**ASIA 3701 Topics in Asian Studies (1-4 Credits)**

Specialized topics in Asian Studies. Topic varies per offering. Check with the Asian Studies program director for more information. Open to majors and non-majors May be repeated for credit.

**ASIA 3901 Asian Studies Directed Readings (4 Credits)**

Students will read deeply in a specific field of scholarship directed by a core faculty member in the Asian Studies program and will write a methodological essay that discusses the scholarship in their chosen field of research. This is the first part of a required, two-quarter sequence that will culminate in the senior thesis. Enrollment is restricted to Asian Studies majors.

**ASIA 3902 Asian Studies Senior Thesis (4 Credits)**

Students will pursue a primary document research project under the supervision of their core faculty member in Asian Studies. The goal of this course is the writing and completion of the senior thesis in Asian Studies. Prerequisite: ASIA 3901.

**ASIA 3980 Asian Studies Internship (1-4 Credits)**

Provides academic credit for off-campus internships in areas related to the Asian Studies major. The purpose of the internship is the gain valuable work experience, explore various career options, develop job competencies and/or apply theoretical knowledge to practical concerns of the world. Must be an Asian Studies major and have cumulative GPA of 3.0 and have taken at least two Asian Studies content courses, not counting language training. Requires approval of Asian Studies director.

**ASIA 3991 Independent Study (1-4 Credits)**

## Bachelor of Arts Completion Program (BACP)

**BACP 2050 Writing Workshop (4 Credits)**

The Writing Workshop focuses on developing essential writing skills that boost confidence and improve performance in university coursework and the workplace. This course is designed to enhance students' research and writing abilities, providing them with the tools and knowledge to effectively communicate ideas in a variety of contexts. Through a combination of practical exercises, collaborative work, and critical analysis, students will develop proficiency in writing clearly. They will learn to employ conventions of structure, style, voice, grammar, and mechanics to produce writing tailored for specific purposes and audiences. Additionally, they will learn how to apply a style guide successfully.

**BACP 2075 Data Concepts and Structures (4 Credits)**

This course will cover the basics of data to include data concepts, terminology, and literacy. Students will learn what typical data sets are, how data relationships work, and where data is stored. These concepts will be the basis for data analysis using commonly available tools and techniques.

**BACP 3350 Directed Research (4 Credits)**

Directed Research introduces students to academic research with focus on developing substantive academic arguments. In this course, students select a topic from their majors to research and produce an argumentative research paper. This course focuses on several aspects of the academic writing and research process. Students will apply critical thinking, identification, assessment, and application of arguments in academic work. They will practice developing claims, annotating sources, and integrating effective and accurate sources into one's own writing. This course also emphasizes appropriate use of collegiate-level grammar, mechanics, and style, and correct use of Turabian Author-Date style citations and College of Professional Studies format requirements.

**BACP 3400 Civic Engagement (4 Credits)**

Most people have some desire to be of help to others, but knowing how to help without interfering or being condescending often requires cultivated sensitivity. Education has social and personal benefits and carries opportunities and obligations for civic engagement. As a result, students in the course participate in a Civic Engagement project, which gives students the opportunity to identify a community need, learn how that need is or is not being addressed, and engage in a particular set of service activities for an agreed upon duration of time. Students may receive help finding appropriate settings through DU's Center for Community Engagement and Service Learning. Online students receive help identifying service learning opportunities in their local communities or through their employers. Students are expected to keep and submit a reflective log on the nature of their activity and the learning they have derived from it. This course helps students learn to create real change as they engage as active citizens in their community.

**BACP 3450 Integrative Project Design (4 Credits)**

Through this course, students create a project design for their integrative project which is conducted and completed in BACP 3500. This course, along with BACP 3500, emphasizes B.A. Completion Program learning objectives: creativity, critical thinking, knowledge utilization, decision-making, empowerment, and effective communication. Students design a research-based project, which, when the project is completed, illuminates the problem and argues for a set of activities addressing the issues and proposing a possible solution. In doing so, students draw on theories, concepts, and knowledge from several different courses in their major. Students complete the design document for the Integrative Project Report including the identification and definition of the problem, purpose of their project, setting/context for the project, an extensive literature review outline, preliminary methods of investigation, and a timeline for completion. Students leave the course prepared to begin the Integrative Project.

**BACP 3500 Integrative Project (4 Credits)**

Students in all majors design, complete, and submit an integrative project. The project comprises implementation of the project design developed in BACP 3450. The integrative project requires: clear problem definition; gathering high-quality relevant evidence; analyzing and evaluating evidence, data, and information; developing findings (e.g., conclusions, recommendations, decisions, results, observations, inferences, solutions, etc.); and crafting arguments to explain how and why these findings were reached, and why the findings are valid. The project focuses on utilizing background knowledge or skills developed throughout the BACP, integration of evidence, applying critical thinking skills, and presenting a coherent and persuasive culminating academic paper. The emphasis is on combining several concepts, types of knowledge, and skills learned through the B.A. Completion Program to address a specific challenge. Through this project students learn how multiple perspectives can be integrated to create useful solutions to defined problems.

**BACP 3980 Internship (0-4 Credits)**

The Bachelor of Arts Degree Completion Program Internship is designed to offer students a purposeful experience in a practical, industry-related setting. The internship is an individualized learning experience. A plan is created for each student in conjunction with the internship site supervisor to provide experiences related to the skills and knowledge covered in their programs and their professional goals. Students are responsible for finding their own internship site and proposing their internship ideas. To be eligible for an internship, completing a minimum of 28 hours of coursework is required OR Academic Director approval.

**BACP 3991 Independent Study (1-4 Credits)**

Student completes special learning project on a topic which is not covered by an existing course. This project is completed under faculty supervision. Topic and assignments must be approved by supervising instructor and Bachelor of Arts Completion Program director.

## Biology (BIOL)

**BIOL 1005 Perspectives-Veterinary Medicine (2 Credits)**

Introduction to career areas in veterinary medicine through lectures, guest speakers and demonstrations. The credits for this course are general elective only. They do not apply to any major or minor in NSM or to SI-NPW of the common curriculum. Prerequisites: BIOL 1010 and BIOL 1020, or by departmental permission.

**BIOL 1010 Physiological Systems (4 Credits)**

The second required course in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on physiology and development of plants and animals. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1020 lab section.

**BIOL 1011 Evolution, Heredity and Biodiversity (4 Credits)**

The first required courses in the introductory biology sequence required for students majoring in Biology or another science. Emphasis on evolution, basic genetics and inheritance, and biodiversity. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1021 lab section.

**BIOL 1020 Physiological Systems Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1010 lecture section.

**BIOL 1021 Evolution, Heredity and Biodiversity Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 1011 lecture section.

**BIOL 1221 Molecules to Humankind II (4 Credits)**

Second class in a three-quarter sequence for non-majors begins with an introduction to the general vertebrate body plan; we emphasize the human body plan but also compare it with other vertebrates. Discussions progress through the major organ and physiological systems of the body, including circulatory, respiratory, excretory, endocrine, nervous, skin, immune, reproductive, gastrointestinal, and skeletal and muscle systems. Discussions concentrate on the organization and function of these systems. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1260 Sustaining Life I (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life -- and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function -- including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1261 Sustaining Life II (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1260.

**BIOL 1262 Sustaining Life III (4 Credits)**

A three-quarter sequence for non-majors examining some important biological mechanisms that sustain life – and "life" in general! Emphasis is placed on the understanding the critical connections between the student's health and the health of the surrounding world. The first quarter begins with a discussion of the defining characteristics of "life" and the basic mechanisms required to sustain it. The course continues with an overview of biological diversity and ends with a focus on the many important connections between food, human health, and environmental health. The second quarter begins by building a basic understanding of how ecosystems function – including the interactions among living organisms (including humans) and between these living organisms and their environment. The course continues with focused discussions of issues related to the impact of biological diversity on infectious disease and medicine. The third quarter begins with a focus on the importance of biodiversity to biomedical research, especially related to model systems. It then reviews some of the current threats to biodiversity and concludes by exploring some possible solutions that can give hope for sustaining "life" in the future. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1261.

**BIOL 1270 Living in the Microbial World I (4 Credits)**

Students receive an introduction to the world of microbiology, the good, the bad and the ugly. With the help of the press and movie industry, most "human hosts" believe that microorganisms are to be feared, sterilized and/or destroyed. While this is true for a very small number of microbes, the majority is composed of essential and beneficial microorganisms that help the existence of all life on Earth. This first course in the sequence for non-majors is dedicated to raising the awareness of students to the value and need of our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**BIOL 1271 Living in the Microbial World II (4 Credits)**

For such a small size, microorganisms can have a large impact on our human world. This second course in the sequence for non-majors brings a new perspective to students on the role microorganisms, and their associated diseases, have played in turning the tide of war victories, immigration of a country, world politics and more. We tend to believe that humans alone can control their world but sometimes the mightiest of all are our unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1270.

**BIOL 1272 Living in the Microbial World III (4 Credits)**

In this last course in the sequence for non-majors, students are given an opportunity to challenge their beliefs and understandings of how life came to exist on Earth and the perspective of how humans are the most evolutionarily advanced. Students are guided through time on Earth and examine the development of life and the constant contribution of their unseen partners. Laboratory included. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1271.

**BIOL 1988 Study Abroad Resident Credit (0-18 Credits)****BIOL 1990 Independent Study (1-5 Credits)****BIOL 2010 General Ecology (4 Credits)**

Topics in ecosystems, population and community ecology, as well as behavioral ecology. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1011 and BIOL 1010. Co-requisite: BIOL 2011.

**BIOL 2011 General Ecology Lab (1 Credit)**

Exercise and experimentation to compliment the lecture. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 2010, and Prerequisite: BIOL 1021.

**BIOL 2055 Ways of Seeing and Sensing in Biological Systems at Kennedy Mountain Campus (4 Credits)**

Ways of Seeing and Sensing represents a new collaboration between the departments of Biological Sciences, Physics & Astronomy, and Media, Film & Journalism Studies at DU's Kennedy Mountain Campus (KMC). As part of this course, students will collaborate as part of multidisciplinary teams; to compile and apply new content knowledge in biology/ecology, film-making, science communication and story-telling in a project-based curriculum unique to the KMC. The class is a place-based exercise revolving around the idea that what we know about our surroundings depends on how we "see" or "sense." We will examine various aspects of natural systems specific to the Kennedy Mountain Campus (KMC) using both micro and macro approaches to "seeing" through a variety of technologies, including microscopes, trail cameras, photo and video cameras, night vision glasses, and telescopes. To further develop the concept of "sensing," we will explore the soundscapes of the KMC as well as the ways plants and animals in this ecosystem sense their surroundings. We will also explore the KMC using human senses other than sight to navigate the nighttime environment. Students will work in teams of 3–4 to develop and produce documentary stories unique to the ecology and astronomy of the KMC. Students choosing to participate for credit in Biological Sciences will complete additional reading and assignments focusing on the various ways that biological systems (from cells, to organisms, to communities) sense and respond to changes in their environment, including light, heat, sound, chemical cues, and physical forces such as electricity and gravity. This course will meet together with PHYS 2050 and MFJS 2050 courses, which each have different prerequisites and discipline-specific assignments. Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 2090 Biostatistics (4 Credits)**

Statistics in biological research. Computer-aided statistical analysis and hypothesis testing focusing on experiments and data unique to the biological sciences. Cross listed with BIOL 4090.

**BIOL 2120 Cell Structure and Function (4 Credits)**

Chemical composition of cells; structure and function of cell organelles; interrelationship of cellular unit with its environment; mechanisms of energy conversion within cells; functions of excitability, contractility and cell growth. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: BIOL 1011. Corequisites: BIOL 2121 lab section. Recommended: Background in CHEM 1010 or equivalent.

**BIOL 2121 Cell Structure & Function Lab (1 Credit)**

Exercises and experimentation to complement lecture material. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: BIOL 2120.

**BIOL 2320 Andean Landscapes (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in the Andes of Peru through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits and occurs during winter interterm. Over a period of 11 days we will visit the cities and surroundings of Lima, Arequipa, and Cusco, Peru where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The Andean environment offers unique challenges for environment and societies and by understanding the locations and patterns of human activity in the Andes, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in situ critical thinking skills and the promotion of cultural diversity and global awareness. Prerequisite: BIOL 1011.

**BIOL 2510 General Genetics (4 Credits)**

Mechanisms of heredity with application to all forms of life. Topics include classical genetics (mendelian inheritance, meiosis, epistasis, recombination gene mapping, chromosomal mutations) and an introduction to modern molecular genetics (DNA structure and function, gene expression and regulation). This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: BIOL 1010 & 1010, BIOL 1011. Recommended prerequisite: BIOL 2120. Corequisite: BIOL 2511.

**BIOL 2511 General Genetics Lab (1 Credit)**

The laboratory component of BIOL 2510. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisites: BIOL 2510. Prerequisites: BIOL 1020 and BIOL 1021. Recommended Prerequisites: BIOL 2121.

**BIOL 2825 Biogeographies of Conservation in Serengeti & Zanzibar (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in mainland Tanzania and the island of Zanzibar through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem and Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity and global awareness. Fulfills biology, geography, environmental science, sustainability minor, and intercultural global studies minor requirements. This course counts as a category elective for the Ecology and Biodiversity major. Prerequisite: BIOL 1011.

**BIOL 2988 Study Abroad Resident Credit (0-18 Credits)****BIOL 3005 Science Communication (4 Credits)**

Science communication has shaped, and continues to shape, the world in which we live (e.g., why you wash your hands, why we don't feed bears in U.S. national parks anymore, and why some students imagine themselves becoming scientists or not). Sharing how science is conducted and how new knowledge is generated through the scientific method also plays a critical role in our future: creating engaged citizens, shaping the next generation of scientists, increasing diversity and diverse perspectives in the sciences, informing policy-makers and lawyers, combatting misconceptions, increasing trust of scientists, and guiding our own individual behaviors. But, like any other complex skillset, science communication takes practice. This course provides students with a range of resources and skills for effective, ethical, and evidence-based communication of complex socio-scientific issues. It provides a supportive environment in which students will practice and refine their science communication through peer feedback and engagement with real audiences. The focus is on cultivating practical communication skills, with emphasis on effective speaking, writing and exhibition of scientific topics with the variety of audiences students will encounter in their future careers. Course readings, activities, and final projects also examine how identity shapes both the science we do and the lenses we and other stakeholders bring to communication tasks. The course is hybrid, highly interactive, and writing-intensive. This course is restricted to Junior or Senior Standing UG majoring in the College of Natural Sciences and Mathematics.

**BIOL 3007 Computing for Biologists (4 Credits)**

This course will introduce you to critical computing skills for working with biological data. The course is applicable to any field in biology, and we will use a combination of ecological and genome datasets as examples of how to analyze large biological datasets. You will gain a foundation in navigating computing environments (unix), basic programming (bash and R), and managing data, plotting, and basic statistics in R. We will also cover some tools for sharing and reproducing datasets. Pre-requisites: BIOL 1010 and BIOL 1011.

**BIOL 3009 Scientific Writing (4 Credits)**

In this course, students learn how to write scientific papers and grants. Importantly, students learn not only how to create these products, but they also learn to build writing momentum and complete projects on time. During the course students make major progress in their writing project(s) through a variety of homework assignments and dedicated time in class to writing. Pre-requisite: BIOL 1011 and BIOL 1010.

**BIOL 3010 Evolution (4 Credits)**

Evolution is the central concept in biology. This course examines the foundations of evolutionary theory. We will cover the history of life on earth, the genetic basis for evolution, evolutionary processes (natural and sexual selection), the origin of species, and medical applications of evolutionary theory. Prerequisite: BIOL 1010 and BIOL 1011.

**BIOL 3025 Science and the Law (2,4 Credits)**

This course will focus on the intersection of science and US law. Four major areas of focus that will be covered are the admissibility of expert witnesses / scientific evidence in court; how advances in forensic genetics and national DNA databases raise legal issues pertaining to expectations of privacy and the standards for reaching a verdict; the impact of US Supreme Court opinions on the patenting of genes used as diagnostic markers for human disease and the legal landscape surrounding issues of evolution and creationism/intelligent design. Students will then explore how the law impacts their own areas of scientific interest. The goal of this course is to increase our understanding as scientists of how advances in science impact and are impacted by the US judicial system. PREREQUISITES: BIOL 1010 AND BIOL 1011.

**BIOL 3035 Invasive Species Ecology (4 Credits)**

This course investigates those plants and animal species that have dramatically expanded their ranges and cause ecological harm. Topics covered include the mechanisms of ecological impacts across the globe, how invasive species are used to test basic ecological theory, the application of this research for managing real species, and related issues such as the debate within the scientific community about the term "invasive." We use a case-study approach, and students have the opportunity to go into the field as a class to observe the real invasions and learn sampling methods.

**BIOL 3044 Coral Reef Ecology (3 Credits)**

Ecology of coral reefs; organization and distribution of reefs; review of reef organisms and their interactions with each other and their physical environment; threats to coral reef conservation. This course counts as a category elective for Ecology and Biodiversity majors. Prerequisite: (BIOL 2010 or BIOL 2050) OR (GEOG 1201, GEOG 1202, and GEOG 1203).

**BIOL 3045 Coral Reef Ecology Lab (1 Credit)**

Ecology of coral reefs laboratory to supplement lecture material; travel to the Caribbean over spring break to observe coral reefs firsthand; introduction to research methods. SCUBA certification and permission of instructor required. A travel and dive fee is associated with this course.

**BIOL 3055 Ecology of the Rockies (4 Credits)**

A week in residence at the Mt. Evans Field Station prior to the start of fall quarter includes field projects dealing with ecology and environmental issues. On campus classes involve data analysis and interpretation and formal scientific communication. Themes include terrestrial and aquatic ecosystems, taxonomic groups ranging from conifer stands to aquatic insects and mountain goats. Lab fee associated with this course. Prerequisite: BIOL 2010 or permission of instructor.

**BIOL 3070 Ecological Field Methods (4 Credits)**

Series of field exercises for students to learn principles and procedures of field methodology, data analysis and technical writing in ecology; problems drawn from population, community and ecosystem ecology. Lab fee associated with this course. Prerequisite: BIOL 2010.

**BIOL 3074 Forest Ecology (4 Credits)**

This course provides an overview of the distribution, structure, function, and dynamics of forest ecosystems. Topics include: paleoecology, ecophysiology, disturbance, succession, community analysis, forest hydrology, primary productivity, and nutrient cycling. Throughout, we maintain an emphasis on the scientific process and how it is used to study the controls on the distribution and abundance of organisms.

**BIOL 3076 Ecosystem Ecology (4 Credits)**

This course provides an overview and introduction to general and topical themes on ecosystem ecology. Topics include: biotic energy, nutrient cycling, trophic interactions, food webs, hydrology, primary productivity, and soils science. Throughout, we maintain an emphasis on the scientific process and how it is used to study the controls on the cycling of energy, matter, and nutrients in terrestrial and aquatic ecosystems across tropical, temperate and boreal settings.

**BIOL 3085 Insect Ecology (4 Credits)**

A general introduction to insect biology and the science of entomology. Arthropods are the most diverse group of animals on Earth and insects account for more than half of all known living organisms. This course explores the biodiversity of insects on Earth, insect morphology and physiology. The evolutionary history and taxonomy of key orders of insects is emphasized as well as the importance of insects to our everyday lives. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010.

**BIOL 3090 Microbial Ecology (4 Credits)**

Interactions among microorganisms and their environment. Impact of ecological principles on microbial diseases, pollutant degradation, nutrient cycles and global change. Prerequisites: BIOL 1010, BIOL 1020, AND BIOL 2510.

**BIOL 3095 Global Change Ecology (4 Credits)**

Over the past century, the mean surface temperature of our planet has increased slightly less than 1°C. While this may seem like a small increment, this change is already profoundly affecting Earth's organisms and ecological communities, and predictions for the impacts of continued change range from severe to catastrophic. Humans are also changing the environment through alteration of nutrient and water regimes. Topics include cause of climate change, comparison to past climatic change, human contribution to change and effect on organisms, communities and ecosystems. Prerequisites: BIOL 1010, BIOL 1011, AND BIOL 2010. Recommended Prerequisites/Corequisite: BIOL 2090.

**BIOL 3110 Special Topics: Biology (1-5 Credits)**

Topics of special interest to teaching/research faculty of department presented as needed to complement and expand existing curriculum. May be repeated for credit. PREREQUISITES: BIOL 1010.

**BIOL 3120 General Microbiology (4 Credits)**

Fundamental principles of microorganisms in the world and in disease; role of bacteria in biological phenomena. Includes laboratory. Lab fee associated with this course. Prerequisite: BIOL 2120.

**BIOL 3145 Cellular and Molecular Biology of Cancer (4 Credits)**

This course examines the mechanisms that underlie the development and progression of cancer. The cellular and molecular events that drive uncontrolled cell proliferation and eventual metastasis of tumors are discussed. Prerequisite: BIOL 2120.

**BIOL 3150 Intracellular Dynamics (4 Credits)**

Focuses on spatial and temporal control of intracellular processes with an emphasis on neuronal and endocrine cells. Topics include vesicular traffic, protein targeting, dynamics and spatial organization of signaling complexes. Emphasis on modern techniques of cell and molecular biology with examples from primary literature. Prerequisite: BIOL 2120.

**BIOL 3160 Biophysics: Ion Channels & Disease (4 Credits)**

Examines ion channel structure and function and the ways in which this information provides insight into human disease. The focus is on the use of biophysical techniques in combination with molecular and genetic analysis of channel genes. General Physics recommended. Prerequisite: BIOL 2120.

**BIOL 3230 Nutrition (3 Credits)**

Investigation of metabolism, all nutrients and various applications of nutrition to sports and healthy living. Prerequisite: BIOL 3250.

**BIOL 3241 Anatomy and Physiology of the Skeletal, Nervous and Muscular systems (0-5 Credits)**

This course is designed to introduce students to the fundamental concepts, content and scientific bases of Skeletal, Muscular, and Nervous system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Lab fee associated with this course. Prerequisites: BIOL 2120.

**BIOL 3242 Human Anatomy and Physiology - Systems of homeostasis (0-5 Credits)**

This course is designed to introduce students to the fundamental concepts, content and scientific bases of Cardiovascular, Respiratory, Urinary, Digestive, Immune and Reproductive system anatomy and physiology at both macroscopic and microscopic levels. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. The course will utilize diverse resources, exercises, and activities to engage you in the learning process, including, text, video, animations, models, dissections, inquiry-based learning, and a variety of assessments. Please note that the lab portion of this course does require dissection. Lab fee associated with this course. Prerequisites: BIOL 2120.

**BIOL 3251 Exercise Physiology (4 Credits)**

This course will cover exercise physiology topics included but not limited to: energy systems, physiological response to exercise/training, and exercise programming. A strong background in human physiology is recommended. Prerequisite: BIOL 1010.

