minimum grade C- in LGST 2000.

**LGST 3740 Daniels Fund Ethics Consortium Case Competition Seminar (2 Credits)**

The Daniels Fund Ethics Consortium Case Competition — a component of the Daniels Fund Ethics Initiative Collegiate Program — exposes students to a thought-provoking business ethics case on principle based crisis management in business. The competition builds on the principle-based ethical framework central to decision making in a complex business environment. Students in this class will learn how to work in teams in order to collaboratively analyze, present, and respond to various scenarios of businesses in crisis as well as respond to questions posed by a panel of judges. The course challenges students' ethical reasoning and provides a significant opportunity to increase awareness of the importance of principle-based ethics for business crisis management.

**LGST 3980 Internship (1-5 Credits)****LGST 3991 Independent Study (1-8 Credits)**

Independent research/study; requires written report. Prerequisites: LGST 2000 and instructor's permission.

## Business Information and Analytics

Office: Daniels College of Business, Suite 580

Mail Code: 2101 S. University Blvd. Denver, CO 80210

Phone: 303.871.3695

Email: [bia@du.edu](mailto:bia@du.edu)

Web Site: <http://daniels.du.edu/business-information-analytics/>

Analytics is a challenging and exciting field that helps people make important informed decisions based on quantitative information. Business analysts make extensive use of data modeling, statistical techniques, and scenarios to manipulate data to find meaning, explain causation, and make predictions.

Currently, massive amounts of structured and unstructured data are collected and stored by computers as a result of business and society's greater dependence on information technologies and software applications to transact business and every-day life. As such, data analytics skills are highly portable and becoming a frequently sought competency in workers. Analytics is a valuable partner to almost any field of study, including engineering, agriculture, social science, medical science, environmental science, forestry, marketing, accounting, and finance.

## Business Analytics Major

### Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 102))

Minimum of 44 credits. Requirements include:

Code	Title	Credits
INFO 3100	Automating Business Processes	4
INFO 3140	Foundations of Information Management	4
INFO 3200	Data Mining and Visualization	4
INFO 3240	Enterprise Information Management	4
INFO 3300	Data Warehousing and Business Intelligence	4
INFO 3340	Project Management and Simulation	4

INFO 3400	Complex Data Analytics	4
INFO 3440	Optimization Modeling	4
INFO 3500	Capstone/Senior Project	4
<b>Electives</b>		
Any 2000- or 3000-level INFO elective <sup>1</sup>		4
Any 2000- or 3000-level INFO elective <sup>2</sup>		4
<b>Total Credits</b>		<b>44</b>

<sup>1</sup> Students may complete one non-INFO course for 4 credits to count toward major electives to be selected from these options: GEOG 3100, MKTG 2930, or MKTG 3485.

Please note that BIA majors pursuing a major or minor offered by the Marketing Department or the Department of Geography and the Environment cannot count one of these courses toward both programs simultaneously. (For example, MKTG 2930 would count only toward the BIA major or the MKTG minor, but not both programs.)

<sup>2</sup> Maximum of 4 internship hours will count towards the 8 hours of major electives required

## Business Analytics Minor

### Minor Requirements

The Business Analytics minor is available to all traditional DU undergraduate students. Students may not pursue both the BIA minor and the Statistics minor.

Minimum 24 credits for non-business majors and 16 credits for business majors. Requirements include:

Code	Title	Credits
<b>Requirements for non-Business majors:</b>		<b>24</b>
INFO 1010	Analytics I: Data Management and Analysis <sup>1</sup>	
INFO 1020	Analytics II: Business Statistics and Analysis <sup>1</sup>	
INFO 2020	Analytics III: Business Modeling and Analysis <sup>2</sup>	
INFO 3100	Automating Business Processes	
INFO 3140	Foundations of Information Management	
Any 3000-level INFO elective		
<b>Requirements for Business majors:</b>		<b>16</b>
INFO 3100	Automating Business Processes	
INFO 3140	Foundations of Information Management	
Any 3000-level INFO elective <sup>3</sup>		
Any 3000-level INFO elective <sup>3</sup>		

<sup>1</sup> BSBA and BSACC students take INFO 1010 and INFO 1020 as part of the business core. INFO 1010 and 1020 contain Microsoft Office Specialist Certification and additional fees. Microsoft Certifications are encouraged for non-business majors, but they are not required to complete this minor. Please contact Daniels Undergraduate Programs with questions.

<sup>2</sup> Non-business majors complete INFO 2020, unless they have completed an equivalent regression course. Please contact Daniels Undergraduate Programs with questions.

<sup>3</sup> Business Analytics minors must complete all of their minor requirements through INFO prefix coursework; GEOG or MKTG electives that are available to Business Analytics majors will not fulfill BIA minor requirements.

## Statistics Minor

The Statistics minor is available to all traditional DU undergraduate students.

### Minor Requirements

Students may not pursue both the Statistics minor and the BIA minor.

Minimum 20 credits for non-business majors and 16 credits for business majors. Requirements include:

Code	Title	Credits
<b>Requirements for non-Business majors:</b>		<b>20</b>
INFO 1010	Analytics I: Data Management and Analysis <sup>1</sup>	
INFO 1020	Analytics II: Business Statistics and Analysis <sup>1</sup>	

INFO 2020	Analytics III: Business Modeling and Analysis <sup>2</sup>
Select two of the following courses:	
INFO 3100	Automating Business Processes
INFO 3200	Data Mining and Visualization
INFO 3340	Project Management and Simulation
INFO 3400	Complex Data Analytics
INFO 3440	Optimization Modeling
INFO 3700	Topics in Business Analytics

**Requirements for Business majors: 16**

Select four of the following courses:

INFO 3100	Automating Business Processes
INFO 3200	Data Mining and Visualization
INFO 3340	Project Management and Simulation
INFO 3400	Complex Data Analytics
INFO 3440	Optimization Modeling
INFO 3700	Topics in Business Analytics

<sup>1</sup> INFO 1010 and 1020 contain Microsoft Office Specialist Certification and additional fees. Microsoft Certifications are encouraged for non-business majors, but they are not required to complete this minor. Please contact Daniels Undergraduate Programs with questions.

<sup>2</sup> Non-business majors complete INFO 2020, unless they have completed an equivalent regression course. Please contact Daniels Undergraduate Programs with questions.

## Requirements for Distinction in the Major in Business Analytics

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, prerequisites, restrictions (e.g., the requirement that students have sophomore-level standing/have earned 45 credits to enroll), availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor in year 2 to develop an individual graduation plan for your specific needs.

### First Year

BUS 3099	0				
MGMT 3000	4				
	<b>16</b>		<b>12</b>		<b>12</b>
<b>Total Credits: 186</b>					

- <sup>1</sup> MATH 1200 or MATH 1951 fulfill requirements for Analytical Inquiry: The Natural and Physical World.
- <sup>2</sup> Complete Analytical Inquiry: Society & Culture and Scientific Inquiry: Society & Culture requirements. ECON 1020 is required for all Business majors, and this course fulfills half the requirements for Scientific Inquiry: Society and Culture.
- <sup>3</sup> Common Curriculum Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegreerequirements/>): Students are encouraged to complete Language or Scientific Inquiry: The Natural and Physical World sequences earlier in their studies; choose one for year 1 and the other for year 2.
- <sup>4</sup> INTZ 2501 is required for any student who studies abroad and may be taken in any quarter within the year prior to studying abroad.
- <sup>5</sup> If you are not an international student and you are not studying abroad, please work with your advisor to select a course to fulfill the Student International Experience Requirement (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>).
- <sup>6</sup> In year 1, distribute 12 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): BUS 1440, MGMT 2100 (Leadership Studies minor students fulfill this Business Core requirement by completing both LDRS 2017 and LDRS 2019), ECON 1020, BUS 1099 (0 credits), INFO 1010 & INFO 1011 (complete by fall of year 2). Students who are ahead in credits can work ahead in Common Curriculum requirements, General Elective/optional minor requirements, and Business requirements from year 2.
- <sup>7</sup> In year 2, distribute 16 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): Any Business courses not completed in year 1, INFO 1020 & INFO 1021 (complete by winter of year 2), INFO 2020 (complete by spring of year 2), LGST 2000, ACTG 2200, MKTG 2800, BUS 3000, BUS 2099 (0 credits).
- <sup>8</sup> In year 3, distribute 16 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): Any Business courses not completed in year 2, ACTG 2300, FIN 2800.

**INFO 1010 Analytics I: Data Management and Analysis (4 Credits)**

The amount of data businesses are able to maintain and process is growing exponentially, and the ability to manage that data successfully can give a business a tremendous competitive advantage. This course introduces the student to the business data landscape, as well as basic data management and analysis skills through spreadsheet and database applications. Student projects focus on data collection, data cleansing and mining, statistical and graphical analysis, basic modeling, and written presentation skills. Corequisite with INFO 1011.

**INFO 1011 Microsoft Excel Certification Lab (0 Credits)**

This course covers basic topics in Excel and is designed to prepare students for the Microsoft Office Specialist Excel exam (associate level) and to introduce students to the basic Excel features and functions that will be used in future classes and professional settings. In the Daniels College of Business, passing the Microsoft Office Excel Specialist Exam is a pre-requisite for other classes, is a requirement for secondary admission, and is a graduation requirement. The course uses projects to represent real-world scenarios. No prerequisites or restrictions.

**INFO 1020 Analytics II: Business Statistics and Analysis (4 Credits)**

Businesses can never have perfect information; therefore, they must employ statistical techniques to improve the decision-making process. This course introduces students to the basic tenets of probability and statistics, with an emphasis on business applications. Statistical models as decision-support tools are taught. Student projects focus on data collection, data analysis, decision analysis, and written presentation skills. Prerequisites: INFO 1010, and (MATH 1200 or MATH 1951). Corequisite: INFO 1021.

**INFO 1021 Microsoft PowerPoint and Word Certification Lab (0 Credits)**

This course covers basic topics in Word and PowerPoint and is designed to prepare students for the Microsoft Office Specialist Word and PowerPoint exams (associate level) and to introduce students to the basic Word and PowerPoint features that will be used in future classes and professional settings. In the Daniels College of Business, passing the Microsoft Office Word Specialist Exam and Microsoft Office PowerPoint Specialist Exam is a pre-requisite for other classes, is a requirement for secondary admission, and is a graduation requirement. The course uses projects to represent real-world scenarios. Corequisite: INFO 1020. No prerequisites or restrictions.

**INFO 1031 Advanced Excel Certification Lab (0 Credits)**

The course covers advanced topics in Excel. The course goes beyond just the topics on the Excel Expert Certification exam and looks at functions and features that students are likely to use in work situation. The course uses projects to represent real-world scenarios. A score of 850 or higher on the Microsoft Office Specialist Excel exam (associate level) is highly recommended (but not required) to be sufficiently prepared for this course, and to be able to progress through course material in preparation of the Microsoft Office Excel Expert exam.

**INFO 2020 Analytics III: Business Modeling and Analysis (4 Credits)**

Businesses make decisions and improve processes using a variety of modeling and analytic techniques. This course introduces the student to the techniques of multiple regression analysis, time series analysis, spreadsheet modeling, and simulation for solving a variety of business problems. Applications include economic forecasting, supply chain management, and project management. Student projects focus on using spreadsheet modeling for problem solving, and emphasize written and oral presentation techniques. Prerequisites: INFO 1020 and Microsoft Excel Certification.

**INFO 3100 Automating Business Processes (4 Credits)**

This course focuses on using Microsoft Excel and Python to support decision making for managers. This course will cover advanced Excel functions and menu options along with basic spreadsheet modeling design and good practices. It will also cover automating tasks in Excel using VBA. We will then transition into using Python to create programs outside of the Microsoft Office environment. In both platforms the focus is on basic programming logic, reading and writing data, creating data summaries and pivot tables and basic statistical tests and summaries. Prerequisite: INFO 2020.

**INFO 3110 Applied Nonparametric Statistics (4 Credits)**

This course develops a more advanced understanding of the fundamental concepts of probability and statistics, and how they relate to managerial type problems and decision making. You will develop experience performing and interpreting standard and particularly nonparametric data analysis methodologies, such as the sign test, the signed rank test, the rank sum test, and nonparametric correlations. You will obtain familiarity with a statistical software package. Prerequisite: INFO 2020 (minimum grade of C-).

**INFO 3140 Foundations of Information Management (4 Credits)**

This course introduces students to the foundations of information management (e.g. database management). Specifically, this course will focus on database theory, appropriate database design, modeling tools, and the practical issues of database implementation and management. Designing and developing databases is an iterative process, and the class approach will be practical and hands-on. Prerequisite: INFO 2020.

**INFO 3200 Data Mining and Visualization (4 Credits)**

This course explores the concepts of storytelling with data, prediction modeling, and presenting statistical results. It covers the concepts of visualization terminology along with all the steps of the modeling process: define goal, get data, explore & visualize data, pre-process data, partition the data series, apply modeling technique(s), evaluation and compare performance, implement the model, and communicate the results. The modeling techniques covered include Time Series Forecasting, Clustering, Principal Components Analysis, Decision Trees, Naïve Bayes, K-Nearest Neighbor, Multiple and Logistic Regression, and Machine Learning Approaches. This course also covers the interpretation of real-time business data in terms of dashboards and scorecards. Prerequisite: INFO 2020.

**INFO 3240 Enterprise Information Management (4 Credits)**

This is the second in a series of two courses designed to introduce students to information management. This course focuses on procedural programming using T-SQL, an introduction to an enterprise information management system using Microsoft SQL Server and an introduction to an integrated development environment using Microsoft Visual Studio. Prerequisite: INFO 3100 and INFO 3140.

**INFO 3300 Data Warehousing and Business Intelligence (4 Credits)**

This course introduces students to the main components of a data warehouse for business intelligence applications. Students will learn how a data warehouse fits into the overall strategy of a complex enterprise, how to develop data models useful for business intelligence, and how to combine data from disparate sources into a single database that comprises the core of a data warehouse. Students will also explore how to define and specify useful management reports from warehouse data. Prerequisite: INFO 3240.

**INFO 3320 Sports Analytics (4 Credits)**

This course serves as an introduction to sports analytics. Analytical topics will include, but are not limited to, regression (or predictive) modeling, optimization, ranking methodologies, web scraping, among others. Sports topics will include topics from most professional sports, gambling (daily fantasy sports), and business operations. In addition, the students will learn how to communicate their results (business reports, dashboards, etc.) of the various modeling exercises and projects using RStudio and the RMarkdown suite of tools.

**INFO 3340 Project Management and Simulation (4 Credits)**

"Cheaper, better, faster" is the mantra of modern business. Innovation, providing new products and services or using improved business processes, has become a prerequisite for businesses to thrive and flourish. Project Management is a discipline which supports innovation by examining how to facilitate one-time events such as constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline. Monte Carlo simulation modeling is also covered to explore the benefits and limitations of simulation as a tool for solving business problems, and to present students with the opportunity to build, analyze, and report on Monte Carlo simulations. Prerequisite: INFO 2020.

**INFO 3350 Statistical Computing (4 Credits)**

This course will provide the student with a base of skills necessary to program in one or more common scripting software packages. No prior programming knowledge is required. After completion of the course, the student will be able to independently perform most basic statistical procedures using either software package. The student will also have the tools necessary to learn advanced topics from the software package documentation by themselves. Prerequisite: INFO 2020.

**INFO 3400 Complex Data Analytics (4 Credits)**

This course explores the concepts of the considerations and management of big data projects. It also explores technical aspects of performing text analytics and natural language processing, social network analysis, and social media analysis. We focus on social data for many of the examples and also explore how disparate data sources can be combined to provide insight for business decisions. Prerequisite: INFO 3200.

**INFO 3440 Optimization Modeling (4 Credits)**

This course introduces concepts and techniques for the modeling and solution of business decision problems. It gives broad coverage to the formulation of optimization models and the use of commercially available software tools for solving them. These models include topics such as linear programming, integer programming, the transportation and assignment problems, network optimization models and non-linear programming. Emphasis is placed on the process of analyzing business scenarios, formulating models in spreadsheet and open-source software, interpreting model output, and presenting written project reports. Prerequisite: INFO 2020.

**INFO 3477 Database-Driven Websites (4 Credits)**

This course provides a comprehensive overview of website development. Students explore the prevailing vocabulary, tools, and standards used in the field and learn how the various facets including HTML5, CSS, JavaScript, VBScript, ASP, PHP, HTTP, clients, servers, and databases function together in today's web environment. In addition, software and services that are easily incorporated into a website (e.g. maps, checkout, blogs, content management) are surveyed and discussed. Students produce an interactive website on the topic of their choice for the final project and leave the course prepared to develop real world database driven websites. Prerequisite: INFO 3140.

**INFO 3500 Capstone/Senior Project (4 Credits)**

This course gives the student an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from problem definition, data collection, and model construction, through analysis and presentation of results to recommendations for specific business decisions. Prerequisites: All other Business Analytics major courses.

**INFO 3700 Topics in Business Analytics (1-4 Credits)**

Exploration of various topics and issues related to timely analytics applications. Prerequisite: INFO 2020.

**INFO 3980 Internship (0-10 Credits)**

Internship; requires written report.

**INFO 3991 Independent Study (0-4 Credits)**

Independent research/study; requires written report.

**ITEC 3155 Business Data Skills and Concepts (4 Credits)**

This course is designed to give students an understanding of the technology underlying accounting information systems and help students develop more advanced data analysis skills. We will use the programming language Python to develop an understanding of the digital business logic that supports the operations of modern firms. We will learn to use Business Process Modeling Notation (BPMN) to graphically document operations and their underlying business logic. We will discuss and analyze a set of studies that use survey data from a global sample of executives and analysts to develop an understanding of the levels of technological sophistication in modern firms. We will also discuss and analyze distributed databases, information security, and eXtensible Business Reporting Language. Prerequisites: ACTG 3034, ACTG 3038 and ACTG 3037.

**ITEC 3325 Emerging Technologies (4 Credits)**

This course is for students who want a strategic edge: to understand how the advanced information technologies that are emerging today will impact business in the near to medium future. This course will equip students with an understanding of the key information technologies central to the knowledge economy, their current and prospective business uses, and lifelong skills in how to think about business uses of these technologies - to identify, critically analyze, and evaluate them. This course is for students who want to become key players in the coming economy by combining substantial understanding of the technology side with substantial understanding of the business side – applications and strategy. Prerequisites: INFO 2020.

**ITEC 3980 Internship (1-5 Credits)**

Practical experience (field study); requires written report. Instructor approval required.

**ITEC 3991 Independent Study (1-8 Credits)**

Independent research/study; requires written report. Instructor approval required.

## Center for World Languages and Cultures

Office: Sturm Hall, Suite 391

Mail Code: 2000 E. Asbury Ave. Denver, CO 80210

Phone: 303-871-4601

Website: <https://liberalarts.du.edu/cwlc> (<https://liberalarts.du.edu/cwlcc/>)

Email: [cwlc@du.edu](mailto:cwlc@du.edu)

### About the Center

The Center for World Languages and Cultures (CWLC) supports and encourages the study of languages and cultures and provides free language tutoring for all DU students at the Language Center in the Anderson Academic Commons. The CWLC oversees the first-year language curriculum at DU. Course descriptions can be found in the Department of Languages, Literatures and Cultures (p. 438) and the Department of Spanish Language, Literary and Cultural Studies (p. 676). In addition, the Center facilitates credit-bearing and noncredit study options for a number of less commonly taught languages. The CWLC also coordinates the language placement tests for DU undergraduate students, as well proficiency tests for graduate students and language majors.

## Our Mission

The Center for World Languages & Cultures is committed to students' academic, professional, and personal growth. The CWLC puts language at the core of transformative learning and prepares students to communicate effectively -with intercultural knowledge and competence- in more than one language. Experiencing the world through the lens of a different language enhances students' capacity to identify their own cultural patterns, to compare and contrast them with others, and to respond empathetically to unfamiliar ways of being. For this reason, the Center aims to integrate languages and cultures into all fields of study, and to build and support intercultural communities at the University of Denver with its local and global communities and partners.

## Our Goals

- To enrich the first-year academic experience through excellence in teaching;
- To develop linguistic skills and cultural appreciation;
- To prepare students linguistically and culturally for studying abroad;
- To provide access to a diverse portfolio of language learning opportunities;
- To develop cross-cultural relationships with international strategic partner universities;
- To promote the integration of language and intercultural perspectives within the curriculum;
- To establish and maintain proficiency standards and coordinate language assessment across the University's programs and divisions;
- To provide support for DU's current and future language programs.

### **INTZ 1234 Directed Independent Language Study: Yoruba (4 Credits)**

Directed Independent Language Study (DILS): Yoruba provides students the opportunity to study Yoruba language and culture. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students with cultural, academic and professional interests in Nigeria, Benin and/or the Yoruba language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

### **INTZ 1255 Directed Independent Language Study: Swahili (4 Credits)**

Directed Independent Language Study (DILS): Swahili provides students the opportunity to study Swahili (Kiswahili) language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in the African Great Lakes region and the Swahili Coast, as well as those with cultural, academic and professional interests in the Swahili language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

### **INTZ 1301 Portuguese: Beginning Level 1 (4 Credits)**

This course is an introduction to the Portuguese Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Portuguese and Brazilian society aim to facilitate students' transition into study abroad. This is an online course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Portuguese Instructor at the Universidade Catolica Portuguesa. Attendance at remote class sessions is mandatory.

### **INTZ 1810 Directed Independent Language Study: Arabic (4 Credits)**

Directed Independent Language Study (DILS): Arabic provides students the opportunity to study Arabic language and Arabic-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various Middle-Eastern countries, as well as those with cultural, academic and professional interests in the Arabic language and Middle East Studies. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA) or approval.

### **INTZ 1891 Directed Independent Language Study: Hindi (4 Credits)**

Directed Independent Language Study (DILS): Hindi provides students the opportunity to study Hindi language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in India, as well as those with cultural, academic and professional interests in the Hindi language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1910 Directed Independent Language Study: Quechua (4 Credits)**

Directed Independent Language Study (DILS): Quechua provides students the opportunity to study Quechua language and Quechua-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various South American countries, as well as those with cultural, academic and professional interests in the Quechua language, Andean Studies, Indigenous languages and cultures. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1946 Directed Independent Language Study: Swedish (4 Credits)**

Directed Independent Language Study (DILS): Swedish provides students the opportunity to study Swedish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Sweden, as well as those with cultural, academic and professional interests in the Swedish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1955 Directed Independent Language Study: Portuguese (4 Credits)**

Directed Independent Language Study (DILS): Portuguese provides students the opportunity to study Portuguese language and Portuguese-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Brazil or Portugal, as well as those with cultural, academic and professional interests in the Portuguese language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1982 Directed Independent Language Study: Korean (4 Credits)**

Directed Independent Language Study (DILS): Korean provides students the opportunity to study Korean language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in South Korea, as well as those with cultural, academic and professional interests in the Korean language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1990 Directed Independent Language Study: Turkish (4 Credits)**

Directed Independent Language Study (DILS): Turkish provides students the opportunity to study Turkish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Turkey, as well as those with cultural, academic and professional interests in the Turkish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**ARAB 1001 Elementary Arabic (4 Credits)**

The elementary Arabic three-quarter sequence is designed to build practical communication skills, enabling students to interact with Arabic speakers and engage in multilingual communities. The course emphasizes interpersonal and interpretive communication, helping students develop confidence in real-world language use. It will enable students to learn Modern Standard Arabic (MSA) as the language of academia, writing, media, and official settings. At the same time, it recognizes the diglossic nature of Arabic and introduces students to everyday spoken Arabic dialects, to enhance their ability to communicate in informal and social contexts. Additionally, students will explore Arabic cultural practices and perspectives, fostering cultural insight and intercultural awareness. By completing the beginning Arabic sequence, learners will acquire the linguistic skills and foundational cultural knowledge needed to handle straightforward interactions and familiar tasks in an Arabic-speaking context. Students will operate at a novice-high to intermediate-low proficiency level. ARAB 1001 is designed for students with no prior knowledge of Arabic. Students with previous experience should complete the placement test to determine the appropriate course level for their background.

**ARAB 1002 Elementary Arabic (4 Credits)**

The elementary Arabic three-quarter sequence is designed to build practical communication skills, enabling you to interact with Arabic speakers and engage in multilingual communities. The course emphasizes interpersonal and interpretive communication, helping you develop confidence in real-world language use. You will continue to develop your proficiency in Modern Standard Arabic (MSA) as the language of academia, reading, writing, media, and official settings. At the same time, the course recognizes the diglossic nature of Arabic and further expands your exposure to everyday spoken Arabic dialects, enhancing your ability to communicate effectively in informal and social contexts. Additionally, you will explore Arabic cultural practices and perspectives, fostering cultural insight and intercultural awareness. By completing the beginning Arabic sequence, you will acquire the linguistic skills and foundational cultural knowledge needed to navigate straightforward interactions and familiar tasks in an Arabic-speaking environment. You will continue to operate at a novice-high to intermediate-low proficiency level. ARAB 1002 builds on the foundations of ARAB 1001. You will expand your understanding of basic language structures and be introduced to topics relevant to your daily life, such as family, neighborhood, study, work, and social interactions. You will further develop conversation and interaction skills to engage more confidently in Arabic. Prerequisite: ARAB 1001 or equivalent.

**ARAB 1003 Elementary Arabic (4 Credits)**

The elementary Arabic three-quarter sequence is designed to build practical communication skills, enabling you to interact with Arabic speakers and engage in multilingual communities. The course emphasizes interpersonal and interpretive communication, helping you develop confidence in real-world language use. You will continue to develop your proficiency in Modern Standard Arabic (MSA) as the language of academia, reading, writing, media, and official settings. At the same time, the course recognizes the diglossic nature of Arabic and further expands your exposure to everyday spoken Arabic dialects, enhancing your ability to communicate effectively in informal and social contexts. Additionally, you will explore Arabic cultural practices and perspectives, fostering cultural insight and intercultural awareness. By completing the beginning Arabic sequence, you will acquire the linguistic skills and foundational cultural knowledge needed to navigate straightforward interactions and familiar tasks in an Arabic-speaking environment. You will continue to operate at a novice-high to intermediate-low proficiency level. ARAB 1003 builds on the foundations of ARAB 1002. You will expand your proficiency in language structures and communication, allowing you to engage in more detailed and expressive conversations. This course will introduce you to more complex topics, such as past experiences, future plans, opinions, and cultural discussions. You will refine your speaking, listening, reading, and writing skills, enabling you to interact more fluently and confidently in a variety of real-world situations. Prerequisite: ARAB 1002 or equivalent.

**ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)**

This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARAB 1351 Tales from the Arabian Nights: Reading across Time and Space (4 Credits)**

No doubt that through their magical transformations and marvelous plots, the stories of the Arabian Nights, also known as One Thousand and One Nights, have a great entertainment value and that the imaginary setting of the tales has fascinated and inspired many authors and artists. However, this collection of stories has also significantly contributed to how the West views the Middle East: an exotic world populated by negative images such as conniving and manipulating harem women and violent and unscrupulous Arab men. The Tales of the Arabian Nights provide a unique platform for the discussion of current issues such as orientalism, stereotyping, and gender discrimination. In this course, we will select a handful of stories to serve as a catalyst for inquiry to show how this shared narrative passed on from generation to generation, has contributed to the creation of an 'exotic' East invented by the colonial West. We will show that the Middle East, like the rest of the world, is in a state of flux and the text is not a historical account of the medieval Arab world and cannot be viewed a-historically. We will unveil all the stereotypes that have been subtly, or not so subtly, implanted in the mind of the west through an often-erroneous portrayal of the Arab world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 1001 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This course counts towards the Language requirement of the Common Curriculum.

**CHIN 1002 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This is the second course in a three-quarter sequence. This course counts towards the Language requirement of the Common Curriculum. Pre requisite: CHIN 1001 or equivalent, or permission of the instructor.

**CHIN 1003 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This is the third course in a three-quarter sequence. This course counts towards the Language requirement of the Common Curriculum. Prerequisite: CHIN 1002 or equivalent, or permission of the instructor.

**FREN 1001 Français élémentaire (4 Credits)**

Connect with the diverse population around the world that uses French by developing practical language skills for meaningful communication in everyday situations. Explore and reflect on cultural practices and perspectives of the world's French-speaking communities while developing cultural insight and the foundations of cultural awareness and understanding. The communicative nature of this course focuses on using French as much as possible to interact with others in everyday situations and achieve basic proficiency. First quarter in a three-quarter sequence. The course is designed for students with no previous experience in French. Students with more than 2 years of high school French must take the placement exam and enroll in a higher-level course.

**FREN 1002 Français élémentaire (4 Credits)**

Connect with the diverse population around the world that uses French by developing practical language skills for meaningful communication in everyday situations. Explore and reflect on cultural practices and perspectives of the world's French-speaking communities while developing cultural insight and the foundations of intercultural awareness and understanding. The communicative nature of this course focuses on using French as much as possible to interact with others in everyday situations and achieve basic proficiency. Second quarter in a three-quarter sequence. This course is designed for students with no previous experience in French. Students with more than 2 years of high school French must take the placement exam and enroll in a higher-level course. Prerequisite: FREN 1001 or equivalent.

**FREN 1003 Français élémentaire (4 Credits)**

Connect with the diverse population around the world that uses French by developing practical language skills for meaningful communication in everyday situations. Explore and reflect on cultural practices and perspectives of the world's French-speaking communities while developing cultural insight and the foundations of intercultural awareness and understanding. The communicative nature of this course focuses on using French as much as possible to interact with others in everyday situations and achieve basic proficiency. Final quarter in a three-quarter sequence. Prerequisite: FREN 1002 or equivalent.

**GERM 1001 Elementary German (4 Credits)**

DU's first-year German courses introduce learners to the German language and German-speaking cultures while teaching the skills to be a life-long second language learner. German 1001 is the first course in this series. The teaching style is communicative, focusing on using the language to interact with others in everyday situations. Additionally, we discuss (in English) topics that both the U.S. and German culture have in common such as immigration, health care, and education. This course will help you achieve basic proficiency in German across all three modes of communication: interpersonal, interpretive, and presentational. Our goal is that by the end of the first-year German sequence, you will produce language at the Novice High level and be able to comprehend language at the Intermediate Low level. We will use as much German as possible in class. Mistakes and misunderstandings will happen often and are an important part of the learning process. Our goal is communication, not perfection. To support our goal of communication, our textbook uses a flipped classroom concept. Pre-class work will be assigned so that when we are together, we can move more quickly and focus our energy on interaction and creation. This course uses a performance assessment model to give students feedback and assign grades.

**GERM 1002 Elementary German (4 Credits)**

DU's first-year German courses introduce learners to the German language and German-speaking cultures while teaching the skills to be a life-long second language learner. German 1002 is the second course in this series. The teaching style is communicative, focusing on using the language to interact with others in everyday situations. Additionally, we discuss (in English) topics that both the U.S. and German culture have in common such as immigration, health care, and education. This course will help you achieve basic proficiency in German across all three modes of communication: interpersonal, interpretive, and presentational. Our goal is that by the end of the first-year German sequence, you will produce language at the Novice High level and be able to comprehend language at the Intermediate Low level. We will use as much German as possible in class. Mistakes and misunderstandings will happen often and are an important part of the learning process. Our goal is communication, not perfection. To support our goal of communication, our textbook uses a flipped classroom concept. Pre-class work will be assigned so that when we are together, we can move more quickly and focus our energy on interaction and creation. This course uses a performance assessment model to give students feedback and assign grades. Prerequisite: GERM 1001 or equivalent.

**GERM 1003 Elementary German (4 Credits)**

DU's first-year German courses introduce learners to the German language and German-speaking cultures while teaching the skills to be a life-long second language learner. German 1003 is the third course in this series. The teaching style is communicative, focusing on using the language to interact with others in everyday situations. Additionally, we discuss (in English) topics that both the U.S. and German culture have in common such as immigration, health care, and education. This course will help you achieve basic proficiency in German across all three modes of communication: interpersonal, interpretive, and presentational. Our goal is that by the end of the first-year German sequence, you will produce language at the Novice High level and be able to comprehend language at the Intermediate Low level. We will use as much German as possible in class. Mistakes and misunderstandings will happen often and are an important part of the learning process. Our goal is communication, not perfection. This course uses a performance assessment model to give students feedback and assign grades. Pre-requisite: German 1002 or equivalent.

**HEBR 1001 Elementary Hebrew (4 Credits)**

Hebrew 1001 is designed for students with little or no prior knowledge of Hebrew. This course aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. First course in a three-quarter sequence.

**HEBR 1002 Elementary Hebrew (4 Credits)**

Hebrew 1002 is the second course in a three-quarter sequence. This course aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. Prerequisite: HEBR 1001 or equivalent.

**HEBR 1003 Elementary Hebrew (4 Credits)**

This is the third course in the elementary Hebrew sequence. It aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. Prerequisite: HEBR 1002 or equivalent.

**ITAL 1001 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Italian 1001 is designed for students with no prior knowledge of Italian. Students with experience with the Italian language should complete the placement test to determine the appropriate course level for their background.

**ITAL 1002 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1001 or equivalent.

**ITAL 1003 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1002 or equivalent.

**JAPN 1001 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. First quarter of a three-quarter sequence. Japanese 1001 is designed for students with no prior knowledge of Japanese. Students who have experience with the Japanese language should complete the placement test to determine the appropriate course level for their background.

**JAPN 1002 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Second quarter of a three-quarter sequence. Prerequisite: JAPN 1001 or equivalent.

**JAPN 1003 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Third quarter of a three-quarter sequence. Prerequisite: JAPN 1002 or equivalent.

**RUSS 1001 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Russian 1001 is designed for students with no prior knowledge of Russian. Students who have experience with the Russian language should complete the placement test to determine the appropriate course level for their background.

**RUSS 1002 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

**RUSS 1003 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of "Novice High" or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1002 or permission of instructor.

**SPAN 1001 Beginning Spanish (4 Credits)**

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Span 1001 is designed for students with no previous Spanish experience. Students with more than 2 years of high school Spanish or who grew up in a Spanish-speaking environment must take the placement exam and enroll in a higher-level course.

**SPAN 1002 Beginning Spanish (4 Credits)**

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1001 or equivalent.

**SPAN 1003 Beginning Spanish (4 Credits)**

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1002 or equivalent.

## Chemistry and Biochemistry

Office: F. W. Olin Hall, Room 202

Mail Code: 2190 E. Iliff Ave. Denver, CO 80208

Phone: 303-871-2435

Email: [cheminfo@du.edu](mailto:cheminfo@du.edu)

Web Site: <https://science.du.edu/chemistry> (<https://science.du.edu/chemistry/>)

The Department of Chemistry and Biochemistry offers a program of study that combines a traditional classroom emphasis with an innovative laboratory experience. In addition to providing excellent training for graduate study in chemistry and biochemistry, the program also is a strong pre-professional degree. A degree in chemistry, biochemistry or environmental chemistry prepares students for a variety of careers in chemical and biochemical research, medicine, life sciences, environmental science, atmospheric sciences, materials science, oceanography and teaching in chemistry or science in general. It also prepares students for employment with chemical, pharmaceutical, biotechnology, medical products, natural resources and environmental companies.

Because most medical and dental schools require a minimum of two years of chemistry for admission, a major in chemistry or biochemistry provides an excellent background for premed or pre-dental majors. Students who complete the bachelor of science in chemistry curriculum are certified by the American Chemical Society.

## Chemistry

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

Minimum of 40 credits of chemistry. Requirements include the following:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4

CHEM 2270	Quantitative Chemical Analysis	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
CHEM 2453 & CHEM 2463	Organic Chemistry III and Organic Chemistry Lab III	4
CHEM 3610	Physical Chemistry I	3
CHEM 3210	Instrumental Analysis (or CHEM 3820 Biochemistry Lab)	4
CHEM at 3000 level or higher <sup>1</sup>		5
<b>Total Credits</b>		<b>40</b>

<sup>1</sup> A maximum of three credits of CHEM 3995 Independent Research can count toward the credits for electives.

### Additional Requirements

Code	Title	Credits
<b>Calculus</b>		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
<b>Physics</b>		
One year, preferably:		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
<b>Total Credits</b>		<b>27</b>

### Bachelor of Arts Minor Requirements

20 credits of chemistry. Requirements include:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
<b>Total Credits</b>		<b>20</b>

### Bachelor of Science Major Requirements

(183 credits required for the degree (p. 100))

Minimum of 47 credits in chemistry. Requirements include the following:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4
CHEM 2270	Quantitative Chemical Analysis	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
CHEM 2453 & CHEM 2463	Organic Chemistry III and Organic Chemistry Lab III	4
CHEM 3210	Instrumental Analysis	4
CHEM 3610	Physical Chemistry I	3
CHEM 3620	Physical Chemistry II	3
CHEM 3621	Physical Chemistry III	3
CHEM 3500	Chemistry Frontiers	3
CHEM at the 3000 level or higher		3
<b>Total Credits</b>		<b>47</b>

**Additional Requirements**

Code	Title	Credits
Calculus		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
Physics		
One year, preferably:		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
<b>Total Credits</b>		<b>27</b>

**Bachelor of Science Minor Requirements**

20 credits of chemistry. Requirements include:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
<b>Total Credits</b>		<b>20</b>

## Bachelor of Science in Chemistry Major Requirements

(183 credits required for the degree (p. 104))

Minimum of 62 credits in chemistry. Requirements include the following:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4
CHEM 2270	Quantitative Chemical Analysis	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
CHEM 2453 & CHEM 2463	Organic Chemistry III and Organic Chemistry Lab III	4
CHEM 3210	Instrumental Analysis	4
CHEM 3610	Physical Chemistry I	3
CHEM 3620	Physical Chemistry II	3
CHEM 3621	Physical Chemistry III	3
CHEM 3811	Biochemistry-Proteins	3
CHEM 3820	Biochemistry Lab	3
CHEM 3500	Chemistry Frontiers	3
CHEM 3995	Independent Research <sup>1</sup>	6
CHEM at the 3000 level		6
<b>Total Credits</b>		<b>62</b>

<sup>1</sup> Thesis required

### Additional Requirements

Code	Title	Credits
<b>Mathematics</b>		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
Math or Computer Science Electives		8
<b>Physics</b>		
One year, preferably:		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
<b>Total Credits</b>		<b>35</b>

## Biochemistry

### Bachelor of Science Major Requirements

(183 credits required for the degree (p. 100))

Minimum of 47 credits in chemistry. Requirements include the following:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4
CHEM 2270	Quantitative Chemical Analysis	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
CHEM 2453 & CHEM 2463	Organic Chemistry III and Organic Chemistry Lab III	4
CHEM 3210	Instrumental Analysis	4
CHEM 3610	Physical Chemistry I	3
CHEM 3811	Biochemistry-Proteins	3
CHEM 3812	Biochemistry-Membranes/Metabolism	3
CHEM 3813	Biochemistry-Nucleic Acids	3
CHEM 3820	Biochemistry Lab	3
<b>Total Credits</b>		<b>47</b>

**Additional Requirements**

Code	Title	Credits
<b>Biology <sup>2</sup></b>		
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
BIOL 2510 & BIOL 2511	General Genetics and General Genetics Lab	5
Chemistry 3xxx OR Biology 2xxx/3xxx		3-4
<b>Mathematics</b>		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
<b>Physics</b>		
One year, preferably:		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
<b>Total Credits</b>		<b>50-51</b>

<sup>2</sup> These courses satisfy a minor in biological sciences, provided the minor is declared by the student.

**Bachelor of Science in Chemistry with Biochemistry Concentration Requirements**

(183 credits required for the degree (p. 104))

Minimum of 62 credits in chemistry. Requirements include the following:

Code	Title	Credits
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141	Chemistry of the Elements and Chemistry of the Elements Lab	4
CHEM 2270	Quantitative Chemical Analysis	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
CHEM 2453 & CHEM 2463	Organic Chemistry III and Organic Chemistry Lab III	4
CHEM 3210	Instrumental Analysis	4
CHEM 3610	Physical Chemistry I	3
CHEM 3620	Physical Chemistry II	3
CHEM 3621	Physical Chemistry III	3
CHEM 3811	Biochemistry-Proteins	3
CHEM 3812	Biochemistry-Membranes/Metabolism	3
CHEM 3820	Biochemistry Lab	3
CHEM 3813	Biochemistry-Nucleic Acids	3
CHEM 3500	Chemistry Frontiers	3
CHEM 3995	Independent Research <sup>1</sup>	6
<b>Total Credits</b>		<b>62</b>

<sup>1</sup> Thesis required

### Additional Requirements

Code	Title	Credits
<b>Biology</b>		
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 2120 & BIOL 2121	Cell Structure and Function and Cell Structure & Function Lab	5
Biology Elective		5
<b>Calculus</b>		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
Math or Computer Science Electives		8
<b>Physics</b>		
One year, preferably:		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
<b>Total Credits</b>		<b>55</b>

## Environmental Chemistry

### Bachelor of Science Major Requirements

(183 credits required for the degree (p. 100))

Minimum of 47 credits in chemistry. Requirements include the following:

Code	Title	Credits
<b>Required CHEM coursework</b>		
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2131 & CHEM 2141 or CHEM 2240	Chemistry of the Elements and Chemistry of the Elements Lab Introduction to Environmental Chemistry	4
CHEM 2270	Quantitative Chemical Analysis	4
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	4
CHEM 2452 & CHEM 2462	Organic Chemistry II and Organic Chemistry Lab II	4
CHEM 2453 & CHEM 2463	Organic Chemistry III and Organic Chemistry Lab III	4
CHEM 3210	Instrumental Analysis	4
CHEM 3610	Physical Chemistry I	3
CHEM 3500	Chemistry Frontiers	3
<b>Choose 3 courses from the following 4 options:</b>		<b>9</b>
CHEM 3410	Atmospheric Chemistry	
CHEM 3411	Aquatic Chemistry	
CHEM 3412	Environmental Chemistry & Toxicology	
CHEM 3413	Aerosol Science	
<b>Total Credits</b>		<b>47</b>

#### Additional Requirements <sup>1</sup>

Code	Title	Credits
<b>Calculus</b>		
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
MATH 1953 or MATH 1963	Calculus III Honors Calculus III	4
<b>Physics</b>		
One year, preferably:		
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1213	University Physics III	5
<b>Total Credits</b>		<b>27</b>

<sup>1</sup> Of the two minors required for this BS degree, one must be in biology, environmental science, GIS or sustainability.

### Environmental Chemistry Minor Requirements

21-22 credits of chemistry. May not be paired with any B.S. or B.A. majors offered through the Department of Chemistry and Biochemistry or with the Chemistry minor. Requirements include:

Code	Title	Credits
One year of Chemistry with lab is required.		
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2240 or CHEM 2131	Introduction to Environmental Chemistry Chemistry of the Elements	4
Choose 3 courses from the following list.		9-10
A minimum of two courses must chosen be from these three options:		
CHEM 3410	Atmospheric Chemistry	
CHEM 3411	Aquatic Chemistry	
CHEM 3413	Aerosol Science	
A maximum of one additional course with lab from the following list may be chosen.		
CHEM 2270	Quantitative Chemical Analysis	
CHEM 2451 & CHEM 2461	Organic Chemistry I and Organic Chemistry Lab I	
Total Credits		21

Requirements for Distinction in the Major for the Bachelor of Arts or Bachelor of Science Degrees

- Minimum 3.0 cumulative GPA
- Minimum 3.5 major GPA
- CHEM 3500 (Frontiers) or CHEM 3820 (Biochemistry Lab)
- Six credits of research
- Completion of a thesis
- Presentation of poster at Undergraduate Research Symposium

The recommended order of courses is listed below for each degree. Please consult your advisor each quarter.

Chemistry  
Bachelor of Arts (p. 97)

Chemistry credit: 40; calculus credit: 12; physics credit: 15

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
CHEM 1010	3	CHEM 1020	3	CHEM 2131	3

CHEM Elective <sup>2</sup>	3	CHEM 3820 <sup>3</sup>	3	CHEM 3210 <sup>3</sup>	4

Electives	12 Electives	12 Electives	10
	15	15	14

Total Credits: 183

- <sup>1</sup> One year of calculus is required. One year of University Physics (recommended) or General Physics is required. Physics is a prerequisite for Physical Chemistry. The third quarter of physics may be taken at the same time as Physical Chemistry I. Students are encouraged to take Physical Chemistry II and III.
- <sup>2</sup> 3000-level CHEM course.
- <sup>3</sup> Either CHEM 3820 (CHEM 3811 is a prerequisite) in winter or CHEM 3210 in spring of 4th year.

## Bachelor of Science (p. 100)

Chemistry credit: 47; calculus credit 12; physics credit: 15

### First Year

Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111		4 WRIT 1122		4 WRIT 1133	4

<sup>1</sup> One year of calculus is required. One year of University Physics (recommended) or General Physics is required. Physics is a prerequisite for Physical Chemistry. The third quarter of physics may be taken at the same time as Physical Chemistry I. Students are encouraged to take Physical Chemistry II and III.

**CHEM 1001 Science of Contemporary Issues I (4 Credits)**  
CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 1002 Science of Contemporary Issues II (4 Credits)**  
CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

**CHEM 1003 Science of Contemporary Issues III (4 Credits)**  
CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

**CHEM 1010 General Chemistry I (3 Credits)**  
The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.

**CHEM 1020 General Chemistry II (3 Credits)**

The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

**CHEM 1240 General Chemistry I Laboratory (1 Credit)**

Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

**CHEM 1250 General Chemistry II Laboratory (1 Credit)**

Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

**CHEM 2131 Chemistry of the Elements (3 Credits)**

Descriptive chemistry of main group and transition elements including redox and coordination chemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

**CHEM 2141 Chemistry of the Elements Lab (1 Credit)**

Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 2240 Introduction to Environmental Chemistry (4 Credits)**

An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

**CHEM 2270 Quantitative Chemical Analysis (4 Credits)**

This combined lecture-laboratory course is primarily focused on understanding and applying the principles and techniques associated with making quantitative chemical measurements. Topics covered include statistics, applications of acid-base, complexation, precipitation, and redox titrations in chemical measurements, activity, electroanalytical techniques, and gravimetric analysis. Lab Fee associated with this course. Prerequisites: CHEM 2131 and CHEM 2141 or CHEM 2240.

**CHEM 2451 Organic Chemistry I (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 2131 and CHEM 2141.

**CHEM 2452 Organic Chemistry II (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 2451 and CHEM 2461.

**CHEM 2453 Organic Chemistry III (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451, CHEM 2452, CHEM 2461, and CHEM 2462.

**CHEM 2461 Organic Chemistry Lab I (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 2451.

**CHEM 2462 Organic Chemistry Lab II (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 2452.

**CHEM 2463 Organic Chemistry Lab III (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2453.

**CHEM 3110 Chemical Systems I (3 Credits)**

Advanced discussion of modern concepts of organic chemistry; bonding, stereochemistry, reaction mechanisms. Prerequisites: CHEM 2453 and equivalent of one year of physical chemistry.

**CHEM 3120 Chemical Systems II (3 Credits)**

Interpretation of trends in the chemistry of the elements in terms of orbital interactions. Most examples will be taken from the third row transition metals and the boron and carbon groups. Prerequisites: CHEM 2131, CHEM 3310 and CHEM 3110.

**CHEM 3130 Chemical Systems III (3 Credits)**

Advanced-level physical biochemistry course intended for advanced-level undergraduates and graduate students. Focuses on kinetic, thermodynamic and dynamic aspects of biopolymers; delineates the relationship of these properties to the mechanism and function of biological macromolecules. Prerequisites: CHEM 3811, CHEM 3812, CHEM 3813, CHEM 3610 or the equivalent.

**CHEM 3210 Instrumental Analysis (4 Credits)**

Course focus is toward students' understanding of instrumental components and the theory behind both component's and instrument's operation. Emphasis is on techniques such as spectroscopy and chromatography. Students will experience extensive hands-on use of a number of instruments. Course provides a strong background for Chemistry Frontiers (CHEM 3500) and emphasizes techniques and skills sought by chemical and biotechnology industries. Lab fee associated with this course. Prerequisites: CHEM 2011 or CHEM 2270.

**CHEM 3220 Advanced Analytical Chemistry (3 Credits)**

Principles of chemical instrumentation applied to analytical measurements; principles, instrumentation and applications of spectrometric and chromatographic measurements. Prerequisites: CHEM 3210 and CHEM 3621, or the equivalent.

**CHEM 3310 Structure and Energetics I (3 Credits)**

Fundamentals of quantum chemistry, and introduction to symmetry and molecular structure of small and large systems. Prerequisite: one year of physical chemistry.

**CHEM 3320 Structure and Energetics II (3 Credits)**

Computational methods in chemistry. Prerequisites: CHEM 3310, one year of physical chemistry.

**CHEM 3410 Atmospheric Chemistry (3 Credits)**

The concepts of equilibrium thermodynamics, kinetics, and photochemistry will be applied to understanding atmospheric processes. Covers urban air pollution in detail with focus on primary pollutants. Also covers stratospheric chemistry with focus on ozone chemistry and the chemistry of climate change. Prerequisites: (CHEM 2270 and CHEM 2453) OR CHEM 2240.

**CHEM 3411 Aquatic Chemistry (3 Credits)**

The circulation of the oceans and their chemical make-up. 'Classical water pollution problems' like biological oxygen demand and turbidity are discussed. Also presented: aquifer structure and flow, ground water chemistry, pollutant partitioning between stationary and mobile phases, heterogeneous surface chemistry, and the detection of trace contaminants. Prerequisites: (CHEM 2270 and CHEM 2453) or CHEM 2240.

**CHEM 3412 Environmental Chemistry & Toxicology (3 Credits)**

A survey of environmental toxicology concepts: animal testing, dose-response data, epidemiology, risk assessment. The course includes ecotoxicology, focusing on the alteration of biological and chemical systems beyond the simple response of an individual to an environmental chemical. Prerequisites: CHEM 2270 and CHEM 2453.

**CHEM 3413 Aerosol Science (3 Credits)**

CHEM 3413 is an introductory course that presents fundamental concepts associated with atmospheric aerosols in both natural and human environments. The course will focus on the sources, behavior, and effects of atmospheric aerosols, or particulate matter (PM) within the contexts of the natural environment and climate, human health, and industrial applications. The course will provide an overview of the chemical and physical characteristics of particulate matter and measurement methods, including chemical reactions that lead to aerosol formation and transformation. Examples and demonstrations will discuss applications to medical science, public health, clouds and climate, air pollution, colors in the sky, the built environment, mechanical engineering, chemical industry, and many other topics that stimulate curiosity. Aerosols affect almost every aspect of the environment and human health and are an important part of countless industrial processes or commercial products. The course is designed to provide a background to students interested in further study or careers broadly in (a) the environmental sciences, (b) medical or health sciences, or (c) many chemical or other scientific or engineering fields where aerosol processes are involved. CHEM 3413 will be taught at an upper-division (3000) level, but with enough flexibility to expect all environmental science, chemistry, biochemistry, biology, ecology, or engineering majors with the prerequisite year of chemistry to have fun and be able to learn effectively and succeed. The course is lecture-only; no lab is required, although demonstrations and hands on activities will be involved. The course fulfills requirements for the Environmental Chemistry B.S. major or minor, elective credit toward the Environmental Science B.S. or B.A. majors, and elective credit toward graduate programs in Chemistry. Prerequisite: CHEM 2240 or CHEM 2131.

**CHEM 3500 Chemistry Frontiers (3 Credits)**

Advanced-level laboratory course required for all undergraduates majoring in chemistry or environmental chemistry. Emphasis on the development of oral, written, computer and presentation skills necessary for success as a scientist. Skills will be honed through state-of-the-art laboratory experiences from diverse areas of chemistry. Lab fee associated with this course. Prerequisites: CHEM 3210 and CHEM 3610.

**CHEM 3610 Physical Chemistry I (3 Credits)**

Fundamentals of thermodynamics, including phase and reaction equilibria, properties of solutions, and electrochemistry needed for advanced study in life sciences and for Physical Chemistry II and III. May be taken for graduate credit by nonchemistry majors. Prerequisites: CHEM 2453, calculus and physics.

**CHEM 3620 Physical Chemistry II (3 Credits)**

Fundamentals of quantum chemistry, including theories of atomic and molecular structure and spectroscopy. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3610.

**CHEM 3621 Physical Chemistry III (3 Credits)**

Fundamentals of kinetic theory and statistical mechanics. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3620.

**CHEM 3703 Topics in Organic Chemistry (3 Credits)**

May include organic photochemistry, organic synthesis, organic electrochemistry or natural products. May be repeated for credit. Prerequisites: CHEM 3110 or equivalent and others depending on topic.

**CHEM 3705 Topics in Biochemistry (3,4 Credits)**

May include physical techniques for exploring biological structure, biological catalysis, and selected fields within biochemistry taught from original literature. May be repeated for credit. Prerequisites: CHEM 3831 and 3813.

**CHEM 3811 Biochemistry-Proteins (3 Credits)**

Protein structure and function, starting with the building blocks and forces that drive the formation of protein structure and the basic concepts of protein structure, and continuing with enzyme catalysis, kinetics, and regulation. Prerequisites: CHEM 2453 or instructor permission.

**CHEM 3812 Biochemistry-Membranes/Metabolism (3 Credits)**

Membranes and membrane mediated cellular processes, energy and signal transduction, and metabolic/biosynthetic pathways. Prerequisite: CHEM 3811 or CHEM 3831.

**CHEM 3813 Biochemistry-Nucleic Acids (3 Credits)**

Molecular processes underlying heredity, gene expression and gene regulation in prokaryotes and eukaryotes. Prerequisites: CHEM 2453 and CHEM 3811.

**CHEM 3820 Biochemistry Lab (3 Credits)**

Purification and properties of biological molecules and structures. Lab fee associated with this course. Prerequisites: CHEM 3811 AND (CHEM 2011 OR CHEM 2270).

**CHEM 3831 Advanced Protein Biochemistry (3 Credits)**

This course provides fundamental insights into the chemistry and physics of proteins. It investigates how amino acids form proteins with highly complex three-dimensional structures and how these structures mediate function. We examine key research articles and their contribution to our current understanding of proteins. Topics range from protein folding to enzyme kinetics and emphasize basic principles. Prerequisites: CHEM 2453 and instructor permission.

**CHEM 3980 Internship-Undergraduate (0 Credits)**

Practical work experience.

**CHEM 3991 Independent Study (1-10 Credits)**

May be repeated for credit.

**CHEM 3995 Independent Research (1-10 Credits)**

Research project conducted under guidance of a faculty member. Credit hours and projects arranged on an individual basis. May be repeated for credit.

## Communication Studies

Office: Sturm Hall, Room 200

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2385

Email: [ugcomn@du.edu](mailto:ugcomn@du.edu)

Web Site: <http://www.du.edu/ahss/schools/comn> (<http://www.du.edu/ahss/schools/comn/>)

The Department of Communication Studies calls students to engage communication meaningfully, creatively, ethically, and with intellectual curiosity, in order to enhance their personal and public lives, as well as contribute to a sustainable common good.

A major or minor in Communication Studies prepares students with the communication knowledge and skills necessary to navigate their relationships and communities, as well as careers in a multitude of contexts, such as advocacy, business, education, and healthcare. Through coursework and collaboration with faculty, peers, and the communities around them, students learn to find their voice, take risks, express their convictions, become transformational leaders, deliberate, and contribute to a more socially just, inclusive, and equitable world. We invite students to explore and re-examine accepted truths about communication in private contexts, as well as from local to international settings. Students gain insight into communication theories and contexts, as well as learn to conduct research using diverse methods of inquiry in order to ask and answer important and innovative questions. As means toward individual, relational, and community well-being, students apply and critically reflect on communication skills, such as advocacy, conflict, debate, dialogue, leadership, persuasion, empathy, and compassion.

## Major

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

40 credits, including the following:

Code	Title	Credits
<b>Disciplinary Core</b>		
COMN 1001	Practicing Communication	4
COMN 1002	Theorizing Communication	4

**Investigating Communication**

Select two of the following:

8

COMN 2110	Quantitative Inquiry in Communication
COMN 2150	Rhetorical/Critical Communication Inquiry
COMN 2200	Qualitative Inquiry in Communication

**Communication Theory & Practice in Personal & Public Contexts**

Eight credits (two courses) are required.

8

These are 1000- and 2000-level courses other than COMN 1001, COMN 1002, COMN 2110, COMN 2150, and COMN 2200.

**Applied Communication in Personal & Public Contexts**

Four credits (one course) are required. These courses may be at any level of the curriculum and will be designated with the “applied” attribute.

4

**Advanced Topics in Personal & Public Contexts**

Eight credits (two courses) are required. These are 3000-level courses other than COMN 3980, COMN 3990, COMN 3993, and COMN 3994.

8

**Communication Capstone**

Select four credits from the following:

4

COMN 3980	Internship
COMN 3990	Communication Capstone
COMN 3993 & COMN 3994	Communication Capstone Sequence 1 and Communication Capstone Sequence 2

**Total Credits****40**

## Secondary Major

### Secondary Major

40 credits. Same requirements as for BA degree.

## Minor

### Minor Requirements

20 credits, including the following:

Code	Title	Credits
<b>Disciplinary Core</b>		
COMN 1002	Theorizing Communication	4
<b>Communication Theory &amp; Practice in Personal &amp; Public Contexts</b>		
Four credits (one course) are required. These are 1000- and 2000-level courses with the exception of COMN 1001, COMN 1002, COMN 2110, COMN 2150, and COMN 2200.		4
<b>Applied Communication in Personal &amp; Public Contexts</b>		
Four credits (one course) are required. These courses may be at any level of the curriculum and will be designated with the “applied” attribute. COMN 1001: Practicing Communication is also an option to fulfill this requirement.		4
<b>Advanced Topics in Personal &amp; Public Contexts</b>		
Eight credits (two courses) are required. These are 3000-level courses with the exception of COMN 3980, COMN 3990, COMN 3991, and COMN 3992.		8
<b>Total Credits</b>		<b>20</b>

## Requirements for Distinction in the Major in Communication Studies

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Completion of three 3000-level courses
- Completion of a culminating project

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
COMN 1001	4	COMN 1001 or 1002 (or a different Common Curriculum Requirement)	4	Theory and Practice in Personal and Public Contexts	4
Common Curriculum Requirement	4	Common Curriculum Requirement	4	Common Curriculum Requirement	4
Common Curriculum Requirement	4	Common Curriculum Requirement	4	Minor or Elective	4
16		16		16	

Total Credits: 48

Second Year					
Fall	Credits	Winter	Credits	Spring	Credits
COMN 2110, 2150, or 2200		4 Common Curriculum Requirement		4 COMN 2110, 2150, or 2200	4
INTZ 2501 <sup>1</sup>		2 Common Curriculum Requirement		4 Common Curriculum Requirement	4
Common Curriculum Requirement		4 Minor or Elective		4 Minor or Elective	4
Minor or Elective		4 Minor or Elective		4 Minor or Elective	4
Minor or Elective		4			
	18		16		16

Total Credits: 50

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

## Communication Studies Courses

### COMN 1001 Practicing Communication (4 Credits)

Practicing Communication introduces students to evidence-based communicative practices that aid them in enacting skillful and ethical responses to ongoing communicative dilemmas. The course introduces students to techniques for increasing their awareness of the consequences of their communicative acts and for using mindful communication practices to create and sustain meaningful relationships in interpersonal, organizational, and public settings. The course also helps students develop skills in audience analysis—with a particular focus on crafting messages that are culturally responsive to audiences composed of multiple cultural identities and positionalities. This course counts toward the Scientific Inquiry: Society and Culture requirement.

### COMN 1002 Theorizing Communication (4 Credits)

Theorizing communication introduces students to theoretical thinking across the broad range of the communication discipline. Broadly defined, a theory is a set of principles that scholars use to explain or predict how a phenomenon works. This course will introduce students to scholars' attempts to understand and explain how human communication behavior functions in the world, from both humanistic and social scientific perspectives. In this way, the course serves the aim of Scientific Inquiry: Society and Culture courses in that it advances students' understanding of scientific approaches to principles of human functioning and conduct in social and cultural contexts. Students will learn the underlying assumptions of the various approaches to communication studies, examine and critique how these assumptions are applied in specific theories about communication, and apply their knowledge in imagining how a new theory might be constructed. This course counts toward the Scientific Inquiry: Society and Culture requirement.

### COMN 1011 Comm through Literature (4 Credits)

This course emphasizes the analysis and performance of diverse forms of literature. In addition to the dramaturgical elements of interpretation that are highlighted in this course, students learn how to contextualize serious public issues through literature while developing confidence and skills as performers and public speakers.

### COMN 1012 Speaking on Ideas that Matter (4 Credits)

The purpose of this course is to assist students in becoming more competent and comfortable when speaking about their opinions. Students learn how to develop and analyze rhetorical arguments, including the full range of the speech-making process, but especially how to support those opinions they assert. Assignments, class discussions and course materials provide students with a foundation of knowledge and practical application of speaking skills, which will prove useful in a variety of personal, professional, and public contexts. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 1015 Voice and Gender (4 Credits)**

In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. This course also discusses gender issues prevalent in today's society and significant moments in rhetorical history that have impacted these issues. Cross listed with GWST 1015.

**COMN 1100 Communication in Personal Relationships (4 Credits)**

Relationships have a direct and lasting impact on us: they shape who we are, and the paths we take toward who we will become. The purpose of this course is to analyze and apply theories and research relevant to communication processes in a variety of personal relationships. Discussion of issues such as attachment, identity, hetero- and homosexual relationships, family communication, conflict, and intrapersonal discourses will provide students a foundation on which to build skills useful in a variety of personal relationships. In Communication in Personal Relationships, students will: sensitively express attitudes and discuss research about different issues pertinent to the study of personal relationships; develop the skills to critically analyze their own relationships and the relationships of others; reflect on and challenge their and others' ideas in a critically constructive manner so that we arrive at a new level of understanding together; and demonstrate the ability to apply communication and interpersonal theories and research outside of this classroom upon completion of the course.

**COMN 1200 Small Group Communication (4 Credits)**

This course approaches small group communication through a combination of theory and practice. Theories related to group development and leadership, collaborative communication, dialogue and rhetorical sensitivity, and principled negotiation and consensus, are explored through group discussions, research, case studies and presentations. Students have the opportunity to: strengthen their critical thinking and listening skills; confidently voice their identity within a greater community; increase their ability in writing and presenting their thoughts; and develop communication competence by facilitating civility within small group settings.

**COMN 1210 Foundations of Communication Studies (4 Credits)**

This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1550 Communication in the Workplace (4 Credits)**

This course offers a topics-based introduction to the study and practice of communication in a variety of organizational settings. The emphasis is on issues of power, politics, globalization, culture, diversity, relationships, and conflict. Students learn how to recognize, diagnose, and solve communication related problems in the workplace.

**COMN 1600 Communication and Popular Culture (4 Credits)**

This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or 'lenses' to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

**COMN 1700 Fundamentals of Intercultural Communication (4 Credits)**

This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

**COMN 1988 Study Abroad Resident Credit (0-18 Credits)****COMN 2000 Identities in Dialogue (4 Credits)**

This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others' experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

**COMN 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2020 On the Black Panther Party (4 Credits)**

This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2030 Social Movement Rhetoric (4 Credits)**

This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)**

This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multi-disciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 2100 Fundamentals of Communication Theory (4 Credits)**

Basic concepts, theories and models of the communication process. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2110 Quantitative Inquiry in Communication (4 Credits)**

This course is designed to introduce students to the process of reading, analyzing, conducting and critiquing quantitative research in communication studies. Research is a pervasive aspect of contemporary life, both inside and outside of the university. As such, many of the jobs taken by communication studies majors require, or are at the very least enhanced by, the ability to conduct and interpret research. This course introduces students to the various aspects associated with quantitative research methods in an effort to illuminate the significance of research about communication in our lives and help students act as critical consumers of the research encountered.

**COMN 2130 Introduction to Organizational Communication (4 Credits)**

This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2140 The Dark Side of Relationships (4 Credits)**

This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2150 Rhetorical/Critical Communication Inquiry (4 Credits)**

This course focuses on the process of interpreting, understanding, and evaluating everyday persuasive acts for the purpose of sharing insights and influencing the community audience. This course fosters a variety of analytical skills, including how to describe primary rhetorical acts (such as speeches, films, news coverage, television programs, songs, advertisements, and public commemorative art, among others) in rich, relevant detail; how to situate or make sense of rhetorical acts within their historical, cultural moments; and how to use theory to develop a critical perspective that helps to render a judgment about a text or act. Students sharpen critical instincts by working through the inventional process to produce a piece of rhetorical or cultural criticism.

**COMN 2200 Qualitative Inquiry in Communication (4 Credits)**

This course focuses on introducing students to a selection of qualitative methods used in communication research. The class covers the basic techniques for collecting, interpreting, and analyzing qualitative data. Throughout the term, the course operates on two interrelated dimensions: one focused on the theoretical approaches to various types of qualitative research, and the other focused on the practical techniques of data collection and analysis, such as interviewing and collecting field notes.

**COMN 2210 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

**COMN 2220 Race and Popular Culture (4 Credits)**

This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2270 Intro to Health Communication (4 Credits)**

This course is designed to be an introduction to the field of health communication. Through readings, case studies, and discussions, this class is designed to provide an overview of health communication in a variety of health contexts, ranging from public health campaigns to interpersonal communication to community-based health interventions. In this class, we aim to understand how communication can play a vital role in achieving personal and public health objectives. Throughout the quarter, we will examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Applied Communication in Personal & Public Contexts requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2400 Landmarks in Rhetorical Theory (4 Credits)**

This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2450 Between Memory & Imagination (4 Credits)**

How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2470 Gender and Communication (4 Credits)**

Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

**COMN 2471 The Social Construction of Travel (4 Credits)**

Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2541 Advanced Debate and Forensic Activities (1-4 Credits)**

This course serves as a practicum for students interested in developing advanced argumentation skills. The focus is on preparing students for competition in intercollegiate debate. Students engage in in-depth research of debate topics, as well as participate in substantial practice of arguments and positions developed as necessary to prepare for intercollegiate competition.

**COMN 2600 Introduction to Political Communication (4 Credits)**

The purpose of this course is to introduce students to the subdiscipline of political communication with a focus on the United States. Through scholarship, case study development, discussion, and activities, this course surveys the major communicative actors in U.S. public and political life. Students will use theories from across political communication to understand the roles of elites, media organizations, and everyday individuals in political talk. Students should leave the course with the ability to identify and critically assess the political communication that permeates their lives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2700 Topics in Communication (1-4 Credits)****COMN 2701 Topics in Communication (1-4 Credits)****COMN 2702 Topics in Communication (1-4 Credits)****COMN 2703 Topics in Communication (1-4 Credits)****COMN 2704 Topics in Communication (1-4 Credits)****COMN 2705 Topics in Communication (1-4 Credits)****COMN 2988 Study Abroad Resident Credit (0-18 Credits)****COMN 3005 Diverse Family Communication (4 Credits)**

This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

**COMN 3010 Critical Sexuality Studies (4 Credits)**

This course takes a critical approach to the study of sexualities by asking us to challenge our assumptions and everyday knowledges about identities, gender, sexuality, race, class, and ethnicity. This course is organized thematically as we explore various topics within the larger study of critical sexuality studies and communication studies. We examine contemporary issues within queer theory, critical race studies, identity politics, feminism, performance studies, and popular culture.

**COMN 3015 Culture and Pedagogy (4 Credits)**

This seminar invites students to analyze and reflect upon the ways in which individuals and groups have created cultural ideals, images, and constructs of education. The course focuses upon pedagogy broadly conceived as an integral part of a diverse and conflictual society and on how pedagogies shape our understanding and reproduction of, as well as our resistance to, such a society. We explore a variety of conflicting views of what it means to be educated, for what purpose, for what kind of society, and towards what future.

**COMN 3020 Conflict Management (4 Credits)**

Substantive and relational types of conflict, various strategies for conflict resolution.

**COMN 3050 Feminism and Intersectionality (4 Credits)**

This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

**COMN 3130 Organizational Communication (4 Credits)**

This is an applied course, service learning course, based on a consulting model. While the course will extend and enrich the topical and theoretical knowledge developed in COMN 1550 and COMN 2130, the primary purpose of this course will be to help students explore how they can put such knowledge into practice by collectively working with a local non-profit organization to first diagnose and then propose (and, in some cases implement) solutions to an organizational communication problem faced by that organization.

**COMN 3140 Advanced Intercultural Communication (4 Credits)**

This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

**COMN 3220 Asian American Communication Studies (4 Credits)**

This course uses a communication-centered approach to historicize Asian Americans in North America whose racialization is intertwined with that of other groups; identify factors that have circumscribed this category in specific ways, often occluding ethnic, religious, gendered, sexual, and other differences among Asian-American groups; the issues affecting people and groups enumerated as Asian American; and who remains excluded from this category.

**COMN 3230 Principles of Leadership (4 Credits)**

Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

**COMN 3270 Health Communication (4 Credits)**

This course examines the role of health communication in our everyday lives. We will focus on communication strategies that inform and influence individuals, families and communities in decisions that enhance health. We will also explore the dynamics and impact of health communication between individuals and the health care system such as doctor-patient communication, dissemination of health related information, and the role of mediated communication in examining health communication.