**BIOL 3252 High Altitude Physiology (4 Credits)**

This course is an advanced course in physiology for those interested in both the impacts of altitude exposure on health and athletic performance. We live at altitude in Denver, and in fact there are many factors affecting our bodies (which we may or may not realize) that impact our daily lives. This course aims to provide insight on the acute and chronic physiological responses of altitude as well as to provide a deeper understanding into the use of hypoxic environments for improving health and benefiting athletic performance. We will explore the physiological mechanisms related to these reduced oxygen environments as well as develop projects that contribute to the understanding of using this environment as a stimulus. Prerequisite: BIOL 3242.

**BIOL 3253 Environmental Physiology of Animals (4 Credits)**

By studying species across the animal kingdom, we will learn about the vast array of physiological strategies that have evolved to help animals maintain homeostasis in the face of varied environmental challenges. We will cover foundational principals of animal physiological ecology and evolution, as well as new and exciting discoveries through weekly discussions of primary literature. We will focus primary literature discussions on "extreme environments," as Earth's harshest landscapes provide exciting and powerful examples of adaptations of physiological systems. This course will be delivered through a combination of lectures, active learning assignments, readings from the scientific literature, and group discussions. By the end of this course, you will develop a new perspective on the ecological and evolutionary factors that shape physiological similarities and differences among the animals of our planet (including humans). Prerequisites: BIOL 1010 and BIOL 1011.

**BIOL 3254 Advanced Cardiovascular and Pulmonary Physiology (4 Credits)**

This course provides a deeper level of physiological knowledge of the cardiac, vascular, circulatory, and pulmonary systems and their functions. With both lecture materials as well as in-class discussion of concepts and research articles, we will go deep into the basic levels of composition and function and facilitate the understanding of mechanisms that limit disease populations, elderly, etc. How can we adapt our lifestyles to improve our cardiovascular health? Prerequisite: BIOL 2120 or BIOL 3242.

**BIOL 3256 Advanced Human Anatomy & Physiology (0-5 Credits)**

This one quarter course is intended for advanced biology and physiology majors with an interest in the anatomical structure and physiological functioning of body systems. This course builds upon the Human Anatomy and Human Physiology courses that are prerequisites. This advanced course will explore in greater depth understanding mechanisms of action of major body systems and elaborate on the relationship between structure and function. In addition to didactic content, students will complete evaluation of primary literature and design laboratory experiments to test hypotheses of interest. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, models, dissections, inquiry-based learning, experimentation and a variety of assessments. The course consists of both lecture and laboratory sessions each week and requires attendance and participation in both. Please note that the lab portion of this course requires dissection. Lab fee is associated with this course. Prerequisites: BIOL 3241 and BIOL 3242.

**BIOL 3257 Clinical Exercise Physiology (5 Credits)**

This is an upper-level course in clinical physiology for those interested in understanding fundamental practices and assessments within clinical settings. We will work to combine knowledge from various backgrounds in physiology and tie theoretical and practical concepts together for assessing body function and developing methods for improving health and performance. We will relate daily experiences with class content to deepen our knowledge and retain this information for future reference. We will connect the physiological concepts related to the cardiovascular, respiratory, muscle systems as well as develop projects that require combining knowledge of the assessment skills and evaluation for clear communication and exercise prescription to special populations. Prerequisite BIOL2120 or BIOL 3242.

**BIOL 3258 Research Techniques in Exercise Physiology (4 Credits)**

This upper-level course is designed to give you exposure to several methods of research within the area of exercise physiology. This is a hands-on course that combines theory and literature with practical research experiences in physiology. For those interested in understanding more about research, this is the course for you as we will perform data collection and analysis of differing topics. These may include the following topics: pulse and tissue oxygenation, signaling (heart rate variability, oxygen kinetics), respiratory loops, Doppler ultrasound (blood flow and tissue structure), etc. Our aims will focus on understanding how and why the method works, how to collect data, as well as the analysis and reporting of variables for proper interpretation.

**BIOL 3259 Electrocardiogram Interpretation (2 Credits)**

This course is an advanced course in cardiac physiology for those interested in understanding principles associated with cardiac function, electrical physiology of the heart, and interpretation of the electrocardiogram. This is applicable for several pre-med career paths especially within clinical settings. As the functions related to our heart drive our cardiovascular system, we will find ways to relate our experiences of daily life to the concepts and principles learned throughout this course to deepen our knowledge and retain this information. We will explore the physiological mechanisms related to the cardiac system as well as develop projects that require combining knowledge of the electrical pathways and of use of electrocardiography for proper interpretation. Prerequisite: BIOL 2120, BIOL 3241, BIOL 3242, or equivalent.

**BIOL 3260 Nutritional Physiology (4 Credits)**

This course is designed to introduce the fundamental concepts, content and scientific bases of nutritional physiology at the levels. This course will examine the scientific structure and properties of carbohydrates, proteins and lipids as the major macronutrients required for human health. In addition, it includes exploration of the digestion, absorption and metabolism of both macronutrients and micronutrients. The course will utilize diverse resources, exercises, and activities in the learning process including text, video, animations, inquiry-based learning, experimentation and a variety of assessments. Prerequisite: BIOL 2120.

**BIOL 3261 Exercise Testing and Prescription (4 Credits)**

The purpose of this upper-level course is to develop knowledge combined with hands-on skills for integration of exercise testing and prescription concepts. Material in this course will be applicable for performance as well as clinical considerations. This is an active course which will require your participation as both the subject and technician, giving perspective and understanding of methods and protocols along with their justification for various purposes. Recommended prerequisite course: Clinical Exercise Physiology.

**BIOL 3280 Intro to Pathophysiology (4 Credits)**

This course is designed as an introduction of the mechanisms and consequences of disease based on physiological dysfunction in the major organ systems. The course will focus on the fundamental concepts and processes of human pathophysiology through exploration of the unique physiological roles of several body systems, how these systems have important integrative relationships that underlie the overall physiological functioning of healthy humans, and how system function is altered in disease and the clinical manifestations of these changes. Prerequisite: BIOL 2120. A course in human physiology is recommended.

**BIOL 3350 Conservation Biology (5 Credits)**

Conservation Biology is the study of documenting the earth's biodiversity, its threats, and how it may be protected. It is a multidisciplinary science within ecology with contributions from environmental chemistry, geography, sociology, and political science, among other fields. In this class students learn the language of conservation biology, the methods used by conservation biologists, and the nuances of current issues. In class, material is learned through both lecture and interactive exercises in the classroom portion, with hands-on practice in techniques and applications during the lab. Lab fee associated with this course. Prerequisite: BIOL 2010.

**BIOL 3410 Animal Behavior (4 Credits)**

This class examines animal behavior from an evolutionary and ecological perspective. The course provides the background needed to understand behavioral evolution, including a focus on the inheritance of behavior, natural selection, sexual selection, and kin selection. This class studies the evolution of a variety of behaviors, including communication and displays, mate choice, parental care, cooperation, mating systems, social behavior, habitat selection, foraging, and anti-predator behavior. The emphasis is on theoretical principles, design of experiments, and interpretation of data. Prerequisites: BIOL 1010, BIOL 1011, and BIOL 2010. Recommended Prerequisite: BIOL 2090.

**BIOL 3560 Molecular Biology Laboratory (4 Credits)**

Laboratory based course that covers techniques in gene excision, cloning and reinsertion and gene sequencing. Lab fee associated with this course. Prerequisite: BIOL 2510, or permission of instructor.

**BIOL 3570 Proteins in Biological Systems (4 Credits)**

Proteins considered in their biological setting; protein synthesis and degradation; survey of protein functions in vivo; introduction to protein biotechnology. Prerequisites: BIOL 2120.

**BIOL 3610 Developmental Biology (4 Credits)**

Processes and mechanisms of development, exemplified by higher animal embryogenesis, with consideration of microbial model systems. Prerequisite: BIOL 2120 and 2510.

**BIOL 3615 Blood Vessel Development and Disease (4 Credits)**

This course details the underlying biological programs during blood vessel development and mechanisms that lead to vascular pathologies. The class will incorporate aspects embryology, signaling transduction, and genetics as well as current techniques in developmental biology to comprehensively cover how blood vessels are formed embryonically. Additionally, we will discuss in detail how defects in blood vessel-related signaling programs later manifest into disease. Prerequisite for this course is Cell Structure and Function (BIOL2120/2121).

**BIOL 3630 Cell Biology of Development (4 Credits)**

Every organism has a stereotypical shape, but how does this shape arise? This course examines the cellular and molecular mechanisms that direct the forming of body and tissue shape. Prerequisite: BIOL 2120.

**BIOL 3640 Introductory Neurobiology (4 Credits)**

Organization and function of vertebrate central nervous system; nature of action potential, biochemistry of neurotransmitters, neuropeptides, functional anatomy of nervous system, phylogeny of nervous system. Prerequisite: BIOL 2120.

**BIOL 3641 Systems Neuroscience (4 Credits)**

Structure and function of the brain and spinal cord, emphasis on functional systems including sensory perception, motor control and consciousness. Prerequisite: BIOL 3640 or 3241.

**BIOL 3642 Neuropsychopharmacology (4 Credits)**

How psychoactive drugs exert their effects on the nervous system; drugs of abuse and drugs used in the treatment of psychotic and neurodegenerative disorders. Prerequisite: BIOL 2120. Recommended prerequisites: BIOL 3640.

**BIOL 3644 Neuromuscular Pathophysiology (4 Credits)**

Cellular and molecular basis for normal nerve and muscle functions and the alteration of these functions by toxins, trauma and diseases of the brain, nerves and muscles; how specific insults produce clinical symptoms and pathology. Prerequisite: BIOL 2120.

**BIOL 3646 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is the capstone course for the neuroscience portion of the cognitive neuroscience program. Seminar topics include but are not limited to neurological disorders, model systems in neuroscience and sensory systems.

**BIOL 3647 Neuroscience of Movement (4 Credits)**

Producing the vast array of movements that humans (and many animals) use everyday represents one of the body's greatest challenges and greatest successes. These various movements require that the nervous, muscular, and skeletal systems work in concert to achieve a common goal. This course will explore the scientific basis of movement production, with particular emphasis on the neuroscience of motor control. We will explore how the nervous system drives the development of movement strategies at an early age, modifies movement strategies to adapt to changing demands throughout life, and how injury, dysfunction, and/or aging can lead to movement challenges. Required prerequisite: Cell Structure & Function (BIOL 2120); Recommended prerequisite (1 or more of the following): Human Anatomy (BIOL 2450), Human Physiology (BIOL 3250), Introduction to Neuroscience (BIOL 3640) or permission of instructor.

**BIOL 3648 Molecular Mechanisms of Neurological Disease (4 Credits)**

This course will be an in-depth study into some of the key molecular mechanisms involved in the pathogenesis of human neurological disease. A particular emphasis will be placed on the role of RNA regulation and metabolism. The primary focus will be on five devastating diseases: 1.

**BIOL 3649 Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics (4 Credits)**

Neurodegeneration and Neurotrauma: Mechanisms and Therapeutics covers the following disorders: Alzheimer's disease, Parkinson's disease, amyotrophic lateral sclerosis, Huntington's disease, spinocerebellar ataxia, Creutzfeldt-Jakob disease, multiple sclerosis, traumatic brain injury and spinal cord injury. Course literature includes primary journal articles and review papers describing the etiology and pathophysiological mechanisms of these disorders. Potential therapeutic approaches to treatment are also investigated. The course format typically includes a lecture reviewing the basic biology, symptoms, and current treatments for each disorder, followed by a thorough analysis of primary research papers focused on novel molecular mechanisms and new targets for therapeutic development. Grading is based on 3 exams throughout the academic quarter and participation in discussing journal articles in class. Prerequisite: BIOL 2120 Cell Structure and Function. Recommended: BIOL 3640 Introductory Neurobiology. For Graduate Students: an additional term paper is required with the exact topic to be agreed upon by the student and instructor.

**BIOL 3650 Endocrinology (4 Credits)**

Mechanisms of hormone action, evolution of vertebrate endocrine systems, analysis of function integration of hormonal responses in maintenance of homeostasis. Prerequisite: BIOL 2120.

**BIOL 3656 Cellular Aspects of Diabetes and Obesity (4 Credits)**

This course focuses on specific cellular and molecular events key to the understanding of the pathological conditions of diabetes and obesity. Topics include the endocrine pancreas, adipose tissue and neuroendocrine control energy expenditure and feeding behavior. Prerequisite: BIOL 2120.

**BIOL 3670 Molecular Immunology (4 Credits)**

The ability to distinguish self from non-self is crucial to all organisms. In humans Organs, cells and other higher animals, this task fall to the immune system. Suppression of this system is key to numerous pathogenic viruses including Ebola and human immunodeficiency virus. The failure to adequately regulate immune response underlies allergic reactions, arthritis and diabetes. This course will introduce students to the organs, cells and molecules that underlie mammalian immune response; immunogenetics and the fundamental mechanisms of cell mediated and humoral immune response; and the relationship of immune system to human disease. Prerequisite: BIOL 2510.

**BIOL 3675 Virology (4 Credits)**

Viruses are the ultimate cell biologists. They usurp essential cellular components to create new virus progeny leading to pathological cellular physiology. This course will delve into the genetic and cellular principles that govern virus entry, replication, and assembly and cover a broad range of DNA and RNA-based virus families. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3690 Cellular Microbiology (4 Credits)**

The field of cellular microbiology broadly defines the interface between commensal or pathogenic microbes, prokaryotes or lower eukaryotes, and their host. The burgeoning field of cellular microbiology has seen an explosion of new knowledge related to the feedback regulation between commensal microbes and their hosts. Furthermore, our knowledge of virulence factors that promote host and pathogenic microbe niches has continued to expand. This topics course will build a medically relevant and coherent picture of the host-microbe interface on genetic, molecular, cellular, and organismal scales by surveying relevant literature that has uncovered interspecies communication and control pathways. Prerequisites: BIOL 2120 and BIOL 2510.

**BIOL 3700 Topics in Ecology (1-4 Credits)**

Topics vary; may include plant, animal, biochemical, alpine or aquatic; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: one quarter of undergraduate ecology and/or instructor's permission.

**BIOL 3701 Topics in Genetics (1-4 Credits)**

Topics vary; may include genetic methods, molecular genetics, human genetics, chromosomes or population genetics; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: BIOL 2510 and/or instructor's permission.

**BIOL 3702 Advanced Topics in Regulatory Biology (1-4 Credits)**

Topics vary; may include endocrinology, physiology or immunology; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: varies with topic and instructor; instructor's permission usually required.

**BIOL 3703 Advanced Topics in Developmental Biology (1-4 Credits)**

Topics vary; may include gene expression in development, developmental immunogenetics, developmental biochemistry or aging; one topic per quarter. May be repeated for credit. Taught from original literature. Prerequisite: instructor's permission.

**BIOL 3704 Advanced Topics in Cell Biology (1-4 Credits)**

Topics vary; may include supramolecular structure, microscopy, membranes and techniques. May be repeated for credit. Taught from original literature. Prerequisites: BIOL 2120.

**BIOL 3705 Advanced Topics in Molecular Biology (1-4 Credits)**

Topics vary, but may include biochemistry, supramolecular structure and function, molecular genetics, membrane biology. May be taken more than once for credit. Taught from original literature. Prerequisite: varies with course and instructor; instructor's permission usually required.

**BIOL 3706 Topics in Evolution (1-4 Credits)**

Topics vary, but may include molecular evolution, plant evolution and animal evolution. Prerequisite: BIOL 2120 and BIOL 2510.

**BIOL 3707 Advanced Topics in Conservation Biology (1-4 Credits)****BIOL 3708 Topics in Integrative Physiology (2-4 Credits)**

Topics for this course include, but are not limited to, human physiology and disease, integrative physiology, environmental or social impacts on human physiology and health, and comparative physiology. Students will gain knowledge of a specific topic in physiology and/or pathophysiology through discussion of current literature and research. May be repeated for credit. Prerequisite: BIOL 2120.

**BIOL 3800 Human Molecular Biology (4 Credits)**

Medical Genetics is the 24th member of the American Board of Medical Specialties. This course will introduce students to the fundamentals of molecular biology with an emphasis on understanding of how the field is applied in the context of medical diagnostics, personalized/precision medicine and other commercial applications. Students will be introduced to published research reports and provided with opportunities to critically examine the application of molecular biology to central questions in such areas as oncology, inherited diseases and genetically engineered organisms. Prerequisite: BIOL 2510.

**BIOL 3850 Genetic Engineering (4 Credits)**

This course will cover principles in gene manipulation and its application in research, medicine and industry. More specifically, this course will explain emerging technologies in genetic engineering and its practical and ethical implications. Topics will incorporate historical and emerging aspects of developmental biology, chemistry, and genetics as well as current techniques in genetic manipulation that are related to genomic editing. Additionally, students will be trained to interface with genomic databases and employ DNA sequence editing software to manipulate DNA sequences to achieve novel cloned products. Prerequisite: BIOL 2510.

**BIOL 3910 Viruses & Infectious Human Diseases (4 Credits)**

From sexually transmitted viruses to bacterial pneumonia, infectious pathogens are the number one threat to human health. This course will introduce students to prions, viruses and bacterial pathogens with an emphasis on those commonly encountered in clinical medical practice. Through the use of technical/scientific research journals students will be encouraged to investigate the etiology, pathogenesis and treatment of human infectious disease with an emphasis on the clinical, molecular diagnostic and therapeutic aspects of the disease. Prerequisite: BIOL 2510. Recommended prerequisite: BIOL 3800.

**BIOL 3920 Forensic Pathology (2-4 Credits)**

In its broadest definition, forensic science represents a fusion of the natural sciences, criminology and jurisprudence. The field of forensic pathology in particular focuses on the investigation of sudden, unnatural, unexplained or violent deaths. Using the most authoritative books available and a multimedia lecture format, students in this course gain an introductory understanding of the pathophysiology of wounding and death as well as the clinical antemortem symptomology of physical abuse, neglect and extrajudicial wounding. Students also learn about the processes responsible for the decomposition of corpses as well as the use of molecular and geometric tools for the reconstruction of crime scenes from bloodstain evidence. Finally, students learn how to integrate a variety of forensic tools in investigations of sexual assault, serial killers, traffic fatalities and mass deaths. Prerequisite: BIOL 2120 or permission of instructor.

**BIOL 3988 Study Abroad Resident Credit (0-18 Credits)****BIOL 3991 Independent Study (1-10 Credits)**

Topic in biology studied under faculty supervision. Student's responsibility to identify faculty supervisor before registering for class. Maximum of 5 quarter hours of BIOL 3991 and/or BIOL 3995 may be applied toward the 45-quarter-hour requirement for a major in biological sciences.

**BIOL 3995 Independent Research (1-10 Credits)**

## Black Studies (BLST)

**BLST 2150 Introduction to Black Studies (4 Credits)**

Black Studies began in 1968 as a discipline dedicated to understanding and improving the lived experience of Africans and African Americans. It started with the intention of providing a safe space for Black students to exercise their intellectual creativity, while engaging in accurate portrayals of the Black experience. Introduction to Black Studies is designed for all students as a cornerstone for the Black Studies minor. This course introduces students to the breadth and depth of Black Studies as a discipline, using primary and secondary sources. Introduction to Black Studies uses historical, interdisciplinary, intersectional, and transnational grounding in the study of Black people. Focused primarily on the U.S., this course examines current theories, methods, and goals in Black Studies while allowing students to delve into some of Black Studies' most current and exciting scholarship. In this course, students will think about what freedom and democracy have meant to African American people in the United States, and the ways that they have creatively expressed these meanings over time. This interdisciplinary introduction to Black Studies combines the teaching of foundational texts in the field while reinforcing skills in reading and writing learned throughout the quarter. The course will also meet the requirements for AI-Society. This course will also be cross listed with departmental courses from the multiple programs with courses that align with the Black Studies minor (i.e. ENGL 2xxx, HIST 2xxx, and RLGS 2xxx).

## Business Core (BUS)

### **BUS 1099 Daniels Professional Development Program Part I (0 Credits)**

Some experiences are essential to a student's development, but don't fit well within the confines of a traditional course. This is a face-to-face zero-credit course intended to provide students with a framework to master professional development through experiential-based learning opportunities that will give them the necessary tools to identify a career path prior to graduation and succeed in their career development. Key topics include resume and cover letter development, understanding the business majors and associated career paths, and professional skill development such as appropriate business dress, communication, and etiquette.

### **BUS 1440 The Fourth Industrial Revolution (4 Credits)**

This course provides a practical glimpse into the future of the global and competitive nature of business. From product ideation to product deployment, this course introduces students to business's role in society in promoting sustainability as the only successful business model for delivering value to customers and stakeholders of all kinds. Key business activities such as marketing, finance and accounting, working in teams, and product/service innovation and creativity are introduced. Key 4th industrial revolution technologies such as artificial intelligence (AI), the Internet of Things (IoT), distributed ledger technology and cryptocurrency, augmented/mixed/virtual reality, additive manufacturing, and autonomous, robotics, and drones are also introduced.

### **BUS 2099 Daniels Professional Development Program Part II (0 Credits)**

This course is the second part of the Daniels Professional Development Program (DPDP). Similar to DPDP I, this course will expose students experiential-based learning opportunities that will provide the necessary tools and skills to successfully land an internship and full-time position prior to graduation. This will include attending a career fair, completing a mock interview and receiving real-time feedback, creating a professional LinkedIn profile, and attendance to career services workshops focused on professional development. Prerequisite: BUS 1099. Restriction: Must be pursuing BSBA or BSAcc degree.

### **BUS 3000 Strategic Business Communications (4 Credits)**

Leading CEOs know what multiple studies confirm: competence in communication is an essential skill for entry-level positions in business, and excellence in communication is necessary to become an industry leader. This course is designed to allow extensive time to practice and receive expert coaching. Since communication skills develop over time, you will build proficiency through multiple oral and written assignments that increase in rigor and complexity. The assignments will give you the individual and team skills you will need to be successful in both your academic and professional career. The quarter culminates in a client project addressing real campus or community issues. Prerequisite: BUS 1099 (with Passing - "P" grade). Restriction: Must be pursuing BSBA or BSAcc degree.

### **BUS 3099 Daniels Professional Development Program Part 3 (0 Credits)**

Some skills and certifications are essential to student success in landing an internship and full-time job at graduation but do not fit well within the confines of a traditional course. This zero-credit course will provide students with a platform to master skills to prepare them for a career in the Fourth Industrial Revolution. Relevant skills and certifications will vary based on a student's major and career interests. Common examples include Google Analytics, the Advanced Excel Certification, Python, Salesforce, and Robotic Process Automation.

### **BUS 3350 Overview of Outdoor Recreation Industry (4 Credits)**

This course is a survey of the outdoor recreation industry, providing an overview of the size, growth, sectors and economic impacts of the industry. This course will lay the foundation for the LORI Program, as the remaining courses will dive deeper into the topics. This course will also begin to examine external drivers for the industry, including the connection between policy and outcomes, the inherent tension between access and conservation, as well as economic trends driving the industry. This course will provide an overview of all facets of the outdoor recreation industry, including an examination of the economic impacts by industry sector. In order to better understand the intersection of the recreation economy and quality of life, this course will focus on the five common principals of the outdoor industry as codified in the Confluence of States accords: 1) Conservation & Stewardship; 2) Education & Workforce Training; 3) Economic Development; 4) Health & Wellness; and 5) Opportunity & Experience. As the program develops, students will also have an experiential learning component early in the quarter at the University of Denver Kennedy Mountain Campus focused on developing leadership skills.

### **BUS 3353 Business Models and Operations in Outdoor Rec Industry (4 Credits)**

This course introduces students to the concept of a business model canvas, what goes into the revenue and cost streams, and the necessary factors that need to be controlled to sustain a business. Students will be introduced to emerging models in the outdoor, retail and hospitality sectors, and will learn how to differentiate between business models in the product based vs. services-based industries. They will also get an appreciation of the capital structure needed to sustain a business in the outdoor recreation industry, and the implications of capital intensity for business models. This course also addresses key considerations for operating a business in the outdoor industry - including budgeting and forecasting the business, as well as the legal and business methods by which operators in the outdoor industry manage their enterprise risk. Topics to be addressed in the risk management portion of the course include releases, signage, preventative measures (e.g., avalanche reduction and patrolling), insurance, compliance, and workers' compensation. Students enrolled in this course will learn these concepts through a case study that will run the length of the course, selecting an actual business in the industry and then apply those concepts to a newly created business model.

**BUS 3355 Sustainability and Markets in Outdoor Recreation Industry (4 Credits)**

This course provides an overview of environmental and social sustainability issues through a business lens, and shares insights on sustainability risks, strategy, and markets for enterprises in the outdoor industry. These issues are important for leaders in the outdoor recreation industry because a high percentage of their current and future customers care about sustainable business practices and environmental stewardship. We will review sustainability issues, emerging trends, regulatory changes, and innovative practices in the outdoor industry to integrate sustainability into enterprise risk management, operations, and strategy. Students will gain an overview of the main issues and challenges in sustainability, explore priorities and strategies being used in the outdoor industry, and learn frameworks and tools to help lead organizational change. We will review sustainability trends, material ESG risks, approaches to carbon and natural resource management, and how good data and information can improve sustainability management, collaboration, and communication. Organizations are increasingly focused on creating sustainable and inclusive growth that builds competitive advantage by providing value to customers, adapting to climate-related risks, and addressing community and social challenges in a sustainable way.

**BUS 3380 Legal Framework of Outdoor Recreation Industry (4 Credits)**

This course explores the complex legal and regulatory landscape that governs the outdoor recreation industry. Students will examine various laws, regulations, and legal principles that affect outdoor recreation activities, including land use, public policy, environmental impacts and various regulatory regimes. Planning, developing and operating outdoor recreation facilities requires an understanding of how to obtain multiple private, federal state and local authorizations. Students will become familiar with these regulatory regimes beginning with land use authorizations from inception through operations and expansions. The course will also analyze public policy at the federal, state and local levels of government and how individuals or organizations can impact the outcomes through advocacy.

**BUS 3399 Outdoor Rec Industry Capstone (4 Credits)**

This culmination/capstone course integrates knowledge and skills acquired throughout the academic progression for Leadership in the Outdoor Recreation Industry. For the minor, students will complete work on their business case created in BUS 3353 Business Modeling and Operations in the Outdoor Recreation Industry, a significant project that addresses real-world challenges in the outdoor recreation industry. The course will emphasize critical thinking, business strategy, marketing, sustainability, and community engagement. For the graduate concentration, this culmination/capstone course will provide graduate students with an opportunity to synthesize and apply their knowledge and skills they've learned through coursework and professional experience and apply that to the context of the outdoor recreation industry. Students will engage in a comprehensive strategic management project that addresses complex industry challenges. The capstone/culmination course emphasizes critical analysis, strategic planning, leadership, and legal and regulatory framework preparing students for leadership roles in the industry. Pre-requisite: BUS 3350 and BUS 3353.

**BUS 3441 The IoT Build (2 Credits)**

The Internet of Things (IoT) is moving rapidly toward "The Internet of All Things." From water bottles to clothing to furniture, everything in our everyday world will be connected to the Internet, sharing information about our lives. In this course, you'll get hands-on experience building IoT applications. You'll learn how to gather data from sensors such as weight, occupancy, sound, proximity, pressure, gas, and infrared. By 2030, there will be 500 billion devices connected to the Internet. This class will show you how.

**BUS 3442 Python Programming (4 Credits)**

Python is a general-purpose, high-level programming language suitable to a wide variety of tasks in today's interconnected and technology-based world. Python is also an object-oriented language, a necessity for real-time, dynamic, and web-based applications. In this course, you'll learn how to apply Python to basic programming elements such as data types, arithmetic operations, control structures, methods/functions, arrays, and file handling.

**BUS 3446 Blockchain and Cryptocurrency (2 Credits)**

Bitcoin was created in 2009 and eight years later it reached a record high of \$20,000 per coin. Bitcoin is a virtual currency, or more commonly known as a cryptocurrency, that is managed by a decentralized network of users instead of a government or central bank. Anonymity, low transaction fees, built-in scarcity, and borderless transactions are some of the benefits that Bitcoin provides. This course will provide a high-level overview of blockchain and cryptocurrency, starting from the beginning with the basic fundamentals of blockchain technology. You will gain a comprehensive understanding of blockchain, what it is, and how it is used in cryptocurrency and the opportunities available with decentralized applications. We will explore the concept of money as a medium of exchange for goods and services and how cryptocurrencies such as Bitcoin aim to replace traditional Fiat currencies.

**BUS 3450 Blockchain, Cryptocurrency & FinTech: What You Need To Know (4 Credits)**

Bitcoin made blockchain technology famous, it highlighted a transformative technology that facilitates the transfer of value between two entities without a trusted 3rd party. Blockchain technology has the potential to disrupt industries, financial systems and social norms. This course will study the fundamentals of Blockchain, cryptocurrency and financial technology (FinTech). We will begin with a high-level overview on the origin and concept of money and how it is valued. It will progress through an in-depth dive into the business of Blockchain, Bitcoin, Smart-Contracts and Financial Technology. This course will expose students to the opportunities, risks and challenges an immutable, decentralized system based on consensus presents. We will explore the consequence and application of blockchain technology in decentralized applications, DAOs, non-fungible tokens (NFTs), and the Metaverse. No prior knowledge of Blockchain, Cryptocurrency, and FinTech is required to take this course.

**BUS 3700 Topics in Business (0-10 Credits)****BUS 3800 Business for the Public Good (4 Credits)**

The vision of Business for the Public Good is to provide an impactful culminating experience in the Daniels Core in which students think critically and creatively to address a societal issue through the lens of business. In this course, students will identify a real-world problem and use business tools and knowledge to address the issue. Topics include stakeholder management, corporate social responsibility, models of business, globalization, the natural environment, technology, public policy, innovative design thinking, among others. This course is designed to explore the place of business in the context of society. The course will familiarize students with the relationships among the private, public and nonprofit sectors.. The course will challenge students by engaging them in projects focused on pioneering business to achieve public good and public benefit. Enforced Prerequisite: Business Core 3099 (P). Enforced Prerequisite or Co-Requisite: MGMT 3000.

**BUS 3980 Internship (0-4 Credits)**

Initial for-credit internship experience for students pursuing a business major, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

## Business Ethics and Legal Studies (LGST)

**LGST 2000 Foundations of Business Law (4 Credits)**

Managerial perspective on the role of law and its relationship to business environment; emphasis on American legal system (history of law, courts and civil procedure), private law (business torts, contracts, corporate responsibilities and business ethics), and governmental intervention (constitutional law, employment law, white collar criminal law and corporate/securities law). Prerequisites: Grade of C- in BUS 1440 and sophomore standing.

**LGST 2570 Contracts for Business (4 Credits)**

This course includes a comprehensive discussion of major contractual topics—including drafting and negotiation - and how they relate to legal and ethical elements of business. Prerequisites: LGST 2000.

**LGST 2910 Daniels Ethics Fellows I: Community Impact (2 Credits)**

This course comprises the first half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact their community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent community leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and community leaders, and (5) engage in a series of online quizzes designed to evaluate ethical reasoning and growth.

**LGST 2920 Daniels Ethics Fellows II: Business Impact (2 Credits)**

This course comprises the final half of the Daniels Ethics Fellows curriculum. Over ten weeks, both inside and outside of the classroom, students engage in a rigorous introduction to principle-based ethical reasoning and decision-making. The course culminates in a student-crafted ethics project that must successfully incorporate each of the eight Daniels Fund Ethics Initiative principles and positively impact the business community. Along the way, students must: (1) engage in spirited classroom discussions revolving around legal cases with important ethical repercussions, (2) interact with prominent business leaders invited to present on contemporary ethical challenges, (3) collaborate to structure their ethics project on a budget (provided with Daniels Fund Ethics Initiative funds) and within class guidelines, (4) justify and defend their project progress on three occasions to an Impact Council made up of professors and business leaders, and (5) engage in a serious writing assignment designed to evaluate ethical reasoning and growth. Prerequisite: LGST 2910.

**LGST 2960 Employment Law & Ethics (4 Credits)**

This course will introduce students to the key laws, rules and regulations governing employment in the United States. The course will explore workplace issues that arise because of the intersection of the hierarchical nature of organizations and the diversity of employees. As such, we will discuss workplace policies, practices and operations and their interactions with employment laws. This is an interactive course that will address issues such as: What is work? How do we value it? Who is an employee? What are the rights of employers? What are the rights of individuals in the workplace? What are some of the ethical issues faced by employers and employees, and how can both groups successfully navigate them? Graduate students will be assigned an independent study project focused on issues(s) faced by the Chief Human Resources Officer of an organization - a leader and strategic business partner in the organization. Prerequisites: LGST 2000 for undergraduate students; no prerequisite for graduate students.

**LGST 3020 Sports Law & Ethics (4 Credits)**

Sports Law and Ethics offers a comprehensive examination of the legal considerations pertaining to amateur (NCAA and Olympic Movement) and professional sports (NFL, NHL, NBA, MLS, EPL) in North America and Europe. The course delves into the laws and regulations that impact athletes and the leagues they play. The curriculum includes in-depth topic overviews, interactive class discussions, and guest lectures on contemporary issues and sports law jurisprudence.

**LGST 3030 The Supreme Court & Your Life (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3100 Business Ethics & Social Responsibility (4 Credits)**

The purpose of this course is to introduce students to ethical concepts, theories and issues as they relate to business and managerial decision making. A primary focus includes topics such as employee privacy, sales responsibility, sexual harassment, discrimination, intellectual property, whistle blowing, and career/family conflicts. The course is also designed to introduce students to more general approaches or ways of thinking about ethics, and students grapple with some of the basic and fundamental problems of ethics. Cross listed with MGMT 3100. Prerequisites: LGST 2000.

**LGST 3200 Ethics & Your World (2 Credits)**

This course evaluates the how ethical decision-making can benefit a person professionally, personally, and as part of a community operating under a social contract more generally. This holistic approach evaluates ethics from many different viewpoints such as: (1) a professional calling, (2) happiness versus joyfulness, (3) moral sacrifices, (4) money and ethics, (5) beauty and ethics, (6) popularity and esteem and ethics, (7) priorities, (8) daily motivation, (9) ethical decision-making frameworks, and (10) a consistent and moral worldview. The ethical decision-making frameworks include Utilitarianism, Deontology, Virtue Ethics, Ethical Egoism, Libertarianism, and the Real Rabbits approach.

**LGST 3330 Advanced Constitutional Law (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution applies to each case and how the case makes its way to the Court, (2) each case is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion resonate in the business world. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3400 White Collar & Corporate Crime (4 Credits)**

This course offers an essential overview of corporate and "white collar" crime. Through the use of real-world case studies, legal and ethical analysis, criminological research and cultural reference materials such as iconic films and books, this course offers insight into the types, causes, and effects of crimes committed by businesses, corporate officers and directors, professionals and public officials. It will foster critical analysis of contemporary efforts to address recurring problems of corruption, bribery, fraud, insider trading, money laundering, collusion and more through the enactment of criminal statutes, international treaties, regulatory disclosure requirements, investigative methods, and litigation. Prerequisite: Undergraduates registering for this cross-listed course must complete LGST 2000. Graduate students are strongly advised to have successfully completed a course in business law.

**LGST 3440 The Supreme Court & Your Life: Constitutional Law, Ethics & Policy for the 21st Century (2 Credits)**

This course evaluates the most critical ways in which the United States Supreme Court interacts with and affects an individual's life, career, education, freedom, and future. Over ten weeks, we analyze how: (1) each major section of the Constitution and how it makes its way to the Court, (2) is ultimately interpreted by each of the nine current Justices, and (3) the subsequent repercussions of the opinion. The primary vehicles used for this task are actual Supreme Court cases, federal circuit court opinions, and legal briefs filed by the parties and interest groups on both sides of each dispute. Each of these documents is part of the public record and easy to locate. Because many students are likely to hear, believe, and/or resonate with only one side of each politically-charged divisive case heard by the Court (perhaps because they listen to only one news source or affiliate primarily with people of the same ideological bent), this class will emphasize the importance of seeing both sides of important public policy, legal, and ethical issues before taking a position. This is a valuable skill that is often neglected in college courses but will take a student far in life.

**LGST 3450 Impact of Driverless Mobility: Business, Legal & Ethical Implications (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3510 CEOs and Corporate Governance (4 Credits)**

The course examines the current and pressing issue of corporate governance, in its ethical, legal, and social dimensions. Students read the latest views of scholars and experts and gain the perspectives of corporate CEOs and other organization leaders. Topics explored include the history of various governance models, public policy on corporate governance, corporate board functions and responsibilities, the dynamics between CEOs and boards, ethical leadership and corporate culture, ethics and compliance programs, executive liability, nonprofit corporate governance, board and audit committee responsibilities, restructuring and governance, executive compensation problems and solutions, shareholder activism, and corporate governance reforms. Each student will complete four papers or projects during the quarter, which will focus on a single corporate case study. The course projects will be designed to address and research the major dimensions of the course. Guest speakers will include corporate CEOs, board members, corporate general counsel, regulators, and investors.

**LGST 3540 Impact of Driverless Mobility (4 Credits)**

Smartphones and personal computers have changed the world and how we live in it. Now, Driverless Vehicles are poised to profoundly reshape our transportation systems, real estate development, access to goods and services, and our collective ecological footprint. In our "Impact of Driverless Mobility" course, we will consider many of the broad implications of this disruptive technology, including, but not limited to, the many legal, ethical and business considerations. Prerequisite: LGST 2000.

**LGST 3550 Topics in Business Law II (4 Credits)**

Law relating to general and limited partnerships, corporations, property, securities law, professional responsibilities and related studies. Accounting students only. Prerequisites: LGST 2000.

**LGST 3600 Business and Global Values (4 Credits)**

This course explores the current state of globalization and its impact on business. In the context of ethical and legal norms, the course will examine how formal governmental and intergovernmental organizations (IGOs), as well as non-governmental organizations (NGOs), pressure business and affect business strategy and decisions. The course will also examine how business can adapt to comparative values and cultures in the international system, as well as universal values, and analyze issues and cases from both idealist and realist perspectives. Students will apply analytical tools from ethics, law, and public policy in examining leading business cases on the following topics: global terrorism and political risk. Prerequisite: LGST 2000.

**LGST 3700 International Business Law (4 Credits)**

Introduction to public international law (rights and duties of states and intergovernmental organizations) and to private international law (rights and duties of individuals, businesses and nongovernmental organizations) in international affairs. Key issues include alternative dispute resolution (ADR), privatization, intellectual property, international sales, the Foreign Corrupt Practices Act, trade (GATT and WTO), and the international facilities that deal with the adjudication and resolution of business and legal issues. Prerequisites: LGST 2000.

**LGST 3701 Topics in Legal Studies (1-4 Credits)**

Exploration of various topics and issues related to business ethics and legal studies. Prerequisites: LGST 2000.

**LGST 3720 Negotiation & Conflict Resolution in Business (4 Credits)**

This course is a rigorous exploration of negotiating business deals. Students will learn to develop strategies in a variety of conflict situations. Students will work closely with the professor and each other in simulations to address negotiation challenges, engage in mediation and arbitration, and become effective masters at resolving conflict. Prerequisites: minimum grade C- in LGST 2000.

**LGST 3740 Daniels Fund Ethics Consortium Case Competition Seminar (2 Credits)**

The Daniels Fund Ethics Consortium Case Competition — a component of the Daniels Fund Ethics Initiative Collegiate Program — exposes students to a thought-provoking business ethics case on principle based crisis management in business. The competition builds on the principle-based ethical framework central to decision making in a complex business environment. Students in this class will learn how to work in teams in order to collaboratively analyze, present, and respond to various scenarios of businesses in crisis as well as respond to questions posed by a panel of judges. The course challenges students' ethical reasoning and provides a significant opportunity to increase awareness of the importance of principle-based ethics for business crisis management.

**LGST 3980 Internship (1-5 Credits)****LGST 3991 Independent Study (1-8 Credits)**

Independent research/study; requires written report. Prerequisites: LGST 2000 and instructor's permission.

## Business Information and Analytics (INFO)

**INFO 1010 Analytics I: Data Management and Analysis (4 Credits)**

The amount of data businesses are able to maintain and process is growing exponentially, and the ability to manage that data successfully can give a business a tremendous competitive advantage. This course introduces the student to the business data landscape, as well as basic data management and analysis skills through spreadsheet and database applications. Student projects focus on data collection, data cleansing and mining, statistical and graphical analysis, basic modeling, and written presentation skills. Corequisite with INFO 1011.

**INFO 1011 Microsoft Excel Certification Lab (0 Credits)**

This course covers basic topics in Excel and is designed to prepare students for the Microsoft Office Specialist Excel exam (associate level) and to introduce students to the basic Excel features and functions that will be used in future classes and professional settings. In the Daniels College of Business, passing the Microsoft Office Excel Specialist Exam is a pre-requisite for other classes, is a requirement for secondary admission, and is a graduation requirement. The course uses projects to represent real-world scenarios. No prerequisites or restrictions.

**INFO 1020 Analytics II: Business Statistics and Analysis (4 Credits)**

Businesses can never have perfect information; therefore, they must employ statistical techniques to improve the decision-making process. This course introduces students to the basic tenets of probability and statistics, with an emphasis on business applications. Statistical models as decision-support tools are taught. Student projects focus on data collection, data analysis, decision analysis, and written presentation skills. Prerequisites: INFO 1010, and (MATH 1200 or MATH 1951). Corequisite: INFO 1021.

**INFO 1021 Microsoft PowerPoint and Word Certification Lab (0 Credits)**

This course covers basic topics in Word and PowerPoint and is designed to prepare students for the Microsoft Office Specialist Word and PowerPoint exams (associate level) and to introduce students to the basic Word and PowerPoint features that will be used in future classes and professional settings. In the Daniels College of Business, passing the Microsoft Office Word Specialist Exam and Microsoft Office PowerPoint Specialist Exam is a pre-requisite for other classes, is a requirement for secondary admission, and is a graduation requirement. The course uses projects to represent real-world scenarios. Corequisite: INFO 1020. No prerequisites or restrictions.

**INFO 1031 Advanced Excel Certification Lab (0 Credits)**

The course covers advanced topics in Excel. The course goes beyond just the topics on the Excel Expert Certification exam and looks at functions and features that students are likely to use in work situation. The course uses projects to represent real-world scenarios. A score of 850 or higher on the Microsoft Office Specialist Excel exam (associate level) is highly recommended (but not required) to be sufficiently prepared for this course, and to be able to progress through course material in preparation of the Microsoft Office Excel Expert exam.

**INFO 2020 Analytics III: Business Modeling and Analysis (4 Credits)**

Businesses make decisions and improve processes using a variety of modeling and analytic techniques. This course introduces the student to the techniques of multiple regression analysis, time series analysis, spreadsheet modeling, and simulation for solving a variety of business problems. Applications include economic forecasting, supply chain management, and project management. Student projects focus on using spreadsheet modeling for problem solving, and emphasize written and oral presentation techniques. Prerequisites: INFO 1020 and Microsoft Excel Certification.

**INFO 3100 Automating Business Processes (4 Credits)**

This course focuses on using Microsoft Excel and Python to support decision making for managers. This course will cover advanced Excel functions and menu options along with basic spreadsheet modeling design and good practices. It will also cover automating tasks in Excel using VBA. We will then transition into using Python to create programs outside of the Microsoft Office environment. In both platforms the focus is on basic programming logic, reading and writing data, creating data summaries and pivot tables and basic statistical tests and summaries. Prerequisite: INFO 2020.

**INFO 3110 Applied Nonparametric Statistics (4 Credits)**

This course develops a more advanced understanding of the fundamental concepts of probability and statistics, and how they relate to managerial type problems and decision making. You will develop experience performing and interpreting standard and particularly nonparametric data analysis methodologies, such as the sign test, the signed rank test, the rank sum test, and nonparametric correlations. You will obtain familiarity with a statistical software package. Prerequisite: INFO 2020 (minimum grade of C-).

**INFO 3140 Foundations of Information Management (4 Credits)**

This course introduces students to the foundations of information management (e.g. database management). Specifically, this course will focus on database theory, appropriate database design, modeling tools, and the practical issues of database implementation and management. Designing and developing databases is an iterative process, and the class approach will be practical and hands-on. Prerequisite: INFO 2020.

**INFO 3200 Data Mining and Visualization (4 Credits)**

This course explores the concepts of storytelling with data, prediction modeling, and presenting statistical results. It covers the concepts of visualization terminology along with all the steps of the modeling process: define goal, get data, explore & visualize data, pre-process data, partition the data series, apply modeling technique(s), evaluation and compare performance, implement the model, and communicate the results. The modeling techniques covered include Time Series Forecasting, Clustering, Principal Components Analysis, Decision Trees, Naïve Bayes, K-Nearest Neighbor, Multiple and Logistic Regression, and Machine Learning Approaches. This course also covers the interpretation of real-time business data in terms of dashboards and scorecards. Prerequisite: INFO 2020.

**INFO 3240 Enterprise Information Management (4 Credits)**

This is the second in a series of two courses designed to introduce students to information management. This course focuses on procedural programming using T-SQL, an introduction to an enterprise information management system using Microsoft SQL Server and an introduction to an integrated development environment using Microsoft Visual Studio. Prerequisite: INFO 3100 and INFO 3140.