**COMN 3280 Family Communication (4 Credits)**

The purpose of this course is to enhance understanding about communication patterns within families. In this course, we will examine theory/research on the role of communication in creating and maintaining healthy marriages and families. Specifically, we will study communication and the family life cycle, different family forms, family race/ethnicity, power in families, conflict in families, communication and stress in families, and communication in the aging family. The course format includes lectures, discussions, analysis of case studies, and in class applications.

**COMN 3285 Advanced Relational Communication (4 Credits)**

Advanced Relational Communication is intended to increase understanding of relationships from diverse perspectives. The three main perspectives we will investigate show how relationships affect and are affected by their context, the individuals involved, and the relational system. The goals of this course are for students to increase their skill in (1) explaining how knowledge about context, individuals, and relational systems increases understanding of communication processes in a variety of relationships; (2) evaluating critically the information about relationships that we encounter in our everyday lives; (3) asking and investigating questions about real-life relationships.

**COMN 3290 Communication and Aging (4 Credits)**

In this course, we will focus on the communication processes associated with aging. We will explore the implications of aging and how aging affects the process and outcomes social and relational interactions. We will examine communication and aging through interactional processes (intrapersonal, interpersonal and relational) and through context (organization, family, health, and culture). Emphasis will be placed on the theoretical and applied research in communication and aging.

**COMN 3300 Principles of Persuasion (4 Credits)**

This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.

**COMN 3310 Globalization, Culture, and Communication (4 Credits)**

Drawing from a critical multidisciplinary perspective, this course examines how culture and communication are impacted by globalization. The course explores issues of power and positionality, as well as economic, political, and cultural implications of globalization on people, products, and ideologies in both local and transnational contexts.

**COMN 3315 Public Deliberation (4 Credits)**

During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?.

**COMN 3370 Public campaign design and evaluation (4 Credits)**

This course is designed to provide foundational knowledge and hands-on experience about how to design and develop a theory-driven, audience-relevant communication campaign with a community partner. Students will apply theories and integrate evidence-based research into campaign design strategies including audience analysis, goal establishment, message design, and channel selection. Students will then have opportunities to pilot, implement, and evaluate the campaign.

**COMN 3425 Rhetoric and Governance (4 Credits)**

An introduction to the works of Michel Foucault and his influence on contemporary rhetorical theory. Permission of instructor is required.

**COMN 3431 Rhetoric and Communication Ethics Seminar: Communication and Climate Change (4 Credits)**

Since the release of Al Gore's "An Inconvenient Truth," American public discourse has become increasingly concerned with global warming. Not only is there nearly 100% consensus among climate scientists that human-induced climate change exists, but the severity of global warming is entering the popular imaginary, in the form of journalism, films, etc. But while scientists are committed to slowing global warming, the types of sweeping policy and behavioral changes needed to abate the projected climate catastrophe have been very slow in coming. As such, communication scholars—particularly those concerned with the art of public persuasion—are in a unique position to contribute to this significant and complex issue. In the words of climate scientists Susanne Moser and Lisa Dilling, "We need to open up the communication process to a wider community, in which participants own the process and content of communication." The goal of this course is to produce original scholarly research in response to Moser and Dilling's call, to invite more and better communication concerning climate change.

**COMN 3435 Rhetoric and Public Life (4 Credits)**

An introduction to the conceptual and political history of the public sphere. The course pays particular attention to how the normative assumptions of public communication are affected by the demands of cultural pluralism. Permission from instructor is required.

**COMN 3470 Seminar in Free Speech (4 Credits)**

This course will survey some of the major conceptual innovations in the justifications of freedom of speech. We will begin with an exploration of the traditional defenses of free speech and then move to a reexamination of those defenses in light of modern communication theory and the challenges of pluralism. In particular we will ask if the justifications of free speech need to be rethought given our understanding of speech as a social force that constitutes identities and values rather than merely expressing private opinions. Moreover, given our understanding of the social force of speech, should we regulate speech that is racist, sexist and seems to erode the foundations of a public culture based on mutual respect and public deliberation over social goods? Can we devise a robust defense of free speech based on its social force that both protects those that may be harmed by antidemocratic discourses and still provides the resources for democratic dissent?.

**COMN 3550 Principles of Negotiation (4 Credits)**

This is an applied negotiation course – while we will read and discuss theory, the primary goal of this class is application of that theory and your own personal skill development. Put another way, I want you to leave this course not just knowing about Negotiation Theory but being a better negotiator in your own life within contexts that personally matter to you. My hope is that this course leaves you inspired and equipped in your own communication practice to enact leadership in your own life, whether that be work, your relationships, or other commitments you have. To achieve our purpose, this class will be highly experiential, relying on small group and class conversation, applied activities inside and outside of class, and regular reflection. You will have readings and preparation material before class, and we will utilize mini lectures to ensure we fully understand different concepts before we dive into our application.

**COMN 3680 Gender and Communication (4 Credits)**

This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

**COMN 3700 Topics in Communication (1-4 Credits)****COMN 3701 Topics in Communication (1-4 Credits)****COMN 3702 Topics in Communication (1-4 Credits)****COMN 3703 Topics in Communication (1-4 Credits)****COMN 3704 Topics in Communication (1-4 Credits)****COMN 3705 Topics in Communication (1-4 Credits)****COMN 3770 Mediated Communication and Relationships (4 Credits)**

This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

**COMN 3800 Philosophies of Dialogue (4 Credits)**

This course explores the philosophies of dialogue of Martin Buber, Mikhail Bakhtin and others in the context of contemporary communication scholarship on ethics, culture, and relationship. Prerequisite: permission of instructor.

**COMN 3850 Communication Ethics (4 Credits)**

This class is not just about how to be ethical communicators but it is also about how to discover ethics—the good life and care for others, answerability and responsibility—deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

**COMN 3980 Internship (1-8 Credits)****COMN 3988 Study Abroad Resident Credit (0-18 Credits)****COMN 3990 Communication Capstone (4 Credits)**

This course allows students to synthesize knowledges across the communication studies major through original research presentation.

**COMN 3991 Independent Study (1-5 Credits)****COMN 3993 Communication Capstone Sequence 1 (2 Credits)**

In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student's work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the first half of the sequence.

**COMN 3994 Communication Capstone Sequence 2 (2 Credits)**

In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student's work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the second half of the sequence.

**COMN 3995 Independent Research (1-10 Credits)**

Topics and quarter hours vary. Prerequisite: instructor's permission.

## Applied Communication in Personal & Public Contexts Courses

**COMN 1012 Speaking on Ideas that Matter (4 Credits)**

The purpose of this course is to assist students in becoming more competent and comfortable when speaking about their opinions. Students learn how to develop and analyze rhetorical arguments, including the full range of the speech-making process, but especially how to support those opinions they assert. Assignments, class discussions and course materials provide students with a foundation of knowledge and practical application of speaking skills, which will prove useful in a variety of personal, professional, and public contexts. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)**

This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multi-disciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Applied Communication in Personal & Public Contexts requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2600 Introduction to Political Communication (4 Credits)**

The purpose of this course is to introduce students to the subdiscipline of political communication with a focus on the United States. Through scholarship, case study development, discussion, and activities, this course surveys the major communicative actors in U.S. public and political life. Students will use theories from across political communication to understand the roles of elites, media organizations, and everyday individuals in political talk. Students should leave the course with the ability to identify and critically assess the political communication that permeates their lives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

## Community Engagement for the Public Good

Office: Community Commons, Suite 1100

Mail Code: 2055 E. Evans Ave. Suite 1100 Denver, CO 80208

Phone: 303-871-3706

Web Site: <https://academicaffairs.du.edu/ccesl> (<https://academicaffairs.du.edu/ccesl/>)

The 12-credit undergraduate certificate in Community Engagement for the Public Good offered by the Center for Community Engagement to advance Scholarship and Learning (CCESL) equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. Students will learn the foundations of community-engaged methods and develop their action plan through a series of 2-credit courses, CENG 2510 Denver Urban Issues and Policy, CENG 2520 Community Organizing, and CENG 2590 From Public Good Theory to Action. Students will receive mentoring to effectively carry out and reflect on their action plan through the remaining six credits. For these credits, students may take CENG 3991 Independent Study and/or community-engaged coursework, such as CENG Topics Courses, CENG Internship, or courses tagged with the "Community-Engaged" attribute.

Through the sequence of courses in the certificate program, students will: 1) understand critical issues within the Denver metro area and community efforts to address these issues, 2) explore social change strategies and learn skills that will allow them to work toward the public good and social

change, 3) develop a personal action plan, grounded in anti-oppression analysis, that they can implement to address a social justice issue of their choosing, 4) carry out community-engaged signature work based on their personal action plan, and 5) reflect on their signature work through an ePortfolio.

To meet these outcomes, students will build a set of knowledge, skills, and commitments through CCESL's four pathways to authentic, ethical community-engaged work: Think, Connect, Act, Reflect. In Reflect: A Pathway to Commitment, students commit to act for the public good by considering their place within community and their responsibility to others, engaging in civic professionalism, understanding their strengths, and discerning what they can do to work toward the change they seek. During Think: A Pathway to Actionable Knowledge, students learn civic and democratic processes, a variety of potential social change actions, and to contextualize a social justice issue. Through Connect: A Pathway to Skillful Relationships, students learn to develop relationships rooted in reciprocity, mutuality, and collaboration. Finally, in Act: A Pathway to Being a Skillful Agent of Change, students learn skills to inform their action, including how to use an anti-oppression analysis, and then work collaboratively for social change.

#### CENG 1700 Topics in Community Engagement (1-4 Credits)

#### CENG 2510 Denver Urban Issues and Policy (1-2 Credits)

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. As members of the Denver community, we have the responsibility and right to investigate important issues and co-create solutions that center equity and inclusion. There is a wide array of actions that can be taken to create social change, depending on what the issue demands and the strengths, skills, and talents of those working for change. The aim of this course is three-fold. First, you will learn how the history of Denver, including how legacies of violence, displacement, forced migration, and resettlement of Black, Indigenous, and People of Color communities, have shaped the issues we see today. Second, the course will introduce you to some of the most critical issues facing Denver and local efforts to address those issues. Lastly, the course will provide the space for you to explore the variety of social change actions that can be taken, weighing the pros and cons of each and considering how to assess fit for the issue(s) you care about and your own strengths.

**CENG 2520 Community Organizing (1,2 Credit)**

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. In this course, you will learn about the history of community organizing in the United States, the role of community organizing in contemporary social movements, and the components of the community organizing process. Students will first learn how to critically examine power, privilege, oppression, and white supremacy in the context of working for social change. Then, you will explore various community organizing practices including identifying self-interests; building relationships; defining issues using an anti-oppression analysis; understanding root causes; centering the experience of the communities most impacted by injustice and systemic oppression; and creating a vision, strategies, tactics to support campaigns for social justice.

**CENG 2590 From Public Good Theory to Action (1-2 Credits)**

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. Through this course, you will integrate your personal, professional, and academic goals with a focus on social change. In doing so, you will gain a clear sense of your identity as a public good scholar as well as a personal action plan that you can implement to address a social justice issue of your choosing. You will apply an anti-oppression analysis to your plan including how the I's of Oppression manifest in your selected topic, ways you center the knowledge/voices of the communities most impacted by the injustice/systemic oppression, and how white supremacy shows up in your issue and how to actively work to address racist and oppressive practices.

**CENG 2700 Topics in Community Engagement (1-4 Credits)****CENG 3980 Internship (1-8 Credits)**

Students who complete a special project as part of an internship with a community organization can register for 1-8 Community Engagement Internship credits.

**CENG 3991 Independent Study (1-10 Credits)**

The Public Good Pathways Independent Study provides academic credit for reflection, integration, and synthesis of a student's current and previous work that contributes to the University of Denver's public good vision. This work is overseen by the Center for Community Engagement to advance Scholarship and Learning (CCESL) and may be completed in collaboration with one or more community partner(s). Public Good Pathways Independent Study opportunities are individually designed as experiences for students who have completed at least one community-engaged class, and they require approval from the Executive Director of CCESL.

## Computer Science

Office: Department of Computer Science, Suite 379

Mail Code: Ritchie School of Engineering & Computer Science

2155 E. Wesley Avenue, Denver, CO 80208

Phone: 303-871-3192

Email: [info@cs.du.edu](mailto:info@cs.du.edu)

Web Site: <http://www.du.edu/rsecs/departments/cs> (<http://www.du.edu/rsecs/departments/cs/>)

Computer Science affects every aspect of society and the world: in the apps we use on devices and on the web, in artificial intelligence that is adding sophisticated intelligence and reasoning to applications, in data science that is helping us understand the troves of data being generated in our world, in our entertainment through games, videos and movies, in the way we advance science and mathematics and design products in engineering, and in the way we vote, bank, and run businesses. The Department of Computer Science offers five undergraduate programs with two concentrations and teaches students a solid theoretical foundation of computer science while allowing students to specialize in various areas through electives. Graduates of the program have found employment in all areas of the computer software industry and in the application of computer science in a wide variety of companies and fields. Our graduates work at companies including IBM, Microsoft, Google, Amazon, Oracle, LinkedIn, Meta, Twitter, Raytheon, and Lockheed Martin. Graduates of these programs also are prepared to pursue graduate school in computer science or other related fields. The department offers majors in computer science, game development and applied computing, with concentrations in cybersecurity and artificial intelligence.

Computer science encompasses the theory and techniques by which information is encoded, stored, communicated, transformed and analyzed. It is concerned with the theory of algorithms (that is, effective procedures or programs), with the structure of languages for the expression of algorithms and with the design of algorithms for the solution of practical problems. A central concern in the discipline is problem solving and understanding how to think abstractly for solving large problems and to be able to understand the cost of computation in terms of time and space in solving such problems. Given the incredible amounts of data produced today, an increasing focus in computer science is towards using data to develop algorithms in machine learning and artificial intelligence to analyze and solve new, previously difficult problems.

Computer science students have the ability to take courses in the department in a broad spectrum of topics, including, but not limited to, programming, networking, cybersecurity, privacy, human-computer interaction, game development and design, robotics and human-robot interactions, algorithms, web development, data science, and artificial intelligence.

The Department of Computer Science at the University of Denver offers a bachelor of science in computer science and has strong mathematical foundations that include completing a math cognate, which may be used towards completing a math minor. In addition, the department offers two concentrations with the bachelor of science in computer science in artificial intelligence and cybersecurity.

# Computer Science

## Bachelor of Science in Computer Science Major Requirements

(183 credits required for the degree (p. 100))

The Bachelor of Science in Computer Science prepares students for jobs in highly technical fields or related disciplines where computing is used and needed. Students learn how to problem solve, develop software, analyze the space and time performance of data structures and algorithms, work with and comprehend low-level systems, and apply modern programming techniques. Electives in the major allow them to expand their knowledge of computer science in areas they're interested in pursuing but ensure students receive some breadth of knowledge in the discipline.

59 credits of COMP courses are required by the Bachelor of Science in Computer Science requires that are broadly classified as **Core** courses and **Breadth** courses. The list below lists all the **Core** classes required, totaling 35 credits. Students are also required to satisfy 24 credits of 3000-level COMP electives through the **Breadth** requirement: 4 credits must be taken from courses that are classified into the following 4 categories: 1) ethics, diversity, equity, justice, inclusivity; 2) systems; 3) theory; 4) programming languages. This totals 16 credits and the remaining 8 credits *may* have one of these classifications.

Students must also satisfy a Math cognate consisting of 12 Math credits at Calculus I (MATH 1951) or higher. These Math courses may be used to satisfy a Math minor. Please refer to the Department of Mathematics (p. 491) for details about the Math minor.

Code	Title	Credits
<b>Core Courses</b>		
COMP 1201 & COMP 1202 & COMP 1203	Introduction to Computer Science I and Introduction to Computer Science II and Introduction to Computer Science III (Taken in parallel with COMP 1351, COMP 1352, and COMP 1353) <sup>1</sup>	6
COMP 1351 & COMP 1352 & COMP 1353	Introduction to Programming I and Introduction to Programming II and Introduction to Data Structures & Algorithms I	9
COMP 2300	Discrete Structures in Computer Science <sup>2</sup>	4
COMP 2370	Introduction to Data Structures & Algorithms II	4
COMP 2361	Systems I	4
COMP 2362	Systems II	4
COMP 2381	Object-Oriented Software Development	4
<b>Breadth Courses</b> <sup>3, 4</sup>		
Complete 24 credits of 3000-level computer science courses, where at least one course must satisfy each of the categories: ethics/DEI, systems, theory, and programming languages.		24
<b>Total Credits</b>		<b>59</b>

<sup>1</sup> These courses are typically taken in parallel with Introduction to Programming I (COMP 1351), Introduction to Programming II (COMP 1352), and Introduction to Data Structures & Algorithms I (COMP 1353).

<sup>2</sup> If used towards the Mathematics minor, 4 additional COMP credits must be taken as this course cannot count both towards the Mathematics minor and the total COMP credits required by the degree.

<sup>3</sup> Internship/Co-Op in Computing (COMP 3904) may not be used to satisfy 3000-level computer science breadth credits.

<sup>4</sup> Electives in the Programming Language category: Programming Languages (COMP3351), Compiler Design (COMP3352), Compiler Construction (COMP3353)  
Electives in the Systems category: Operating Systems (COMP3361), Networking (COMP3621), Game Networking (COMP3681), Topics in Systems (COMP3704), Computer Security (COMP3721), Network Security (COMP3722), Ethical Hacking (COMP3723), Computer Forensics (COMP3731)  
Electives in the Theory category: DataStructures&Algorithms (COMP3371), Advanced Algorithms (COMP3372), Introduction to AI (COMP3501), Computational Geometry (COMP3591)  
Electives in the Ethics/DEI category: Human Computer Interaction (COMP3100), Human Data Security and Privacy (COMP3732),  
Other special topics may potentially count in a category. Please see your advisor for more information on special topic classes.

### Additional Requirements

Students must also satisfy the Math cognate requirements:

Code	Title	Credits
<b>Math Cognate</b>		
12 additional credits of Math electives at MATH 1951 or higher. <sup>1</sup>		12

<sup>1</sup> Courses satisfying the Math cognate may also be used to satisfy the Mathematics minor.

## Concentration in Artificial Intelligence

Artificial Intelligence (AI) is a broad sub-field of Computer Science including search, planning, natural language processing, computer vision, speech recognition, optimization, knowledge representation, machine learning, and neural networks to name a few of the major areas in AI. This AI Concentration takes students from the basic mathematical foundations to theoretical computer science underpinnings of artificial intelligence to practical applications using AI, enabling students to understand, design and develop modern AI for solving real-world problems.

The Artificial Intelligence Concentration is a concentration that can be taken with the Bachelor of Science degrees offered by the Computer Science Department. Students enrolled in a Bachelor of Science in Computer Science or Game Development will use the required classes as part of their Math Cognate and the AI required courses as electives in their degrees.

The Artificial Intelligence Concentration has the following courses:

Code	Title	Credits
<b>Math Required Courses (2 courses)</b>		
MATH 2060	Elements of Linear Algebra	
MATH 3080	Introduction to Probability	
<b>Computer Science Required Courses (2 courses):</b>		
COMP 3501	Introduction to Artificial Intelligence	4
COMP 3703	Topics-Artificial Intelligence (Foundations of Machine Learning)	4
<b>Computer Science Electives (3 from the following) <sup>1</sup></b>		<b>12</b>
COMP 3432	Machine Learning	
ENCE 3620	Computer Vision	
COMP 3510	Software for AI Robotics	
COMP 3703	Topics-Artificial Intelligence (Mind-Reading Machines)	
COMP 3703	Topics-Artificial Intelligence (Large Language Models)	
COMP 3703	Topics-Artificial Intelligence (Natural Language Processing)	
<b>Total Credits</b>		<b>20</b>

## Concentration in Cybersecurity

The cybersecurity concentration is a specific track as part of the Bachelor of Science in Computer Science Degree, applicable for students who have an interest in computer security (cybersecurity) and/or would like to have experience in the field. A concentration indicates a study focus that is reflected on transcripts and the degree itself (similar to a minor, but not significantly different enough from the major itself to be an actual minor).

Students can attain the cybersecurity concentration by completing at least 20 credits of the listed cybersecurity specific courses offered by the computer science department (or those approved by the major advisor, cybersecurity program director, or department chair).

The cybersecurity concentration is made up of the following required courses. They can be completed in any order, though normal prerequisite requirements apply.

Code	Title	Credits
<b>Required Courses</b>		
COMP 3621	Computer Networking	4
COMP 3721	Computer Security	4
COMP 3722	Network Security	4
COMP 3723	Ethical Hacking	4
<b>One of the Following:</b>		<b>4</b>
COMP 3384	Secure Software Engineering	
COMP 3731	Digital Forensics	
COMP 3732	Human-Centered Data Security and Privacy	
<b>Total Credits</b>		<b>20</b>

## Bachelor of Arts in Computer Science Major Requirements

The Bachelor of Arts in Computer Science prepares a student for a job in a highly technical field or related discipline where computing is needed. Students learn how to problem solve, develop software, analyze the space and time performance of data structures and algorithms, work with and comprehend low-level systems, and apply modern programming techniques. Electives in the major allow them to expand their knowledge of computer science in areas they're interested in pursuing but ensure students receive some breadth of knowledge in the discipline. This program is similar to the Bachelor of Science in Computer Science, except that it does not require the Math cognate.

59 credits of COMP courses are required in the Bachelor of Arts in Computer Science that are broadly classified as **Core** courses and **Breadth** courses. The table below lists all the **Core** classes required, totaling 35 credits. Students are also required to satisfy 24 credits of 3000-level COMP electives through the **Breadth** requirement: 4 credits must be taken from courses that are classified into the following 4 categories: 1) ethics, diversity, equity, justice, inclusivity; 2) systems; 3) theory; 4) programming languages. This totals 16 credits and the remaining 8 credits may have one of these classifications.

Code	Title	Credits
<b>Core Courses</b>		
COMP 1201 & COMP 1202 & COMP 1203	Introduction to Computer Science I and Introduction to Computer Science II and Introduction to Computer Science III	6
COMP 1351 & COMP 1352 & COMP 1353	Introduction to Programming I and Introduction to Programming II and Introduction to Data Structures & Algorithms I	9
COMP 2300	Discrete Structures in Computer Science	4
COMP 2370	Introduction to Data Structures & Algorithms II	4
COMP 2361	Systems I	4
COMP 2362	Systems II	4
COMP 2381	Object-Oriented Software Development	4
<b>Breadth Courses</b> <sup>2, 3</sup>		
Complete 24 credits of 3000-level computer science courses, where at least one course must satisfy each of the categories: ethics/DEI, systems, theory, and programming languages. <sup>1, 2</sup>		24
<b>Total Credits</b>		<b>59</b>

<sup>1</sup> Internship/Co-Op in Computing (COMP 3904) may not be used to satisfy 3000-level computer science elective credits.

<sup>2</sup> Computer Science courses may be designated as covering topics in theory, systems, programming languages, and ethics/DEI (diversity, equity, inclusivity). One course must be taken from each of these 4 categories, and the other courses may be from any (or no) category.

<sup>3</sup> Electives in the Programming Language category: Programming Languages (COMP3351), Compiler Design (COMP3352), Compiler Construction (COMP3353)  
Electives in the Systems category: Operating Systems (COMP3361), Networking (COMP3621), Game Networking (COMP3381), Topics in Systems (COMP3704), Computer Security (COMP3721), Network Security (COMP3722), Ethical Hacking (COMP3723), Computer Forensics (COMP3731)  
Electives in the Theory category: DataStructures&Algorithms (COMP3371), Advanced Algorithms (COMP3372), Introduction to AI (COMP3501), Computational Geometry (COMP3591), Topics in AI (COMP3703)  
Electives in the Ethics/DEI category: Human Computer Interaction (COMP3100), Human Data Security and Privacy (COMP3732)  
Other special topics may potentially count in a category. Please see your advisor for more information on special topic classes.

## Minor in Computer Science Requirements

A minor in Computer Science requires a total of 21 credits. The goal of the minor is to provide students with a foundation in computer programming and a basic understanding of the discipline, while allowing some flexibility in elective courses to compliment their interests. Note that the Minor in Computer Science may also be used to satisfy the Computer Science course requirements of the Computational Physics Concentration (p. 597). The following courses are required for the Minor in Computer Science:

Code	Title	Credits
<b>Required Courses</b>		
COMP 1201	Introduction to Computer Science I	2
COMP 1202	Introduction to Computer Science II	2
COMP 1351	Introduction to Programming I	3
COMP 1352	Introduction to Programming II	3
COMP 1353	Introduction to Data Structures & Algorithms I	3
<b>Electives</b>		

8 credits of 2000-level or higher COMP courses <sup>1</sup>	8
<b>Total Credits</b>	<b>21</b>

<sup>1</sup> COMP 3904 Internship/Co-Op in Computing cannot be used to satisfy the elective requirements of the minor.

## Applied Computing

The Bachelor of Arts in Applied Computing (BA in AC) provides a quality education for a serious computer user. It complements the department's Bachelor of Science in Computer Science by providing a program that combines collaboration with other departments and an applications-oriented emphasis. A prospective BA in AC major must satisfy all the requirements for a Bachelor of Arts (p. 97) degree as outlined in the University Undergraduate Bulletin.

The BA in AC is a suitable degree for many collaborative programs within the University and would be ideal for students in graphic arts and electronic publishing or would provide an appropriate foundation for a student who wishes to pursue a career in the field of educational technology. A graduate with a BA in AC would be very attractive in the data processing unit of large financial, banking, or insurance institutions, as a network or system administrator or as a World Wide Web designer/programmer. Holders of the BA in AC degree would also be well suited to continue in any number of specialized Master's or certificate programs in fields as diverse as video and graphics production, fashion design, telecommunications, instructional technology, or management information systems.

### Bachelor of Arts in Applied Computing Major Requirements

(183 credits required for the degree (p. 97))

The Bachelor of Arts in Applied Computing prepares students for a job in a technical field or a discipline where computing is used as a tool for problem solving. Students learn how to problem solve, develop software, and apply computer science techniques to any discipline. The flexibility in this program allows students to more easily double-major in another area of their interest to understand better how to apply computing principles to that field.

This major requires 47 credits of computer science and other approved computer applications and mathematics courses. Students are required to take 19 credits in core computer science courses and 4 credits in courses that contain topics in ethics, diversity, equity, inclusivity, and social justice. Majors pick a computer science stream to focus on and will complete 12 credits in that stream. In addition, majors will select a cognate in an allied field where they will complete 12 credits of computational-related courses (note, these cannot be used for the major also).

Per University requirements (p. 97), no more than 60 credit hours in any one department can be applied towards a Bachelor of Arts (p. 97) degree. Required courses are as follows:

Code	Title	Credits
<b>Core Courses</b>		
COMP 1201 & COMP 1202 & COMP 1203	Introduction to Computer Science I and Introduction to Computer Science II and Introduction to Computer Science III	6
COMP 1351 & COMP 1352 & COMP 1353	Introduction to Programming I and Introduction to Programming II and Introduction to Data Structures & Algorithms I	9
COMP 2381	Object-Oriented Software Development	4
<b>Ethics, Diversity, Equity, Justice, Inclusivity Elective</b>		
4 credit COMP elective designated as ethics, diversity, equity, justice, inclusivity		4
<b>Stream Courses</b>		
12 credits of chosen computer science stream		12
<b>Cognate Courses</b>		
12 credits of chosen cognate courses or COMP electives		12
<b>Total Credits</b>		<b>47</b>

### Computer Science Streams for the Bachelor of Arts in Applied Computing

Students must complete 12 credits in one of the following streams. Computing streams not listed may be approved by the department and advisor, but must consist of COMP courses. The following streams are pre-approved but may not list all possible courses that apply towards a stream, and in particular, computer science topics courses may be used to fulfill the requirements of a stream (e.g., Topics in Computer Science (COMP 3705)).

- **Data:** Database Organization & Management I (COMP 3421), NoSQL Databases (COMP 3424), Data Visualization (COMP 3433)
- **Web Development:** World Wide Web Programming (COMP 3410), Web Programming II (COMP 3411), one or more of { Web Projects: Web Development III (COMP 3412), Database Organization & Management I (COMP 3421), NoSQL Databases (COMP 3424) }

- **Systems:** Systems I (COMP 2361), Systems II (COMP 2362), one or more of { Operating Systems I (COMP 3361), Computer Networking (COMP 3621), Computer Security (COMP 3721), Network Security (COMP 3722), COMP 3723 Ethical Hacking, COMP 3731 Computer Forensics }

### Cognate in Allied Fields

Students must also complete 12 credits that are computational and/or data oriented in nature in one of the approved allied fields. These should be chosen with and approved by their advisor and can include continued coursework in Computer Science. Courses used to satisfy this requirement, may not also be used to satisfy other major or minor requirements. The allied disciplines include, but are not limited to:

- Emergent Digital Practices (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/emergentdigitalpractices/>)
- Geographic Information Science (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/geographyandtheenvironment/#programofstudytext>)
- Mathematics (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mathematics/>)
- Accounting (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/accounting/>), Finance (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/finance/>), Business Information and Analytics (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/businessintelligenceandanalytics/>), or Innovation and Entrepreneurship (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/innovationandentrepreneurship/>)
- Media, Film, and Journalism Studies (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mediafilmampjournalismstudies/>)
- Social Sciences
- Natural Sciences
- Arts, Humanities, and Music (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/mediafilmampjournalismstudies/>)
- Computer Science (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/computerscience/>)

## Game Development

The game development programs are a joint effort by the University of Denver Computer Science, Emergent Digital Practices and Art programs. Specific degrees offered are

- Bachelor of Arts with a major in Game Development, and
- Bachelor of Science with a major in Game Development.

Graduates of these programs not only have solid computer science, graphics and game-programming skills, but also a strong foundation in art and/or the critical, technical and design aspects of digital media. To obtain this foundation, the major requires work in allied fields. Allied areas include Studio Art and Emergent Digital Practices. The depth of allied knowledge is dependent on the degree (BA or BS) chosen.

### Bachelor of Arts in Game Development Major Requirements

(183 credits required for the degree (p. 97))

The Bachelor of Arts in Game Development is a degree which prepares students to be capable of creating artistic content and designing game play for games while having a strong technical background, enabling them to bridge the gap between artist, programmer and designer. The BA in Game Development requires a Minor in Emergent Digital Practices (p. 316). A graduate of this program will be able to study and work as a developer, game designer and an artist. The BA requires more courses in the allied art fields than the BS and is balanced by having fewer required Math and Computer Science courses.

59 credits, including the following:

Code	Title	Credits
<b>Required Courses</b>		
COMP 1201 & COMP 1202 & COMP 1203	Introduction to Computer Science I and Introduction to Computer Science II and Introduction to Computer Science III <sup>1</sup>	6
COMP 1351 & COMP 1352 & COMP 1353	Introduction to Programming I and Introduction to Programming II and Introduction to Data Structures & Algorithms I	9
COMP 2300	Discrete Structures in Computer Science	4
COMP 2370	Introduction to Data Structures & Algorithms II	4

COMP 2381	Object-Oriented Software Development	4
COMP 2821	Introductory Game Design	4
COMP 3820 & COMP 3821	Introduction to Game Programming and Game Programming I	8
COMP 3831 & COMP 3832 & COMP 3833	Game Prototyping and Game Capstone I and Game Capstone II	12
ARTS 1250	Drawing	4
EDPX 3600	3D Modeling	4
<b>Total Credits</b>		<b>59</b>

<sup>1</sup> These courses are usually taken in sequence with Introduction to Programming I (COMP 1351), Introduction to Programming II (COMP 1352), and Introduction to Data Structures & Algorithms I (COMP 1353).

## Bachelor of Science in Game Development Major Requirements

(183 credits required for the degree (p. 100))

The Bachelor of Science in Game Development is a combination of a Computer Science degree, specific courses in Game Development, and requires a cognate in Mathematics, a second minor of your choice, and a cognate of five approved classes from Art (p. 150), Emergent Digital Practices (p. 316), Creative Writing (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/english/>), or Music (<http://bulletin.du.edu/undergraduate/majorsminorscoursedescriptions/traditionalbachelorsprogrammajorandminors/music/>). In addition, both degrees require satisfying the University Common Curriculum requirements for the BS degree.

This program provides a strong computer science and technical background, preparing students for all aspects of game programming, while providing them with a foundation in art, emergent digital practices, creative writing, or music. Thus, graduates of this program are able to help in the programming and development of games, while understanding and being able to communicate effectively with the artists, designers, writers and musicians who are part of any game development project. The BS requires more mathematics and more required COMP classes than the BA and is balanced with fewer classes in the allied fields.

Courses in this program are broadly classified as **Core**, **Breadth**, and **Cognate** courses. **Core** and **Breadth** courses total 63 credits in Computer Science. Cognate Courses are divided between the Math Cognate at 12 credits and the Art Cognate at 20 credits. Both cognates can be used, and usually are, to satisfy the courses and credits of their respective minors.

Code	Title	Credits
<b>Core Courses</b>		
COMP 1201 & COMP 1202 & COMP 1203	Introduction to Computer Science I and Introduction to Computer Science II and Introduction to Computer Science III <sup>1</sup>	6
COMP 1351 & COMP 1352 & COMP 1353	Introduction to Programming I and Introduction to Programming II and Introduction to Data Structures & Algorithms I	9
COMP 2300	Discrete Structures in Computer Science	4
COMP 2370	Introduction to Data Structures & Algorithms II	4
COMP 2361 & COMP 2362	Systems I and Systems II	8
COMP 2381	Object-Oriented Software Development	4
COMP 2821	Introductory Game Design	4
COMP 3820 & COMP 3821 & COMP 3822	Introduction to Game Programming and Game Programming I and Game Programming II	12
COMP 3831 & COMP 3832 & COMP 3833	Game Prototyping and Game Capstone I and Game Capstone II	12
<b>Total Credits</b>		<b>63</b>

<sup>1</sup> These courses are usually taken in sequence with Introduction to Programming I (COMP 1351), Introduction to Programming II (COMP 1352), and COMP 1353 Introduction to Data Structures & Algorithms I.

Additional Requirements

Students must complete both a Math and Art cognate:

Code	Title	Credits
<b>Math Cognate</b>		
12 additional credits of Math electives at MATH 1951 or higher. <sup>1</sup>		12
<b>Art Cognate</b>		
20 credits from art, emergent digital practices, creative writing, or music. <sup>2</sup>		20

<sup>1</sup> These cognate credits may also be used to satisfy a Math minor.  
<sup>2</sup> These cognate courses may be used to satisfy credits in a minor in one of these fields.

Bachelor of Science and Bachelor of Arts in Computer Science

The following is a typical plan of study for a BS or BA in Computer Science major. BA students do not need to complete the Math cognate requirement and can replace these with Common Curriculum or other major/minor courses as needed. Flexibility in the junior and senior years allows students to study abroad in any quarter fairly easily.

First Year					
Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111		4 WRIT 1122		4 WRIT 1133	4
COMP 1201	2	COMP 1202	2	COMP 1203	2
COMP 1351	3	COMP 1352	3	COMP 1353	3
Math cognate course	4	Math cognate course	4	Math cognate course	4
Common Curriculum Course <sup>1</sup>		4 Common Curriculum Course		4 Common Curriculum Course	4
	17		17		17
Second Year					
Fall	Credits	Winter	Credits	Spring	Credits
COMP 2300		4 COMP 2370		4 COMP 2361	4
COMP 2381	4	Common Curriculum Course	4	COMP 3000-level elective	4
Common Curriculum Course	4	Common Curriculum Course	4	1st minor course <sup>2</sup>	4
Common Curriculum Course	4	Common Curriculum Course	4	Common Curriculum Course	4
	16		16		16
Third Year					
Fall	Credits	Winter	Credits	Spring	Credits
COMP 2362		4 COMP 3000-level elective		4 COMP 3000-level elective	4
COMP 3000-level elective	4	1st minor course	4	1st minor course	4
1st minor course	4	2nd minor course	4	2nd minor course	4
2nd minor course <sup>2</sup>	4	Common Curriculum Course	4	Common Curriculum Course	4
	16		16		16
Fourth Year					
Fall	Credits	Winter	Credits	Spring	Credits
COMP 3000-level elective		4 COMP 3000-level elective		4 2nd minor course	4
1st minor course	4	2nd minor course	4	Elective	4
2nd minor course	4	Elective	4	Elective	4
	12		12		12
Total Credits: 183					

Bachelor of Arts in Applied Computing

The following is a typical plan of study for BA in Applied Computing majors. Note that flexibility in the schedule allows students to study abroad and easily double-major in another major or even double minor.

**First Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
COMP 1201	2	COMP 1202	2	COMP 1203	2
COMP 1351	3	COMP 1352	3	COMP 1353	3
Common Curriculum Course <sup>1</sup>	4	Common Curriculum Course	4	Common Curriculum Course	4
Common Curriculum Course	4	Common Curriculum Course	4	Common Curriculum Course	4
	<b>17</b>		<b>17</b>		<b>17</b>

**Second Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
COMP 2381	4	COMP Stream course	4	COMP Stream course	4
Common Curriculum Course	4	Common Curriculum Course	4	COMP Stream course	4
Minor Course	4	Minor Course	4	Common Curriculum Course	4
Elective	4	Elective	4	Minor Course	4
	<b>16</b>		<b>16</b>		<b>16</b>

**Third Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

Elective	4	Elective	4	Elective	4
	<b>12</b>		<b>12</b>		<b>12</b>

Total Credits: 183

## Bachelor of Science in Game Development

The following is a typical plan of study for BS in Game Development majors. Generally students who study abroad do this in their junior year of the major. Note that courses listed as Minor are typically combined with the required Art Cognate.

**First Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
COMP 1201	2	COMP 1202	2	COMP 1203	2
COMP 1351	3	COMP 1352	3	COMP 1353	3
Math cognate	4	Math cognate	4	Math cognate	4
Common Curriculum Course <sup>1</sup>	4	Common Curriculum Course	4	Common Curriculum Course	4
	<b>17</b>		<b>17</b>		<b>17</b>

**Second Year**

<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
COMP 2300	4	COMP 2370	4	COMP 2361	4

## Bachelor of Arts in Game Development

The following is a typical plan of study for BA in Game Development majors. Students have the flexibility to study abroad typically in their junior year and have significant flexibility to either double major in Emergent Digital Practices (p. 316) (instead of just the minor) or take a second minor.

**First Year**

Fall	Credits	Winter	Credits	Spring	Credits
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4
COMP 1201	2	COMP 1202	2	COMP 1203	2
COMP 1351	3	COMP 1352	3	COMP 1353	3

## Requirements for Distinction in the Major in Computer Science, Game Development, or Applied Computing

Distinction in any of the majors granted through the Department of Computer Science require the following:

- Minimum 3.3 cumulative GPA in major courses
- Research project including thesis and presentation

## Research Project

The undergraduate research project is an advanced project conducted with a faculty advisor in the Computer Science Department that a student may spend multiple quarters working on. The recommendation is that students find a faculty advisor in their junior year so that they may begin planning out the project which could be carried out over the summer and in their senior year. While a student may use work from a Independent Research (COMP 3995) or Independent Study (COMP 3991) as the basis for their distinction project, the scope of the distinction project must be larger than what was accomplished in those courses. The additional work required to complete the distinction project cannot have credits awarded for it; however, it may be supported by a PinS grant (<https://career.du.edu/resources/partners-in-scholarship-pins/>) so long as the scope is sufficient. The determination of what additional work is sufficient to complete the distinction project is left to the faculty advisor overseeing the project.

## Thesis

In addition to the work carried out to complete the project, students are required to write an undergraduate thesis describing the related work, methodology used, and their results. While it is not a requirement that the undergraduate thesis is published, it is expected that the work is of publishable quality.

The thesis paper should follow the University of Denver Thesis and Dissertation Formatting Guidelines (<https://www.du.edu/graduate-education/current-student-resources/dissertation-thesis-information/>) specified by the Office of Graduate Education.

## Presentation or Defense

Once the thesis is complete, students must present their work publicly. Students must complete at least one of the following public presentations, chosen in collaboration with their advisor:

1. **Formal thesis defense.** If a student chooses to defend their work, they must give a presentation in front of a committee, which consists of the faculty advisor and at least one other faculty member of the Computer Science Department. The student shall choose the committee with the input of the faculty advisor. The committee shall then decide whether the student will pass the defense.
2. **Presentation at Computer Science Research Day,** an annual event held by the DU CS department, typically held in mid-late May. The option to present as part of Computer Science Research Day is subject to meeting any scheduling deadlines set by that year's Research Day committee and the distinction advisor.
3. **Presentation at Student Signature Work Showcase** (<https://academicaffairs.du.edu/student-research/annual-research-showcase/>), a campus-wide annual event open to students across DU, typically held in mid-late May. The option to present as part of the Student Signature Work Showcase is subject to meeting any scheduling deadlines set by that year's Signature Work Showcase Committee and the distinction advisor.
4. **Another public presentation** in a format and venue agreed upon with the faculty advisor. For instance, this could include submitting and presenting a paper at an academic conference, presenting at a community workshop that the work is relevant to, or other similar formats. As above, this option is subject to meeting any scheduling deadlines set by the venue and the distinction advisor.

## Limitations

The undergraduate distinction research project may not be used to fulfill the requirements of any other University of Denver degree or award, nor may any other University of Denver degree or award be used to fulfill the requirements of the undergraduate distinction research project.

# Computer Science

## COMP 1101 Analytical Inquiry I (4 Credits)

Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

## COMP 1201 Introduction to Computer Science I (2 Credits)

This course introduces the discipline of computer science and how it applies the natural and physical world and society. Topics include the history of computing, computer hardware components, the internet, ethics, and uses computation as a means to analyze, process, model, and understand our world. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Ideally taken concurrently with COMP 1351.

## COMP 1202 Introduction to Computer Science II (2 Credits)

This course continues the introduction of the discipline of computer science by exploring major areas within it. Topics covered include examples from data structures, algorithms, databases, programming languages, parallel computing, artificial intelligence, robotics, cyber-security, data science, gaming, and ethics. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: COMP 1201.

## COMP 1203 Introduction to Computer Science III (2 Credits)

This course introduces testing and software development in computer science. Topics covered include using debuggers, version control systems, unit testing and general testing, Unified Modeling Language (UML), computing ethics, and software development in a team setting. Prerequisite: COMP 1202.

## COMP 1351 Introduction to Programming I (3 Credits)

This course is an introduction to fundamental aspects of computer programming. Topics covered include variables, conditional statements, iteration, functions, basic data structures, objects, file input/output and interactions. Satisfies 3 credits of Analytical Inquiry: Natural and Physical World.

**COMP 1352 Introduction to Programming II (3 Credits)**

This course continues to introduce more advanced programming topics using the Python programming language. Topics include classes, types, inheritance, methods/functions, testing, graphical-user interfaces, threads, data manipulation, functional programming, and recursion. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: COMP 1351.

**COMP 1353 Introduction to Data Structures & Algorithms I (3 Credits)**

This course introduces data structures used in computation, including their behavior, usage, implementation, and the analysis of their space usage. In addition, the algorithms used for access, manipulation, and updating the data structures is covered. Data structures and algorithms addressed include contiguous and linked lists, stacks, queues, hash tables, heaps, trees, self-balancing trees, graphs, and graph traversal. Introductory runtime analysis is used to prove time and space requirements for data structures and their performance while being used. Prerequisite: COMP 1352.

**COMP 1601 Computer Science Pathways (1 Credit)**

This course is designed to help first year computer science and game development students succeed in a very challenging major. Topics and activities may include academic success strategies; personal inventory exercises; interviewing computer science alumni; exploring ethical concerns within the profession; seminars by industry and academic experts; establishing the relationships between computing and other disciplines; critical and creative thinking activities; disseminating information on the dual degree programs, the honors program requirements, the honor code, and computer science department program structures; and readings from and discussions about computing related articles and publications.

**COMP 1671 Introduction to Computer Science I (4 Credits)**

Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

**COMP 1672 Introduction to Computer Science II (4 Credits)**

Advanced programming techniques; arrays, recursion, dynamic data structures, algorithm abstraction, object-oriented programming including inheritance and virtual functions. Prerequisite: COMP 1671.

**COMP 1991 Independent Study (1 Credit)****COMP 2300 Discrete Structures in Computer Science (4 Credits)**

Number systems and basic number theory, propositional and predicate logic, proof techniques, mathematical induction, sets, counting and discrete probability, case studies with applications from computer science, such as data representation, algorithm analysis and correctness, and system design. Prerequisites: COMP 1672 or COMP 1352.

**COMP 2355 Intro to Systems Programming (4 Credits)**

The prerequisites for this class are a good understanding of imperative and object-oriented programming in Java. The prerequisites for this class include a good understanding of basic programming constructs, such as branches (if, switch), loops (for, while, do), exceptions (throw, catch), functions, objects, classes, packages, primitive types (int, float, boolean), arrays, arithmetic expressions and boolean operations. Computer organization is a parallel prerequisite; if possible, students should register for both this course and COMP 2691. You must have a good understanding of basic data structures such as arrays, lists, sets, trees, graphs and hash-tables. This is a class on systems programming with focus on the C programming language and UNIX APIs. There will be programming assignments designed to make you use various Debian GNU/Linux system APIs. Programming assignments involve writing code in C or C++. Prerequisite: COMP 2673.

**COMP 2361 Systems I (4 Credits)**

This course introduces low-level computer systems and programming. Topics covered include Linux, the C programming language, pointers, dynamic memory management, number systems, instruction set architectures, debugging, and caching. Prerequisites: COMP 1353.

**COMP 2362 Systems II (4 Credits)**

This course introduces computer operating systems and parallel programming. Topics covered include processes, process forks, threads, race conditions, synchronization, scheduling, memory systems, resource sharing, and sockets. Prerequisite: COMP 2361.

**COMP 2370 Introduction to Data Structures & Algorithms II (4 Credits)**

This course introduces the performance analysis of algorithms, including proof techniques; data structures and their physical storage representation, including space and performance analysis; recursive techniques; stacks, queues, lists, trees, sets, graphs; sorting and searching algorithms. Prerequisites: MATH 2200 or COMP 2300; COMP 1353 or COMP 2673.

**COMP 2381 Object-Oriented Software Development (4 Credits)**

Some problems are most naturally modeled by a hierarchy of objects and the relationships between those objects. This course introduces object-oriented design and development as a problem solving technique. Topics covered include the Java programming language, including classes, methods, fields, inheritance, interfaces, polymorphism, generics, static typing, design patterns, and the Java Collections Framework. Prerequisite: COMP 1353.

**COMP 2673 Introduction to Computer Science III (4 Credits)**

An introduction to several advanced topics in computer science. Topics vary from year to year and may include any of the following: theory of computing, cryptography, databases, computer graphics, graph theory, game theory, fractals, mathematical programming, wavelets, file compression, computational biology, genetic algorithms, neural networks, simulation and queuing theory, randomized algorithms, parallel computing, complexity analysis, numerical methods. Prerequisite: COMP 1672 or COMP 1771.

**COMP 2691 Introduction to Computer Organization (4 Credits)**

This course covers basic topics in Computer Organization and is a required course in the BS in Computer Science, BS in Game Development, and BS in Computer Engineering degrees. Topics include: instruction set architectures, integer and floating point arithmetic, processors, memory systems, and topics in storage and Input/Output. Prerequisite: COMP 1672.

**COMP 2701 Topics in Computer Science (1-5 Credits)****COMP 2821 Introductory Game Design (4 Credits)**

Learn fundamental game design practices through the creation of paper and physical game prototypes using a play-centric design process. Topics include the formal elements, dramatic elements, and system dynamics of games, with an emphasis on playtesting, game analysis, and group game projects. Program Prerequisites: Restricted to Game Development and EDPX majors or instructor approval. Course prerequisites: COMP 1352 or EDPX 2100.

**COMP 2901 Computing and Society (4 Credits)**

This course is designed to explore the social implications of computing practices, organization and experience. These topics and other issues are correlated with examples from the older and modern history of technology and science. Some formal experience with computing is assumed, but students who have a good familiarity with ordinary computing practice should be ready. Students are also expected to contribute their expertise in one or more of the areas of their special interest. Cross listed with DMST 3901.

**COMP 3000 Seminar: The Real World (1 Credit)**

Series of lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with MATH 3000.

**COMP 3009 Essential Math for Data Science and AI (4 Credits)**

The primary objective of the course is to empower students with the mathematical tools most used in data science. Students will develop an understanding of fundamental topics such as matrix operations, eigenvectors, and singular value decomposition (SVD), along with key calculus principles, including derivatives and integrals, with a focus on their applications in data science. The course also explores elements of multivariate calculus and optimization techniques to solve real-world problems, as well as probability concepts relevant to modeling uncertainty and variability in data. Additionally, students will gain exposure to implementing mathematical models using Python libraries such as NumPy, Pandas, and Matplotlib to analyze and manipulate data. By synthesizing these mathematical principles, students will be prepared for more advanced topics in data science and machine learning. Graduate student will be expected to upload a course presentation/project assignment to their individual Github portfolio.

**COMP 3100 Human-Computer Interaction (4 Credits)**

Introduces students in computer science and other disciplines to principles of and research methods in human-computer interaction (HCI). HCI is an interdisciplinary area concerned with the study of interaction between humans and interactive computing systems. Research in HCI looks at cognitive and social phenomena surrounding human use of computers with the goal of understanding their impact and creating guidelines for the design and evaluation of software, interfaces, physical products, and services in industry. Prerequisite: COMP 1353, but students from all disciplines are welcome. Cross-listed with COMP 4100.

**COMP 3200 Discrete Structures (4 Credits)**

Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Prerequisites: COMP 2300 and COMP 1353 for undergraduates and COMP 3004 for graduates.

**COMP 3334 Parallel and Distributed Computing for Data Science and AI (4 Credits)**

Current techniques for effective use of parallel processing and large-scale distributed systems for data science. Programming assignments will give students experience in the use of these techniques. Specific topics will vary from year to year to incorporate recent developments. This course is not to be used for the MS Computer Science. Graduate students are required to contribute at least one course assignment to their personal Github portfolio. Prerequisite: COMP 2370.

**COMP 3351 Programming Languages (4 Credits)**

Learn the fundamentals of programming languages through functional programming through an in-depth understanding of syntax and semantics around program structures and how programming languages are parsed and interpreted. Understand recursion as a fundamental problem-solving paradigm and the important role that higher order types and kinds play in eliminating errors and simplifying software development. Satisfies the Programming Language elective requirement. Prerequisites: COMP 2362 and COMP 2370.

**COMP 3352 Elements of Compiler Design (4 Credits)**

Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.

**COMP 3353 Compiler Construction (4 Credits)**

Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

**COMP 3361 Operating Systems I (4 Credits)**

Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: for undergraduates: (COMP 2355 and COMP 2691) or COMP 2361; COMP 2370; for graduate students: COMP 3003, 3004, and 3005.

**COMP 3371 Data Structures & Algorithms (4 Credits)**

Design and analysis of algorithms and data structures; asymptotic complexity, recurrence relations, lower bounds; algorithm design techniques such as incremental, divide-and-conquer, dynamic programming, iterative improvement, greedy algorithms; randomized data structures and algorithms.

Prerequisites: COMP 2370 or equivalent and COMP 3200.

**COMP 3372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks.

**COMP 3381 Software Engineering I (4 Credits)**

An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351; COMP 3361 or COMP 2362; or instructor permission.

**COMP 3382 Software Engineering II (4 Credits)**

Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture.

Prerequisite: COMP 3381.

**COMP 3384 Secure Software Engineering (4 Credits)**

This course is concerned with systematic approaches for the design and implementation of secure software. While topics such as cryptography, networking, network protocols and large scale software development are touched upon, this is not a course on those topics. Instead, this course is on identification of potential threats and vulnerabilities early in the design cycle. The emphasis in this course is on methodologies and paradigms for identifying and avoiding security vulnerabilities, formally establishing the absence of vulnerabilities, and ways to avoid security holes in new software.

There are programming assignments designed to make students practice and experience secure software design and development. Prerequisites: COMP 2362 or COMP 3361.

**COMP 3410 Web Programming I (4 Credits)**

This course will give an overview of machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve.

This will include the broad differences between supervised, unsupervised and reinforcement learning and associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, neural networks, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After taking the course, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 1353, MATH 1952, and MATH 2060.

**COMP 3411 Web Programming II (4 Credits)**

In this course you will learn how to develop a full-stack web application that is capable of serving dynamic content from a database. Furthermore, you will learn the core design concepts and principles that will enable you to develop scalable and easy to maintain webapplications - a set of skills that will serve you well in both your personal and professional projects in the future. Prerequisite: COMP 3410.

**COMP 3412 Web Projects: Web Development III (4 Credits)**

In this course you will learn how to develop, as a group, a full-stack web application that is capable of serving dynamic content from a database. We will use the MongoDB, ExpressJS, Angular, and Node.js (MEAN) software stack to work on a real-life problem presented to us by an external product owner. In the class we will use the Scrum framework for Agile development to work, as a software team, through several sprints of development. You will be peer reviewing each other throughout the course, and the product owner will also be reviewing your product through end-of-sprint demos as features are completed. The goal for this class is for it to be a fun, collaborative, and educational environment that demonstrates what it is like to work as a real software team. Prerequisite: COMP 3411.

**COMP 3421 Database Organization & Management I (4 Credits)**

An introductory class in database management systems covering both relational and non-relational databases with an emphasis on relational. Topics include database design, ER modeling, relational algebra, SQL, scripting, and embedded SQL. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). In addition, an introduction to a NoSQL database will be included.

Graduate students will read one or two relevant technical papers and write a summary report. Prerequisites: for undergraduates: COMP 1353 or COMP 2673; for graduates: COMP 3005 or COMP3006 (MS Data Science).

**COMP 3424 NoSQL Databases (4 Credits)**

In this course, students learn what NoSQL databases are, learn to identify the differences between them, and gain a fundamental understanding between SQL, relational databases, and NoSQL databases. Students further explore which type of NoSQL database is the correct one given a use-cases, examining types, methods of communicating with it, contrasts to other NoSQL databases, performance and scalability. Prerequisites: for undergraduates, COMP 2355 or COMP 2361; for graduates: COMP 3005.

**COMP 3431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

**COMP 3432 Machine Learning (4 Credits)**

This course will give an overview of machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised, unsupervised and reinforcement learning and associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, neural networks, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After taking the course, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 1353, MATH 1952, and MATH 2060.

**COMP 3433 Data Visualization (4 Credits)**

This course explores visualization techniques and theory. The course covers how to use visualization tools to effectively present data as part of quantitative statements within a publication/report and as an interactive system. Both design principles (color, layout, scale, and psychology of vision) as well as technical visualization tools/languages will be covered. Prerequisites: COMP 1353 and Python Programming.

**COMP 3441 Introduction to Probability and Statistics for Data Science & AI (4 Credits)**

The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Prerequisite: COMP 1353, MATH 1952, MATH 2060.

**COMP 3442 Advanced Probability and Statistics for Data Science (4 Credits)**

This course builds on material in Probability and Statistics 1. Students will carry out model fitting and diagnostics for multiple regression, ANOVA, ANCOVA, and generalized linear models. Dimension reductions techniques such as PCA and Lasso are introduced, as are techniques for handling dependent data. The course introduces the principles of resampling and Bayesian Analysis. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Prerequisite: COMP 3441.

**COMP 3450 Machine Learning Operations (4 Credits)**

This course introduces the engineering and deployment of machine learning systems. Students will learn essential technical and organizational skills needed to develop and deploy ML solutions, progressing from fundamental concepts through to practical implementation. Key topics include ML project lifecycle management, containerization, web application development, data management strategies, and cloud deployment. Focus will be given to the application of industry-standard tools and best practices for building production-ready machine learning systems. Prerequisites: COMP 3421 and COMP 3432.

**COMP 3455 Shell Scripting and System Tools (4 Credits)**

This course covers navigating and utilizing tools in a UNIX environment, including use of common command line utilities, Bash and Python shell scripting, source control via Git, pipes and I/O redirection, networking in Python and OS multi-processing/multi-threading. More emphasis will be placed on using these tools than on how those tools work. Students should have experience with Python prior to taking this course.

**COMP 3456 Deep Learning for Sequence Data (4 Credits)**

This course introduces modern approaches to analyzing sequential data, with a focus on deep learning methods for time series and natural language processing. Students will develop practical skills in building and implementing neural network models for sequential data analysis, while gaining a thorough understanding of the underlying concepts. Through hands-on projects and real-world applications, students will learn to process, analyze, and generate predictions from various types of sequential data. The course emphasizes practical implementation and modern deep learning frameworks, bridging the gap between traditional statistical methods and contemporary neural network approaches. Prerequisite: COMP 3432.

**COMP 3490 Understanding AI (4 Credits)**

Understanding Artificial Intelligence provides a comprehensive introduction to artificial intelligence (AI) for students of all backgrounds. This course explores the diverse approaches to AI, including rule-based systems, expert systems, knowledge representation, search algorithms, machine learning, natural language processing, robotics, and human-AI interaction. Students will gain hands-on experience with AI tools and applications while critically examining their impact on society. The course emphasizes the capabilities, limitations, and ethical considerations of AI, preparing students to engage thoughtfully with AI technologies in various fields. Prerequisites: Non-majors only, python programming is helpful but not required.

**COMP 3491 Applications of Generative AI (4 Credits)**

Applications of Generative Artificial Intelligence is a hands-on course explores the transformative power of generative artificial intelligence (AI) across various industries. Students will engage directly with generative AI tools and techniques, including text generation, image synthesis, music composition, code generation, and more. Through practical exercises, projects, and case studies, students will develop a deep understanding of how generative AI can enhance creativity, automate workflows, and drive innovation in diverse fields. This course is designed for students who have completed COMP 3490 and want to apply AI in practical, industry-relevant contexts. Prerequisite: COMP 3490 and non-majors.

**COMP 3495 AI Design Project (4 Credits)**

The Artificial Intelligence Design Project serves as the culminating experience for students who have completed COMP 3490 and COMP 3491. This course provides an opportunity for students to apply their AI knowledge and skills to a self-directed project in a domain of their choice. Over ten weeks, students will identify a problem, design an AI-driven solution, and develop a functional prototype or proof-of-concept. Emphasizing creativity, problem-solving, and ethical considerations, this capstone-style course enables students to make a tangible impact in their field. The course includes milestone check-ins, peer reviews, and a final presentation to showcase their work.

**COMP 3501 Introduction to Artificial Intelligence (4 Credits)**

Introduces a variety of Artificial Intelligence concepts and techniques, relevant to a broad range of applications. Students survey multiple techniques including search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Examines concepts of constraint programming, evolutionary computation and non-standard computation. Prerequisites: COMP 2370.

**COMP 3525 Human Centered AI - Mind Reading Machines (4 Credits)**

This course explores a key intersection of Artificial Intelligence (AI) and Human-Computer Interaction (HCI). How can AI enhance our interactions with computers by catering to our individual needs and differences? Can we teach computers to understand people's thoughts and feelings to improve overall interaction? Humans often adjust their communication when they notice the person they're talking to is frustrated—why can't computers do the same? In this interdisciplinary, research-focused course, you will read, present, and discuss seminal papers at the intersection of AI and HCI, including (but not limited to) affective computing, physiological computing, augmented cognition, and multimodal interaction. ## Learning Objectives (General Goal) Demonstrate a broad understanding of the intersections between Human-Computer Interaction and Artificial Intelligence, with an emphasis on user modeling. (LO1) Recognize how theories from fields outside of Computer Science can inform and enhance Computer Science practices. (LO2) Develop knowledge of state-of-the-art user modeling techniques, including practical applications and associated challenges. (LO3) Develop critical thinking and scientific communication skills related to current AI topics, including science writing and scientific discourse.

**COMP 3531 Deep Learning: Model Design and Application (4 Credits)**

This course addresses the foundational concepts and components of Artificial Neural Networks (ANN), highlighting their capabilities, strengths, and weaknesses as a machine learning algorithm. Students taking this course will develop ANN models from scratch in Python as a basis for understanding their design as well as the underlying mechanics and calculations that shape their behavior. Key topics such as forward-backward propagation, loss function characteristics and optimization will be considered in relation to model design and computational efficiency as well as to problems such as exploding and vanishing gradients. Training strategies (e.g., dropout, initialization, batch normalization) will further enable students to assess trade-offs in model bias & variance. Coupled with hands-on assignments, these building blocks provide the knowledge and skills required to effectively design and implement ANN models that are ethically and technically sound. As well as foreground important architectures such as Convolutional ANNs, Recurrent ANNs, LSTMs, and Transformers as well as their applicability to modern problems. Student learning and proficiency will be assessed based on a combination of quizzes, coding assignments, exams, and a culminating project. Prerequisite: COMP 3432.

**COMP 3581 Algorithms for Data Science & AI (4 Credits)**

This course introduces the design and analysis of algorithms within the context of data science and artificial intelligence. Topics include; asymptotic complexity and algorithm design techniques such as incremental, divide and conquer, dynamic programming, randomization, greedy algorithms, and advanced sorting techniques. Examples to illustrate techniques are drawn from multi-dimensional clustering (k-means and probabilistic), regression, decision trees, order statistics, data mining using apriori algorithms, and algorithms for generating combinatorial objects. Prerequisite: COMP 2370.

**COMP 3591 Computational Geometry (4 Credits)**

This class deals with the design and implementation of efficient algorithms for problems defined over geometric objects, such as points, lines, polygons, surfaces, etc. The methods and algorithms covered find applications in many areas, including computer graphics (e.g., hidden surface removal), computer-aided design and manufacturing (e.g., 3D printing), machine learning (e.g., supervised and unsupervised classification), geographic information systems (e.g. terrain visibility), robotics (e.g., motion planning), data mining (e.g., dimensionality reduction), and computer vision (3D reconstruction), to name a few. Fundamental geometric problems such as partitioning, proximity, intersection, convexity, visibility, point location, and motion planning are focused on. Efficient data structures and algorithms for their solutions and design techniques germane to the field, such as divide-and-conquer, plane sweep, randomization, duality, etc. are discussed in detail. Practical methods for the robust implementation of geometric algorithms are also covered. Prerequisites: COMP 2300 and COMP 2370.

**COMP 3621 Computer Networking (4 Credits)**

An introduction to computer networks with an emphasis on Internet protocols. Topics include: internet design, application layer protocols such as SMTP and HTTP, session layer protocols including TCP and UDP, the internet protocol (IP), link layer technology such as Ethernet, and security issues related to networking. Programming experience of client/server architectures using sockets and TCP/UDP through projects is emphasized. Prerequisites: for undergraduates: (COMP 2355 or COMP 2361) and COMP 2370; for graduates COMP 3004 and COMP 3006. Cross listed with COMP 4621.

**COMP 3681 Networking for Games (4 Credits)**

Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.

**COMP 3701 Topics in Computer Graphics (4 Credits)****COMP 3702 Topics in Database (4 Credits)****COMP 3703 Topics-Artificial Intelligence (4 Credits)****COMP 3704 Advanced Topics: Systems (4 Credits)****COMP 3705 Topics in Computer Science (1-4 Credits)****COMP 3711 Special Topics in Data Science & AI (4 Credits)**

Special Topics in Data Science & AI highlights selected methods & applications in machine learning that are not specifically addressed within the curriculum. Areas of study may include, but are not limited to, natural language processing, recommender systems, data science for social justice, machine learning operations, generative AI and more. Prerequisites: COMP 3432 and COMP 3441.

**COMP 3721 Computer Security (4 Credits)**

This course gives students an overview of computer security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisite: COMP 2362 or COMP 3361. Cross listed with COMP 4721.

**COMP 3722 Network Security (4 Credits)**

Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. Prerequisites: COMP 3721 or permission of instructor.

**COMP 3723 Ethical Hacking (4 Credits)**

Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, foot printing targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP 1203 or COMP 2673 (CS Intro sequence).

**COMP 3731 Computer Forensics (4 Credits)**

Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 3361; COMP 2355 or 2361 for undergraduates; COMP 3006 for graduates.

**COMP 3801 Introduction Computer Graphics (4 Credits)**

Fundamentals of 3D rendering including the mathematics behind coordinate systems, projections, clipping, hidden surface removal, shadows, lighting models, shading models, and mapping techniques. Significant use of 3D APIs through shader programming is covered along with the basics of 3D model representation and animations. Satisfies "Advanced Programming" requirements for graduate students. Prerequisites: COMP 2370, MATH 1952 or 1962.

**COMP 3820 Introduction to Game Programming (4 Credits)**

Learn the fundamentals of game programming by creating 2D and 3D games using a modern game engine. Topics include working with 2D/3D art assets, character controllers, physics, camera systems, 2D and 3D animation integration, lighting, audio, user interfaces, artificial intelligence, and level design. The emphasis in this course is on game programming and implementing game mechanics in fully-working games. Prerequisites: COMP 2381 and COMP 2821.

**COMP 3821 Game Programming I (4 Credits)**

A continuation of Introduction to Game Programming, this course introduces advanced topics that are essential as future game programmers. Students have the opportunity to learn game engine architecture, 2D and 3D linear algebra for graphics, sprites, 2D and 3D animations, input handling, finite state machines, particle systems, user interfaces, game audio, and artificial intelligence for games. Prerequisites: COMP 2370 and COMP 3820.

**COMP 3822 Game Programming II (4 Credits)**

In this course, students learn how to work with a 3D game engine and build 3D games. Topics include algorithms, mathematics for 3D game engines, scene management, animations, 3D shaders, particle systems, physics for games, UIs, terrain systems, and working with higher-level scripting languages on top of the low-level implementation language. Prerequisites: COMP 3821. Suggested corequisite or prerequisite: COMP 3801.

**COMP 3831 Game Prototyping (4 Credits)**

Introduces game prototyping, where game concepts are created and developed into working prototypes using student-chosen game development tools. Engages in critical awareness of game creation practices through discussions, critiques, demos, and player testing. Students have the opportunity to explore their creativity, to expand their knowledge of game design, and to build a broad portfolio of ideas and working projects that demonstrate both their design and technical skillsets. Required for Game Development majors, though all majors are welcome. Prerequisites: COMP 2821.

**COMP 3832 Game Capstone I (4 Credits)**

Students design, build, critique, and playtest their game prototypes from Game Prototyping. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students alter their game design document to add new features, making corrections to prior design issues, and focus on making the game playable and "fun." Prerequisite: COMP 3821 and COMP 3831.

**COMP 3833 Game Capstone II (4 Credits)**

Students design, build, critique and playtest their working game from Game Capstone I. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students modify their design document and implement changes in their game, create new concept art for the features, build an introduction level into their game, test the game with "Play testers", and focus on creating a game that is "fun" to play. By the end of the quarter, their game is ready for distribution on an appropriate platform. Prerequisite: COMP 3832.

**COMP 3904 Internship/Co-Op in Computing (0-10 Credits)**

Experiential learning through employment with a company to work in computer science. Students are expected to find the internship/co-op and connect their hiring manager with an advisor in the department to get approval. Requirements for approval include a job description that shows what will be accomplished throughout the quarter and a final report from the hiring manager to report on their performance so that a grade may be assigned. Prerequisites: COMP 2370 and approval of department. MS Data Science students: practical experience working under the supervision of data science employer and a data science faculty advisor. Learning outcomes will be assessed via student work such as summary reports, literature reviews, presentations, code notebooks and/or repositories. Prerequisites: permission of Data Science Faculty Director.

**COMP 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in the regular course schedule for that particular year.

**COMP 3995 Independent Research (1-10 Credits)**

## Game Studies

**GAME 2010 Foundations of Gaming (1-2 Credits)**

This course introduces students to foundational concepts in gaming from an interdisciplinary perspective. Students will explore what a game is and how games make interdisciplinary connections. Students will be invited to bring their passion, values, and lived experience to think critically through the challenges and opportunities in the rapidly-evolving field of gaming. Restricted to Gaming LLC Students.

**GAME 2011 Applications in Gaming (1-2 Credits)**

Games are as old as human culture, and their ongoing evolution makes them increasingly relevant to both human connection and the public good today. This course provides students with opportunities to explore how games connect with cultures and histories across the globe. In considering applications of gaming, students will engage with principles of ethics, inclusion, and equity in game development and gaming culture. Restricted to Gaming LLC Students. Prerequisite: Foundations of Gaming.

**GAME 2012 Future Directions in Gaming (1-2 Credits)**

This course challenges students to look to the future of gaming for the public good, addressing key questions such as: How do games intersect with large challenges and opportunities facing the world? How do we engage with the designers and players across games to advance the public good? Students will critically examine how game design and play intersect with concepts of the public good. Students will explore their agency in designing and using gaming as a strategy for public good discovery; and make connections with local industry professionals. Restricted to Gaming LLC Students. Prerequisite: Applications of Gaming.

## Critical Race and Ethnic Studies

Office: Sturm 487D, E, and F

Mail Code: 2000 East Asbury Ave, Denver, CO 80208

Phone: 303-871-3479

Email: [cahss.res@du.edu](mailto:cahss.res@du.edu)

Web Site: <http://liberalarts.du.edu/critical-race-ethnic-studies> (<http://liberalarts.du.edu/critical-race-ethnic-studies/>)

The Critical Race and Ethnic Studies (CRES) major will offer students an opportunity to engage in a curriculum that provides a critical examination of race, ethnicity, and indigeneity as categories of social, political, historical, and cultural significance, in the United States and internationally, through many disciplinary perspectives. A crucial component of this engagement will also allow students to explore how race connects with other identities, such as gender, sexuality, class, religion, national origin, ethnicity, and citizenship status. In so doing, students will not only learn to think critically across disciplines, but gain skills in critical feeling (using their emotions to know and dig more deeply) and critical imagination (being able to imagine a world that's different than the one that currently exists). These practices will provide skill sets necessary to thrive in an increasingly diverse workplace and global society.