**INFO 3300 Data Warehousing and Business Intelligence (4 Credits)**

This course introduces students to the main components of a data warehouse for business intelligence applications. Students will learn how a data warehouse fits into the overall strategy of a complex enterprise, how to develop data models useful for business intelligence, and how to combine data from disparate sources into a single database that comprises the core of a data warehouse. Students will also explore how to define and specify useful management reports from warehouse data. Prerequisite: INFO 3240.

**INFO 3320 Sports Analytics (4 Credits)**

This course serves as an introduction to sports analytics. Analytical topics will include, but are not limited to, regression (or predictive) modeling, optimization, ranking methodologies, web scraping, among others. Sports topics will include topics from most professional sports, gambling (daily fantasy sports), and business operations. In addition, the students will learn how to communicate their results (business reports, dashboards, etc.) of the various modeling exercises and projects using RStudio and the RMarkdown suite of tools.

**INFO 3340 Project Management and Simulation (4 Credits)**

"Cheaper, better, faster" is the mantra of modern business. Innovation, providing new products and services or using improved business processes, has become a prerequisite for businesses to thrive and flourish. Project Management is a discipline which supports innovation by examining how to facilitate one-time events such as constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline. Monte Carlo simulation modeling is also covered to explore the benefits and limitations of simulation as a tool for solving business problems, and to present students with the opportunity to build, analyze, and report on Monte Carlo simulations. Prerequisite: INFO 2020.

**INFO 3350 Statistical Computing (4 Credits)**

This course will provide the student with a base of skills necessary to program in one or more common scripting software packages. No prior programming knowledge is required. After completion of the course, the student will be able to independently perform most basic statistical procedures using either software package. The student will also have the tools necessary to learn advanced topics from the software package documentation by themselves. Prerequisite: INFO 2020.

**INFO 3400 Complex Data Analytics (4 Credits)**

This course explores the concepts of the considerations and management of big data projects. It also explores technical aspects of performing text analytics and natural language processing, social network analysis, and social media analysis. We focus on social data for many of the examples and also explore how disparate data sources can be combined to provide insight for business decisions. Prerequisite: INFO 3200.

**INFO 3440 Optimization Modeling (4 Credits)**

This course introduces concepts and techniques for the modeling and solution of business decision problems. It gives broad coverage to the formulation of optimization models and the use of commercially available software tools for solving them. These models include topics such as linear programming, integer programming, the transportation and assignment problems, network optimization models and non-linear programming. Emphasis is placed on the process of analyzing business scenarios, formulating models in spreadsheet and open-source software, interpreting model output, and presenting written project reports. Prerequisite: INFO 2020.

**INFO 3477 Database-Driven Websites (4 Credits)**

This course provides a comprehensive overview of website development. Students explore the prevailing vocabulary, tools, and standards used in the field and learn how the various facets including HTML5, CSS, JavaScript, VBScript, ASP, PHP, HTTP, clients, servers, and databases function together in today's web environment. In addition, software and services that are easily incorporated into a website (e.g. maps, checkout, blogs, content management) are surveyed and discussed. Students produce an interactive website on the topic of their choice for the final project and leave the course prepared to develop real world database driven websites. Prerequisite: INFO 3140.

**INFO 3500 Capstone/Senior Project (4 Credits)**

This course gives the student an opportunity to apply the knowledge and skills learned in this program to a real-world problem submitted by a partner business. Students take a business problem from problem definition, data collection, and model construction, through analysis and presentation of results to recommendations for specific business decisions. Prerequisites: All other Business Analytics major courses.

**INFO 3700 Topics in Business Analytics (1-4 Credits)**

Exploration of various topics and issues related to timely analytics applications. Prerequisite: INFO 2020.

**INFO 3980 Internship (0-10 Credits)**

Internship; requires written report.

**INFO 3991 Independent Study (0-4 Credits)**

Independent research/study; requires written report.

## Chemistry (CHEM)

**CHEM 1001 Science of Contemporary Issues I (4 Credits)**

CHEM 1001 is the first class in a three-quarter sequence focused on real-world applications of chemistry. The first quarter focuses on sustainability, pollution, and climate change. To understand these topics, we will explore the behavior of gases, properties of solutions, chemical reactions in the atmosphere, and acid-base chemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 1002 Science of Contemporary Issues II (4 Credits)**

CHEM 1002 is the second class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on fossil fuels, renewable resources, nuclear energy, batteries, and fuel cells. To understand these topics, we will examine combustion reactions, radioactive elements, nuclear waste, and electrochemistry. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1001.

**CHEM 1003 Science of Contemporary Issues III (4 Credits)**

CHEM 1003 is the final class in a three-quarter sequence focused on real-world applications of chemistry. This course focuses on plastics, nutrition, drugs, and genetic engineering. To understand these topics, we will learn about polymerization, macromolecules, and the chemistry behind foods such as fats, proteins, and carbohydrates. This course cannot be taken for credit for a chemistry major or minor. A lab fee is associated with this course. The course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 1002.

**CHEM 1010 General Chemistry I (3 Credits)**

The first course in the introductory chemistry sequence for natural science and engineering majors. Topics covered include atomic and molecular structure, reactions in solution, and thermochemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1240.

**CHEM 1020 General Chemistry II (3 Credits)**

The second course in the introductory chemistry sequence for science and engineering majors. Topics covered include thermodynamics, equilibria including acids and bases, and kinetics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1250.

**CHEM 1240 General Chemistry I Laboratory (1 Credit)**

Laboratory to accompany CHEM 1010. Experiments illustrate aspects of atomic structure, chemical bonding and thermochemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 1010.

**CHEM 1250 General Chemistry II Laboratory (1 Credit)**

Laboratory to accompany CHEM 1020. Experiments illustrate chemical principles applied to equilibrium of acids/bases, kinetics, and thermodynamics. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Pre-requisites: CHEM 1010 and CHEM 1240; Co-requisite: CHEM 1020.

**CHEM 2131 Chemistry of the Elements (3 Credits)**

Descriptive chemistry of main group and transition elements including redox and coordination chemistry. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 1020 and CHEM 1250. Corequisite: CHEM 2141.

**CHEM 2141 Chemistry of the Elements Lab (1 Credit)**

Laboratory to accompany CHEM 2131. Study of reactions of main group and transition elements including redox and coordination chemistry. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

**CHEM 2240 Introduction to Environmental Chemistry (4 Credits)**

An introduction to the chemistry of the environment. Topics cover the chemistry of air, water, and soil with a special focus on the influence that humankind has on the natural environment. Course provides tools to understand environmental science from a chemical perspective. The course is a combined lecture and laboratory. Primarily for environmental science majors. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 1010, CHEM 1020, CHEM 1040, and CHEM 1250.

**CHEM 2270 Quantitative Chemical Analysis (4 Credits)**

This combined lecture-laboratory course is primarily focused on understanding and applying the principles and techniques associated with making quantitative chemical measurements. Topics covered include statistics, applications of acid-base, complexation, precipitation, and redox titrations in chemical measurements, activity, electroanalytical techniques, and gravimetric analysis. Lab Fee associated with this course. Prerequisites: CHEM 2131 and CHEM 2141 or CHEM 2240.

**CHEM 2451 Organic Chemistry I (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: CHEM 2131 and CHEM 2141.

**CHEM 2452 Organic Chemistry II (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: CHEM 2451 and CHEM 2461.

**CHEM 2453 Organic Chemistry III (3 Credits)**

Structure and reactions of covalent compounds of carbon. Satisfies organic chemistry requirement in chemistry, biology and related fields. Prerequisite: CHEM 2451, CHEM 2452, CHEM 2461, and CHEM 2462.

**CHEM 2461 Organic Chemistry Lab I (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 2451.

**CHEM 2462 Organic Chemistry Lab II (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Co-requisite: CHEM 2452.

**CHEM 2463 Organic Chemistry Lab III (1 Credit)**

Laboratory course in theory and practice of preparative and analytical organic chemistry, including introduction to IR and NMR spectroscopy. Lab fee associated with this course. Co-requisite: CHEM 2453.

**CHEM 3110 Chemical Systems I (3 Credits)**

Advanced discussion of modern concepts of organic chemistry; bonding, stereochemistry, reaction mechanisms. Prerequisites: CHEM 2453 and equivalent of one year of physical chemistry.

**CHEM 3120 Chemical Systems II (3 Credits)**

Interpretation of trends in the chemistry of the elements in terms of orbital interactions. Most examples will be taken from the third row transition metals and the boron and carbon groups. Prerequisites: CHEM 2131, CHEM 3310 and CHEM 3110.

**CHEM 3130 Chemical Systems III (3 Credits)**

Advanced-level physical biochemistry course intended for advanced-level undergraduates and graduate students. Focuses on kinetic, thermodynamic and dynamic aspects of biopolymers; delineates the relationship of these properties to the mechanism and function of biological macromolecules. Prerequisites: CHEM 3811, CHEM 3812, CHEM 3813, CHEM 3610 or the equivalent.

**CHEM 3210 Instrumental Analysis (4 Credits)**

Course focus is toward students' understanding of instrumental components and the theory behind both component's and instrument's operation. Emphasis is on techniques such as spectroscopy and chromatography. Students will experience extensive hands-on use of a number of instruments. Course provides a strong background for Chemistry Frontiers (CHEM 3500) and emphasizes techniques and skills sought by chemical and biotechnology industries. Lab fee associated with this course. Prerequisites: CHEM 2011 or CHEM 2270.

**CHEM 3220 Advanced Analytical Chemistry (3 Credits)**

Principles of chemical instrumentation applied to analytical measurements; principles, instrumentation and applications of spectrometric and chromatographic measurements. Prerequisites: CHEM 3210 and CHEM 3621, or the equivalent.

**CHEM 3310 Structure and Energetics I (3 Credits)**

Fundamentals of quantum chemistry, and introduction to symmetry and molecular structure of small and large systems. Prerequisite: one year of physical chemistry.

**CHEM 3320 Structure and Energetics II (3 Credits)**

Computational methods in chemistry. Prerequisites: CHEM 3310, one year of physical chemistry.

**CHEM 3410 Atmospheric Chemistry (3 Credits)**

The concepts of equilibrium thermodynamics, kinetics, and photochemistry will be applied to understanding atmospheric processes. Covers urban air pollution in detail with focus on primary pollutants. Also covers stratospheric chemistry with focus on ozone chemistry and the chemistry of climate change. Prerequisites: (CHEM 2270 and CHEM 2453) OR CHEM 2240.

**CHEM 3411 Aquatic Chemistry (3 Credits)**

The circulation of the oceans and their chemical make-up. 'Classical water pollution problems' like biological oxygen demand and turbidity are discussed. Also presented: aquifer structure and flow, ground water chemistry, pollutant partitioning between stationary and mobile phases, heterogeneous surface chemistry, and the detection of trace contaminants. Prerequisites: (CHEM 2270 and CHEM 2453) or CHEM 2240.

**CHEM 3412 Environmental Chemistry & Toxicology (3 Credits)**

A survey of environmental toxicology concepts: animal testing, dose-response data, epidemiology, risk assessment. The course includes ecotoxicology, focusing on the alteration of biological and chemical systems beyond the simple response of an individual to an environmental chemical. Prerequisites: CHEM 2270 and CHEM 2453.

**CHEM 3413 Aerosol Science (3 Credits)**

CHEM 3413 is an introductory course that presents fundamental concepts associated with atmospheric aerosols in both natural and human environments. The course will focus on the sources, behavior, and effects of atmospheric aerosols, or particulate matter (PM) within the contexts of the natural environment and climate, human health, and industrial applications. The course will provide an overview of the chemical and physical characteristics of particulate matter and measurement methods, including chemical reactions that lead to aerosol formation and transformation. Examples and demonstrations will discuss applications to medical science, public health, clouds and climate, air pollution, colors in the sky, the built environment, mechanical engineering, chemical industry, and many other topics that stimulate curiosity. Aerosols affect almost every aspect of the environment and human health and are an important part of countless industrial processes or commercial products. The course is designed to provide a background to students interested in further study or careers broadly in (a) the environmental sciences, (b) medical or health sciences, or (c) many chemical or other scientific or engineering fields where aerosol processes are involved. CHEM 3413 will be taught at an upper-division (3000) level, but with enough flexibility to expect all environmental science, chemistry, biochemistry, biology, ecology, or engineering majors with the prerequisite year of chemistry to have fun and be able to learn effectively and succeed. The course is lecture-only; no lab is required, although demonstrations and hands on activities will be involved. The course fulfills requirements for the Environmental Chemistry B.S. major or minor, elective credit toward the Environmental Science B.S. or B.A. majors, and elective credit toward graduate programs in Chemistry. Prerequisite: CHEM 2240 or CHEM 2131.

**CHEM 3500 Chemistry Frontiers (3 Credits)**

Advanced-level laboratory course required for all undergraduates majoring in chemistry or environmental chemistry. Emphasis on the development of oral, written, computer and presentation skills necessary for success as a scientist. Skills will be honed through state-of-the-art laboratory experiences from diverse areas of chemistry. Lab fee associated with this course. Prerequisites: CHEM 3210 and CHEM 3610.

**CHEM 3610 Physical Chemistry I (3 Credits)**

Fundamentals of thermodynamics, including phase and reaction equilibria, properties of solutions, and electrochemistry needed for advanced study in life sciences and for Physical Chemistry II and III. May be taken for graduate credit by nonchemistry majors. Prerequisites: CHEM 2453, calculus and physics.

**CHEM 3620 Physical Chemistry II (3 Credits)**

Fundamentals of quantum chemistry, including theories of atomic and molecular structure and spectroscopy. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3610.

**CHEM 3621 Physical Chemistry III (3 Credits)**

Fundamentals of kinetic theory and statistical mechanics. May be taken for graduate credit by nonchemistry majors. Prerequisite: CHEM 3620.

**CHEM 3703 Topics in Organic Chemistry (3 Credits)**

May include organic photochemistry, organic synthesis, organic electrochemistry or natural products. May be repeated for credit. Prerequisites: CHEM 3110 or equivalent and others depending on topic.

**CHEM 3705 Topics in Biochemistry (3,4 Credits)**

May include physical techniques for exploring biological structure, biological catalysis, and selected fields within biochemistry taught from original literature. May be repeated for credit. Prerequisites: CHEM 3831 and 3813.

**CHEM 3811 Biochemistry-Proteins (3 Credits)**

Protein structure and function, starting with the building blocks and forces that drive the formation of protein structure and the basic concepts of protein structure, and continuing with enzyme catalysis, kinetics, and regulation. Prerequisites: CHEM 2453 or instructor permission.

**CHEM 3812 Biochemistry-Membranes/Metabolism (3 Credits)**

Membranes and membrane mediated cellular processes, energy and signal transduction, and metabolic/biosynthetic pathways. Prerequisite: CHEM 3811 or CHEM 3831.

**CHEM 3813 Biochemistry-Nucleic Acids (3 Credits)**

Molecular processes underlying heredity, gene expression and gene regulation in prokaryotes and eukaryotes. Prerequisites: CHEM 2453 and CHEM 3811.

**CHEM 3820 Biochemistry Lab (3 Credits)**

Purification and properties of biological molecules and structures. Lab fee associated with this course. Prerequisites: CHEM 3811 AND (CHEM 2011 OR CHEM 2270).

**CHEM 3831 Advanced Protein Biochemistry (3 Credits)**

This course provides fundamental insights into the chemistry and physics of proteins. It investigates how amino acids form proteins with highly complex three-dimensional structures and how these structures mediate function. We examine key research articles and their contribution to our current understanding of proteins. Topics range from protein folding to enzyme kinetics and emphasize basic principles. Prerequisites: CHEM 2453 and instructor permission.

**CHEM 3980 Internship-Undergraduate (0 Credits)**

Practical work experience.

**CHEM 3991 Independent Study (1-10 Credits)**

May be repeated for credit.

**CHEM 3995 Independent Research (1-10 Credits)**

Research project conducted under guidance of a faculty member. Credit hours and projects arranged on an individual basis. May be repeated for credit.

## Chinese (CHIN)

**CHIN 1001 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This course counts towards the Language requirement of the Common Curriculum.

**CHIN 1002 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This is the second course in a three-quarter sequence. This course counts towards the Language requirement of the Common Curriculum. Pre requisite: CHIN 1001 or equivalent, or permission of the instructor.

**CHIN 1003 Elementary Chinese (4 Credits)**

An introductory course in Modern Standard Chinese (Mandarin) designed to develop students' ability to communicate in Mandarin Chinese in linguistically and culturally appropriate ways. This course adopts a task-supported and proficiency-based curriculum, so it focuses on both engaging students in the learning process through real-life tasks and helping students reach the learning outcomes. This is the third course in a three-quarter sequence. This course counts towards the Language requirement of the Common Curriculum. Prerequisite: CHIN 1002 or equivalent, or permission of the instructor.

**CHIN 1116 Exploring Chinese Popular Culture (4 Credits)**

Culture is a very broad and multifaceted topic. Culture is about everything, including language, art, customs, food, political and education structures, and so on. This course introduces students to Chinese popular culture through the lens of Chinese food, social media, TV shows, pop music, sports and education. Students will engage in reading and viewing texts of various media (e.g., book chapters, news articles, social media posts, television episodes, documentaries) and discussing the practices, beliefs, and stories of ordinary Chinese people. Through the in-depth exploration of a broad range of topics, students will be able to develop a deeper understanding of Chinese culture, identify and analyze the connections between Chinese culture and their personal experience, critically reflect on their own culture, and demonstrate awareness of cultural diversity. No prior knowledge of Chinese language is required. This course counts towards the Analytical Inquiry: Society and Culture requirement.

**CHIN 1516 Contemporary China in Literature and Films (4 Credits)**

This course investigates, through critically examining the representative literary and filmic texts produced by Chinese as well as foreign writers and filmmakers, the many complicated aspects of some much-talked about issues. This includes the diminishing rural life and landscape, urbanization, migration/dislocation, the changing roles of women, social equality, as well as the balancing act of preserving tradition, the environment, and economic development. The in-depth examination and diverse approaches this course applies enables students to gain greater understanding of not only the challenges that contemporary China has raised, but also the complexities of the increasingly globalized world in which we are living. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 1616 Asian Ecocinema and Ecoliterature (4 Credits)**

Following decades of economic boom, continuing industrial development, and expansion of urbanization, many Asian countries, especially China and India, are now facing unprecedented environmental crises. The list of ecological woes in Asian countries include air, water, and soil pollution; flooding and drought, deforestation and desertification, epidemics of diseases, coal mine accidents, the loss of land to urban expansion, and mass migration. Asian ecoliterature and ecocinema, both in documentary and feature film form, have functioned as responses to, and critical reflection of, the urgent environmental crises, as well as broader cultural, historical, and social issues that caused environmental and ecological problems. Through critically examining the representative literary and filmic works, this course will 1) introduce students to ancient Asian concepts about Nature and critical events that have reshaped the historical course of development of the concerned countries; 2) demonstrate and explain primary themes presented in the ecocinema and literature, such as hydro-politics of air, water, forests and development; bio-ethics and green culture; eco-aesthetics and the representations of Nature; migration and urbanization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 2001 Intermediate Chinese (4 Credits)**

A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 1003, equivalent, or permission of instructor.

**CHIN 2002 Intermediate Chinese (4 Credits)**

A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2001, equivalent, or permission of instructor.

**CHIN 2003 Intermediate Chinese (4 Credits)**

A three quarter sequence of courses continues to build students' basic skills and to advance them to intermediate level proficiency. Prerequisite: CHIN 2002, equivalent, or permission of instructor.

**CHIN 2100 Advanced Intermediate Chinese (4 Credits)**

This single-quarter course is one of the transitional courses from intermediate Chinese to advanced Chinese. The course materials, while continuing from the CHIN 2001-2002-2003 sequence, give students more opportunities to synthesize vocabulary and grammatical patterns they have learned from previous courses. The introduction of major grammatical patterns is completed by the end of this course. Prerequisite: CHIN 2003, equivalent, or permission of instructor.

**CHIN 2301 Chinese Conversation and Composition I (4 Credits)**

This single quarter course is particularly designed to develop further students' speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2100, equivalent, or permission of instructor.

**CHIN 2302 Chinese Conversation and Composition II (4 Credits)**

This single quarter course is particularly designed to develop further students' speaking and writing skills beyond intermediate level. Prerequisite: CHIN 2301, equivalent, or permission of instructor.

**CHIN 2516 Literary Chinatown: Stories of Chinese in America (4 Credits)**

As the oldest diasporic enclave of Chinese in the United States, Chinatown has been both a physical and historical site where Chinese immigrants have built a community and a continually contested symbolic space represented in Chinese American literature. Literary Chinatown explores the intersection of history, geography, and literature through the myriad ways of Chinatown stories by major authors in Chinese American literature across the period from the early 20th century until the contemporary moment. The focus lies on unraveling the intricate relationship between space, place, and identity, tracing the complexities of being Chinese in America at pivotal historical junctures that shed light on the U.S. nation-building process—its rejection, accommodation, and incorporation of Chinese lives. These literary works set the stage for examining the impact of war, imperialism, (neo)colonialism, and globalization on immigration, alongside domestic issues of race, class, gender, and ethnicity. We aim to unravel the Chinese American experience as portrayed in its literary recreations of Chinatown memory, fantasy, narrative, and myth within Chinese American literature. We also brought scholarly discourse on the intersectional and comparative approaches to the study of race, culture, politics, and place in Chinese American literature. The course will entail a class walking tour of the historical Chinatown area in Denver. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**CHIN 3300 Chinese Society in Transition (4 Credits)**

Through studying selected texts and focusing on topics about various aspects of Chinese society in transition, this class aims at strengthening and further developing students' overall skills, in particular, skills of reading comprehension, presenting information and one's opinions, and debating with other people. Prerequisite: CHIN 2003 plus study in China OR CHIN 2302; or permission of instructor.

**CHIN 3400 Chinese Cinema and Chinese Society (4 Credits)**

This advanced class is designed to strengthen and to develop further students' overall Chinese proficiency and in-depth understanding of the contemporary societies of greater China, including mainland China, Hong Kong and Taiwan, by means of studying the representative Chinese language films produced in these three areas. Prerequisite: CHIN 2302 or above, equivalent, or permission of instructor.

**CHIN 3650 Chinese-English Translation I (4 Credits)**

This seminar is designed for students with advanced-level proficiency in Chinese and English to learn basic translation theories and to develop fundamental skills in translating, from Chinese to English and vice versa, texts which primarily deal with general social needs and everyday communications. Prerequisite: CHIN 3300 or above, equivalent, or permission of instructor.

**CHIN 3991 Independent Study (1-5 Credits)****CHIN 3998 Distinction in Chinese (1-5 Credits)**

This course will guide students who are concentrating in Chinese in the selection of a topic for their Distinction project, research materials, and individual meetings with the professor(s) directing the project.

## Clinical Psychology (CPSY)

**CPSY 2100 Understanding the Criminal Mind (4 Credits)**

This course explores the fascinating factors of the criminal mind. This course provides an in-depth analysis of: the different types of criminals and categories of violence; overview of the various theoretical approaches of the etiology of criminal minds; summarize the various types of criminal personalities; and provide information on the role of the criminal justice system. Prerequisite: PSYC 1001.

## Communication Arts (CA)

**CA 2050 Effective Communication (4 Credits)**

In this course, students develop communication competence while applying communication skills that are both effective and appropriate in diverse contexts. The focus of the course is on developing skills that lead to improved collaborations, organizations, and relationships as well as improved presentation of persuasive arguments using credible supporting evidence. By fostering understanding of communication competency, as well as how communication shapes identity, perception, and culture, the course strives to enable students to better navigate complex personal and professional worlds.

**CA 2100 Creativity and Innovation (4 Credits)**

Everyone has a creative core. It can become hidden or lost, but the ability to recognize one's creative source and tap into it provides an increased range of communication options. This course focuses on analyzing approaches to the creative process, as well as cultivating best creativity practices for use in professional and personal life. Students will learn about the significant creativity theories of prominent creativity scholars. Also, course participants will explore the association between adult playful personality and individual, as well as organizational creativity. The experiences and activities of this course build skills and confidence in using creativity and innovative thought in a variety of disciplines.

**CA 3050 Media and Society (4 Credits)**

This course provides a critical examination of media forms and their impact on society. The representation of culture through print media (books, magazines, newspapers, and online media) and through various visual media (film, television, Internet) is explored. Students learn how informational, entertainment, literary, and commercial messages are crafted and transmitted. The focus is on messages, the institutions behind the messages, and their impact on society.

**CA 3100 Intercultural Communication and Engagement (4 Credits)**

In an increasingly global society and a world of growing international engagement, communicating with people from different cultural and ethnic backgrounds creates both challenges and opportunities. The ability to accept and transcend differences through communication has transformative personal and professional power. Students will learn the advantages of cultural intelligence and reflect on their cultural dimensions as the foundation for engagement in diverse settings. This course explores a range of communication theories such as intercultural communication competence, ethnocentrism, and cultural relativism. Students will develop skills to increase their ability to navigate intercultural experiences to communicate effectively.

**CA 3150 Effective Presentations (4 Credits)**

Researching and refining ideas and then representing them using valid evidence and strong communications skills is an indispensable set of skills. This course focuses on crafting impactful presentations that employ appropriate organizational, verbal, and facilitation techniques appropriate to their audiences. Humor, storytelling, active listening, and other techniques will be explored as strategies for improving presentations. Students have opportunities to select visual elements such as images, graphs, and charts to enhance their presentation skills. Students will use graphic presentation software enhanced by AI in crafting and supporting presentations.

**CA 3200 Art and Interpretation (4 Credits)**

Students will learn to describe, analyze, and interpret visual imagery with a specific focus placed on understanding and examining various forms of contemporary art and digital media. Students will cultivate expanded visual literacy skills for understanding and evaluating digital culture and become critical consumers of visual media. Students will leave this course with tools and concepts for art interpretation and its application that can be applied to new and emerging media, across fields, and in everyday life.

**CA 3250 Visual & Physical Communication (4 Credits)**

How does body language reveal or conceal true intent? Humans appear to be "hard-wired" to assess, examine, and respond to the physical language of others. Although this process is often automatic or unconscious, people can learn to identify visual signs and employ the elements of physical rhetoric (posture, stance, bearing, expression, and gait) in conscious ways to persuade others. This course will explore the body's physical response to certain triggers like anxiety, anger, and stress and how those triggers manifest outwardly. Students will examine strategies for reading physical signs in others and for managing their own physical and visual language. Students will learn techniques for performing nonverbal language, gaining tools for communicating leadership, power, acceptance, openness, and other nonverbal behaviors that impact communication in professional settings.

**CA 3300 Communication for Challenging Situations (4 Credits)**

This course moves beyond core communication mechanics to applying communication skills in interpersonal and professional settings that reflect a culturally complex and global world. Students will explore communication constructs relative to a variety of audiences and use this knowledge to achieve the desired communication outcomes. In addition, the ability to lead and participate effectively in individual and group conversations requires the knowledge and selection of communication processes including strategies and techniques such as conflict resolution, facilitation, dialogue, debate, and negotiations. Students will become better prepared to manage difficult conversations in multiple settings.

## Communication Studies (COMN)

**COMN 1001 Practicing Communication (4 Credits)**

Practicing Communication introduces students to evidence-based communicative practices that aid them in enacting skillful and ethical responses to ongoing communicative dilemmas. The course introduces students to techniques for increasing their awareness of the consequences of their communicative acts and for using mindful communication practices to create and sustain meaningful relationships in interpersonal, organizational, and public settings. The course also helps students develop skills in audience analysis—with a particular focus on crafting messages that are culturally responsive to audiences composed of multiple cultural identities and positionalities. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1002 Theorizing Communication (4 Credits)**

Theorizing communication introduces students to theoretical thinking across the broad range of the communication discipline. Broadly defined, a theory is a set of principles that scholars use to explain or predict how a phenomenon works. This course will introduce students to scholars' attempts to understand and explain how human communication behavior functions in the world, from both humanistic and social scientific perspectives. In this way, the course serves the aim of Scientific Inquiry: Society and Culture courses in that it advances students' understanding of scientific approaches to principles of human functioning and conduct in social and cultural contexts. Students will learn the underlying assumptions of the various approaches to communication studies, examine and critique how these assumptions are applied in specific theories about communication, and apply their knowledge in imagining how a new theory might be constructed. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1011 Comm through Literature (4 Credits)**

This course emphasizes the analysis and performance of diverse forms of literature. In addition to the dramaturgical elements of interpretation that are highlighted in this course, students learn how to contextualize serious public issues through literature while developing confidence and skills as performers and public speakers.

**COMN 1012 Speaking on Ideas that Matter (4 Credits)**

The purpose of this course is to assist students in becoming more competent and comfortable when speaking about their opinions. Students learn how to develop and analyze rhetorical arguments, including the full range of the speech-making process, but especially how to support those opinions they assert. Assignments, class discussions and course materials provide students with a foundation of knowledge and practical application of speaking skills, which will prove useful in a variety of personal, professional, and public contexts. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 1015 Voice and Gender (4 Credits)**

In this course, students explore gender in personal and political contexts with the intent of developing their individual voices in these arenas. Students learn to express creatively their voice through strengthening both their written and oral communication skills. This course also discusses gender issues prevalent in today's society and significant moments in rhetorical history that have impacted these issues. Cross listed with GWST 1015.

**COMN 1100 Communication in Personal Relationships (4 Credits)**

Relationships have a direct and lasting impact on us: they shape who we are, and the paths we take toward who we will become. The purpose of this course is to analyze and apply theories and research relevant to communication processes in a variety of personal relationships. Discussion of issues such as attachment, identity, hetero- and homosexual relationships, family communication, conflict, and intrapersonal discourses will provide students a foundation on which to build skills useful in a variety of personal relationships. In Communication in Personal Relationships, students will: sensitively express attitudes and discuss research about different issues pertinent to the study of personal relationships; develop the skills to critically analyze their own relationships and the relationships of others; reflect on and challenge their and others' ideas in a critically constructive manner so that we arrive at a new level of understanding together; and demonstrate the ability to apply communication and interpersonal theories and research outside of this classroom upon completion of the course.

**COMN 1200 Small Group Communication (4 Credits)**

This course approaches small group communication through a combination of theory and practice. Theories related to group development and leadership, collaborative communication, dialogue and rhetorical sensitivity, and principled negotiation and consensus, are explored through group discussions, research, case studies and presentations. Students have the opportunity to: strengthen their critical thinking and listening skills; confidently voice their identity within a greater community; increase their ability in writing and presenting their thoughts; and develop communication competence by facilitating civility within small group settings.

**COMN 1210 Foundations of Communication Studies (4 Credits)**

This course offers students an introduction to the study of communication. Students will explore the role of communication in domains that cut across the spectrum of human social life, from communication among individuals, to relationships, to marriage and families, to groups, to organizations, to communication at societal and global levels. In addition to focusing on the specific nature of communication in these distinct settings, students learn as well the different conceptual models for describing and understanding communication across these settings. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 1550 Communication in the Workplace (4 Credits)**

This course offers a topics-based introduction to the study and practice of communication in a variety of organizational settings. The emphasis is on issues of power, politics, globalization, culture, diversity, relationships, and conflict. Students learn how to recognize, diagnose, and solve communication related problems in the workplace.

**COMN 1600 Communication and Popular Culture (4 Credits)**

This course uses various landmark theories and perspectives to analyze popular culture, with a particular emphasis on the importance of communication in the production and consumption of culture. We will examine various artifacts of popular culture including music, movies, texts, advertisements, clothing, and other relevant pieces of popular culture. In the course of this exploration, we will study the development of culture by applying different theories or 'lenses' to these artifacts. Students will experience and analyze various aspects of popular culture including production and consumption, in addition to how these processes work within the context of globalization. We will take a critical perspective in which we will challenge our own conceptions and consumption of popular culture. The goal of this course is to combine relevant theories with your own observations and interests in order to develop a careful, critical, and constructive analysis of popular culture.

**COMN 1700 Fundamentals of Intercultural Communication (4 Credits)**

This course explores the fundamental concepts and issues in intercultural communication. We will examine the complex relationship between culture and communication from different conceptual perspectives and consider the importance of context and power in intercultural interactions. In addition to learning theory and applying different approaches to the study of intercultural communication, this course asks that you consider your own cultural identities, values, beliefs, assumptions, worldviews, etc. through participation in class discussions. Our discussions will enhance self-reflection, critical thinking, and your own awareness to the complexity of intercultural communication. You can expect that your classmates possess varying perspectives about the materials being covered in class. We will work hard to help everyone develop their perspective and voice, embracing such factors as cultural background, race, class, gender, and sexuality.

**COMN 1988 Study Abroad Resident Credit (0-18 Credits)****COMN 2000 Identities in Dialogue (4 Credits)**

This course will explore the complex dynamics of social identities within U.S. society and globally, inspired by the intergroup dialogue model. We will explore the ways that race, gender, sexuality, class, ability, etc., function historically, socially, and politically, including the ways that social identities affect groups on and off campus. We will practice valuable dialogue skills, including listening, reflecting on personal and others' experiences, and planning and enacting collaboration across difference. This course has no prerequisites, but students may find it helpful to take COMN 1015, 1600, or 1700 before taking this course.

**COMN 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, JUST 2008, RLGS 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2020 On the Black Panther Party (4 Credits)**

This course introduces students to the rhetorical, political, ideological, and cultural practices of the Black Panther Party. Using a variety of communicative texts, which will include texts written about the Party, the Party's newspaper, and speeches from Party members, students will come to an understanding of the context in which the Party emerged, but also the demands the Party was making of society as a whole. In the process, the students will be given not only an overview of the Party, but a better understanding of the different communicative practices the Party engaged in to critique oppression in the US. In the process, the students will engage in critical conversations about racism, classism, and sexism not only within the Party, but within the larger US society. This course, then, uses the Party as a case study to analyze the politics of oppression in the US, in particular, but the world, in general. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2030 Social Movement Rhetoric (4 Credits)**

This course explores the principle agency that less powerful groups have used for social change in recent U.S. history—the rhetoric of social movement. More specifically, we consider in concrete detail and theoretical nuance the capacity of ordinary people to persuade others, voice grievances, and thus challenge broader society. Our explorations focus primarily on the rhetoric of dissident (non-majority, non-State, often un-institutionalized and non-normative) voice in our culture—both on the "right" and the "left"—as they have sought, and continue to seek, social change. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2040 Inclusive Community: Cross-Cultural Collaboration in Action (4 Credits)**

This course is an experience of cross-cultural collaboration and communication with internal DU partners and local community leaders. Through the encounters provided in the course, you will serve the public good and make a difference through unity and diversity modeled on the Sikh Langar, an expression of shared humanistic values in the public sphere resisting division, violence, and bigotry. This dynamic experience incorporates a multi-disciplinary, community-based approach reflecting proven new product launch, service delivery, project management, and implementation business frameworks. You will develop a critical and compassionate lens into how and why dialogue, as a communicative construct, enables cross-cultural connection in service of meaningful public collaboration. The course culminates with the Langar@DU on DU's campus, providing an immersive experience realizing the values of diversity, peace and co-existence through communication in action. Each student will share in the experience of unified community and actively participate in Langar@DU's preparation and success. Upon completion of the course, you will have gained practical skills to engage professionally and effectively with external partners in order to enhance business and civic relationships and maximize the value of shared goals. This course counts toward the Applied Communication in Personal & Public Contexts requirement.

**COMN 2100 Fundamentals of Communication Theory (4 Credits)**

Basic concepts, theories and models of the communication process. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2110 Quantitative Inquiry in Communication (4 Credits)**

This course is designed to introduce students to the process of reading, analyzing, conducting and critiquing quantitative research in communication studies. Research is a pervasive aspect of contemporary life, both inside and outside of the university. As such, many of the jobs taken by communication studies majors require, or are at the very least enhanced by, the ability to conduct and interpret research. This course introduces students to the various aspects associated with quantitative research methods in an effort to illuminate the significance of research about communication in our lives and help students act as critical consumers of the research encountered.

**COMN 2130 Introduction to Organizational Communication (4 Credits)**

This is a theory-driven course which will introduce students to the major approaches to the study of organizational communication, including classical, managerial, systems, cultural, and critical perspectives. The course uses these perspectives to deepen students' understandings of the organizational communication topics developed in COMN 1550, teaching students how to recognize and approach organizational communication issues from a variety of perspectives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2140 The Dark Side of Relationships (4 Credits)**

This course is designed to familiarize students with theory and research that focuses on the dark and bright sides of human relationships. In particular, we explore those dysfunctional, distorted, distressing, and destructive elements that sometimes comprise our relations with family members, friends, co-workers, and romantic partners, for example. Additionally, we explore relational issues that typically are presumed to be dark but function to produce constructive outcomes, as well as phenomena that are typically judged as bright but function to produce destructive relational outcomes. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2150 Rhetorical/Critical Communication Inquiry (4 Credits)**

This course focuses on the process of interpreting, understanding, and evaluating everyday persuasive acts for the purpose of sharing insights and influencing the community audience. This course fosters a variety of analytical skills, including how to describe primary rhetorical acts (such as speeches, films, news coverage, television programs, songs, advertisements, and public commemorative art, among others) in rich, relevant detail; how to situate or make sense of rhetorical acts within their historical, cultural moments; and how to use theory to develop a critical perspective that helps to render a judgment about a text or act. Students sharpen critical instincts by working through the inventional process to produce a piece of rhetorical or cultural criticism.

**COMN 2200 Qualitative Inquiry in Communication (4 Credits)**

This course focuses on introducing students to a selection of qualitative methods used in communication research. The class covers the basic techniques for collecting, interpreting, and analyzing qualitative data. Throughout the term, the course operates on two interrelated dimensions: one focused on the theoretical approaches to various types of qualitative research, and the other focused on the practical techniques of data collection and analysis, such as interviewing and collecting field notes.

**COMN 2210 Gender, Communication, Culture (4 Credits)**

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: What is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, we explore how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with GWST 2212.

**COMN 2220 Race and Popular Culture (4 Credits)**

This course examines trajectories of representations of race in popular culture (i.e., film, music, television), both produced by the dominant culture, as well as self-produced by various racial and ethnic groups. Through a historical perspective, we trace images in popular culture and how those images are tied to contemporary events of the time. We pay particular attention not only to the specific archetypes that exist, but also how those archetypes are nuanced or colored differently through the lenses of ethnicity, nationality, race, class, gender, and sexuality. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2270 Intro to Health Communication (4 Credits)**

This course is designed to be an introduction to the field of health communication. Through readings, case studies, and discussions, this class is designed to provide an overview of health communication in a variety of health contexts, ranging from public health campaigns to interpersonal communication to community-based health interventions. In this class, we aim to understand how communication can play a vital role in achieving personal and public health objectives. Throughout the quarter, we will examine theoretical and conceptual backgrounds in health communication and evaluate examples of health communication practices. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2300 Fundamentals of Argumentation (4 Credits)**

This class offers a survey of approaches to the study of argumentation. We are going to examine and evaluate how argument is understood from various perspectives within the discipline of communication studies. We will engage theoretical concerns related to argumentation with a commitment to test their applicability to current events and issues. We will also explore how arguments are practiced in areas such as the arts and the media, legal contexts, interpersonal communication, public deliberation, and the sciences. The course will focus on expanding your contextual knowledge of how arguments operate within our culture and on cultivating your ability to read critically and creatively, make cogent arguments, assess opposing arguments charitably, and communicate your judgments effectively. This course counts toward the Applied Communication in Personal & Public Contexts requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2400 Landmarks in Rhetorical Theory (4 Credits)**

This course is a survey of some of the major conceptual innovations in the history of rhetorical theory. In particular we will investigate the conceptions of rhetoric prevalent in antiquity and how they inform contemporary perspectives on rhetoric. In order to carry this off, we will conceptualize rhetoric as an attempt to answer the following questions: what is the relationship between what is true and what is the good. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2450 Between Memory & Imagination (4 Credits)**

How do our human memories and imaginations give rise to the stories we tell and to the selves that we are becoming? This course considers the nature of memory and its relationship to imagination, both in the evolving life of the individual and in the development of the larger group or culture. We examine the self, then, as both singular and collective, fixed and in flux, determined inwardly and shaped by external forces. We look at the relationship of identity to power, and address the question of how re-considering memory and identity might open up new imaginative spaces in global contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2470 Gender and Communication (4 Credits)**

Sex differences in communication behavior, treatment of women in language, women on public platforms and women's portrayal in media.

**COMN 2471 The Social Construction of Travel (4 Credits)**

Travel encompasses the myriad ways in which people and ideas become mobile. The goal of this course is to introduce students to various theoretical issues concerning travel. While the study of travel has been pursued in the context of tourism, commerce, and religion, in this course we also consider the effect of travel on the body of the traveler. We examine travel within many contexts having different registers of meaning - "vacation," "pilgrimage," "migration." However, the very nature of travel is that it transports bodies and ideas across multiple frameworks at a time. Therefore, we also consider how travel is understood within and as various cultural contexts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**COMN 2541 Advanced Debate and Forensic Activities (1-4 Credits)**

This course serves as a practicum for students interested in developing advanced argumentation skills. The focus is on preparing students for competition in intercollegiate debate. Students engage in in-depth research of debate topics, as well as participate in substantial practice of arguments and positions developed as necessary to prepare for intercollegiate competition.

**COMN 2600 Introduction to Political Communication (4 Credits)**

The purpose of this course is to introduce students to the subdiscipline of political communication with a focus on the United States. Through scholarship, case study development, discussion, and activities, this course surveys the major communicative actors in U.S. public and political life. Students will use theories from across political communication to understand the roles of elites, media organizations, and everyday individuals in political talk. Students should leave the course with the ability to identify and critically assess the political communication that permeates their lives. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**COMN 2700 Topics in Communication (1-4 Credits)****COMN 2701 Topics in Communication (1-4 Credits)****COMN 2702 Topics in Communication (1-4 Credits)****COMN 2703 Topics in Communication (1-4 Credits)****COMN 2704 Topics in Communication (1-4 Credits)****COMN 2705 Topics in Communication (1-4 Credits)****COMN 2988 Study Abroad Resident Credit (0-18 Credits)****COMN 3005 Diverse Family Communication (4 Credits)**

This course explores the communicative experiences of diverse families, focusing on issues surrounding race/ethnicity and sexual orientation. This course aims to further student understandings of the ways diverse families communicate both inside and outside their families.

**COMN 3010 Critical Sexuality Studies (4 Credits)**

This course takes a critical approach to the study of sexualities by asking us to challenge our assumptions and everyday knowledges about identities, gender, sexuality, race, class, and ethnicity. This course is organized thematically as we explore various topics within the larger study of critical sexuality studies and communication studies. We examine contemporary issues within queer theory, critical race studies, identity politics, feminism, performance studies, and popular culture.

**COMN 3015 Culture and Pedagogy (4 Credits)**

This seminar invites students to analyze and reflect upon the ways in which individuals and groups have created cultural ideals, images, and constructs of education. The course focuses upon pedagogy broadly conceived as an integral part of a diverse and conflictual society and on how pedagogies shape our understanding and reproduction of, as well as our resistance to, such a society. We explore a variety of conflicting views of what it means to be educated, for what purpose, for what kind of society, and towards what future.

**COMN 3020 Conflict Management (4 Credits)**

Substantive and relational types of conflict, various strategies for conflict resolution.

**COMN 3050 Feminism and Intersectionality (4 Credits)**

This course offers an overview of feminist theories as they are in dialogue with intersectionality. It offers both a contemporary and historical perspective and is also attentive to the emergence of feminist scholarship in Communication Studies. Cross listed with GWST 3050.

**COMN 3130 Organizational Communication (4 Credits)**

This is an applied course, service learning course, based on a consulting model. While the course will extend and enrich the topical and theoretical knowledge developed in COMN 1550 and COMN 2130, the primary purpose of this course will be to help students explore how they can put such knowledge into practice by collectively working with a local non-profit organization to first diagnose and then propose (and, in some cases implement) solutions to an organizational communication problem faced by that organization.

**COMN 3140 Advanced Intercultural Communication (4 Credits)**

This course is designed to study the intersection of communication and culture. In this course, culture is defined broadly to include a variety of contexts, such as race, ethnicity, nationality, gender, age, and class. Students gain theoretical and practical understanding of the opportunities and obstacles that exist as individuals and communities communicate within and across cultures.

**COMN 3220 Asian American Communication Studies (4 Credits)**

This course uses a communication-centered approach to historicize Asian Americans in North America whose racialization is intertwined with that of other groups; identify factors that have circumscribed this category in specific ways, often occluding ethnic, religious, gendered, sexual, and other differences among Asian-American groups; the issues affecting people and groups enumerated as Asian American; and who remains excluded from this category.

**COMN 3230 Principles of Leadership (4 Credits)**

Roles, functions, behaviors that influence and direct; emphasis on interpersonal effectiveness; theories and methods.

**COMN 3270 Health Communication (4 Credits)**

This course examines the role of health communication in our everyday lives. We will focus on communication strategies that inform and influence individuals, families and communities in decisions that enhance health. We will also explore the dynamics and impact of health communication between individuals and the health care system such as doctor-patient communication, dissemination of health related information, and the role of mediated communication in examining health communication.

**COMN 3280 Family Communication (4 Credits)**

The purpose of this course is to enhance understanding about communication patterns within families. In this course, we will examine theory/research on the role of communication in creating and maintaining healthy marriages and families. Specifically, we will study communication and the family life cycle, different family forms, family race/ethnicity, power in families, conflict in families, communication and stress in families, and communication in the aging family. The course format includes lectures, discussions, analysis of case studies, and in class applications.