And such an effort could not come at a more urgent time as organizations of all types grapple with their racially problematic histories, injustices against APIDA (Asian, Pacific Islander, Desi American), Black, Latinx, and Indigenous people persist at both policy and individual levels, and executive orders or other educational gag orders are effectively banning necessary conversations about these issues. The CRES major will give students a lens to understand the above-mentioned phenomena while providing them with tools so that they can ultimately chip away at these inequalities.

By embedding the guiding principles of racial justice-oriented research, activism, and philanthropy (R.A.P.), which will be engaged in the curriculum, in internships, in service learning, and through external community partnerships, CRES will also provide an avenue for students to embrace DU's vision (i.e., being a "great private university dedicated to the public good"). These experiences will set students up for various graduate programs (e.g., sociology, history, law, public policy) as well as careers in business, the government, the legal profession, social service agencies, and academia.

The minor in Critical Race Studies (CRES) provides similar benefits but only requires students to complete a subset of the elective courses available for the major.

Our core and affiliated CRES faculty members are excited to support students in this curriculum. Alongside our roles in the classroom and as academic advisors, CRES professors conduct impactful research and often invite students to be participants.

## Major

### Bachelor of Arts Major Requirements

At least 40 credits including the following:

Code	Title	Credits
<b>Required Courses</b>		
ETHN 1004	Introduction to Critical Race and Ethnic Studies	4
ETHN 2004	Quantitative Methods in Critical Race and Ethnic Studies	4
ETHN 3004	Theories of Critical Race and Ethnic Studies	4
ETHN 3804	Critical Race and Ethnic Studies Capstone	4
<b>Electives</b>		
At least 24 credits from courses with the Critical Race and Ethnic Studies attribute as follows:		
Eight of these credits must come from courses that have a Critical Race and Ethnic Studies Attribute and a cross-listing with the Arts or the Humanities.		8
Eight of these credits must come from courses that have a Critical Race and Ethnic Studies Attribute and a cross-listing with the Social Sciences.		8
Eight credits from an internship or study abroad. If internships and study abroad are not part of a student's curricular plan, students can choose any course with a Critical Race and Ethnic Studies attribute that does not duplicate their other courses for the major.		8
<b>Total Credits</b>		<b>40</b>

<sup>1</sup> Please refer to the 'Courses by Category' tab of this section of the bulletin for a listing breakdown of current courses categorized as CRES and the Arts or the Humanities and CRES and the Social Sciences. Please note: Courses from these three sections cannot double count between sections.

## Minor

### Minor in Critical Race and Ethnic Studies

Minimum of 20 credits as follows: Students will select courses from several of the disciplines participating in the minor, with required exposure to at least three different disciplines. Eight of the credits toward the minor must be 2000-level or above. Courses are listed with a Critical Race and Ethnic Studies attribute. A current list of courses is available under the Course Descriptions tab for this section of the bulletin. If desired, students can create a targeted plan of study that focuses on specific academic interests and/or a specific community/population. There is also potential for a relevant internship, service-learning course, or study abroad course to be approved toward the minor; students will need to meet with the minor program advisor to secure approval.

- Minimum of 3.75 GPA in major and 3.3 overall GPA
- Completion of Senior Capstone research paper that is suitable for submission to an academic conference or an undergraduate academic journal. The paper will be evaluated by the capstone professor.

The following course plan is a quarter-by-quarter schedule for intended majors. Because the Bachelor of Arts (p. 97) curriculum allows for tremendous flexibility, this is only intended as an example; that is to say, if specific courses or requirements are not available in a given term, students can generally complete those requirements in another term. More importantly, students should focus on exploring areas of interest, including Common Curriculum requirements and possible minors or second majors, and maintaining a course load which will allow for completion of the degree within four years. Ideally Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter. Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities, and social sciences. introduce students to University-level study of disciplines in the arts, humanities, and social sciences. Credits earned in Ways of Knowing courses may also apply to the major or minor.

The sample course plan below shows what courses a student pursuing this major might take in their first two years; beyond that, students should anticipate working closely with their major advisor to create a course of study to complete the degree. For clarity, courses for the Critical Race and Ethnic Studies major can be found under the subject code ETHN (p. 848).

<b>First Year</b>					
<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

SOCI 2820	Drugs and Society	4

\*Select sections of 2701 may also count in this section (before they receive a formal course number).

### AH 3980 Critical Race and Ethnic Studi (1-4 Credits)

#### ANTH 2004 Anthropology of Jews & Judaism (4 Credits)

This course is cross-listed with JUST 2004 and RLGS 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

#### ANTH 2200 Contemporary Issues of Native North America (4 Credits)

This class focuses on Native North America and is intended to provide an approach to understanding events and processes that have shaped and continue to influence the Indigenous Peoples of Turtle Island. This course explores contemporary issues within Native American communities in order for students to gain a better understanding of legal and social issues between the Federal government, reservations, and urban Indian populations. We will analyze issues facing contemporary Native American nations including, but not limited to Indian gaming and casinos, federal recognition and issues of sovereignty, blood quantum and biological race, religious freedom and sacred sites, mascots, repatriation of human remains and sacred artifacts, and stereotypical views of Native Americans. Additionally, we will also discuss efforts to reclaim traditions such as language, art, and land. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ANTH 3155 Native American Resistance in the Digital Age (4 Credits)**

Since Europeans first made contact with the Americas five centuries ago, depictions of indigenous peoples have largely been created by and for the colonizers. Only recently have native activists begun to take back control of their image. The course begins with the premise that indigenous peoples have been active producers of their own cultural heritage both before and after European expansion into the Americas. A postcolonial approach will be used to evaluate resistance from a historical standpoint, starting with the colonial period and into the twenty-first century. Primary attention will be placed on the late twentieth century and twenty-first century to better understand how indigenous filmmakers, curators, scientists, healers, artists, and scholars use indigenous knowledge systems to contest Western conceptions of authority. Specific topics include indigenous film and media; indigenous feminisms; the use of indigenous perspectives in natural resource management; indigenous voices in the decolonization of museums; and the role indigenous communities play in educating the public of long-lived environmental contamination of water and other natural resources. The course will be designed to explore the voice and agency of indigenous peoples in each of the aforementioned fields, and to teach the validity of indigenous perspectives. While students will be introduced to indigenous case studies from around the world, primary attention will be given to Native American tribal groups in the United States. Prerequisite: Any ANTH 1000-level course.

**ANTH 3232 Critical Latinidades: Current perspectives and debates on Latinx experience(s) in the U.S (4 Credits)**

This course will explore the history of the various Latinxs communities in the United States, as well as examine current debates on Latinidad. The materials for this class include film, podcasts, news articles, poetry, and academic readings. We will begin by examining the historical mass migration/mass displacement of peoples from various Latin American countries, and then dive into current debates about the pan-ethnic identity that is Latinidad. Among the current debates is who is included/excluded in the mainstream representations of Latinidad as well as highlighting voices that are denouncing the limitations of this concept/identity. The materials, class lectures, and discussions will help us to begin to understand the complexities of Latinidad in the U.S.

**ANTH 3640 Race and Human Evolution (4 Credits)**

Examines the history of thought about the nature and evolution of human racial differences and sexual characteristics, from the mid-19th century to the present day. Considers scientific and popular models for explaining the evolution of racial differences, male-female reproductive behavior and gender roles. These models are examined in light of comparative primate data, ethnographic data and the material record of human evolution. Prerequisite: ANTH 2010.

**ANTH 3850 We are Family: Anthropological Perspectives on Kinship and Relations (4 Credits)**

Anthropologists have long been fascinated with defining who is related to whom. In the first half of this course, we will read works by leading historical anthropologists in order to gain an understanding of the various ways kinship has been defined in anthropology and defined in a diversity of cultures. These works will help us understand various kinship systems throughout the world and explore how anthropologists have worked with the concept of relatedness. This course will then turn to contemporary issues and we will devote our time to investigating current kinship studies of relatedness and how this applies to new reproductive technologies (like surrogate mothers, IVF, etc), and adoption.

**ARAB 1350 From Iraq to Morocco: Arabic Culture and Society Through Film (4 Credits)**

This course examines cultural and societal aspects of the Middle East and North Africa and presents this vast area as a broad and diverse region with diverse history, religion, and culture. Students will learn how to approach films ethnographically by subjecting each movie to a rigorous social analysis. Among topics covered are colonialism and its lasting effects, child trafficking, religion, wars, Arab-Israeli conflict, and women in the Middle East. Screening of Arabic films with English subtitles is a central part of the course. Assigned readings are designed to provide background on the particular historical and cultural contexts in which the films are produced. The course will bring awareness and/or shatter the multiple stereotypes surrounding the Arabs; but additionally, the discussions will transcend national borders and uncover social issues that may be more severe in the Arab world, but are universal and certainly not unique to the Middle East and North Africa. The course is in English and open to all interested. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARAB 1351 Tales from the Arabian Nights: Reading across Time and Space (4 Credits)**

No doubt that through their magical transformations and marvelous plots, the stories of the Arabian Nights, also known as One Thousand and One Nights, have a great entertainment value and that the imaginary setting of the tales has fascinated and inspired many authors and artists. However, this collection of stories has also significantly contributed to how the West views the Middle East: an exotic world populated by negative images such as conniving and manipulating harem women and violent and unscrupulous Arab men. The Tales of the Arabian Nights provide a unique platform for the discussion of current issues such as orientalism, stereotyping, and gender discrimination. In this course, we will select a handful of stories to serve as a catalyst for inquiry to show how this shared narrative passed on from generation to generation, has contributed to the creation of an 'exotic' East invented by the colonial West. We will show that the Middle East, like the rest of the world, is in a state of flux and the text is not a historical account of the medieval Arab world and cannot be viewed a-historically. We will unveil all the stereotypes that have been subtly, or not so subtly, implanted in the mind of the west through an often-erroneous portrayal of the Arab world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 3813 Arts of the American West (4 Credits)**

This class covers a wide range of art objects and styles from the 17th century to the present in the West of the United States, from buffalo robe paintings and baskets to cowboy art and contemporary abstract landscapes. Particular attention is paid to the diversity of art traditions—Native American, Spanish and Mexican, European, Asian and Latin American—as they converge in this geographic space.

**CHIN 2516 Literary Chinatown: Stories of Chinese in America (4 Credits)**

As the oldest diasporic enclave of Chinese in the United States, Chinatown has been both a physical and historical site where Chinese immigrants have built a community and a continually contested symbolic space represented in Chinese American literature. Literary Chinatown explores the intersection of history, geography, and literature through the myriad ways of Chinatown stories by major authors in Chinese American literature across the period from the early 20th century until the contemporary moment. The focus lies on unraveling the intricate relationship between space, place, and identity, tracing the complexities of being Chinese in America at pivotal historical junctures that shed light on the U.S. nation-building process—its rejection, accommodation, and incorporation of Chinese lives. These literary works set the stage for examining the impact of war, imperialism, (neo)colonialism, and globalization on immigration, alongside domestic issues of race, class, gender, and ethnicity. We aim to unravel the Chinese American experience as portrayed in its literary recreations of Chinatown memory, fantasy, narrative, and myth within Chinese American literature. We also brought scholarly discourse on the intersectional and comparative approaches to the study of race, culture, politics, and place in Chinese American literature. The course will entail a class walking tour of the historical Chinatown area in Denver. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CNP 1850 Counseling Psychology: Asian American Psychology (4 Credits)**

In this course, we will examine psychological theory and research centered on Asian American individuals and the community, including the historical, sociopolitical, cultural, and interpersonal processes that shape the psychological experience. Although we will sometimes be discussing “Asian Americans” and general trends in this class, it is important to recognize that Asian Americans are not a monolithic group, but rather are many different groups and individuals with diverse historical and cultural backgrounds. We begin the course by exploring the history of Asian Americans in the US (e.g., immigration, communities), as well as the history, evolution, and methodologies of the field of Asian American Psychology. We then engage in an in-depth discussion of various prominent social stereotypes faced by Asian Americans, such as the Model Minority Myth (MMM), being seen as a perpetual foreigner, and so on. We also discuss what an Asian American identity entails, and the acculturation/enculturation process of bicultural and multicultural individuals. Later in the course, we visit topics such as gender and sexuality, mental health, relationships with other minoritized groups, and end the course with current issues (e.g., anti-Asian American racism during the COVID-19 pandemic).

**COMN 1600 Communication and Popular Culture (4 Credits)**

This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or ‘lenses’ to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

**COMN 1700 Fundamentals of Intercultural Communication (4 Credits)**

This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

**COMN 2000 Identities in Dialogue (4 Credits)**

This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others’ experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

**COMN 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today’s United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week’s speaker’s assigned readings and insights to readings and insights from previous weeks’ speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2020 On the Black Panther Party (4 Credits)**

This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2220 Race and Popular Culture (4 Credits)**

This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 3005 Diverse Family Communication (4 Credits)**

This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

**COMN 3050 Feminism and Intersectionality (4 Credits)**

This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

**COMN 3140 Advanced Intercultural Communication (4 Credits)**

This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

**ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)**

This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.

**ECON 2450 Race in the Economy (4 Credits)**

This course examines economic life through a racial lens by exploring historical and contemporary experiences such as housing, employment, and wealth. A racial perspective challenges us to see economic theory, markets, work, and policy in new ways and highlights the necessity and the challenge of confronting white supremacy within a system of capitalism. Prerequisite: ECON 1020.

**ECON 2540 Law and Economics (4 Credits)**

This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

**ENGL 2302 19th Century British Literature and the Empire (4 Credits)**

The coronavirus pandemic has intensified our focus on globalization, giving renewed urgency to matters such as human rights, racism, migration, citizenship, hospitality, and cultural difference. This course approaches these questions by looking at various reflections on globalization and "empire." While reading literary works in the nineteenth century, when the British empire extended its reach and control over literally every time zone, we also put them in dialogue with contemporary reports, databases, and fiction. We ask: How did nineteenth-century British and Anglophone authors react to issues directly relevant to and caused by imperial expansion and globalization? And how have their reflections shaped the way we think about power and inequality today? Apart from writers frequently taught in courses on British literature, we will also read British authors who are, ironically, often not classified under "British" (such as Mary Prince, an abolitionist born a slave in Bermuda, and Mary Seacole, also a woman of color, who traveled widely and served as a military nurse during the Crimean War). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2718 Latina/o Literature (4 Credits)**

This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)**

This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it's for, and its forms and aesthetics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2730 Borderlands Literature (4 Credits)**

This course introduces students to literature and stories about regions and spaces defined by borders, especially the U.S.-Mexico borderlands. The course engages with narratives that map the flows and fortifications of people and commodities, interrogate the politics of immigration, navigate the disputes over natural resources, and/or feature different contact zones or forms of encounter.

**ENGL 3826 Latinx Cultural Studies (4 Credits)**

This course introduces students to cultural texts and theories by U.S. Latinx subjects and asks students to consider various forms of cultural and critical methodologies.

**ETHN 1004 Introduction to Critical Race and Ethnic Studies (4 Credits)**

Critically examines the concept of race, ethnicity, and indigeneity as categories of social, political, historical, and cultural significance, in the United States and internationally, followed by an investigation of colorblindness, diversity ideology, and modern manifestations of racial inequality. Race and ethnicity are examined as they intersect with gender, sexuality, social class, indigeneity, and immigration status. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ETHN 2004 Quantitative Methods in Critical Race and Ethnic Studies (4 Credits)**

Students will be introduced to concepts and methodologies for research and writing in Critical Race and Ethnic Studies (CRES). Building on what students learned in the Introduction to Critical Race and Ethnic Studies, this course aims to expose students to the various quantitative ways that knowledge about CRES is formed. Students will practice quantitative techniques using SPSS and empirical writing about race, ethnicity, and inequality. Prerequisite: ETHN 1004.

**ETHN 2102 1492: Indigeneity, Settler Colonialism, Race (1-2 Credits)**

The year 1492 inaugurated a profoundly destructive phase in the history of humanity, but more so for the Indigenous peoples of this hemisphere as Christopher Columbus arrived at the shores of the "New World." Within a couple of centuries after his arrival, thriving Indigenous civilizations found themselves in dire straits, if not completely laid to waste, causing untold suffering to the original inhabitants of this continent. The waves of European settlers who followed Columbus not only forcefully settled Indigenous lands by dispossessing Native peoples, but enforced a series of spiritual, cultural, social, political, and economic changes that had devastating effects on Indigenous lifeways. Yet, Indigeneity continues to not only thrive but challenges the ongoing disruption caused by settler-colonial occupation of lands and lives. This course, which is the first of a three-part sequence, takes Indigeneity and its repression by settler-colonialism as a foundational structure that inaugurated other projects of global consequence, including (anti)Black slavery and European colonization of the "Old World." While Indigeneity is an international concept, our focus in this class will be on New World Indigeneity, especially North America. We will approach settler colonialism not as a thing of the past but as an ongoing incursion into the lives of Indigenous people, who continue to challenge it in new and innovative ways.

**ETHN 2104 Drumming Across the Americas (4 Credits)**

This course looks at rhythm as a fundamental organizing principle for Black music, dance, and life in the Americas. We will focus on multiple percussion-and-dance traditions from North America, South America, and the Caribbean as a window onto the people, cultures, and histories of the African diaspora. We will be especially attuned to the intersection and divergence of practices across present day national boundaries, due to political shifts and alternative cultural geographies forged through ongoing circulation of people and culture throughout the hemisphere. We will also explore trans-temporal rhythmic connections between practices originating in various eras. Overall, we will consider thematic links across genres, including issues of identity (race, gender, sexuality, ability, class), technology, freedom seeking, and spirituality. We will learn by doing, with music and dance practice at the center of our meetings. We will begin our study with the Gullah-Geechee ring shout, next engage in comparative work with Afro-Puerto Rican bomba, and finally apply the rhythmic lessons learned to the contemporary electronic practices of hip hop, reggaeton, and dance hall. Guest artists will visit some of our sessions to provide additional insight and guidance in these forms. Our practice will be supported by reading, listening/viewing, and discussion about our core styles as well as others, providing a critical framework for our creation. We will also attend several performances in order to see how these practices function in a live setting. No prior experience is necessary, only a willingness to jump in!

**ETHN 2174 Music of the Civil Rights Era (4 Credits)**

The decades of the mid-20th century were an explosion of political unrest, social change, and cultural innovation. While the world was rocked by numerous anti-colonial struggles, disenfranchised populations in the U.S. forged their own battles in what is commonly referred to as the Civil Rights Era. In this course, we engage music as a way to understand this history – both as a record and agent of change. We explore a variety of music and other art from this period, including genres related to the African American freedom movement, multiracial folk revival, and Asian American, Chicano, and Women's movements. In what ways did social movements employ culture as a political tool? What do we mean by the word "political"? How can music express politics, with or without words? How might music provide an alternative record of history? In order to address these questions and more, we will engage readings on music, politics, history, and identity. We will also view, listen to, and perform the traditions we study. Ultimately, while the tale of the Civil Rights Era is often told as separate, compartmentalized struggles based around identity, our investigations will reveal the intense interracial and intercultural political solidarities and creative dialogues that took place.

**ETHN 2202 1619: Slavery and Its Afterlives (1-2 Credits)**

The year 1619 marked the arrival of the first slave ship on the shores of what would come to be known as the United States of America. In August of that year, an English ship reached Point Comfort on the Virginia Peninsula where 20 Black people were sold for food and other essentials. This event inaugurated what would soon become a foundational institution of the New World—anti-Black chattel slavery—which undergirded all aspects of life in the U.S. Even though slavery had existed in many forms and in many places across the globe, what the U.S. model of slavery succeeded in doing was linking slavery with Blackness. This made slavery an inescapable part of Blackness, ensuring that whoever was born Black was also born into slavery. The celebrated theorist Toni Morrison has called slavery "America's original sin." Although slavery was formally abolished through the Emancipation Proclamation issued on Jan 1, 1863, it has continued to structure contemporary Black life, which the theorist Saidiya Hartman has termed the "aftermaths of slavery." In other words, for critical Black theorists such as Hartman, slavery never ended but transformed into other structures that continue to render Black lives disposable. This class embraces Hartman's understanding of slavery as an institution that has survived in (c)overt forms, as critical to understanding contemporary issues faced by Black people.

**ETHN 2224 Race, Crime, and Documentaries (4 Credits)**

Students in this course will view, interrogate, and write about full-length urban crime documentaries through the lenses of critical theories of race and ethnicity and criminological scholarship on the media's distortion of crime reporting. A significant portion of class time will be spent investigating how crime documentaries frame urban racial minority communities that host the highest rates of violent crime and how race plays a role in what the larger society is taught about urban crime through the documentary genre. This focus has a goal of stimulating a more critical consumption of popular media.

**ETHN 2302 1848: Settler Colonialism to Settler Imperialism (1-2 Credits)**

Description: 1848 marked the signing of the Treaty of Guadalupe-Hidalgo between the U.S. and Mexico. Apart from ending the U.S.-Mexico war, the treaty forced Mexico to cede about half of its territory, including present-day states of Texas as well as California, Nevada, Utah, New Mexico, parts of Colorado, and many other states. This makes it one of the largest land grabs in human history. More importantly, this treaty facilitated the westward expansion of settlers, leading to new forms of racial antagonisms while escalating existing ones. This class approaches this moment as also marking the emergence of the U.S. as an imperialist superpower on the world stage as its war making, which was hitherto focused exclusively on Indigenous groups, would now be expanded to new terrains and increasingly outside the New World. We will also pay attention to how colonial expropriation and racialization of Indigenous and Black people would provide the grammar that the U.S. would use as it encountered racial others both within its newly established but unstable borders as well as across the world. In sum, this class will explore different antagonisms that comprise the "cacophony of empire" (Byrd, 2011) and how racialized groups have fought back as well as remained complicit in reinscribing the supremacy of the U.S.

**ETHN 2701 Topics in Critical Race & Ethnic Studies (1-4 Credits)****ETHN 3004 Theories of Critical Race and Ethnic Studies (4 Credits)**

Students will be introduced to concepts and theories for research and writing in Critical Race and Ethnic Studies (CRES). Building on what students learned in the Introduction to Critical Race and Ethnic Studies, this course aims to expose students to the key writings that formed the Critical Race Theory (CRT) movement, CRT's interdisciplinary uses, the modern American controversies surrounding it, and introduce other critical theories of race and ethnicity. Prerequisite: ETHN 1004.

**ETHN 3035 Whitewalling: Racial Politics of the Art World (4 Credits)**

Aruna D'Souza defines whitewalling as "a neologism that expands in many directions: the literal site of contention, i.e., the white walls of the gallery; the idea of 'blackballing' or excluding someone; the notion of 'whitewashing,' or covering over that which we prefer to ignore or suppress; the idea of putting a wall around whiteness, of fencing it off, of defending it against incursions." By examining the state of the art world through the lens of critical race and ethnic studies, this course will investigate a series of case studies that highlights these many manifestations of whitewalling in modern and contemporary art. Through lectures, readings, discussions, and written assignments, the course aims to explore the following questions: How does race intersect with art and art history? How do the shifting racial politics of the art world map histories of racial construction, systemic oppression, and subversive resistance? Should artistic freedom be prioritized, limited, or censored when an artwork includes harmful racial representations or ideologies? How can art institutions be critiqued as sites of contention? And perhaps most importantly, how can art scholars, workers, and creators collectively move towards a politics of racial justice? In this course, students will not only engage in art historical debates that address the critical role that art has played in shaping perceptions of race and racism, but students will also consider how the art world can provide platforms for anti-racist solidarity and protest.

**ETHN 3204 Afrofuturism in Music (4 Credits)**

Numerous Black artists have used images of space travel, extraterrestrials, mysticism, the future, science fiction, and technology in their creations. This course will examine the recurrence of these elements in African diasporic music, focusing on genres including jazz, funk, hip hop, and experimental music. How have artists' racialized views of the future served to critique their contemporary worlds and pose radical visions of the future? In what ways has Black music shaped and been shaped by recording and other technologies? What are "technology" and "Blackness," and how can one help us to understand the other? To answer these questions, we will engage a variety of readings on music, race, gender, sexuality, sound technology, and cyber-theory and view/listen to key Afrofuturist performances. We will also engage in our own music making (no experience required). In all, we will come to better understand the long encounter between people of the African diaspora and the so-called modern world.

**ETHN 3804 Critical Race and Ethnic Studies Capstone (4 Credits)**

Students will learn how to conduct in-depth qualitative analyses for research and writing in Critical Race and Ethnic Studies (CRES). Building on what students learned in the Introduction to Critical Race and Ethnic Studies, Research Methods, and Theory, this course aims to enable students to produce their own empirical research. Various qualitative data analysis and research paper writing lessons will be covered throughout the quarter, and it is expected that students will produce a theoretically informed empirical paper centering on CRES topics. Prerequisites: ETHN 1004, ETHN 2004, and ETHN 3004.

**ETHN 3991 Independent Study (1-10 Credits)****HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)**

The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography's 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1570 Pioneering in Colorado: Land, Bodies, & Violences in the Sand Creek Massacre (4 Credits)**

This course uses critical analysis of primary sources to understand Sand Creek as a crucial site necessary to understand the history of Colorado and Denver University. Students will critically read and analyze primary source documents including newspaper articles, testimonies from massacre participants and survivors, artwork, material culture, letters, oral history, music, and proclamations to understand Sand Creek as a place and a history related to the creation of Colorado and Denver University. Additionally, the class will visit specific sites associated with Sand Creek to understand place-making and memorialization as a function of historical meaning-making and analysis. These sites include the Sand Creek Massacre site, History Colorado, the Silas Soule memorial plaque, and Riverside Cemetery (where Silas Soule and Joseph Cramer are buried). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1725 African American History to the Civil War Era (4 Credits)**

History 1725, African American History to the Civil War Era, is designed to introduce students to the trends, events, issues, and people that shaped African American history from Colonial America through the Civil War. In particular, this course will focus on presenting Black people as active agents in the American historical narrative that significantly shaped their lives even within the context of slavery. To this end, this course sets out to discredit American myths about people of African descent, examine critical elements of black slavery and freedom in the United States, analyze the slave experience with particular emphasis on black resistance and resiliency, and identify the economic, political, and social factors that shaped and were shaped by African slaves, their descendants, black communities and institutions, and plantation society. If we want to understand the US (and not only the South), but we also need to know something about how human commerce and those that became commodities profoundly shaped the nation. By examining first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians, we trace the origins and narratives of Africans in America and their descendants. We seek to answer, among others, the following questions: Why were Africans enslaved? What did Africans and their descendants experience in slavery in the Americas? What did free and freed African Americans experience in the Civil War era? What influence did African Americans have on the North and South conflict and its resolution? In addition to treating the above questions, I intend to return often to two major content themes. First, this class is concerned with tracing the historical contours of the African American experience in America, noting the similarities in experiences of different gender, age, and (dis)ability categories and yet important variations over time and place. Understanding this experience is crucial for a comprehensive understanding of American history. Second, we explore the changing influences of labor and capitalism and how they shape people, places and institutions. We note in this course that African Americans fundamentally affected the social and economic lives and futures of the world, underscoring the global relevance of this history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1850 20th Century LGBTQ History in the United States (4 Credits)**

This course uses a cultural history approach to explore the experiences of lesbian, gay, bisexual, transgender, and queer peoples in the "long twentieth century" (1880s-2010s) United States. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2075 Nazi Art Looting (4 Credits)**

This course examines the history and legacy of Nazi art looting, which continues to impact museums and the art world today. We begin with an overview of plundering mechanisms used by the Nazis and their collaborators, and discuss restitution efforts since the end of the Second World War. Students carry out a research project focusing on a case study, working in small groups with other students. The work is interdisciplinary and experiential, with direct relevance to ongoing restitution cases.

**HIST 2260 Jewish Food: From the Bible to Bagels (4 Credits)**

"We are what we eat," the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion, consumption, and identity. The study of Jewish food practices is a study of dualities: kosher and trayf (non-kosher), meat and milk, modernity and tradition, insiders and outsiders, men and women, authentic and artificial, ethical and unethical, and more. Beginning with biblical laws about permitted and forbidden foods and ending with a study of the emergence of the modern kosher food industry in the United States, our course will examine how Jewish food and foodways have evolved over thousands of years in response to social, political, cultural, and economic change. We will explore the links between Jewish food practices and local cultures in order to understand how each one shapes the other, and to become familiar with the diversity of Jewish foodways across the Diaspora and within Israel and the Middle East. We will also explore the politics of authority and authenticity with regards to Jewish food — what makes a food "Jewish" or kosher, and who decides? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2300 The Arab-Israeli Conflict, 1881-2001 (4 Credits)**

This course introduces students to the Arab-Israeli and Israeli-Palestinian conflicts from the initial Jewish migrations to Palestine starting in the 1880s through the failed Oslo Accords. Key themes that will be covered include the origins and development of Zionism and Palestinian nationalism, the impact of Ottoman and British rule in Palestine on Jews and Palestinians, differing narratives about the origins and development of the conflict, and the impact of U.S. and Soviet involvement in the Middle East on Israelis, Palestinians, and Arabs. In addition students will be exposed to historiographical debates surrounding various aspects of the conflict, notably the 1948 War. Cross listed with JUST 2300.

**HIST 2531 Twentieth Century Native American History (4 Credits)**

This class reviews Native history from the late 19th century to the present, focusing on the interplay between large institutions and structures — such as federal and state governments, or the US legal system — and the lived, local experience of tribal communities. The major themes followed throughout the course of the semester include: place, space, and indigeneity (indigenous identity).

**HIST 2570 Civil War & Reconstruction (4 Credits)**

This course covers the causes and consequences of the most important conflict in American history. We will investigate the problem of slavery, the question of states' rights, the sectional crisis, the experience of war, the role of Lincoln, the struggle over reconstruction, and the meaning and memory of the war in American life.

**HIST 2640 Race and Ethnicity in Twentieth Century America (4 Credits)**

This course will examine America through its cultural and racial diversity, comparing and contrasting the historical experiences of African Americans, Latina/os, European Americans, and Asian Americans over the "long" twentieth century. Together we will investigate the ways in which major events and episodes in the century affected a variety of racialized populations, and how these groups responded to their social and political environment. Attention will also be paid to changes in "American" national identity and citizenship over time, helping students think about such questions as: who is an "American"? And how did that definition change over time? How did debates over citizenship reflect Americans' ideas of race, class, ethnicity, and gender? How were racial and ethnic minorities, women, and immigrants defined at various times in opposition to Americanness?

**HIST 2645 Immigration in Twentieth Century America (4 Credits)**

Immigration holds a peculiar place in our national narrative. At the same time that the United States celebrates its identity as a self-proclaimed "nation of immigrants," immigration policy and the presence of diverse peoples from around the world have historically generated intense battles over identity, national security, and civic belonging. This service-learning history course examines major topics in 20th century U.S. immigration history. Utilizing a thematic and comparative approach, we will explore how immigration and immigrants have shaped the social, political, and economic contours of American life, and how discourses of race, gender, sex and class have determined how Americans conceive of immigrants and of the nation. As part of their service-learning curriculum, students will examine salient issues in political discourse today—including xenophobia, detention and deportation policy, border policing, and the human side of the immigration debate—by volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

**HIST 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit each of these locations, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

**HIST 2940 Sports and Empire (4 Credits)**

This course will look at the history of sports and colonialism over the past two centuries, considering the ways in which imperialism led to the dissemination of Western sporting traditions and culture to the global south, focusing in particular on British and French colonies in Africa and Asia (although we also take a few trips to the Caribbean, too). Each week, we will look at the history of a different sport, including cricket, tennis, soccer, golf, rugby, and hockey, and explore the intersection of race, class, and gender in how these sports were played and transformed in the imperial world. We will consider the ways in which sport was used not only as an element of the racialized "civilizing" mission of imperial ventures, but also how sport was coopted by indigenous populations to resist colonial structures of segregation and oppression. This class will ask us to reconsider the intersections and divergences in the way sports are both played and viewed by national sporting teams, local leagues and schools, and transmitted to audiences through live viewing, television, radio, and other forms of media. We will also look at the representations of sports and colonialism through films, fiction, and television shows. Finally, we will analyze the postcolonial legacies of colonial sporting cultures after decolonization, looking at the ways in which countries in the global south have taken over transnational leagues and institutions to make what were once colonial and European-dominated sporting cultures their own.

**HIST 2945 Slavery and Samba: Race and Ethnicity in the Making of Modern Brazil (4 Credits)**

This is a survey history course focused on how race and ethnic relations helped shape the historical formation of the Brazilian society. The course offers students an opportunity to study the historical evolution of Brazil, from the colonial period to the present day, as a way to understand how the historical exclusionary economic, political, and social structures of the country were shaped by racial elements, as well as how traditionally excluded groups have historically coped with and reacted to this reality.

**HIST 3275 The Past and Afterlives of Apartheid (4 Credits)**

In 1948, after a close election, a government founded on the platform of apartheid, or a radical form of racial segregation, came into power in South Africa. Apartheid as a system remained in place until 1994. This seminar delves into the roots and trajectory of apartheid, and considers its effects on the lives of South Africans. As a 3000-level topics course, the readings for this course will be interdisciplinary, but will be founded in historical methodology and process, while also considering representations of apartheid and the history of South Africa through mediums such as literature, film, music, and sports. While the origins and institutions of apartheid will be studied, as well as the history of South African nationalist and resistance movements, one of the goals of this course will be to look at the lives of ordinary South Africans, and how they resisted the apartheid state in more quotidian ways. This course will also focus on the moment of 1994 and the legacy of apartheid in South Africa's postcolonial future, one in which the ideal of a rainbow nation was disrupted by the persistence of structural inequality and the memories of violence brought up by the Truth and Reconciliation Commission. We will also explore the comparative literature between apartheid South Africa and Jim Crow in the United States, considering the transnational implications of institutions of white supremacy and the legacy of British colonialism and white nationalism across the globe, as well as the fight against apartheid led by the independent nations of the global south in the United Nations.

**HIST 3375 Empire: Revolt and Repression (4 Credits)**

This seminar examines imperialism through case studies of European powers' repression of anti-colonial revolts. We study, for example, the case of Algeria, which gained independence from France in 1962 after a brutal war of independence. We discuss the establishment and nature of the empire in the mid-nineteenth century, the moderate decolonization movement beginning in the early twentieth century, and the radical revolt of the 1950s that prompted the French to use torture in counter-terrorism operations. This case study also is relevant to post-9/11 U.S. foreign policy, when the George W. Bush administration was widely condemned for its use of "enhanced interrogation techniques" at Guantanamo Bay and other detention sites. Facing criticism from around the world, Secretary of Defense Donald Rumsfeld studied the history of French operations in Algeria and the French response to allegations of human rights abuses. In light of this recent history, we examine the lessons that the history of French Algeria teaches us about war, terrorism and counter-terrorism in our own times.

**HIST 3400 Revolts and Revolutions in the Afro-Atlantic World (4 Credits)**

This course uses the examples of major and general slave revolts and acts of resistance which include the Haitian (1791-1804) Revolution as material that students can use to practice the skills of professional historians. We will study the basic concepts and methods of Afro-Atlantic history, with a focus on free, freed, and enslaved people acting during the Age of Revolutions. We will examine the slave revolts in Jamaica (1673, 1690, and 1745 and 1759) Stono (1739), New York (1712), Haitian Revolution (1791-1804), New Orleans (1811), Barbados (1816), and Southampton, (1831) through an Afro-Atlantic perspective, exploring the relevant scholarship and critically analyzing primary sources. In the process, we will consider the following questions: What makes an event "Afro-Atlantic"? What is the Atlantic scope? Why do historians think of the Age of Revolutions as a discrete, unique historical period? How common were slave revolts? What were the local and international dimensions of these political events? In addition to treating the above questions, I intend to return often to two major content themes: The significance of historical contours of the slave revolt and resistance, noting its similarities and yet important variations over time and place. Second, we explore the changing influences of resistance to oppression, power and slavery and how they shape people, places and institutions. We note in this course that revolutions fundamentally affected the social and economic lives and futures of the world and can be expansively defined.

**HIST 3650 Native Crude: Indigenous Oil Politics and Activism (4 Credits)**

The extraction and development of oil resources is one of the central issues driving U.S. geopolitical policy in the late 20th and early 21st centuries. As the U.S. government engages in covert and overt overseas incursions in order to secure oil supply, we have also reevaluated our domestic supply priorities. Both these dynamics— as well as the work by multinational oil companies to continually explore and develop/exploit new oil resources— have led to fraught negotiations between states, multinational corporations, and indigenous populations across the globe. This course explores the history of such past and present negotiations using books, articles, and documentary films.

**INTS 2235 Gender and International Relations (4 Credits)**

How does gender shape international relations (IR)? How do ideas about masculinity and femininity affect war and peace? The global economy? Migration? Foreign policy? What do feminist perspectives contribute to the study of IR? These questions have relevance for the academic study of IR as well as the lived experiences of people around the world. Answering them requires attending to the ways in which gender and aspects of sexuality are constructed through social and political relations, and the hierarchies of power they reflect and maintain. Overall, this course encourages students to grapple with the issue of if and how gender matters in international relations. We will begin by introducing the concepts and theories necessary to investigate, research, analyze, and understand the gendered nature of international relations. Next, we will use this knowledge to compare gendered and feminist perspectives on IR to mainstream IR and explore why they have not been fully integrated. Then we will engage in gendered analyses of a variety of topics in IR, focusing especially on security and the economy. We will finish by carrying out research on a topic of our choosing, using the lenses and tools we have developed. In the end, students should consider whether this sort of perspective provides a more nuanced and holistic way of understanding IR.

**ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)**

This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)**

This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world. Prerequisites: JAPN 1001.

**JUST 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that “Jews earn like Episcopalians, and vote like Puerto Ricans.” This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group’s significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with RLGS 2012.

**MFJS 2220 Popular Music and Social Justice (4 Credits)**

What makes popular music a powerful medium for us to “fight the power” and motivate social change, and what hinders it from achieving its full potential? This course examines a range of 20th and 21st century popular music (blues, folk, rock, hip-hop, musicals, etc.) to better understand the complex relationships between music and social (in)justices. Sitting at the intersection of critical media studies, critical race & ethnic studies, popular music studies, and project-based learning, this course examines an array of 20th and 21st century popular music (blues, folk, rock, hip-hop, pop, indie, etc.) to understand the complex relationships between music and social (in)justices.

**MFJS 3202 Horror Films (4 Credits)**

Horror films serve as tales of morality and, as such, their themes tend to fluctuate in accordance with cultural zeitgeists. They offer commentary on socio-cultural-political aspects, and they also have an ongoing market. Since they are inexpensive to make but have the potential to bring in profit, horror films are popular among producers. Due to their construction of fear aspect, they tend to create a lot of intrigue and dedicated fan bases. From their production to their ideological messaging to their reception, horror films offer spaces rich for cultural understanding and critical dialogue. In fact, it is these aspects that make horror films a wonderful jumping off point for discussion—students tend to love them and they are usually very accessible. With this in mind, this course will use the platform of horror films to discuss cultural differences, including anxieties and fears, the impact of globalization on horror films, the implication of franchises on horror cinema, and the representation of intersecting identity markers (both on and off-screen). Prerequisite: MFJS 2000.

**MFJS 3207 Justice Equity Diversity and Inclusion in Health Communication (4 Credits)**

The course will begin with an overview of Health Communication in the United States and the ways in which health and illness are defined through communication, including media. We will discuss existing health disparities and social determinants of health as we examine health communication in multicultural settings in the U.S. We will further examine multicultural audiences and perspectives about health and illness, including diverse meaning systems and their influences on health attitudes and behaviors. Students will learn about cross-cultural conceptions of health and disease and how those conceptions are represented in communication about health and illness. As students learn about what it means to develop culturally grounded health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems are promoting patient-centered health care that takes intersectionality and identity into consideration.

**MFJS 3214 Representational Issues in U.S. Film (4 Credits)**

This course explores the varying ways that race and ethnicity, gender, sexual orientation, gender identity, socioeconomic status, physical and mental (dis)ability, and age are represented in and by film—both historically and culturally. In addition to class discussions regarding mainstream and independent film production, students will employ close readings of filmic texts to better understand how off-screen factors greatly impact what is seen onscreen. This course will encourage students to think critically about the filmic images that they are consuming on a regular basis, as means to interrogate what is at stake when it comes to representational issues such as dominant ideologies, visual style, and assigned character roles. Finally, students will engage the texts critically as a way to understand how these onscreen identities impact the way that individuals treat others but also how they are treated themselves. Prerequisite: MFJS 2000.

**MFJS 3242 Reel Women (4 Credits)**

Reel Women explores films from the U.S., England, Senegal, India, Canada, Colombia, and Saudi Arabia that are made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women’s daily lives across the world.

**MFJS 3655 JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling (4 Credits)**

This course focuses on multiperspectival approaches to journalism and media, with an emphasis on representations and news coverage related to gender, race/ethnicity, class, (dis)ability, religious, and national identities. The class explores journalistic writing as a creative process and craft that emphasizes social justice. Prerequisite: MFJS 2140: Storytelling & Reporting or MFJS 3410: Strategied Messaging. Cross-listed with MFJS 4655.

**MFJS 4242 Reel Women (4 Credits)**

Reel Women explores films from the U.S., England, Senegal, India, Canada, Colombia, and Saudi Arabia that are made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives across the world.

**MUAC 1024 Black Sacred Music: A Survey (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

**MUAC 1025 Hip-Hop and Rap Music (4 Credits)**

From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Autotune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music's relation with gender, race, identity, and politics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2251.

**MUAC 2260 Music, Race, and Ethnicity in Latin America (4 Credits)**

In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as *mestizaje*, *creolization*, and "blackness" will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 3503 Black Music and Abolition (4 Credits)**

From spirituals to jazz to funk to hip hop, music created by or associated with Black people has long been intertwined with notions of freedom. This seminar explores the ways in which Black music has been a site for working out the possibilities and pitfalls of liberation. In particular, we will trace the histories of U.S. abolition movements (against slavery, police, and prisons) and ongoing musical and non-musical efforts to eradicate oppressive institutions. Examining a variety of sonic practices—from the colonial period to today—we will ask: In what ways has sound been used to contest, dismantle, or reinforce systems of oppression? How might Black musical history provide a window onto present calls to defund police departments, pay reparations, build new systems for community care, and ensure that Black lives matter? How might music offer a unique method, approach, or context for abolitionist conversations? We will explore these questions through scholarly and popular readings, media examples, discussion, written reflections, and creative exercises. Finally, we will examine our own identities, scholarship, and creative work to explore our relationship to Black music and social justice, interrogating how we might or might not engage in contemporary abolitionist dialogues.

**PHIL 2004 Philosophy of Race (4 Credits)**

This course is a systematic study of the scientific, metaphysical, ethical, and political issues surrounding the notion of race. We undertake a critical study of the following questions: Is race a scientifically legitimate concept, or is it a social construct? Is race a legitimate census category? How should questions of race be decided, and by whom? Why do we think of humans in terms of race—for evolutionary or psychological reasons? Religious reasons? What is racism? Why is racism morally wrong? What do psychological studies show about our racist tendencies? Does affirmative action provide a morally acceptable way of achieving racial justice? What race is a mixed race person? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PLSC 2235 Politicized "Ethnicity": Cross-Disciplinary Approaches to the Study of Identity Politics (4 Credits)**

What are racial and ethnic identities? Are they more likely to influence political outcomes than other types of identity (e.g., gender, profession, class), and if so, why? This course introduces competing concepts of ethnic identity and connects them to the historical construction of race and national identities. By studying these issues in cases outside of the United States, you will gain unique comparative perspective about the idiosyncrasies of U.S. politics and history. Course materials include readings, podcasts, videos and documentary footage from political science, sociology, legal studies, and other disciplines. Why take this course? Gaining insight into the construction of ethnic, racial, and national identities will help you better understand yourself, your relationships, political campaigns, activist tactics, and episodes of political violence, among other things. The course satisfies the departmental sub-field requirement for majors in comparative/international politics. Recommended before taking this course: one introductory level course in political science.

**PLSC 2360 Settler Colonialism and Indigenous Resistance in Three Continents (4 Credits)**

This course explores historical and contemporary aspects of racialized power structures as they have specifically impacted indigenous peoples in Australia, the United States, and Latin America. How did the dynamics of imperialism, capitalism, liberal state-building, and racist (and racist) ideology combine to devastate indigenous communities around the world? How did distinct perspectives on time, space, property, and community allow colonizing populations to conquer native populations even while advocating the most egalitarian political structures ever attempted? Satisfies department distribution requirement in comparative/international politics. Sophomore standing required.

**PLSC 2450 Latina/x/o/e Politics in the United States (4 Credits)**

This class will examine the political trajectory of the Hispanic/Latina/e/x/o/@ population in the U.S. political system. This course serves as an intensive introduction to the scholarship on Latino Politics. The first half of the class will cover different Latin American national origin groups separately. The readings on national origin groups will examine and analyze political outcomes such as political behavior and preferences. The second half of the course will focus on policy outcomes, political behavior, and recent elections as they pertain to Latinos in the United States.

**PLSC 2530 Race & Ethnicity in US Politics (4 Credits)**

This course addresses the issues of race and ethnicity in American politics through two lenses: the crafting and implementation of domestic policies (such as welfare, education, and the criminal justice system) and the framing of political decisions. After an introduction to historical, sociological, and psychological approaches to the study of race and ethnicity, we apply these approaches to studies of American public policy. The course then transitions, examining the explicit and implicit racialization of political decisions. Throughout the course, students consider the role of institutional design, policy development, representation, and racial attitudes among the general public in shaping the American political environment.

**PLSC 2850 Politics of Criminal Justice in the US (4 Credits)**

Problems and reforms in American criminal justice system; causes and extent of crime, excessive use of force by police, systemic racism, bail reform, probation and parole; prisons and police/community relations. Prerequisite: sophomore standing.

**PSYC 2620 Psychology of Diversity (4 Credits)**

This course provides a deep investigation into issues of diversity from a psychological perspective, including how we can understand both the value of and the threats to diversity in regards to gender, race, age, weight, and more. Prerequisite: PSYC 1001.

**PSYC 3350 Cultural Psychology (4 Credits)**

This seminar examines how people's sociocultural context shapes their thoughts, feelings, and behaviors. To approach this question, we read and discuss classic as well as recent theoretical and empirical articles from the field of cultural psychology. Topics include defining culture; dimensions of cultural variation; culture-biology interactions; methodological considerations; cultural influences on cognition, emotion, the self, moral judgment, and health; cultural neuroscience; cultural approaches to race and ethnicity; and mechanisms of cultural influence. Throughout, this course emphasizes sociocultural diversity in psychological processes. Students are encouraged to develop empirically tractable ways of asking and answering questions relating to cultural psychology and to apply concepts of cultural psychology to their own research. Prerequisite: PSYC 2740 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**RLGS 2004 Anthropology of Jews & Judaism (4 Credits)**

This course is cross-listed with ANTH 2004 and JUST 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of the study of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

**RLGS 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that "Jews earn like Episcopalians, and vote like Puerto Ricans." This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with JUST 2012.

**RLGS 2025 Race, Social Justice, and Religion in the US Public Square (4 Credits)**

The US public square is a fundamental aspect of civic engagement and identity construction. This course uses the lenses of race and social justice to explore how religious expression impacts the cultural, social, political, and personal narratives/discourses that comprise the modern public square. We will consider public spaces in the context of anti-Asian and anti-Black racism as well as Islamophobia and the intersectional privileges and prejudices these communities negotiate. Issues such as immigration, borders, racialization, entrenched beliefs and traditions dovetailing with structural racism in the American context will be discussed each through video modules from the Interfaith Youth Core along with supplemental readings. By centering the lived practices and discourses through which access and agency is forged within public spaces (material and virtual), I want students to learn how they are both participants in and makers of these spaces. This course asks students to interrogate the ways in which their personal identities intersectionally determine how public spaces are constructed, which public spaces we enter, and how we participate in those spaces. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2026 Race: Black, Jew, Other (4 Credits)**

In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with JUST-2026 and PHIL-2026.

**RLGS 2108 Islam in the United States (4 Credits)**

A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with “American” accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2110 Buddhism in the U.S.A. (4 Credits)**

Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the “two-way traffic” between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2111 Islam and United States Politics (4 Credits)**

This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans’ relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2116 American Mythology (4 Credits)**

Myths convey social and moral values. Myths, moreover, serve as conceptual models for society and furnish “symbolic articulation of the social patterns” of a given society. In this class, students will establish clear connections between social order and the myths that sustain it, against the view that myths are merely imaginary, misguided perceptions of reality with little social value. In this course, you will need to ask yourself, “How do each of these myths translate into social behavior? In other words, how have these myths been acted out historically and how are they “performed” today? The United States of America has always had a strong, mythic sense of identity, mission, and destiny. It is worthwhile to reflect for a semester on how the “idea of America” has taken shape and is continuing to evolve and diversify. Robert Bellah introduced the influential concept of an American “civil religion”—a secular myth of America. In addition, we must understand that America is the result of contact between at least three different groups of people: Native Americans, Europeans, and Africans. The functional equivalents of creed, scripture, prophets and religious mission are seen in the Declaration of Independence, the Founding Fathers and Manifest Destiny. Concepts of freedom, the pursuit of life, liberty, and happiness, democracy, and the right to bear arms flow from these myths. Beyond the notion of a master myth of America, we will discover that there are other myths of America that are themselves proper objects of study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2119 Caste, Race and Colonialism (4 Credits)**

This course explores intersections of social, political, and personal structures that shape the various identities we hold. We have chosen three categories: caste, race, and colonialism, to showcase how identities emerge as unique intersectional sites of contestation and negotiation between individual difference, historical context for how to understand that difference, and the ways social/political structures valorize difference. To foreground lived experience in the construction of identity, our course will draw on a number of resources including: blogs, opinion pieces, podcasts, peer-reviewed articles, selections from books, documentaries and film, and social media both within and outside the US. The goal of this course is to encourage students to consider how “identity” and “privilege” are contingent terms that operate on multiple levels (e.g. personal, social, and political) and help uncover the networks of vulnerability, power, and access/accessibility that inform identity. Furthermore, we invite students to engage with these terms through practical assessments (e.g. producing a podcast) in order for them to “see” how they both produce and are “produced” by the various public squares in which they participate. Students will deconstruct the categories of caste, race, and colonialism in the context of socio-political and cultural structures (e.g. religion, gender identity, ability, political beliefs, etc.) We ask students to consider the following questions: In what ways, do these categories shape our personal and public identities? How do these categories work within contemporary public and private spaces? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2250 Introduction to African American Religions (4 Credits)**

This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with MUAC 2251.

**RLGS 2301 American Indian Religion (4 Credits)**

This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the “Great Plains Indians” (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2310 World Christianities (4 Credits)**

This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as its foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2501 Islam on Film (4 Credits)**

This course uses the medium of film to introduce students to the history, faith, practice, culture(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 3205 Native Americans and Christianity in USA (4 Credits)**

This class will help students explore the forms of Christianity that have emerged among the indigenous peoples of North America. In their struggles against and adaptation to Euro-American cultural forms, indigenous peoples have developed “contextualized” forms of Christian religiosity. Students will develop a careful understanding of the multiplicity and historical contingency of Christianity as it has spread throughout the world.

**RLGS 3453 Is God a Racist Sexist?: Black Liberation and Womanist Theology (4 Credits)**

What is God's race? Does God have a gender? Is God on the side of the oppressed? Black liberation and Womanist theologies have asked these questions based on experience of black oppression in the context of the United States. African Americans have compelled to make sense of God in light of chattel slavery, Jim Crow laws, the Civil Rights Movement, and the Black Power Movement. This questioning continues in light of today's social environment. This seminar course will discuss the many strands of liberation theology in the United States, including Womanist theology. In addition to black liberation theology's methodologies and its challenges to the theological discipline, we will explore the origins and development of theological discourse in the late 1960s during the later part of the Civil Rights Movement and the emergence of the Black Power Movement. Black Theology is a theological perspective which draws on the diverse sources, including religious experience, art, literature, music, and lived narratives. These sources will inform our study. Students will engage critical voices that have shaped the movement such as James Cone, but also engage critiques of Cone and Black Theology. The course will also explore how liberation theologies attempt to deal with the problems of race, class, and gender. Student will be introduced to theological construction in African American communities and analyze the similarities and differences between these theological constructions.

**RLGS 3642 Martin Luther King, Jr., Malcolm X and Civil Rights (4 Credits)**

In this course, students will explore the lives and religious thought of Martin Luther King, Jr. and Malcolm X, two of the most prominent black religious leaders during the height of the US Civil Rights Movement, often perceived as ideological opposites. Through engaging with their autobiographies, speeches, students will compare and contrast their thoughts on religion, race, and politics in the United States. During the course, students will be able to identify religious and political similarities and differences between the two leaders. We will also explore the development of their religious and ideological shifts in the context of the struggle for civil rights. Ultimately, we explore how their vision for racial justice developed into a call for social and economic equality and human rights.

**RLGS 3645 Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism (4 Credits)**

This course examines the religious nationalism in the context of South Asia and the US. We investigate the religion, identity, politics, and power with readings/materials that explore historical memory, religious symbols/rituals/canon, political upheavals, and violent actions in both of these regions. In the context of South Asia, we will examine the British colonial period and post-independence India. In the US, we will focus our attention on post-Civil War politics and the development of the modern US polity. We necessarily interrogate the history and dynamism of important terms such as "religion", "nationalism", and "secular" in the context of Hindu Nationalism and white Christian Nationalism in South Asia and the US respectively. At the core of our inquiry is how specific religious traditions have been invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state.

**RLGS 3694 Religion in the Virtual Space: A Critical Theory Approach (4 Credits)**

This course uses a critical theory lens to consider religious praxis, traditions, beliefs, canons, and rituals within virtual/digital spaces (e.g. websites, apps, social media, digital platforms for gaming, etc.). Students will be introduced to several scholars of virtual religious spaces and practices who use both netnography techniques and critical theory approaches (e.g. Wendy Chun, Lisa Nakamura, Michelle Zappavigna, Oliver Roy, etc.) as well classical scholars of semiotics and language (Judith Butler, Jacques Derrida, Walter Benjamin, Julia Kristeva, and others). Theoretical works are paired with ethnographic, historical and/or public scholarship/experiential to offer students a "lived perspective" critical approach to the topic of digital or virtual religion.

**RLGS 3708 First Americans in Film: Religion, Land, and Identity (4 Credits)**

This course will explore, using a chronological approach, the history of Indigenous portrayal in the US Western Cinematic tradition. Students will be exposed to a variety of interweaving historical processes; including colonial history (with particular interest in Indigenous experience), the history of the film industry, the history of Indigenous representation in film, and the history of the 20 Century United States (with particular interest in Indigenous experience). The first two weeks of the course will be dedicated to the development of a theoretical toolbox. This toolbox – consisting of a series of theoretical concepts and analytical approaches – will function as the bedrock of the class and empower students, supplying the necessary lenses through which to analyze the films that will be screened throughout the quarter.

**RLGS 3814 Modern Hinduism (4 Credits)**

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism.

**RLGS 3890 Religion and Diaspora (4 Credits)**

When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

**RLGS 3893 Buddhism and Social Justice (4 Credits)**

This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

**SOCI 2320 Race and Ethnic Relations (4 Credits)**

Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2622 Deportation Nation (4 Credits)**

This service-learning course examines the nexus of the criminal justice and immigration—or, crimmigration—system. Through a scholarly analysis situated of the historical, social, and political processes that have informed contemporary immigration law and policy, the course focuses on the shift to enhanced enforcement, detention, and mass deportation. Prerequisite: SOCI 1810.

**SOCI 2650 Sociology of Immigration (4 Credits)**

This course applies a sociological approach to the study of international migration. Students examine early and contemporary waves of migration to the U.S.; theories of migration; processes of settlement and incorporation; the construction of immigration and citizenship; and institutional responses to immigration across and within immigrant groups. The course also examines variation in immigrant experiences along the lines of race/ethnicity, gender, and sexual and age identities. The course culminates in an examination of the impact of migration on the U.S. and on immigrants' sending communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2655 Latina/os in American Society (4 Credits)**

Latinas and Latinos constitute one of the largest and fastest growing ethnic groups in the United States. This course uses a sociological lens to understand Latina/os' experiences in the U.S. Specifically, we address Latinas' and Latinos' historical experiences and migration trajectories; assimilation, incorporation and racial/ethnic identity formation; the family, schools and labor markets; and political participation. In so doing, we discuss and challenge stereotypes about Latina/os, present alternative perspectives about Latina/o experiences in the U.S. and most importantly, understand their contributions to their families, their communities, and to the nation as a whole. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2710 Crime and Inequality (4 Credits)**

This course conducts a systematic investigation of the nature of inequality as it is related to crime and criminal justice in America. Racial, gender and class disparities are explored at critical stages of the criminal justice process, including crime commission, law-making, policing, court actions, and sentencing. This course considers the effects of inequality - particularly on system functions, employment opportunities, family stability and offenders' communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2719 Social Movements (4 Credits)**

Studies in range of perspectives and research issues pertinent to understanding of social movements (groups operating without clear-cut direction from established social structure and culture). Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2820 Drugs and Society (4 Credits)**

Relationship between drug use, drug control and social contexts; various sociological themes relating to use and control of drugs in American society. Prerequisite: SOCI 1810 or permission of instructor.

**SPAN 2400 Latino Cultures in the United States (4 Credits)**

Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2802 Afro-Latinos in the US (4 Credits)**

Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2804 Latin American Popular Culture (4 Credits)**

This course is an introduction to the study of Latin American popular culture. Basic theoretical notions about the subject will be introduced but the emphasis of the class will be on the discussion of literature analyzing specific situations, events or expressions drawn from various Latin American countries during the nineteenth and twentieth centuries as well as the United States in the twentieth century. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit some of the landmarks of Mexican History, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

Prerequisite: SPAN 2350.

**SPAN 3500 Interrogating 'convivencia': Muslims, Christians, and Jews in Iberia (4 Credits)**

This course proposes to critically interrogate the complex relationship between the Muslim, Christian, and Jewish communities of the Iberian Peninsula, and the lasting impact of the historical relationship between these communities on the culture, literature, art, politics, and economy of Spain, with particular emphasis on the period 711-1700. Special attention is paid to problematizing the notion of 'convivencia' and to considering how diverse representations of the 'three cultures' are appropriated in the construction of national(ist) ideals that are overtly reflected in literature and art, both in Medieval and Early Modern Iberia and in contemporary Spain. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400, or equivalent.

**SPAN 3510 Sex, Bodies, and Power in Imperial Spain (4 Credits)**

This course considers the body a key locus of social and political struggle in the 16th and 17th Centuries in Spain and in the Indies. Contemplating the role of a variety of discourses from diverse fields (medicine, law, philosophy, theology, politics), we will ask such questions as: What is the body and how does it work in physical terms? How is the body used to perform or problematize legal, moral, and social identities? How is the body used as a mechanism to marginalize, control, or exclude individuals or groups, or to legitimize the authority and power of other individuals or groups? We will contemplate representations of the body in diverse media and genres (painting, sculpture, engravings, theater, novels, poetry, autobiography, medical treatises, moralizing tracts) in order to reconstruct the complex epistemology through which the body, and especially problems of race, gender, and sexuality, was conceptualized in the 16th and 17th Centuries. Particular attention will be paid to the representation of the materiality of the body (physiology as a key to moral and cultural difference), eroticism, homosexuality, cross-dressing, 'monsters,' sickness, and reproduction, considering the representation of such corporeal phenomena to be a privileged space for interrogating the ideologies and structures upon which Power is built. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400 or equivalent.

**SPAN 3600 Caribbean Blackness: Conflictive Identity (4 Credits)**

Introduces the student to the Caribbean region, particularly examining cultural characteristics of the Spanish speaking Caribbean, with an emphasis on race relations and the contributions of peoples of African descent. The focus is interdisciplinary and includes readings on anthropology, religion, and history among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3650 The Andean World: Artistic Representations of Power, Resistance and Social Change (4 Credits)**

Survey of Andean literature and art created during the nineteenth, twentieth and twenty-first centuries; artists' portrayals of strategies for resistance and the struggle for social justice in modern Andean society. Study of a wide variety of genres including short stories, novels, testimonials, poetry, essays, songs, visual art and film. Class discussions, theoretical texts and student analyses focus on the central theme of representations of power, resistance and social change in the Andes. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3670 Exploring the Amazon: A Literary, Filmic and Ethnographic Journey (4 Credits)**

Introduces the student to the Amazonian region of South America and the ways in which this fascinating landscape and the diverse peoples who inhabit it have been portrayed and exploited by "outsider" novelists, filmmakers, explorers, anthropologists, businessmen, and scientists beginning in the sixteenth century. This course also includes a survey of texts selected from the oral traditions of indigenous Amazonian groups such as the Ashanika, Machiguenga, Cashinahua and Ese'ejá. Assigned readings underscore the course's interdisciplinary focus and encourage students to hone their course reading and analytical writing skills through the study of anthropological, historical, literary and filmic texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3800 Central American Blackness: Forgotten Roots (4 Credits)**

Introduces the student to the Central American region, with an emphasis on race relations and the cultural contributions of peoples of African descent. The focus is interdisciplinary and includes readings in history and demography among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SS 3980 Critical Race and Ethnic Studi (1-4 Credits)**

## Culture, Health and Society

Office: STURM Hall 240

Mail Code: 2000 East Asbury Ave, Denver, CO 80208

Phone: 303 871 2244

Email: yavuz.yasar@du.edu

Web Site:

Culture, Health, and Society (CHeS) is an interdisciplinary minor, housed in the College of Arts, Humanities, and Social Sciences (CAHSS), that offers students in-depth and substantive exposure to the connections between health understood broadly, and the arts, humanities and social sciences. Students who successfully complete the 20 credit-hour coursework requirement will have the Culture, Health, and Society minor noted on their transcript.

## Minor in Culture, Health and Society

Minimum of 20 credits

Code	Title	Credits
<b>Required Courses</b>		
ECON 1740 or ANTH 2525	Political Economy of Health and Health Care Culture, Health, and Society	4
<b>Electives</b>		<b>16</b>
ANTH 2323	Global Health	
ANTH 2424	The Social Determination of Health	
ANTH 3320	Medical Anthropology	
ARTS 3452	Photography and Society

COMN 3700	Topics in Communication (Visual Narratives of Women's Health)	
COMN 3702	Topics in Communication (Communicating Grief and Loss)	
ECON 2400	Public Finance	
ECON 3740	Health Economics	
ENGL 3730	Literature and Medicine: Addiction and Modernity	
HIST 1240	Comparative History of Medicine	
PSYC 2031	Introduction to Cognitive Neuroscience	
MFJS 2205	International & Development Communication	
MFJS 3207	Justice Equity Diversity and Inclusion in Health Communication	
PSYC 3160	Emotion Regulation	
PSYC 3262	Affective Neuroscience	
PSYC 3665	Executive Functioning	
SOCI 2240	Sociology of Health	
<b>Total Credits</b>		<b>20</b>

NOTE: Electives from contributing departments may have additional prerequisite requirements. Any course used to satisfy the requirements of the Culture, Health and Society minor cannot count towards another major or minor.

## Economics

Office: Sturm Hall, Room 246

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2685

Email: [Economics@du.edu](mailto:Economics@du.edu)

Web Site: <https://liberalarts.du.edu/economics>

Economics is the study of the production and distribution of material wealth. This study offers an understanding of the market and non-market institutions—and their historical evolution—that govern such production and distribution at the local, national and global levels. Students examine how individual markets for products, labor and finance work, and why they function well or poorly in part and in whole. They analyze economic structural changes and learn theories of business cycles, as well as investigate the choices and consequences of government policy alternatives. The Economics major can prepare students for a variety of careers in business, banking, government, and education. Economists hold positions in private industry and government as leaders, consultants, analysts, or advisors. Economics is also a good major for students who are interested in pursuing advanced degrees in Law, Business, International Studies - and, of course, Economics.

## Major

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

42 credits, including the following:

Code	Title	Credits
ECON 1020	Economics: A Critical Introduction	4
ECON 1030	Introduction to Micro and Macroeconomics	4
ECON 2020	Intermediate Microeconomics	4

ECON 2030	Intermediate Macroeconomics	4
ECON 2050	History of Economic Thought	4
ECON 2670	Quantitative Methods	4
ECON 3990	Capstone: Research, Evaluate, and Report on Living in CO	2
A minimum of four other upper-division ECON elective courses (2000 or 3000 level) of which one must be at the 3000 level*		16
Students must take one course with the service-learning (SLRN) attribute or complete an internship (requires registering for ECON 2980 for 0 credits).**		
<b>Total Credits</b>		<b>42</b>

\* Elective courses should be chosen in consultation with a major advisor.

\*\* Any 2000-level or above course with the service-learning attribute from *any* major can satisfy this requirement, including an ASEM. However, only an ECON course with the SLRN attribute will also count towards the elective credits. Enrollment in the internship course requires approval from the department's internship coordinator or chair. The combination of experiential learning through a SLRN course or internship plus the Capstone course constitute the ECON major's "Keystone Experience."

## Secondary Major

### Secondary Major

42 credits. Same requirements as for the BA degree.

## Minor

### Minor Requirements

20 credits, including the following:

Code	Title	Credits
ECON 1020	Economics: A Critical Introduction	4
ECON 1030	Introduction to Micro and Macroeconomics	4
ECON 2020	Intermediate Microeconomics	4
or ECON 2030	Intermediate Macroeconomics	
At least 2 upper-division courses (2000 or 3000 level)		8
<b>Total Credits</b>		<b>20</b>

### Requirements for Distinction in the Major in Economics

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Of the four electives, two must be at the 3000-level
- Completion of ECON 3997 Economics Honors Thesis (4 credits, not considered a 3000-level elective)
- Total of 46 credits

## BA in Economics

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

<sup>2</sup> If not completed in fall of fourth year.

#### **ECON 1020 Economics: A Critical Introduction (4 Credits)**

The course gives students a critical understanding of basic economic concepts, showing the importance of differences in the understanding of these concepts by different economic theories: the theories differ both in their view of the economy and its place in society; and in the potential impact of their policy recommendations on different individuals and social groups. The course begins with the immediate experience of life in the “new economy”; and then frames a critical analysis of this experience, drawing out three themes: the relation of the economy to public and private life; inequality and discrimination; globalization. The critical framework calls for a historical dimension: how did we get here? It also points to a defining feature not only of the “new economy”, but of the modern, capitalist economy since its origins: capitalism generates periodic crises within itself. The most obvious crisis is the “economic” one, but equally important are the crises of inequality and discrimination, and of environmental sustainability. The course concludes by considering what kind of economic order, what agents and institutions, would be required to transform capitalism into a socially and ecologically sustainable system. This course counts toward the Scientific Inquiry: Society and Culture requirement.

#### **ECON 1030 Introduction to Micro and Macroeconomics (4 Credits)**

The primary goal of this course is to introduce essential microeconomic and macroeconomic concepts to prepare economics majors and minors for their upper level economics courses. It achieves this goal (i) by separating and interrelating micro level (e.g., individual) and macro level (e.g., society) dynamics in the economy; (ii) by considering those dynamics within their historical context; and (iii) in the context to history of ideas in economics. The course also introduces analytical tools such as graphical and data analysis to demonstrate core ideas in micro and macroeconomic theories and policies. Prerequisite: ECON 1020.

#### **ECON 1740 Political Economy of Health and Health Care (4 Credits)**

This is an interdisciplinary and introductory level course on health, health care, medical care, and medical care systems with a special emphasis on the U.S. The course is built on a knowledge base drawing from various disciplines such as medical sciences, public health, sociology, political science, economics, anthropology, history and philosophy. It begins with a conceptual clarification regarding health, disease, health care, medical care, and biomedical and social determinants of health through an interdisciplinary perspective. This is followed by the introduction of the emergence and development of the medical profession and the US medical care system from a historical standpoint. Based on these two frameworks, we examine the financing and provision of medical care in the US medical care system. Finally, we introduce policy and reform topics in the US medical care system that have been mainly framed and shaped by the discussion on cost control and associated reform proposals and actions by highlighting their moral and ethical foundations. This course is designed specifically for Culture, Health and Society (CHeS) minor. It is not required and cannot be used as an elective for those who major in economics. This course counts toward the Scientific Inquiry: Society and Culture requirement.

#### **ECON 1988 Study Abroad Resident Credit (0-18 Credits)**

#### **ECON 2020 Intermediate Microeconomics (4 Credits)**

Microeconomic foundations to determine prices and production; consumer behavior, the behavior of firms in competitive and imperfectly competitive markets, and factor markets. Prerequisite: ECON 1030.

**ECON 2030 Intermediate Macroeconomics (4 Credits)**

Determinants of aggregate levels of production, employment and prices, focusing on the short-run dynamics of an economy consisting of a complex structure of interrelated markets; includes analysis of investment decisions, monetary structures and labor markets. Prerequisite: ECON 1030.

**ECON 2050 History of Economic Thought (4 Credits)**

Development of economic thought; leading writers and schools, their influence and theories. Prerequisite: ECON 1030.