**COMN 3285 Advanced Relational Communication (4 Credits)**

Advanced Relational Communication is intended to increase understanding of relationships from diverse perspectives. The three main perspectives we will investigate show how relationships affect and are affected by their context, the individuals involved, and the relational system. The goals of this course are for students to increase their skill in (1) explaining how knowledge about context, individuals, and relational systems increases understanding of communication processes in a variety of relationships; (2) evaluating critically the information about relationships that we encounter in our everyday lives; (3) asking and investigating questions about real-life relationships.

**COMN 3290 Communication and Aging (4 Credits)**

In this course, we will focus on the communication processes associated with aging. We will explore the implications of aging and how aging affects the process and outcomes social and relational interactions. We will examine communication and aging through interactional processes (intrapersonal, interpersonal and relational) and through context (organization, family, health, and culture). Emphasis will be placed on the theoretical and applied research in communication and aging.

**COMN 3300 Principles of Persuasion (4 Credits)**

This course involves a social scientific approach to persuasion and social influence. Some of the topics included in this approach are the relationship between attitude and behavior; characteristics of the source, message, and receiver of a persuasive appeal; and models and theories that explain the effects of persuasive communication. By the end of the course, students should be able to think more critically about the persuasive messages they encounter in everyday life, to apply theoretical models of persuasion, and to construct persuasive messages.

**COMN 3310 Globalization, Culture, and Communication (4 Credits)**

Drawing from a critical multidisciplinary perspective, this course examines how culture and communication are impacted by globalization. The course explores issues of power and positionality, as well as economic, political, and cultural implications of globalization on people, products, and ideologies in both local and transnational contexts.

**COMN 3315 Public Deliberation (4 Credits)**

During the last two decades public deliberation has emerged as the centerpiece of theoretical and practical accounts of liberal democracy. This course begins by setting out the nature and functions of public deliberation. We will then track how deliberative democrats respect the traditional accounts of inclusion, equality and reason in an attempt to meet the demands of the deep cultural diversity that marks social life in advanced industrial societies. Specifically we will ask if public deliberation as portrayed in these accounts is sufficient to meet these demands or do we need to expand our understanding of political argument to include a diversity of rhetorical practices? And, once we do expand our account of deliberation how does this transform the traditional problematics of both democratic and rhetorical theory?.

**COMN 3370 Public campaign design and evaluation (4 Credits)**

This course is designed to provide foundational knowledge and hands-on experience about how to design and develop a theory-driven, audience-relevant communication campaign with a community partner. Students will apply theories and integrate evidence-based research into campaign design strategies including audience analysis, goal establishment, message design, and channel selection. Students will then have opportunities to pilot, implement, and evaluate the campaign.

**COMN 3425 Rhetoric and Governance (4 Credits)**

An introduction to the works of Michel Foucault and his influence on contemporary rhetorical theory. Permission of instructor is required.

**COMN 3431 Rhetoric and Communication Ethics Seminar: Communication and Climate Change (4 Credits)**

Since the release of Al Gore's "An Inconvenient Truth," American public discourse has become increasingly concerned with global warming. Not only is there nearly 100% consensus among climate scientists that human-induced climate change exists, but the severity of global warming is entering the popular imaginary, in the form of journalism, films, etc. But while scientists are committed to slowing global warming, the types of sweeping policy and behavioral changes needed to abate the projected climate catastrophe have been very slow in coming. As such, communication scholars—particularly those concerned with the art of public persuasion—are in a unique position to contribute to this significant and complex issue. In the words of climate scientists Susanne Moser and Lisa Dilling, "We need to open up the communication process to a wider community, in which participants own the process and content of communication." The goal of this course is to produce original scholarly research in response to Moser and Dilling's call, to invite more and better communication concerning climate change.

**COMN 3435 Rhetoric and Public Life (4 Credits)**

An introduction to the conceptual and political history of the public sphere. The course pays particular attention to how the normative assumptions of public communication are affected by the demands of cultural pluralism. Permission from instructor is required.

**COMN 3470 Seminar in Free Speech (4 Credits)**

This course will survey some of the major conceptual innovations in the justifications of freedom of speech. We will begin with an exploration of the traditional defenses of free speech and then move to a reexamination of those defenses in light of modern communication theory and the challenges of pluralism. In particular we will ask if the justifications of free speech need to be rethought given our understanding of speech as a social force that constitutes identities and values rather than merely expressing private opinions. Moreover, given our understanding of the social force of speech, should we regulate speech that is racist, sexist and seems to erode the foundations of a public culture based on mutual respect and public deliberation over social goods? Can we devise a robust defense of free speech based on its social force that both protects those that may be harmed by antidemocratic discourses and still provides the resources for democratic dissent?.

**COMN 3550 Principles of Negotiation (4 Credits)**

This is an applied negotiation course – while we will read and discuss theory, the primary goal of this class is application of that theory and your own personal skill development. Put another way, I want you to leave this course not just knowing about Negotiation Theory but being a better negotiator in your own life within contexts that personally matter to you. My hope is that this course leaves you inspired and equipped in your own communication practice to enact leadership in your own life, whether that be work, your relationships, or other commitments you have. To achieve our purpose, this class will be highly experiential, relying on small group and class conversation, applied activities inside and outside of class, and regular reflection. You will have readings and preparation material before class, and we will utilize mini lectures to ensure we fully understand different concepts before we dive into our application.

**COMN 3680 Gender and Communication (4 Credits)**

This course focuses on the interactive relationships between gender and communication in contemporary U.S. society. This implies three priorities for the class. First, the course explores the multiple ways communication creates and perpetuates gender roles in families, media, and society in general. Second, the course considers how we enact socially created gender differences in public and private settings and how this affects success, satisfaction, and self-esteem. Third, the course connects theory and research to our personal lives. Throughout the quarter, the course considers not only what IS in terms of gender roles, but also what might be and how we, as change agents, may act to improve our individual and collective lives. Cross listed with GWST 3680, HCOM 3680.

**COMN 3700 Topics in Communication (1-4 Credits)****COMN 3701 Topics in Communication (1-4 Credits)****COMN 3702 Topics in Communication (1-4 Credits)****COMN 3703 Topics in Communication (1-4 Credits)****COMN 3704 Topics in Communication (1-4 Credits)****COMN 3705 Topics in Communication (1-4 Credits)****COMN 3770 Mediated Communication and Relationships (4 Credits)**

This course examines how people develop, define, maintain, and manage interpersonal relationships through their use of mediated communication. We will examine communication in relationships that occur through the internet, text-messaging, cell phones, chat rooms, gaming, and virtual communities. This is a seminar type course where students guide and are guided through their own study of mediated relationships.

**COMN 3800 Philosophies of Dialogue (4 Credits)**

This course explores the philosophies of dialogue of Martin Buber, Mikhail Bakhtin and others in the context of contemporary communication scholarship on ethics, culture, and relationship. Prerequisite: permission of instructor.

**COMN 3850 Communication Ethics (4 Credits)**

This class is not just about how to be ethical communicators but it is also about how to discover ethics—the good life and care for others, answerability and responsibility—deep within the structures of human communication itself. The course is committed to a mixture of theory and practice but practice is at the heart of the matter. Half of our sessions will be devoted to dialogue or conversation about ethics in life. There we will try to work as close as we can with ethics in our own lived experience. In the other half, we will explore theory: the ethical/philosophical/communicative ground of ethics.

**COMN 3980 Internship (1-8 Credits)****COMN 3988 Study Abroad Resident Credit (0-18 Credits)****COMN 3990 Communication Capstone (4 Credits)**

This course allows students to synthesize knowledges across the communication studies major through original research presentation.

**COMN 3991 Independent Study (1-5 Credits)****COMN 3993 Communication Capstone Sequence 1 (2 Credits)**

In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student's work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the first half of the sequence.

**COMN 3994 Communication Capstone Sequence 2 (2 Credits)**

In this course, students will closely engage with faculty with the intention to foster an in-depth understanding of communication theory, method, or practice in a specific context. To accomplish this, faculty draw on a variety of models for supporting student learning, such as thesis development, community-engaged projects, original research project, portfolio development, and applied personal reflection. For all models, the capstone culminates with a public presentation of student's work. The sequenced nature of this capstone (with two 2-credit courses taken sequentially in consecutive quarters) is specifically designed to allow for greater length of time, which can be particularly valuable for research and thesis development, as well as community-engaged work. This is the second half of the sequence.

**COMN 3995 Independent Research (1-10 Credits)**

Topics and quarter hours vary. Prerequisite: instructor's permission.

## Community Engagement (CENG)

### CENG 1700 Topics in Community Engagement (1-4 Credits)

#### CENG 2510 Denver Urban Issues and Policy (1-2 Credits)

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. As members of the Denver community, we have the responsibility and right to investigate important issues and co-create solutions that center equity and inclusion. There is a wide array of actions that can be taken to create social change, depending on what the issue demands and the strengths, skills, and talents of those working for change. The aim of this course is three-fold. First, you will learn how the history of Denver, including how legacies of violence, displacement, forced migration, and resettlement of Black, Indigenous, and People of Color communities, have shaped the issues we see today. Second, the course will introduce you to some of the most critical issues facing Denver and local efforts to address those issues. Lastly, the course will provide the space for you to explore the variety of social change actions that can be taken, weighing the pros and cons of each and considering how to assess fit for the issue(s) you care about and your own strengths.

#### CENG 2520 Community Organizing (1,2 Credit)

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. In this course, you will learn about the history of community organizing in the United States, the role of community organizing in contemporary social movements, and the components of the community organizing process. Students will first learn how to critically examine power, privilege, oppression, and white supremacy in the context of working for social change. Then, you will explore various community organizing practices including identifying self-interests; building relationships; defining issues using an anti-oppression analysis; understanding root causes; centering the experience of the communities most impacted by injustice and systemic oppression; and creating a vision, strategies, tactics to support campaigns for social justice.

#### CENG 2590 From Public Good Theory to Action (1-2 Credits)

This course is part of the Center for Community Engagement to advance Scholarship and Learning (CCESL)'s course series, which equips students with the skills, knowledge, and commitments necessary to collaborate with communities for the public good. Through this course, you will integrate your personal, professional, and academic goals with a focus on social change. In doing so, you will gain a clear sense of your identity as a public good scholar as well as a personal action plan that you can implement to address a social justice issue of your choosing. You will apply an anti-oppression analysis to your plan including how the I's of Oppression manifest in your selected topic, ways you center the knowledge/voices of the communities most impacted by the injustice/systemic oppression, and how white supremacy shows up in your issue and how to actively work to address racist and oppressive practices.

### CENG 2700 Topics in Community Engagement (1-4 Credits)

#### CENG 3980 Internship (1-8 Credits)

Students who complete a special project as part of an internship with a community organization can register for 1-8 Community Engagement Internship credits.

#### CENG 3991 Independent Study (1-10 Credits)

The Public Good Pathways Independent Study provides academic credit for reflection, integration, and synthesis of a student's current and previous work that contributes to the University of Denver's public good vision. This work is overseen by the Center for Community Engagement to advance Scholarship and Learning (CCESL) and may be completed in collaboration with one or more community partner(s). Public Good Pathways Independent Study opportunities are individually designed as experiences for students who have completed at least one community-engaged class, and they require approval from the Executive Director of CCESL.

## Computer Science (COMP)

### COMP 1101 Analytical Inquiry I (4 Credits)

Students explore the use of mathematics and computer programming in creating animations. Students create animations on their laptop computers using animation software. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

### COMP 1201 Introduction to Computer Science I (2 Credits)

This course introduces the discipline of computer science and how it applies the natural and physical world and society. Topics include the history of computing, computer hardware components, the internet, ethics, and uses computation as a means to analyze, process, model, and understand our world. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Ideally taken concurrently with COMP 1351.

### COMP 1202 Introduction to Computer Science II (2 Credits)

This course continues the introduction of the discipline of computer science by exploring major areas within it. Topics covered include examples from data structures, algorithms, databases, programming languages, parallel computing, artificial intelligence, robotics, cyber-security, data science, gaming, and ethics. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: COMP 1201.

### COMP 1203 Introduction to Computer Science III (2 Credits)

This course introduces testing and software development in computer science. Topics covered include using debuggers, version control systems, unit testing and general testing, Unified Modeling Language (UML), computing ethics, and software development in a team setting. Prerequisite: COMP 1202.

**COMP 1351 Introduction to Programming I (3 Credits)**

This course is an introduction to fundamental aspects of computer programming. Topics covered include variables, conditional statements, iteration, functions, basic data structures, objects, file input/output and interactions. Satisfies 3 credits of Analytical Inquiry: Natural and Physical World.

**COMP 1352 Introduction to Programming II (3 Credits)**

This course continues to introduce more advanced programming topics using the Python programming language. Topics include classes, types, inheritance, methods/functions, testing, graphical-user interfaces, threads, data manipulation, functional programming, and recursion. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: COMP 1351.

**COMP 1353 Introduction to Data Structures & Algorithms I (3 Credits)**

This course introduces data structures used in computation, including their behavior, usage, implementation, and the analysis of their space usage. In addition, the algorithms used for access, manipulation, and updating the data structures is covered. Data structures and algorithms addressed include contiguous and linked lists, stacks, queues, hash tables, heaps, trees, self-balancing trees, graphs, and graph traversal. Introductory runtime analysis is used to prove time and space requirements for data structures and their performance while being used. Prerequisite: COMP 1352.

**COMP 1601 Computer Science Pathways (1 Credit)**

This course is designed to help first year computer science and game development students succeed in a very challenging major. Topics and activities may include academic success strategies; personal inventory exercises; interviewing computer science alumni; exploring ethical concerns within the profession; seminars by industry and academic experts; establishing the relationships between computing and other disciplines; critical and creative thinking activities; disseminating information on the dual degree programs, the honors program requirements, the honor code, and computer science department program structures; and readings from and discussions about computing related articles and publications.

**COMP 1671 Introduction to Computer Science I (4 Credits)**

Characteristics of modern computers and their applications; analysis and solution of problems; structure programming techniques; introduction to classes, abstract data types and object-oriented programming. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: high school algebra.

**COMP 1672 Introduction to Computer Science II (4 Credits)**

Advanced programming techniques; arrays, recursion, dynamic data structures, algorithm abstraction, object-oriented programming including inheritance and virtual functions. Prerequisite: COMP 1671.

**COMP 1991 Independent Study (1 Credit)****COMP 2300 Discrete Structures in Computer Science (4 Credits)**

Number systems and basic number theory, propositional and predicate logic, proof techniques, mathematical induction, sets, counting and discrete probability, case studies with applications from computer science, such as data representation, algorithm analysis and correctness, and system design. Prerequisites: COMP 1672 or COMP 1352.

**COMP 2355 Intro to Systems Programming (4 Credits)**

The prerequisites for this class are a good understanding of imperative and object-oriented programming in Java. The prerequisites for this class include a good understanding of basic programming constructs, such as branches (if, switch), loops (for, while, do), exceptions (throw, catch), functions, objects, classes, packages, primitive types (int, float, boolean), arrays, arithmetic expressions and boolean operations. Computer organization is a parallel prerequisite; if possible, students should register for both this course and COMP 2691. You must have a good understanding of basic data structures such as arrays, lists, sets, trees, graphs and hash-tables. This is a class on systems programming with focus on the C programming language and UNIX APIs. There will be programming assignments designed to make you use various Debian GNU/Linux system APIs. Programming assignments involve writing code in C or C++. Prerequisite: COMP 2673.

**COMP 2361 Systems I (4 Credits)**

This course introduces low-level computer systems and programming. Topics covered include Linux, the C programming language, pointers, dynamic memory management, number systems, instruction set architectures, debugging, and caching. Prerequisites: COMP 1353.

**COMP 2362 Systems II (4 Credits)**

This course introduces computer operating systems and parallel programming. Topics covered include processes, process forks, threads, race conditions, synchronization, scheduling, memory systems, resource sharing, and sockets. Prerequisite: COMP 2361.

**COMP 2370 Introduction to Data Structures & Algorithms II (4 Credits)**

This course introduces the performance analysis of algorithms, including proof techniques; data structures and their physical storage representation, including space and performance analysis; recursive techniques; stacks, queues, lists, trees, sets, graphs; sorting and searching algorithms. Prerequisites: MATH 2200 or COMP 2300; COMP 1353 or COMP 2673.

**COMP 2381 Object-Oriented Software Development (4 Credits)**

Some problems are most naturally modeled by a hierarchy of objects and the relationships between those objects. This course introduces object-oriented design and development as a problem solving technique. Topics covered include the Java programming language, including classes, methods, fields, inheritance, interfaces, polymorphism, generics, static typing, design patterns, and the Java Collections Framework. Prerequisite: COMP 1353.

**COMP 2673 Introduction to Computer Science III (4 Credits)**

An introduction to several advanced topics in computer science. Topics vary from year to year and may include any of the following: theory of computing, cryptography, databases, computer graphics, graph theory, game theory, fractals, mathematical programming, wavelets, file compression, computational biology, genetic algorithms, neural networks, simulation and queuing theory, randomized algorithms, parallel computing, complexity analysis, numerical methods. Prerequisite: COMP 1672 or COMP 1771.

**COMP 2691 Introduction to Computer Organization (4 Credits)**

This course covers basic topics in Computer Organization and is a required course in the BS in Computer Science, BS in Game Development, and BS in Computer Engineering degrees. Topics include: instruction set architectures, integer and floating point arithmetic, processors, memory systems, and topics in storage and Input/Output. Prerequisite: COMP 1672.

**COMP 2701 Topics in Computer Science (1-5 Credits)****COMP 2821 Introductory Game Design (4 Credits)**

Learn fundamental game design practices through the creation of paper and physical game prototypes using a play-centric design process. Topics include the formal elements, dramatic elements, and system dynamics of games, with an emphasis on playtesting, game analysis, and group game projects. Program Prerequisites: Restricted to Game Development and EDPX majors or instructor approval. Course prerequisites: COMP 1352 or EDPX 2100.

**COMP 2901 Computing and Society (4 Credits)**

This course is designed to explore the social implications of computing practices, organization and experience. These topics and other issues are correlated with examples from the older and modern history of technology and science. Some formal experience with computing is assumed, but students who have a good familiarity with ordinary computing practice should be ready. Students are also expected to contribute their expertise in one or more of the areas of their special interest. Cross listed with DMST 3901.

**COMP 3000 Seminar: The Real World (1 Credit)**

Series of lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with MATH 3000.

**COMP 3009 Essential Math for Data Science and AI (4 Credits)**

The primary objective of the course is to empower students with the mathematical tools most used in data science. Students will develop an understanding of fundamental topics such as matrix operations, eigenvectors, and singular value decomposition (SVD), along with key calculus principles, including derivatives and integrals, with a focus on their applications in data science. The course also explores elements of multivariate calculus and optimization techniques to solve real-world problems, as well as probability concepts relevant to modeling uncertainty and variability in data. Additionally, students will gain exposure to implementing mathematical models using Python libraries such as NumPy, Pandas, and Matplotlib to analyze and manipulate data. By synthesizing these mathematical principles, students will be prepared for more advanced topics in data science and machine learning. Graduate student will be expected to upload a course presentation/project assignment to their individual Github portfolio.

**COMP 3100 Human-Computer Interaction (4 Credits)**

Introduces students in computer science and other disciplines to principles of and research methods in human-computer interaction (HCI). HCI is an interdisciplinary area concerned with the study of interaction between humans and interactive computing systems. Research in HCI looks at cognitive and social phenomena surrounding human use of computers with the goal of understanding their impact and creating guidelines for the design and evaluation of software, interfaces, physical products, and services in industry. Prerequisite: COMP 1353, but students from all disciplines are welcome. Cross-listed with COMP 4100.

**COMP 3200 Discrete Structures (4 Credits)**

Discrete mathematical structures and non-numerical algorithms; graph theory, elements of probability, propositional calculus, Boolean algebras; emphasis on applications to computer science. Prerequisites: COMP 2300 and COMP 1353 for undergraduates and COMP 3004 for graduates.

**COMP 3334 Parallel and Distributed Computing for Data Science and AI (4 Credits)**

Current techniques for effective use of parallel processing and large-scale distributed systems for data science. Programming assignments will give students experience in the use of these techniques. Specific topics will vary from year to year to incorporate recent developments. This course is not to be used for the MS Computer Science. Graduate students are required to contribute at least one course assignment to their personal Github portfolio. Prerequisite: COMP 2370.

**COMP 3351 Programming Languages (4 Credits)**

Learn the fundamentals of programming languages through functional programming through an in-depth understanding of syntax and semantics around program structures and how programming languages are parsed and interpreted. Understand recursion as a fundamental problem-solving paradigm and the important role that higher order types and kinds play in eliminating errors and simplifying software development. Satisfies the Programming Language elective requirement. Prerequisites: COMP 2362 and COMP 2370.

**COMP 3352 Elements of Compiler Design (4 Credits)**

Techniques required to design and implement a compiler; topics include lexical analysis, grammars and parsers, type-checking, storage allocation and code generation. Prerequisite: COMP 3351.

**COMP 3353 Compiler Construction (4 Credits)**

Design and implementation of a major piece of software relevant to compilers. Prerequisite: COMP 3352.

**COMP 3361 Operating Systems I (4 Credits)**

Operating systems functions and concepts; processes, process communication, synchronization; processor allocation, memory management in multiprogramming, time sharing systems. Prerequisites: for undergraduates: (COMP 2355 and COMP 2691) or COMP 2361; COMP 2370; for graduate students: COMP 3003, 3004, and 3005.

**COMP 3371 Data Structures & Algorithms (4 Credits)**

Design and analysis of algorithms and data structures; asymptotic complexity, recurrence relations, lower bounds; algorithm design techniques such as incremental, divide-and-conquer, dynamic programming, iterative improvement, greedy algorithms; randomized data structures and algorithms.

Prerequisites: COMP 2370 or equivalent and COMP 3200.

**COMP 3372 Advanced Algorithms (4 Credits)**

Advanced techniques for the design and analysis of algorithms and data structures; amortized complexity, self-adjusting data structures; randomized, online, and string algorithms; NP-completeness, approximation and exact exponential algorithms; flow networks.

**COMP 3381 Software Engineering I (4 Credits)**

An introduction to software engineering. Topics include software processes, requirements, design, development, validation and verification and project management. Cross-listed with COMP 4381. Prerequisites: COMP 3351; COMP 3361 or COMP 2362; or instructor permission.

**COMP 3382 Software Engineering II (4 Credits)**

Continuation of COMP 3381. Topics include component-based software engineering, model-driven architecture, and service-oriented architecture.

Prerequisite: COMP 3381.