**ECON 2101 Urban Economic History Through Cinema (4 Credits)**

We have recently passed the threshold where more than half of the population globally is living in urban areas. Perhaps more striking is that in 1850 only 3 cities (London, Beijing and Paris) had populations that exceeded a million people, while today there are over 300 such cities, with the largest city, Tokyo, having nearly 40 million inhabitants. Coincidentally, the growth in urban areas coincided with the emergence of cinema. In the popular imagination cities have been sites of both promise and terror and this has been well captured in movies since the early 20th century. This course will consider the economic cycle of cities from the early 20th century to the present as seen through film representations. While the films we will watch are works of art this is not a course on film appreciation. What we are interested in is how the emergence of large clusters of people living together in relatively small areas is being depicted over time. Furthermore, we want to understand how the economic arrangements that define these clusters, these cities, are documented and provide a new way of thinking about how humans decide to live and work in common spaces.

**ECON 2190 Behavioral Economics (4 Credits)**

Economics as a discipline often assumes people are rational and self-interested. Yet, when we look at the world around us, we see these assumptions violated, or at least they appear to be violated. In a course on Behavioral Economics, common economic assumptions are relaxed to allow for some behaviors that consistently appear in reality, such as over-optimism, procrastination, altruism, spite, ..., that standard economic theory has difficulty explaining. In this course we will identify common "irrationalities" in the lives of well-loved characters from literature or film, analyze our own behavior and that of the world around us, propose experiments to test for "anomalous" behaviors and their causes, design models to capture experimental findings, as well as discuss policies to encourage/discourage common human behaviors. We will also consider ways in which individuals, businesses, nonprofits, governments, ..., can utilize the findings of Behavioral Economics (for better or for worse). Prerequisite: ECON 1030.

**ECON 2250 Money & Banking (4 Credits)**

This course familiarizes you with the basic principles of money, banking, balance sheets, financial instruments, financial institutions, and monetary policy. We examine alternative perspectives on a variety of issues such as the nature and origins of money, how money enters the economy, the role of banks and nonbank financial institutions in the creation of money, the relationship between banks, nonbank financial firms and the central bank, and financial crises. Additionally, we study the relation between monetary and fiscal and financial stabilization policies, and whether they are complementary or contradict each other. How these policies affect private sector balance sheets will be another topic of our course. We also study the evolution of the financial system including financial practices, instruments, institutions and how they impact and are impacted by regulation. We then use the principles of money and banking we learn this quarter to understand the role of banks in the recent 2008 Global Financial Crisis, as well as its broader causes and potential cures. Prerequisite: ECON 1030.

**ECON 2280 Gender in the Economy (4 Credits)**

This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with GWST 2280. Prerequisite: ECON 1020.

**ECON 2300 Comparative Economic Systems (4 Credits)**

The purpose of this course is to develop an understanding of the methods (both theoretical and empirical) used to compare economic systems around the world. As a learning objective, by the end of the course students should be able to explain the differences between economic, financial, and legal institutions, policies, and economic performance in alternative economic systems and to critically evaluate changes occurring in transition economies (particularly China, Russia, and Central and Eastern Europe) and their implications for economic growth. Prerequisite: ECON 1030.

**ECON 2330 China and the Global Economy (4 Credits)**

This course provides a comprehensive overview of the Chinese economy and China's role in the global economy. The course covers the economic interactions between China and the world economy over the past two centuries, evaluates ongoing social, economic and environmental challenges, and evaluates future development possibilities for China and the global economy as a whole. The topics addressed include: the Chinese economy before 1949; the socialist era, 1949-1978; economic reform and market transition; the role of state enterprises; foreign investment; foreign trade; China's role in the global imbalances; the impact of the recent global economic crisis. Prerequisite: ECON 1030.

**ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)**

This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.

**ECON 2400 Public Finance (4 Credits)**

Public-sector economics, including public finance and expenditures; effects of different types of taxes and various government programs; government budgeting; cost benefit analysis. Prerequisite: ECON 1030.

**ECON 2410 Industrial Organization Economics (4 Credits)**

This course explores some applied topics in microeconomic theory such as innovation and technological change; cost of production and decision making by firms; market structures and competition; labor market; the changing role of the state; antitrust; regulation and deregulation; and international trade. Prerequisite: ECON 1030.

**ECON 2450 Race in the Economy (4 Credits)**

This course examines economic life through a racial lens by exploring historical and contemporary experiences such as housing, employment, and wealth. A racial perspective challenges us to see economic theory, markets, work, and policy in new ways and highlights the necessity and the challenge of confronting white supremacy within a system of capitalism. Prerequisite: ECON 1020.

**ECON 2500 Economic Development (4 Credits)**

This course introduces the student to several dimensions of, and forces pertaining to, development processes, including nature's inequalities, colonial legacies, the role and limitations of primary production, labor utilization, industrialization, trade, technology acquisition, foreign direct investment and other forms of capital flow, and the role of the state. If time permits, discussion include environmental concerns and cultural factors. Prerequisite: ECON 1030.

**ECON 2510 The Asian Economies (4 Credits)**

This course is based on a comparative approach, examining several Asian economies' colonial background, their primary producing sectors, the developmental state in these countries, attempts at industrialization, trade policies, technological development, liberalization to attract foreign capital, currency and financial crises. Prerequisite: ECON 1030.

**ECON 2530 Latin American Development (4 Credits)**

This course provides an in-depth exploration of the historical, political, and economic forces shaping development in Latin America. By integrating classical and contemporary perspectives, the course explores the region's colonial legacy, post-independence challenges, diverse development strategies, and evolving policy paradigms until the neoliberal reforms. Through the study of structuralism, dependency theory, neo-structuralism, and contemporary issues, the course equips students with the analytical tools to critically engage with debates on development in the Global South. Prerequisite: ECON 1030.

**ECON 2540 Law and Economics (4 Credits)**

This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

**ECON 2600 International Finance (4 Credits)**

The course covers history, institutions, and theory of international monetary relations. It encompasses topics such as balance-of-payments adjustment, exchange rates, international monetary arrangements, and foreign investment. Commencing with an introduction to national accounting and the balance of payments, the course provides a theoretical foundation for understanding exchange rate determination. Subsequently, it explores discussions surrounding floating and fixed exchange rate systems. The curriculum further delves into a concise history of international monetary relations spanning the last two centuries, including the Gold Standard and the Bretton Woods systems. Moreover, the course engages in a comprehensive examination of the role played by international capital flows and their global impacts. Finally, it concludes with an in-depth discussion on the role of international finance within contemporary global capitalism.

**ECON 2610 International Economics (4 Credits)**

The student learns about balance of payments, accounting, international monetary arrangements, international trade, and international investment. Certain policies that have a direct impact on a country's balance of payments, e.g. macroeconomic policies, exchange rate policy, and commercial policies, are examined. Some features of recent US trade policy stances is also be surveyed. Prerequisite: ECON 1030.

**ECON 2670 Quantitative Methods (4 Credits)**

This course offers an introduction to empirical work and statistics relevant to the study of economics. The course begins with a discussion of the use and creation of data, and various sources of data. It then presents the basic foundations of statistical methods for the description and analysis of data. Students learn how to calculate common descriptive statistics, test hypotheses related to the mean and differences between means, and how to perform and interpret bivariate linear regression analysis. In the process, students learn and use a popular software package commonly used for statistical analysis in economics. Prerequisite: ECON 1030.

**ECON 2701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 2710 Labor Economics (4 Credits)**

Labor theory and institutions; theory of labor demand and supply including market models, demographics and education; the labor movement and legislation, industrial conciliation methods, and modern industrial relations. Prerequisite: ECON 1030.

**ECON 2980 Internship (0 Credits)**

This online course integrates first-hand labor market experience and career readiness with economic knowledge and skill building. Students will actively build their professional networks, complete internship hours, engage in professional development, and critically reflect on their labor market experience. Students are responsible for applying to and securing their own internships prior to registering for the course with support from the internship coordinator. Prerequisites: ECON 2020 or ECON 2030.

**ECON 2988 Study Abroad Resident Credit (0-18 Credits)****ECON 3040 Marxian Political Economy (4 Credits)**

An exposition of Marx's theory of value through a detailed reading of *Capital*, vol. I. Excerpts from other readings by Marx, and some of the relevant secondary literature used. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Requires junior standing or above. Cross listed with PHIL 3075.

**ECON 3110 European Economic History (4 Credits)**

The emergence of capitalism from feudal society; the Industrial Revolution, English capitalism; European industrialization; state and economy in capitalism; 20th-century Europe and the global economy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3460 Monetary Theory and Policy (4 Credits)**

Studies the interaction between money and the economy. Examines the workings of the financial institutions and how they affect the economy. Looks at the questions of what serves as money, what determines interest rates, and how the central bank conducts monetary policy and its effect on the performance of the economy. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3480 Money & Financial Markets (4 Credits)**

Examines workings of the money and financial markets and their relation to the monetary system and to the macroeconomy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3500 Economic Development (4 Credits)**

Careful re-examination of the works of the prominent development economists of the immediate postwar decades to critically shed light on the treatment of topical development problems by modern economists. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3590 Urban Economics (4 Credits)**

Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3600 International Monetary Relations (4 Credits)**

Theory, policy, and history of international organization of money and finance; open-economy macroeconomics: balance of payments, exchange rate dynamics, monetary policy effectiveness. Cross-listed with INTS 3600. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3610 International Trade Theory & Policy (4 Credits)**

Examines topical trade issues confronting the United States, policies proposed to tackle them, and the theoretical underpinnings of these policies. Studies how those policies could affect the less developed countries as determined by the environment established under the World Trade Organization. Prerequisite: ECON 2020 or 2030. Recommended: ECON 2610.

**ECON 3670 Econometrics: Multivariate Regression Analysis for Economists (4 Credits)**

This course develops the foundations of ordinary least squares (OLS) regression analysis and teaches students how to specify, estimate, and interpret multivariate regression models. Students have to apply what they have learned using a popular software package used for econometrics and real data. Special topics also covered include regression models that include dummy variables, log-linear models, fixed effects models, a brief discussion of instrumental variables, and an introduction to time-series analysis and forecasting. Prerequisites: ECON 2670. Cross-listed with ECON 4670.

**ECON 3701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 3740 Health Economics (4 Credits)**

This course is designed to study the nature of the organization of health care production, delivery and utilization according to economic theory. It introduces the up-to-date problems and issues in the U.S. health care system by studying demand for and supply of health care services, health care production and costs, and market analysis of health care industry. Important parties playing roles in health care industry such as private health insurance firms, physicians, pharmaceutical industry, and hospital services will be studied in detail. In addition, the course deals with the role of government in health care industry and various health care reforms proposed in the U.S. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3850 Mathematics for Economists (4 Credits)**

The frontier of the research in modern mainstream economics relies on the modeling of economic phenomena, which requires increasingly sophisticated mathematical tools. The purpose of this course is to introduce these tools to early graduate students and advanced undergraduates, particularly those interested in pursuing graduate studies in economics. While this is primarily a math course that covers topics from linear algebra, multivariate calculus, and constrained optimization, economic applications will be used to provide intuition. This course provides a solid foundation in mathematical economics as well as a glimpse of the kind of work that is currently being done in the field. For graduate students, the course will provide the necessary mathematical background for ECON 4030 and Econ 4020. Prerequisite: ECON 2020 and 2670.

**ECON 3900 Growth, Technology and Economic Policy (4 Credits)**

This course will introduce students to innovation dynamics – technological change as the foundation for the growth of and structural changes in economic activity - through the lenses of 1) economic theory, as evolutionary economics, in particular original institutional economics and neo-Schumpeterian economics, as well as Marxian themes around dynamics of change in economies and societies; 2) economic history, to further underline the nature of innovation as a social phenomenon that has impacted technological capability and economic activity, in scope, reach, and level, in societies as well as societies themselves; and 3) economic policy, to emphasize focus areas for the successful support of innovation, and desired innovation, with examples drawing from the economic development process as well as national innovation systems concepts and the role of the public sector as an active participant in economic activity in general. The focus for the course under all three perspectives will be on changes to technological capability, from a social perspective that emphasizes systemic components in the processes of innovating and change. Prerequisite: ECON 2050.

**ECON 3970 Environmental Economics (4 Credits)**

This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

**ECON 3988 Study Abroad Resident Credit (0-18 Credits)****ECON 3990 Capstone: Research, Evaluate, and Report on Living in CO (2 Credits)**

Gather and evaluate data to share the diverse economic experiences of all Coloradans. Collectively write and present an economic report. Engage with Colorado policymakers and policy advocates to explore how research informs policy and to enhance understanding of policymaking and outcomes throughout Colorado.

**ECON 3991 Independent Study (1-8 Credits)**

Prerequisites: ECON 1030.

**ECON 3995 Independent Research (1-4 Credits)**

This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor is assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what he/she has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

**ECON 3997 Economics Honors Thesis (4 Credits)**

Students pursuing Departmental Distinction will write an Economics Honors Thesis of between 30 and 50 pages during their senior year. The subject of the Thesis must concern some important topic in Economics, the precise nature of which will be determined by the student and an advisor chosen from among the Economics faculty. A student wanting to try for this Distinction must first meet with the Department Chair to discuss which Professor he or she will request to supervise his or her Thesis. The Professor who agrees to supervise an Honors Thesis is responsible for certifying that the work is of sufficient quality for Departmental Distinction in Economics.

## Electrical and Computer Engineering

Electrical and Computer Engineering

Office: Ritchie School of Engineering and Computer Science

Mail Code: 2155 E. Wesley Ave, Room 283. Denver, CO 80208

Phone: 303.871.6618

Email: [eceinfo@du.edu](mailto:eceinfo@du.edu)

Web Site: <http://ritchieschool.du.edu/departments/ECE> (<http://ritchieschool.du.edu/departments/ece/>)

The mission of the Department of Electrical and Computer Engineering (ECE) at the undergraduate level is to offer programs that support and complement the University mission; to provide a general undergraduate education in computer, electrical, and mechanical engineering that prepares students for employment or graduate study; to include interdisciplinary engineering work in all engineering programs; to encourage the professional status of the faculty; and to foster the professional awareness of the students. This statement concisely sums up the goals and objectives of our programs. All Engineering degrees are accredited by the Engineering Accreditation Commission (EAC) of ABET.<sup>1</sup>

<sup>1</sup> 111 Market Place, Suite 1050  
Baltimore, MD 21202-4102  
Telephone: 410-347-7700

You will find information about the following topics below:

- Program Educational Objectives
- Program Components
- Engineering Design
- Course of Study
- PINs and Undergraduate Research Assistantships
- Study Abroad
- Fundamentals of Engineering (FE) Exam & Enrollment as an Engineer-Intern (EI)

### Program Educational Objectives

The undergraduate program objectives of the Electrical and Computer and Mechanical and Materials Engineering Departments are to produce graduates who, within a few years of graduation:

1. Apply their engineering and problem-solving skills towards engineering practice, engineering graduate school, or other fields such as medicine, science, business, or law.
2. Value and demonstrate character by acting responsibly, ethically, and professionally.
3. Work synergistically in diverse and global environments to positively impact society.
4. Embrace life-long learning to support professional development and personal wellness.

### Student Outcomes

Student outcomes describe what students are expected to know and be able to do by the time of graduation. These relate to the knowledge, skills, and behaviors that students acquire as they progress through the program.

The students outcomes for the BS in Electrical Engineering or Computer Engineering program are:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze, and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

### Program Components

The Departments of Electrical and Computer Engineering (ECE) and Mechanical and Materials Engineering (MME) work closely together to deliver an exceptional educational experience for our students and to advance the state of the art through research and industry collaborations.

All of our engineering programs have several components:

1. The University of Denver's Common Curriculum, which includes first-year seminar, writing courses, analytical inquiry and scientific inquiry courses, and advanced seminar
2. Basic sciences and mathematics, including chemistry, physics, and mathematics
3. An engineering common curriculum, with fundamental material from computer, electrical, and mechanical engineering
4. An engineering discipline (computer engineering, electrical engineering, mechanical engineering)
5. Multiple integrated design experiences, which are interdisciplinary and involve teams working on impactful real-world problems
6. Depth and/or breadth in the discipline through engineering, math, and science electives personalized to the student's individual interests.

### Engineering Design

The feature of engineering programs that most differentiates them from programs in basic or applied science and mathematics is engineering design, which is both an art and a science. Our programs feature a four-year stem of course work required of all students, regardless of curriculum, which emphasizes design, project work, team-work, and the application of scientific and technical knowledge and design skills already acquired to the

solution of interdisciplinary engineering problems. As the student progresses in the curriculum, more and more reliance is placed on previous work, and more realistic constraints and considerations are required for success. The sequence culminates in a three-quarter capstone design project carried out in the final year. Additional design work is contained in specialized courses.

### Course of Study

Engineering curricula are highly structured; acquisition of certain knowledge and skills must precede acquisition of more advanced ones. There is, thus, very little flexibility in the order in which courses must be completed, and there are few electives. Most engineering courses are offered only once a year, so an omission or deletion can add a year to the time required to complete the degree program. Although a high percentage of our students graduate in four years, it should be noted that, nationwide, nearly half of all engineering graduates take more than four years to complete their degrees, so students should not become discouraged if this is needed. The additional year may also be used to acquire additional expertise.

**Engineering Common Curriculum:** The curricula in all programs are the same for the first 5 quarters; a student can delay choosing an engineering major until the beginning of the spring quarter of their second year.

#### Advanced Curriculum (Four Year Program):

The curricula for the last two years have several components:

1. Advanced work in the engineering discipline chosen;
2. Integrated engineering project work and design;
3. Development of a specialized area (details of the areas of specialization for each degree program are given later in this booklet);
4. Completion of the University of Denver Common Curriculum

#### Advanced Curriculum (Five-Year Dual-Degree (BS/MS) Program):

The curricula for the last three years have several components:

1. Advanced work in the engineering discipline chosen;
2. Integrated engineering project work and design;
3. Completion of the University of Denver Common Curriculum;
4. Completion of the requirements for the MS in the engineering discipline.

For more information on any of these programs, please contact an advisor from either Electrical and Computer Engineering or Mechanical and Materials Engineering. Students interested in these options should discuss them with an advisor as early as possible in their undergraduate careers. For further information regarding these programs, visit the ECE (<http://ritchieschool.du.edu/departments/ECE>) and MME (<http://ritchieschool.du.edu/departments/MME>) web sites.

### PinS and Undergraduate Research Assistantships

Students wishing to participate in faculty research projects may be eligible for participation in PinS (Partners in Scholarship) or Undergraduate Research Assistantships (URA's). PINS is a University-wide program in which a student performs research in conjunction with a faculty member.

More information on PINS is available at <http://www.du.edu/urc/>. URA's work directly with faculty, often for compensation, on current research efforts. Students can read about faculty research interests on the ECE (<http://ritchieschool.du.edu/departments/ECE>) and MME (<http://ritchieschool.du.edu/departments/MME>) web sites. Such work enhances the student's ability to compete for scholarships, internships, entrance to graduate study and permanent employment. A limited number of these are available and are typically restricted to upper-division students with good academic backgrounds. An agreement with a specific faculty member is required and the URA is requested by, and granted to, the faculty member.

### Study Abroad

The University of Denver strongly encourages students to participate in study abroad programs, particularly the Cherrington Global Scholars Program; more information about which can be found at: <http://www.du.edu/intl/abroad/>

The engineering curricula have been structured so that students may take advantage of this opportunity in the autumn quarter of the senior year, rather than in the autumn quarter of the junior year, as is more usual in other DU programs.

Engineering students must be especially careful in planning this experience because of the highly restrictive and sequential nature of engineering curricula. It should also be noted that the abroad sites at which the required courses can be found are limited, vary depending on degree, and may change from one year to the next. Drs. Matt Gordon, Goncalo Martins, and Kimon Valavanis are the department contacts for students interested in the Cherrington Global Scholar Program.

### Cooperative Education Program

Recognizing the value of experiential learning, we have created a paid co-op program which is optional and competitive for all Ritchie School students, though ideally suited for current sophomores and juniors. Through this collaborative program between academia and industry, students work full

time at participating companies earning valuable work experience. Typically, students will not take classes for one full academic year, resuming their studies upon their return exactly in sequence but one year removed. In some cases, DU courses can be taken while on co-op. Dr. Matt Gordon is the department contact for students interested in the co-op program.

### Fundamentals of Engineering (FE) Examination and Enrollment as an Engineer-Intern (EI)

The FE Exam is optional for all electrical and computer engineering students, but highly recommended. The FE Exam is the first of a two-step process in order to become registered as a Professional Engineer (PE).

The FE exam is a national 6-hour examination administered by NCEES (National Council of Examiners for Engineering and Surveying) in conjunction with the Colorado State Board for Professional Engineers and Land Surveyors. Students must have completed at least 135 credits to apply to take the FE exam, for which a fee is charged. For more information please contact the ECE department chair.

After passing the FE exam, the student must send a final transcript recording the receipt of an engineering degree to the Colorado State Board for Professional Engineers and Land Surveyors. Typically, after passing the FE exam, the requirements for registration as a PE are 4 years of engineering experience under the supervision of a PE with increasing engineering responsibility and passing the PE examination.

### Criteria for Entering Any of the Engineering Programs

In the first year, students should plan to take the following:

MATH 1951	Calculus I	4
MATH 1952	Calculus II	4
MATH 1953	Calculus III	4
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5

Students lacking the mathematics preparation to begin calculus in the first quarter may take MATH 1070 College Algebra and Trigonometry followed by the usual calculus sequence; these students should meet with an advisor from the engineering department before enrolling for courses. Failure to complete the courses listed above in the first year may lead to an additional year of study.

### Minors in Engineering for Non-Engineering Students

Students desiring to minor in any of the engineering disciplines must take 20 hours of discipline specific engineering courses in addition to the equivalent of MATH 1951 Calculus I, MATH 1952 Calculus II, and MATH 1953 Calculus III. It is recommended that they have PHYS 1211 University Physics I, PHYS 1212 University Physics II, and PHYS 1213 University Physics III in their curriculum. Degree programs that “naturally flow” into an engineering minor are: chemistry, computer science, biology, mathematics and physics.

## Computer Engineering

### Bachelor of Science in Computer Engineering Requirements

(192 credits required for the degree (p. 105))

This degree requires a minimum of 192 credits. Students not in the BSCPE/MBA combined program select a specialty area from communications, digital signal processing and networking; robotics, embedded systems and instrumentation, and computer systems engineering; or, under special circumstances, an individualized specialization may also be approved. Faculty mainly associated with computer engineering pursue research in microprocessors, microsystems, biomedical systems, computer architecture, complex VLSI systems design, digital systems modeling and simulation, networks, parallel and distributed control, and processing.

### Requirements

192 credits are required for the degree including 48 credits of mathematics and basic science, 75 - 83 credits of engineering topics, and additional credit in computer science.

Code	Title	Credits
ENCE 2101	Digital Design	3
ENCE 3100	Advanced Digital System Design	4
ENCE 3210	Microprocessor Systems I	4
ENCE 3260	Python for Engineers	3
ENCE 3231	Embedded Systems Programming	4
ENCE 3501	VLSI Design	3

ENME 2541	Mechanics of Materials	3
Technical Electives		12

### Notes

Technical electives are used to complete specializations for the degree. Only technical courses may be used, and these must carry upper-division credit. Prior approval by the advisor is required.

### Additional Requirements

#### Chemistry

Code	Title	Credits
CHEM 1010	General Chemistry I	3
CHEM 1240	General Chemistry I Laboratory	1

#### Computer Science

Code	Title	Credits
COMP 1351	Introduction to Programming I	3
COMP 1352	Introduction to Programming II	3
COMP 1353	Introduction to Data Structures & Algorithms I	3
COMP 2300	Discrete Structures in Computer Science	4
COMP 2361	Systems I	4
COMP 2362	Systems II	4

#### Mathematics

Code	Title	Credits
MATH 1951	Calculus I	4
MATH 1952	Calculus II	4
MATH 1953	Calculus III	4
MATH 2070	Introduction to Differential Equations	4
MATH 2080	Calculus of Several Variables	4

#### Physics

Code	Title	Credits
PHYS 1211	University Physics I	5
PHYS 1212	University Physics II	5
PHYS 1214	University Physics III for Engineers	4

### Notes

Students must take an additional one (1) mathematics or science course from the approved list (4 credit hours). See Degree Program Plan for Approved courses.

Please see advisor for the additional MATH/Sci and UCC requirements.

### Areas of Specialization

All Bachelor of Science in Computer Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. The students must choose a minimum of 3 courses in one of the areas of specialization. For specific courses in the specialization areas, please see Degree Program Plan.

- Communications, DSP, and Networking
- Computer Systems Engineering
- Robotics, Embedded Systems, and Instrumentation
- Individualized Option

Nine credits of upper division technical courses selected with advisor's approval.

### Minor Requirements for Computer Engineering

20 credits, including:

Code	Title	Credits
COMP 1351	Introduction to Programming I	3
ENCE 2101	Digital Design	3
ENEE 2012	Circuits I and Laboratory	4
<b>Electives</b>		
ENCE courses at the 2000-level or above		10
<b>Total Credits</b>		<b>20</b>

## Electrical Engineering

### Bachelor of Science in Electrical Engineering Requirements

(197 credits required for the degree (p. 106))

This program requires a minimum of 197 credits. Faculty mainly associated with electrical engineering pursue research in the areas of communication systems and networks, digital signal processing, optical communication devices and systems, photonics, robotics and controls, and autonomous systems.

### Requirements

197 credits are required for the degree including 48 credits of mathematics and basic science and 75 - 83 credits of engineering topics.

Code	Title	Credits
ENCE 2101	Digital Design	3
ENCE 3210	Microprocessor Systems I	4
ENEE 2012	Circuits I and Laboratory	4
ENCE 3231	Embedded Systems Programming	4
ENEE 2022	Circuits II	4
ENEE 2211	Electronics	4
ENEE 2223	Advanced Electronics	4
ENEE 2611	Engineering Electromagnetics	4

### Notes

#### Areas of Specialization

All Bachelor of Science in Electrical Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. For specific courses in the specialization areas, please see Degree Program Plan.

- Communications Systems and Digital Signal Processing
- Robotics
- Electronics, Photonics, and Microsystems
- Power and Energy

- Individualized Option

Nine credits of upper-division technical courses selected with advisor's approval.

## Electrical Engineering with a Concentration in Mechatronic Systems Engineering

This degree program requires a minimum of 195 credits. Faculty associated with mechatronic systems engineering pursue research in the areas of robotics and controls and unmanned aerial systems.

### Requirements for the Concentration

(195 credits required for the degree (p. 106))

195 credits are required for the degree including 48 credits of mathematics and basic science and 75 - 83 credits of engineering topics.

Code	Title	Credits

## Notes

**Common Curriculum** - These may be taken in any order. They must have 2 courses with attributes of analytical inquiry: society and 2 courses attributes of scientific inquiry: society.

**ASEM 2XXX - Advanced Seminar Engineering** students are required to take a writing-intensive advanced seminar. Junior standing is also required.

**Technical Elective.** Technical electives are used to complete specializations for the degree. Only technical courses may be used, and these must carry upper-division credit. Prior approval by the advisor is required.

**Math/Sci.** One (1) math or science course from the approved list (4 credits). Note that without prior advisor approval only one approved math or science course may be taken instead of a UCC course in the first two years.

Total credits may vary based on technical elective options.

## Approved Math/Sci Courses (subject to participating department course offerings):

### Biology

BIOL 1010 Physiological Systems w/ BIOL 1020 Physiological Systems Lab; BIOL 1011 Evolution, Heredity and Biodiversity w/ BIOL 1021 Evolution, Heredity and Biodiversity Lab;; BIOL 2090 Biostatistics; BIOL 2120 Cell Structure and Function w/ BIOL 2121 Cell Structure & Function Lab; BIOL 3250 Human Physiology

### Chemistry

CHEM 1020 General Chemistry II w/ CHEM 1250 General Chemistry II Laboratory; CHEM 2131 Chemistry of the Elements w/ CHEM 2141 Chemistry of the Elements Lab; CHEM 2240 Introduction to Environmental Chemistry; CHEM 2270 Quantitative Chemical Analysis

### Math

MATH 2060 Elements of Linear Algebra; MATH 3080 Introduction to Probability; MATH 3090 Mathematical Probability; MATH 3851 Functions Complex Variable

### Physics

PHYS 2251 Modern Physics I; PHYS 2252 Modern Physics II w/ PHYS 2260 Modern Physics Lab; PHYS 2259 Uncertainty and Error Analysis; PHYS 2300 Physics of the Body; PHYS 2340 Medical Imaging Physics; PHYS 3510 Analytical Mechanics I; PHYS 3711 Optics I

## Areas of Specialization

All Bachelor of Science in Computer Engineering students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives. The students must choose a minimum of 3 courses in one of the areas of specialization.

### Communications, DSP, and Networking

Select three courses from the following: <sup>1</sup>

ENCE 3321	Network Design	4
ENEE 3130	Principles of Communication Systems	3
ENEE 3141	Digital Communications	3
ENEE 3670	Introduction to Digital Signal Processing	4

### Computer Systems Engineering

Select three courses from the following: <sup>1</sup>

COMP 3501	Introduction to Artificial Intelligence	4
COMP 3801	Introduction Computer Graphics	4
ENCE 3321	Network Design	4
ENCE 3620	Computer Vision	4
COMP 2370	Introduction to Data Structures & Algorithms II	4
ENCE 3631	Machine Learning	4

### Robotics, Embedded Systems, and Instrumentation

Select three courses from the following: <sup>1</sup>

COMP 3501	Introduction to Artificial Intelligence	4
COMP 3801	Introduction Computer Graphics	4
ENCE 3321	Network Design	4
ENCE 3620	Computer Vision	4
ENGR 3721	Controls	3,4
ENGR 3730	Robotics	3

### Individualized Option

Nine credits of upper division technical courses selected with advisor's approval.

<sup>1</sup> Students may also take Special Topics or Independent Study as appropriate for this option

### Areas of Specialization

#### BSEE-MSE Specialization

All EE-MSE students are required to choose an area of specialization. The area of specialization can be fulfilled through the students choice of technical electives.

#### Mechanical Systems

Students must choose from 3 of the following: <sup>1</sup>

ENME 2810	Mechanical Engineering Lab I	3
ENME 3511	Machine Design	3
ENME 3545	Mechanisms	4

**Computer Systems**

Students must take the following: <sup>1</sup>

ENCE 3321	Network Design	4
ENCE 3620	Computer Vision	4

**Individualized Option**

Nine quarter hours of upper division technical courses selected with advisor's approval.

<sup>1</sup> Students may also take Special Topics or Independent Study as appropriate for this option.

**Requirements for Distinction in the Major in Computer Engineering**

- Minimum 3.3 cumulative GPA
- Undergrad research project including Research paper and presentation

**Requirements for Distinction in the Major in Electrical Engineering**

- Minimum 3.3 cumulative GPA
- Undergrad research project including Research paper and presentation

**ENCE 2101 Digital Design (3 Credits)**

Basic logic concepts. Boolean algebra, truth tables and logic diagrams. Karnaugh maps; programmable devices including ROM's, PLA's and PAL's; data selectors and multiplexors; flip-flops, and memory design of sequential logic circuits. State diagrams, counters, latches and registers; realization of sequential and arbitrary counters; monostable multivibrators. Course includes engineering ethics. Laboratory.

**ENCE 3100 Advanced Digital System Design (4 Credits)**

Design of logic machines. Finite state machines, gate array designs, ALU and control unit designs, microprogrammed systems. Hardware design of digital circuits using SSI and MSI chips. Introduction to probability and statistics. Application of probability and stochastic processes for cache and paging performance. Laboratories incorporate specification, top-down design, modeling, implementation and testing of actual digital design systems hardware. Simulation of circuits using VHDL before actual hardware implementation. Laboratory. Cross listed with ENCE 4110. Prerequisite: ENCE 2101.

**ENCE 3210 Microprocessor Systems I (4 Credits)**

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Cross listed with ENCE 4210. Prerequisite: ENCE 2101.

**ENCE 3231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

**ENCE 3260 Python for Engineers (3 Credits)**

This course introduces python programming to students and gives them programming and mathematical tools that will be useful in different areas of engineering. The course is divided into 2 main parts. Part 1 (Introduction to Python Programming), covers the fundamental concepts of python programming, covering topics from variables and data structures, functions, algorithm complexity, representation of numbers and basics of parallel computing. Part 2 (Introduction to Numerical Methods), gives an overview of a variety of numerical methods that are useful for engineers. The course reviews the basics of linear algebra, discusses the importance of eigenvalues and eigenvectors, regressions and concepts of "discrete Fourier transform" and "fast Fourier transform".

**ENCE 3321 Network Design (4 Credits)**

Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

**ENCE 3501 VLSI Design (3 Credits)**

Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA's, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

**ENCE 3620 Computer Vision (4 Credits)**

This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisites: ENGR 3611 or ENGR 3621 AND ENGR 1572 or ENGR 3650 or ENCE 3260 or permission of instructor.

**ENCE 3631 Machine Learning (4 Credits)**

This class covers topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep learning, neural networks, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE-4631.

**ENCE 3830 Topics in Computer Engineering (1-5 Credits)**

Special topics in computer engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENCE 3991 Independent Study (1-5 Credits)**

Topics in computer engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENCE 3995 Independent Research (1-10 Credits)****ENCE 4110 Modern Digital Systems Design (4 Credits)**

This course focuses on the design of digital systems using combinational, sequential, and programmable logic devices and Hardware Description Languages (HDL). Techniques for logic design including asynchronous logic, physical world interfaces to digital systems, and system performance analysis methods are studied. Students also learn HDL-Verilog to program CPLD devices and FPGA systems. Cross listed with ENCE 3100.

**ENCE 4231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems.

**ENCE 4501 Advanced VLSI Design (4 Credits)**

Advanced techniques in the fabrication and design of VLSI circuits and systems. Modeling of parasitic components. Floor-planning, clock distribution, routing, and low power design. Cross listed with ENCE 3501. Prerequisite: ENCE 3501 or permission of instructor.

**ENCE 4620 Advanced Computer Vision (4 Credits)**

This course covers advanced concepts in image processing and computer vision including but not limited to image radiometry and geometric formation, edge detection, geometric based transformations (e.g., image warping and morphing), camera calibration, Epipolar geometry, and stereo feature matching. Other advanced topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice advanced topics in image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 3620. Prerequisite: ENEE 3311.

**ENCE 4631 Advanced Machine Learning (4 Credits)**

This class covers advanced topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep neural networks, deep learning, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE 3631.

**ENCE 4800 Advanced Topics (CPE) (1-5 Credits)**

Various topics in computer engineering as announced. May be taken more than once. Cross-listed with ENCE 3321, ENCE 3620.

**ENCE 4991 Independent Study (1-10 Credits)****ENCE 4995 Independent Research (1-18 Credits)****ENCE 5995 Independent Research (1-18 Credits)****ENEE 2012 Circuits I and Laboratory (4 Credits)**

An introduction to electrical circuit analysis, design and evaluation. Emphasis on definitions of basic variables, passive circuit components and the ideal operational amplifier. DC analysis of circuits and circuit theorems are stressed. AC signals are introduced. Computer analysis software integrated throughout the course. Cross-listed with PHYS 2011. Prerequisites: PHYS 1213 or PHYS 1214, MATH 1953.

**ENEE 2022 Circuits II (4 Credits)**

AC analysis of linear circuits to include circuit theorems via classical and transform techniques. Emphasis is placed on the Laplace transform, including use of pole-zero and Bode diagrams to analyze and design circuits, including multiple filters (single pole cascade, Butterworth, Chebyshev), and step response circuits. Phasor applications to sinusoidal steady state analysis and AC power. Computer analysis software is used as an aid to circuit analysis. Laboratory program practicing time and frequency domain analysis and design techniques on step response and filter problems. Applications to instrumentation and circuits. Prerequisites: ENEE 2012, MATH 2070.

**ENEE 2211 Electronics (4 Credits)**

Circuit behavior of semiconductor devices. Bipolar and field-effect transistors and their models; basic physical explanation of the functioning of these devices; large- and small-signal analysis of practical circuits; electronic design using both hand and computer methods of calculation and design; biasing methods for amplifier circuits; power supplies and current-source circuits. Design laboratory. Prerequisites: ENEE 2022.

**ENEE 2223 Advanced Electronics (4 Credits)**

High-frequency transistor models and determination of parameters; Laplace and Fourier analyses of common amplifier circuits; design and analysis of broad-band amplifiers and multistage amplifiers. Basis feedback topologies; Nyquist, root-locus and Bode plot investigations of stability; introduction to amplifier noise; active filter design; sinusoidal oscillators. Prerequisite: ENEE 2211.

**ENEE 2611 Engineering Electromagnetics (4 Credits)**

The study of Maxwell's equations and their experimental and theoretical foundations. Topics include Static electromagnetic fields, time-varying electromagnetic fields, wave propagation, transmission lines, and antennas. Prerequisites: PHYS 1213 or PHYS 1214. Corequisite: ENGR 3611 or ENGR 3621.

**ENEE 3011 Physical Electronics (4 Credits)**

The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field effect transistors (JFET, MESFET, MOSFET) and optoelectronic effect transistors (JFET, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010 or CHEM 1610, PHYS 1213 or PHYS 1214 or permission of instructor.

**ENEE 3030 Optoelectronics (4 Credits)**

The active and passive optical elements. Includes principles of light, optical sources (LED, LASER, Fiber Laser), optical fibers, photodetectors (APD, PIN, MSM) and practical optical transmitter and receivers. Laboratory. Cross listed with ENEE 4030. Prerequisite: ENEE 3011 or ENEE 2211 or permission of instructor.

**ENEE 3035 Photonics (4 Credits)**

Theory and techniques for the application of the optical electromagnetic spectrum from infrared to ultraviolet to engineering problems in communications, instrumentation and measurement. May include lasers, optical signal processing, holography, nonlinear optics, optical fiber communications, optical behavior of semiconductors, and similar topics in modern optics, depending on the interests and requirements of the students. Cross-listed with ENEE 4800. Prerequisite: ENEE 2611 or instructor's permission.

**ENEE 3111 Signals & Systems (4 Credits)**

Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for discrete time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Graduate students may have additional class requirements. Prerequisites: ENEE 2022, MATH 2070.

**ENEE 3130 Principles of Communication Systems (3 Credits)**

Introduction to the theory and analysis of communication systems. Emphasis on analog systems; application of probability and statistics, modulations and demodulations; noise and signal-to-noise ratio analysis; the measure of information, channel capacity, coding and design factors. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

**ENEE 3141 Digital Communications (3 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

**ENEE 3620 Optical Fiber Communications (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users with a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Laboratory. Cross listed with ENEE 4620. Prerequisite: ENEE 3030 or permission of instructor.

**ENEE 3641 Introduction to Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Cross listed with ENEE 4640. Prerequisites: ENEE 2611 and ENEE 2223.

**ENEE 3670 Introduction to Digital Signal Processing (4 Credits)**

Introduction to the theory and applications of Digital Signal Processing. Special attention is paid to the fast Fourier transform and convolution and to the design and implementation of both FIR and IIR digital filters. Prerequisite: ENEE 3111.

**ENEE 3810 Topics Electrical Engineering (1-5 Credits)**

Various topics in electrical engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENEE 3991 Independent Study (1-5 Credits)**

Topics in electrical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENEE 4030 Optoelectronics (4 Credits)**

Optical fibers: structures, waveguiding, and fabrication; attenuation and dispersion; optical sources (LED, LASER, Fiber laser); power launching and coupling; photodetectors (APD, PIN, MSM); and practical optical transmitter and receivers. Cross listed with ENEE 3030.

**ENEE 4141 Digital Communications (4 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels.

**ENEE 4620 Adv Optical Fiber Comm (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users who have a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA), and ultra-fast optical time division multiplexing (OTDM). Advanced Project. Cross listed with ENEE 3620. Prerequisite: instructor permission.

**ENEE 4640 Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include: Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Final Project. Cross listed with ENEE 3641.

**ENEE 4800 Advanced Topics (EE) (1-5 Credits)**

Various advanced topics in electrical engineering as announced. May be taken more than once. Cross-listed with ENEE 3035.

**ENEE 4950 ECE Graduate Assessment (0 Credits)**

This class does not meet. All graduate (MS and PhD) ECE students will enroll in this class during their last quarter. All required assessment materials will be uploaded online in Canvas Assignments to meet the course requirements. Students will receive Canvas course announcements and or emails from the instructor notifying the students of what are required to be uploaded. The purpose is to collect data for the assessment and continuous improvement of the graduate programs.

**ENEE 4991 Independent Study (1-10 Credits)****ENEE 4995 Independent Research (1-16 Credits)****ENEE 5995 PhD Independent Research (1-10 Credits)****ENEE 6991 Ph.D Independent Study (1-10 Credits)****ENEE 6995 Independent Research (1-16 Credits)****ENGR 1511 Engineering Connections (1 Credit)**

This course is designed to help engineering students bridge the gap from high school to a college environment in a very challenging major. Topics and activities may include academic success strategies; interviewing engineering alumni; the ethics of the profession; visits to industry sites; seminars by industry and academic experts; establishing the relationships between math, science, and engineering courses with design projects; critical and creative thinking activities; tours of the research labs of the engineering professors; disseminating information on the dual degree programs, the MBA programs, the honor code, and engineering program structures; and readings from and discussions about articles from professional publications. Membership in an engineering professional society is encouraged.

**ENGR 1572 Applied MATLAB Programming (3 Credits)**

The MATLAB programming environment is used to introduce engineering applications programming. It includes high performance numerical computation and visualization. Programming topics include an overview of an interactive programming environment, generation of m-files, variables and data types, arithmetic operators, mathematical functions, symbolic mathematics, graphic generation, use of programs in application specific toolboxes, embedding and calling C programs in m-files, file input/output, and commenting. Programming is oriented toward engineering problem solving. Prerequisites: COMP 1571 or COMP 1671 or COMP 1351, and MATH 1952.

**ENGR 1611 Introduction to Engineering Design (4 Credits)**

Introduction to concepts and practice in computer, electrical and mechanical engineering including engineering ethics. Engineering problem-solving as it applies to engineering analysis, synthesis and design. Students practice structured teamwork and program management skills in the context of projects. Emphasis on computer tools with immediate application to engineering practice.

**ENGR 1622 Introduction to Mechatronic Systems I (4 Credits)**

Introduction to elementary concepts and practices in mechatronic systems engineering, in particular electrical engineering concepts including current and voltage and basic electrical circuit analysis, interfacing electrical circuits with mechanical systems, and assembly and testing of mechatronics subsystems. Students are required to complete simple projects including mechanical and electrical components during which they practice teamwork while gaining skills in electrical and mechatronic systems troubleshooting. Introduction to Multisim circuit analysis software and Mathcad are among other topics covered in this course.

**ENGR 1632 Introduction to Mechatronic Systems II (4 Credits)**

Study of fundamentals of computer-based systems and electromechanical systems controlled by microprocessors or microcontrollers. Introduction to digital logic and electronics. Introduction to LabView and use of LabView to build and evaluate circuits and simple electromechanical systems. Use of logic circuits to build analog to digital converters. Program microcontrollers. Study of autonomous vehicles as mechatronic systems and the ability to control them (small cars, robots, helicopters, quadrotors, etc.). Course requirements include a report with detailed analysis of the vehicle control system, flow charts, and program documentation.

**ENGR 1700 Machine Shop Practice (1 Credit)**

Introduction to concepts and practice in basic machine tool work (i.e. mill, lathe, welding etc.). The course provides the necessary information for majors and non-majors to gain access to the DU Engineering Machine Shop. Class size is limited to 5 students per quarter. Enrollment priority will be given to engineering majors.

**ENGR 1911 Introduction to CAD (2 Credits)**

This course is intended for transfer students who have had an introduction to engineering, but who need to learn certain techniques and software typically dealt with in ENGR 1611 including engineering ethics. Instructor Permission Required.

**ENGR 1921 Introduction in Engineering II (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1622, Introduction to Mechatronic Systems I, but who need to learn certain techniques and software (Mathcad and Multisim) typically dealt with in ENGR 1622. Prerequisite: Permission of the instructor.

**ENGR 1931 Introduction to Engineering III (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1632, Introduction to Mechatronic Systems II, but who need to learn certain techniques and software (LabView) typically dealt with in ENGR 1632. Prerequisite: Permission of the instructor.

**ENGR 2610 Engineering Integration I (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisites: Junior standing in the appropriate engineering discipline and ENME 3511 for MME majors or ENCE 3210 and ENEE 2211 for ECE majors (the latter three can be taken concurrently).

**ENGR 2620 Engineering Integration II (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisite: ENGR 2610.

**ENGR 2905 Engineering Cooperative Education (0-12 Credits)**

For students on full-time cooperative educational employment. This course may be taken up to four times. Any and all credits will not count toward your degree and you will receive a grade of NC (no credit) for all enrollments. You will choose between a residential and non-residential section.

**ENGR 2910 Engineering Economics and Ethics (3 Credits)**

This course focuses on the practical applications of economics to engineering focusing on the requirements for both the FE and PE exams. It explains concepts in accounting and finance and applies them to both engineering and personal situations. Topics that are discussed include: economic decision making, interest, inflation, depreciation, income taxes, and rate of return. In addition, the engineer's role in society, including global, economic, environmental, societal, and ethical issues will be discussed.

**ENGR 2950 Engineering Assessment I (0 Credits)**

Examination covering basic mathematics, science and sophomore-level engineering topics. Co-Requisite: MATH 2080; Prerequisite: ENME 2541 AND ENCE 2101 AND ENEE 2012 AND ENGR 1572.

**ENGR 2951 Engineering Assessment II (0 Credits)**

Students perform a lifelong learning experience and assessment-related tasks, e.g. a survey and exit interview. The course also includes career and professional development, as well as information on the Fundamentals of Engineering (FE) exam. Engineering students are encouraged, but not required to complete the FE exam. This course should be taken in the last year of attendance. Prerequisites: ENGR 3323.

**ENGR 3100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Cross listed with ENGR 4100. Prerequisites: PHYS 1213 or PHYS 1214.

**ENGR 3200 Introduction to Nanotechnology (4 Credits)**

In this highly interdisciplinary series of lectures spanning across engineering, physics, chemistry and Biology, an introduction to the subject of nanotechnology is provided. The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures are also covered in this class. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations is briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 4200. Prerequisite: ENME 2410.

**ENGR 3313 Engineering Design Project I (2 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite: ENGR 2620 and ((ENME 3511 and ENME 2671) or (ENCE 3231)) and senior standing in engineering.

**ENGR 3323 Engineering Design Project II (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3313.

**ENGR 3333 Engineering Design Project III (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include: 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3323.

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3450 Biosensing Technology (4 Credits)**

Biosensors are defined as analytical devices incorporating a biological material, a biologically derived material or a biomimic associated with or integrated within a physicochemical transducer or transducing microsystem, which may be optical, electrochemical, thermometric, piezoelectric, magnetic or micromechanical. This course provides instruction in the basic science and engineering concepts required to understand the design and application of biosensors. This module serves as an introduction to some of the biosensors and measurement techniques.

**ENGR 3455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 4455.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3530 Introduction to Power and Energy Conversion Systems (3 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, and electric machinery. Cross listed with ENGR 4530. Prerequisite: ENEE 2022.

**ENGR 3535 Electric Power Engineering Laboratory (1 Credit)**

In this laboratory, the magnetic circuits, single phase transformers, power quality and harmonics synchronous machines, Induction machines and DC machines are studied and tested in a real physical setup. Prerequisite: ENGR 3530.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3545 Electric Power Economy (3 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 4545. Prerequisite: ENGR 3530.

**ENGR 3590 Power System Protection (3 Credits)**

This course covers methods of calculation of fault currents under different types of faults; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENEE 2022, ENGR 3530 or equivalent. 3.0 hours. Cross listed with ENGR 4590.

**ENGR 3611 Engineering Mathematics (3 Credits)**

Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to partial differential equations, and linear algebra. Prerequisites: MATH 2070, MATH 2080.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 4723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 4735. Prerequisites: ENGR 3611, ENGR 3721, and ENGR 3722, or permission of the instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 3991 Independent Study (1-5 Credits)**

Topics in engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENGR 3995 Independent Research (1-10 Credits)****ENGR 4100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Final project or paper. Cross listed with ENGR 3100. Prerequisites: PHYS 1213 OR PHYS 1214.

**ENGR 4200 Introduction to Nanotechnology (4 Credits)**

The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures is also covered. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations are briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 3200.

**ENGR 4300 Advanced Numerical Methods (4 Credits)**

Fundamental and advanced numerical methods to approximate mathematical problems for engineering applications using modern software such as Matlab. Topics include numerical differentiation and integration, solution to linear and non-linear equations, ordinary and partial differential equations, and initial, boundary, and eigen value problems. Recommended prerequisite: MATH 2070.

**ENGR 4350 Reliability (4 Credits)**

An overview of reliability-based design. Topics include: fundamentals of statistics, probability distributions, determining distribution parameters, design for six sigma, Monte Carlo simulation, first and second order reliability methods (FORM, SORM). Most Probable Point (MPP) reliability methods, sensitivity factors, probabilistic design.

**ENGR 4455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 3455.

**ENGR 4501 Graduate Capstone Design I (3 Credits)**

This is a project-centered course. This is the first third of a practical class that plans the engineering design project prior to addressing the design in earnest. This requires teamwork to develop the plan that details the schedule, cost, and who is responsible for which portions of the design effort. In this segment, the engineering teams establish the starting point for the design. This class puts theory into practice with the "shredding" of the RFP, defining a strategy for the team, balancing what has to be done with existing constraints, understanding the "true" problem of the customer, capturing the associated risks, and capturing margins required for the start of any design activity.

**ENGR 4502 Graduate Capstone Design II (3 Credits)**

This is a project-centered course. This is the second third of a practical class that implements the engineering design process (left side of the vee). This requires teamwork to develop the detailed design, which is a continuation of the accepted proposal. In this segment, the engineering teams add the details to a conceptual design. This class puts theory into practice with requirements development, balancing requirements against the constraints, completing a functional decomposition, developing a CONOPs document, developing a physical architecture, developing a functional architecture, and defining the interfaces through an ICD.

**ENGR 4503 Graduate Capstone Design III (3 Credits)**

This is a project-centered course. This is the third of a practical class that implements the engineering design process (right side of the vee). This requires teamwork to build, checkout, and test the final product. In this segment, the engineering teams build or procure hardware as a step towards the integration of the system. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. Test data is collected through instrumentation of the final product with a buy-out and certification by the team. Testing may include performance testing and environmental testing as envisioned in the context diagram.

**ENGR 4504 Graduate Capstone Design IV (3 Credits)**

This is a project-centered course. This is the fourth of a practical class that implements the entire engineering “vee” design process. This requires teamwork to build, checkout, and test the final design product, e.g. hypothetical missile. In this segment, the engineering teams fine-tune the design process which may address advanced topics such as fault management and resilience. This class puts theory into practice by building components, developing software modules, integrating software with hardware, checkout of the system, and performing tests to verify construction, validate models, and collect data for acceptance by the team prior to demonstrating the operations of the product to the customer. It may also include addressing the beginning of the program through early management and pre-phase A activities. Test data is collected through instrumentation of the final product with a buy-in and certification by the team. Testing may include performance testing, functional testing, and environmental testing as envisioned in the system process.

**ENGR 4530 Intro to Power and Energy (4 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electromechanical energy conversion, electric power generation, transformers, transmission lines, AC machinery, DC motors, and contemporary topics in power and energy conversion. Cross listed with ENGR 3530.

**ENGR 4545 Electric Power Economy (4 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 3545.

**ENGR 4560 Power Generation Operation and Control (4 Credits)**

This course covers economic dispatch of thermal units and methods of solution; transmission system effects; generate with limited energy supply; production cost models; control of generation; interchange of power and energy; power system security; state estimation in power systems; optimal power flow. Prerequisite: ENGR 3530 or ENGR 4530 or permission of instructor.

**ENGR 4590 Power System Protection (4 Credits)**

This course covers methods of calculation of fault currents under different types of fault; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENGR 3530 or ENGR 4530.

**ENGR 4620 Optimization (4 Credits)**

The development and application of various optimization techniques will be explored with engineering examples. Topics include: analytical and numerical methods, linear and non-linear programming techniques for unconstrained and constrained problems, and advanced optimization techniques, e.g. global optimization. Optimization methods will be developed and evaluated in code and used in a real-world application project.

**ENGR 4622 Advanced Optimization (4 Credits)**

Optimization is an indispensable tool for many fields of science and engineering and is one of the pillars of data science and machine learning. This course introduces optimization methods that are suitable for large-scale problems arising in data science, machine learning, and other engineering applications. We will discuss the development, computation, and convergence aspects for algorithms including gradient methods, accelerated methods, quasi-Newton methods, stochastic optimization, variance reduction, online optimization, as well as distributed optimization. We will also exploit the efficacy of these methods in concrete data science problems, including learning low-dimensional models, deep learning, and (possible) reinforcement learning. This course together with ENGR 4620 Optimization will provide in-depth introductions to optimization.

**ENGR 4680 Fault Diagnosis & Prognostics for System Design (4 Credits)**

Reliability engineering is a sub-discipline of systems engineering that emphasizes dependability in the lifecycle management of a product. Reliability, describes the ability of a system or component to function under stated conditions for a specified period of time. Reliability is closely related to availability, which is typically described as the ability of a component or system to function at a specified moment or interval of time. Normally, quality focuses on the prevention of defects during the warranty phase whereas reliability looks at preventing failures during the useful lifetime of the product or system from commissioning to decommissioning. Diagnosis is used, with variations in the use of logic, analytics, and experience, to determine “cause and effect”. In systems engineering, it is typically used to determine the causes of symptoms, mitigations, and solutions. Prognostics is an engineering discipline focused on predicting the time at which a system or a component will no longer perform its intended function. This lack of performance is most often a failure beyond which the system can no longer be used to meet desired performance. The predicted time then becomes the remaining useful life (RUL), which is an important concept in decision making for contingency mitigation. Success in this course requires knowledge of probability theory and statistics, and familiarity with MATLAB/Simulink.

**ENGR 4723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 3723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 4730 Introduction to Robotics (4 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Cross listed with ENGR 3730. Prerequisites: ENGR 3611 or ENEE 3111 or instructor approval.

**ENGR 4735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 3735. Prerequisites: ENGR 3611, ENGR 3721, ENGR 3722, or permission of the instructor.

**ENGR 4740 Adaptive Control Systems (4 Credits)**

Theoretical and application aspects of robust adaptive control design for uncertain dynamical systems. Topics include: parameter estimation, stability, model reference adaptive systems, self-tuning regulators, gain scheduling, design for robustness against unmodeled dynamics and disturbance signals. Examples will be given from aerospace engineering (changes in the dynamics of aircraft), process control, and robotics. Modern alternatives to traditional adaptive control will be discussed (switching multi-model/multi-controller adaptive schemes). Prerequisite: ENGR 3721 or permission of instructor. Familiarity with MATLAB/Simulink.

**ENGR 4745 Adv Non-Linear Control System (4 Credits)**

Nonlinear system analysis methods: Existence of solutions of ODEs, uniqueness, continuity, compactness, fixed point, linearization, metric spaces, Contraction Mapping Theorem, Gronwall-Bellman lemma. Phase plane analysis; Limit Cycles. Lyapunov stability of autonomous and non-autonomous systems. Circle criterion, absolute stability, Popov criterion. Passivity and Lyapunov stability. Input-to-State stability. Small Gain Theorem. Describing functions. Nonlinear control system synthesis methods: Passivity-based control. Stability via Feedback Linearization. Lie derivatives.

**ENGR 4750 Networked Control Systems (4 Credits)**

Fundamental tools and recent advances in networked control. Topics include the control of multi-agent networks found in multi-vehicle coordination, control of sensor networks, unmanned vehicles, and energy systems. Network models, distributed control and estimation, distributed control under limited communications and sensing, formation control, coverage control in mobile sensor networks. Prerequisites: linear algebra, linear control systems, differential equations, familiarity with MATLAB, or permission of instructor.

**ENGR 4755 Optimal Control (4 Credits)**

Introduction to optimal control theory (control laws that maximize a specified measure of a dynamical system's performance). Topics include: optimality conditions and constraints; calculus of variations; review of mathematical programming (Lagrange multipliers, convexity, Kuhn-Tucker theorem); Pontryagin's maximum principle (constraints, Hamiltonians, bang-bang control); dynamic programming and Linear Quadratic Regulation (Riccati, Hamilton-Jacobi equation). Prerequisites: ENGR 3721 (Controls) and ENGR 3735/4735 (Linear Systems) or equivalent courses.

**ENGR 4760 Multivariable Control (4 Credits)**

Multivariable aspects of control (systems with multiple actuators and sensors); performance analysis of feedback control systems; sensitivity; robustness and stability margins; disturbance attenuation; design tradeoffs; singular value; characteristic locus. Modern H-infinity control theory and 'mu' synthesis-based robust control design techniques. Enforced Prerequisites and Restrictions ENGR 3721 (Controls) and ENGR 4735 (Linear Systems at a graduate level) or equivalents.

**ENGR 4765 Robot Control (4 Credits)**

The course focuses on different techniques, methods, and theories for control of robots. The topics covered include: introduction to nonlinear control theory, review of independent joint control, nonlinear and multivariable robot control, feedback linearization control of robots, control of underactuated robots, control of nonholonomic and mobile robots. force and impedance control, and vision-based control. Pre-requisite or co-requisite: ENGR 3730 or ENGR 4730, or equivalent is recommended.

**ENGR 4790 Systems Engineering Requirements (4 Credits)**

The course covers fundamentals of design and requirements analysis of complex systems to meet overall mission requirements. It spans the whole requirements engineering phase that includes requirements analysis, decomposition, derivation, allocation, verification and validation planning. Students acquire expertise in creating UML and SYML case diagrams and in defining and implementing verification and validation plans. Requirement management methods and tools, associated vernacular, and requirements configuration control are also covered. Prerequisites: ENMT 4100, or permission by the Instructor.

**ENGR 4810 Advanced Topics (ENGR) (1-5 Credits)****ENGR 4910 Conceptual Design (4 Credits)**

Conceptual design is the part of the design process where—by identifying the essential problems through abstraction, establishing function structures, searching for appropriate working principles and combining these into a working structure—the basic solution path is laid down through the elaboration of a solution principle. Conceptual design specifies the principle solution. Concept design rarely starts at the same point; you might have an existing design that needs iterating or the requirement to create a conceptualized form. Problem solving consists of using generic or ad hoc methods in an orderly manner to find solutions to problems. George Polya (mathematician) presented two important decision-making principles, understanding the problem and devising a plan. To understand what is new, students are asked to look at intellectual property, a category of property that includes intangible creations of the human intellect. There are many types of intellectual property such as patents, and some countries recognize more than others. Designers assess the many different directions a design could take at this stage will allow you to identify what you like and don't like from each one. The preferred concept will then be further developed using engineering drawings, schematics and possibly 3D models which will show how the design will look and operate.

**ENGR 4920 Aerospace Missions (4 Credits)**

The Design "Problem" in Advanced Aerospace Systems describes the problems in the conceptual design of various types of aircraft, spacecraft, and complex vehicles. It covers the following topics: design of orbital spacecraft, design for Moon missions (such as landers), design for Mars missions (including rovers), design of an unmanned drone for surveillance (high-altitudes), CubeSats (having large constellations), and rockets and missiles (including hypersonic). Problem statements are concise descriptions of design problems. Design teams use them to define the current and ideal states, to freely find user-centered solutions. This class stands as a reference of interest to engineers and scientists working in aerospace engineering and related topics.

**ENGR 4940 Mission Operation Controls (4 Credits)**

Space operations is based at a centralized control center, a facility used for command & control (C2), and related communication equipment (antennas, etc.). The human operators conduct the day-to-day operations for controlling the spacecraft. They control the spacecraft and its payloads, and carries out all activities related to mission planning and scheduling. For example, normal orbital operations are interrupted every six months to conduct orbital maneuvers. Launch operations begin with spacecraft integration and checked-out for launch. Once safely placed in orbit, command and control goes back and forth between the ground control station and the spacecraft or satellite. A key aspect of spacecraft operations is the transferring of data from the onboard instruments collected by its payload to the ground, eventually disseminating the data to concerned users and analysts through a ground data network. This requires an on-orbit communication architecture.

**ENGR 4991 Independent Study (1-5 Credits)****ENGR 4995 Independent Research (1-16 Credits)****ENGR 5991 Independent Study (0-10 Credits)****ENGR 5995 Independent Research (1-16 Credits)**

## Emergent Digital Practices

Office: Sturm Hall, Room 216

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-7716

Email: [edp@du.edu](mailto:edp@du.edu)

Web Site: <https://liberalarts.du.edu/emergent-digital-practices>

Emergent Digital Practices (EDP) provides undergraduate students with a broad understanding of the history, theory and emerging status of multiple cultural practices, both mainstream and alternative, which are evolving alongside digital technologies. The EDP major emphasizes the new forms of interaction, collaboration, engagement, and performance developing as technology converges with bodies of knowledge and practices from across the arts, humanities, and sciences. Shaped by an investment in participatory forms of creativity and critical engagement, EDP asks students to work together to develop strategies and processes for addressing complex interdisciplinary topics and problems beyond the realm of industry standards and proven application. Together, EDP faculty and students will strive to create new forms of art, experiences, media, and ways of knowing in the 21st century.

The Emergent Digital Practices program brings together art, design, media, culture, and technology studies in a hands-on, collaborative environment. Technology links academic disciplines with professional fields and joins shared communities with our personal lives in many new and exciting ways. To understand and explore this landscape, we infuse the digital practices of making and writing with contemporary critical approaches to cultural technologies, media philosophy, the critique and investigation of electronic and new media arts, and studies in science fiction, trans-global politics and science.

Emergent Digital Practices appeals to students who are more broadly defined creative types and critical thinkers because the lines between artists, designers, scholars, and inventors have largely dissolved. The EDP program prepares students who seek to work in spaces beyond what is already defined and familiar. To help students acquire a broad spectrum of media literacies and practical artistic skills, the EDP major combines cutting-edge classrooms with new learning spaces that are equal parts laboratory, studio, think-tank, and stage. Integrating powerful desktop computer stations and highly mobile technologies within a variety of interactive smart-spaces, the EDP program supports new kinds of student-to-peer and student-to-faculty interactions and collaborations.

## Emergent Digital Practices Bachelor of Arts Major

The Bachelor of Arts in Emergent Digital Practices at the University of Denver promotes critical knowledge and creation with digital tools. The BA student majoring in emergent digital practices should be able to demonstrate both understanding and skills within interdisciplinary contexts. The BA student should also be able to synthesize ideas and practices from across the spectrum of historical and contemporary contexts, focusing not just on making the new, but making the needed. The BA student's work should demonstrate synergy with the student's second major, minor or dual-degree program. The Emergent Digital Practices Minor brings the power of basic technical know-how and critical sensibility to your major. The BA minor will be able to leverage digital ideas to infuse 21st-century methodologies into their other areas of interest, better preparing the student for either the marketplace or future academic studies in any discipline. Through both exploration of new ideas and hands-on experiences, the minor will prepare students to shift with our rapidly changing future.

## Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

48 credits, including the following:

Code	Title	Credits
<b>EDP Foundations</b>		
ARTS 1250	Drawing	4
Select 12 credits of the following:		12
ARTS 1250	Drawing	
EDPX 2000	Imaging in Emergent Digital Practices	
EDPX 2100	Interactivity in Emergent Digital Practices	
EDPX 2300	Systems in Emergent Digital Practices	
EDPX 2400	Time in Emergent Digital Practices	
<b>EDP Cultures</b>		
Select 8 credits of EDP cultures		8
<b>Upper Division EDP Electives</b>		
Upper-division EDP electives, including one Collaboration focused course		20
<b>Capstone Credits</b>		
EDPX 3990	Capstone (Taken in the Winter of Senior Year)	4
<b>Total Credits</b>		<b>48</b>

The BA major in Emergent Digital Practices must also have a minor, a second major, or be enrolled in a dual-degree program in another discipline. To facilitate this requirement, the BA major in Emergent Digital Practices is capped at a maximum of 60 credits toward the major.

## Emergent Digital Practices Secondary Major

### Secondary Major

48 credits. Same requirements as for BA degree.

## Emergent Digital Practices Bachelor of Fine Arts Major

### Bachelor of Fine Arts Major Requirements

(189-192 credits required (p. 98))

The Bachelor of Fine Arts in Emergent Digital Practices at the University of Denver builds on the same foundation as the BA and extends into a fine arts-focused practice. While demonstrating a foundational understanding of emergent digital practices within interdisciplinary contexts, the BFA student should be able to articulate a deeper understanding of the historical and contemporary contexts of art, technology and sciences. The BFA student should be prepared for public engagement through his or her knowledge of the significance of established cultural institutions and frameworks such as galleries, museums, festivals and other public spaces. Additionally the BFA student should be prepared for the development and organization of emerging venues for the exhibition and public engagement with experimental works of art and digital media. The BFA student does not need a second major or minor.

Minimum of 116 credits; maximum of 135 credits, including the following:

Code	Title	Credits
<b>EDP Foundations</b>		
ARTS 1250	Drawing	4
EDPX 2000	Imaging in Emergent Digital Practices	4
EDPX 2100	Interactivity in Emergent Digital Practices	4
EDPX 2300	Systems in Emergent Digital Practices	4
EDPX 2400	Time in Emergent Digital Practices	4
<b>EDP Cultures</b>		
Select 8 credits of EDP cultures		8
<b>Art history</b>		
Select 8 credits of Art History		8
<b>Credits outside Emergent Digital Practices and Art History</b>		
4 credits in a course approved by an EDP advisor		4

<b>Upper division EDP electives</b>		
Select 52 upper-division EDP electives, including one Collaboration focused course		52
<b>Upper-division courses</b>		
Select 16 credits in Studio Art, Art History, Computer Science, Media, Film and Journalism Studies		16
<b>Capstone Credits</b>		
EDPX 3960	BFA Capstone (Taken in Spring of Senior Year)	4
EDPX 3990	Capstone (Taken in Winter of Senior Year)	4
<b>Total Credits</b>		<b>116</b>

The BFA major in Emergent Digital Practices is capped at a maximum of 135 credits.

## Emergent Digital Practices Minor

### Minor Requirements

24 credits, including the following:

Code	Title	Credits
<b>EDP Foundations</b>		
Select 3 of the following:		12
EDPX 2000	Imaging in Emergent Digital Practices	
EDPX 2100	Interactivity in Emergent Digital Practices	
EDPX 2300	Systems in Emergent Digital Practices	
EDPX 2400	Time in Emergent Digital Practices	
<b>EDP upper division electives</b>		<b>8</b>
<b>EDP Cultures</b>		<b>4</b>
<b>Total Credits</b>		<b>24</b>

### Minor Requirements (for All Computer Science Majors)

24 credits, in emergent digital practices. These requirements apply to students pursuing a Computer Science Major. \*

Code	Title	Credits
<b>Required Courses</b>		
EDPX 2000	Imaging in Emergent Digital Practices	4
EDPX 2400	Time in Emergent Digital Practices	4
<b>EDP electives</b>		<b>12</b>
<b>EDP Cultures</b>		<b>4</b>
<b>Total Credits</b>		<b>24</b>

\* Students with a Computer Science major with a minor in Emergent Digital Practices:

- cannot receive credit toward the minor for either EDPX 2100 or EDPX 2300
- may need to seek prerequisite waivers to enroll in EDPX 3100, 3200, 3450, 3110, 3250, 3310, 3340, 3350

Bachelor of Arts in Game Development students with a minor in Emergent Digital Practices:

- may not count EDPX 3600 3D Modeling or ARTS 1250 Drawing toward satisfying the emergent digital practices minor as they are required cognates of the game development major

## Media Arts Entertainment Technologies Minor

### Media Arts Entertainment Technologies Minor

The Media Arts Entertainment Technologies minor is an interdisciplinary program that navigates across traditional academic barriers. It provides an experiential and interdisciplinary environment where students can broaden their creative technology skill set in order to thrive as producers, makers, and performers in an increasingly eclectic, self-driven, and entrepreneurial artistic and economic landscape.

This minor offers opportunities for students to receive focused instruction from expert specialists in audio engineering, digital performance visuals, electronic and acoustic music production, film and video production, theatre tech (scenery, lighting, costume & sound), digital fabrication, electronics, and entrepreneurship. #Emphasis is placed on media creation, design and development of media, and performance for arts, entertainment, and industry.

## Requirements for the Minor

Minimum of 24 credits from the following:

Code	Title	Credits
<b>Minimum four credits from one of the following cultures/theory/history/critical thinking courses:</b>		<b>4</b>
ARTH 1060	Contemporary Art Worlds	
ARTH 3834	Global Contemporary Art	
EVM 1100	Introduction to Entrepreneurship	
EDPX 2710	Critical Game Cultures	
EDPX 2730	Understanding Digital Art	
EDPX 2770	Exploring Digital Cultures	
EDPX 2780	Computing Culture	
MFJS 2000	Introduction to Film Criticism	
<b>Electives</b>		<b>20</b>
Remaining credits from courses with the Media Arts Entertainment Technologies attribute <sup>†</sup>		
<b>Total Credits</b>		<b>24</b>

- <sup>†</sup>
- No more than 16 credits may come from any single discipline (subject code).
  - No more than 12 credits may come from any combination of EVM and/or BUS courses.
  - No more than four credits may come from sprints (one-credit EVM courses).

## Requirements for Distinction in the Major in Emergent Digital Practices

- Minimum of 3.5 major GPA
- Creative research project, paper, and presentation required

## BA in Emergent Digital Practices

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

<b>First Year</b>					
<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>
FSEM 1111	4	WRIT 1122	4	WRIT 1133	4

<sup>1</sup> See Program of Study (p. 316) tab for explanation of EDP Foundations courses

<sup>2</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

## Emergent Digital Practices Course Descriptions

### **EDPX 2000 Imaging in Emergent Digital Practices (4 Credits)**

This course introduces digital imaging and digital illustration. Foundational technical methods and semiotics are introduced as ways to explore contemporary visual language. Students gain understanding in the digital creation and deciphering of images in 2D space. The essential language and concepts concerning representation and digital reproduction are developed through critical study and making. Lab fee. No prerequisites.

### **EDPX 2100 Interactivity in Emergent Digital Practices (4 Credits)**

This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.

### **EDPX 2300 Systems in Emergent Digital Practices (4 Credits)**

This course studies the fundamental concepts of systems, both analog and digital, analyzing how structure and operation combine to produce complex results and effect change in the world. Students will learn how the components of digital systems from simple electronics to complex software and distributed networks function systematically to solve problems and share information. Through study of the development of the computer, the internet and digital interfaces students will gain a critical understanding of how these systems have been historically shaped. Reading, writing, and making will synthesize practice and critical ideas. No prerequisites. Lab fee.

### **EDPX 2400 Time in Emergent Digital Practices (4 Credits)**

This course introduces the fundamental concepts of time-based media, with an emphasis on audio and video production. Basic recording, capturing, editing and manipulation of time are covered. Students gain understanding on how to utilize, analyze, and manipulate time in digital media. Students learn the basic language and critical analysis techniques needed to understand when and how to take advantage of each time-based media for their practice. Lab fee. No prerequisites.

### **EDPX 2710 Critical Game Cultures (4 Credits)**

This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practices of play. This course is taught with a teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We co-construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **EDPX 2730 Understanding Digital Art (4 Credits)**

An exploration of digital art focused on artwork created since 2000. Topics include video art, MMO performances, interactive installations, VR, animation, and much more. Students will actively search for, share, and analyze artworks as a key component of the class. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **EDPX 2740 Animated Satire (4 Credits)**

This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self-discovery and vulnerability, which can contribute to empathy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **EDPX 2770 Exploring Digital Cultures (4 Credits)**

This course introduces fundamental concepts of digital technologies and networks from a cultural perspective. Students will critically examine the broader impact of the internet, search engines, social media platforms, algorithms, surveillance capitalism, technological bias, and online cultural exchange. How can we envision preferable futures for online cultures? What methods can be used to evaluate possible futures? Students will explore the different cultural aspects of critical speculation through theory, literature, speculative/science fiction, art, and making. This course counts toward the Analytical Inquiry: Society and Culture requirement.

### **EDPX 2780 Computing Culture (4 Credits)**

This course focuses on the history and theory of computing technologies, and their impact on the arts and society. Computing, in this context, ranges from ancient mechanical computers, telecommunication, and colonial infrastructure and contemporary highspeed networks, social networks, and Artificial Intelligence. How do these technologies impact modern societies? What artworks (visual art, literature, music and more) utilize computing in creative and critical ways? How can art and computing create social change? What are the negative legacies of colonialism embedded in both art and computation? What are meaningful decolonial practices stemming from the Global South and North that enable the collective stewardship of new technologies? Students will analyze technologies, art, and human creations through qualitative analysis and creative interpretations. This course fulfills the Cultures requirement for Emergent Digital Practices majors and minors. This course also counts toward the Analytical Inquiry: Society and Culture Common Curriculum requirement.

**EDPX 3100 Programming for Play (4 Credits)**

This course offers an introduction to the creation of games and playful interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Specific topics will vary each time the course is taught, and the course is repeatable up to two times. Lab fee. Cross listed with EDPX 4100. Prerequisite: EDPX 2100 or permissions of the instructor.

**EDPX 3110 Rapid Game Design and Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 4110. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3112 Rapid Physical Game Design & Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, "Big Games." The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 2300. Lab fee.

**EDPX 3120 Making Critical Games (4 Credits)**

Students are challenged to create games (board, physical, video-, and hybrid games) that respond to social conditions in a critical manner while still maintain an essential ludic quality. Public good and civic engagement projects are welcomed. The course may be repeated with instructor permission when projects vary. Specific topics will vary each time the course is offered, and the course is repeatable up to 3 times. Lab fee. Prerequisites: EDPX 3100 or COMP 1671, and EDPX 3110, or permission of the instructor. Cross listed with EDPX 4120.

**EDPX 3200 Data Visualization (4 Credits)**

This course explores the creation of informational graphics for the visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations are also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 4200. Prerequisites: EDPX 2100, or permission of the instructor.

**EDPX 3210 Typographic Landscapes (4 Credits)**

This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 2000 or permission of the instructor.

**EDPX 3270 Making Networked Art (4 Credits)**

In this course networked art is understood in the broadest sense from art that natively exists on digital networks to art that critiques and engages with the concept of the network in contemporary society. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will engage with network architectures and platforms developing experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 2100. Lab fee. Crosslisted with EDPX 4270.

**EDPX 3310 Tangible Interactivity (4 Credits)**

Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3320 Interactive Art (4 Credits)**

This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta data/multimedia asset acquisition and authoring environments. While utilizing student skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 4320. Prerequisite: EDPX 3310 or EDPX 3450, or permissions of the instructor.

**EDPX 3330 Advanced Coding (4 Credits)**

This course is focused on text-based creative coding for multiple purposes. Specific applications change each quarter and can include mobile apps, computer vision, machine learning, generative art, programming reactive spaces, web animation, and other emerging ideas, all driven by creative coding. Prerequisite: EDPX 2100 or COMP 1671.

**EDPX 3340 Designing Social Good (4 Credits)**

This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and then to make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross-listed with EDPX 4340. Prerequisite: EDPX 2100 or permission of the instructor.

**EDPX 3350 Sustainable Design (4 Credits)**

This course surveys and functionally implements the foundations of sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure among others. Lab fee. Prerequisites: EDPX 2300 and EDPX 2400 or permission of instructor.

**EDPX 3370 Biomedial in Emergent Digital Practices (4 Credits)**

This EDP art-science course in Biomedial will survey and investigate the interplay between new media, biological systems/ technologies and bioethics as they relate to creative inquiry at the juncture of life sciences, digital media and contemporary technoculture. The course will build upon the basic paradigms and platforms of biosemiotics and biomimetics to expand into a coverage of our framing of corporeality, biological/environmental sensibilities and our perceptions and interconnections with biomaterials and lifeforms that we exist thru and within. Course topics will adapt to significant developments in biological sciences, emergent media and bioethics. The course can be repeated for credit with offering of new course topics. Cross Listed with EDPX 4370. Prerequisite: EDPX 2300. Course is open to Biology, Environmental Science majors and Sustainability minors with instructor approval.

**EDPX 3400 Video Art (4 Credits)**

This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor. Cross listed with EDPX 4400.

**EDPX 3410 Advanced Video Art (4 Credits)**

This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on off-screen time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into space, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3440 Site-Specific Installation (4 Credits)**

This class produces projects investigating physical space, virtual space and site-specific public installation. Lab fee. Cross listed with EDPX 4440. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3450 Visual Programming (4 Credits)**

This course introduces intuitive visual programming that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 4450. Prerequisite: EDPX 2100.

**EDPX 3460 Visual Programming II (4 Credits)**

This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 4460. Prerequisite: EDPX 3450 or permission of the instructor.

**EDPX 3490 Expanded Cinema (4 Credits)**

This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performative and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 4490. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3500 Sonic Arts (4 Credits)**

This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 4500. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3600 3D Modeling (4 Credits)**

This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of compositing in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 4600, MFJS 3600. Prerequisite: EDPX 2000 or permission of the instructor.

**EDPX 3610 3D Animation (4 Credits)**

This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class progresses. Lab fee. Cross listed with EDPX 4610. Prerequisite: EDPX 3600 or permission of the instructor.

**EDPX 3620 3D Spaces (4 Credits)**

An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisite: EDPX 3600 or permission of the instructor.

**EDPX 3700 Topics in Emergent Digital Culture (4 Credits)**

This course provides an in-depth exploration of the emergent digital practice of a particular culture and a unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. This course may be repeated. Prerequisite: varies with topic.

**EDPX 3701 Topics in Emergent Digital Making (1-4 Credits)**

Topics in Emergent Digital Making.

**EDPX 3730 21st Century Digital Art (4 Credits)**

An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

**EDPX 3740 Performance Cultures (4 Credits)**

This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. For output, students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab fee. Prerequisites: EDPX 2200 and EDPX 2400, or permission of the instructor.

**EDPX 3750 Sound Cultures (4 Credits)**

This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course's emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 2400.

**EDPX 3770 Cybercultures: The Social Science of Virtual Spaces (4 Credits)**

This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with EDPX 4770.

**EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)**

This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated and artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 3780 Science Fiction: Digital Culture (4 Credits)**

This course explores the intersections of emergent digital practices and cultures with the extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students will engage with a range of both canonical and contemporary science fiction and speculative fiction media, including short stories and theory, film and television, and other expanded media such as visual art, audio, graphic novels, and games. Students will critically and creatively explore conceptual approaches such as world-building, speculative technologies, digital aesthetics, and much more. [This class fulfills the EDP Cultures requirement].

**EDPX 3800 Topics in Digital Making (4 Credits)**

This course provides an in-depth exploration of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. This course may be repeated. Lab fee. Prerequisite: varies with topic.

**EDPX 3960 BFA Capstone (4 Credits)**

This course is required for all BFA students prior to taking the undergraduate capstone course. Students work independently with a faculty member to research and develop their capstone project in detail addressing ideas, making, venues, distribution, and other aspects of professional practice. Lab fee. Senior standing required. Must be a BFA student.

**EDPX 3980 Internship (1-8 Credits)**

Instructor approval required.

**EDPX 3990 Capstone (4 Credits)**

This course provides time and guidance for individual students to develop complex works that are a culmination of their studies. All projects must synthesize the principles of experience, emergence, and engagement taught throughout the program. All projects require both writing and making, the balance of these two to be determined by the nature of the work. Lab fee. Senior standing required.

**EDPX 3991 Independent Study (1-8 Credits)**

Independent Study form required.

## Media Arts Entertainment Technologies Course Descriptions

The courses below represent course with the Media Arts Entertainment Technologies attribute at the time of publication. The inventory of courses with the Media Arts Entertainment Technologies attribute will change throughout a student's career pursuing the Media Arts Entertainment Technologies Minor and special offerings such as topics courses are include in the list below. Students can search the schedule using the Media Arts Entertainment Technologies attribute for the most up-to-date courses in this area.

**ARTH 1060 Contemporary Art Worlds (4 Credits)**

Have you ever wondered how a calf suspended in formaldehyde can sell at an art auction for nearly twenty-four million dollars? This class introduces the contemporary art world and explores how art functions within our society. Topics include the art market, the politics of museums, censorship and public funding, and popular cultural representations of the artist. We also look at how contemporary artists are engaging with some of the most important issues of our day. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ARTH 3834 Global Contemporary Art (4 Credits)**

This class explores contemporary art, including but not limited to painting, sculpture, performance art, installations, and new media, through the lenses of identity, the body, time, place, language, and spirituality. These narratives provide threads of continuity across time and place, but we will also focus on individual artistic interpretations as we delve deeper into cultural specificities and audience reception around the world. We will identify and analyze connections between recent art theoretical perspectives and the emergence of various art trends. This course considers the role of the international art market, global art fairs, artist retrospectives, and recent museum and gallery exhibitions as participatory elements in the construction and discussion of contemporary art.

**ARTS 1400 4D Approaches (4 Credits)**

Students are introduced to the fundamental principles of four-dimensional art and design through a survey of concepts, techniques, and practices. Emphasis is placed on critical thinking, creative problem-solving, and experimentation through investigations of technological form and innovation, time and motion, and the ephemeral. Verbal and written exercises supplement group activities and visual learning. Lab fee. No prerequisites.

**BUS 1440 The Fourth Industrial Revolution (4 Credits)**

This course provides a practical glimpse into the future of the global and competitive nature of business. From product ideation to product deployment, this course introduces students to business's role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in teams, and product/service innovation and creativity are introduced. Key 4th industrial revolution technologies such as artificial intelligence (AI), the Internet of Things (IoT), distributed ledger technology and cryptocurrency, augmented/mixed/virtual reality, additive manufacturing, and autonomous, robotics, and drones are also introduced.

**EDPX 2100 Interactivity in Emergent Digital Practices (4 Credits)**

This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.

**EDPX 2740 Animated Satire (4 Credits)**

This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self- discovery and vulnerability, which can contribute to empathy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2770 Exploring Digital Cultures (4 Credits)**

This course introduces fundamental concepts of digital technologies and networks from a cultural perspective. Students will critically examine the broader impact of the internet, search engines, social media platforms, algorithms, surveillance capitalism, technological bias, and online cultural exchange. How can we envision preferable futures for online cultures? What methods can be used to evaluate possible futures? Students will explore the different cultural aspects of critical speculation through theory, literature, speculative/science fiction, art, and making. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 3110 Rapid Game Design and Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 4110. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3450 Visual Programming (4 Credits)**

This course introduces intuitive visual programming that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 4450. Prerequisite: EDPX 2100.

**EDPX 3490 Expanded Cinema (4 Credits)**

This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performative and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 4490. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3500 Sonic Arts (4 Credits)**

This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 4500. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3780 Science Fiction: Digital Culture (4 Credits)**

This course explores the intersections of emergent digital practices and cultures with the extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students will engage with a range of both canonical and contemporary science fiction and speculative fiction media, including short stories and theory, film and television, and other expanded media such as visual art, audio, graphic novels, and games. Students will critically and creatively explore conceptual approaches such as world-building, speculative technologies, digital aesthetics, and much more. [This class fulfills the EDP Cultures requirement.].

**EVM 1100 Introduction to Entrepreneurship (4 Credits)**

Entrepreneurs play a critical role in driving innovation, promoting social change, creating jobs, and changing the way we live, work, and communicate. Entrepreneurs come from different backgrounds, professions and possess a wide range of skills and experiences. What entrepreneurs have in common, the desire to solve problems, make change and create value through innovation. This introductory entrepreneurship course is for students that are interested in learning about entrepreneurship or first-time entrepreneurs with an idea. Students will explore entrepreneurship and apply tools, mindsets, and frameworks for starting a for-profit business, a non-profit business, or a business within a business.

**EVM 2200 Global Entrepreneurship "Innovating and Creating Value Across Borders (4 Credits)**

Entrepreneurship is about solving problems, identifying unmet needs and opportunities. Where some see roadblocks, entrepreneurs see opportunity. As people, cultures and business become interconnected it is important for entrepreneurs to have a global mindset and approach to business. The Global Entrepreneurship course provides you with the skills and knowledge to start a business in another country, develop a market in another country, and identify opportunities across borders. Students will develop an intercultural understanding as they learn about history, religion, culture, economy, and government in other countries. Students will identify commonalities, shared interests, and differences between cultures and apply business frameworks to develop products and services for international markets.

**EVM 3400 The Innovation Amphitheater (1 Credit)**

Want to start your own business and invent your own future but haven't landed on a great product/service idea? Already have a business and want to expand into new spaces and offerings? This course is for people who answered yes to either of those questions. The Innovation Amphitheater takes you through 16 proven strategies and techniques to help you innovate into new spaces and find opportunities. You'll explore such strategies as cross-overs, combos, slivercasting, inside-out, old school and retro, and many more.

**EVM 3402 Creating Your Digital Presence (1 Credit)**

Creating awareness of your new business venture is one of the most important tasks in the early stages of building your business. Creating awareness by driving traffic through and to your digital presence is essential. To help you as you embark on an entrepreneurial effort, this course focuses on building an integrated digital presence with a website, Facebook Business Page, Twitter account, Pinterest account, and an Instagram account.

**EVM 3404 Primary Research (1 Credit)**

To be successful in your business venture, you need to make data-driven decisions. Much of that data can come from internal operations or perhaps secondary sources. But, to truly be successful, you need to gather, analyze, and make decisions based on primary research data from your external market. In this course, you'll learn the basic tenets of performing primary research activities including defining your market segment, building a primary research instrument, gathering data using a primary research instrument, analyzing the data, and making recommendations.

**EVM 3407 The Perfect Pitch (1 Credit)**

Essential to most new business ventures is the ability to raise capital, most notably from angel investors and venture capitalists (VCs). Raising capital starts with the "pitch," a presentation that is exciting, informative, realistic, and addresses what funds are needed, how they will be used, and how the investor will financially benefit from providing the funds. This course will help you learn how to create the perfect pitch for your new business venture. We will review both successful and unsuccessful pitch presentations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3408 Accounting For Entrepreneurs (1 Credit)**

Accounting is an activity in any business that measures, processes, and communicates financial information and transactions. This vitally important activity will help you track your expenses, recognize your revenue, and in general keep an accurate and detailed view of the financial strength of your business. In this class, you'll learn how to process operating expense transactions (e.g., advertising and payroll expenses) and revenue transactions (both actual sales and sales on credit). You'll also learn how to appropriately handle the depreciation of long-term assets like vehicles and buildings. Finally, you'll learn how all of these transactions enable you to build a balance sheet for your new business venture.

**EVM 3409 Financial Statements For Entrepreneurs (1 Credit)**

Of the four major financial statements, the most important to a new business venture are the balance sheet, the income statement, and the statement of cash flows. Knowing how to build and interpret these are critical to your success during not only the early stages of spinning up your business but throughout the lifetime of your business. In this class, based on a wide variety of financial transactions, you will learn how to build and interpret an income statement and a statement of cash flows. (It is assumed that you already know how to build and interpret a balance sheet.) You'll also learn how to build a proforma income statement and statement of cash flows, based on the financial projections of your new business venture.

**EVM 3413 Design Thinking (1 Credit)**

Design Thinking is a creative problem solving process that builds your ability to first see and then solve human-centered opportunities. It starts with empathically looking at frustrations inside and around your organization, then moves through a variety of brainstorming sessions to build customer centric solutions. Design Thinking is a wonderful tool to help you monetize the human capital in your organization. Once we know the process, we will ask students to bring real challenges into the classroom where we will use Design Thinking to build potential new products, services and solutions.

**EVM 3414 Market Discovery and Product-Market Fit (1 Credit)**

Market discovery is about identifying demand for ideas and innovations. Students will discover that some markets have already been established and others have yet to be created. Product market fit takes time. At first new ideas and innovations may not fit an existing market, requiring a new market to be developed. We'll study example companies in a wide variety of industries that over time found the correct product market fit. Students in this Sprint will learn methodologies to find and assess product market fit for new ideas and innovations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3417 Branding and Messaging (1 Credit)**

Branding is an essential element for any startup. Your brand is created by you and grows as your business grows. It's more than a logo, colors, and fonts contained in a style guide. It's the experience that you create for your customers. It's something your business should aspire to. Something memorable. And as you work through this course, you will get an understanding of what it takes to build the brand for your business.

**EVM 3421 Intellectual Property Issues for Startup Businesses (1 Credit)**

All businesses have assets, both tangible and intangible, and these assets must be managed, nurtured, accounted for, and protected. Among the most important of those assets today fall in the realm of intellectual property (IP) and are protected through mechanisms such as copyrights, trademarks, and patents. As a business owner, you must be aggressive and vigilant in ensuring that your most important IP assets are protected, as they are an important part of your brand portfolio. This class will introduce you to the role of copyrights, trademarks, and patents as tools for protecting your intellectual property. In doing so, you will learn about your rights as an IP owner and – equally as important – your responsibilities for not infringing on the IP assets of other organizations.

**EVM 3422 Startup Legal Issues (1 Credit)**

Starting a business involves a host of activities, from product/service development, to marketing, to sales and service. At the foundation of all of these activities are legal considerations. Legal considerations for startup businesses range from establishing a form of business operation, to registering with the government and obtaining the appropriate licenses, to filing sales taxes, to the management of employees (hiring, contracts, etc.), and a host of other essential activities. To get your business off "on the right foot," this course introduces you to the legal considerations that are vitally important to your success.

**EVM 3425 Rapid Prototyping - 3D Printing and Laser Engraving (1 Credit)**

The purpose of this course is to empower students to more effectively develop their creative and entrepreneurial capacities utilizing the tools of rapid prototyping. Students will identify appropriate rapid prototyping technologies to apply to unique situations. Curriculum over the course of the day progressively builds by presenting more challenging problems. At the conclusion of the course, students will be able to turn ideas into solutions that add value to a product, process, or service.

**EVM 3428 Developing a WordPress Website (1 Credit)**

What is WordPress? What is a CMS? What is Open Source? Is it a concept or a nifty term? If you are starting a new business or thinking about starting a new business you need to understand the available technologies and tools to build and manage a website. Where do I host the website? How do I create and update the website? What tools are available? These are just a few questions we will answer in the WordPress Grind. The WordPress Grind has been designed from a beginner's perspective. The goal is to provide a step-by-step tutorial for creating and publishing a WordPress website. The class will cover the conceptual framework of Open Source and Content Management Systems (CMS) and lead into the fundamentals and tools required to build and manage a WordPress website. At the conclusion of this grind, you will be able to develop, publish, and manage your own WordPress website.

**EVM 3431 Emotionally Effective Leader (1 Credit)**

Did you know emotional and social skills are four times more important than IQ when considering success and prestige in professional settings? Emotional Intelligence (EI) can be confusing. What does it mean? Is it fluffy stuff or something really tangible? Now more than ever, employers and clients are seeking leaders who display emotionally intelligent thinking, decision making and actions. How do you know if you meet those requirements? Up until recently, EI was a "gut assessment" of someone's ability to control their emotions or care about someone or something. Now, we have a valid and reliable way of understanding our emotional intelligence and that of others. We can even measure the EI of teams! It turns out EI is quite complex. Research has distinguished 12 components of EI including: self regard, self actualization, self awareness, emotional expression, assertiveness, independence, interpersonal relationships, empathy, social responsibility, problem solving, reality testing, impulse control, flexibility, stress tolerance and optimism. Want to know how you score in these areas? EI is a "talent" that, unlike IQ, can be learned and improved throughout one's life. In the Emotionally Effective Leader Grind, you will have the opportunity to assess your own EI through a valid and reliable EI talent assessment. Revealing your strengths and weaknesses, you will learn how to build your own EI and maximize the magnitude of your impact within the organizations or teams you lead.

**EVM 3436 High Performing Teams (1 Credit)**

Success in any business venture is often predicated on the strength of collaboration in and between high performing teams. But teams also come with their own unique set of challenges that can often hinder group productivity and cause friction, such as interpersonal issues, ambiguous goals and objectives, and competing agendas. There are techniques that team and group leaders can use to alleviate those challenges in the current era of volatility, uncertainty, complexity, and ambiguity. The High Performing Teams class is for students who are eager to build their capacity to connect as leaders more effectively and learn to leverage psychological safety to create cultures of connection where risk-taking leads to team success. Together we'll explore how you can implement the latest trends in remote and hybrid team management in a post-COVID era as well as how to incorporate the principles of diversity, equity and inclusion (DEI) to improve team performance and cohesion. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3437 The Art of Branding: Design Tactics for Entrepreneurs (1 Credit)**

Join us on a journey of crafting compelling brands through a practical approach to design and strategy. This course immerses students in the brand design process, analyzing both successful and unsuccessful brand campaigns to extract valuable insights. By refining their aesthetic sensibilities, students will become adept at creating captivating designs. Leveraging cutting-edge digital technologies, students will master the creation of a brand style guide. In the final project, students will showcase their skills by developing a captivating style guide for a new or existing business, strategically positioning it in the market. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3438 How to Identify, Evaluate & Beat Your Competition (1 Credit)**

Every business has competitors, from large corporations, "main street" businesses, start-ups... they all compete for customers and market-share. Even The University of Denver competes for students. Leave The Competition Behind is for people who like to win and don't like to lose. In this class, you will study strategic frameworks and tools that you can use to identify, understand, and dissect your competitors, the levers that you can pull to beat them (like price, quality, service). We will identify and discuss front-line tactics you can use to outwork your competition. We will explore and discuss real life cases and personal stories from various industries to illustrate the key concepts used by professionals in competitive analysis and strategy. You will apply these concepts during the breakout sessions where we will take on the Media & Entertainment industry.

**EVM 3440 How to Effectively Negotiate in Business (1 Credit)**

Every day, and sometimes multiple times a day, we persuade and negotiate with people such as funders, classmates, friends, family members, potential employers, merchants, and coworkers. However, most of us know little about what it takes to be effective negotiators. This class teaches you proven methods to support your desire to reach principled agreements by broadening your basic negotiation skills. We will learn theory-driven negotiation skills, engage in simulated negotiations, and make concrete plans to conduct a future negotiation. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

**EVM 3441 How To Create A Business Startup Budget & Forecast (1 Credit)**

For many people creating and evaluating business budgets and forecasts is intimidating. This applied course is designed to demystify the subject as students study, create, and evaluate budgets and forecasts. This course will provide students tools as they create an entrepreneurial budget and forecast. In addition, you will learn about metrics that entrepreneurs, investors, and banks use to evaluate these financial materials. Along the way we will consider budgets for different types of businesses, including B2B, B2C, products, subscriptions, and services. We will cover budget topics such as unit economics, breakeven, margin analysis, customer acquisition cost, and marketing efficiency plus forecast topics like burn rates, scaling, margin creep, and north star metrics. Plus, we will touch on the basics of valuation and how budget materials relate to valuation.

**MFJS 2000 Introduction to Film Criticism (4 Credits)**

Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2001 Producing Video for Social Media (4 Credits)**

This course covers the basics in video production and video storytelling for all undergraduate students at the University of Denver who are interested in YouTube and other social media video content creation. Students will maximize their video storytelling abilities, producing storytelling content that can be shared across multiple social media platforms using mobile phones or equivalent basic consumer equipment. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills requirements within several MFJS majors and the MFJS minor and serves as a university elective.

**MFJS 3215 Introduction to Filmmaking (4 Credits)**

This course is designed to provide students with a basic understanding of television and film production with a focus on the complete production process: pre-production (planning), production (lighting, shooting and sound gathering) and post-production (editing). At the completion of this course, students will have a basic understanding of the process involved in producing a field-based production, the skills necessary to complete it and, most importantly, the critical understanding behind all decisions. Because people are the most important part of any production, emphasis will be placed on students' ability to work effectively with production team members. Laboratory fee required. Prerequisite: MFJS 2000. Restricted to FILM and MDST majors.

**MFJS 3224 Cinematography (4 Credits)**

This course focuses on the visual aspects of telling a cinematic story. Students develop an understanding of advanced lighting concepts, lenses, grip equipment, and color science. The class emphasizes visual storytelling, using lighting, art design and camera movement to develop character and theme. Lab fee required. Prerequisite: MFJS 2000 and MFJS 3215.

**MUAC 2067 Audio Practicum (1-4 Credits)**

Clinical training in audio recording and sound reinforcement for bachelor of music audio production concentration majors.

**THEA 1600 Stagecraft for Theatre (4 Credits)**

Stagecraft introduces students to the basic skills that allow us to realize the art of Theatre. Students will have the chance to learn construction, craft and design skills in the scenic and costume areas that can be applied in advanced Theatre classes, and in everyday life. Theatre technicians and artisans need breadth and problem-solving skills with a wide range of techniques and materials, and an awareness of the performance from all aspects. Having technical awareness makes all students better at what they do. 1. Learn through doing: experience the work of the theatre technician through complex hands-on projects in which the students have opportunities to work as craftsman and artist. 2. Learn and use the fundamental vocabulary and tools of design, as they apply to theatre production 3. Learn about -and experience creating- following the process that theatre technicians use to create multi-phase artistic projects. 4. Be introduced to the intersection of theatre design and theatre production as we practice it today in the profession- personnel, practices, the collaborative nature of the art form and our industry. 5. Students will learn safety practices, including personal protection equipment, fire code, safe tool handling, and environmental health and safety practices for the beginning artist. 6. Students will learn to use power tools, including saws, sanders, pneumatic tools and hand tools. 7. Students will learn techniques for hand and machine sewing. 8. Students will learn to select materials and techniques to build projects. 9. Students will plan a project from idea to scaled drawing to realizing the project using power and hand tools. 10. Students will learn painting techniques, and plan and execute a multi-step painted surface. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2880 Scene Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming scenic concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2881 Lighting Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming lighting concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2882 Costume Design I (4 Credits)**

The process of Costume Design for live performance will be explored as a unique form of artistic expression and as a collaborative process. Through a series of reading, writing, and drawing exercises as well larger multi-step design projects, students will experience the process and begin developing the skills necessary to: - read and see plays (and dance, opera, and film) as costume designers do - respond to, explore, and develop design ideas using the media, tools and techniques of costume designers - present design concepts using the graphic style(s) and language of the industry - appreciate the professional theatrical production process There will be particular emphasis on understanding and analyzing dramatic texts and interpreting characters visually in a 2D format. We will be exploring the elements and principles of design as they relate to dressing performers for the live stage. This will include an introduction to textiles and will concern itself with many production concerns, but it should be noted that this is not a sewing/construction class. The student will acquire foundational criteria for effectively processing, evaluating, and articulating their reactions to - and opinions of - theatre design and how costume affects the performance experience as a whole. The collaborative nature of performance design is a common thread running through this seminar in theatre design practice – effective teamwork and large group discussion skills are important.

**THEA 2883 Sound Design I (4 Credits)**

Exploring methods, techniques and procedures involved in transforming sound effects/sound design into actual practice.

# English and Literary Arts

Office: Sturm Hall, Room 495  
Mail Code: 2000 E. Asbury Ave. Denver, CO 80208  
Phone: 303-871-2266  
Email: CAHSS.English@du.edu  
Web Site: <https://liberalarts.du.edu/english>

The undergraduate mission of the Department of English and Literary Arts is to help fulfill the University’s commitment to provide a liberal undergraduate education and to contribute to the University’s general education program. For most of its 150-year history, the academic study of English has been the study of literatures written in this language. That is, the focus of English study includes the history, production and interpretation of literature in English with accompanying emphasis on critical reception of texts, on the diverse cultures that contextualize literary writing and on other kinds of “texts.” No single perspective dominates the study of this discipline. Recently, it has also become apparent that even predominantly English-speaking cultures are highly diverse and comprise many different cultures in different languages. In broad terms, then, the discipline of English and Literary Arts at DU includes a) the study of the history of literature in English and in English translation; b) the production of literature as a creative act; and c) the interpretation of literature within the context of aesthetics, which has a complex relationship to social, economic, cultural and political conditions. Like most English departments, we accommodate several different approaches to and emphases on the study of literature and the teaching of creative writing. However, the Department of English and Literary Arts is united in its acceptance of these three broad activities of study as aspects of our mission.

## Major Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

Minimum of 44 credits in English; maximum of 60 credits. No more than 12 credits of coursework at the 1000 level may be taken, and at least 12 credits must be taken at the 3000 level.

Students majoring in English declare one of three concentrations depending on their prospective career interests. The Department of English and Literary Arts offers the following concentrations:

### Literary Studies

This concentration is for students who wish to study the historical development of literature in English from the United Kingdom, the United States, and elsewhere. Our courses explore a wide range of texts from medieval British poetry to the postcolonial novel, and many of them also offer students the opportunity to read non-English literature in translation. This Literary Studies concentration is appropriate for students who are planning for careers in secondary education or for those intending to continue academic study in graduate school for an MA or PhD in English, though many go on to work in fields such as media, advertising, public relations, international relations, and business.

Code	Title	Credits
<b>Foundations</b>		
ENGL 1010	Introductory Topics in English <sup>1</sup>	4
<b>Core Studies</b>		<b>16</b>
16 credit hours of 2000 level ENGL coursework		
<b>Advanced Studies</b>		<b>16</b>
16 credit hours of 3000 level ENGL coursework		
<b>Electives <sup>2</sup></b>		<b>8</b>
8 hours of ENGL Electives		
<b>Total Credits</b>		<b>44</b>

<sup>1</sup> ENGL 1010: Introductory Topics in English is required for *all* English and Literary Arts majors.

<sup>2</sup> English and Literary Arts majors may count no more than twelve (12) credit hours of 1000-level ENGL courses toward the major. *This includes ENGL 1010.*

Historical Periods Distribution Requirement (please see the [Courses by Category tab](#) for coursework which meets the Historical Periods Distribution requirement)

- All majors must satisfy the department’s historical periods distribution requirement, which means that the classes above must include eight (8) credit hours of coursework that covers material prior to the year 1700, eight (8) credit hours of coursework that covers material between the years 1700 and 1900, and eight (8) credit hours of coursework that covers material from the year 1900 and beyond.

Diversity Distribution Requirement (please see the [Courses by Category tab](#) for coursework which meets the Diversity Distribution requirement)

- All majors must satisfy the department's diversity distribution requirement, which means that *at least three* of the classes above—twelve (12) credit hours—must consist primarily of international and/or ethnic literature.

#### Additional Notes

- Reminder: English and Literary Arts majors may not take more than twelve (12) credit hours of ENGL courses at the 1000 level.
- English and Literary Arts majors may not take more than sixty (60) credit hours of ENGL courses.
- In accordance with DU policy, students must earn at least a C- grade in ENGL courses in order for them to count toward the English and Literary Arts major or minor.

Code	Title	Credits
<b>Diversity Requirement for Literary Studies</b>		<b>12</b>
12 hours from the following. These courses will also count toward major requirements.		
ENGL 2004	Magical Realism in Literature and Cinema	
ENGL 2061	Global Modernisms	
ENGL 2070	Postcolonial Literature and Theory	
ENGL 2104	The Bible as Literature	
ENGL 2110	The African Imagination	
ENGL 2130	World Literature	
ENGL 2302	19th Century British Literature and the Empire	
ENGL 2350	Early Globalisms	
ENGL 2544	Globalization and Cultural Texts	
ENGL 2715	Native American Literature	
ENGL 2717	African American Writers	
ENGL 2718	Latina/o Literature	
ENGL 2722	Asian American Contemporary Literature: Fiction and Nonfiction	
ENGL 2741	American Jewish Literature: Immigrant Fiction	
ENGL 2742	Modern Hebrew Literature in Translation: Against All Odds	
ENGL 2743	Jewish Humor: Origins and Meaning	
ENGL 3017	Travel Writing-Fiction & Fact	
ENGL 3320	Oral Literature and Orality in Literature	
ENGL 3405	Postmodern Visions of Israel	
ENGL 3743	Modern Jewish Literature	
ENGL 3744	African American Literature	
ENGL 3826	Latinx Cultural Studies	

#### Creative Writing

This concentration is ideal for students who wish to produce original compositions in poetry, fiction, non-fiction, or translation, while being advised and mentored by practicing writers who work in these literary forms. The Creative Writing concentration combines the traditional study of literary texts and critical theory with the praxis of creative literary expression and is ideal for students who plan to seek an MFA in creative writing or Ph.D. in English. Many of our graduates also find work in fields such as media, advertising, public relations, international relations, and business.

Code	Title	Credits
<b>Foundations</b>		
ENGL 1000	Introduction to Creative Writing <sup>1</sup>	4
ENGL 1010	Introductory Topics in English <sup>2</sup>	4
<b>Core Studies</b>		
4 credits of Creative Poetry		4
ENGL 2001 or ENGL 2002 or ENGL 2003	Creative Writing-Poetry	
And		
4 credits of creative fiction		4
ENGL 2010 or ENGL 2011 or ENGL 2012	Creative Writing-Fiction	

or ENGL 2013	Creative Writing-Fiction	
An additional 8 credits of 2000 level ENGL coursework.		8
<b>Advanced Studies</b>		<b>16</b>
• 16 credit hours must be taken at the 3000-level. • At least 4 of these Advanced Studies credit hours must be an advanced workshop in creative writing (e.g., ENGL 3002, 3011, 3013, 3015).		
<b>Electives</b> <sup>3</sup>		<b>4</b>
Four credits of additional ENGL coursework		
<b>Total Credits</b>		<b>44</b>

1. ENGL 1000: Introduction to Creative Writing is required for all English and Literary Arts majors *who select a concentration in Creative Writing*.
2. ENGL 1010: Introductory Topics in English is required for *all* English and Literary Arts majors.
3. English and Literary Arts majors may count no more than twelve (12) credit hours of 1000-level ENGL courses toward the major. *This includes ENGL 1010 and 1000.*

*Historical Periods Distribution Requirement* ([please see the Courses by Category tab for coursework which meets the Historical Periods Distribution requirement](#))

- All majors must satisfy the department's historical periods distribution requirement, which means that the classes above must include eight (8) credit hours of coursework that covers material prior to the year 1700, eight (8) credit hours of coursework that covers material between the years 1700 and 1900, and eight (8) credit hours of coursework that covers material from the year 1900 and beyond.

*Diversity Distribution Requirement* ([please see the Courses by Category tab for coursework which meets the Diversity Distribution requirement](#))

- All majors must satisfy the department's diversity distribution requirement, which means that *at least three* of the classes above—twelve (12) credit hours—must consist primarily of international and/or ethnic literature.

#### *Additional Notes*

- Reminder: English and Literary Arts majors may not take more than twelve (12) credit hours of ENGL courses at the 1000 level.
- English and Literary Arts majors may not take more than sixty (60) credit hours of ENGL courses.
- In accordance with DU policy, students must earn at least a C- grade in ENGL courses in order for them to count toward the English and Literary Arts major or minor.

## English Education

This concentration is for students who wish to teach English language and literature at the secondary school level.

Please note: Students who want to receive teaching certification upon completion of the BA or to go on for the dual degree option in teacher education must complete all requirements for this concentration by the end of the junior year with a minimum grade point average of 3.0. In their senior year, these students must complete the 40-hour Teacher Education Program. We highly recommend that students in English education confer with the Morgridge College of Education's teacher education department for its recommendations on additional areas students might want or need to cover in their English major.

*Foundations (1000-level courses): Eight (8) credit hours*

- Introductory Topics in English (ENGL 1010): Four (4) credit hours
- Introduction to Creative Writing or Art of Fiction, Poetry, or Drama (e.g., ENGL 1000, 1006, 1007): Four (4) credit hours

*Shakespeare: Four (4) credit hours*

- Examples of such courses include ENGL 2221, 2220.

*English Grammar or History and Structure of the English Language: Four (4) credit hours*

- Examples of such courses include ENGL 2026, 3813.

*Intermediate Creative Writing or Literary Interpretation: Four (4) credit hours*

- Examples of such courses include ENGL 2001, 2010, 2825, 3823

*Core Studies (2000-level courses): Twelve (12) credit hours, in addition to the required Shakespeare, English Grammar/History, and Creative Writing/Literary Interpretation courses above*

*Advanced Studies (3000-level courses): Twelve (12) credit hours, in addition to the required English Grammar/History and Creative Writing/Literary Interpretation courses above*

*Historical Periods Distribution Requirement* ([please see the Courses by Category tab for coursework which meets the Historical Periods Distribution requirement](#))

- All majors must satisfy the department's historical periods distribution requirement, which means that the classes listed above must include at least eight (8) credit hours of coursework that covers material prior to the year 1700 (note: the Shakespeare course above does count toward 4 of these credits); eight (8) credit hours of coursework that covers material between the years 1700 and 1900; and eight (8) credit hours of coursework that covers material from the year 1900 and beyond.

*Diversity Distribution Requirement* ([please see the Courses by Category tab for coursework which meets the Diversity Distribution requirement](#))

- All majors must satisfy the department's diversity distribution requirement, which means that *at least three* of the classes above—twelve (12) credit hours—must consist primarily of international and/or ethnic literature.

*Additional Notes*

- English and Literary Arts majors may not take more than twelve (12) credit hours of ENGL courses at the 1000 level. *This includes English 1010 and the other required 1000-level course above.*
- English and Literary Arts majors may not take more than sixty (60) credit hours of ENGL courses.
- In accordance with DU policy, students must earn at least a C- grade in ENGL courses in order for them to count toward the English and Literary Arts major or minor.

## Secondary Major

### Secondary Major

44 credits. Same requirements as for BA degree.

# Minor

## Minor Requirements

Students minoring in English must take a minimum of twenty-four (24) credits in English. No more than eight (8) credits may be taken at the 1000 level. At least one course (4 credits) must be from the list of Diversity Distribution courses ([please see the Courses by Category tab for coursework which meets the Diversity Distribution requirement](#)).

Please note that a maximum of twelve (12) hours of transfer or study abroad credit can count toward the English minor. At least twelve (12) credits must be taken at DU.

All transfer and study abroad courses must be approved by the Director of Undergraduate Studies in English and Literary Arts.

Please note that ENGL 2021: Business and Technical Writing and any course in which a student earns lower than a grade of C- will not count toward the English minor.

## Requirements for Distinction in the Major in English and Literary Arts

- English and Literary Arts majors who are required to write a thesis for the University Honors Program or who wish to write a thesis for distinction in the major must:
- Earn a GPA of at least 3.5 in the English and Literary Arts major.
- Fill out the Statement of Intent form.

*This Statement of Intent form is available on the department's Portfolio site and must be completed by the student in consultation with the student's faculty thesis advisor. (The thesis advisor need not be the student's academic advisor.) This form must be submitted to the Director of Undergraduate Studies in English by the end of Week nine (9) of the spring quarter of the junior year.*

- Complete the following courses.

*Students who wish to write a critical thesis must complete ENGL 3800: Bibliography & Research (offered in the fall quarter of each year). Students who wish to write a creative thesis must complete at least two (2) Advanced Creative Writing workshops. (Note: Students concentrating in Literary Studies who wish to write a creative thesis must also complete all prerequisites for these Advanced Creative Writing courses.)*

- Write a thesis during the Fall and Winter quarters of the senior year.

*The thesis may take the form of a 40–50-page research essay or a creative project of a length to be determined by the student and the faculty thesis advisor. Each thesis will be read by the student's faculty thesis advisor and one other English faculty member. (Students are responsible for securing their own thesis advisors and second readers.) Written reports and recommendations for distinction from both readers will be returned to the student by week six (6) of the spring quarter of the senior year.*

- Submit a final copy of the thesis with all required revisions and corrections to the Director of Undergraduate Studies in English by week nine (9) of the spring quarter of the senior or final year.

Please contact the Director of Undergraduate Studies (Graham.Foust@du.edu) with any questions.

## BA in English and Literary Arts

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

#### **ENGL 1000 Introduction to Creative Writing (4 Credits)**

Basic techniques of fiction and poetry.

#### **ENGL 1006 Art of Fiction (4 Credits)**

An introduction to the appreciation of fiction as an art form through practice in interpretation and creation.

#### **ENGL 1007 Art of Poetry (4 Credits)**

An introduction to the appreciation of poetry as an art form through practice in interpretation and creation.

#### **ENGL 1008 Art of Drama (4 Credits)**

An introduction to the appreciation of drama as an art form through practice in interpretation and creation.

#### **ENGL 1009 Art of Creative Non-fiction (4 Credits)**

An introduction to the appreciation of creative non-fiction as an art form through practice in interpretation and creation.

#### **ENGL 1010 Introductory Topics in English (4 Credits)**

Various topics in literary studies approached at the introductory level.

#### **ENGL 1110 Literary Inquiry (4 Credits)**

Literary Inquiry introduces students to the variety of ways that poetry, fiction, and/or drama expand our understanding of what it means to be human. Topics vary to engage students in the rewarding process of interpreting the literary art form as a unique cultural expression. This course counts toward the Analytical Inquiry: Society and Culture requirement.

#### **ENGL 1200 International Short Fiction (4 Credits)**

This class considers masterpieces of short fiction—stories and novellas—from around the world. Various linguistic communities, national traditions, and historical periods are represented through a wide-range of global texts. One goal of this course is synchronic: to identify significant themes, techniques, and conventions appearing in both western and non-western literary traditions. A second goal of this course is diachronic: to identify key developments in the forms of short fiction. Significant theoretical models are presented to provide a thorough overview of the concept of "world literature" and its associated problems.

#### **ENGL 1988 Study Abroad Resident Credit (0-18 Credits)**

#### **ENGL 2001 Creative Writing-Poetry (4 Credits)**

Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

#### **ENGL 2002 Creative Writing-Poetry (4 Credits)**

Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

#### **ENGL 2003 Creative Writing-Poetry (4 Credits)**

Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

**ENGL 2004 Magical Realism in Literature and Cinema (4 Credits)**

This course examines the relationships between human groups and their sociocultural environments through the conjunction of history and alternative ways of seeing/being or magical realism. Our study is region-specific in sociocultural details as well as global in scope and involves the exploration of magical realism as a technique in literature and cinema.

**ENGL 2010 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2011 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2012 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2013 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2020 Studies in Non-Fiction (4 Credits)****ENGL 2021 Business Technical Writing (3,4 Credits)**

Course open to Colorado Women's College students only.

**ENGL 2026 English Grammar (4 Credits)****ENGL 2031 Poetry Since 1945 (4 Credits)****ENGL 2035 History of Genre-Poetry (4 Credits)****ENGL 2036 History of Genre-Fiction (4 Credits)****ENGL 2040 Introduction to Publishing (4 Credits)**

Through lectures and field trips, students will learn how books get published - with all the steps involved. Cross listed with ENGL 3040, MFJS 3140.

**ENGL 2060 Modern and Postmodern Literature (4 Credits)**

This course will introduce students to two key movements in 20th century literary culture: modernism and postmodernism. Dealing in distinct but related ways with pervasive crises of modernity, these movements continue to exert a tremendous influence over literary culture in the present. In the realms of media and technology, politics, gender and sexuality, among others, modernism and postmodernism both reflected and helped usher in an age of relentless change. While covering this broad terrain, the course will have a different thematic focus each year. Contact the instructor or the Department of English and Literary Arts for details.

**ENGL 2061 Global Modernisms (4 Credits)**

This course examines the nature of global modernisms with examples from different countries or regions and from at least three perspectives: race and gender; markets and empires; and modernism and mass culture. From both a stylistic and thematic point of view, the course also explores the links between some avant-garde movements (such as Cubism, Futurism, Dadaism, Expressionism) and modernism as well as connections between modernism and postmodernism.

**ENGL 2070 Postcolonial Literature and Theory (4 Credits)**

An examination of the phenomenon of postcolonialism, taking into account the ways in which it has been conceptualized. Key interests include the contexts of imperialism and decolonization as well as critical readings of pertinent literature.

**ENGL 2090 20th/21st Century City Novels (4 Credits)**

How do we imagine cities? What do cities, in turn, do to our collective imaginations of belonging, to our sense of self, to our images of the future? The history of 20th and 21st century novels is often the history of how the city is imagined in prose. As new technologies, new ways of connecting, and new flows of money and goods resulted in massive growth of cities from the late 19th century on, how did literature reshape itself in response to the increasing pressure of mass information, and of new forms of imagining the life of the community? Students in this course will encounter the breadth of literature since 1900, with a geographical focus on Britain. Conceptually, the course will focus on how changing modes of urban life alter literary fiction, ideas of subjectivity, and modes of belonging across the century.

**ENGL 2100 English Literature I: Beowulf-Spenser (4 Credits)**

A survey of English literature from the earliest extant texts through works written in the late 16th century, ending with Spenser. Its purpose is to give students a historical grasp of the development and continuity of English literature during the Middle Ages and the 16th century. Old English and most Middle English texts will be read in translation, but Chaucer and Middle English lyrics will be read in the original.

**ENGL 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.

**ENGL 2110 The African Imagination (4 Credits)**

Focusing mainly on Africa, this course explores and connects aspects of the African imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into African aesthetics from a continental and an interdisciplinary perspective. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2120 Chaucer-Selected Poetry (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2130 World Literature (4 Credits)**

A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world—such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2200 English Literature II: Donne-Johnson (4 Credits)**

This course explores the literatures of the 17th and 18th centuries. This 200-year period marks England's transition from a medieval, relatively static society bound by hierarchy, religion and shared cultural values into a restless early-modern society of cities, social mobility, civic unrest, colonies and cosmopolitanism. Students work on understanding genres and styles, the basics of scansion, and the terminologies, methods and ideologies of literary criticism. The course is divided into generic categories.

**ENGL 2202 Renaissance Poetry & Prose (4 Credits)****ENGL 2221 Shakespeare Seminar (4 Credits)**

This course traces Shakespeare's development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2230 Shakespeare and Film (4 Credits)**

An examination of film adaptation and staging of Shakespeare's plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2300 English Literature III (4 Credits)**

A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2302 19th Century British Literature and the Empire (4 Credits)**

The coronavirus pandemic has intensified our focus on globalization, giving renewed urgency to matters such as human rights, racism, migration, citizenship, hospitality, and cultural difference. This course approaches these questions by looking at various reflections on globalization and "empire." While reading literary works in the nineteenth century, when the British empire extended its reach and control over literally every time zone, we also put them in dialogue with contemporary reports, databases, and fiction. We ask: How did nineteenth-century British and Anglophone authors react to issues directly relevant to and caused by imperial expansion and globalization? And how have their reflections shaped the way we think about power and inequality today? Apart from writers frequently taught in courses on British literature, we will also read British authors who are, ironically, often not classified under "British" (such as Mary Prince, an abolitionist born a slave in Bermuda, and Mary Seacole, also a woman of color, who traveled widely and served as a military nurse during the Crimean War). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2311 English Novel to 1800 (4 Credits)****ENGL 2350 Early Globalisms (4 Credits)**

A study of the commonalities and connections among cultures and texts across the world from the medieval and early modern periods. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2401 Blake, Wordsworth and Contemporaries (4 Credits)**

The first generation of British Romantic writers came of age during a time of revolution (American, French, Haitian). The inheritors of radical eighteenth-century ideas about natural rights, the first-generation Romantics found optimism in human feeling as well as human reason. They believed that the capacity for sympathy and lyrical transport would lead to a new, benevolent society, but their belief in social progress was checked by revolutionary violence and the rise of a hyper-rationalism that seemed more dangerous than the superstition it was meant to replace.

**ENGL 2402 Later Romantics (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2544 Globalization and Cultural Texts (4 Credits)**

The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)**

Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonialization to the Civil War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2703 Topics in English: International Literature (1-4 Credits)**

Topics in literature reflecting an array of trends, aesthetic movements, historic periods, and discursive forms of International literary discourse produced by authors from outside the USA and the United Kingdom. These topics courses will count toward the diversity/distribution attribute within the English major curriculum.

**ENGL 2704 Topics in English: Ethnic American Literature (1-4 Credits)**

Topics in literature reflecting an array of trends, aesthetic movements, historic periods, and discursive forms focused on ethnic American literary discourse. These courses count toward the diversity/distribution attribute within the English curriculum.

**ENGL 2705 Literature of the American South (4 Credits)**

An introductory course on the literature emanating from the American south. Texts may include fiction, poetry, drama, and non-fiction primarily spanning the 18th through the 21st century.

**ENGL 2706 Writing the American West (4 Credits)**

An introductory course on the literature emanating from the American west. Texts may include fiction, poetry, drama, and non-fiction spanning the 19th through the 21st century.

**ENGL 2707 Contemporary Literature (4 Credits)**

The course surveys contemporary books. The novel has never been a coherent genre, but especially since the 1960s its features, in some practitioners, have begun to resemble history, anthropology, poetry, science writing, or all of these. The course will include readings from Asia, South America, Europe and North America.

**ENGL 2708 Topics in English (1-4 Credits)****ENGL 2709 Topics in English (1-10 Credits)****ENGL 2710 American Novel-19th & 20th Century (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2711 20th Century American Fiction (4 Credits)**

Students read, evaluate and discuss the genre of the American immigrant novel. Topics include how this is a uniquely American literary form and what it says about life in America; the similarities and differences in how ethnic groups understand their experiences; how language and narrative techniques are used to convey the life of a new immigrant; how the experiences of men and women differ; how the immigrant novel has evolved as a literary genre. The readings will be analyzed as a means to consider how the immigration novel in America became a genre that expressed a variety of topics related to the American experience. The class will consider how these works helped to shape and define what it meant to be an American, and how that definition has changed over the last 100 years.

**ENGL 2712 American Short Story (4 Credits)**

Wide range of American short stories, quintessential American genre, from the early 19th century to present.

**ENGL 2715 Native American Literature (4 Credits)**

Native American Literature explores the relationships between contemporary Native American narratives and Native American oral traditions. We will examine the intellectual underpinnings of Native American literary expressions, focusing on tribally specific Native American concepts of language, perception, and process in relation to Native cultural and political survival. This course aims to celebrate Native American cultural expression through lectures and discussion, group work and intellectual exercises.

**ENGL 2716 American Poetry (4 Credits)**

This course examines American poetry by way of historical, thematic, and/or formalist approaches. Possible topics could include: post-WWII poetry, the New York School, Self and Other in American Poetry, Language poetry, etc.

**ENGL 2717 African American Writers (4 Credits)**

Defines, describes and analyzes the African-American aesthetic.

**ENGL 2718 Latina/o Literature (4 Credits)**

This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2719 The Harlem Renaissance (4 Credits)**

This course focuses on the flowering of African American literature, art, and music in the early 1900s known as the Harlem Renaissance. Referencing the works of artists, we explore the historical context, nature, and impact of the Harlem Renaissance. In examining racial consciousness and literary production during this era, the course emphasizes the study of representative African American writers.

**ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)**

This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it's for, and its forms and aesthetics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2730 Borderlands Literature (4 Credits)**

This course introduces students to literature and stories about regions and spaces defined by borders, especially the U.S.-Mexico borderlands. The course engages with narratives that map the flows and fortifications of people and commodities, interrogate the politics of immigration, navigate the disputes over natural resources, and/or feature different contact zones or forms of encounter.

**ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)**

This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.

**ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)**

This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2742.

**ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)**

Writers, scholars, and comedians all claim to locate an identifiable strain of "Jewish humor" running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of "Jewish humor" in American from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with JUST 2743.

**ENGL 2744 Native Americans and Indigenous Peoples in Film (4 Credits)**

In this class we will be examining a wide range of representations of native American and indigenous culture, history, and society as presented through the medium of modern cinema. We'll begin with some documentary filmmaking and critical texts to help build a foundation of applicable knowledge to assist us in formulating our critical engagements, before diving into what was one of the most influential genres in shaping perceptions of native peoples: the classic Western. From here we'll explore subsequent films increasingly positioned outside the Western genre that strived (although not always succeeding) to represent native peoples and cultures in more accurate, sensitive, and nuanced ways. These studies will lead us into the realms of filmmaking in which native and indigenous people began to assert authority and representational control over their own cinematic portrayals. First through acting, and then through the realms of writing, directing, and producing—and ultimately with native and indigenous viewers as the implied audiences. Throughout this course, we will critically view and analyze the various ways in which native American and indigenous people have been portrayed through numerous cinematic genres and forms, with attention to relevant historical, political, and social issues and contexts. This will entail a consideration of the nature of cinematic images, while thinking about the influence they exert on societal attitudes and historical understandings of native and indigenous peoples and cultures. A portion of the course we will also be dedicated to comparative representations of indigenous (Aboriginal, Māori, and First Nations) cultures in Australia, Aotearoa (New Zealand), and Canada. Of particular interest to this class will be the production and reification of prominent native/indigenous tropes, metaphors, and stereotypes, such as the conceptions of primitive culture, the binary of the noble and the bloodthirsty savage, and the romanticized figures of the so-called ecological and spiritual Indian. We will examine how these stock figures influence how native/indigenous peoples are perceived in historical and literary discourses, as well as in popular culture—while having opportunities to listen to songs and consider music videos as another site where such representations clash and merge with traditions and modern forms through their lyrical and imagistic content. Pulling back for the wide-angle shot, as it were, we will seek answer questions concerning cultural contestation and power, the relationship between film and historical and literary production, representations of the Other, cultural fetishism/colonialism, and the semiotics of popular culture.

**ENGL 2750 American Literature Survey I (4 Credits)**

First part of American survey; introduction to major authors and genres.

**ENGL 2751 American Literature Survey II (4 Credits)**

Second part of American survey; further examination of major authors and genres.

**ENGL 2752 American Literature Survey III (4 Credits)**

A survey of American literature, including representative works of fiction, poetry and drama from the 1930s to the present.

**ENGL 2815 Studies in Rhetoric (4 Credits)****ENGL 2816 Advanced Writing (4 Credits)**

This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student's choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2820 Philosophy and Literature (4 Credits)**

Hermeneutics, sometimes called "the art of interpretation," offers us the opportunity to explore strategies of engagement and exegesis that seeks to observe, question, and celebrate the ways in which we read and write the world. By bringing critical and creative inquiry to bear on the event of interpretation itself we can consider the ethical implications of how we deal with our individual identities as well as our collective, national, and global identities. In this course we pose big questions—What are we talking about when we talk about existence? What does it mean to have a body? How does desire and memory construct history and identity? Walking these questions through a variety of literary and philosophical texts and artistic lenses, we consider how "the creative" (writing, the literary) performs, becomes, and is "the critical" and vice-versa. Students should be prepared to write, read, and participate in discussion.

**ENGL 2825 Cultural Criticism (4 Credits)**

This course will introduce students to some of the major moments in the development of cultural studies and will show how the discipline "works" to make sense of culture at large. Cross listed with ENGL 3825.

**ENGL 2830 Representations of Women (4 Credits)**

Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with GWST 2830.

**ENGL 2845 Politics and Literature (4 Credits)****ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)**

This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by a range of diverse writers from Plato and Thomas More, to Charlotte Perkins Gilman, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Albert Camus, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, Claire G. Coleman, etc. \*In some years this course may count for international literature under the diversity/distribution attribute in the English curriculum. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2855 Speculative Fiction (4 Credits)**

This course explores topics in speculative fiction. Speculative fiction encompasses a wide range of genres, contexts, and forms, from science fiction to alternative history to futurity. Topics might include apocalypse, cyberpunk, space-time, revolution, new communities, cyborgs and robotics, worldmaking, Afrofuturism, Chicanafuturism, or theories of possibility in different forms of fiction. All ask us to consider the role of imagination and speculation in fiction. Each iteration of this course will be designated with a specific topic, repeatable only under a new topic.

**ENGL 2980 Internship in English (1-5 Credits)**

This course provides academic credit for off-campus internships in fields related to the English major. One paper is required at the end, articulating how the internship complemented the student's studies in English. Requires approval by director of undergraduate studies in English.

**ENGL 2988 Study Abroad Resident Credit (0-18 Credits)****ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3013 Adv Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3015 Advanced Creative Writing: Non-Fiction (4 Credits)****ENGL 3017 Travel Writing-Fiction & Fact (4 Credits)**

A study of European, American and other narratives of travel. This course examines relevant postcolonial and literary theories of travel and nationhood.

**ENGL 3040 Introduction to Publishing (4 Credits)**

Cross listed with ENGL 2040, MFJS 3140.

**ENGL 3121 Chaucer: Canterbury Tales (4 Credits)**

Life, culture, language and literary trends of Chaucer's age as reflected in "The Canterbury Tales".

**ENGL 3320 Oral Literature and Orality in Literature (4 Credits)**

The term "oral literature" generally refers to narratives and poems (including songs) performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational 'text' of written literature. The questions that we explore in this course include: How did oral literature develop, and what are the characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature and also study the use of orality in written literature. Our studies involve the examination of material and texts from different parts of the world.

**ENGL 3402 Early Romantics (4 Credits)****ENGL 3405 Postmodern Visions of Israel (4 Credits)**

This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual "multiverses." A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.

**ENGL 3525 Sexuality and Textuality (4 Credits)**

This course explores literary, cultural, and theoretical texts that question and challenge concepts of gender and sexuality. Topics include gender roles and expectations, gender performance, the body, pleasure/desire, subject-object dynamics, queer and trans identities, and/or resistance to the normative. Particular attention will be given to texts and theories that intersect issues of gender and sexuality with questions of race, ethnicity, and marginalized subjectivities.

**ENGL 3550 The Literature of Dissent in New England (4 Credits)**

This course investigates writings related to various forms of dissent in New England, from 1630 to 1860. It focuses on moments of crisis such as the Antinomian Controversy, the Salem witchcraft trials, the Great Awakening, the Miracles Controversy, and the reaction to the Compromise of the 1850, among others. Related topics include the development of individualism, the lives and roles of early American women, the presence and influence of slavery on conceptions of reform, and the role of religion in the formation of political and social dissent.

**ENGL 3600 American Romantics and Radicals, 1820-1865 (4 Credits)**

This course covers the period of religious, philosophical, social, and political reform that runs from 1820 to the beginning of the Civil War. Focus will be on romantic ideas about nature, self-reliance, etc., as well as the contexts that surround and nurture these ideas, such as utopian social reform, the women's rights movement, abolition, temperance, and various health movements. Authors include Ralph Waldo Emerson, Henry David Thoreau, Nathaniel Hawthorne, Margaret Fuller, Frederick Douglass, and others.

**ENGL 3601 Literature of the Civil War (4 Credits)**

Historically based survey of literature related to the American Civil War. Includes works by such authors as Harriet Beecher Stowe, Frederick Douglass, Walt Whitman, Herman Melville, Emily Dickinson, Louisa May Alcott, and others.

**ENGL 3602 American Realism and Naturalism, 1860-1920 (4 Credits)**

This course addresses the period of post-Civil War American writing characterized by aesthetic theories that react against Romanticism and attempt to incorporate scientific (particularly Darwinian) thinking into artistic representation. It will present the development of these approaches in the historical contexts of Reconstruction, the Gilded Age, and the Progressive Era. Authors will include Mark Twain, Henry James, Frank Norris, Stephen Crane, William Dean Howells, Charles Chesnutt, Kate Chopin, Sarah Ornes Jewett, and others.

**ENGL 3618 20th Century British Literature (4 Credits)**

This course will explore the dramatic changes in culture and society that took place between the death of Queen Victoria and the start of the new millennium. The twentieth century transformed Britain from the center of a commercial and military Empire "on which the sun never set" to a multicultural island nation coming to terms with its colonialist past and seeking to redefine its place in the world. The same period also saw continual redefinitions of the concept of Britishness as the outcome of struggles over women's rights, anticolonial and antiracist movements, LGBTQ+ activism, and workers' demand for better conditions and the right to organize. These social changes emerged simultaneously with transformative effects of new media and transportation technologies.

**ENGL 3703 Advanced Topics in English: International Literature (1-4 Credits)**

Advanced topics in literature vary reflecting an array of specialized trends, aesthetic movements, historic periods, and discursive forms of international literary discourse produced by authors outside the USA and the United Kingdom. These advanced studies topics courses will count toward the diversity/distribution attribute within the English curriculum.

**ENGL 3704 Advanced Topics in English: Ethnic American Literature (1-4 Credits)**

Advanced topics seminars in literature reflecting an array of trends, aesthetic movements, historic periods, and discursive forms of ethnic American literary discourse. These courses will count toward the diversity/distribution attribute within the English major curriculum.

**ENGL 3706 Writing the American West (4 Credits)**

Explores historical and contemporary writing produced in and about the American West.

**ENGL 3707 Posthumanism: Androids, Cyborgs, A.I. & the Future of Humanity (4 Credits)**

As the term "posthumanism" suggests, the consideration of what may come 'after' or exist 'beyond' the conventional understanding of what it means to be human lies at the center of this emergent critical perspective. The literary and philosophic engagement with the complicated set of ideas around these questions call for a reevaluation of the notion of the corporeal human subject and a reconsideration of the limits of the human mind. Posthuman thought shifts the focus to a consideration of the ways in which embodiment and thinking are positioned in relation to technological advancements in fields as disparate as robotics, cybernetics, and artificial intelligence to bioengineering and genetics. Given the issues under consideration, ideas emerging from sci-fi, speculative fiction, cyberpunk and contemporary philosophy have long been at the center of posthumanism, while also reflecting in classic works from Pliny's *Historia Naturalis*, Julien Offray de La Mettrie's *L'homme Machine* (Man a Machine) and Mary Shelley's *Frankenstein*, as well. Drawing on such a discursive foundation of works from around the world, our primary focus will be on texts produced by writers, thinkers and artists who best expand the possibilities and questions at the center of posthumanism, including Karel Čapek, Isaac Asimov, Stanisław Lem, Philip K. Dick, William Gibson and Shirov Masamune and Kazuo Ishiguro, with Hajime Sorayama, Donna J. Haraway, Manuel De Landa and N. Katherine Hayles. From this provocative (and evocative) foundation, this course will explore some of the most vital questions emerging out of posthumanism from innovations in robotics, computer technology and artificial intelligence, to ongoing developments in genetic modification, biomechanics, astrobiology and transgenic art.

**ENGL 3711 20th-Century American Fiction (4 Credits)**

Fiction, poetry, drama, and non-fiction on selected themes by 20th and 21st century American writers. Topics for study may include issues related to regionalism, ethnicity and gender, as well as specific social and historical concerns.

**ENGL 3730 Literature and Medicine: Addiction and Modernity (4 Credits)**

This course introduces students to accounts of substance use and addiction from the nineteenth century through the present day. We will examine canonical and contemporary literary texts, medical writings, visual representations, smartphone applications, and films alongside topics such as liberalism, inequality, imperial expansion, consumerism, "digital drugs," and the pathologization of addiction. We will consider our readings in light of the following questions: What role do substance use and addiction play in constructing the modern self and society? What can representations of addiction teach us about our relationship with the external world? How does addiction act as a metaphor, a narrative device, or even a political sign? How do gender, class, and race affect narratives of addiction? How do accounts of addiction interact with philosophical texts, medical treatises, and imperial and colonial discourses? In addition to writing critical essays, students will evaluate smartphone addiction treatment apps and devise a creative project on a topic relevant to this course.

**ENGL 3731 Topics in English (1-4 Credits)****ENGL 3732 Topics in English (1-4 Credits)****ENGL 3733 Topics in English (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**ENGL 3742 Jesus in Jewish Literature (4 Credits)**

This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus' life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as JUST 3742.

**ENGL 3743 Modern Jewish Literature (4 Credits)**

Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

**ENGL 3744 African American Literature (4 Credits)**

This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

**ENGL 3800 Bibliography/Research Method (4 Credits)****ENGL 3803 Modernism/Postmodernism (4 Credits)****ENGL 3813 History and Structure of the English Language (4 Credits)**

A composite course studying both the structure of modern English and the history of the English language.

**ENGL 3815 Studies in Rhetoric (4 Credits)**

This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

**ENGL 3817 History of Rhetoric (4 Credits)****ENGL 3818 Composition Theory (4 Credits)****ENGL 3819 Old English (4 Credits)**

This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 3200.

**ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)****ENGL 3822 Literary Criticism: 20th Century (4 Credits)**

Critical methods and philosophies of 20th-century critics; their relationship to traditions.

**ENGL 3823 Interpretation Theory (4 Credits)****ENGL 3825 Cultural Criticism (4 Credits)**

Cross listed with ENGL 2835.

**ENGL 3826 Latinx Cultural Studies (4 Credits)**

This course introduces students to cultural texts and theories by U.S. Latinx subjects and asks students to consider various forms of cultural and critical methodologies.

**ENGL 3852 Topics in Poetics (4 Credits)****ENGL 3900 Senior Seminar (4 Credits)**

The Senior Seminar is a deep, investigative course that takes students into a specific, usually narrow topic within a subject field. Such courses emphasize the further, more complex application of skills introduced in the department's "Introduction to the Major" course. Faculty are encouraged to develop connections between theory and practice and provide an intense, challenging intellectual experience for senior English majors. Students should have taken ENGL 1010 and be in their final year of study before taking this course.

**ENGL 3982 Writers in the Schools (2,4 Credits)**

This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.

**ENGL 3988 Study Abroad Resident Credit (0-18 Credits)****ENGL 3991 Independent Study (1-17 Credits)****ENGL 3995 Independent Research (1-10 Credits)**

## Finance

Office: Daniels College of Business, Room 555

Mail Code: 2101 S. University Blvd. Denver, CO 80208

Phone: 303-871-3322

Web Site: <https://daniels.du.edu/finance/bachelors/>

The program in finance is a broad area of study directed toward the financial elements of business organizations, focusing on investments, corporate finance, financial institutions and international finance. Courses in these areas prepare students for careers in business finance, investments, financial institutions, and wealth management.

## Major

### Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 102))

Minimum of 36 credits. Requirements include the following:

Code	Title	Credits
<b>Required Courses</b>		
FIN 3110	Financial Institutions	4
FIN 3200	Corporate Financial Problems	4
FIN 3300	Investments	4
FIN 3410	Multinational Financial Management <sup>1</sup>	4
ACTG 3220	Understanding Financial Statements	4
<b>16 hours of 3000-level FIN electives</b>		<b>16</b>
<b>Total Credits</b>		<b>36</b>

<sup>1</sup> Finance majors completing a double major in International Business will have FIN 3410 count toward their International Business major requirements only. Select an approved course substitution for Finance major requirements in consultation with a Daniels advisor.

<sup>2</sup> If pursuing the CFP® Certification Financial Planning Education Program, take the following courses as part of FIN electives:

- FIN 3030 Personal Finance (4 credits)
- FIN 3060 Life Cycle Financial Planning (4 credits)
- FIN 3090 Wealth Management (4 credits)

## Minor

### Minor Requirements

The Finance minor is available only to students pursuing a major in the Daniels College of Business.