**COMP 3384 Secure Software Engineering (4 Credits)**

This course is concerned with systematic approaches for the design and implementation of secure software. While topics such as cryptography, networking, network protocols and large scale software development are touched upon, this is not a course on those topics. Instead, this course is on identification of potential threats and vulnerabilities early in the design cycle. The emphasis in this course is on methodologies and paradigms for identifying and avoiding security vulnerabilities, formally establishing the absence of vulnerabilities, and ways to avoid security holes in new software. There are programming assignments designed to make students practice and experience secure software design and development. Prerequisites: COMP 2362 or COMP 3361.

**COMP 3410 Web Programming I (4 Credits)**

This course will give an overview of machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised, unsupervised and reinforcement learning and associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, neural networks, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After taking the course, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 1353, MATH 1952, and MATH 2060.

**COMP 3411 Web Programming II (4 Credits)**

In this course you will learn how to develop a full-stack web application that is capable of serving dynamic content from a database. Furthermore, you will learn the core design concepts and principles that will enable you to develop scalable and easy to maintain webapplications - a set of skills that will serve you well in both your personal and professional projects in the future. Prerequisite: COMP 3410.

**COMP 3412 Web Projects: Web Development III (4 Credits)**

In this course you will learn how to develop, as a group, a full-stack web application that is capable of serving dynamic content from a database. We will use the MongoDB, ExpressJS, Angular, and Node.js (MEAN) software stack to work on a real-life problem presented to us by an external product owner. In the class we will use the Scrum framework for Agile development to work, as a software team, through several sprints of development. You will be peer reviewing each other throughout the course, and the product owner will also be reviewing your product through end-of-sprint demos as features are completed. The goal for this class is for it to be a fun, collaborative, and educational environment that demonstrates what it is like to work as a real software team. Prerequisite: COMP 3411.

**COMP 3421 Database Organization & Management I (4 Credits)**

An introductory class in database management systems covering both relational and non-relational databases with an emphasis on relational. Topics include database design, ER modeling, relational algebra, SQL, scripting, and embedded SQL. Each student will design, load, query and update a nontrivial database using a relational database management system (RDBMS). In addition, an introduction to a NoSQL database will be included. Graduate students will read one or two relevant technical papers and write a summary report. Prerequisites: for undergraduates: COMP 1353 or COMP 2673; for graduates: COMP 3005 or COMP3006 (MS Data Science).

**COMP 3424 NoSQL Databases (4 Credits)**

In this course, students learn what NoSQL databases are, learn to identify the differences between them, and gain a fundamental understanding between SQL, relational databases, and NoSQL databases. Students further explore which type of NoSQL database is the correct one given a use-cases, examining types, methods of communicating with it, contrasts to other NoSQL databases, performance and scalability. Prerequisites: for undergraduates, COMP 2355 or COMP 2361; for graduates: COMP 3005.

**COMP 3431 Data Mining (4 Credits)**

Data Mining is the process of extracting useful information implicitly hidden in large databases. Various techniques from statistics and artificial intelligence are used here to discover hidden patterns in massive collections of data. This course is an introduction to these techniques and their underlying mathematical principles. Topics covered include: basic data analysis, frequent pattern mining, clustering, classification, and model assessment. Prerequisites: COMP 2370.

**COMP 3432 Machine Learning (4 Credits)**

This course will give an overview of machine learning techniques, their strengths and weaknesses, and the problems they are designed to solve. This will include the broad differences between supervised, unsupervised and reinforcement learning and associated learning problems such as classification and regression. Techniques covered, at the discretion of the instructor, may include approaches such as linear and logistic regression, neural networks, support vector machines, kNN, decision trees, random forests, Naive Bayes, EM, k-Means, and PCA. After taking the course, students will have a working knowledge of these approaches and experience applying them to learning problems. Enforced Prerequisites: COMP 1353, MATH 1952, and MATH 2060.

**COMP 3433 Data Visualization (4 Credits)**

This course explores visualization techniques and theory. The course covers how to use visualization tools to effectively present data as part of quantitative statements within a publication/report and as an interactive system. Both design principles (color, layout, scale, and psychology of vision) as well as technical visualization tools/languages will be covered. Prerequisites: COMP 1353 and Python Programming.

**COMP 3441 Introduction to Probability and Statistics for Data Science & AI (4 Credits)**

The course introduces fundamentals of probability for data science. Students survey data visualization methods and summary statistics, develop models for data, and apply statistical techniques to assess the validity of the models. The techniques will include parametric and nonparametric methods for parameter estimation and hypothesis testing for a single sample mean and two sample means, for proportions, and for simple linear regression. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Prerequisite: COMP 1353, MATH 1952, MATH 2060.

**COMP 3442 Advanced Probability and Statistics for Data Science (4 Credits)**

This course builds on material in Probability and Statistics 1. Students will carry out model fitting and diagnostics for multiple regression, ANOVA, ANCOVA, and generalized linear models. Dimension reductions techniques such as PCA and Lasso are introduced, as are techniques for handling dependent data. The course introduces the principles of resampling and Bayesian Analysis. Students will acquire sound theoretical footing for the methods where practical, and will apply them to real-world data, primarily using R. Prerequisite: COMP 3441.

**COMP 3450 Machine Learning Operations (4 Credits)**

This course introduces the engineering and deployment of machine learning systems. Students will learn essential technical and organizational skills needed to develop and deploy ML solutions, progressing from fundamental concepts through to practical implementation. Key topics include ML project lifecycle management, containerization, web application development, data management strategies, and cloud deployment. Focus will be given to the application of industry-standard tools and best practices for building production-ready machine learning systems. Prerequisites: COMP 3421 and COMP 3432.

**COMP 3455 Shell Scripting and System Tools (4 Credits)**

This course covers navigating and utilizing tools in a UNIX environment, including use of common command line utilities, Bash and Python shell scripting, source control via Git, pipes and I/O redirection, networking in Python and OS multi-processing/multi-threading. More emphasis will be placed on using these tools than on how those tools work. Students should have experience with Python prior to taking this course.

**COMP 3456 Deep Learning for Sequence Data (4 Credits)**

This course introduces modern approaches to analyzing sequential data, with a focus on deep learning methods for time series and natural language processing. Students will develop practical skills in building and implementing neural network models for sequential data analysis, while gaining a thorough understanding of the underlying concepts. Through hands-on projects and real-world applications, students will learn to process, analyze, and generate predictions from various types of sequential data. The course emphasizes practical implementation and modern deep learning frameworks, bridging the gap between traditional statistical methods and contemporary neural network approaches. Prerequisite: COMP 3432.

**COMP 3490 Understanding AI (4 Credits)**

Understanding Artificial Intelligence provides a comprehensive introduction to artificial intelligence (AI) for students of all backgrounds. This course explores the diverse approaches to AI, including rule-based systems, expert systems, knowledge representation, search algorithms, machine learning, natural language processing, robotics, and human-AI interaction. Students will gain hands-on experience with AI tools and applications while critically examining their impact on society. The course emphasizes the capabilities, limitations, and ethical considerations of AI, preparing students to engage thoughtfully with AI technologies in various fields. Prerequisites: Non-majors only, python programming is helpful but not required.

**COMP 3491 Applications of Generative AI (4 Credits)**

Applications of Generative Artificial Intelligence is a hands-on course explores the transformative power of generative artificial intelligence (AI) across various industries. Students will engage directly with generative AI tools and techniques, including text generation, image synthesis, music composition, code generation, and more. Through practical exercises, projects, and case studies, students will develop a deep understanding of how generative AI can enhance creativity, automate workflows, and drive innovation in diverse fields. This course is designed for students who have completed COMP 3490 and want to apply AI in practical, industry-relevant contexts. Prerequisite: COMP 3490 and non-majors.

**COMP 3495 AI Design Project (4 Credits)**

The Artificial Intelligence Design Project serves as the culminating experience for students who have completed COMP 3490 and COMP 3491. This course provides an opportunity for students to apply their AI knowledge and skills to a self-directed project in a domain of their choice. Over ten weeks, students will identify a problem, design an AI-driven solution, and develop a functional prototype or proof-of-concept. Emphasizing creativity, problem-solving, and ethical considerations, this capstone-style course enables students to make a tangible impact in their field. The course includes milestone check-ins, peer reviews, and a final presentation to showcase their work.

**COMP 3501 Introduction to Artificial Intelligence (4 Credits)**

Introduces a variety of Artificial Intelligence concepts and techniques, relevant to a broad range of applications. Students survey multiple techniques including search, knowledge representation and reasoning, probabilistic inference, machine learning, and natural language processing. Examines concepts of constraint programming, evolutionary computation and non-standard computation. Prerequisites: COMP 2370.

**COMP 3525 Human Centered AI - Mind Reading Machines (4 Credits)**

This course explores a key intersection of Artificial Intelligence (AI) and Human-Computer Interaction (HCI). How can AI enhance our interactions with computers by catering to our individual needs and differences? Can we teach computers to understand people's thoughts and feelings to improve overall interaction? Humans often adjust their communication when they notice the person they're talking to is frustrated—why can't computers do the same? In this interdisciplinary, research-focused course, you will read, present, and discuss seminal papers at the intersection of AI and HCI, including (but not limited to) affective computing, physiological computing, augmented cognition, and multimodal interaction. ## Learning Objectives (General Goal) Demonstrate a broad understanding of the intersections between Human-Computer Interaction and Artificial Intelligence, with an emphasis on user modeling. (LO1) Recognize how theories from fields outside of Computer Science can inform and enhance Computer Science practices. (LO2) Develop knowledge of state-of-the-art user modeling techniques, including practical applications and associated challenges. (LO3) Develop critical thinking and scientific communication skills related to current AI topics, including science writing and scientific discourse.

**COMP 3531 Deep Learning: Model Design and Application (4 Credits)**

This course addresses the foundational concepts and components of Artificial Neural Networks (ANN), highlighting their capabilities, strengths, and weaknesses as a machine learning algorithm. Students taking this course will develop ANN models from scratch in Python as a basis for understanding their design as well as the underlying mechanics and calculations that shape their behavior. Key topics such as forward-backward propagation, loss function characteristics and optimization will be considered in relation to model design and computational efficiency as well as to problems such as exploding and vanishing gradients. Training strategies (e.g., dropout, initialization, batch normalization) will further enable students to assess trade-offs in model bias & variance. Coupled with hands-on assignments, these building blocks provide the knowledge and skills required to effectively design and implement ANN models that are ethically and technically sound. As well as foreground important architectures such as Convolutional ANNs, Recurrent ANNs, LSTMS, and Transformers as well as their applicability to modern problems. Student learning and proficiency will be assessed based on a combination of quizzes, coding assignments, exams, and a culminating project. Prerequisite: COMP 3432.

**COMP 3581 Algorithms for Data Science & AI (4 Credits)**

This course introduces the design and analysis of algorithms within the context of data science and artificial intelligence. Topics include; asymptotic complexity and algorithm design techniques such as incremental, divide and conquer, dynamic programming, randomization, greedy algorithms, and advanced sorting techniques. Examples to illustrate techniques are drawn from multi-dimensional clustering (k-means and probabilistic), regression, decision trees, order statistics, data mining using apriori algorithms, and algorithms for generating combinatorial objects. Prerequisite: COMP 2370.

**COMP 3591 Computational Geometry (4 Credits)**

This class deals with the design and implementation of efficient algorithms for problems defined over geometric objects, such as points, lines, polygons, surfaces, etc. The methods and algorithms covered find applications in many areas, including computer graphics (e.g., hidden surface removal), computer-aided design and manufacturing (e.g., 3D printing), machine learning (e.g., supervised and unsupervised classification), geographic information systems (e.g. terrain visibility), robotics (e.g., motion planning), data mining (e.g., dimensionality reduction), and computer vision (3D reconstruction), to name a few. Fundamental geometric problems such as partitioning, proximity, intersection, convexity, visibility, point location, and motion planning are focused on. Efficient data structures and algorithms for their solutions and design techniques germane to the field, such as divide-and-conquer, plane sweep, randomization, duality, etc. are discussed in detail. Practical methods for the robust implementation of geometric algorithms are also covered. Prerequisites: COMP 2300 and COMP 2370.

**COMP 3621 Computer Networking (4 Credits)**

An introduction to computer networks with an emphasis on Internet protocols. Topics include: internet design, application layer protocols such as SMTP and HTTP, session layer protocols including TCP and UDP, the internet protocol (IP), link layer technology such as Ethernet, and security issues related to networking. Programming experience of client/server architectures using sockets and TCP/UDP through projects is emphasized. Prerequisites: for undergraduates: (COMP 2355 or COMP 2361) and COMP 2370; for graduates COMP 3004 and COMP 3006. Cross listed with COMP 4621.

**COMP 3681 Networking for Games (4 Credits)**

Implementing the networking code for multiplayer games is a complex task that requires an understanding of performance, security, game design, and advanced programming concepts. In this course, students are introduced to the networking stack and how this is connected to the Internet, learn how to write protocols for games, and implement several large games using a game engine that demonstrate the kind of networking and protocols required by different genres of games. In addition, tools are introduced that help understand and debug networking code, simplify the creation of protocols, and make the development of networking code easier.

**COMP 3701 Topics in Computer Graphics (4 Credits)****COMP 3702 Topics in Database (4 Credits)****COMP 3703 Topics-Artificial Intelligence (4 Credits)****COMP 3704 Advanced Topics: Systems (4 Credits)****COMP 3705 Topics in Computer Science (1-4 Credits)****COMP 3711 Special Topics in Data Science & AI (4 Credits)**

Special Topics in Data Science & AI highlights selected methods & applications in machine learning that are not specifically addressed within the curriculum. Areas of study may include, but are not limited to, natural language processing, recommender systems, data science for social justice, machine learning operations, generative AI and more. Prerequisites: COMP 3432 and COMP 3441.

**COMP 3721 Computer Security (4 Credits)**

This course gives students an overview of computer security along with some cryptography. Some network security concepts are also included. Other concepts include coverage of risks and vulnerabilities, policy formation, controls and protection methods, role-based access controls, database security, authentication technologies, host-based and network-based security issues. Prerequisite: COMP 2362 or COMP 3361. Cross listed with COMP 4721.

**COMP 3722 Network Security (4 Credits)**

Network Security covers tools and techniques employed to protect data during transmission. It spans a broad range of topics including authentication systems, cryptography, key distribution, firewalls, secure protocols and standards, and overlaps with system security concepts as well. This course will provide an introduction to these topics, and supplement them with hands-on experience. Prerequisites: COMP 3721 or permission of instructor.

**COMP 3723 Ethical Hacking (4 Credits)**

Ethical hacking is the process of probing computer systems for vulnerabilities and exposing their presence through proof-of-concept attacks. The results of such probes are then utilized in making the system more secure. This course will cover the basics of vulnerability research, foot printing targets, discovering systems and configurations on a network, sniffing protocols, firewall hacking, password attacks, privilege escalation, rootkits, social engineering attacks, web attacks, and wireless attacks, among others. Prerequisites: COMP 1203 or COMP 2673 (CS Intro sequence).

**COMP 3731 Computer Forensics (4 Credits)**

Computer Forensics involves the examination of information contained in digital media with the aim of recovering and analyzing latent evidence. This course will provide students an understanding of the basic concepts in preservation, identification, extraction and validation of forensic evidence in a computer system. The course covers many systems level concepts such as disk partitions, file systems, system artifacts in multiple operating systems, file formats, email transfers, and network layers, among others. Students work extensively on raw images of memory and disks, and in the process, build components commonly seen as features of commercial forensics tools (e.g. file system carver, memory analyzer, file carver, and steganalysis). Prerequisites: COMP 3361; COMP 2355 or 2361 for undergraduates; COMP 3006 for graduates.

**COMP 3801 Introduction Computer Graphics (4 Credits)**

Fundamentals of 3D rendering including the mathematics behind coordinate systems, projections, clipping, hidden surface removal, shadows, lighting models, shading models, and mapping techniques. Significant use of 3D APIs through shader programming is covered along with the basics of 3D model representation and animations. Satisfies "Advanced Programming" requirements for graduate students. Prerequisites: COMP 2370, MATH 1952 or 1962.

**COMP 3820 Introduction to Game Programming (4 Credits)**

Learn the fundamentals of game programming by creating 2D and 3D games using a modern game engine. Topics include working with 2D/3D art assets, character controllers, physics, camera systems, 2D and 3D animation integration, lighting, audio, user interfaces, artificial intelligence, and level design. The emphasis in this course is on game programming and implementing game mechanics in fully-working games. Prerequisites: COMP 2381 and COMP 2821.

**COMP 3821 Game Programming I (4 Credits)**

A continuation of Introduction to Game Programming, this course introduces advanced topics that are essential as future game programmers. Students have the opportunity to learn game engine architecture, 2D and 3D linear algebra for graphics, sprites, 2D and 3D animations, input handling, finite state machines, particle systems, user interfaces, game audio, and artificial intelligence for games. Prerequisites: COMP 2370 and COMP 3820.

**COMP 3822 Game Programming II (4 Credits)**

In this course, students learn how to work with a 3D game engine and build 3D games. Topics include algorithms, mathematics for 3D game engines, scene management, animations, 3D shaders, particle systems, physics for games, UIs, terrain systems, and working with higher-level scripting languages on top of the low-level implementation language. Prerequisites: COMP 3821. Suggested corequisite or prerequisite: COMP 3801.

**COMP 3831 Game Prototyping (4 Credits)**

Introduces game prototyping, where game concepts are created and developed into working prototypes using student-chosen game development tools. Engages in critical awareness of game creation practices through discussions, critiques, demos, and player testing. Students have the opportunity to explore their creativity, to expand their knowledge of game design, and to build a broad portfolio of ideas and working projects that demonstrate both their design and technical skillsets. Required for Game Development majors, though all majors are welcome. Prerequisites: COMP 2821.

**COMP 3832 Game Capstone I (4 Credits)**

Students design, build, critique, and playtest their game prototypes from Game Prototyping. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students alter their game design document to add new features, making corrections to prior design issues, and focus on making the game playable and "fun." Prerequisite: COMP 3821 and COMP 3831.

**COMP 3833 Game Capstone II (4 Credits)**

Students design, build, critique and playtest their working game from Game Capstone I. Both art and programming are developed by the student teams with the instructor acting as a project manager to ensure that goals are met through the 10-week development process through various milestones. In addition to building the game, students modify their design document and implement changes in their game, create new concept art for the features, build an introduction level into their game, test the game with "Play testers", and focus on creating a game that is "fun" to play. By the end of the quarter, their game is ready for distribution on an appropriate platform. Prerequisite: COMP 3832.

**COMP 3904 Internship/Co-Op in Computing (0-10 Credits)**

Experiential learning through employment with a company to work in computer science. Students are expected to find the internship/co-op and connect their hiring manager with an advisor in the department to get approval. Requirements for approval include a job description that shows what will be accomplished throughout the quarter and a final report from the hiring manager to report on their performance so that a grade may be assigned. Prerequisites: COMP 2370 and approval of department. MS Data Science students: practical experience working under the supervision of data science employer and a data science faculty advisor. Learning outcomes will be assessed via student work such as summary reports, literature reviews, presentations, code notebooks and/or repositories. Prerequisites: permission of Data Science Faculty Director.

**COMP 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in the regular course schedule for that particular year.

**COMP 3995 Independent Research (1-10 Credits)**

## Construction Management (CMGT)

**CMGT 2170 Construction Building Systems (4 Credits)**

A survey of residential and commercial construction materials, means, and methods associated with the various structural and architectural systems used to design and construct buildings. Project plans and specifications are incorporated to teach the basic sequencing and overall construction process. The influence of sustainability in construction is introduced. This class will also have an off campus , experiential learning lab associated with it.

**CMGT 2300 Introduction to Architecture and Design Management (4 Credits)**

This course introduces students to the significant value that architecture brings to real estate and the built environment and the various services and professions associated with it. Students are introduced to principles, protocols and the planning process related to the design function and the link between the architect's vision and the finished physical structure. Students are introduced to design thinking theory and application. Students learn to read and interpret the various graphical and written construction documents, know how they are developed and what information they contain. Coverage of architectural, structural, mechanical, electrical, plumbing, and civil drawings and specifications. The business model for design services is explored as well as the unique risks and challenges associated with managing the design throughout the various stages of development and construction. Experiential learning lab is associated with this course.

**CMGT 3100 Construction Estimating (4 Credits)**

This course is designed to provide the student with the theory, principles and techniques of quantity analysis (take-off), labor determinations, overhead and profit analysis. It offers insight into the construction estimating process. The role of the estimator, types of estimating, CSI Divisions, bid/contract documents, change order pricing, design/build projects, and estimation compilation will be introduced. Discussions regarding the cost/benefit of sustainable materials and typical construction materials will enhance the requisite knowledge of construction estimating. Prerequisites: CMGT 2300 and CMGT 2170. This course also has a required lab.

**CMGT 3120 Construction Scheduling (4 Credits)**

Understanding and applying scheduling and control to construction projects is essential to successful construction management. Project scheduling emphasizes network-based schedules, such as critical path management (CPM), network calculations, critical paths, resource scheduling, probabilistic scheduling and computer applications. Project control focuses on goals, flow of information, time and cost control, and change management. Pre/Corequisites: CMGT 3100.

**CMGT 3155 Sustainable Development (4 Credits)**

The course includes many case studies of historic and contemporary structures exemplifying various sustainability features. Emphasis will be placed on how LEED project certification influences the overall construction project. Topics will include LEED certification techniques for sustainable sites, water efficiency, energy & atmosphere, materials & resources, indoor environmental quality, innovation and design. The following topics will be covered from a LEED perspective: ventilation, air conditioning, heating, electrical lighting, energy efficiency, and building control systems. The student will study and analyze how management and LEED techniques are applied to current construction projects. Prerequisites: REAL 1700, CMGT 2170, CMGT 2300, and REAL 3438.

**CMGT 3190 Residential Development (4 Credits)**

A course sequence designed to emphasize the practical application of the theories and concepts of residential development. The course provides a capstone experience for seniors. Students are expected to apply their knowledge of general business, real estate and construction management practices by forming a student business entity, acquiring land, building and selling a residential property in a case format. Students will apply accounting, finance, marketing, real estate and construction management techniques in the planning for a residential development. The application of green building materials and methods is emphasized. Prerequisites: REAL 1700, CMGT 2170, CMGT 2300, and REAL 3438.

**CMGT 3480 Construction Project Management (4 Credits)**

This course offers a study of Construction Project Management including different scheduling techniques, use of estimation against scheduling, contracting, construction law, and software use for scheduling. Students obtain the needs for thought process of construction management including scheduling, bidding, proposals, communications, contracts, project planning and initialization, scheduling, estimating, resource planning, organizing, and project control. Use of software is critical and programs are chosen based on independent needs of students. Prerequisites: CMGT 2170 & CMGT 2300.