16 credits, including the following:

Code	Title	Credits
<b>Required Courses</b>		
FIN 3110	Financial Institutions	4
FIN 3200	Corporate Financial Problems	4
FIN 3300	Investments	4
<b>Elective</b>		
Any 3000-level FIN elective <sup>1</sup>		4
<b>Total Credits</b>		<b>16</b>

- <sup>1</sup> Some Finance courses have additional prerequisites.  
 International Business majors pursuing a minor in Finance cannot count FIN 3410 toward both major and minor requirements simultaneously.  
 Instead, a different FIN prefix course will be required for this elective.

### Requirements for Distinction in the Major in Finance

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

### Finance

This course plan is a sample schedule. Individual course plans will vary based on incoming transfer credit, prerequisites, restrictions (e.g., the requirement that students have sophomore-level standing/having earned 45 credits to enroll), availability of courses, minors, and other scheduling factors. Please meet with your Daniels academic advisor in year 2 to develop an individual graduation plan for your specific needs.

- <sup>1</sup> MATH 1200 or MATH 1951 fulfill requirements for Analytical Inquiry: The Natural and Physical World.
- <sup>2</sup> Common Curriculum Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreessanddegreerequirements/>): Students are encouraged to complete Language and Scientific Inquiry: The Natural and Physical World sequences earlier in their studies; choose one for year 1 and the other for year 2.
- <sup>3</sup> Complete Analytical Inquiry: Society & Culture and Scientific Inquiry: Society & Culture requirements. ECON 1020 is required for all Business majors, and this course fulfills half the requirements for Scientific Inquiry: Society and Culture.
- <sup>4</sup> INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad and may be taken in any quarter within the year prior to studying abroad. If you are not an international student and you are not studying abroad, your required FIN 3410 course as part of your major in Finance will fulfill the Student International Experience Requirement (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>).
- <sup>5</sup> A broad range of Finance major courses could be completed in a variety of fall, winter, or spring quarters. Please check for prerequisites, corequisites, and restrictions when selecting course options each term. If pursuing CFP® Certification Financial Planning Education Program, take the following Finance major electives: FIN 3030 Personal Finance, FIN 3060 Life Cycle Financial Planning, and FIN 3090 Wealth Management.
- <sup>6</sup> In year 1, distribute 12 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): BUS 1440, MGMT 2100 (Leadership Studies minor students fulfill this Business Core requirement by completing both LDRS 2017 and LDRS 2019), ECON 1020, BUS 1099 (0 credits), INFO 1010 & INFO 1011 (complete by winter of year 2). Students who are ahead in credits can work ahead in Common Curriculum requirements, General Elective/optional minor requirements, and Business requirements from year 2.
- <sup>7</sup> In year 2, distribute 16 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): Any Business courses not completed in year 1, ACTG 2200 (complete by spring of year 2), INFO 1020 & INFO 1021, LGST 2000, INFO 2020, MKTG 2800, BUS 3000, BUS 2099 (0 credits).
- <sup>8</sup> In year 3, distribute 16 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): Any Business courses not completed in year 2, FIN 2800 (completed by winter of year 3), ACTG 2300.

#### **FIN 2030 Personal Finance for Non-Business Majors (4 Credits)**

This course provides an overview for all Non-Business Majors of topics which are critical to lifetime personal financial planning. The premise of the course is that personal financial planning starts early in life, regardless of a college major, as a new college graduate begins a professional career. The main topics in the course include Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision, and College Financial Planning for Children.

#### **FIN 2400 The Franchise Journey: Start-up to Exit (4 Credits)**

Gain knowledge, skills, and best practices to grow a business from one location to a national brand—this course is your guide to building, operating, and thriving in the world of franchising. Owning a business can be incredibly rewarding, but it often feels lonely and isolating. Entrepreneurs face challenges that few others understand, bearing the pressure of making pivotal decisions that determine success or failure. Franchising offers a solution—an opportunity to be in business for yourself, but not by yourself. From small beginnings to expansive growth, franchising has the power to transform a small business into a thriving network of entrepreneurs working toward a common goal. Building a successful franchise system requires vision, strategy, and collaboration. That's right—collaboration between a franchisor and its franchisees. This course takes students on a journey through the lifecycle of growing a franchise business, offering insights and practical skills from both franchisor and franchisee perspectives. Whether interested in franchising as a career path or an entrepreneurial venture, students will learn what it takes to start, operate, scale, and exit a franchise business while exploring critical functions, strategies, and tools required for success at each stage. Through real-world case studies and interactive discussions, students will develop the skills to navigate common challenges faced by franchisors and franchisees, equipping them to thrive as future franchisors, franchisees, or franchise business professionals.

#### **FIN 2800 Financial Decision Making (4 Credits)**

Basic financial principles and analytical skills including ratio analysis, breakeven analysis and leverage, net present value, internal rate of return, and standard forecasting techniques. Prerequisite: ACTG 2200. Restriction: Must be pursuing BSBA or BSACC degree.

**FIN 3030 Personal Finance for Business Majors (4 Credits)**

This course provides an overview of topics that are critical to lifetime personal financial planning, which is especially important as a college student and young professional. Main topics in this course include: Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision and College Financial Planning. Prerequisite: FIN 2800 or permission of the instructor.

**FIN 3060 Life Cycle -Financial Planning (4 Credits)**

This course is one of the intermediate courses for the wealth management track. Students who are interested in pursuing the Certified Financial Planner™ designation should take this course. Study will focus on several aspects of personal financial planning: goals, cash management, budgeting, investing, taxation and estate management. Prerequisite: FIN 3030.

**FIN 3090 Wealth Management (4 Credits)**

This course covers topics such as the Financial Planning Process, Insurance Basics, Investment Basics and Strategies, Retirement Planning, and Estate Planning. We are pleased to work with the College for Financial Planning (CFFP), located in Denver, to provide instruction from their “The Foundations of Financial Planning” program. This course can lead to the Financial Paraplanner Qualified Profession™, which will be a valuable addition to your resume.

**FIN 3110 Financial Institutions (4 Credits)**

FIN 3110 provides a comprehensive analysis of financial institutions and how they operate within the markets. Topics include the management of commercial banks and other financial institutions and their relationship to money and capital markets. Keeping up with current events is integral to this course, as the course evolves alongside current events. Prerequisites: C- in FIN 2800.

**FIN 3120 Commercial Bank Management (4 Credits)**

This course attempts to study the changing environment within which banks operate and develop solutions to current bank management problems. FIN 3120 is designed for students who want to learn more about the commercial banking industry, the impact of the economic environment, managing interest rate risks, services provided, changing regulations, and the vast array of current challenges facing the industry. Prerequisite or Co-requisite: FIN 3110.

**FIN 3150 Advanced Business Valuation (4 Credits)**

Business valuation is at the heart of intelligent decision-making in many areas of finance and business -corporate finance, investment banking, private equity, venture capital, investment management, entrepreneurial finance, estate planning, and financial litigation. This course covers the advanced topics related to business valuation in both a conceptual and practical framework. Students will be exposed to sound practices and the latest developments in valuation at the core of financial professions.

**FIN 3200 Corporate Financial Problems (4 Credits)**

This course is an advanced study of the theory, concepts, and techniques applied in managerial finance. The major focus will be on how managers of corporations create value for their shareholders through asset investment decision, such as capital investment decisions and lease or buy decisions. This course aims to use the application of corporate financial theory in “real world” problems and uses Excel spreadsheets, Excel solver, as well as financial calculators. Prerequisite: FIN 2800.

**FIN 3210 Corporate Financial Theory (4 Credits)**

This course provides an expansion to FIN 3200 to include mergers and acquisitions, risk analysis, valuation and capital structure, corporate financial planning, and financial applications of decision theory. Prerequisite: FIN 3200.

**FIN 3230 Entrepreneurial Finance (4 Credits)**

FIN 3230 focuses on the financial aspects of small and emerging businesses. This course places an emphasis on the new enterprise, funds acquisition and valuation. Upon completion of FIN 3230, students will be able to differentiate between the challenges faced by small businesses compared to large businesses, describe stages of development of a business, calculate the value of an emerging business, among other topics. Prerequisite: FIN 3200.

**FIN 3300 Investments (4 Credits)**

This course provides a survey of marketable securities, markets, regulation, and risk and return measurement alongside an introduction to fundamental and technical analysis. This is an introductory investment course that will provide a sound basis for making and evaluating investment decisions. This course is essential for students who want to become investment professionals, but it will also help with personal investing. Prerequisite: FIN 2800.

**FIN 3310 Equity Analysis (4 Credits)**

FIN 3310 is an advanced course that focuses on the analysis of equity securities. The curriculum is primarily derived from the Candidate Body of Knowledge (CBOK) from the Chartered Financial Analyst® (CFA) Program. The CFA Institute regularly surveys practicing investment experts to develop a CBOK that reflects the knowledge, skills, and abilities of a generalist investment practitioner with four years of experience. Prerequisite: FIN 3300.

**FIN 3340 Fixed Income Securities (4 Credits)**

Fixed income markets are huge and constantly growing. In order to succeed in the financial profession, it has never been more important to understand how these markets work. Additionally, understanding the many factors at play in the fixed income market will develop your skills that are applicable to all areas of investments and risk management as well as greatly improve your understanding of how some of the most significant financial institutions work. Prerequisite: FIN 3300.

**FIN 3360 Analysis of Derivatives (4 Credits)**

The objective of this course is to provide a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It is intended for students who have a more quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers: option pricing models, hedging techniques, trading strategies, portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisites: FIN 3300.

**FIN 3410 Multinational Financial Management (4 Credits)**

This course provides a survey and analysis of financial management within an international arena. It covers Eurodollars, Euromarkets, and foreign currencies. Prerequisite: FIN 2800.

**FIN 3500 Financial Modeling (4 Credits)**

FIN 3500 focuses on the construction and development of financial models from corporate finance, investments, and financial markets. It is intended for students who have basic familiarity with Excel, but are not necessarily familiar with R. The course addresses advanced topics such as pro-forma modeling in Excel and uncertainty modeling and portfolio optimization using R. Prerequisite: C- in FIN 2800.

**FIN 3610 Financial Forecasting (4 Credits)**

This course focuses on methods of forecasting both economic and financial variables. Emphasis will be placed on techniques used by business and forecasters. Cross listed with STAT 3620, STAT 4783. Prerequisite: FIN 2800.

**FIN 3700 Topics in Finance (0-4 Credits)**

Exploration of various topics and issues related to finance. Prerequisite: FIN 2800.

**FIN 3710 Reiman Fund I (4 Credits)**

This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the first in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 2800 and instructor's permission.

**FIN 3720 Reiman Fund II (4 Credits)**

This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the second in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3710 (minimum grade of C-).

**FIN 3730 Reiman Fund III (4 Credits)**

This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the third in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3720 (minimum grade of C-).

**FIN 3800 Organized Walk Down Wall Street (0-4 Credits)**

This course provides the opportunity to learn and reinforce financial concepts, tools, methodologies, and practices used by Wall Street professionals in the finance industry. After preparatory classes in Denver, students will spend a week in New York visiting and learning from investment bankers, leveraged lenders, individuals in private equity, and asset managers. Prerequisites: FIN 2800 and instructor's permission.

**FIN 3885 Investment Banking and External Financing (4 Credits)**

This course is an advanced Corporate Finance course, focusing on the activities involved in investment banking and the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with many outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance, and going private.

**FIN 3980 Finance Internship (0-10 Credits)**

Practical experience (field study); requires written report. Prerequisites: FIN 2800 and instructor's permission.

**FIN 3991 Independent Study (1-4 Credits)**

Independent research/study; requires written report. Prerequisites: FIN 2800 and instructor's permission.

## First-Year Seminar

The First-Year Seminar (FSEM) Program offers students an introduction to the intellectual life of the University. Offered in the Fall quarter, the small class size provides an in-depth academic experience that is rigorous and engaging. In addition to developing self-motivated academic passion, students can expect to hone the academic skills essential for successful college work.

Each seminar focuses on one or more of the following academic skills: writing, critical reading and thinking, discussion, argumentation and debate, and information literacy. This program enables students to engage with faculty in the exploration of novel and challenging topics and lays the groundwork for extraordinary academic and personal growth.

Faculty members teach their passions in which they have particular expertise and enthusiasm, and each First-Year Seminar has a unique topic, with 70-75 different First-Year Seminars offered each fall quarter. For students to be able to engage with faculty in the exploration of these topics is an

extraordinary opportunity for academic and personal growth. Instructors of the First-Year Seminars also serve as students' faculty mentors for the entire first year. Students may meet individually with their mentors during winter and spring quarters as they navigate university experiences.

This course must be taken at the University of Denver. Any student who either withdraws from or fails the First-Year Seminar must meet the requirement through an additional Advanced Seminar course. Students transferring to DU are exempt from this requirement if they are classified as a transfer student.

#### **FSEM 1111 First Year Seminar (4 Credits)**

First Year Seminar topics reflect the intellectual passions of the faculty who lead them. Seminars introduce students to the rigorous academic expectations of university-level work; as small, highly interactive courses, they help students improve skills in one or more of the following areas: writing, quantitative reasoning, critical thinking, presentation and argument, and/or information literacy. The instructor of the seminar serves as the student's mentor for the student's entire first year. This course is required for all first-year students.

## **Gender, Women's and Sexuality Studies**

Office: Merle Catherine Chambers Center for the Advancement of Women, Room 111

Mail Code: 1901 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-4419

Email: [gwst@du.edu](mailto:gwst@du.edu) ([gwst@du.edu?subject=website%20inquiry](mailto:gwst@du.edu?subject=website%20inquiry))

Web Site: <http://www.du.edu/ahss/gwst/> (<http://www.du.edu/ahss/gwst/>)

The Gender, Women's, and Sexuality Studies Program offers a cross-disciplinary undergraduate major and minor composed of courses taught throughout the University by a diverse faculty. Reflecting the vitality of recent feminist, ethnic, and queer scholarship, these courses examine the roles of gender, race, sexuality, and other categories of identity in the lives of all people. The mission of the Gender, Women's, and Sexuality Studies program is to explore gender as a primary category of analysis for the understanding of individuals and human societies in historical and cultural contexts.

The baccalaureate degree in gender and women's studies is a cross-disciplinary major with a minimum of 44 credits. All students must take GWST 1112 Introduction to Gender and Women's Studies .

Seniors are also required to fulfill a four-credit GWST capstone course. The remaining credits to get a student to 44 credit hours are taken from a combination of Gender, Women's, and Sexuality studies courses and cross-listed courses in other departments.

A minor in gender, women's, and sexuality studies requires 24 credits, including GWST 1112 Introduction to Gender and Women's Studies. The remaining 20 credit hours may be selected from other Gender, Women's, and Sexuality studies courses, including the colloquia, and courses in other departments also listed with the Gender, Women's, and Sexuality Studies Program.

## **Major**

### **Bachelor of Arts Major Requirements**

(183 credits required for the degree (p. 97))

A minimum of 44 credits of Gender and Women and Sexuality Studies including GWST 1112 Introduction to Gender and Women's Studies. Required courses\* include, but are not limited to, the following:

Code	Title	Credits
<b>Required Courses</b>		
GWST 1112	Introduction to Gender and Women's Studies	4
GWST 2650	Feminist Qualitative Research Methods and Design	4
GWST 3950	Feminist, Gender, and Queer Theory	4
<b>Participation in Colloquium</b>		
GWST 2981	Colloquium in GWST	2
GWST 2982	Colloquium in GWST	2
<b>Interdisciplinary Gender, Women and Sexuality Studies Electives</b>		
<b>Capstone Requirement</b>		<b>4</b>
GWST 3975	Capstone Seminar <sup>1</sup>	
<b>Electives</b>		<b>8</b>
Any Gender and Women's Studies listed or also-listed course		
<b>Total Credits</b>		<b>44</b>

\* Please consult with your GWST advisor and the schedule of classes for additional courses which may meet these requirements.

<sup>1</sup> Must be a senior.

## Secondary Major

### Secondary Major Requirements

44 credits. Same requirements as for BA degree.

## Minor

### Minor Requirements

24 credits in Gender, Women and Sexuality Studies. Required: GWST 1112 Introduction to Gender and Women's Studies.

### Requirements for Distinction in the Major in Gender, Women and Sexuality Studies

- Minimum 3.25 major GPA, 3.0 overall GPA
- Honors thesis (minimum 40 pages)
  - The thesis research, analysis, and writing will be done over the course of the student's senior year, and will include the student's own original research/creative work that draws upon or contributes to gender theory. This project is done in close consultation with a faculty mentor, and must be evaluated by a committee of at least three faculty members (including the major thesis adviser).

### BA in Gender and Women's Studies

Course plans serve as a sample quarter-by-quarter schedule for intended majors. The sample course plan below shows what courses a student pursuing this major might take. Students should anticipate working closely with their major advisor to create a course of study to complete the degree.

Ideally, Common Curriculum (p. 93) requirements other than Advanced Seminar should be completed during the first two years. Students should anticipate taking an average course load of 16 credits each quarter.

Ways of Knowing courses in the areas of Analytical Inquiry: Society and Culture (p. 47) and Scientific Inquiry: Society and Culture (p. 88) introduce students to University-level study of disciplines in the arts, humanities and social sciences. Credits earned in Ways of Knowing courses may also apply to a major or minor.

First Year

	13-14		13-16		14
Total Credits: 88-92					

<sup>1</sup> INTZ 2501 is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

#### ANTH 3130 The Archaeology of Gender (4 Credits)

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data and specific case studies of engendered lives in the past. Cross listed with GWST 3130.

#### ARTH 3871 Women in Art (4 Credits)

This course considers the roles of women in art and explores the impact of race, class and gender on art produced from the Middle Ages to the present with discussions of women artists, women patrons and images of women. Cross listed with GWST 3871.

**COMN 1015 Voice and Gender (4 Credits)**

In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. This course also discusses gender issues prevalent in today's society and significant moments in rhetorical history that have impacted these issues. Cross listed with GWST 1015.

**COMN 2210 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

**COMN 3050 Feminism and Intersectionality (4 Credits)**

This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

**ECON 2280 Gender in the Economy (4 Credits)**

This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with GWST 2280. Prerequisite: ECON 1020.

**ENGL 2830 Representations of Women (4 Credits)**

Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with GWST 2830.

**GWST 1112 Introduction to Gender and Women's Studies (4 Credits)**

This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women's studies aims to understand how this process of 'gendering' occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of allocating power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women's studies is about studying, but it is also about meaningful engagement with the world. This class presents students with a variety of types of texts from sociological articles to literary fictions and documentary and fictional cinema to explore gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GWST 2212 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.

**GWST 2215 Selling Sex, Gender and the American Dream: 1950 - Present (4 Credits)**

This introductory course analyzes how commercial culture has evolved into the defining cornerstone of American life over the last sixty years. The first half of the quarter will examine the key historical movements including the Cold War, the Civil Rights/Women's and Gay Liberation movements and investigate how women, ethnic minorities, and members of the LGBTQ community evolved into important "consumer citizens" in the United States. The second half of the quarter will examine these same social groups from a contemporary perspective, and the degree that globalization, "multiculturalism" and "going green" have emerged as dominant tropes in contemporary culture. By moving from past to present, students will gain an understanding of the complex connections between consumption and U.S. nation-building, as well as the consequences "shopping" and the accumulation of "stuff" has had in both the shaping and reconfiguring understandings of what it means to live the "American Dream." This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GWST 2650 Feminist Qualitative Research Methods and Design (4 Credits)**

This course will introduce the fundamental elements of feminist qualitative research methods and design. We will begin by examining various research methods, including ethnography, interviews, oral history, media studies/discourse analysis, and community-based research and analyze the ways in which they aid (and help counter) ways of knowing and understanding the social world. In addition to gaining awareness of the more commonly used qualitative and ethnographic methodologies, you will be challenged to think critically about the mechanics, ethics, and politics of such research, including the role of researcher within it. Enrollment restricted to GWST majors only.

**GWST 2700 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 2701 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 2730 Gender in Society (4 Credits)**

How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with SOCI 2730. Prerequisite: SOCI 1810.

**GWST 2785 Family and the Law (4 Credits)**

The government is actively involved in deciding who gets to be a family and what families should look like. The state and its laws are involved in shaping family life, making decisions for family members, and mediating familial conflict. This course looks at the appropriate role of the state in family life by examining state legislation and court decisions and social research on a variety of topics. Cross listed with SOCI 2785. Prerequisite: SOCI 1810.

**GWST 2830 Representations of Women (4 Credits)**

Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with ENGL 2830.

**GWST 2981 Colloquium in GWST (2 Credits)**

Theme changes each year. May be repeated for credit as long as course titles are different.

**GWST 3130 The Archaeology of Gender (4 Credits)**

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data, and specific case studies of engendered lives in the past. Cross listed with ANTH 3130.

**GWST 3652 Culture, Gender and Global Communication (4 Credits)**

This course explores the ways in which culture, gender, and communication intersect and shape a variety of issues from an international and intercultural perspective. Using a global feminist perspective, it also focuses on paradigms and paradigm shifts in creating social change. Also explored are alternative paradigms of thought, action and media communications by women and indigenous peoples, which have often been ignored, discounted or buried in history. Cross listed with MFJS 3652.

**GWST 3700 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 3701 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 3704 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis) used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with JUST 3740, RLGS 3740.

**GWST 3950 Feminist, Gender, and Queer Theory (4 Credits)**

This course examines the major theoretical approaches (feminist, womanist, queer, etc.) to understanding gender and other intersecting systems of oppression and privilege. It explores the historical evolution of the theoretical traditions that have informed feminism, queer theory, and gender and women's studies, as well as examining more recent developments within these fields of inquiry. Students apply these theories to a range of texts, empirical data and/or the experiential world. This course may be repeated for credit as long as course subtitles are different. Prerequisite: GWST 1112; minimum of junior standing.

**GWST 3975 Capstone Seminar (4 Credits)**

This course provides students the opportunity to complete a substantial final project for their degree in gender and women's studies, which may take the form of preparation for a thesis, community-based research or service project, or a substantial creative or research project. Students work closely with the director of the program or a faculty member affiliated with the program to devise these projects after spending the first part of the course exploring recent research within the field of gender and women's studies. Prerequisites: GWST major or minor, GWST 1112, GWST 3950, senior standing, or permission of instructor.

**GWST 3985 GWST Internship (2-5 Credits)****GWST 3991 Independent Study (1-10 Credits)****GWST 3995 Independent Research (1-10 Credits)****GWST 3998 Honors Thesis (1-5 Credits)****HIST 2630 American Women's History (4 Credits)**

This course is a survey of U.S. women's history from the colonial period to the present. It examines the social, cultural, economic, and political developments shaping American women's public and private roles over several centuries, in addition to the ways in which women gave meaning to their everyday lives. Particular attention is paid to the variety of women's experiences, with an emphasis on the interplay of race, class, ethnicity, and sexuality. Cross listed with GWST 2630.

**INTS 2235 Gender and International Relations (4 Credits)**

How does gender shape international relations (IR)? How do ideas about masculinity and femininity affect war and peace? The global economy? Migration? Foreign policy? What do feminist perspectives contribute to the study of IR? These questions have relevance for the academic study of IR as well as the lived experiences of people around the world. Answering them requires attending to the ways in which gender and aspects of sexuality are constructed through social and political relations, and the hierarchies of power they reflect and maintain. Overall, this course encourages students to grapple with the issue of if and how gender matters in international relations. We will begin by introducing the concepts and theories necessary to investigate, research, analyze, and understand the gendered nature of international relations. Next, we will use this knowledge to compare gendered and feminist perspectives on IR to mainstream IR and explore why they have not been fully integrated. Then we will engage in gendered analyses of a variety of topics in IR, focusing especially on security and the economy. We will finish by carrying out research on a topic of our choosing, using the lenses and tools we have developed. In the end, students should consider whether this sort of perspective provides a more nuanced and holistic way of understanding IR.

**MFJS 3242 Reel Women (4 Credits)**

Reel Women explores films from the U.S., England, Senegal, India, Canada, Colombia, and Saudi Arabia that are made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives across the world.

**MFJS 3652 Feminist Media Studies (4 Credits)**

MFJS 3652 (Feminist Media Studies) explores the gendered intersections between media and society through the analytical lens of Feminist Media Studies (FMS). While aligned with the discipline Media Studies, FMS centers questions related to power and patriarchy, and aims to create space for praxis. Paying close attention to issues of intersectionality, this course surveys the historical emergence, and contributions, of feminist methodology and inquiry related to issues such as sexism within gaming, the politics of visibility in television production, the celluloid ceiling, and networked bodies. During the quarter, you will engage in multiple points of active and reflective learning that provide the space to strengthen both your understanding and application of FMS. Assignments include discussion questions, self-reflective analysis, and a final project that highlights application, creativity, and subversion.

**PHIL 2186 Feminist Ethics: Justice and Care (4 Credits)**

In the late 1950's psychologists began to theorize a notion of human moral development and they created instruments with which to measure such development. By the 1970's there were claims that even well-educated women were—on average—stunted in their moral competence according to these measures. Once a sufficient number of women were engaged in moral theory in both psychology and philosophy, they began to diagnose these theories and instruments as prejudiced by what we would today call 'while, cisgender, male privilege.' The scales were centering a detached notion of justice and equality for all, whereas researchers found that women centered notions of care and engaged in relational (rather than detached) thinking when asked ethical questions. Thus, was born the discipline of Feminist Ethics. While many women (and some men) celebrated the alternative 'ethics of care' over an 'ethics of justice,' others worried that these women had been harmed by their male dominated society and were showing signs of a 'slave mentality' in their moral reasoning that was to be overcome and not celebrated. Predictably (in hindsight), women of color complained that their perspective was not taken into account by these 'caring' white female professors. In this class we will look at this conversation as it unfolded. In the process we will evaluate these theories from a philosophical perspective and see which parts seem most helpful for thinking about current ethical issues. Many or all of the readings were probably written before you were born. In fact, there is very little philosophical literature that labels itself 'feminist ethics' or 'ethics of care' that was written in the 21st century. We will ponder why this is the case. Are these ideas outdated, or have they been sufficiently incorporated into mainstream academic thinking that they no longer wear the label of marginalization? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PLSC 2020 Politics of Desire (4 Credits)**

This course surveys political theory literatures on the topic of desire—with a focus on sexuality. Readings will survey historical and contemporary theories of relationships, sexual identity, and power, and topics will include the relationships between ideas about desires and ideas about bodies, needs, and preferences. We will think about desire as it manifests in our individual and collective lives, such as its relationship with race, gender, aesthetics, and freedom. We will especially tackle the problem of how to transcend affinities for hierarchy and distinction and in their place generate desires for democratic equality.

**PLSC 2360 Settler Colonialism and Indigenous Resistance in Three Continents (4 Credits)**

This course explores historical and contemporary aspects of racialized power structures as they have specifically impacted indigenous peoples in Australia, the United States, and Latin America. How did the dynamics of imperialism, capitalism, liberal state-building, and racist (and racist) ideology combine to devastate indigenous communities around the world? How did distinct perspectives on time, space, property, and community allow colonizing populations to conquer native populations even while advocating the most egalitarian political structures ever attempted? Satisfies department distribution requirement in comparative/international politics. Sophomore standing required.

**PLSC 2510 Women in U.S. Politics (4 Credits)**

This course focuses on the role of women in U.S. politics, with an emphasis on voting, elections, and representation. Topics include the woman suffrage movement, women's voting patterns, women as candidates, and women holding elected office. Prerequisite: sophomore standing.

**PLSC 2660 Feminist Political Thought (4 Credits)**

This course surveys political theory literatures on feminist thinking and activism. Readings will survey historical and contemporary theories of gender, identity, patriarchy, misogyny, and liberation. Course will center trans and of-color feminist narratives thinking and practices. Emphasis on critical analysis of various feminist texts in writing and in class discussion.

**RLGS 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How have Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, JUST 3740.

**SOCI 2210 The Family (4 Credits)**

Emphasis on different kinds of families and on contemporary issues of changing gender roles, intimacy, childbearing, family breakup and reconstitution, and family's relationships with other social institutions. Cross listed with GWST 2210. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2420 Social Inequality (4 Credits)**

Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with GWST 2420. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2565 Men and Masculinities (4 Credits)**

Many of us believe that anatomy is what determines our behavior and that our bodies dictate our social and psychological temperament. Looking specifically at men and masculinities, this course tests that general notion, investigates the various ways male behavior is gendered and critically explores the meanings of masculinity in contemporary institutions. Throughout the course, we look at the multidimensional and multicultural ways masculinity is produced, constructed, enacted, and resisted; how masculinities structure power and resources; and how masculinities benefit, regulate, and hurt men's lives. Cross listed with GWST 2565. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2730 Gender in Society (4 Credits)**

How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with GWST 2730. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2765 The Female Offender (4 Credits)**

Female offenders are one of the fastest growing segments in both the juvenile and adult justice systems. This course introduces students to debates and issues surrounding girls, women, and crime; explores different theoretical perspectives of gender and crime; and examines the impact of gender on the construction and treatment of female offenders by the justice system. In addition, this course specifically looks at girls' and women's pathways to offending and incarcerations; understanding girls' violence in the inner city; exploring the reality of prison life for women, with a particular focus on the gender-sensitive programming for incarcerated mothers; and ending with an examination of how capital punishment has affected women offenders historically and contemporarily. Cross listed with GWST 2765. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2780 Women and the Law (4 Credits)**

This course explores the relationship between women and the law, looking at the way the categories of sex and gender have been produced and reproduced through law. Through a look at case law and sociological research, students will examine women as bodies, workers and family members. This course also explores the development and current status of American law in the areas of women's constitutional equality, pay equity and equal opportunity, women's access to education, women in the workplace and violence against women. Cross listed with GWST 2780. Prerequisite: SOCI 1810 or permission of the instructor.

## Geography and the Environment

Office: Boettcher West, Room 120

Mail Code: 2050 E. Iliff Ave. Denver, CO 80208

Phone: 303-871-2513

Email: [geog-info@du.edu](mailto:geog-info@du.edu)

Web Site: <https://www.geography.du.edu/>

Geography is an academic discipline that focuses on the spatial distribution of human and physical features around the Earth and changes over time of those phenomena. Because geography bridges the boundary between the natural world and human societies, geographers often collaborate with colleagues in related disciplines in the natural and social sciences. Geographers are taught to think in spatial and chronological terms and to analyze landscapes for indications of physical and cultural features. Geographers also create maps to illustrate spatial relationships and use geographically based data sets to answer spatial questions and analyze spatial data. The field is often subdivided into physical geography, human geography, human-

environment interaction and geographic information science (GISc). Our undergraduate majors are required to take introductory coursework in each of these subdisciplines, followed by more advanced courses in each of the main fields.

The central goal of the undergraduate curriculum in geography is to produce students with a solid foundation in geographic principles and perspectives, and the professional skills to put them into practice. More specifically, the program aims to provide students with skills and techniques that will allow them to apply what they learn in the classroom, laboratory and field. Students are provided with skills in problem identification and solution; training in geotechnical tools, including geographic information systems, cartography, remote sensing, geographic statistics and spatial analysis; and experience in field and laboratory techniques. The discipline of geography is, by nature, integrative and broadly based, so interdisciplinary approaches to problem solving are also emphasized. Our ultimate goal is to provide graduates with training and preparation for employment as professional geographers in government, private industry, education and nongovernmental agencies, and to prepare students for graduate school.

The environmental science program is an interdisciplinary program with the mission of preparing students with the knowledge and skills to identify, analyze and resolve environmental issues. Atmospheric pollution, water supply and quality, global climate change, waste management, species extinction—these are just a few of the better-known issues encompassed by environmental science, a field that addresses the totality of relationships between humans and the natural environment. Through a combination of small lecture, lab and field-oriented courses, students are given hands-on experience with environmental questions and problem solving. Extended field experiences, including alpine ecology at our field station at Mount Evans, are integrated into courses. Students also have the opportunity to participate in the field quarter, spending 10 weeks traveling throughout the western United States, Baja Mexico and other international destinations to study environmental problems and issues.

## Geography

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

Students majoring in geography may not also major in environmental science.

Courses taken as part of the Field Quarter program are exempt from the 60 hour rule.

Students majoring in geography and minoring in sustainability may take up to 72 hours of departmental courses.

45 credits of geography. Requirements include the following:

Code	Title	Credits
GEOG 1410	People, Places & Landscapes	4
GEOG 2000	Geographic Statistics <sup>1</sup>	4
GEOG 2020	Computer Cartography	4
GEOG 2100	Introduction to Geographic Information Systems (GIS)	4
GEOG 2990	Professional Development for Geography & Environmental Science <sup>2</sup>	0
<b>Select one of the following sequences:</b>		<b>12</b>
GEOG 1201 & GEOG 1202 & GEOG 1203	Environmental Systems: Weather and Environmental Systems: Hydrology and Environmental Systems: Landforms <sup>3</sup>	
GEOG 1216 & GEOG 1217 & GEOG 1218	Our Dynamic Earth I and Our Dynamic Earth II and Our Dynamic Earth III	
GEOG 1264 & GEOG 1265 & GEOG 1266	Global Environmental Change I and Global Environmental Change II and Global Environmental Change III	
Upper-division credits (2000- or 3000-level courses); at least one physical geography, one human geography and one GIScience course <sup>4</sup>		17
<b>Total Credits</b>		<b>45</b>

<sup>1</sup> May be satisfied with BIOL 2090 or PSYC 2300

<sup>2</sup> Must be completed during senior year.

<sup>3</sup> GEOG 1264, 1265, 1266 are for Honors Program students only.

<sup>4</sup> A list of geography courses by category is available on the course categories tab

The student may choose one of the following tracks of emphasis:

- natural resource management
- atmosphere and climate
- cultural and regional geography

- earth processes
- geographic analyses
- land use or urban planning

Students preparing for entrance to graduate school or intending to use geography professionally should consult regularly with their departmental advisors.

## Minor Requirements

20 credits of geography at the 2000- or 3000-level.

## Geographic Information Science

The Geographic Information Science (GIS) major prepares students to collect and manage geospatial data, analyze and quantify spatial relationships, evaluate and design maps, and develop geospatial applications. Students completing this degree will be prepared to solve a diverse set of geospatial problems and adapt to a rapidly changing industry.

Students majoring in GIS may not also major in Environmental Science or Geography.

## Bachelor of Science Major Requirements

(183 credits required for the degree (p. 100))

Minimum of 60 credits of geography/GIS coursework. Requirements include the following:

Code	Title	Credits
<b>Geography Core Required Courses</b>		<b>28</b>
GEOG 1410	People, Places & Landscapes <sup>1</sup>	4
One of the following sequences: <sup>2</sup>		12
GEOG 1201 & GEOG 1202 & GEOG 1203	Environmental Systems: Weather and Environmental Systems: Hydrology and Environmental Systems: Landforms	
GEOG 1216 & GEOG 1217 & GEOG 1218	Our Dynamic Earth I and Our Dynamic Earth II and Our Dynamic Earth III	
GEOG 1264 & GEOG 1265 & GEOG 1266	Global Environmental Change I and Global Environmental Change II and Global Environmental Change III	
GEOG 2000	Geographic Statistics <sup>3</sup>	4
GEOG 2020	Computer Cartography	4
GEOG 2100	Introduction to Geographic Information Systems (GIS)	4
GEOG 2990	Professional Development for Geography & Environmental Science	0
<b>GIS Core Required Courses</b>		<b>16</b>
GEOG 3010 or GEOG 3120	Geographic Information Analysis Environmental/GIS Modeling	4
GEOG 3140	GIS Database Design	4
GEOG 3200	Remote Sensing	4
GEOG 3130 or GEOG 3135	GIS Programming with Python Advanced GIS Programming with Python	4
<b>Experiential Learning Requirement</b>		<b>4</b>
In addition to more traditional coursework, students are required to complete at least one of the following options for extended experiential, hands-on learning opportunities:		
GEOG 3170	Geospatial Analysis Project	4
GEOG 3991	Independent Study	4
GEOG 3999	Geographic Internship	4
<b>Geography Electives <sup>4</sup></b>		<b>12</b>
A minimum of 12-quarter hours of 2000- or 3000-level elective courses in geography must be completed, include one physical (P) and one human (H) course.		
<b>Total Credits</b>		<b>60</b>

<sup>1</sup> Counts towards Common Curriculum requirement for Scientific Inquiry: Society and Culture

- <sup>2</sup> Fulfills Common Curriculum requirement for Scientific Inquiry: The Natural and Physical World
- <sup>3</sup> Can be substituted with BIOL 2090 or PSYC 2300
- <sup>4</sup> A list of geography courses by category is available on the course categories tab

### Additional Requirements

Code	Title	Credits
<b>Required Minors</b>		
In addition to major course work, two minors are required for the BS degree. The first minor must be in either computer science (21 credit hours) or mathematics (20 quarter hours). A double major fulfills second minor requirement.		
<b>Additional Coursework</b>		
Students are required to complete a minimum of two quarters (8-10 credit hours) of introductory coursework in the cognate subject, specifically:		
Computer Science minors, complete the following (8 credits):		
MATH 1951	Calculus I	4
or MATH 1200	Calculus for Business and Social Sciences	
MATH elective numbered higher than 1951		4
Mathematics minors, complete the following (10 credits):		10
COMP 1201	Introduction to Computer Science I	2
COMP 1202	Introduction to Computer Science II	2
COMP 1351	Introduction to Programming I	3
COMP 1352	Introduction to Programming II	3

### Minor Requirements

20 credits of coursework. Requirements include the following.

Note: As geography majors may emphasize GISc as part of their degree program, they are not eligible to complete the minor in GISc.

Code	Title	Credits
<b>Required courses:</b>		
GEOG 2100	Introduction to Geographic Information Systems (GIS)	4
GEOG 3200	Remote Sensing	4
<b>Electives</b>		
Select from the following:		12
GEOG 2000	Geographic Statistics <sup>1</sup>	
GEOG 2020	Computer Cartography	
GEOG 3000	Advanced Geographic Statistics	
GEOG 3010	Geographic Information Analysis	
GEOG 3120	Environmental/GIS Modeling	
GEOG 3130	GIS Programming with Python	
GEOG 3140	GIS Database Design	
GEOG 3170	Geospatial Analysis Project	
GEOG 3190	Lidar: Theory and Applications	
GEOG 3230	Advanced Remote Sensing	
GEOG 3410	Urban Applications in GIS	
GEOG 3701	Topics in Geographic Information Science	
GEOG 3860	GIS Applications and Natural Resources	
GEOG 3920	Remote Sensing Seminar	
<b>Total Credits</b>		<b>20</b>

<sup>1</sup> Students are expected to have completed the Analytical Inquiry-Natural Science requirement or equivalent prior to enrolling in this course. Completion of an introductory course in geography such as GEOG 1410 People, Places & Landscapes, GEOG 1201 Environmental Systems: Weather or GEOG 1216 Our Dynamic Earth I is encouraged but not required.

## Geology

A minor in geology may be arranged by consultation with the faculty of the Department of Geography and the Environment.

### Minor Requirements

Minimum of 20 credits of geology.

## Environmental Science

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

Students majoring in environmental science may not also major in geography.

75 credits. Requirements include:

Code	Title	Credits
Complete one of the following sequences:		12
GEOG 1201 & GEOG 1202 & GEOG 1203	Environmental Systems: Weather and Environmental Systems: Hydrology and Environmental Systems: Landforms	
or		
GEOG 1264 & GEOG 1265 & GEOG 1266	Global Environmental Change I and Global Environmental Change II and Global Environmental Change III	
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab	5
BIOL 1010 & BIOL 1020	Physiological Systems and Physiological Systems Lab	5
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab	5
CHEM 1010 & CHEM 1240	General Chemistry I and General Chemistry I Laboratory	4
CHEM 1020 & CHEM 1250	General Chemistry II and General Chemistry II Laboratory	4
CHEM 2240	Introduction to Environmental Chemistry	4
GEOG 2990	Professional Development for Geography & Environmental Science <sup>1</sup>	0
Select one of the following:		4
BIOL 2090	Biostatistics	
GEOG 2000	Geographic Statistics	
PSYC 2300	Introduction to Statistics	
<b>Environmental Science Electives <sup>2</sup></b>		
Biology		8
Geography/Geology/Envi		8
Additional Electives		16
<b>Total Credits</b>		<b>75</b>

<sup>1</sup> Must be completed during senior year.

<sup>2</sup> A list of acceptable courses is available from the Department of Geography and the Environment.

### Additional Requirements

20 credits in a minor field of study

No more than five credits taken as independent study, internship or independent research may be counted toward the minimum hours required in the major.

## Bachelor of Science Major Requirements

(183 credits required for the degree (p. 100))

Students majoring in environmental science may not also major in geography.

45 credits. Requirements include:

Code	Title	Credits
<b>Environmental Science BS Core</b>		
Complete one of the following sequences:		12
GEOG 1201 & GEOG 1202 & GEOG 1203	Environmental Systems: Weather and Environmental Systems: Hydrology and Environmental Systems: Landforms	
or		
GEOG 1264 & GEOG 1265 & GEOG 1266	Global Environmental Change I and Global Environmental Change II and Global Environmental Change III	
GEOG 2500 or GEOG 2700	Sustainability & Human Society Contemporary Environmental Issues	4
ENVI 3000 or GEOG 2401	Environmental Law The Human Population	4
GEOG 2100 or GEOG 3200	Introduction to Geographic Information Systems (GIS) Remote Sensing	4
GEOG 2000 or PSYC 2300 or BIOL 2090	Geographic Statistics Introduction to Statistics Biostatistics	4
GEOG 2990	Professional Development for Geography & Environmental Science <sup>1</sup>	0
<b>Environmental Science BS Electives <sup>2</sup></b>		
A minimum of 17-quarter hours of 2000- or 3000-level elective courses in GEOG, GEOL, or ENVI.		17
<b>Total Credits</b>		<b>45</b>

<sup>1</sup> Must be completed during senior year.

<sup>2</sup> A list of acceptable courses is available from the Department of Geography and the Environment.

## Additional Requirements

Code	Title	Credits
BIOL 1011	Evolution, Heredity and Biodiversity	4
BIOL 1021	Evolution, Heredity and Biodiversity Lab	1
BIOL 1010	Physiological Systems	4
BIOL 1020	Physiological Systems Lab	1
BIOL 2010	General Ecology	4
BIOL 2011	General Ecology Lab	1
CHEM 1010	General Chemistry I	3
CHEM 1240	General Chemistry I Laboratory	1
CHEM 1020	General Chemistry II	3
CHEM 1250	General Chemistry II Laboratory	1
CHEM 2240	Introduction to Environmental Chemistry	4
PHYS 1111	General Physics I	5
PHYS 1112	General Physics II	5
PHYS 1113	General Physics III	5
MATH 1951	Calculus I	4
MATH 1952 or MATH 1962	Calculus II Honors Calculus II	4
<b>Total Credits</b>		<b>50</b>

No more than five credits taken as independent study, internship or independent research may be counted toward the minimum hours required in the major.

## Minor Requirements

Two minors are required. The first minor must be in either Biological Sciences or Environmental Chemistry. The second minor can be in any discipline, except Geography. Students may use credits from the "Additional Requirements" category toward an applicable minor.

## Minor Requirements

26 credits. Requirements include:

Code	Title	Credits
GEOG 1201 & GEOG 1202 & GEOG 1203	Environmental Systems: Weather and Environmental Systems: Hydrology and Environmental Systems: Landforms	12
BIOL 1011 & BIOL 1021	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab <sup>1</sup>	5
BIOL 2010 & BIOL 2011	General Ecology and General Ecology Lab <sup>1</sup>	5
GEOG 2500 or GEOG 2700	Sustainability & Human Society Contemporary Environmental Issues	4

<sup>1</sup> Students may substitute these 5-credit courses with 4-credit courses from an approved list from the geography department when they are being used to satisfy requirements in another degree program. This will reduce the number of credits required for this minor to 24.

## Sustainability Science

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

The Sustainability Science major combines coursework from the natural sciences, social sciences, and applied sciences to engage students in identifying and addressing complicated issues of environmental, social, and economic change. Students completing this degree will be skilled at working across multiple disciplines to apply systems-thinking in addressing complex sustainability problems in many different employment contexts.

Students majoring in Sustainability Science may not also major in Geography or Environmental Science.

58-64 credits. Requirements include:

Code	Title	Credits
<b>Core Requirements (28 hours)</b>		
<b>Complete one of the following sequences:</b>		<b>12</b>
GEOG 1201 & GEOG 1202 & GEOG 1203	Environmental Systems: Weather and Environmental Systems: Hydrology and Environmental Systems: Landforms	
or		
GEOG 1264 & GEOG 1265 & GEOG 1266	Global Environmental Change I and Global Environmental Change II and Global Environmental Change III	
<b>Complete one of the following sustainability courses:</b>		
GEOG 2500 or GEOG 2511	Sustainability & Human Society Principles of Sustainability - Honors	4
<b>Complete one of the following statistics courses:</b>		
GEOG 2000 or BIOL 2090 or PSYC 2300	Geographic Statistics Biostatistics Introduction to Statistics	4
<b>Select two from the following:</b>		<b>8</b>
GEOG 2401	The Human Population	
GEOG 2410	Economic Geography	
GEOG 3890	Ecological Economics	

ENVI 3000	Environmental Law	
GEOG 3930	Cultural Geography Seminar <sup>1</sup>	
<b>Additional Requirements</b>		<b>10-12</b>
Select either BIOL or CHEM sequence below:		
BIOL 1011 & BIOL 1021 & BIOL 2010 & BIOL 2011	Evolution, Heredity and Biodiversity and Evolution, Heredity and Biodiversity Lab and General Ecology and General Ecology Lab	
or		
CHEM 1010 & CHEM 1240 & CHEM 1020 & CHEM 1250 & CHEM 2240	General Chemistry I and General Chemistry I Laboratory and General Chemistry II and General Chemistry II Laboratory and Introduction to Environmental Chemistry	
<b>Integrative and Applied Capstone (0-4 hours)</b>		<b>0-4</b>
Complete one of the following:		
GEOG 2550 or GEOG 3991 or GEOG 3999	Issues in Sustainabilities <sup>2</sup> Independent Study Geographic Internship	
and		
GEOG 2990	Professional Development for Geography & Environmental Science	
<b>Electives (20 hours)</b>		<b>20</b>
Requires a minimum of one class from each category (Environmental, Human/Society, and Applied Skills); one elective must come from a course subject code other than GEOG/GEOL/ENVI. Additional electives may be available as approved by the program director.		
<b>Environmental</b>		
BIOL 3035	Invasive Species Ecology	
BIOL 3044	Coral Reef Ecology	
BIOL 3045	Coral Reef Ecology Lab	
BIOL 3055	Ecology of the Rockies	
BIOL 3085	Insect Ecology	
BIOL 3095	Global Change Ecology	
BIOL 3350	Conservation Biology	
BIOL 3700	Topics in Ecology	
CHEM 3410	Atmospheric Chemistry	
CHEM 3411	Aquatic Chemistry	
CHEM 3413	Aerosol Science	
EALC 2001	ESLLC: Local and Regional Environmental Issues	
EALC 2002	ESLLC: The Impact of Development on the Environment	
EALC 2003	ESLLC: Energy in American Society	
GEOG 2320	Andean Landscapes	
GEOG 2730	Geography of Surfing	
GEOG 2835	Biogeographies of Conservation: Safari landscapes and protected areas (Tanzania)	
GEOG 2880	Geographies of South Africa	
GEOG 3520	Geography of Soils	
GEOG 3610	Climatology	
GEOG 3720	Mountain Environments and Sustainability	
GEOG 3800	Geography of Colorado	
GEOG 3820	Kiwis and Kauris: Sustainability in New Zealand	
GEOG 3835	Sustainability in South Florida: The Everglades and Florida Keys	
GEOG 3870	Water Resources & Sustainability	
GEOL 3100	Environmental Geology	
PHYS 2610	Physics of Climate	
PHYS 2710	The Nanoscale Physics of Energy, Information, and Environment	

**Human/Society**

ANTH 2011	Religion, Environmentalism, and Politics
ANTH 2420	Science, Technology and Human Values
ANTH 3040	Anthropologies of Place

**Applied Skills**

GEOG 2020	Computer Cartography
-----------	----------------------

GEOG 2100	Introduction to Geographic Information Systems (GIS)
GEOG 3000	Advanced Geographic Statistics
GEOG 3010	Geographic Information Analysis
GEOG 3120	Environmental/GIS Modeling
GEOG 3130	GIS Programming with Python
GEOG 3140	GIS Database Design
GEOG 3200	Remote Sensing
GEOG 3230	Advanced Remote Sensing
GEOG 3410	Urban Applications in GIS
GEOG 3630	Dendroclimatology
GEOL 2400	Geology and Ecology of the Southwest
GEOL 3540	Hydrology

Total Credits

58-64

- <sup>1</sup> When taught as "Political Ecology"
- <sup>2</sup> GEOG 3991 and GEOG 3999 must be approved as appropriate by the director of the major. Such approval is not required for GEOG 2550.

Minor Requirements

One minor is required. Students may use credits from the "additional requirements" category towards an applicable minor. Students may not minor in Geography, Environmental Science, or Sustainability due to curricular overlaps.

No more than ten credits taken as independent study, internship or independent research may be counted toward the minimum hours required in the major.

Sustainability Minor

The program requirements for the Sustainability Minor are listed on the Sustainability Program (p. 684) bulletin page.

Requirements for Distinction in the Major

- Minimum 3.5 cumulative GPA
- Minimum 3.75 major GPA
- Completion of a thesis

Distinction is optional and open to students in all departmental majors. Consult with the Department or faculty advisor for futher details.

Bachelor of Arts in Geography

This course sequence is recommended, but not required.

GEOL 3540	Hydrology	4

## Environmental Science (ENVI)

### ENVI 2660 Environmental History of Sonora & Baja Mexico (5 Credits)

Geography and ecology of desert southwest emphasizing Mexican states of Sonora, Baja California del Sur and Baja California. Traveling by van and lodging in tents, trip covers 3,500 miles, offers hands-on experience with principles and problems of physical geography and ecology in desert environments. Offered only during Interterm.

### ENVI 2950 Topics in Env. Science (1-4 Credits)

An in-depth coverage of a specific environmental issue, topic, or problem. Topics vary with instructor.

### ENVI 3000 Environmental Law (4 Credits)

Purpose and applications of federal laws pertaining to environmental protection, including NEPA, RCRA, CERCLA, and Clean Water and Clean Air Acts; addresses role of states in implementation of federal environmental laws.

### ENVI 3991 Independent Study (1-5 Credits)

Study of a topic not covered in existing course offerings. May be used for work completed in off-campus internships that focus primarily on the mastery of existing knowledge.

### ENVI 3995 Independent Research (1-5 Credits)

Original research in environmental science topic under sponsorship of a faculty member; applicable to studies that focus primarily on discovery of new knowledge through application of scientific method.

### ENVI 3999 Environmental Science Internship (1-5 Credits)

Supervised internship in a state, local, or federal office or in the private sector. Prerequisites: 15 quarter hours in the environmental science major and approval of supervising faculty. Maximum of 5 quarter hours total.

## Geography (GEOG)

### GEOG 1201 Environmental Systems: Weather (4 Credits)

First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

### GEOG 1202 Environmental Systems: Hydrology (4 Credits)

Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

### GEOG 1203 Environmental Systems: Landforms (4 Credits)

Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.

**GEOG 1216 Our Dynamic Earth I (4 Credits)**

This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornados, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**GEOG 1217 Our Dynamic Earth II (4 Credits)**

This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

**GEOG 1218 Our Dynamic Earth III (4 Credits)**

This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

**GEOG 1264 Global Environmental Change I (4 Credits)**

First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**GEOG 1265 Global Environmental Change II (4 Credits)**

Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

**GEOG 1266 Global Environmental Change III (4 Credits)**

Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

**GEOG 1410 People, Places & Landscapes (4 Credits)**

In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 1988 Study Abroad Resident Credit (0-18 Credits)****GEOG 2000 Geographic Statistics (4 Credits)**

An introduction to statistics primarily for geography and environmental science students focusing on the scientific method, the nature of data, descriptive statistics, and analytical or inferential statistics. Enrollment restricted to Juniors and Seniors.

**GEOG 2020 Computer Cartography (4 Credits)**

Basic map design and execution using existing maps. Topics include map projections, symbolizing quantitative data, use of space, layout, compilation, verbal content, and the use of computer technology in design and production of maps.

**GEOG 2030 Field Methods (4 Credits)**

Part I, outdoor instruction in use of Brunton compass, level, plane table, and alidade; Part 2, data-gathering techniques and preparation for field work in urban problems.

**GEOG 2100 Introduction to Geographic Information Systems (GIS) (4 Credits)**

Overview of GIS, including background, development, trends, and prospects in this technological field; software package and hands-on exercises used to examine basic geographic concepts and spatial data characteristics associated with automated mapping, projections, scales, geocoding, coordinate referencing, and data structures for computerized land-based data bases.

**GEOG 2320 Andean Landscapes (4 Credits)**

This class introduces students to intensive field activities pertinent to the study of Andean individuals and societies. Students study the characteristics of people, activities, as well as landscapes across the locations of Lima, Cusco and Puno in Peru. This course focuses on geography, history, archaeology, anthropology, biology, ecology and sustainability issues surrounding the above mentioned destinations. This course involves moderate physical activity (Inca Trail hike).

**GEOG 2401 The Human Population (4 Credits)**

This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 2410 Economic Geography (4 Credits)**

Economic elements as spatially arranged, distribution of economic activities on the Earth's surface; market, resource and transportation factors in location theory.

**GEOG 2430 World Cities (4 Credits)**

The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world's major regions, including in-depth analysis of focus case study cities.

**GEOG 2500 Sustainability & Human Society (4 Credits)**

Sustainability has become a catch phrase in discussions concerning the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students are introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, and social justice, and various metrics used to assess sustainable behavior and practices. Students study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings.

**GEOG 2511 Principles of Sustainability - Honors (4 Credits)**

Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

**GEOG 2550 Issues in Sustainability (4 Credits)**

The capstone seminar focuses on a particular problem related to sustainability. Seminar topics vary by instructor, but include a combination of readings, discussion, guest speakers, a group project (either service learning or research), and individual research presentations. Prerequisite: GEOG 2500 and completion of all other requirements for the sustainability minor.

**GEOG 2700 Contemporary Environmental Issues (4 Credits)**

Principles, practices, issues, and status of care of environment; lectures, readings, and discussions focus on causes, effects, and mitigation of a selection of topical regional, national, and international environmental problems including Denver's air pollution, acid deposition, hazardous waste management, global warming, and tropical deforestation.

**GEOG 2701 Special Topics in Geography & Environmental Science (4 Credits)**

Special topics in geography and environmental science.

**GEOG 2730 Geography of Surfing (4 Credits)**

Surfing is often viewed simply as a recreational sport. But it is also so, so, much more. It is a multi-billion dollar global industry, a reflection of global climate patterns interacting with sedimentation regimes and the land, a globalizing culture diffusing from strong regional identities, and a reason to travel to exotic locations and explore the planet. This course uses geographic perspectives to study the many facets of the sport. Geography provides a perfect set of tools to study surfing ranging from the propagation of swells to the diffusion of culture. The goal of the course is to introduce students to the core analytical approaches used in Geography as well as for students to understand that surfing is much more than a recreational sport.

**GEOG 2750 Paleoenvironmental Field Methods (3 Credits)**

Paleoenvironmental Field Methods is a short course that focuses on the use of Quaternary paleoenvironmental research techniques, including extracting and interpreting sediment cores from wetlands and lakes to reconstruct and understand paleoclimatic events.

**GEOG 2810 Geography of Latin America (4 Credits)**

This course studies the countries and islands of Middle America; the interrelationships of peoples, resources and physical features. Cross listed with GEOG 4810.

**GEOG 2815 Geographies of Conquest: Christian, Jewish, and Islamic Societies in Andalusia (4 Credits)**

This course introduces students to the cultural landscapes, former and current, of the different societies that converged in Iberia. The class will focus on medieval Al-Andalus, the Islamic kingdoms that flourished there. During medieval times, Christian, Islamic, and Jewish societies lived side by side in an environment that oscillated between tolerance and open persecution. Science, art, scholarship, and political strategy motivated tolerance while religious fundamentalism and geopolitical considerations motivated persecution. This class will cover the human-environment interactions in the landscapes of Andalusia through an immersive field study and travel experience. This field class equals 4 academic credits. Over a period of 8 days we will visit the cities and surroundings of Madrid, Cordoba, Seville, and Granada in Spain where we will examine and compare cultural geography (past and present), history, and anthropological issues surrounding the communities that interacted in Al-Andalu.

**GEOG 2830 Geography of Europe (4 Credits)**

A field course that examines relationships between humans and the environment in Europe. We study both urban and rural environments to understand the following questions: What are the elements (climate, vegetation, landforms) that characterize European natural landscapes? How have humans modified these natural landscapes? How have environmental conditions influenced human activities (e.g. agriculture, architecture, economic development)? How are these human activities manifested at the landscape scale, and how are they organized in geographic space? How have humans attempted to preserve natural landscapes? Prerequisites: GEOG 1201, GEOG 1202, GEOG 1203 and field quarter application process through the geography department.

**GEOG 2835 Biogeographies of Conservation: Safari landscapes and protected areas (Tanzania) (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in Tanzania mainland through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem, Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity, and global awareness.

**GEOG 2880 Geographies of South Africa (4 Credits)**

This travel course is designed to give students a first-hand look at the physical and cultural landscapes of South Africa. We will study the varied natural landscapes that produce the commodities (e.g., gold, diamonds, wine, and agriculture) that have attracted the interest of outsiders for centuries and that have influenced the cultural landscapes particular to South Africa. A systematic presentation of the geology of South Africa, and its human history, will unfold throughout our travels.

**GEOG 2988 Study Abroad Resident Credit (0-18 Credits)****GEOG 2990 Professional Development for Geography & Environmental Science (0 Credits)**

This course is designed to prepare graduating seniors for the transition to the working world or graduate study. Lectures and workshops focus on the use of LinkedIn and social media as a means of career networking, employment opportunities, professional development, and resume writing and related career services.

**GEOG 2995 Independent Research (1-10 Credits)****GEOG 3000 Advanced Geographic Statistics (4 Credits)**

The second in a sequence of two courses that address general statistical applications particular to geography, environmental science and other disciplines dealing with a spatial dimension in the data they work with. The focus of this second course is on the more advanced multivariate statistical techniques. The course has a strong applied orientation as particular attention is given to which technique is the most appropriate to use for a given type of problem and how to interpret and apply the resulting statistics. Extensive use is made of computer statistics packages. Homework exercises involving such statistical techniques as multiple correlation and regression analysis, principle components analysis, discriminate analysis and canonical correlation. Prerequisite: GEOG 2000.

**GEOG 3010 Geographic Information Analysis (4 Credits)**

Reviews many basic statistical methods and applies them to various spatial datasets. In addition, several spatial statistical methods are applied to spatial datasets. This course is an in-depth study of the interface between GIS, spatial data, and statistical analysis. Preferred prerequisite: GEOG 2000. Prerequisite: GEOG 2100.

**GEOG 3030 Advanced Field Methods (4 Credits)**

Various field methods used by researchers in physical geography; techniques include field mapping, laboratory analyses, geologic field methods. Prerequisite: GEOG 1201 or equivalent.

**GEOG 3040 GPS for Resource Mapping (4 Credits)**

This course is an introduction to GPS (Global Positioning Systems) concepts, techniques, and applications as they relate to GIS data collection. Lectures focus on satellite surveying, GPS technology, error sources, program planning, data collection design, and Quality Control and Quality Assurance issues for data collection programs. Hands-on lab exercises include navigation, mission planning for a GPS survey, designing a field data collection plan and associated data dictionary, field data collection, differential correction, and data integration into a GIS and map production.

**GEOG 3100 Geospatial Data (4 Credits)**

This graduate-level course is designed to provide graduate students from a broad range of disciplines with the skills to carry out applied research tasks and projects requiring the integration of geographic information system technologies and geospatial data. Students are introduced to a collection of techniques and data sources with a focus on acquiring and integrating data. Legal, ethical, and institutional problems related to data acquisition for geospatial information systems are also discussed.

**GEOG 3120 Environmental/GIS Modeling (4 Credits)**

Facing challenges brought by the dramatically changing global environment, environmental modeling is increasingly used to support geographical and environmental decision making (e.g., spatial conservation prioritization). Environmental modeling is concerned with the characterization, modeling and simulation of environmental phenomena and processes using conceptual and mathematical models. Environmental phenomena and processes taking place in the geographic space are regulated by spatial principles. They also interact with other phenomena or processes in the attribute space. For example, species distribution is not only constrained by spatial factors such as proximity to other species, but also influenced by environmental factors such as terrain and climatic conditions. Due to its superior capabilities of handling spatial data and modeling spatial and attribute relationships, geographic information system (GIS) provides the ideal tools for environmental modeling. This upper-level undergraduate/graduate-level course surveys the concepts and techniques of GIS supported environmental modeling in three general categories: 1) Modeling in the spatial domain where the focus is on modeling spatial principles (e.g., spatial autocorrelation); 2) Modeling in the attribute domain where the emphasis is on environmental correlations (e.g., environmental niche modeling); 3) Modeling in the combined spatial and attribute domain where both spatial principles and environmental correlations are exploited (e.g., geographically weighted regression). Throughout this course, several real-world applications are used to demonstrate the ideas, concepts, and techniques of GIS supported environmental modeling, including crime spatial pattern modeling, species distribution modeling, and soil-landscape modeling and mapping. Prerequisites: GEOG 2000 and GEOG 2100.

**GEOG 3130 GIS Programming with Python (4 Credits)**

This advanced course explores the more technical aspects of GIS functions and data structures. Students have hands-on access to both raster (grid-cell) and vector-based software packages in the form of lab exercises that culminate in a small student-designed GIS project. Prerequisite: GEOG 2100.

**GEOG 3135 Advanced GIS Programming with Python (4 Credits)**

This advanced course in Geographic Information Science (GIS) focuses on developing Python scripts for data manipulation, geospatial analysis, and thematic mapping. Students will explore advanced spatial data structures, 3D and temporal geospatial data, database operations, and spatial analysis, applying these techniques to solve real-world geospatial problems. Through practical exercises, assignments, and a capstone project, students will gain hands-on experience with Python and advanced GIS tools. These activities will equip students with the skills to design, implement, and present customized and automated solutions for geospatial challenges.

**GEOG 3140 GIS Database Design (4 Credits)**

Designing databases to provide a foundation for GIS functions and applications, including investigating techniques used for designing databases in non-spatial environments and learning the applicability to GIS problems. Building on concepts and techniques introduced in the first half to extend traditional techniques and methodologies to model the requirements of spatial problems. Students learn to translate the conceptual spatial model into a physical implementation specific to GIS products. Prerequisite: GEOG 2100 or GEOG 3100.

**GEOG 3165 Geospatial Artificial Intelligence (4 Credits)**

Geospatial Artificial Intelligence (GeoAI) combines geospatial data with artificial intelligence (AI) techniques to analyze, interpret, and model spatial patterns and processes. This interdisciplinary field integrates machine learning and deep learning with geographic information systems (GIS) and remote sensing technologies to extract meaningful insights from geospatial data. GeoAI enables more accurate mapping, modeling and prediction of geographic phenomena to support decision-making, and has been widely adopted in various domains, including environmental monitoring, disaster response, agriculture, urban planning, energy, transportation, etc. In this course, students will dive into the core principles and building blocks of GeoAI with a strong emphasis on real-world applications. Key topics include the use of machine learning and deep learning methods to analyze geospatial data such as satellite imagery and LiDAR point cloud data for image classification, object detection and feature extraction. Example applications include leveraging GeoAI models for land cover mapping, electric power lines identification, flood mapping, fire damage assessment, landslide susceptibility evaluation, etc. Students will also explore advanced GeoAI topics such as geo-foundation models and the most recent ChatGPT-like tools that are developed to automate spatial analysis and map-making workflows. Hands-on exercises, assignments and student projects in this class will involve using GIS tools (e.g., ArcGIS Pro), and AI frameworks to fine-tune existing, or develop and train new, GeoAI models and apply them for various case studies, such as detecting wind turbines, monitoring floods, and analyzing wildfire damages. Through this course, students gain experiences on using GeoAI methods to improve geospatial data analysis to support decision-making in application scenarios such as resource management and disaster response. Prerequisites: GEOG 3130 AND (GEOG 2100 or GEOG 3100 or GEOG 4110) or instructor's permission.

**GEOG 3170 Geospatial Analysis Project (4 Credits)**

This course provides an opportunity for students to apply geospatial data analysis to real-world applications. Students will work as a team to develop a project that requires GIS analysis and/or application development, design a project work flow and management plan, and implement a solution. Students will demonstrate competence in GIS techniques, geospatial data analysis, and project management at a professional level. Instructor permission required.

**GEOG 3190 Lidar: Theory and Applications (4 Credits)**

Overview: Lidar (Light Detection and Ranging) is an active remote sensing system that uses laser pulses to measure the distance between the sensor and a surface or objects. Lidar has become an established method for collecting very dense and accurate elevation values, as well as for characterizing the three-dimensional structure of vegetation and urban land cover. In this course, we will build an understanding of the physical principles behind lidar, develop experience working with Lidar datasets, and survey a wide array of lidar applications for mapping and natural resource management. The course will culminate with a student-directed final projects. Prerequisites: GEOG 2100 or GEOG 3200.

**GEOG 3200 Remote Sensing (4 Credits)**

This course acquaints students with the basic techniques of the collection, processing and interpretation of information about the character of the earth's surface from remote locations. Students become familiar with the use of the visible, infrared, thermal and microwave portions of the electromagnetic spectrum as a means of determining land cover and/or land use. Both manual and computer-assisted techniques are discussed and include hands-on applications.

**GEOG 3230 Advanced Remote Sensing (4 Credits)**

This course will build on the basic remote sensing concepts presented in GEOG 3200. Students will explore more in-depth concepts relevant to satellite and airborne remote sensing, including radiative transfer and information extraction. In addition, students will be introduced to two cutting-edge sources of data about the Earth's surface: hyperspectral and lidar (Light Detection and Ranging) sensors. Students will study specific applications of advanced digital image processing techniques for environmental monitoring, natural resource management, and land-use planning. Finally, students will integrate remote sensing and other spatial datasets in the context of Geographic Information System (GIS) analysis. Prerequisite: GEOG 3200.

**GEOG 3300 Cultural Geography (4 Credits)**

Themes and methods of cultural geography including cultural area, landscape, history and ecology.

**GEOG 3310 Culture/Nature/Economics-Human Ecology (4 Credits)**

Cultural adaptation, livelihood strategies and environmental modification among subsistence and peasant societies: responses of such groups to technological change and economic integration.

**GEOG 3330 Political Geography (4 Credits)****GEOG 3340 Geographies of Migration (4 Credits)**

This course explores contemporary movement of people across international borders and the social, cultural, political, economic, and environmental repercussions of such movements. The class looks at the global flow of people across national boundaries and the ways in which these dispersed peoples build and maintain social networks across national borders. While doing so, we address the role of globalization in international migration processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological cost? How do migrants change—and how in turn do they bring change, social as well as economic, to new destinations as well as places left behind? This course examines politics and patterns of migration, transnational migration, and immigration to the United States.

**GEOG 3350 Qualitative Methods in Geography (4 Credits)**

This course focuses upon qualitative methods in the production of geographic knowledge. Qualitative methods are widely employed by geographers to understand patterns and underlying processes of human and human-environment issues in society. The course is designed to expose participants to the theories, purpose, scope, and procedures of qualitative research. Specific topics include: epistemological theories (ways of knowing); ethics and power in research; research design; data collection techniques in interviewing, participant observation and landscape interpretation, discourse and archive analysis, and case studies; data analysis; and writing and disseminating qualitative findings.

**GEOG 3400 Urban Landscapes (4 Credits)**

Urbanization as a process; national urban systems; internal spatial structure of cities; role of transportation in urban development; location of residential, commercial and industrial activities; agglomeration economies; residential congregation and segregation; environmental justice; urban growth and growth coalitions; decentralization and urban sprawl; edge cities; impacts on the urban environment; world cities; globalization.

**GEOG 3410 Urban Applications in GIS (4 Credits)**

This course uses the tools of geographic information systems (GIS) to explore concepts of traditional urban geography, including defining cities/metropolis, internal urban structures, urban systems, industrial location, social and residential patterns, urban form, environmental problems, and urban planning. The course allows students to practice fundamental skills in GIS (e.g., working with attribute tables, spatial analysis, spatial queries) and cartography (map design, color theory, display of information). Depending on the quarter, students pursue individual projects of interest or client-based projects. Prerequisite: GEOG 2100 or GEOG 3100 or equivalent.

**GEOG 3420 Urban and Regional Planning (4 Credits)**

Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

**GEOG 3425 Urban Sustainability (4 Credits)**

The 21st century is being called the 'century of the city.' Now more than ever, humans across the globe call the city their home. Many of the world's most pressing crises are manifest in cities, including: greenhouse gas emissions, land degradation, high mass production and consumption, widespread poverty and hunger, and expanding socio-economic disparities. As 'sustainability' becomes part of mainstream discourse, this course explores what sustainability means for urban contexts around the globe. Arguably, the city has the potential to be the most efficient, equitable, and environmental form of modern human settlement. Covering all dimensions of sustainability from a social science perspective, this course focuses on theoretical groundings, practices of urban sustainability, and new research agendas. Major topics include cities and nature; planning and land use; urban form; community and neighborhoods; transportation systems and accessibility; livelihood and urban economies; and social justice and the city.

**GEOG 3440 Urban Transportation Planning (4 Credits)**

A specialized course in the urban planning sequence focusing on issues, practices and policies of urban transportation planning. Recommended for anyone interested in timely transportation topics, such as the feasibility and impacts of light rail transit, the planning and implementation of highway projects, and the role of freight and passenger transportation companies in transportation planning.

**GEOG 3445 Sustainability and Transportation (4 Credits)**

Sustainable transportation aims at promoting better and healthier ways of meeting individual and community needs while reducing the social and environmental impacts of current mobility practices. Given the importance of transport for economic growth, the uncertainties surrounding the availability and price of future sources of energy for transport use, as well as the social and environmental externalities of currently-utilized transport modes, it is imperative that more sustainable ways of providing transportation be developed and utilized.

**GEOG 3460 Air Transportation, High-Speed Rail and Tourism (4 Credits)**

This course delves into the world of commercial air passenger transportation, studying the foundations of the industry, its role in the travel and tourism, and strategies for the future. Foundational topics include the history and geography of air transportation, air travel and tourism, the geography of tourism, airline corporate cultures, the role of government, aviation law, regulation, deregulation, and globalization. Study of the principal elements of airline economics, finance, planning, management, operations, pricing, promotion, cost containment, marketing, and policy provide the opportunity for consideration of strategic options within the contemporary airline industry. Further discussion focuses on the planning and management of airport and airway system infrastructure, the issue of sustainable air transportation, and the role of the airline industry within the context of intermodalism. Cross listed with GEOG 4460.

**GEOG 3500 Reconstructing Quaternary Environments (4 Credits)**

Nature, magnitude, sequence and causes of Pleistocene and Holocene climatic changes; effects of climatic change on plant/animal distributions and human populations; paleoclimatic research methods. Laboratory and field trips. Prerequisites: GEOG core, ENVI 3000.

**GEOG 3510 Biogeography (4 Credits)**

Biogeography focuses on present and past distributions of plants and animals. In this course we consider a number of themes central to biogeography, including plate tectonics and biogeography, the effects of climate change of plant and animal distributions, biogeographic realms, island biogeography, biodiversity, human impacts on plants and animals, and the origins of agriculture.

**GEOG 3520 Geography of Soils (4 Credits)**

Spatial variation in soil characteristics; soil processes, soil morphology, their application in soil studies. Prerequisite: GEOG 1201-1203 Environmental Systems or instructor's permission.

**GEOG 3550 Topics in Physical Geography (1-5 Credits)**

Investigations into various aspects of physical environment.

**GEOG 3560 Fluvial Geomorphology (4 Credits)**

Examines how water and sediment interact at Earth's surface to create a variety of landforms ranging from small rills to continental-scale river systems. Introduces fundamental fluvial processes or channel hydraulics and sediment transport. Examines common fluvial landforms including alluvial streams, bedrock streams, floodplains and alluvial fans. Combines traditional lectures and in-class discussions with numerous field excursions to rivers in the Rocky Mountains and Great Plains. Prerequisite: GEOG 1203, GEOG 1218, or GEOG 1266.

**GEOG 3600 Meteorology (4 Credits)**

The basic theory and skills of weather forecasting. Topics include thorough coverage of atmosphere dynamics and thermodynamics, the evolution of various weather types, the mechanics of storm systems (cyclones, severe storms, hurricanes), creation and interpretation of weather maps, and forecasting techniques.

**GEOG 3610 Climatology (4 Credits)**

Climatology is the study of the processes that result in spatial and temporal variation of weather. This course introduces the student to the processes responsible for the transfer of matter and energy between the Earth's surface and the atmosphere and the average weather conditions that result. In addition, topics of global concern, such as greenhouse effect, El Nino, urban heat islands and acid rain, are discussed. Laboratory exercises provide an opportunity to investigate climate variation and climatic change through the use of a variety of computer simulations. Prerequisites: GEOG 1201, GEOG 1216, & GEOG 1264.

**GEOG 3620 Applied Climatology (4 Credits)**

Climatic impact on environmental systems and human behavior; techniques to investigate climatic characteristics of environmental extremes (floods, blizzards), urban climatology and socioeconomic impacts of climate. Prerequisite: GEOG 1201. Recommended Prerequisite: GEOG 3600 or GEOG 3610.

**GEOG 3630 Dendroclimatology (2-4 Credits)**

Systematic variations in tree ring width and/or density can be used to reconstruct changes in precipitation or temperature well before humans were around to record the variability. This class utilizes hands on methods to introduce the fundamental principles of dendroclimatology. Through readings and lectures, students will learn how tree ring growth can be correlated to climate change. Students will then undertake several research projects to reconstruct past climate variability in the Denver metro area using tree rings. Prerequisite: permission of instructor.

**GEOG 3640 Climate Change and Society (4 Credits)**

The science of anthropogenic climate change will be presented with an emphasis on critical evaluation of the evidence of climate change and future scenarios and migration strategies. Students will be introduced to the latest climate change research, including the Intergovernmental Panel on Climate Change report, and the most recent literature from the field. The societal and cultural implications of climate change will also be discussed. Prerequisites: GEOG 1201, GEOG 1216, or GEOG 1264.

**GEOG 3701 Topics in Geographic Information Science (1-4 Credits)**

Topics vary by instructor.

**GEOG 3720 Mountain Environments and Sustainability (4 Credits)**

Mountain Environments and Sustainability explores the unique physical and cultural aspects of high relief and/or high altitude environments. Covering one quarter of the Earth's land surface, mountains directly or indirectly impact the lives of millions of people. We examine the significance of mountains to climate, water resources, and human activities, and discuss the sustainability of these environments and communities in light of rapid changes in many mountain regions resulting from anthropogenic factors and global change. GEOG 1201, 1202, and 1203 or instructor approval.

**GEOG 3750 Topics in Human-Environment Interactions (1-4 Credits)**

This course investigates various aspects of the relationships between human societies and the natural environment.

**GEOG 3755 Geography of Health (4 Credits)**

The geography of health is a thriving area of study that considers the impact of natural, built, and social environments on human health. This course introduces students to three geographical contributions to health studies. First, it emphasizes the importance of ecological approaches to health, which consider interactions between humans and their environments, including topics such as how climate change might influence disease distributions, and how the built environment can influence patterns of physical activity. A second focus is social theory, exploring how aspects such as race, socioeconomic status, and identity play a critical role in influencing human health. A third section of the course considers how spatial methods (cartography, GIS, and spacial statistics) can help answer health-related questions.

**GEOG 3800 Geography of Colorado (4 Credits)**

This course focuses on the physical and human geography of Colorado, a state that includes the western Great Plains, the southern Rocky Mountains, and the eastern Colorado Plateau. Colorado's varied natural landscapes provide equally varied settings for human settlement and resource use. Recommended Prerequisites: GEOG 1201, GEOG 1202, and GEOG 1203.

**GEOG 3820 Kiwis and Kauris: Sustainability in New Zealand (4 Credits)**

With its tourist tagline of "100% Pure New Zealand," New Zealand prides itself as a world leader in sustainability, with great efforts made towards sustainable use of resources and renewable energy, conservation of indigenous species, and integration of indigenous Maori understandings of the land into sustainability approaches. At the same time, New Zealand faces significant sustainability challenges, particularly related to climate change, invasive species, continued reliance on extractive industries, and histories of oppression/exploitation of native peoples. This class uses a field-based case study approach to unpick some of these complex issues, as we visit local sites and explore topics such as preserving native species, sustainable resource use, ecotourism, and indigeneity.

**GEOG 3825 Geographies of International Development in Africa (4 Credits)**

What are the historical roots of (under)development in sub-Saharan Africa? How is sub-Saharan Africa typically depicted in the media? How can we explain the fact that the Niger Delta provides the bulk of Nigeria's revenue, and yet, it remains the poorest part of the country? Is climate change the major cause of persistent food insecurity in the drylands of Ethiopia and Burkina Faso? How can we make sense of the uneven geography of poverty in Ghana? What explains urban food insecurity in Cape Town, or land struggles in rural South Africa? What are the social processes underlying the spatial disparity in health status in Malawi, or gender differences in HIV rates in Nyanza province, Kenya? And why do land users often resist state conservation efforts in Tanzania? These are some of the critical questions explored in this course. The primary aim is to provide a critical introduction to the geography of sub-Saharan Africa. We will begin by exploring how "the Africa story" is told by the media, scholars and policymakers. Attention will then shift to understanding the key historical processes that shape (under)development in the region. We will cover a broad range of topics, including governance, colonial history, debt and structural adjustment, foreign aid, food and agriculture, gender, climate change, land grabbing, health, population growth, migration, remittances, and resource extraction. We cannot possibly cover all these topics in greater detail; indeed, some are too vast and complex. We will however use specific case studies to illustrate and discuss each of the topics.

**GEOG 3835 Sustainability in South Florida: The Everglades and Florida Keys (4 Credits)**

South Florida represents a unique region in the United States and faces the challenge of trying to balance a tourist economy with protection of natural landscapes and resources. The region's significant sustainability challenges include: climate change (particularly sea level rise), invasive species, fisheries management, and landscape protection. This class uses a field-based case study approach to unpick some of these complex issues as we visit local sites and explore topics such as protecting native species, sustainable resource use, and ecotourism.

**GEOG 3840 Water Resource Analysis (4 Credits)**

The focus of this course is on complex policy, economic and local, national and international, and political issues surrounding resource use in the western U.S. Issues include exploitation of nonrenewable and renewable energy and mineral resources; and flexible responses to changing public policy.

**GEOG 3870 Water Resources & Sustainability (4 Credits)**

In this course, we look at water as both a local and global resource and examine what sustainability means for human and ecological realms. After an overview of the physical processes that drive the hydrologic cycle, surface and groundwater hydrology, we examine how we humans have harnessed water for our use and how we both alter and treat its quality. We examine the legal aspects of water allocation in the U.S. and the groups and agencies that are most involved in managing and overseeing water issues. Finally, we examine the most pressing water "issues" related to wildlife, development, scarcity and conflict. We look forward to imagining the power of both the individual and the collective in meeting our future, global water needs.

**GEOG 3890 Ecological Economics (4 Credits)**

Ecological Economics is an emerging transdisciplinary endeavor that reintegrates the natural and social sciences toward the goal of developing a united understanding of natural and human-dominated ecosystems and designing a sustainable and desirable future for humans on a materially finite planet. In this course we start with a basic overview and summary of the neo-classical economic perspective with a particular focus on the recognized market failures of public goods, common property, and externalities. We begin with a reconceptualization of economic theory by imposing scientific constraints (e.g. conservation of mass and energy, the laws of thermodynamics, evolutionary theory, etc.). Using the ideas developed in this reconceptualization of economic theory we explore the implications for international trade and myriad public policies associated with the ethical, environmental, and economic aspects of sustainability.

**GEOG 3910 Geomorphology (4 Credits)**

An advanced course that examines how Earth's landforms are created by a range of physical processes. Most landforms can be viewed as a result of some combination of erosion, transport and deposition of rock, soil and sediment. The most common agents causing these geomorphic processes are water, wind, ice and waves. This course examines the processes responsible for eroding, transporting and depositing earth materials and compares these processes with the resulting landforms. Prerequisites: GEOG 1202 or GEOG 1217 or instructor's permission.

**GEOG 3920 Remote Sensing Seminar (4 Credits)**

Special topics in advanced remote sensing.

**GEOG 3930 Cultural Geography Seminar (4 Credits)**

Topics, methods and current research in cultural geography.

**GEOG 3940 Urban Geography Seminar (4 Credits)**

International comparison of economic and social, positive and negative aspects of urban systems.

**GEOG 3950 Physical Geography Seminar (2-4 Credits)****GEOG 3955 Pollen Analysis Seminar (3 Credits)**

Pollen grains preserved in sediment provide long-term records of vegetation conditions. Changing proportions of pollen types may reflect climatic fluctuation or human impacts. We review important recent research in pollen analysis (palynology), pollen sampling, laboratory techniques and pollen identification. Students are responsible for counting a number of samples and contributing data for a pollen diagram.

**GEOG 3990 Undergraduate Research Seminar (1 Credit)**

This course is designed to prepare students who will participate in faculty-supervised summer research projects. Students are introduced to research design, use of the scientific method, research expectations and reporting of results. Preparation of formal research proposal with adviser.

**GEOG 3991 Independent Study (1-5 Credits)****GEOG 3995 Independent Research (1-5 Credits)****GEOG 3999 Geographic Internship (0-5 Credits)**

Supervised internship in a government office at local, state or federal level or within private sector. Prerequisite: permission of instructor.

## Geology (GEOL)

**GEOL 2020 Historical Geology (4 Credits)**

Historical geology is the study of the evolution of Earth through geologic time. Geologic features such as rock types and fossils are used to interpret and date past events. This course specifically introduces the basic geologic principles underlying historical geology, the geologic evolution of North America, and the evolution of life on Earth.

**GEOL 2400 Geology and Ecology of the Southwest (5 Credits)**

This field class emphasizes firsthand observations of the interactions among environmental properties (including substrate geology, soils, and climate) and natural vegetation in the Colorado Front Range, Rio Grande Rift, and Chihuahuan desert regions of New Mexico and southeastern Arizona. The course also examines Pliocene and Quaternary volcanism in southern Colorado and New Mexico in addition to Paleozoic and Mesozoic geology along the uplands of the Rio Grande Rift. Prerequisite: permission of instructor.

**GEOL 3100 Environmental Geology (4 Credits)**

Environmental geology examines geologic hazards, both natural and those attributable to human impacts on the environment from urban and regional development. Specific topics may include disposal of municipal solid waste and radioactive waste; flood, earthquake, volcanic hazards; groundwater pollution and withdrawal; mass-wasting phenomena; and energy-related issues. Prerequisite: GEOL 1010, GEOG 1203 or instructor's permission.

**GEOL 3200 Sedimentology/Stratigraphy (4 Credits)**

This course reviews the origin, geologic history, and depositional environments of sediments and sedimentary rocks. Course work concentrates on the identification of sedimentary rocks and depositional environments by first-hand observations of rocks in the Denver area. Prerequisite: GEOL 1010, GEOG 1203 or instructor's permission.

**GEOL 3540 Hydrology (4 Credits)**

This course provides an overview of the hydrologic cycle with emphasis placed on the study of applied hydrology. Discussions include the fundamental characteristics of precipitation, runoff processes, calculation of flood hazards, aquifers (porosity and permeability), the geologic settings of groundwater, the basic physics of groundwater flow, and water supply and use. Prerequisite: GEOL 1010, GEOG 1203 or instructor's permission. Recommended prerequisite: one introductory statistics course.

**GEOL 3900 Geomorphology Seminar (1-5 Credits)**

Hill slopes comprise the vast majority of the Earth's land surface. It is upon these surfaces that nearly all of the human population must exist and, hopefully, flourish. Hill slopes assume various forms, and their shape influences their utility for various human endeavors. Numerous geomorphic processes operate upon hill slopes to determine their form, and human activities strongly influence the frequency and magnitude of these geomorphic processes. Consequently, hill slopes are an interface between the Earth and the human population. Prerequisite: GEOL 3010 or permission of instructor.

**GEOL 3991 Independent Study (1-5 Credits)**

## History

Office: Sturm Hall, Room 366

Mail Code: 2000 E. Asbury Ave. Denver, CO 80208

Phone: 303-871-2347

Email: [history@du.edu](mailto:history@du.edu)

Web Site: <http://www.du.edu/ahss/schools/history> (<http://www.du.edu/ahss/schools/history/>)

History analyzes the social, economic, political and intellectual changes that occur over the whole of recorded time. It prepares students to confront and manage change. The Department of History requires that students have an exposure to the broad sweep of human history, experience in comparisons across cultures, and a research seminar. The analytical and writing skills involved in a history major are valuable preparation for a number of fields. History graduates often pursue graduate work in a variety of fields, or enter careers in journalism, government, foreign service, international business, historic preservation, teaching or museum work.

## Major

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

Code	Title	Credits
44 credits, including the following:		
<b>Required Courses</b>		
HIST 2998	Issues in Comparative History	4
HIST 2990	What is History?	4
HIST 3989	Senior Seminar I	4
HIST 3990	Senior Seminar II	4
One 1000-level History Courses		4
Two 2000-level History Courses		8
Two 3000-level History Courses		8
<b>Electives</b>		8
Two Elective History Courses (can be any level)		
In order to fulfill our distribution requirements, students must take courses in at least four of the following seven subfields: United States, Europe, Premodern, Latin America, Asia, Middle East, Africa		
<b>Total Credits</b>		<b>44</b>

Students may be given elective credit for high school Advanced Placement (AP) or International Baccalaureate (IB) examination scores, at the discretion of the chair of the department. Ordinarily, no more than 4 credits of AP or IB work may go toward the history major.

## Secondary Major

### Secondary Major Requirements

44 credits. Same requirements as for BA degree.

## Minor

### Minor Requirements

20 credits in history, of which at least 8 must be at the 2000 or 3000 level.

### Requirements for Distinction in the Major in History

Students may want to consider and plan for achieving Departmental Distinction in the major. This designation is given to students who maintain a high GPA in the major and are willing to do additional coursework. In the Spring of 2020, the History Department faculty voted to adopt new requirements for Departmental Distinction. These requirements are:

1. Students must take a total of four 3000-level classes instead of the required two 3000-level classes. Given that two or three 3000-level classes are offered every quarter, history majors should plan for this when fulfilling their major requirements and be mindful of the 60-credit limit within the major.
2. Students should maintain at least a A- (3.7) average in the major with a minimum grade of B+ in Senior Seminar I OR maintain at least a B+ (3.3) average in the major with a minimum grade of A- in Senior Seminar I.
3. At the end of Senior Seminar II, students must successfully defend their thesis in front of a faculty committee. The committee shall consist of at least three history department faculty members and will include the student's thesis adviser. Thesis defenses will be scheduled toward the end of winter quarter.

**Total Credits: 48**<sup>1</sup> Fulfills one Analytical Inquiry: Society and Culture requirement.<sup>2</sup> Course only offered in Winter. May be repeated for credit at the discretion of the chair as the topic is different each year.<sup>3</sup> Course only offered in Spring. Must be taken prior to HIST 3989.<sup>4</sup> Must be taken fall of senior year.<sup>5</sup> Must be taken winter of senior year.**HIST 1110 Ancient Rome (4 Credits)**

This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1240 Comparative History of Medicine (4 Credits)**

This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1250 Food in East Asian History (4 Credits)**

This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1260 Modern South Asian History (4 Credits)**

This course will explore the modern history of the subcontinent, through the colonial experience to the postcolonial construction and division of nations, with a particular focus on India, Pakistan, and Bangladesh (although students are also welcome to take on optional readings on Sri Lanka, Afghanistan, and Nepal, among others). The course will consider the legacy of colonialism in India, and debates over whether postcoloniality is really “post.” We will explore the history of nationalisms – state, ethnic, religious, and linguistic – and the ramifications of Partition and the wars over Bangladesh and Kashmir. This course will also explore the history of South Asia in the rest of the world, through the migration of its diaspora and its role in the Bandung moments of Afro-Asian solidarity in the global struggle against oppression. We will take into account discourses regarding tradition and modernity, democracy and secularity, and the terms “freedom” and “terror” – and what this means for the lived experiences of South Asians in today’s world. Readings will include historical accounts, theoretical texts, films and literature, as well as primary sources. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1320 European Culture in the World Wars (4 Credits)**

This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments’ attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1330 History of Ireland (4 Credits)**

We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of ‘Irishness’, competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland’s evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1340 The British Monarchy (4 Credits)**

This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1350 History of the British Empire (4 Credits)**

This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland; explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political; the important role that women, gender, and racial ideologies played in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1360 World War One (4 Credits)**

Historians have argued that the First World War definitively shaped the twentieth century. It set the stage for World War II; it redefined the role of government in citizens’ lives; it brought technology full-force into power struggles between nations; it simultaneously birthed communism and fascism; and it desensitized entire generations to violence and brutality. In this class, students explore this very dramatic and influential war. Students unfamiliar with the war will more firmly grasp the historical significance of the event while students who may be familiar with the war will gain new insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.

**HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)**

When we think of the Middle Ages we tend to think a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words ‘Here There Be Dragons.’ And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)**

From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1510 War and the Presidency (4 Credits)**

This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1520 Immigrant Voices in Modern America (4 Credits)**

This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony—autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1530 History of the United States since 1865 (4 Credits)**

From the devastation left by slavery and the Civil War to the dizzying changes brought by globalization in our own time, this course sweeps through the last 150 years of the American experience. We wrestle with questions like the following: How did the Industrial Revolution, the Great Depression, two world wars and the Cold War change America, and ordinary Americans' everyday lives, and what legacies did these events leave for our own day? How have Americans defined and divided themselves—by race, gender, class, or otherwise—and how have such categories shifted over time? Where did we get our political parties and ideologies? Our work habits and habits of play? Our ideas about "big business," "big government," "American exceptionalism," or the "American dream"? As we consider these and other big questions, we also explore how historians make sense of U.S. history, and how we can make it relevant to our own times and our own lives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1550 America in the Sixties (4 Credits)**

This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes "the sixties"? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)**

The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography's 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1570 Pioneering in Colorado: Land, Bodies, & Violences in the Sand Creek Massacre (4 Credits)**

This course uses critical analysis of primary sources to understand Sand Creek as a crucial site necessary to understand the history of Colorado and Denver University. Students will critically read and analyze primary source documents including newspaper articles, testimonies from massacre participants and survivors, artwork, material culture, letters, oral history, music, and proclamations to understand Sand Creek as a place and a history related to the creation of Colorado and Denver University. Additionally, the class will visit specific sites associated with Sand Creek to understand place-making and memorialization as a function of historical meaning-making and analysis. These sites include the Sand Creek Massacre site, History Colorado, the Silas Soule memorial plaque, and Riverside Cemetery (where Silas Soule and Joseph Cramer are buried). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)**

This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)**

This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1705 Modern African History (4 Credits)**

This course is a survey and introduction to modern African history from the late 19th century to the present. We will explore the period of European colonialism and its postcolonial legacy, focusing on the experiences of Africans at this time. Themes addressed in this class will include gender, age, class, race and ethnicity, and the historical legacies of both the precolonial and colonial eras to the construction of the postcolonial nation-state. Assignments will be geared towards teaching students to think and write like historians, and understand the basic tenets of historical inquiry, such as how to use primary and secondary sources and differentiate between them, and construct a basic historical argument that advances historiographical understandings of the topic in question. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1715 Middle Passages: Atlantic World Migrations (4 Credits)**

Middle Passages examines first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians in order to trace the origins, expansion, and decline of traffic in captive Africans in addition to its impact on four continents. The course seeks to answer, among others, the following questions: Why were Europeans in Africa? Why were Africans enslaved? What did African experience on the journey to slavery in the Americas? Which came first, racism or slavery? What is the middle passage? If we want to understand how the US (and not only the South), Western Europe, parts of Latin America, and much of Africa got to be how they are now, we need to know something of the human commerce that profoundly shaped them. In this course, students consider individual, national, and institutional experiences of the Middle Passage by exploring a textbook that overviews the histories of the trans-Atlantic Slave Trade and accounts from a series of primary sources.

**HIST 1725 African American History to the Civil War Era (4 Credits)**

History 1725, African American History to the Civil War Era, is designed to introduce students to the trends, events, issues, and people that shaped African American history from Colonial America through the Civil War. In particular, this course will focus on presenting Black people as active agents in the American historical narrative that significantly shaped their lives even within the context of slavery. To this end, this course sets out to discredit American myths about people of African descent, examine critical elements of black slavery and freedom in the United States, analyze the slave experience with particular emphasis on black resistance and resiliency, and identify the economic, political, and social factors that shaped and were shaped by African slaves, their descendants, black communities and institutions, and plantation society. If we want to understand the US (and not only the South), but we also need to know something about how human commerce and those that became commodities profoundly shaped the nation. By examining first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians, we trace the origins and narratives of Africans in America and their descendants. We seek to answer, among others, the following questions: Why were Africans enslaved? What did Africans and their descendants experience in slavery in the Americas? What did free and freed African Americans experience in the Civil War era? What influence did African Americans have on the North and South conflict and its resolution? In addition to treating the above questions, I intend to return often to two major content themes. First, this class is concerned with tracing the historical contours of the African American experience in America, noting the similarities in experiences of different gender, age, and (dis)ability categories and yet important variations over time and place. Understanding this experience is crucial for a comprehensive understanding of American history. Second, we explore the changing influences of labor and capitalism and how they shape people, places and institutions. We note in this course that African Americans fundamentally affected the social and economic lives and futures of the world, underscoring the global relevance of this history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1850 20th Century LGBTQ History in the United States (4 Credits)**

This course uses a cultural history approach to explore the experiences of lesbian, gay, bisexual, transgender, and queer peoples in the "long twentieth century" (1880s-2010s) United States. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1900 Veterans Stories (4 Credits)**

This course will examine the history of Veterans and Veteran issues in the United States from the Civil War to the present. Students will learn about Veteran issues from multiple guest speakers and work to preserve and commemorate the historic contributions of Veterans. Students will participate in a variety of research projects, including conducting oral histories/interviews with members of Denver's Veteran community, regarding their life experiences and their military service. Students will also research the lives and legacies of Veterans buried at Fort Logan National Cemetery, in the service of various Veteran community projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1988 Study Abroad Resident Credit (0-18 Credits)****HIST 2015 Ancient Greece (4 Credits)**

A survey of the history of the Greeks and their civilization.

**HIST 2022 The Roman Empire (4 Credits)**

This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2030 Ancient Near East (4 Credits)**

This course traces the history of the ancient Near East from the earliest civilizations in the Fertile Crescent down through the Persian Empire. Particular attention is given to the political, military, and social developments in the region as well as the cultural contributions of Mesopotamia to the history of the ancient Mediterranean world.

**HIST 2071 American Jewish Experience (4 Credits)**

This course examines the history of the American Jewish immigrant experience from colonial times to the present as a means of trying to understand how newcomers navigate the processes of adaptation, acculturation, and integration into American life. We will pay careful attention to issues of race, gender, and class, and we will examine the impact of xenophobia and immigration laws on how Jewish immigrants were welcomed and treated.

**HIST 2074 Holocaust: Europe & Colonial Contexts (4 Credits)**

This course presents the history of the Holocaust as perpetrated by Nazi allies Romania, Hungary (occupying Romania's Transylvania), and Vichy France with its corresponding African colonies. With the United States Holocaust Memorial Museum's Encyclopedia of Camps and Ghettos Vol. 3 serving as the foundation, students will be required to read select entries and consider the primary sources that contributed to them, including memoir and the rich oral history of the Shoah Archive. The most recent scholarship by experts in these fields of Holocaust history as well as relevant films will be studied. This course asks us to comprehend what the full extent of this genocide was during WWII, and challenges us to answer how it fits into the conventional teaching of the Holocaust.

**HIST 2075 Nazi Art Looting (4 Credits)**

This course examines the history and legacy of Nazi art looting, which continues to impact museums and the art world today. We begin with an overview of plundering mechanisms used by the Nazis and their collaborators, and discuss restitution efforts since the end of the Second World War. Students carry out a research project focusing on a case study, working in small groups with other students. The work is interdisciplinary and experiential, with direct relevance to ongoing restitution cases.

**HIST 2105 The Dark Ages: Survey in Early Medieval History (4 Credits)**

This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning with the late Roman Empire and stretching to the year 1000, a period often referred to as the "Dark Ages." Throughout the semester we will read primary texts representative of ideas and historical developments that shaped the Early Middle Ages. Central to this course will be three major themes: the development of western Christianity, the ongoing struggle between centralizing governments and local powers, and the effects of cross-cultural contact on western society. As we examine topics such as the fall of Rome, the rise of the three great cultures of the early medieval period (Christendom, Byzantium, and the Islamic world), and the formation of kingdoms and states our readings and lectures will focus on one or more of these major themes as a way of approaching the complex and often unfamiliar pre-modern world. By analyzing and evaluating these texts and their authors we will gain a better understanding of the past and a clearer idea of how the institutions and ideas of the pre-modern world changed over time and how they continue to impact and influence modern societies.

**HIST 2106 The High Middle Ages: From Dark Age to Rebirth (4 Credits)**

This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning in the year 1000 and culminating in the end of the medieval period in 1453. The "High Middle Ages" was a period of tremendous development and innovation. The first universities appeared, men and women argued about belief and practice, traders and warriors forged new connections with the wider world, and the very structures of modern Europe appeared for the first time. As we examine topics such as the Crusades, heresy, popular revolt, and cross-cultural trade our readings, lectures, and discussions will examine how we can understand the development of "Western" civilization and the ways in which the medieval past continues to inform our modern lives.

**HIST 2120 Europe in the Renaissance/Reformation (4 Credits)**

Social, political, intellectual and cultural history.

**HIST 2125 Cold War Europe (4 Credits)**

Examines key issues in the history of Europe from the end of the Second World War to the disintegration of the Soviet Union. The clash of twentieth-century ideologies provides a framework for understanding European relations with the United States and the Soviet Union, along with broader political and cultural trends, decolonization, economic and social change, and class, gender, and race relations.

**HIST 2131 Early Modern Europe: 1600-1789 (4 Credits)**

Social, political and intellectual history of Europe during period of the Old Regime and Enlightenment.

**HIST 2132 19th-Century Europe (4 Credits)**

Social, political and intellectual patterns from French Revolution to outbreak of World War I.

**HIST 2210 The French Revolution and Napoleon (4 Credits)**

This course examines the many ways in which the French Revolution and Napoleonic period (1789-1815) marked a significant break with the past—politically, socially and culturally. Yet these changes could not occur with some continuity in social and political institutions. We will work to answer a central question: as Napoleon dominated most of the European continent militarily and established a dictatorship at home, to what degree was he promoting ideals of the Revolution?

**HIST 2260 Jewish Food: From the Bible to Bagels (4 Credits)**

"We are what we eat," the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion, consumption, and identity. The study of Jewish food practices is a study of dualities: kosher and trayf (non-kosher), meat and milk, modernity and tradition, insiders and outsiders, men and women, authentic and artificial, ethical and unethical, and more. Beginning with biblical laws about permitted and forbidden foods and ending with a study of the emergence of the modern kosher food industry in the United States, our course will examine how Jewish food and foodways have evolved over thousands of years in response to social, political, cultural, and economic change. We will explore the links between Jewish food practices and local cultures in order to understand how each one shapes the other, and to become familiar with the diversity of Jewish foodways across the Diaspora and within Israel and the Middle East. We will also explore the politics of authority and authenticity with regards to Jewish food — what makes a food "Jewish" or kosher, and who decides? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2300 The Arab-Israeli Conflict, 1881-2001 (4 Credits)**

This course introduces students to the Arab-Israeli and Israeli-Palestinian conflicts from the initial Jewish migrations to Palestine starting in the 1880s through the failed Oslo Accords. Key themes that will be covered include the origins and development of Zionism and Palestinian nationalism, the impact of Ottoman and British rule in Palestine on Jews and Palestinians, differing narratives about the origins and development of the conflict, and the impact of U.S. and Soviet involvement in the Middle East on Israelis, Palestinians, and Arabs. In addition students will be exposed to historiographical debates surrounding various aspects of the conflict, notably the 1948 War. Cross listed with JUST 2300.

**HIST 2320 US Foreign Policy in the Middle East (4 Credits)**

This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.

**HIST 2335 Early Islamic Empires in Comparative Perspective, 632 CE - 1300 CE (4 Credits)**

This course looks at the social, economic, political, and environmental histories of Islamic empires from the 7th through the 13th centuries CE. In doing so, this course also examines how early Islamic empires ruled over both Muslim and non-Muslim, especially Christian and Jewish, populations. Additionally, this course aims to compare these Islamic empires with non-Islamic Afro-Eurasian empires from the same general time periods. Students should be aware that this course will not cover every early Islamic empire but will adopt a case-study approach, meaning the professor will select key empires to examine.

**HIST 2400 Women in European History: 1800-Present (4 Credits)**

A survey of women in the modern age. Topics include women's work, sexuality, cultural movements, feminism and domestic life.

**HIST 2401 European Women's History: 1500-1800 (4 Credits)**

Changes and continuities in women's experiences during the early modern period, as well as changing ideas about gender; family, work, religion, sexuality, political power.

**HIST 2405 World War Two in Europe (4 Credits)**

World War Two (1939-45) was the most devastating conflict the European continent experienced, affecting soldiers and civilians in equal measure, devastating cities and infrastructure, and setting the scene for the ideological "cold war" that dominated European politics (1945-89). This course examines different aspects of the war from the perspectives of soldiers and civilians. In this course, students will examine and engage with a variety of sources (diaries, memoirs, military newspapers, official records, interviews, documentaries) in order to more fully understand the events of the war. Students will also examine sources from individuals and groups in diverse countries and situations, piecing together a complex narrative of this terrible war.

**HIST 2410 Histories of the Body (4 Credits)**

This course explores the histories of human bodies. The body has been a focal point to social, political, and cultural discourses throughout history. Based on literature of human difference through sex, gender, (dis)ability, age, and body/mind distinctions, this course aims at leading students to deepen their perspectives on the body and its social, racial, and philosophical underpinnings. We will examine the body in different historical periods to explore the developments of ideas surrounding the production of the body as representative of the cultural reality of the time. We will move within and alongside time and ideas to provide a depth of understanding and connect the past to the present. How is race connected to skin? What is the impact of ideas of race, gender, and geography on the perception of the body? What is a perfect body? By asking and contemplating these questions, students will be able to broaden their historical understanding of the body, which will contribute to their scholarship in history and other disciplines.

**HIST 2450 History of the Italian Mafia (4 Credits)**

For two centuries, an entity called "Costa Nostra" has dominated the histories of Sicily and Italy. Costa Nostra has long been a shadowy and poorly-understood organization, yet it has changed the world in dramatic and unexpected ways. In this class, students learn what the Italian Mafia is and explore its history in Italy, particularly the Mafia's developing relationship to the law, the Italian government, and Sicilian culture. Students examine the nineteenth-century origins of the Mafia as well as the more recent "Mafia Wars" (1962-69 and 1970-82) that rocked Italy and resulted in the first widespread prosecution of Mafiosi. The recent trials of notorious Mafiosi have led to political scandal and charges of conspiracy, collaboration, and cover-up at the highest levels of Italian government. Lastly, students learn about the efforts of the Anti-Mafia movement to reform and redirect Italian and Sicilian culture and society.

**HIST 2510 American History to 1789 (4 Credits)**

Encounters between Native Americans, Europeans, and Africans in the American colonies; the Revolution, the confederation period; the framing and adoption of the Constitution.

**HIST 2520 American History: 19th Century (4 Credits)**

Establishment and development of new nation; emphasis on political history; experience in analysis of source materials.

**HIST 2525 Great Depression in America (4 Credits)**

This course will investigate the social, political, economic, and cultural dimensions of the Great Depression in America. Students will be exposed to a variety of sources, including photographs, posters, film, fiction, and documentaries, as well as more traditional historical sources, both primary and secondary.

**HIST 2530 American History: 20th Century (4 Credits)**

This course surveys the major political and social developments in the United States since the turn of the century, including the Progressive Movement, World War I, the Depression and New Deal Liberalism, World War II, the Cold War and American internationalism, the Civil Rights Movement and the growth of feminism, the Great Society, the Vietnam War, and the Watergate crisis.

**HIST 2531 Twentieth Century Native American History (4 Credits)**

This class reviews Native history from the late 19th century to the present, focusing on the interplay between large institutions and structures – such as federal and state governments, or the US legal system – and the lived, local experience of tribal communities. The major themes followed throughout the course of the semester include: place, space, and indigeneity (indigenous identity).

**HIST 2541 The Roots of Modern America (4 Credits)**

This course surveys one of the most tumultuous periods in U.S. history, one that encompassed industrialization, massive immigration, urbanization, settlement in the American west, and the confrontation between Victorian and Modern culture. Special attention is paid to asking how political, cultural, and social dissent has been defined through time. Topics include Darwinism and social Darwinism, capitalism and its dislocations, agrarian and labor radicalism, cultural and political radicalism, the progressive movement, feminism, the home front during World War I, and the aftermath of the war.

**HIST 2551 The American West Since 1860 (4 Credits)**

Everyone knows the romantic and violent mythology of the Old West: cowboys and Indians, lawmen and gunslingers, trappers, miners, railroaders, homesteaders. This course explores the history behind the myths. Sweeping from the Civil War era to the resorts and suburb of today's West, we follow such themes as the history of western land and resource use; the migration of peoples and the communities they created; the story of racial, religious, cultural, and political conflict; and the significance of those famous western myths to the nation as a whole.

**HIST 2555 United States Since 1945 (4 Credits)**

This course examines the social, cultural, economic and political developments that have shaped life in the United States since the 1940s. Special attention is given to the Cold War, suburban America, the civil rights movement, social conflict in the 1960s, and the rise of postwar conservatism.

**HIST 2565 The Church in American History: Challenges and Changes in the Protestant Tradition (4 Credits)**

For most of its history, a Protestant majority dominated religion in America. At times, Protestants seized new opportunities to shape and reshape the course of the nation. At other times, influence waned and tensions mounted. This course surveys the history of religion in the U.S. with a primary focus on the challenges and changes within the Protestant church as it has navigated a shifting and increasingly pluralistic culture. We explore how the faithful—from John Winthrop to the modern day evangelicals—have attempted to create a "city upon a hill" through their beliefs, practices, movements, and institutions. Special attention is given to Puritanism, disestablishment, revivalism, Mormonism, the Civil War, the Social Gospel, fundamentalism, civil rights, modern evangelicalism, and pluralism. Cross listed with RLGS 2565.

**HIST 2570 Civil War & Reconstruction (4 Credits)**

This course covers the causes and consequences of the most important conflict in American history. We will investigate the problem of slavery, the question of states' rights, the sectional crisis, the experience of war, the role of Lincoln, the struggle over reconstruction, and the meaning and memory of the war in American life.

**HIST 2575 Disease in Early America (4 Credits)**

Scholars have recently focused their attention on the way that diseases - Yellow Fever, Smallpox, Measles, Malaria - shaped the social and political landscapes of early America. In this course, we take up this investigation by examining both the diversity and pervasiveness of disease and the ways that non-human agents such as pathogens and insects had a destructive impact on African, European, and Indian peoples and influenced the course of events in early America. Our study therefore ranges from the virgin soil epidemics that decimated indigenous peoples to how smallpox outbreaks affected the Revolutionary conflict. In addition to examining the medical discourse of causes, symptoms, and treatments, we consider how disease influenced perceptions of personal and familial interactions, race and class relations, community and public health, and national culture and literature. For our investigation, we pay particular attention to the 1793 Yellow Fever outbreak in Philadelphia.

**HIST 2630 American Women's History (4 Credits)**

This course is a survey of U.S. women's history from the colonial period to the present. It examines the social, cultural, economic, and political developments shaping American women's public and private roles over several centuries, in addition to the ways in which women gave meaning to their everyday lives. Particular attention is paid to the variety of women's experiences, with an emphasis on the interplay of race, class, ethnicity, and sexuality. Cross listed with GWST 2630.

**HIST 2640 Race and Ethnicity in Twentieth Century America (4 Credits)**

This course will examine America through its cultural and racial diversity, comparing and contrasting the historical experiences of African Americans, Latina/os, European Americans, and Asian Americans over the "long" twentieth century. Together we will investigate the ways in which major events and episodes in the century affected a variety of racialized populations, and how these groups responded to their social and political environment. Attention will also be paid to changes in "American" national identity and citizenship over time, helping students think about such questions as: who is an "American"? And how did that definition change over time? How did debates over citizenship reflect Americans' ideas of race, class, ethnicity, and gender? How were racial and ethnic minorities, women, and immigrants defined at various times in opposition to Americanness?.

**HIST 2645 Immigration in Twentieth Century America (4 Credits)**

Immigration holds a peculiar place in our national narrative. At the same time that the United States celebrates its identity as a self-proclaimed "nation of immigrants," immigration policy and the presence of diverse peoples from around the world have historically generated intense battles over identity, national security, and civic belonging. This service-learning history course examines major topics in 20th century U.S. immigration history. Utilizing a thematic and comparative approach, we will explore how immigration and immigrants have shaped the social, political, and economic contours of American life, and how discourses of race, gender, sex and class have determined how Americans conceive of immigrants and of the nation. As part of their service-learning curriculum, students will examine salient issues in political discourse today—including xenophobia, detention and deportation policy, border policing, and the human side of the immigration debate—by volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

**HIST 2680 Historical Memory (4 Credits)**

Why do successive generations rewrite the stories that teach Americans their history? Why do various social groups endorse alternate versions of past occurrences? This course explores the idea of historical memory by examining the narratives (stories) that have been composed about our country's past and how these stories have been revised over the years. We will focus on several major symbols of the American past and the narratives that have developed surrounding them. Our goals are to understand how and why these sites of memory have been interpreted and reinterpreted over the years.

**HIST 2701 Topics in History (2-4 Credits)****HIST 2702 Topics in History (2-4 Credits)****HIST 2703 Topics in History (2-4 Credits)****HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)**

In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2720 Paved Paradise? Nature and History in Modern America (4 Credits)**

Oil drilling and outdoor recreation, "medical miracles" and natural disasters, the making of national parks and suburban landscapes, and political battles over pollution, property rights, energy, wilderness, endangered species, and toxic waste all belong to the environmental history of the recent U.S. In this class we explore that history, weighing how Americans from the late nineteenth century to the present day have thought about nature, modified and made use of it, and competed for control of resources and land.

**HIST 2850 Imperial China (4 Credits)**

In this class, students learn about change and continuity in imperial China, from the third century BC to 1911 AD. Over the course of this more than two thousand years, what we refer to as "China" changed a great deal politically, economically, and socially. We will explore many of these changes, while at the same time keeping an eye on the continuities that continued to characterize the place and its people over the long term.

**HIST 2870 Modern China (4 Credits)**

In this class we focus on China from the nineteenth century to the present. We examine historical change and continuity, including the revolutions that created the Republic of China and the People's Republic of China, the transformation of traditional values, economic liberalization in the post-Mao Zedong era, and the challenges that China has faced in recent years.

**HIST 2885 Migration, Mobility, and Movement in Africa (4 Credits)**

This course will span the precolonial, colonial, and postcolonial eras of African history to consider narratives of historical migration within and beyond the continent. Central to these narratives are ideas of indigeneity and foreignness, firstcomer and newcomer status, articulated in the colonial and postcolonial period as differences of race and ethnicity. Through this course, students will be introduced to the historiography of migration in Africa, as well as theories and methodologies based on linguistics, oral traditions, and archaeology. We will begin with the Bantu expansion patterns of second millennium BCE up to 1500 CE, considering the linguistic trajectory that this migration took in considering the origins of modern language groups on the continent. We will then move on to Indian and Atlantic Oceanic networks of trade and migration, including the slave trades that led to the dispersion of peoples both within and outside of the continent, and the creation and recreation of kinship groups and polities. We will consider the history of the mfecane in southern Africa, or the period of dispersal and warfare that led to wide-scale migration throughout the region in the nineteenth century. We will also explore the histories of migration to the continent by European colonizers as well as the settlement of communities from the Middle East and South Asia as part of systems of indentured labor as well as free migration. Finally, this course will take a look at contemporary issues of citizenship and xenophobia in postcolonial nations. All required readings for the course will be posted online.

**HIST 2910 Colonial Latin America (4 Credits)**

This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2920 The Making of Modern Latin America (4 Credits)**

This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit each of these locations, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

**HIST 2940 Sports and Empire (4 Credits)**

This course will look at the history of sports and colonialism over the past two centuries, considering the ways in which imperialism led to the dissemination of Western sporting traditions and culture to the global south, focusing in particular on British and French colonies in Africa and Asia (although we also take a few trips to the Caribbean, too). Each week, we will look at the history of a different sport, including cricket, tennis, soccer, golf, rugby, and hockey, and explore the intersection of race, class, and gender in how these sports were played and transformed in the imperial world. We will consider the ways in which sport was used not only as an element of the racialized "civilizing" mission of imperial ventures, but also how sport was coopted by indigenous populations to resist colonial structures of segregation and oppression. This class will ask us to reconsider the intersections and divergences in the way sports are both played and viewed by national sporting teams, local leagues and schools, and transmitted to audiences through live viewing, television, radio, and other forms of media. We will also look at the representations of sports and colonialism through films, fiction, and television shows. Finally, we will analyze the postcolonial legacies of colonial sporting cultures after decolonization, looking at the ways in which countries in the global south have taken over transnational leagues and institutions to make what were once colonial and European-dominated sporting cultures their own.

**HIST 2945 Slavery and Samba: Race and Ethnicity in the Making of Modern Brazil (4 Credits)**

This is a survey history course focused on how race and ethnic relations helped shape the historical formation of the Brazilian society. The course offers students an opportunity to study the historical evolution of Brazil, from the colonial period to the present day, as a way to understand how the historical exclusionary economic, political, and social structures of the country were shaped by racial elements, as well as how traditionally excluded groups have historically coped with and reacted to this reality.

**HIST 2950 U.S. and Latin American Relations: The Historical Struggle for Autonomy (4 Credits)**

This course examines how Latin American nations have tried to maneuver in the world sphere under the dominant role played by the United States in the hemisphere. Latin American countries and the United States have had a complex and, at times, difficult relationship that dates back to the early nineteenth century. In response to the challenges of this complicated relationship, Latin American nations have adopted a range of strategies to deal with the United States, most of which are examined in this course.

**HIST 2955 Latin America at the Movies (4 Credits)**

This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2988 Study Abroad Resident Credit (0-18 Credits)****HIST 2990 What is History? (4 Credits)**

Introduction to historical concepts, methodologies and historiography. Intended for history majors who will take Senior Seminar the following fall.

**HIST 2998 Issues in Comparative History (4 Credits)**

This is a team-taught course in comparative (either geographical or temporal) history. Each time it is taught, it addresses a particular theme or topic from a comparative approach. Students are exposed to different approaches to the study of history, as embodied in the work of the individual faculty members.

**HIST 3100 Cities and Society in Latin America (4 Credits)**

This course approaches the history of Latin America through the prism of its cities, paying particular attention to the ways in which the urban environment defined and was affected by the regional path of socio-economic and cultural development. In addition to examining how cities evolved, and how people have therein lived (worked, engaged in political activities, etc.), we seek to understand how cities were historically conceived as a primary focus of public policies and projects to the goal of modernization in the region.

**HIST 3275 The Past and Afterlives of Apartheid (4 Credits)**

In 1948, after a close election, a government founded on the platform of apartheid, or a radical form of racial segregation, came into power in South Africa. Apartheid as a system remained in place until 1994. This seminar delves into the roots and trajectory of apartheid, and considers its effects on the lives of South Africans. As a 3000-level topics course, the readings for this course will be interdisciplinary, but will be founded in historical methodology and process, while also considering representations of apartheid and the history of South Africa through mediums such as literature, film, music, and sports. While the origins and institutions of apartheid will be studied, as well as the history of South African nationalist and resistance movements, one of the goals of this course will be to look at the lives of ordinary South Africans, and how they resisted the apartheid state in more quotidian ways. This course will also focus on the moment of 1994 and the legacy of apartheid in South Africa's postcolonial future, one in which the ideal of a rainbow nation was disrupted by the persistence of structural inequality and the memories of violence brought up by the Truth and Reconciliation Commission. We will also explore the comparative literature between apartheid South Africa and Jim Crow in the United States, considering the transnational implications of institutions of white supremacy and the legacy of British colonialism and white nationalism across the globe, as well as the fight against apartheid led by the independent nations of the global south in the United Nations.

**HIST 3335 The Viking World (4 Credits)**

In the late eighth century Europe was rocked by the first of the Viking attacks. Over the next two centuries they left a legacy that has been immortalized in books, TV shows, and movies. But what drove these renowned seafarers to set sail from Scandinavia to shores as far as North America and the Black Sea? In this course we will examine the world of the Vikings, looking at the social, cultural, and political changes that the Viking Age ushered in not just in Scandinavia but across Europe. We will discuss how raiding and trade went hand in hand, how new ideas of kingship and worship crossed cultural boundaries, and the ways in which history and legend overlap, coloring our ideas of the medieval past.

**HIST 3340 Popular Culture in Early Modern Europe (4 Credits)**

Early modern European popular culture including witch-craft, magic, fertility cults, popular religion, gender roles, carnivals and festivals, riots, and folktales.

**HIST 3345 Women and Gender in Early Modern Europe, 1500-1800 (4 Credits)**

It is easy to assume that today's ideas about gender roles have always existed, but beliefs about women's and men's "natural" behavior have changed dramatically over time. In 1500, for instance, it was a well-known fact that women are sexually voracious creatures who needed strict control to keep their appetites in check; by 1800, it was an equally well-known fact that women are inherently chaste and modest. The ideal male in 1500 was someone who used violence to maintain his authority; in 1800, masculinity was about self-discipline and politeness. In this course, we explore changing ideas about femininity and masculinity in the early modern period and consider how those changes related to broader shifts in culture and society.

**HIST 3350 Social History-Modern Britain (4 Credits)**

This course investigates the intersections of class, gender, and race in nineteenth-century British society. During this period, Britain became the preeminent world power thanks to its spectacular industrialization and its even more impressive empire. Such success often fostered smugness and complacency, yet British society was also riddled with dissension as people struggled to cope with the enormous changes they were witnessing. Discussions focus on the ways in which Victorian people themselves understood their society and its problems, and how they attempted to construct solutions to those problems. Who was implicitly or explicitly excluded from British society? As we consider these topics, we use a variety of secondary and primary sources, including fiction; one goal of the course is for us to think about how to integrate different kinds of sources as we analyze historical problems and create our own interpretations. Cross listed with MUAC 3350.

**HIST 3351 Crime & Lowlife in 18th & 19th-Century London (4 Credits)**

How did poor people survive in London during the eighteenth and nineteenth centuries? Why did people commit crimes, and what kinds of crimes did they commit? What punishments did they face if they were caught, and what did their trials look like? What were the norms and expectations governing social responses to poverty and crime? This course will consider some of the ways historians have tried to answer those questions, but it will focus above all on exploring the primary sources that enable us to develop our own answers. In order to do so, students will dive deep into an extraordinary archive: the records of trials held at London's Central Criminal Court, more commonly known as the Old Bailey. These documents give us information not just about criminals but about victims and bystanders; they provide insights not only into criminal justice but into the everyday lives of ordinary people. Other archival material will allow us to trace the lives of criminals after conviction, to see what kinds of consequences they faced. We will spend most of our time on the period between about 1780 and 1880.

**HIST 3355 Latin America's Cold War (4 Credits)**

The Cold War is usually thought of as a conflict between superpowers in a bipolar world. Often, this interpretation omits the important histories of non-industrial or developing countries. This course will explore the experiences of Latin America during on the most important and impacting socio-political, economic, ideological, cultural, and diplomatic contests ever faced by human societies. The course will explore the motives and consequences of the US government's actions to counter the perceived Communist threat, as successive administrations expanded intelligence gathering, increased military and economic aid, backed anti-communist government in Latin America, and used US troops in direct military interventions. Students will engage with materials and learn about the interaction between historical experiences taking place in a global, regional, national, and local realities. In so doing, the history of the Cold War will be examined as a complex web or interrelated conflicts, projects and events. Students will get an overview of the events and major interpretations of the Cold War in Latin America. By engaging with class materials and assignments, students will refine their analytical skills, research abilities, historiographical knowledge and narrative expressions.

**HIST 3370 Comparative Fascism in Europe (4 Credits)**

A comparative survey of fascist Italy and Nazi Germany, from the origins of fascist movements in the 19th century to the establishment of political regimes, World War II and the Holocaust.

**HIST 3372 Nations and Nationalism (4 Credits)**

This seminar will focus on the twin processes of nation-building and nationalism in Europe. We will look at how the idea of an organized nation-state took root and how people came to think of themselves as belonging to a particular nation. We will examine these processes by using different national examples and by taking a variety of approaches—cultural, social, political—to understanding what a nation is.

**HIST 3375 Empire: Revolt and Repression (4 Credits)**

This seminar examines imperialism through case studies of European powers' repression of anti-colonial revolts. We study, for example, the case of Algeria, which gained independence from France in 1962 after a brutal war of independence. We discuss the establishment and nature of the empire in the mid-nineteenth century, the moderate decolonization movement beginning in the early twentieth century, and the radical revolt of the 1950s that prompted the French to use torture in counter-terrorism operations. This case study also is relevant to post-9/11 U.S. foreign policy, when the George W. Bush administration was widely condemned for its use of "enhanced interrogation techniques" at Guantanamo Bay and other detention sites. Facing criticism from around the world, Secretary of Defense Donald Rumsfeld studied the history of French operations in Algeria and the French response to allegations of human rights abuses. In light of this recent history, we examine the lessons that the history of French Algeria teaches us about war, terrorism and counter-terrorism in our own times.

**HIST 3380 WWII History and Memory in France (4 Credits)**

This seminar examines the history and memory of World War II in France. We discuss French collaboration with the Nazis and resistance, investigating myths and reality, as documented in historical research. Students analyze a variety of sources, such as diaries, memoirs, poetry, monuments, films, and media broadcasts.

**HIST 3400 Revolts and Revolutions in the Afro-Atlantic World (4 Credits)**

This course uses the examples of major and general slave revolts and acts of resistance which include the Haitian (1791-1804) Revolution as material that students can use to practice the skills of professional historians. We will study the basic concepts and methods of Afro-Atlantic history, with a focus on free, freed, and enslaved people acting during the Age of Revolutions. We will examine the slave revolts in Jamaica (1673, 1690, and 1745 and 1759) Stono (1739), New York (1712), Haitian Revolution (1791-1804), New Orleans (1811), Barbados (1816), and Southampton, (1831) through an Afro-Atlantic perspective, exploring the relevant scholarship and critically analyzing primary sources. In the process, we will consider the following questions: What makes an event "Afro-Atlantic"? What is the Atlantic scope? Why do historians think of the Age of Revolutions as a discrete, unique historical period? How common were slave revolts? What were the local and international dimensions of these political events? In addition to treating the above questions, I intend to return often to two major content themes: The significance of historical contours of the slave revolt and resistance, noting its similarities and yet important variations over time and place. Second, we explore the changing influences of resistance to oppression, power and slavery and how they shape people, places and institutions. We note in this course that revolutions fundamentally affected the social and economic lives and futures of the world and can be expansively defined.

**HIST 3455 Living Dangerously: Hazards and Disasters in American History (4 Credits)**

Monster storms, deadly pandemics, climatic doomsday scenarios, tragic accidents like the Titanic: our news, popular culture, and national nightmares are filled with imagery of disasters. They make for upsetting and almost irresistibly gripping stories, but the stories too often fall into cheap sensationalism, simplistic morality tales, and other clichés. In this seminar, sweeping from pre-Columbian calamities to Hurricane Katrina, covid, and the climate disasters of our own time, we'll move past the clichés to consider the historical significance of disasters in America: how they've disrupted people's lives, but also reshaped ideas of what's "natural" or "normal." We'll ask: what roles have humans played in "natural" disasters like floods, droughts, wildfires, and earthquakes? How have Americans tried to guard against environmental hazards, and what unintended consequences—including new kinds of disasters—have resulted from these efforts? We'll also study why some people are more vulnerable than others, and how environmental hazards and disasters have helped shape social inequality. Disaster history not only sheds new light on America's past, but also intertwines it with environmental questions that are literally matters of life and death—so the class welcomes students of history, environmental studies, sustainability, politics and public policy, geography, and other fields too.

**HIST 3510 American Revolution and Its Background (4 Credits)**

Causes, progress, consequences and significance of movement for independence in light of American colonial experience and problems of imperial authority.

**HIST 3570 American Thought and Culture (4 Credits)**

This course exposes students to writers, artists, philosophers, and reformers who have addressed some of the major intellectual and cultural transformations related to modernity: the problems of knowledge and communication, the struggle to achieve a democratic and equal community, and the endeavor to build a national culture.

**HIST 3620 United States Involvement in the Persian Gulf, 1933-Present (4 Credits)**

This course looks at U.S. involvement in the Persian Gulf from the initial search for oil in Saudi Arabia up until the so-called "Arab Spring". The main focus of the course is on U.S. relations with Saudi Arabia, Iran, and Iraq although Kuwait and other Gulf States, as well as broader regional developments, will also be discussed. Emphasis is placed on developments related to the free flow of oil during the Cold War and increasing U.S. involvement in the region following the first Gulf War of 1991.

**HIST 3650 Native Crude: Indigenous Oil Politics and Activism (4 Credits)**

The extraction and development of oil resources is one of the central issues driving U.S. geopolitical policy in the late 20th and early 21st centuries. As the U.S. government engages in covert and overt overseas incursions in order to secure oil supply, we have also reevaluated our domestic supply priorities. Both these dynamics—as well as the work by multinational oil companies to continually explore and develop/exploit new oil resources—have led to fraught negotiations between states, multinational corporations, and indigenous populations across the globe. This course explores the history of such past and present negotiations using books, articles, and documentary films.

**HIST 3670 The U.S. Home Front in World War II (4 Credits)**

This course examines the social changes taking place on the U.S. home front between the late 1930s and 1940s, including an investigation of the effects of war on American government, society, culture, and economy. Particular attention is paid to the war's impact on gender, ethnicity, race, and everyday people's lives.

**HIST 3680 The Strange History of American Suburbia (4 Credits)**

Everyone knows the emblems of American suburbia: single-family houses with attached garages, grassy lawns, curving streets and cul-de-sacs, office parks and shopping malls. But there's a history behind these settings that's poorly understood - that that is key to understanding much about the U.S. Suburbia sheds light on American popular attitudes toward nature, technology, health, politics, and patriotism, and on the complicated dynamics of race, gender, family, class, and religion in American society. In this course, we explore how the U.S. became a "suburban nation," from the Romantic retreats of the nineteenth century, through suburbia's triumphant yet troubled "golden age" in the 1950s, to the stereotype-shattering suburbs of our own time. We consider the surprisingly powerful ways suburbia history has shaped U.S. history more broadly.

**HIST 3703 Topics in History (4 Credits)****HIST 3704 Topics in History (4 Credits)****HIST 3705 Topics in History (1-4 Credits)****HIST 3875 Chinese Science and Global History (4 Credits)**

This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected.

**HIST 3980 Internship (0-8 Credits)****HIST 3988 Study Abroad Resident Credit (0-18 Credits)****HIST 3989 Senior Seminar I (4 Credits)**

Development of research skills and historiographical understanding; preparation for senior research seminar.

**HIST 3990 Senior Seminar II (4 Credits)**

Completion of a substantial research project, based on original sources. Students should consult their departmental mentor no later than beginning of spring quarter of their junior year to begin the formulation of the research project.

**HIST 3991 Independent Study (1-10 Credits)****HIST 3993 History Honors Thesis (4 Credits)**

Independent study specifically for graduating seniors wishing honors. Prerequisites: HIST 3989 and HIST 3990.

**HIST 3995 Independent Research (1-10 Credits)**

## Honors Program

The DU Honors Program cultivates student capacity for original academic inquiry and creative exploration.

Our students emerge as self-directed learners, encouraged to ask new questions and pursue their curiosities – both within the classroom and beyond.

Every year, the program recruits a diverse cohort of creative thinkers who want to go beyond the requirements – whether they were part of an Honors program in high school or not.

The three pillars of the Honors Program are our curriculum, our community, and our contributions to original research, scholarship, and creative activities.

We accept 100 students per year, and the vast majority of those students apply prior to starting at DU. Incoming students (first-year & transfer) may apply to the University Honors Program once they are accepted to the University. The last chance for current students to apply to the Honors program is after their first fall quarter at DU.

Honors at DU is not a major or a minor, but rather an academic community. Our curriculum mostly overlaps with common curriculum requirements and distinction requirements set by the different departments.

Students graduate with University Honors upon satisfaction of the following requirements:

1. Completion of Honors course requirements
2. Satisfaction of all requirements for distinction in at least one major
3. Cumulative GPA of 3.5 or higher at graduation

To remain active in the Honors Program, students must be in "good standing" at the University, continue to make positive progress towards completing Honors requirements, and remain responsive to communication from Honors Program staff.

Most of the Honors requirements overlap with the Common Curriculum requirements. The program only requires 6 credits of additional Honors-specific coursework, as well as asking students to satisfy departmental requirements.

**First Year**

HNRS 1000	Honors Summit	0
WRIT 1622	Advanced Rhetoric and Writing	4
WRIT 1733	Honors Writing	4

**Second Year**

HNRS 2000	Extreme Academics: Defining Success and Forging Your Path	1

HNRS 3000	Into the Unknown	0-1
ASEM course with Honors attribute		4

**Other Requirements**

Earn Distinction in your Major

Graduate with a 3.5 GPA

**HNRS 1000 Honors Summit (0 Credits)**

Welcome to DU Honors! This is the first course of the core Honors sequence. It provides space for you to reflect on your values and what brought you here and to set goals for your college journey and your participation in the Honors community. We also want to be sure you have all the resources that you need to succeed in the University Honors Program, and to introduce you to the staff, faculty, and other students in the program. We will focus on advising and graduation planning that will help you to maximize your college experience. Additionally, we will highlight the resources at DU that are particularly important for Honors students, including opportunities for undergraduate research and other signature work, competitive external fellowships, and distinction resources. This is a zero-credit course. Students must attend one in-person four-hour session.

**HNRS 2000 Extreme Academics: Defining Success and Forging Your Path (0-1 Credits)**

How do you make the most of your experience at DU? How do you set yourself up for success after graduation? This course will provide resources and strategies for students to cultivate their passions and purpose through signature work and distinction, develop their networks, design a meaningful DU experience, identify and prepare for impactful opportunities like fellowships and graduate school programs, and tell their story. In doing so, it will advance students' 4D Experience, enabling reflection, connection, and discovery. The culminating project for the course will be a personal statement, designed to help students reflect on and articulate how their experiences and values have shaped their academic and professional identity and make them a fit for opportunities of interest. Prerequisite: HNRS 1000.

**HNRS 2400 Honors Seminar (0-2 Credits)**

A number of these seminars are offered every year on a rotating basis. Topics vary every quarter. Honors Seminars are taught in a faculty member's area of expertise – often on niche subjects that bring students directly into dialogue with faculty research, scholarship, or creative work. They are an opportunity for students to get to know faculty and engage with advanced content in small discussion-oriented seminars that are open to students from all majors.

**HNRS 2401 Adventures in Fellowships (2 Credits)**

This course is designed to empower students to develop their personal narratives and to pursue “good-fit” fellowship competitions that create pathways to impact. Students will explore external fellowships, parse funding organizations' criteria and priorities, and work through applications to tell a coherent narrative with attention to common application components such as personal statements; letters of recommendation; and reflections on leadership, service, and impact. Class sessions and assignments will guide students through reflection about interests and goals, telling the story of their experiences, and identifying and preparing for competitive fellowships that will help them drive change on the issues that matter to them. Students will gain a foundation for expanded knowledge and growth in line with the 4D Experience as well as practical tools and strategies for crafting competitive applications for external opportunities. Cross-listed with LDRS 2920. This course counts as an Honors Seminar (HNRS 2400) for the University Honors Program and as an elective towards the Leadership Studies Minor.

**HNRS 2701 Wildlife Conservation & Cultur (4 Credits)**

The focus of the course is the intersection of conservation and culture. The goal is to generate new and creative ways to think about conservation. Students will be exposed to different examples of conservation governance, ranging from state-controlled access commonly found in national parks to indigenous communities that are assisting conservation efforts. They will inquire as to what impacts different projects are having in not only helping stem the loss of habitat and wildlife, but also the informal governance institutions managing their unique ecosystems in sustainable ways. Importantly, we will consider our main questions through a very broad and informal cost/benefit analysis that encompasses more than the limiting economic factors normally used. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**HNRS 3000 Into the Unknown (0-1 Credits)**

For many high-achieving students, college is a given. It is the clear next step in life after high school. As you consider your post-baccalaureate plans, the future may feel less certain. This course is designed to give you space to reflect on your college experiences and to articulate their meaning – both to yourself and to potential future employers or collaborators. It also provides opportunities for you to consider goals and strategies for the future, including questions like: How do you define success and design the life you want? How do you decide whether an opportunity is a good fit? How do you assess and redirect when you experience failure, ambiguity, or change? The course provides repeated opportunities to engage in structured self-reflection, both individually and in community with peers who are also preparing to go into the unknown. This course is intended for Honors students in their final year at DU.

**HNRS 3991 Independent Study (1-5 Credits)**

By arrangement.

## Hospitality Management

Office: Joy Burns Center, Room 320

Mail Code: 2044 E. Evans Ave. Denver, CO 80208

Phone: 303-871-4427

Email: lauren.sepulveda@du.edu (janeen.todd@du.edu)

Web Site: <http://daniels.du.edu/academic-programs/undergraduate/majors-minors/hospitality-management/>

The Fritz Knoebel School of Hospitality Management (Fritz Knoebel) has been preparing industry leaders since 1946. As part of the Daniels College of Business, Fritz Knoebel has been recognized nationally and internationally for its tradition of quality instruction, including the 2013 award for Best Educational Innovation at the Worldwide Hospitality Awards. The hospitality management program has as its foundation the core business discipline classes in the Daniels College. Within the major students select a concentration from Event Sales & Management, Lodging Real Estate, Restaurant/Food & Beverage Management, and Strategic Lodging Management.

### Bachelor of Science in Business Administration Major Requirements

(185 credits required for the degree (p. 97))

Minimum of 45 credits. Requirements include:

Code	Title	Credits
<b>Required Courses</b>		
HOSP 1100	Exploring Hospitality Mgmt	2
HOSP 1200	Industry Work Experience	0
HOSP 2201	International Experience	0
HOSP 2202	Management Intern Program	0
HOSP 2360	Managing a Restaurant Business	4
HOSP 2361	Contemporary Cuisine	4
HOSP 2401	Hotel and Resort Management	4
HOSP 2402	Revenue Management	4
HOSP 2501	Managing Human Capital in Hospitality	4
HOSP 2502	Hospitality Cost Management	4
HOSP 3120	Distinguished Lecture Series	1
Select 1 (one) Concentration from the following - Lodging Real Estate, Restaurant/Food & Beverage Management, Event Sales and Management, Strategic Lodging Management		18
Electives: Select 2-6 elective credits of major elective as required for each concentration.		
<b>Total Credits</b>		<b>45</b>

Students are required to study abroad, typically for a semester, and complete 1000 hours of work experience split between work hours and internship requirements. Please see the Hospitality Career Advisor for more information.

### Event Sales and Management Concentration Requirements

Code	Title	Credits
HOSP 3301	Beverage Management	4
HOSP 2506	Hospitality Sales & Marketing	4
HOSP 3506	Special Event Management	4

### Lodging Real Estate Concentration Requirements

Code	Title	Credits
HOSP 3402	Hospitality Investments (Rename HOSP 3402 from Asset Management to Hospitality Investments)	4
HOSP 3600	Lodging Valuation Principles	4

HOSP 3601	Hotel Development & Feasibility	4
REAL 3307	Real Estate Finance	4

### Restaurant/Food & Beverage Concentration Requirements

Code	Title	Credits
HOSP 3301	Beverage Management	4
HOSP 3302	Advanced Beverage Management I: Wine, Spirits & Beer	4
HOSP 3360	Rest/F&B Concept Devel	4

### Strategic Lodging Management Concentration

Code	Title	Credits
HOSP 2601	Environmental Sustainability in Hospitality	2
HOSP 2602	Hospitality Social Sustainability	2
HOSP 3402	Hospitality Investments	4
HOSP 3501	Advanced Hospitality Human Capital Analysis	2
HOSP 3800	Hospitality Experience Management	4
Electives		4

## Requirements for Distinction in the Major in Hospitality Management

Upon reaching 90 credit hours completed, students with a 3.50 cumulative GPA or higher, and a 3.85 Daniels GPA or higher, are invited to either create a portfolio of in-depth business experiences or to write a thesis to earn Distinction. See Daniels Undergraduate Programs or faculty in the department for more information.

This course plan is a sample schedule only. Individual course plans will vary based on incoming transfer credit, prerequisites, restrictions (e.g., the requirement that students have sophomore-level standing/have earned 45 credits to enroll), availability of courses, minors, and other scheduling factors. You must meet with your Daniels academic advisor in your first-year to develop an individual graduation plan for your specific needs.

- <sup>1</sup> MATH 1200 (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/selectingadegreeprogram/courseplans/ai-natural-courses/>) (or MATH 1951) fulfills one of the two required courses for Analytical Inquiry: The Natural and Physical World
- <sup>2</sup> Complete Analytical Inquiry: Society & Culture and Scientific Inquiry: Society & Culture requirements. ECON 1020 is required for all Business majors, and this course fulfills half the requirements for Scientific Inquiry: Society and Culture.
- <sup>3</sup> Common Curriculum Requirements (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/degreesanddegree requirements/>): Students are encouraged to complete Language or Scientific Inquiry: The Natural and Physical World sequences earlier in their studies; choose one for year 1 and the other for year 2.
- <sup>4</sup> INTZ 2501 is required for any student who studies abroad and may be taken in any quarter within the year prior to studying abroad.
- <sup>5</sup> If you are not an international student and you are not studying abroad, please work with your advisor to select a course to fulfill the Student International Experience Requirement (<http://bulletin.du.edu/undergraduate/undergraduateprograms/traditionalbachelorsprogram/bachelorofscienceinbusinessadministration/>).
- <sup>6</sup> In year 1, distribute 12 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): BUS 1440, MGMT 2100 (Leadership Studies minor students fulfill this Business Core requirement by completing both LDRS 2017 and LDRS 2019), ECON 1020, BUS 1099 (0 credits), INFO 1010 & INFO 1011 (complete by fall of year 2). Students who are ahead in credits can work ahead in Common Curriculum requirements, General Elective/optional minor requirements, and Business requirements from year 2.
- <sup>7</sup> In year 2, distribute 16 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): Any Business courses not completed in year 1, INFO 1020 & INFO 1021 (complete by winter of year 2), INFO 2020 (complete by spring of year 2), LGST 2000, ACTG 2200, MKTG 2800, BUS 3000, BUS 2099 (0 credits).
- <sup>8</sup> In year 3, distribute 16 credits of Business-related coursework across the entire year, selected from these options (check for prerequisites, corequisites, and restrictions): Any Business courses not completed in year 2, ACTG 2300, FIN 2800.
- <sup>9</sup> Students majoring in Hospitality Management must pick one (1) concentration. Student pick from one of 4 concentrations: Lodging Real Estate, Strategic Lodging Management, Restaurant Food & Beverage Management and Event Sales & Management.

#### **HOSP 1100 Exploring Hospitality Mgmt (2 Credits)**

This is an introductory course designed to provide students with a broad overview of the hospitality industry and the various segments that comprise the industry. The course focuses particularly on the industry areas captured by the concentrations available to Knoebel students, the elements that make hotels and resorts what they are—food and beverage/restaurants; strategic lodging management, lodging real estate, and event sales and management—and other facets of hospitality.

#### **HOSP 1101 Hip Hotels: Delivering Amazing Guest Experiences (2 Credits)**

Through an immersive, behind-the-scenes experience in Denver's hotels, students learn about: The challenges hotel executives face; the interplay between hotel design and service delivery; how to positively influence the guest experience, and the career paths available in the industry.

#### **HOSP 1200 Industry Work Experience (0 Credits)**

Faculty supervised work experience. Prerequisites: HOSP 1100 and completion of 500 hours of approved work experience. Advisor will register students for course as needed.

#### **HOSP 2201 International Experience (0 Credits)**

Students spend one quarter in an international setting taking courses while touring and observing overseas hospitality operations. Advisor will register students for course as needed.

#### **HOSP 2202 Management Intern Program (0 Credits)**

Preferably, this internship is full-time, continuous employment for ten-weeks with a minimum of 400 hours and is designed to allow students to increase their exposure to the hospitality industry and continue to reconcile their classroom learning with industry practice. Advisor will register students for course as needed. Prerequisites: HOSP 1200.

#### **HOSP 2360 Managing a Restaurant Business (4 Credits)**

In HOSP 1100, Exploring Hospitality Management, students are introduced to various aspects of restaurant/food and beverage management and basics about them. From here, we advance to a more thorough overview of the management of various food and beverage operations, specifically focusing on restaurants. Topics include safe food and beverage service, product specification and procurement, labor scheduling, revenue control and collection, and other management functions required for success in food and beverage operations. Prerequisite: HOSP 1100.

#### **HOSP 2361 Contemporary Cuisine (4 Credits)**

Judging by their high failure rate, restaurants can be one of the most difficult and complex businesses to manage. This course builds on previous food and beverage courses by providing hands-on experience running and managing a restaurant environment. Through the opening and running of two live restaurant operations for a night each, the course enables students to put into practice the managerial aspects of full-service restaurant operation, from menu planning and implementation to financial analysis, including systems, tools and reporting. Prerequisites: HOSP 2360 and HOSP 2401.

**HOSP 2401 Hotel and Resort Management (4 Credits)**

This course presents an overview of the management of a various lodging properties, specifically focusing on rooms division operations. The perspective taken is strategic, identifying and considering issues of concern to general managers of all types of lodging properties, with a particular focus on profit maximization (yield/revenue management) and distribution channel management. The broader political, economic, social, and technological environments and trends and their impact on lodging operations are considered. The perspective is global and includes considering how lodging operations differ in various parts of the world. Prerequisite: HOSP 1100.

**HOSP 2402 Revenue Management (4 Credits)**

This course provides an introduction to the basic principles and practices of revenue management in the hotel and restaurant industry. Students acquire the fundamental analytical skills needed to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels and restaurants. The course includes certification in STR tools. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2200.

**HOSP 2501 Managing Human Capital in Hospitality (4 Credits)**

People are the heart of any organization and can be a source of competitive advantage, particularly in a hospitality environment. This course prepares students to develop and manage successfully the processes and systems that help hospitality firms develop a competitive advantage through people and build a service culture, including recruiting, selecting, onboarding, and developing employees in order to retain them in both union and non-union environments. Prerequisites: HOSP 2360 and HOSP 2401.

**HOSP 2502 Hospitality Cost Management (4 Credits)**

The use of industry statistics and a uniform system of accounts for hotels and restaurants to determine an operation's position in the marketplace. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2300.

**HOSP 2504 Hospitality Technology and Analytics (4 Credits)**

Hospitality Technology and Analytics serve as an introduction to hospitality technologies and technology-enabled data analytics. This course surveys diverse aspects of consumer-facing hospitality technologies (social media, mobile, distribution channel, sharing economy, etc.) and in-house systems of hospitality operation (event-planning system, property management system, and point-of-sale system, etc.) In addition, this course provides an introduction to the field of business intelligence and data analytics, which has been defined as the extensive use of data, statistical and quantitative analysis, and fact-based management to drive decisions and actions in the hospitality industry. Specifically, the course looks at the managerial aspects associated with the application of hospitality technologies and technology-enabled data analytics to achieve strategic business goals. Prerequisites: HOSP 2360, HOSP 2401.

**HOSP 2506 Hospitality Sales & Marketing (4 Credits)**

This course addresses all that is involved in hotel and resort sales, including lodging/room group sales and catering sales. Also addressed are negotiation, the production of catered events, trade shows, and meetings, from the perspective of planners, venue salespeople, and event managers. Students learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other sales and planning functions. Prerequisites: HOSP 2360, HOSP 2401 and MKTG 2800.

**HOSP 2601 Environmental Sustainability in Hospitality (2 Credits)**

This course aims to provide students with knowledge of environmental challenges facing the hospitality industry. In addition, students learn best practices in hospitality and the emergence of new environmentally friendly technologies available for hospitality businesses. This course includes hotel operations with reference to energy efficiency, waste management, water conservation, and eco-design and architecture of current hotels or future hotel developments. Another objective of this course is to provide students with an understanding of sustainable food and beverage operations and certification in relation to sustainability in hospitality. The course discusses issues surrounding ethical, organic, local, seasonal, and another type of food often associated with sustainability. Prerequisite: HOSP 2360 and HOSP 2401.

**HOSP 2602 Hospitality Social Sustainability (2 Credits)**

In addition to environmental sustainability, hotels need to manage their social impact on their internal stakeholders (employees), an issue of increasing importance to their external stakeholders (customers and the community). Issues regarding a living wage, stressors of the working poor in low skill hospitality jobs, the impact of outsourcing hotel functions on the sustainability of employees' lives, and efforts of unions to organize hotels to fight for better working conditions, wages, and benefits will all be addressed in this course. The focus is on examining how the characteristics of, compensation associated with, and recruitment and retention practices for, low skill, low wage hospitality jobs impact the sustainability of employees' lives as well as the short-term and long-term profitability of the hotels. Prerequisite: HOSP 2360 and HOSP 2401.

**HOSP 3000 Wines of the World (4 Credits)**

A survey course of the wines of the world, including old and new world wines; still, sparkling, dessert and fortified wines; viticulture and viniculture. Prerequisite: must be at least 21 years of age. Non-HPM majors only.

**HOSP 3120 Distinguished Lecture Series (1 Credit)**

This course is the springboard for seniors to transition from a student mindset to that of a professional. It enables personal exploration, values clarification, and the narrowing in on an initial career focus. Hearing from and networking with senior executives from various segments of the hospitality industry who provide students with their insights about competition and challenges within the industry motivate the introspection described above.

**HOSP 3301 Beverage Management (4 Credits)**

Organization and management of the beverage operation of resorts, restaurants, hotels, clubs and other licensed premises. Emphasis on product knowledge, responsible beverage service, facility design and operational practices. Prerequisites: senior standing in the HPM major.

**HOSP 3302 Advanced Beverage Management I: Wine, Spirits & Beer (4 Credits)**

This course provides a deep dive into the production of wine, spirits and beer. Students enrolled in this course will sit for the Wine and Spirit Education Trust (WSET) Level 2 Spirit Certification, WSET Level 2 Wine Certification and Cicerone Certification exams. Enrollment is by invitation of the instructor(s).

**HOSP 3303 Advanced Beverage Management II: Wine (2 Credits)**

The final course in the beverage management sequence, this course is designed to enable you to refine your palate, significantly expand the portfolio of wines you have tasted and take a deep dive into grape varieties, growing regions, production styles, viticulture and viniculture. It rounds out and deepens your preparation to work directly in the beverage space or apply this knowledge in a broader food and beverage role.

**HOSP 3360 Rest/F&B Concept Devel (4 Credits)**

In previous food and beverage courses you obtained the knowledge and skills to perform the basic management functions required for a successful career in F&B operations, put these skills into practice and opened two “restaurants for a night.” In this course you will acquire the skills required to develop and brand a new restaurant. Prerequisites: Senior standing in the HPM major, HOSP 2361 and HOSP 3301 and restricted to students pursuing the Restaurant/Food & Beverage Management Concentration.

**HOSP 3400 Advanced Revenue Management (4 Credits)**

This course provides students with the advanced knowledge, skills, and abilities to make sound business decisions and implement revenue management strategies and solutions to influence consumer behavior and maximize revenue and profits for hotels. Students will acquire the analytical skills to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels. Prerequisites: HOSP 2402, ACTG 2300.

**HOSP 3402 Hospitality Investments (4 Credits)**

This course exposes students in the lodging real estate concentration to hotel investing and the types of hotel ownership and hotel investment strategies that exist today. Students acquire knowledge in critical lodging investment topics including hotel investment metrics/returns, underwriting a hotel, capital markets (debt/equity), negotiating a hotel management agreement, hotel brands v independent hotels, franchise license agreements, construction and development challenges, asset management, hybrid lodging, and more. Pre-requisite: HOSP 2502.

**HOSP 3501 Robotics, AI & Service Automation (2 Credits)**

With demographic and immigration changes, the pool of available workers to fill hospitality jobs is shrinking. Hospitality organizations are faced with critical decisions regarding how to create an experience for their guests, being the most efficient yet effective with their scarce supply of human capital. Hence, deciding to replace labor with technology to fulfill certain tasks has ramifications on the guest experience. This course will examine societal trends leading to an uncertain labor supply; criteria for making labor-replacement technology decisions; and impacts of the human-technology interface on the hospitality guest experience. Prerequisite: HOSP 2501.

**HOSP 3506 Special Event Management (4 Credits)**

This course addresses all that is involved in the sales and production of catered events, trade shows, and meetings, from the perspectives of planners, venue salespeople, and event managers. Students will learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other event and meeting sales and planning functions. Prerequisite: HOSP 2506.

**HOSP 3600 Lodging Valuation Principles (4 Credits)**

This course introduces students to the basic fundamental analysis of methods and techniques of real estate investment, finance, and valuation as they apply to the lodging industry. The course covers time value of money, basic discounted cash flow techniques, financing instruments, appraisal methods, and valuation techniques for income producing lodging properties. Students utilize computer software and spreadsheets for solving real estate problems. Practical applications provide students with the analytical tools and techniques to make effective real estate investment and financing decisions. Prerequisites: HOSP 2502.

**HOSP 3601 Hotel Development & Feasibility (4 Credits)**

This advanced capstone experiential learning course integrates lodging real estate financial analysis and valuation techniques to emphasize the fundamental concepts and techniques involved in the hotel development process and the various steps involved in performing a market feasibility study of a proposed hotel. Students will propose, establish and refine a concept from inception to completion, perform a market and site analysis, plan the development and construction, estimate the cost, and determine the financial viability of a full-service or limited-service hotel. Additional discussion topics include the regulatory process, financing, and risk management. Guest speakers, site visits, cases, text, practical examples and extensive use of spreadsheet software will provide students with specialized real-world knowledge and enhance their understanding of the complexities and challenges faced in lodging real estate development projects. Prerequisite: HOSP 3600.

**HOSP 3602 Facility Layout and Design (4 Credits)**

The course is focused on students who are going to become hospitality managers and will inevitably be involved with the design and planning of facilities. They will develop confidence in understanding the design process, reading and understanding plans, how to effectively critique designers to obtain the best results, what it takes to create functional spaces, and the importance of economic balance in creating designs that promise the best potential for financial success. Students will emerge with a heightened vision that will allow them to assess every hospitality experience that they encounter. They will plan a restaurant and a hotel to develop planning skills and to demonstrate creativity.

**HOSP 3650 Leadership in Hospitality (3 Credits)**

This course provides students with the knowledge, skills, and attitudes necessary to undertake leadership responsibilities in complex organizations. This course applies concepts and methodologies from the social and behavioral sciences in the analysis of leadership behavior in diverse organizational and community settings. Must have senior standing in the HPM major.

**HOSP 3700 Topics in Hospitality Management (1-4 Credits)**

Exploration of various topics and issues related to the hospitality industry. Prerequisite: HOSP 1100.

**HOSP 3800 Hospitality Experience Management (4 Credits)**

The evaluation, design, and management of service delivery systems through operations management topics from a service perspective. Included are other related topics such as customer satisfaction and managing organizational change. Must have senior standing in the HPM major.

**HOSP 3991 Independent Study (0-10 Credits)**

Independent research/study; requires written report. Prerequisite: instructor's permission.

## Innovation and Entrepreneurship

We believe that every student should have the skills to solve problems, innovate, and communicate effectively, regardless of their chosen career path. Our mission is to equip students with the necessary tools to become innovators, leaders, and change-makers. We encourage students to think big, embrace challenges, and make a meaningful impact.

Our Entrepreneurship Minor is open to all undergraduate students at DU, designed to provide students with the skills and confidence to start their own businesses. By completing the entrepreneurship minor, students will:

- Learn how to think creatively and come up with innovative ideas.
- Develop and validate their business ideas and opportunities.
- Cultivate the skills and self-assurance needed to launch a business.
- Enhance critical thinking and problem-solving abilities.
- Foster strong communication and collaboration skills.

### Entrepreneurship Minor

The minor in Entrepreneurship is available to all University of Denver undergraduate students. Students may utilize their Entrepreneurship minor electives to complete an optional specialization in Franchising. (Please note that students cannot complete both the Entrepreneurship minor with an optional specialization in Franchising as well as the full minor in Franchise Business Management.)

Minimum 20 credits for business students

Minimum 24 credits for non-business students

**EVM 1100 Introduction to Entrepreneurship (4 Credits)**

Entrepreneurs play a critical role in driving innovation, promoting social change, creating jobs, and changing the way we live, work, and communicate. Entrepreneurs come from different backgrounds, professions and possess a wide range of skills and experiences. What entrepreneurs have in common, the desire to solve problems, make change and create value through innovation. This introductory entrepreneurship course is for students that are interested in learning about entrepreneurship or first-time entrepreneurs with an idea. Students will explore entrepreneurship and apply tools, mindsets, and frameworks for starting a for-profit business, a non-profit business, or a business within a business.

**EVM 1400 Introduction To Franchising (4 Credits)**

Imagine running your own business with the tools, support, and strategy to make it thrive—this course introduces the business model that powers thousands of successful brands, from Chick-fil-A and Planet Fitness to Dunkin' and School of Rock. Franchising has evolved into one of the most dynamic and transformative business strategies in the world, with decades of observed data demonstrating success across hundreds of industries, thousands of franchise systems, and hundreds of thousands of franchised business units. This course offers students a comprehensive understanding of the franchise business model, including its language, structure, and perspectives from franchisees, franchisors, supply partners, and customers. We'll explore the history and evolution of franchising, comparing it to alternative business models to highlight its value and purpose, while also reviewing the legal framework that supports franchising in the U.S. Throughout the course, we'll examine the key stages of growth, and guide students through the critical factors and decisions in growing a franchise business, recognizing pivotal milestones, challenges, and strategies to boost performance and elevate brand value.

**EVM 2100 Social Entrepreneurship "do well by doing good (4 Credits)**

Interested in making a positive impact through business while also making money? Social entrepreneurship will teach you how you can 'do well by doing good.' This course examines how all types of organizations can be used to positively impact our global society. Students will explore their own passions and see how purpose and profit can combine to create rewarding and inspiring careers and companies. Human-centered design, alternative funding, business models, and impact measurement will all be integrated to prepare students to lead impactful careers. Through class discussions, case studies, guest speakers, and hands-on application, this course will prepare students to join the growing group of innovators using business to address society's greatest challenges.

**EVM 2200 Global Entrepreneurship "Innovating and Creating Value Across Borders (4 Credits)**

Entrepreneurship is about solving problems, identifying unmet needs and opportunities. Where some see roadblocks, entrepreneurs see opportunity. As people, cultures and business become interconnected it is important for entrepreneurs to have a global mindset and approach to business. The Global Entrepreneurship course provides you with the skills and knowledge to start a business in another country, develop a market in another country, and identify opportunities across borders. Students will develop an intercultural understanding as they learn about history, religion, culture, economy, and government in other countries. Students will identify commonalities, shared interests, and differences between cultures and apply business frameworks to develop products and services for international markets.

**EVM 2250 Entrepreneurship Interterm (2 Credits)**

This course provides you with the opportunity to explore and discover what makes for an effective entrepreneurial ecosystem. You will travel to a foreign country and meet with key actors throughout the entrepreneurial ecosystem. Additionally, you will learn about and engage with the local culture, learning how religion, customs, and culture all influence global entrepreneurship.

**EVM 3350 From Idea to First Dollar Sale (4 Credits)**

Designed to serve as the capstone course for the Entrepreneurship Minor, From Idea to First Dollar Sale takes students through the process of starting a company, launching a product, creating a market, and learning how to embrace "failure" and manage uncertainty. Student will use and apply the knowledge, skills, and tools they have developed in previous Entrepreneurship Minor courses to spin up a business in ten weeks. Most types of businesses are welcome: retail, services, technology, hospitality, etc. Students may build on an existing idea, iterate, and take it to the next level or develop an entirely new idea. Through class discussions, activities, presentations, and guest speakers, students will explore the principles of planning, testing, measuring, analyzing, and rapidly iterating a product or service. Startups require significant effort, commitment, creativity, and passion. This class is no different and whether you have started a business in the past, you will know what it takes to be an entrepreneur by the time this class is finished!.

**EVM 3370 Metrics & Financial Tools for an Emerging Business: Accounting and Finance for the Emerging Business (4 Credits)**

Students are taught to link physical activity occurring in the business venture to the movement of numbers on financial statements. They draft 3 years of flexible profit and loss, cash flow, and balance sheet statements; Year 1 is monthly, Year 2 is quarterly, and Year 3 is one annual period. Students learn how to visualize the activity, metrics, and assumptions needed to support the customer experience they intend to build and how these numbers flow through their financial statements including: Generating revenue leads; Convert leads to sales; Producing the product/service; Delivering the product/service; Converting customers into repeat business; Set-up and maintain Quick Books. Cash impact of corporate governance costs (indirect) are included, such as risk management (insurance), employee benefits and compensation, facilities, technology, legal and capital expenditures, etc., understanding the tax implication of setting up different governance devices and understanding recapitalization and its implications. Students learn to identify activity metrics to drive cash basis break-even for daily, monthly, and annual periods. They will also learn how to create a Use of Funds Statement linked to their proforma'd financial statements. Students will learn different types of financing and under which circumstances these types are used-credit cards, factor loans on inventory, bank loans- including small business administration loans, angel funding, and venture capital funding. Exit strategies like M&A and IPO will also be covered. Prerequisites: BUS 1000.

**EVM 3400 The Innovation Amphitheater (1 Credit)**

Want to start your own business and invent your own future but haven't landed on a great product/service idea? Already have a business and want to expand into new spaces and offerings? This course is for people who answered yes to either of those questions. The Innovation Amphitheater takes you through 16 proven strategies and techniques to help you innovate into new spaces and find opportunities. You'll explore such strategies as cross-overs, combos, slivercasting, inside-out, old school and retro, and many more.

**EVM 3401 Project Management (1 Credit)**

Learn the basic fundamentals of project management, focused specifically on high-performing teams while starting and running an early-stage business. Explore how to implement proven project management concepts and techniques using popular tools like Trello and Asana. 1 credit hour. Prerequisite: EVM 3350.

**EVM 3402 Creating Your Digital Presence (1 Credit)**

Creating awareness of your new business venture is one of the most important tasks in the early stages of building your business. Creating awareness by driving traffic through and to your digital presence is essential. To help you as you embark on an entrepreneurial effort, this course focuses on building an integrated digital presence with a website, Facebook Business Page, Twitter account, Pinterest account, and an Instagram account.

**EVM 3403 Ethics in Entrepreneurship (1 Credit)**

Creating a business for the sake of generating profit is not enough. Businesses must contribute to the betterment of society through social, environmental, and financial gains. This course will help you build the right vision for your business by 1) engaging you in ongoing reflection and dialogue about your ethical responsibilities in product and service innovation, and 2) helping you understand cognitive, behavioral, and principled approaches to ethical issues in product and service innovation.

**EVM 3404 Primary Research (1 Credit)**

To be successful in your business venture, you need to make data-driven decisions. Much of that data can come from internal operations or perhaps secondary sources. But, to truly be successful, you need to gather, analyze, and make decisions based on primary research data from your external market. In this course, you'll learn the basic tenets of performing primary research activities including defining your market segment, building a primary research instrument, gathering data using a primary research instrument, analyzing the data, and making recommendations.

**EVM 3407 The Perfect Pitch (1 Credit)**

Essential to most new business ventures is the ability to raise capital, most notably from angel investors and venture capitalists (VCs). Raising capital starts with the "pitch," a presentation that is exciting, informative, realistic, and addresses what funds are needed, how they will be used, and how the investor will financially benefit from providing the funds. This course will help you learn how to create the perfect pitch for your new business venture. We will review both successful and unsuccessful pitch presentations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3408 Accounting For Entrepreneurs (1 Credit)**

Accounting is an activity in any business that measures, processes, and communicates financial information and transactions. This vitally important activity will help you track your expenses, recognize your revenue, and in general keep an accurate and detailed view of the financial strength of your business. In this class, you'll learn how to process operating expense transactions (e.g., advertising and payroll expenses) and revenue transactions (both actual sales and sales on credit). You'll also learn how to appropriately handle the depreciation of long-term assets like vehicles and buildings. Finally, you'll learn how all of these transactions enable you to build a balance sheet for your new business venture.

**EVM 3409 Financial Statements For Entrepreneurs (1 Credit)**

Of the four major financial statements, the most important to a new business venture are the balance sheet, the income statement, and the statement of cash flows. Knowing how to build and interpret these are critical to your success during not only the early stages of spinning up your business but throughout the lifetime of your business. In this class, based on a wide variety of financial transactions, you will learn how to build and interpret an income statement and a statement of cash flows. (It is assumed that you already know how to build and interpret a balance sheet.) You'll also learn how to build a proforma income statement and statement of cash flows, based on the financial projections of your new business venture.

**EVM 3413 Design Thinking (1 Credit)**

Design Thinking is a creative problem solving process that builds your ability to first see and then solve human-centered opportunities. It starts with empathically looking at frustrations inside and around your organization, then moves through a variety of brainstorming sessions to build customer centric solutions. Design Thinking is a wonderful tool to help you monetize the human capital in your organization. Once we know the process, we will ask students to bring real challenges into the classroom where we will use Design Thinking to build potential new products, services and solutions.

**EVM 3414 Market Discovery and Product-Market Fit (1 Credit)**

Market discovery is about identifying demand for ideas and innovations. Students will discover that some markets have already been established and others have yet to be created. Product market fit takes time. At first new ideas and innovations may not fit an existing market, requiring a new market to be developed. We'll study example companies in a wide variety of industries that over time found the correct product market fit. Students in this Sprint will learn methodologies to find and assess product market fit for new ideas and innovations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3417 Branding and Messaging (1 Credit)**

Branding is an essential element for any startup. Your brand is created by you and grows as your business grows. It's more than a logo, colors, and fonts contained in a style guide. It's the experience that you create for your customers. It's something your business should aspire to. Something memorable. And as you work through this course, you will get an understanding of what it takes to build the brand for your business.

**EVM 3420 Cloud Technologies (1 Credit)**

Welcome to the Cloud! What is the cloud, is it a thing, a concept, a nifty term? If you are starting a new business, thinking about starting a new business or improving the efficiencies in an existing business, you need to understand the available technologies and tools in the Cloud. Where do I host my website, how do I handle accounting, where is the email server, how do I track customers, how do I share information, what tools are available for customer support? These are just a few questions the Cloud will solve efficiently and cost effectively. The Cloud has dramatically changed the competitive landscape for startups by reducing the cost of starting a new business. The Cloud removes costly equipment, software and support expenditures; with the Cloud, you pay for what you use. This course will focus on identifying, analyzing, and implementing Cloud technologies to help run your business. Here are some of the topics we will explore and discuss: flexible costs, how and when to implement these tools, is your data safe, comparing similar services, improving collaboration.

**EVM 3421 Intellectual Property Issues for Startup Businesses (1 Credit)**

All businesses have assets, both tangible and intangible, and these assets must be managed, nurtured, accounted for, and protected. Among the most important of those assets today fall in the realm of intellectual property (IP) and are protected through mechanisms such as copyrights, trademarks, and patents. As a business owner, you must be aggressive and vigilant in ensuring that your most important IP assets are protected, as they are an important part of your brand portfolio. This class will introduce you to the role of copyrights, trademarks, and patents as tools for protecting your intellectual property. In doing so, you will learn about your rights as an IP owner and – equally as important – your responsibilities for not infringing on the IP assets of other organizations.

**EVM 3422 Startup Legal Issues (1 Credit)**

Starting a business involves a host of activities, from product/service development, to marketing, to sales and service. At the foundation of all of these activities are legal considerations. Legal considerations for startup businesses range from establishing a form of business operation, to registering with the government and obtaining the appropriate licenses, to filing sales taxes, to the management of employees (hiring, contracts, etc.), and a host of other essential activities. To get your business off “on the right foot,” this course introduces you to the legal considerations that are vitally important to your success.

**EVM 3424 Visualizing & Presenting Data (1 Credit)**

Being able to tell a compelling story, in particular with data, is a skill that is rarely taught. Today, most people either adopt reports that have existed in an organization for as long as time, or they create flashy reports using the latest tools. In most cases, neither of these reports give the end users what they want. This course will focus on giving you the tools to create purposeful reports by helping you answer the age old question around any design... Form, Fit and Function.

**EVM 3425 Rapid Prototyping - 3D Printing and Laser Engraving (1 Credit)**

The purpose of this course is to empower students to more effectively develop their creative and entrepreneurial capacities utilizing the tools of rapid prototyping. Students will identify appropriate rapid prototyping technologies to apply to unique situations. Curriculum over the course of the day progressively builds by presenting more challenging problems. At the conclusion of the course, students will be able to turn ideas into solutions that add value to a product, process, or service.

**EVM 3428 Developing a WordPress Website (1 Credit)**

What is WordPress? What is a CMS? What is Open Source? Is it a concept or a nifty term? If you are starting a new business or thinking about starting a new business you need to understand the available technologies and tools to build and manage a website. Where do I host the website? How do I create and update the website? What tools are available? These are just a few questions we will answer in the WordPress Grind. The WordPress Grind has been designed from a beginner's perspective. The goal is to provide a step-by-step tutorial for creating and publishing a WordPress website. The class will cover the conceptual framework of Open Source and Content Management Systems (CMS) and lead into the fundamentals and tools required to build and manage a WordPress website. At the conclusion of this grind, you will be able to develop, publish, and manage your own WordPress website.

**EVM 3430 Key Steps in Product Creation, Pricing, and Distribution (1 Credit)**

Learn how to bring a digital or physical product to market. This Sprint guides you through the essential steps of product creation, pricing, and distribution. Whether you have a product idea or simply want to understand how businesses develop and sell products, this course provides a practical framework for making intelligent decisions. What You'll Learn: Manufacturing Costs: Calculate production expenses, understand fixed and variable costs, and factor in economies of scale. Pricing Strategies: Set competitive prices, calculate profit margins, and explore strategies like value-based and psychological pricing. Distribution Channels: Choose the best sales channels (eCommerce, retail, DTC, or wholesale) and understand the costs and benefits of each. This course is perfect for anyone curious about how products are made, priced, and sold—or for entrepreneurs ready to launch a product. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3431 Emotionally Effective Leader (1 Credit)**

Did you know emotional and social skills are four times more important than IQ when considering success and prestige in professional settings? Emotional Intelligence (EI) can be confusing. What does it mean? Is it fluffy stuff or something really tangible? Now more than ever, employers and clients are seeking leaders who display emotionally intelligent thinking, decision making and actions. How do you know if you meet those requirements? Up until recently, EI was a “gut assessment” of someone’s ability to control their emotions or care about someone or something. Now, we have a valid and reliable way of understanding our emotional intelligence and that of others. We can even measure the EI of teams! It turns out EI is quite complex. Research has distinguished 12 components of EI including: self regard, self actualization, self awareness, emotional expression, assertiveness, independence, interpersonal relationships, empathy, social responsibility, problem solving, reality testing, impulse control, flexibility, stress tolerance and optimism. Want to know how you score in these areas? EI is a “talent” that, unlike IQ, can be learned and improved throughout one’s life. In the Emotionally Effective Leader Grind, you will have the opportunity to assess your own EI through a valid and reliable EI talent assessment. Revealing your strengths and weaknesses, you will learn how to build your own EI and maximize the magnitude of your impact within the organizations or teams you lead.

**EVM 3432 Getting to Know Your Customer (1 Credit)**

Developing lasting relationships with customers requires time and energy up front. You need to get to know who your customers are and what they value before they will develop lasting relationships with your brand. This course on Getting to Know Your Customer will introduce students to tools and data sources that can help with segmenting and targeting, developing personas that represent different customer groups.

**EVM 3433 The Sales Process for Entrepreneurs (1 Credit)**

Sales is all about getting a person to make a purchase. Each business needs a unique step-by-step sales process that aligns with the buyer’s journey. We will discuss the key aspects of the top, middle and bottom of a sales process: We will learn the key metrics and activities, both human and digital for sales teams in today’s modern world. We will learn about lead generation, prospecting, lead nurturing, deal qualification, designing a sales process, sales pipeline, and forecasting, managing customer relationships, negotiating, converting leads to clients. As a self-employed entrepreneur or as an employee who works for someone else, an innovative outlook and entrepreneurial mindset is key to solving the problems our companies and society face now, and in the future. Innovators are everywhere and can add value from any role or department within their company, for example: c-suite leaders, facilities staff, IT administrators, and human resource trainers. Innovators share common traits: they see emerging opportunities where others see hopeless problems, they solve problems with creative ideas, and they evaluate ideas for their merits and shortcomings. This course is designed to teach the tools, strategies, and mindset of an innovator to help students ideate, evaluate, and innovate quickly. Students will collaborate using proven strategies and techniques to solve problems in new and unique ways. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

**EVM 3435 How To Realistically Fund Your Business (1 Credit)**

Essential to most new ventures is the ability to raise capital (“funding”), initially from angel investors and then from venture capitalists (VCs). The capital raising process usually starts with the “pitch”, a presentation that is compelling, exciting, informative, and addresses what funds are required by the venture, how they will be used, and how the investor will financially benefit from their investment. But not all new companies are the same and the ways to fund starting a new business, business idea or a good old-fashioned startup are many. In this class we will discuss the different funding sources from a check from a friend or family member to loans, credit cards, equity investment, crowd funding and more. This course will help you learn how to identify and determine the best source capital for your business. You will also learn how to present and speak about basic and intermediate funding sources. We will define & review the basic elements of business funding while also listening to the perspectives of several entrepreneurs (small & big) and even a Venture Capitalist. You will ultimately work in groups around a hypothetical business idea. Please feel free to use an existing idea (particularly if you were in my pitch class) or feel free to choose one from the list I have posted in Canvas. Throughout class you and your group members will have several working session moments to create and draft your capital plan for your business.

**EVM 3436 High Performing Teams (1 Credit)**

Success in any business venture is often predicated on the strength of collaboration in and between high performing teams. But teams also come with their own unique set of challenges that can often hinder group productivity and cause friction, such as interpersonal issues, ambiguous goals and objectives, and competing agendas. There are techniques that team and group leaders can use to alleviate those challenges in the current era of volatility, uncertainty, complexity, and ambiguity. The High Performing Teams class is for students who are eager to build their capacity to connect as leaders more effectively and learn to leverage psychological safety to create cultures of connection where risk-taking leads to team success. Together we’ll explore how you can implement the latest trends in remote and hybrid team management in a post-COVID era as well as how to incorporate the principles of diversity, equity and inclusion (DEI) to improve team performance and cohesion. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3437 The Art of Branding: Design Tactics for Entrepreneurs (1 Credit)**

Join us on a journey of crafting compelling brands through a practical approach to design and strategy. This course immerses students in the brand design process, analyzing both successful and unsuccessful brand campaigns to extract valuable insights. By refining their aesthetic sensibilities, students will become adept at creating captivating designs. Leveraging cutting-edge digital technologies, students will master the creation of a brand style guide. In the final project, students will showcase their skills by developing a captivating style guide for a new or existing business, strategically positioning it in the market. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3438 How to Identify, Evaluate & Beat Your Competition (1 Credit)**

Every business has competitors, from large corporations, “main street” businesses, start-ups... they all compete for customers and market-share. Even The University of Denver competes for students. Leave The Competition Behind is for people who like to win and don't like to lose. In this class, you will study strategic frameworks and tools that you can use to identify, understand, and dissect your competitors, the levers that you can pull to beat them (like price, quality, service). We will identify and discuss front-line tactics you can use to outwork your competition. We will explore and discuss real life cases and personal stories from various industries to illustrate the key concepts used by professionals in competitive analysis and strategy. You will apply these concepts during the breakout sessions where we will take on the Media & Entertainment industry.

**EVM 3439 Social Entrepreneurship (1 Credit)**

Social entrepreneurship is simply applying entrepreneurship principles to societal challenges. This can be for-profit, non-profit, social business, or even not an official organization at all. The consistency across all these is the desire to make society better. Finding a problem that gives you purpose is a challenge in itself, as you cannot simply think about it. You need to create a life that allows you the freedom to find this purpose, and then successfully devote yourself to this purpose. In addition, if your goal is to make society better, you want to avoid the trap of working on one problem while actively contributing to others. So the ideal social entrepreneur creates an organization and life that offers a net improvement to society. This involves learning to “socially” manage others, environmental impact, finances, etc. The Social Entrepreneurship course is for people that are eager to improve the world. We will incorporate concepts from finance, management, psychology, and even neurobiology. You will learn how to find the problem you wish to work on, and how to be more successful in addressing that problem.

**EVM 3440 How to Effectively Negotiate in Business (1 Credit)**

Every day, and sometimes multiple times a day, we persuade and negotiate with people such as funders, classmates, friends, family members, potential employers, merchants, and coworkers. However, most of us know little about what it takes to be effective negotiators. This class teaches you proven methods to support your desire to reach principled agreements by broadening your basic negotiation skills. We will learn theory-driven negotiation skills, engage in simulated negotiations, and make concrete plans to conduct a future negotiation. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

**EVM 3441 How To Create A Business Startup Budget & Forecast (1 Credit)**

For many people creating and evaluating business budgets and forecasts is intimidating. This applied course is designed to demystify the subject as students study, create, and evaluate budgets and forecasts. This course will provide students tools as they create an entrepreneurial budget and forecast. In addition, you will learn about metrics that entrepreneurs, investors, and banks use to evaluate these financial materials. Along the way we will consider budgets for different types of businesses, including B2B, B2C, products, subscriptions, and services. We will cover budget topics such as unit economics, breakeven, margin analysis, customer acquisition cost, and marketing efficiency plus forecast topics like burn rates, scaling, margin creep, and north star metrics. Plus, we will touch on the basics of valuation and how budget materials relate to valuation.

**EVM 3442 Selling Online: Using Amazon as a Framework (1 Credit)**

Amazon has become the de facto tool for selling Consumer Packaged Goods (CPG) online. If you're not selling your product on Amazon, chances are that someone else is already doing it for you. Unlike real estate, Amazon squatters may have (and, retain) first-mover advantages in selling products and securing organic listing authority. Anyone planning to sell products for themselves or for an employer needs to understand the Amazon landscape. Amazon has become a ubiquitous metaverse for commerce. Everything known tangibly in bricks-and-mortar retail has a virtual analogue expected to move faster and cheaper, all while subject to the scrutiny of customer reviews. The Amazon eco-system includes an army of gig workers and service providers such as lawyers and marketing professionals, subject to the same constraints. Whether you wish to become a third-party seller on Amazon or plan to work for a CPG company, understanding the power of Amazon (and, related tools) has universal application. We plan to cover the risks of entering Amazon, the criteria to evaluate successful products, protecting your brand, organic and pay-per click strategies, third-party tools, and the broad market for trading in Amazon businesses. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3443 The Marketing Mix "Converting Prospects Across the B2B and B2C Buyer's Journey (1 Credit)**

How do people who have never heard of a product or company become loyal customers? Marketing leaders use a variety of tactics—from social media, digital advertising, content, customer service, reviews, emails, events, and more—to convert prospective customers to loyal ones. Converting prospects across the buyer's journey from awareness to consideration to purchase in a cost-effective manner is core to every B2B and B2C marketing campaign. During this Sprint we will learn the key elements of the marketing mix and the stages of the buyer's journey they apply to. We'll showcase common tactics and metrics used at each stage, and focus on the importance of using attribution data to improve the effectiveness of each conversion. We will also evaluate how marketing and sales leaders effectively partner across the buyer's journey, learn how the marketing mix can vary across B2B and B2C organizations, and showcase organizations that have developed highly effective marketing mixes. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3444 Using Sustainability to Drive Innovation (1 Credit)**

Want to learn how to make a difference in the world using Sustainability? This course is designed to give you the entrepreneurial skills to incorporate sustainability into a company's products, services, and day to day operations. If you want to learn how to innovate and develop sustainability initiatives that make massive societal and environmental impacts while tackling current challenges like climate change, water scarcity, equity & inclusion, this course is for you. This course provides an essential overview of the challenges that our planet and society are facing and provides you the tools you'll need to ignite your sustainable business vision and bring it to reality. If you have a passion for making a positive impact in the world and an entrepreneurial idea for a new business or a product or business solution within an existing company, come join us! Students will walk away with a working knowledge of sustainability issues and the tools to build sustainable programs into new and existing business ventures that address both a societal and market need. At the end of this sprint course, students should feel empowered with the ability to incorporate sustainable thinking into whatever their future careers hold – whether that be an entrepreneurial venture, the development of a new product, or helping businesses drive business value through sustainability. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross Listed with EVM 4444.

**EVM 3445 Life Design for Entrepreneurs (1 Credit)**

Building a meaningful life doesn't just happen - it happens on purpose. In this Life Design for Entrepreneurs sprint you will approach the challenge of designing your life as an entrepreneur the way a designer would - through empathy, experimentation, wayfinding, prototyping, and action planning. You will participate in highly interactive workshops tailored specifically for entrepreneurs, explore the social and personal narratives that shape your perspectives, and practice ways to reframe problems. A key outcome of this sprint is your design of three possible future paths as an entrepreneur – Odyssey Plans – for your life and career ahead. You will develop tangible ways to move forward and leave with an action plan with accountability. Through hands-on exercises, small group discussions, collaborative ideation, and personal reflection, this course will support the application of design thinking concepts, tools, and practices – all geared to empower self-discovery and design of your career and life as an entrepreneur. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3446 Entrepreneurship in the Arts (1 Credit)**

Whether you are a visual artist, musician, dancer, or other member of the arts community, entrepreneurial capabilities will be crucial for monetizing your artistic mission and interests. In this class, we will explore how to find gigs, successfully manage your arts-focused endeavors as a profitable business, negotiate compensation, and channel a range of experiences into career development. In addition to ensuring this foundational knowledge, we will go beyond entrepreneurial basics to help you develop the tools to support your artistic and entrepreneurial endeavors. We will bridge the gap between artistic and business training to provide an expanded perspective on arts entrepreneurship. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross listed with EVM 4446.

**EVM 3447 Produce Professional Videos with Your Phone (1 Credit)**

Anyone with a phone and an Internet connection can “shoot” and upload a video to a variety of social media platforms (Instagram, Tik Tok, YouTube, etc). Yet, many of these videos are overlooked due to their poor production, amateurish editing, and lack of a promotion plan. This “Sprint” is designed to introduce you to the world of professional phone videography and editing. Topics covered will include: getting the most out of your phone's camera (software and techniques), useful accessories for your phone camera, recording professional audio on your phone, editing video on your phone and connecting your phone to a larger editing system. Strategies for producing product videos, pitch videos, branded content, and entertainment focused media will be discussed. When you complete this course, you will be able to produce highly spreadable and professional looking videos with little more than your phone camera. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3448 Navigating the Gig Economy: Turn Your Passion into Profit (1 Credit)**

Through the emerging gig economy, individuals have many opportunities not previously available to them. Many are turning hobbies, skills, and passions into income-generating side hustles, supplementing their regular income, achieving a flexible work-life balance, experiencing an easier financial transition into a new career, having extra time to obtain additional education, or growing a side hustle into a new business venture. Gig workers provide temporary, short-term services or products to consumers, and over the next five years, this economy is expected to grow from 35% to 50%. As the entire U.S. economy continues to rely less on employees and more on technology, the decline in traditional employment requires a shift in how individuals make money. Whatever your goals, let's turn what you are already good at into a profitable activity that brings additional flexibility and independence to your life. This sprint provides a thorough understanding of the gig economy, including the benefits, challenges, opportunities, and, ultimately, how one can succeed as a gig worker. At the end of this sprint, students will be ready to participate in the gig economy by learning how to leverage freelancing platforms, develop a gig economy pitch, manage finances as a freelancer, enhance marketability, and ultimately understand gig work. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross listed with EVM 4446.

**EVM 3449 Entrepreneurship through Acquisition (1 Credit)**

Have you wanted to be an entrepreneur but don't have an idea for a new company to start? This course is designed for aspiring entrepreneurs who don't have a business idea or a desire to start a company from scratch but are interested in running and growing a business. The course will allow students to study the process of entrepreneurship through acquisition of an existing operating business. The course is designed to provide students with knowledge and insight about alternative methods of pursuing entrepreneurship and whether a career path of entrepreneurship through acquisition is a good fit for them. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3700 Real Business Cases in Entrepreneurship (4 Credits)**

The Real Business course is designed to provide students with an opportunity to examine entrepreneurial business challenges through case studies, guest speaker, discussions and field experience. In addition to standard entrepreneurial start-ups, the course will cover international start-ups, gender issues relating to start-ups as well as fostering an entrepreneurial spirit in large organizations. Throughout the course, entrepreneurship will be examined from the perspective of business challenge as well as career choice. Prerequisites: EVM 3351 and degree checkpoint 2.

**EVM 3704 Topics in Innovation and Entrepreneurship (1-4 Credits)**

This course is custom designed to address topics that are currently in demand, such as social entrepreneurship, financing the startup after the Wall Street greed bust, finding angel investors and venture capitalists in Colorado, preparing for a pitch to investors, moving beyond startup stage, and others.

**EVM 3710 Innovation/Creativity-Business (4 Credits)**

This course is about identifying and creating customer needs, looking for innovative ways to address these needs, and pursuing those approaches that appear to have real profit potential. There are exercises to address and stimulate creativity, discussion of organizations that are considered to be creative businesses, and critical evaluation of the hurdles they face and the techniques they use. The course also includes innovative approaches to organizational effectiveness. Cross listed with EVM 4710. Prerequisites: LGST 2000 and degree checkpoint 2.

**EVM 3980 Entrepreneur Internship (0-4 Credits)**

Initial for-credit entrepreneur internship experience for students pursuing a business major and/or entrepreneurship minor, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

**EVM 3991 Independent Study (1-10 Credits)**

Student devises and completes a special learning project under faculty supervision. Topic and outline must be approved by supervising instructor and department.

## Integrated Sciences

Integrated sciences is an interdisciplinary major designed for the student who desires general preparation for a career in an allied-health or science-related field, including physical therapy, occupational therapy, physician-assistant programs and nursing. In addition, students interested in teaching science at the primary, middle school or secondary level can benefit from the broad spectrum of courses available through the major.

### Advising

The curriculum for the Bachelor of Arts in Integrated Sciences is tailored to the student in accordance with the requirements for the major listed below. Students usually work with a faculty advisor from the Department of Biological Sciences to design a curriculum that fits each student's career aspirations. See the Chair of Biological Sciences (p. 175) for advising.

### Bachelor of Arts Major Requirements

(183 credits required for the degree (p. 97))

A total of 60 credits in approved science disciplines is required; hence majors are not required to pursue a minor. Courses from any of the following departments apply toward the major: biological sciences, chemistry and biochemistry, computer science, engineering, geography and the environment, mathematics, and physics and astronomy. The 60 credits must be distributed in the following way: a minimum concentration of 20 credits each from two different departments (NOTE: departments with multiple subject codes are grouped together - for example: ENVI & GEOG or HLTH & BIOL) with a minimum of 30 upper-division credits (2000 level or above). Only 5 credits of Independent Study and/or Independent Research may count towards a concentration area. MATH 1951 is required. Integrated sciences majors are required to complete the general education requirements stipulated for science majors pursuing a BA.

### Requirements for Distinction in the Major in Integrated Sciences

- Minimum 3.5 cumulative GPA
- At least three quarters of research (Undergraduate Research or Independent Study)
- Completion of a thesis

## International Studies

Office: Anna and John J. Sie International Relations Complex, Suite 2030  
Mail Code: 2201 S. Gaylord St. Denver, CO 80208

Phone: (303) 871-6451  
Email: [baints@du.edu](mailto:baints@du.edu)  
Web Site: <https://korbel.du.edu/academics-advising/programs-ug/ba-minor-international-studies> (<https://korbel.du.edu/academics-advising/programs-ug/ba-minor-international-studies/>)

We interact with the global community in a thousand different ways every day. We connect with friends near and far remotely. We view updates on elections and currency crises, we track the spread of diseases and civil unrest, and we even follow the latest in entertainment from blogs and videos posted by people around the world. We do this using devices designed by international teams and built with materials and components from all over the world. We are part of a truly globalized planet.

The sheer volume and the speed of trans-border movement of people, products, and data mean that no country or individual exists as an island isolated from international forces. Our interdependence is a fact of life. The challenges of the 21<sup>st</sup> century are great: from controlling weapons of mass destruction to minimizing the impacts of climate change, from managing borderless trade and investment to tackling entrenched poverty and food insecurity, modern issues require international cooperation and collective solutions.

The BA program in International Studies offers undergraduate students at the University of Denver critical knowledge and skills for succeeding in a world that has gone global. Understanding how global institutions and exchanges work, and bringing an international perspective to one's professional development is a necessity for modern life. DU's International Studies curriculum gives students this foundation. Join us to learn about international events that directly affect your life, and how you can act as an agent of change for global good.

Students are required to complete a minimum of 44 credits in international studies to fulfill the major requirements. Students must also choose a specialization within the broad field of international studies. Specialization areas include Global Economic Affairs, Global Environmental Sustainability, Global Health and Development, Global Governance and Human Rights, and International Peace and Security. In addition, students are required to complete an approved study abroad program, as well as attain intermediate proficiency in at least one foreign language. Students should verify detailed requirements with the department.

## Major

### Bachelor of Arts Major Requirements

44 credits required as follows:

All courses must be completed with a C- or better in order to count towards and satisfy the requirements for the major.

Students must take at least 12 credits/3 courses at the 3000 level between their specialization and their supporting courses. 3000-level skills courses, while encouraged if of interest to the student, do not count for this requirement.

INTS majors must successfully complete the following coursework and requirements:

Code	Title	Credits
<b>Core: (8 credits)</b>		<b>8</b>
INTS 1500	Introduction to the Global Economy	
INTS 1700	Introduction to International Politics	
<b>Skills: (8 credits)</b>		<b>8</b>
INTS 2975	Global Issues Research Practicum	
Students take one additional course (4 credits) from the skills courses listed below (list updated annually):		
INTS 2468	Resolving Conflict by Negotiation	
INTS 2595	Political Risk and International Politics	
INTS 2790	Ethics and International Affairs	
INTS 3000	Research Methods & Design (limited to thesis students or instructor permission required)	
INTS 3218	Intelligence Threat Assessment	
INTS 3415	State Department Tradecraft	
INTS 3425	Political Psychology	
INTS 3431	Data and Forecasting for International Studies	
INTS 3455	Modeling for Development, Sustainability, and Security	
INTS 3505	International Health and Development	
INTS 3761	Diplomacy in the 21st Century	
INTS 3975	Data Science in International Relations	
<b>Specialization: (12 credits)</b>		<b>12</b>

Students take 3 classes (12 credits) from within one of the five standing specializations listed below or they build a unique one (i.e. Middle Eastern Studies) with advisor approval. The pre-designed and scheduled specializations are (subject to change as new courses are developed):

Global Health and Development (GHD):

INTS 2180	Politics of Development
INTS 2235	Gender and International Relations
INTS 2490	Introduction to Global Health
INTS 2760	Epidemics, Pandemics, and Panic
INTS 3040	Technology and Development
INTS 3111	Migration
INTS 3112	Innovations in Development
INTS 3220	Trafficking in Persons/Smuggling of Migrants
INTS 3431	Data and Forecasting for International Studies
INTS 3505	International Health and Development
INTS 3530	Politics and Economics of Food/Agriculture

Global Governance and Human Rights (GGR)

INTS 2235	Gender and International Relations
INTS 2565	Debates On Democracy
INTS 2667	Illicit Markets
INTS 2715	Introduction to Comparative Politics
INTS 3016	Global Governance
INTS 3212	Civilian Protection in Armed Conflicts
INTS 3222	International Law and Human Rights
INTS 3372	Comparative Genocide
INTS 3385	Migrants and Refugees: Humanity on the Move
INTS 3761	Diplomacy in the 21st Century
INTS 3701	Topics in Int'l Studies (Comparative Politics in the 21st Century )
INTS 3702	Topics in Int'l Studies (International Politics of Human Rights )

Global Environmental Sustainability (GES)

INTS 2275	Climate Breakdown
INTS 3420	Climate Security
INTS 3421	Environmental Justice and Policy
INTS 3530	Politics and Economics of Food/Agriculture
INTS 3630	Global Environment
PPOL 2701	Topics in Public Policy (Water Policy)
PPOL 3715	Sustainable Energy Policy

Global Peace and Security (GPS)

INTS 2235	Gender and International Relations
INTS 2377	War in Ukraine
INTS 2440	Women, War, and Peace
INTS 2605	Nuclear Weapons in International Security
INTS 3210	The Utility of Force in the 21st Century
INTS 3214	International Peace & Security
INTS 3220	Trafficking in Persons/Smuggling of Migrants
INTS 3225	Terrorism
INTS 3761	Diplomacy in the 21st Century

The Politics of the Global Economy (PGE)

INTS 2470	Crime & International Politics
INTS 2780	Global Corporate Responsibility and Accountability
INTS 3002	International Trade and Development
INTS 3013	Corruption – A Global Epidemic
INTS 3040	Technology and Development

INTS 3085	Global Economic Challenges
INTS 3600	International Monetary Relations
INTS 3703	Topics in Int'l Studies (The Politics of the Global Economy)
Technology and Global Affairs (TGA)	
INTS 2370	Globalization and the Knowledge Economy
INTS 2701	Topics in Int'l Studies (Information and Disinformation in International Relations )
INTS 2702	Topics in Int'l Studies (Emerging Technologies and Global Affairs )
INTS 3040	Technology and Development
INTS 3705	Topics in Int'l Studies (Introduction to Cyber Threats and Policy )
INTS 3708	Topics in Int'l Studies (Social Media and Politics )

**Supporting Courses (16 credits):** **16**

16 credits of INTS approved courses outside of the student's specialization.

**Total Credits** **44**

### Additional Requirements

#### Study Abroad Requirement

Students are required to complete an approved study abroad program (or have the requirement waived due to special circumstances by the INTS department). Coursework associated with study abroad for INTS credit must be pre-approved by the department prior to the start of the study abroad program.

## Secondary Major

### Secondary Major

44 credits. Same requirements as for BA degree.

## Minor

### Minor Requirements

20 minimum credits:

All courses must be completed with a C- or better in order to count towards and satisfy requirements for the major.

Code	Title	Credits
<b>INTS minors must successfully complete the following coursework:</b>		<b>8</b>
INTS 1500	Contemporary Issues in the Global Economy	
INTS 1700	Introduction to International Politics	
<b>Select at least three additional INTS courses as electives toward the minor.</b>		<b>12</b>
INTS minors may satisfy remaining requirements via INTS courses of their choosing. INTS electives must have the INTS prefix to count towards elective and credit requirements for the INTS minor. There is no specialization requirement for INTS minors.		
<b>Total Credits</b>		<b>20</b>

## Requirements for Distinction in the Major in International Studies

- Minimum 3.5 cumulative GPA (at the time of application and graduation);
- Minimum 3.7 major GPA (at the time of application and graduation);
- Prerequisites: successful completion of all INTS core courses (i.e. INTS 1500, INTS 1700, and INTS 2975), and at least two, 3000-level INTS courses;
- Submission of Departmental Distinction application, by December 1st of your junior year. Applications will be reviewed by the BA Program Committee in INTS and, if accepted, students will be notified prior to the registration period for Spring Quarter of their junior year. The application form is available on our Undergraduate Digication site (<https://du.digication.com/korbel-undergraduate/home/>). Failure to apply on time will invalidate a student's eligibility to participate in the program. (Note: If a student plans to study abroad during spring quarter of junior year, they must submit their application by December 1st of their sophomore year to remain eligible for Departmental Distinction.)

Students accepted to the Departmental Distinction Program must successfully complete the following curriculum in a satisfactory manner in order to achieve distinction in INTS:

- INTS 3000 Research Methods & Design (4 credit hours) - Spring Quarter of junior year. (Spring quarter of sophomore year if student is planning to study abroad spring quarter of junior year.)
- INTS 3990 Thesis (4 credit hours) - Fall or Winter Quarter of senior year.

## International Studies

INTS 1500 and INTS 1700 are approved as SI-Society courses. Students majoring or minoring in INTS are allowed to count one of these courses toward the SI-Society requirements in addition to it being counted toward the major.

<b>First Year</b>					
<b>Fall</b>	<b>Credits</b>	<b>Winter</b>	<b>Credits</b>	<b>Spring</b>	<b>Credits</b>

<sup>1</sup> Must complete the final course in the intermediate sequence, or above, of one foreign language taught at DU with a C- or better to fulfill INTS FOLA requirement.

<sup>2</sup> INTZ 2501 Exploring Global Citizenship is required for any student who studies abroad, and may be taken in any quarter within the year prior to studying abroad.

### INTS 1500 Introduction to the Global Economy (4 Credits)

Introduction to a range of pressing problems and debates in today's global economy, such as global economy, global markets and the global commons. Students will have a good understanding of the policy challenges posed by global economic integration and theoretical frameworks for understanding the functioning of the global economy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

### INTS 1700 Introduction to International Politics (4 Credits)

This course critically examines the nature of contemporary global society. It is designed to familiarize students with the broad parameters of international politics and takes into account numerous methodological and theoretical perspectives. The course explores both the historical development of international politics and how the business of international politics is "done." The course examines issues such as war and peace, human security, the politics of climate change, and international human rights. The overall goal of this course is to introduce students to the field of International Politics and to make them conversant about the major issues facing the global system in the 21st century. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**INTS 1988 Study Abroad Resident Credit (0-18 Credits)****INTS 2180 Politics of Development (4 Credits)**

This course seeks to answer an overarching question that plagues development studies: why are some countries poor while other countries are rich? Furthermore, we ask why poverty is persistent around the world, and how the economic, political, and social structures of a society can improve conditions of poverty within a country. We begin answering these questions by reviewing the history of development, especially development conceived since the 1950s, when the post-war world saw a need to rebuild societies in Europe, up to the present time, when human development became the focus in the decade following the end of the Cold War. The course covers the major documents promoting theories of development, as well as looks at the historical record of the implementation of development policies (noting the divergence between theory and practice). We consider specific case studies in the process of asking why some countries are poor and others are rich. Furthermore, we are concerned with the role of country policies and implementation practices, with the impact of international organizations (multilateral development organizations), and the influence of bilateral foreign aid, on development progress or decline within countries.

**INTS 2218 Intelligence and National Security (4 Credits)**

This course will provide an overview of the intelligence collection and analysis cycles, as well as the national security policymaking process. It will examine case studies in which both the perceptions and biases of analysts or policymakers resulted in intelligence failures, and discuss ways to avoid those misperceptions and counter biases. The course will conclude with a short simulation in which students will each play a member of the National Security Council, debating over the pros and cons of an important foreign policy decision.

**INTS 2235 Gender and International Relations (4 Credits)**

How does gender shape international relations (IR)? How do ideas about masculinity and femininity affect war and peace? The global economy? Migration? Foreign policy? What do feminist perspectives contribute to the study of IR? These questions have relevance for the academic study of IR as well as the lived experiences of people around the world. Answering them requires attending to the ways in which gender and aspects of sexuality are constructed through social and political relations, and the hierarchies of power they reflect and maintain. Overall, this course encourages students to grapple with the issue of if and how gender matters in international relations. We will begin by introducing the concepts and theories necessary to investigate, research, analyze, and understand the gendered nature of international relations. Next, we will use this knowledge to compare gendered and feminist perspectives on IR to mainstream IR and explore why they have not been fully integrated. Then we will engage in gendered analyses of a variety of topics in IR, focusing especially on security and the economy. We will finish by carrying out research on a topic of our choosing, using the lenses and tools we have developed. In the end, students should consider whether this sort of perspective provides a more nuanced and holistic way of understanding IR.

**INTS 2275 Introduction to the Environmental Crisis (4 Credits)**

We live in a time when the planet is undergoing great stress and strain. Multiple global environmental problems are pushing us to the precipice, but few people address the scope and scale of the problem. Clearly, the planet is undergoing powerful changes, much of it due to human activity. Indeed, this is exactly what we mean when we say we are now living in the Anthropocene epoch, where human activity has significantly altered the Earth. However, as complex the problems facing humanity are, a very simple question arises: Will humanity have enough time to turn away from going over the cliff and become sustainable? Although it is impossible to answer that question with any certainty, we have a much better chance of discovering an answer by realizing two basic components of the problem: 1) planetary stability, and 2) the planet as a system. This class distills the complex relationship between human activities and planet stability by understanding what planetary boundaries are and what it means when we push past them.

**INTS 2293 Democracy and Militarism in Latin America (4 Credits)**

Many note that even as democratization has taken place throughout Latin America, there has been a persistent and evolving role for the military, police, and private security forces in many cases. The purpose of the class is to explore this apparent contradiction by examining the various internal and external pressures that have come to bear on these societies. Through approaches derived from comparative politics and international political economy we study domestic factors such as interest groups, political parties, social movements, and governing institutions on one hand, and the role of international relations and organizations on the other.

**INTS 2370 Globalization and the Knowledge Economy (4 Credits)**

Much has been made of a new "knowledge economy" in which human capital has ascended to prominence over the traditional components of capital and labor. Further, the concept of "economic globalization" captures the realities of increasing interactions but exaggerates the notion of a single world economy connecting all producers, distributors, and consumers. In this class we examine the meaningful yet variable processes of increased knowledge diffusion and economic interaction to identify clusters of innovation, indicative of the knowledge economy. We then assess the applicability of globalization on a sector/ industry basis to identify ongoing transformations and future implications for knowledge development.

**INTS 2377 War in Ukraine (4 Credits)**

The war in Ukraine is a tragedy for all who are impacted. It is also a critical political/strategic event of the early 21st century and an insight into how political violence and the reactions/responses it provokes play out in a globalized world. Given we, sadly, cannot wish away war however defined, it is important to understand how/why this war started (the past), how/why it is playing out the way it is (the present), and what might happen going forward both specifically in the case of the Ukraine-Russia War/conflict and in other potential cases of future state level political violence (the future). As we are all citizens of states/societies confronting how to respond to threats to peace, our states/societies, and the world we live in, the war in Ukraine is a critical case study we can learn from and test our knowledge and preferences against in real time. Only in this way can we think seriously about the realities of political violence, international/global politics and strategic practice, and the humanitarian, social, economic, political, and physical costs that stem from war in a global age.

**INTS 2380 Comparative Development Strategies (4 Credits)**

Why do people in some countries have so much, while people in other countries lack basic necessities? This course explores the field of development economics, exploring the challenges improving quality of life in poor countries. We look at national-level indicators and explore theories of aggregate economic growth. But we also zoom in on particularly pernicious challenges, including health, education, the environment, agricultural transitions, demographic shifts, and human mobility. Students are invited to act as development practitioners themselves, developing skills in data analysis as well as grant writing.

**INTS 2430 History of the Middle East (4 Credits)**

This course treats the emergence of the modern Middle East in the modern period, roughly from the late 18th century to the present and examines the following topics: reformist attempts to meet the European challenge; the age of colonialism; the rise of nationalism; development strategies of socialism and capitalism; the impact of Israeli and Palestinian nationalism; the petroleum factor; the Islamic revolution in Iran; Saddam Hussein's Iraq; the Gulf War and the war on terror.

**INTS 2440 Women, War, and Peace (4 Credits)**

Conflict is gendered: it both shapes and is shaped by the gendered roles people play in society. Traditionally, men fight while women play supportive roles, men are perpetrators of violence while women are victims of this violence. However, this simple story is not only inaccurate, it limits our capacity to identify and analyze the full range of activities that men and women pursue during conflict. This story encourages us to valorize the warrior man and condemn men as cowards who will not take up arms. This story encourages us to expect women to be the victim and to ignore or treat as aberrant women who are perpetrators of violence themselves. This story also ignores the reality that the male/female dichotomy does not represent the full continuum of gender expression. The processes of peace-building are similarly gendered as it is elites who sit down to discuss the cessation of violence and design peace agreements and these are nearly always men who fight. Post-conflict environments are structured by peace agreements. When agreements are written by particular men, institutions and social structures tend to maintain the same kinds of gender bias that existed during conflict. This class will explore a range of issues guided by the question: how are conflict and post-conflict processes gendered?

**INTS 2468 Resolving Conflict by Negotiation (4 Credits)**

Social conflict is a national and global issue often expressed in violent ways culminating in shootings, civil war, and international terrorism. It is easier to escalate conflict than diffuse it, and easier to fight rather than negotiate, situations that often lead to frustration and insecurity for disputants. This course examines approaches and mechanisms of conflict resolution within the context of personal, cultural, and political barriers to understand why parties continue to fight or manage to solve their differences through settlement and reconciliation, and teaches techniques of conflict resolution, essential skills for progress and prosperity in the modern world.

**INTS 2470 Crime & International Politics (4 Credits)**

What constitutes a crime in one location may constitute a personal right, a survival strategy or legitimate business opportunity in another. So how then does one address criminality in a global society? This course explores the roots of transnational crime and both domestic and international response to criminal networks. Topics include corruption, the drug trade, and human trafficking.

**INTS 2490 Introduction to Global Health (4 Credits)**

This class is an introduction to the field of global health and explores relationships between social, political, cultural, and economic conditions of mostly low and middle-income countries and their impact on health and health services. We will spend some time covering health issues in high-income countries as well. A major focus of the course is the evolution of primary health care and alternative strategies in global health. Topics addressed include: maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies, and funding sources. The course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to global health challenges.

**INTS 2565 Debates On Democracy (4 Credits)**

This course will cover a range of questions and issues related to the contemporary practice of democracy around the world. We will begin the course by briefly addressing questions about how to study democracy, including definitions and measurement. We will then turn to the question of why some countries adopt and practice democracy, while many others remain under authoritarian systems of rule, paying special attention to why and how democracy is apparently under increasing threat in some parts of the world. The second part of the course will assess issues of governance – why and how democracies do (or do not) effectively address the security, economic, environmental, and social needs of their populations. The third part of the course will address emerging challenges for democratic systems of government such as changes in information technology, migration and the management of diversity, and globalized capitalism.

**INTS 2595 Political Risk and International Politics (4 Credits)**

Political risk has risen in both scale and relevance since the start of the 21st Century to become a vital tool for policymakers, military planners, and global business leaders to chart a course forward. This course will provide you with an introduction to this exciting and growing discipline, introducing concepts like scenario analysis, field reporting skills, forecasting, and other tools of the risk consulting industry to familiarize you with this evolving practice area. We will explore how modern governments, NGOs, and multinational businesses factor risk into the decision-making process. We live at a time of great geopolitical transition and risk lurks around every corner. From the War in Ukraine to the debate over climate change to gyrating interest rates and energy prices, there has never been a more important moment to understand how to integrate risk into your thinking.

**INTS 2605 Nuclear Weapons in International Security (4 Credits)**

What role do nuclear weapons play in international politics? Why do states develop nuclear weapons? How are these weapons used in different crises? This course is an introduction to different themes in nuclear politics. The course will introduce students to the history of nuclear weapons, theories of nuclear deterrence, crises, non-proliferation, and disarmament. We will examine the nuclear weapons choices of different states, including those who have developed nuclear weapons, and those which have chosen to give them up. We will also assess if the international nuclear non-proliferation regime has been successful in attempting to spread nuclear weapons. The course will train students to pay attention to theoretical debates on nuclear weapons and how they speak to policy considerations and assess these arguments using historical empirical evidence. The course will also use these tools to assess current nuclear challenges with regard to U.S.-China competition, and the different crises involving North Korea, Iran, Russia, India, and Pakistan.

**INTS 2667 Illicit Markets (4 Credits)**

This course explores the relation between illicit networks, security, and the state in the global economy. We study the links between what is considered formal and informal, and legal and illegal, to examine what official views obscure in the everyday relations of transnational activities. The material largely examines illegal practices from the ground-up from the perspectives of everyday people, communities, and those involved in extra-legal activities. We begin with a critical examination of the categories of "illegal," "illicit," "the state," and "corruption." We reveal these categories as socio-cultural and political constructs rather than as pre-existent neutral categories of analysis. Who applies these definitions? How have they changed and what interests do they serve? Are distinctions between "illegal" and "illicit" useful or do they obscure the power of the state to determine legitimacy? Are some activities inherently illegal? Moreover, we explore the impacts of state security and militarization efforts on extra-legal networks and experiences of insecurity.

**INTS 2700 Topics in Intr'l Studies (4 Credits)****INTS 2701 Topics in Int'l Studies (4 Credits)****INTS 2702 Topics in Int'l Studies (4 Credits)****INTS 2703 Topics in Int'l Studies (4 Credits)****INTS 2704 Topics in Int'l Studies (4 Credits)****INTS 2708 Contemporary US Foreign Policy (4 Credits)**

When the United States first won its independence, its leaders sought to avoid at all costs the countless problems awaiting any country engaging in foreign affairs. Indeed, John Quincy Adams, in 1821, warned the United States of the dangers of "going abroad in search of monsters to destroy." In September of 2002, however, as American forces occupied one country and prepared to invade another, the Bush Administration released its National Security Strategy of the United States, which states: "To contend with uncertainty and to meet the many challenges we face, the United States will require bases and stations within and beyond Western Europe and Northeast Asia, as well as temporary access arrangements for long-distance deployment of U.S. forces." How did we go from isolation to empire? In this course, we will attempt to answer this question by exploring the progression of American foreign policy from its emergence out of isolation to its current stage of interventionist superpower. We will also identify and discuss key issues that are driving America's conduct abroad as well as evaluate the strengths and weaknesses of the given policies addressing these important issues. By the end of the class, students should have a solid knowledge of the major themes and developments in the history of American foreign policy as well as the ability to reflect critically upon on-going foreign policy debates.

**INTS 2715 Introduction to Comparative Politics (4 Credits)**

This course offers an introduction to the comparative study of political systems throughout the world. In the years following World War II, social scientists traveled extensively to newly decolonized regions of the world to examine societies there. Many found conditions so distinct from those of the western world that they warranted new models of political development. The distinguishing of development patterns in remote regions from those of western nations became the origin of modern comparative politics. The course considers both the impact of internal and external variables on political development. Internal or "domestic" variables include ideology, geography, economics and culture, while external variables include "globalization" and international conflict. Class includes understanding and critique of models of political development including classical liberal, authoritarian, communist, post-communist, "late" development, and social democratic models. It also includes discussion of possible new models in light of globalization and other factors.

**INTS 2725 Comparative Politics of the Middle East (4 Credits)**