**CMGT 3700 4 (0-4 Credits)**

Exploration of various topics and issues related to construction management.

**CMGT 3980 Construction Management Internship (0-5 Credits)**

Practical experience (field study) - Please review REBE Internship Guidelines: o.

**CMGT 3991 Independent Study (0-4 Credits)**

Individual research/study; requires written report. Prerequisite: Junior standing, School Advisor and Director permission.

## Counseling Psychology (CNP)

**CNP 1200 Career Decision Making (2 Credits)**

For undergraduates unsure of their academic and/or career direction. Helps students explore their interests, skills, values and the world of work; provides decision-making strategies to aid in future career and life decisions.

**CNP 1250 Peer Counseling (2 Credits)**

Are you interested in learning about how to help others? Interested in being a counselor? This course will provide an introduction to the profession of counseling. Learn more about the variety of roles and responsibilities of mental health professionals and how you can learn how to help others.

**CNP 1650 Unlearning to Learn: A Journey in Self Discovery (1-2 Credits)**

Introduction for students to gain self-awareness and broadening viewpoints to aid in their success as a new student at the University of Denver. This course will focus on interactive and experiential learning around topics such as personality, learning styles, emotional intelligence, strengths and virtues, and learning across difference. This interactive and experiential learning community will engage in critical thinking, challenging dialogues, and praxis (i.e. reflection and action) through a holistic approach of understanding personality, learning styles, emotional intelligence, strengths and virtues, and learning across difference. The aim of this course is to cultivate a sense of belonging through self-discovery. This course provides foundational skill-building to prepare students to actively engage in their learning experience at the University of Denver.

**CNP 1700 Introduction to 4D Peer Mentorship (0-1 Credits)**

This course will prepare students to serve as effective peer mentors through their role as 4D Peer Mentors. By introducing students to emotionally intelligent leadership, they will build their identity as a leader. This leadership identity will be supplemented by student development/transition theory as students' consider their own transition to college and how they can apply that to their role as a 4D] Peer Mentor. Embedded throughout the course, students will be introduced to the 4D Experience framework and grow in their understanding and application of the tenants of 4D to successfully complete the course.

**CNP 1850 Counseling Psychology: Asian American Psychology (4 Credits)**

In this course, we will examine psychological theory and research centered on Asian American individuals and the community, including the historical, sociopolitical, cultural, and interpersonal processes that shape the psychological experience. Although we will sometimes be discussing "Asian Americans" and general trends in this class, it is important to recognize that Asian Americans are not a monolithic group, but rather are many different groups and individuals with diverse historical and cultural backgrounds. We begin the course by exploring the history of Asian Americans in the US (e.g., immigration, communities), as well as the history, evolution, and methodologies of the field of Asian American Psychology. We then engage in an in-depth discussion of various prominent social stereotypes faced by Asian Americans, such as the Model Minority Myth (MMM), being seen as a perpetual foreigner, and so on. We also discuss what an Asian American identity entails, and the acculturation/enculturation process of bicultural and multicultural individuals. Later in the course, we visit topics such as gender and sexuality, mental health, relationships with other minoritized groups, and end the course with current issues (e.g., anti-Asian American racism during the COVID-19 pandemic).

**CNP 2550 Psychology of Men and Masculinities (4 Credits)**

This course is designed to focus on men, and how their lived experiences impact the daily lives and experiences of all gendered individuals in the U.S. This course focuses on the psychological process of men and masculinity.

**CNP 3249 Counseling Psychology: Health and Positive Psychology (4 Credits)**

This course will provide an overview of the topic of health psychology. Health psychology is the study of the bi-directional relationship between psychology and health. Topics in this course will include psychological factors that lead people to act in unhealthy ways, how people adjust and cope with pain and illness, the impact of stress and social support on health, and cultural considerations in health and well-being. Enforced Prerequisites: Psych 101.

**CNP 3263 Counseling Psychology: The Psychology of Sex and Intimate Relationships (4 Credits)**

This course will examine theoretical perspectives and current research in the study of sex and intimate relationships. Topics will include the development of sexual attraction, theories of intimate relationship development, communication, common problems in relationships (jealousy, infidelity, conflict, attachment, etc.), individual and gender differences in sexual behaviors and intimate relationships.

**CNP 3701 Topics in Counseling Psychology (4 Credits)**

Selected themes and topics from Counseling Psychology. Content changes and course may be repeated to a maximum of 12 credit.

**CNP 3991 Independent Study (1-10 Credits)**

## Critical Race & Ethnic Studies (ETHN)

**ETHN 1004 Introduction to Critical Race and Ethnic Studies (4 Credits)**

Critically examines the concept of race, ethnicity, and indigeneity as categories of social, political, historical, and cultural significance, in the United States and internationally, followed by an investigation of colorblindness, diversity ideology, and modern manifestations of racial inequality. Race and ethnicity are examined as they intersect with gender, sexuality, social class, indigeneity, and immigration status. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ETHN 2004 Quantitative Methods in Critical Race and Ethnic Studies (4 Credits)**

Students will be introduced to concepts and methodologies for research and writing in Critical Race and Ethnic Studies (CRES). Building on what students learned in the Introduction to Critical Race and Ethnic Studies, this course aims to expose students to the various quantitative ways that knowledge about CRES is formed. Students will practice quantitative techniques using SPSS and empirical writing about race, ethnicity, and inequality. Prerequisite: ETHN 1004.

**ETHN 2102 1492: Indigeneity, Settler Colonialism, Race (1-2 Credits)**

The year 1492 inaugurated a profoundly destructive phase in the history of humanity, but more so for the Indigenous peoples of this hemisphere as Christopher Columbus arrived at the shores of the “New World.” Within a couple of centuries after his arrival, thriving Indigenous civilizations found themselves in dire straits, if not completely laid to waste, causing untold suffering to the original inhabitants of this continent. The waves of European settlers who followed Columbus not only forcefully settled Indigenous lands by dispossessing Native peoples, but enforced a series of spiritual, cultural, social, political, and economic changes that had devastating effects on Indigenous lifeways. Yet, Indigeneity continues to not only thrive but challenges the ongoing disruption caused by settler-colonial occupation of lands and lives. This course, which is the first of a three-part sequence, takes Indigeneity and its repression by settler-colonialism as a foundational structure that inaugurated other projects of global consequence, including (anti)Black slavery and European colonization of the “Old World.” While Indigeneity is an international concept, our focus in this class will be on New World Indigeneity, especially North America. We will approach settler colonialism not as a thing of the past but as an ongoing incursion into the lives of Indigenous people, who continue to challenge it in new and innovative ways.

**ETHN 2104 Drumming Across the Americas (4 Credits)**

This course looks at rhythm as a fundamental organizing principle for Black music, dance, and life in the Americas. We will focus on multiple percussion-and-dance traditions from North America, South America, and the Caribbean as a window onto the people, cultures, and histories of the African diaspora. We will be especially attuned to the intersection and divergence of practices across present day national boundaries, due to political shifts and alternative cultural geographies forged through ongoing circulation of people and culture throughout the hemisphere. We will also explore trans-temporal rhythmic connections between practices originating in various eras. Overall, we will consider thematic links across genres, including issues of identity (race, gender, sexuality, ability, class), technology, freedom seeking, and spirituality. We will learn by doing, with music and dance practice at the center of our meetings. We will begin our study with the Gullah-Geechee ring shout, next engage in comparative work with Afro-Puerto Rican bomba, and finally apply the rhythmic lessons learned to the contemporary electronic practices of hip hop, reggaeton, and dance hall. Guest artists will visit some of our sessions to provide additional insight and guidance in these forms. Our practice will be supported by reading, listening/viewing, and discussion about our core styles as well as others, providing a critical framework for our creation. We will also attend several performances in order to see how these practices function in a live setting. No prior experience is necessary, only a willingness to jump in!.

**ETHN 2174 Music of the Civil Rights Era (4 Credits)**

The decades of the mid-20th century were an explosion of political unrest, social change, and cultural innovation. While the world was rocked by numerous anti-colonial struggles, disenfranchised populations in the U.S. forged their own battles in what is commonly referred to as the Civil Rights Era. In this course, we engage music as a way to understand this history — both as a record and agent of change. We explore a variety of music and other art from this period, including genres related to the African American freedom movement, multiracial folk revival, and Asian American, Chicano, and Women’s movements. In what ways did social movements employ culture as a political tool? What do we mean by the word “political”? How can music express politics, with or without words? How might music provide an alternative record of history? In order to address these questions and more, we will engage readings on music, politics, history, and identity. We will also view, listen to, and perform the traditions we study. Ultimately, while the tale of the Civil Rights Era is often told as separate, compartmentalized struggles based around identity, our investigations will reveal the intense interracial and intercultural political solidarities and creative dialogues that took place.

**ETHN 2202 1619: Slavery and Its Afterlives (1-2 Credits)**

The year 1619 marked the arrival of the first slave ship on the shores of what would come to be known as the United States of America. In August of that year, an English ship reached Point Comfort on the Virginia Peninsula where 20 Black people were sold for food and other essentials. This event inaugurated what would soon become a foundational institution of the New World—anti-Black chattel slavery—which undergirded all aspects of life in the U.S. Even though slavery had existed in many forms and in many places across the globe, what the U.S. model of slavery succeeded in doing was linking slavery with Blackness. This made slavery an inescapable part of Blackness, ensuring that whoever was born Black was also born into slavery. The celebrated theorist Toni Morrison has called slavery “America’s original sin.” Although slavery was formally abolished through the Emancipation Proclamation issued on Jan 1, 1863, it has continued to structure contemporary Black life, which the theorist Saidiya Hartman has termed the “aftermaths of slavery.” In other words, for critical Black theorists such as Hartman, slavery never ended but transformed into other structures that continue to render Black lives disposable. This class embraces Hartman’s understanding of slavery as an institution that has survived in (c)overt forms, as critical to understanding contemporary issues faced by Black people.

**ETHN 2224 Race, Crime, and Documentaries (4 Credits)**

Students in this course will view, interrogate, and write about full-length urban crime documentaries through the lenses of critical theories of race and ethnicity and criminological scholarship on the media’s distortion of crime reporting. A significant portion of class time will be spent investigating how crime documentaries frame urban racial minority communities that host the highest rates of violent crime and how race plays a role in what the larger society is taught about urban crime through the documentary genre. This focus has a goal of stimulating a more critical consumption of popular media.

**ETHN 2302 1848: Settler Colonialism to Settler Imperialism (1-2 Credits)**

Description: 1848 marked the signing of the Treaty of Guadalupe-Hidalgo between the U.S. and Mexico. Apart from ending the U.S.-Mexico war, the treaty forced Mexico to cede about half of its territory, including present-day states of Texas as well as California, Nevada, Utah, New Mexico, parts of Colorado, and many other states. This makes it one of the largest land grabs in human history. More importantly, this treaty facilitated the westward expansion of settlers, leading to new forms of racial antagonisms while escalating existing ones. This class approaches this moment as also marking the emergence of the U.S. as an imperialist superpower on the world stage as its war making, which was hitherto focused exclusively on Indigenous groups, would now be expanded to new terrains and increasingly outside the New World. We will also pay attention to how colonial expropriation and racialization of Indigenous and Black people would provide the grammar that the U.S. would use as it encountered racial others both within its newly established but unstable borders as well as across the world. In sum, this class will explore different antagonisms that comprise the “cacophony of empire” (Byrd, 2011) and how racialized groups have fought back as well as remained complicit in reinscribing the supremacy of the U.S.

**ETHN 2701 Topics in Critical Race & Ethnic Studies (1-4 Credits)****ETHN 3004 Theories of Critical Race and Ethnic Studies (4 Credits)**

Students will be introduced to concepts and theories for research and writing in Critical Race and Ethnic Studies (CRES). Building on what students learned in the Introduction to Critical Race and Ethnic Studies, this course aims to expose students to the key writings that formed the Critical Race Theory (CRT) movement, CRT’s interdisciplinary uses, the modern American controversies surrounding it, and introduce other critical theories of race and ethnicity. Prerequisite: ETHN 1004.

**ETHN 3035 Whitewalling: Racial Politics of the Art World (4 Credits)**

Aruna D’Souza defines whitewalling as “a neologism that expands in many directions: the literal site of contention, i.e., the white walls of the gallery; the idea of ‘blackballing’ or excluding someone; the notion of ‘whitewashing,’ or covering over that which we prefer to ignore or suppress; the idea of putting a wall around whiteness, of fencing it off, of defending it against incursions.” By examining the state of the art world through the lens of critical race and ethnic studies, this course will investigate a series of case studies that highlights these many manifestations of whitewalling in modern and contemporary art. Through lectures, readings, discussions, and written assignments, the course aims to explore the following questions: How does race intersect with art and art history? How do the shifting racial politics of the art world map histories of racial construction, systemic oppression, and subversive resistance? Should artistic freedom be prioritized, limited, or censored when an artwork includes harmful racial representations or ideologies? How can art institutions be critiqued as sites of contention? And perhaps most importantly, how can art scholars, workers, and creators collectively move towards a politics of racial justice? In this course, students will not only engage in art historical debates that address the critical role that art has played in shaping perceptions of race and racism, but students will also consider how the art world can provide platforms for anti-racist solidarity and protest.

**ETHN 3204 Afrofuturism in Music (4 Credits)**

Numerous Black artists have used images of space travel, extraterrestrials, mysticism, the future, science fiction, and technology in their creations. This course will examine the recurrence of these elements in African diasporic music, focusing on genres including jazz, funk, hip hop, and experimental music. How have artists’ racialized views of the future served to critique their contemporary worlds and pose radical visions of the future? In what ways has Black music shaped and been shaped by recording and other technologies? What are “technology” and “Blackness,” and how can one help us to understand the other? To answer these questions, we will engage a variety of readings on music, race, gender, sexuality, sound technology, and cyber-theory and view/listen to key Afrofuturist performances. We will also engage in our own music making (no experience required). In all, we will come to better understand the long encounter between people of the African diaspora and the so-called modern world.

**ETHN 3804 Critical Race and Ethnic Studies Capstone (4 Credits)**

Students will learn how to conduct in-depth qualitative analyses for research and writing in Critical Race and Ethnic Studies (CRES). Building on what students learned in the Introduction to Critical Race and Ethnic Studies, Research Methods, and Theory, this course aims to enable students to produce their own empirical research. Various qualitative data analysis and research paper writing lessons will be covered throughout the quarter, and it is expected that students will produce a theoretically informed empirical paper centering on CRES topics. Prerequisites: ETHN 1004, ETHN 2004, and ETHN 3004.

**ETHN 3991 Independent Study (1-10 Credits)**

# Economics (ECON)

**ECON 1020 Economics: A Critical Introduction (4 Credits)**

The course gives students a critical understanding of basic economic concepts, showing the importance of differences in the understanding of these concepts by different economic theories: the theories differ both in their view of the economy and its place in society; and in the potential impact of their policy recommendations on different individuals and social groups. The course begins with the immediate experience of life in the “new economy”; and then frames a critical analysis of this experience, drawing out three themes: the relation of the economy to public and private life; inequality and discrimination; globalization. The critical framework calls for a historical dimension: how did we get here? It also points to a defining feature not only of the “new economy”, but of the modern, capitalist economy since its origins: capitalism generates periodic crises within itself. The most obvious crisis is the “economic” one, but equally important are the crises of inequality and discrimination, and of environmental sustainability. The course concludes by considering what kind of economic order, what agents and institutions, would be required to transform capitalism into a socially and ecologically sustainable system. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ECON 1030 Introduction to Micro and Macroeconomics (4 Credits)**

The primary goal of this course is to introduce essential microeconomic and macroeconomic concepts to prepare economics majors and minors for their upper level economics courses. It achieves this goal (i) by separating and interrelating micro level (e.g., individual) and macro level (e.g., society) dynamics in the economy; (ii) by considering those dynamics within their historical context; and (iii) in the context to history of ideas in economics. The course also introduces analytical tools such as graphical and data analysis to demonstrate core ideas in micro and macroeconomic theories and policies. Prerequisite: ECON 1020.

**ECON 1740 Political Economy of Health and Health Care (4 Credits)**

This is an interdisciplinary and introductory level course on health, health care, medical care, and medical care systems with a special emphasis on the U.S. The course is built on a knowledge base drawing from various disciplines such as medical sciences, public health, sociology, political science, economics, anthropology, history and philosophy. It begins with a conceptual clarification regarding health, disease, health care, medical care, and biomedical and social determinants of health through an interdisciplinary perspective. This is followed by the introduction of the emergence and development of the medical profession and the US medical care system from a historical standpoint. Based on these two frameworks, we examine the financing and provision of medical care in the US medical care system. Finally, we introduce policy and reform topics in the US medical care system that have been mainly framed and shaped by the discussion on cost control and associated reform proposals and actions by highlighting their moral and ethical foundations. This course is designed specifically for Culture, Health and Society (CHeS) minor. It is not required and cannot be used as an elective for those who major in economics. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**ECON 1988 Study Abroad Resident Credit (0-18 Credits)****ECON 2020 Intermediate Microeconomics (4 Credits)**

Microeconomic foundations to determine prices and production; consumer behavior, the behavior of firms in competitive and imperfectly competitive markets, and factor markets. Prerequisite: ECON 1030.

**ECON 2030 Intermediate Macroeconomics (4 Credits)**

Determinants of aggregate levels of production, employment and prices, focusing on the short-run dynamics of an economy consisting of a complex structure of interrelated markets; includes analysis of investment decisions, monetary structures and labor markets. Prerequisite: ECON 1030.

**ECON 2050 History of Economic Thought (4 Credits)**

Development of economic thought; leading writers and schools, their influence and theories. Prerequisite: ECON 1030.

**ECON 2101 Urban Economic History Through Cinema (4 Credits)**

We have recently passed the threshold where more than half of the population globally is living in urban areas. Perhaps more striking is that in 1850 only 3 cities (London, Beijing and Paris) had populations that exceeded a million people, while today there are over 300 such cities, with the largest city, Tokyo, having nearly 40 million inhabitants. Coincidentally, the growth in urban areas coincided with the emergence of cinema. In the popular imagination cities have been sites of both promise and terror and this has been well captured in movies since the early 20th century. This course will consider the economic cycle of cities from the early 20th century to the present as seen through film representations. While the films we will watch are works of art this is not a course on film appreciation. What we are interested in is how the emergence of large clusters of people living together in relatively small areas is being depicted over time. Furthermore, we want to understand how the economic arrangements that define these clusters, these cities, are documented and provide a new way of thinking about how humans decide to live and work in common spaces.

**ECON 2190 Behavioral Economics (4 Credits)**

Economics as a discipline often assumes people are rational and self-interested. Yet, when we look at the world around us, we see these assumptions violated, or at least they appear to be violated. In a course on Behavioral Economics, common economic assumptions are relaxed to allow for some behaviors that consistently appear in reality, such as over-optimism, procrastination, altruism, spite, ..., that standard economic theory has difficulty explaining. In this course we will identify common “irrationalities” in the lives of well-loved characters from literature or film, analyze our own behavior and that of the world around us, propose experiments to test for “anomalous” behaviors and their causes, design models to capture experimental findings, as well as discuss policies to encourage/discourage common human behaviors. We will also consider ways in which individuals, businesses, nonprofits, governments, ..., can utilize the findings of Behavioral Economics (for better or for worse). Prerequisite: ECON 1030.

**ECON 2250 Money & Banking (4 Credits)**

This course familiarizes you with the basic principles of money, banking, balance sheets, financial instruments, financial institutions, and monetary policy. We examine alternative perspectives on a variety of issues such as the nature and origins of money, how money enters the economy, the role of banks and nonbank financial institutions in the creation of money, the relationship between banks, nonbank financial firms and the central bank, and financial crises. Additionally, we study the relation between monetary and fiscal and financial stabilization policies, and whether they are complementary or contradict each other. How these policies affect private sector balance sheets will be another topic of our course. We also study the evolution of the financial system including financial practices, instruments, institutions and how they impact and are impacted by regulation. We then use the principles of money and banking we learn this quarter to understand the role of banks in the recent 2008 Global Financial Crisis, as well as its broader causes and potential cures. Prerequisite: ECON 1030.

**ECON 2280 Gender in the Economy (4 Credits)**

This course moves beyond the traditionally male-dominated view of the economy to explore economic life through a gendered lens. A gendered perspective challenges us to see economic theory, markets, work, development, and policy in new ways. Gendered economic analysis expands the focus of economics from strictly wants, scarcity, and choice to include needs, abundance, and social provisioning in its scope. Cross listed with GWST 2280. Prerequisite: ECON 1020.

**ECON 2300 Comparative Economic Systems (4 Credits)**

The purpose of this course is to develop an understanding of the methods (both theoretical and empirical) used to compare economic systems around the world. As a learning objective, by the end of the course students should be able to explain the differences between economic, financial, and legal institutions, policies, and economic performance in alternative economic systems and to critically evaluate changes occurring in transition economies (particularly China, Russia, and Central and Eastern Europe) and their implications for economic growth. Prerequisite: ECON 1030.

**ECON 2330 China and the Global Economy (4 Credits)**

This course provides a comprehensive overview of the Chinese economy and China's role in the global economy. The course covers the economic interactions between China and the world economy over the past two centuries, evaluates ongoing social, economic and environmental challenges, and evaluates future development possibilities for China and the global economy as a whole. The topics addressed include: the Chinese economy before 1949; the socialist era, 1949-1978; economic reform and market transition; the role of state enterprises; foreign investment; foreign trade; China's role in the global imbalances; the impact of the recent global economic crisis. Prerequisite: ECON 1030.

**ECON 2360 Economics, Ecology, and Social Welfare (4 Credits)**

This course examines the interaction between economic outcomes, environmental effects, and inequality based on the contribution of alternative economic perspectives. It is divided in three core sections: Section I presents a historical examination of the restructuring of global capitalism under neoliberalism, and its impact on resource distribution and ecosystems. It follows a presentation of the theoretical differences between traditional and critical economics in the interpretation of these developments. Section II applies the concepts learned in Section I to specific case studies. For each of these case studies, the analysis will highlight both social and environmental implications and prospects for ecological sustainability and social welfare. Section III discusses alternative economic recommendations for socio-economic prosperity and ecological conservation. Prerequisite: ECON 1030.

**ECON 2400 Public Finance (4 Credits)**

Public-sector economics, including public finance and expenditures; effects of different types of taxes and various government programs; government budgeting; cost benefit analysis. Prerequisite: ECON 1030.

**ECON 2410 Industrial Organization Economics (4 Credits)**

This course explores some applied topics in microeconomic theory such as innovation and technological change; cost of production and decision making by firms; market structures and competition; labor market; the changing role of the state; antitrust; regulation and deregulation; and international trade. Prerequisite: ECON 1030.

**ECON 2450 Race in the Economy (4 Credits)**

This course examines economic life through a racial lens by exploring historical and contemporary experiences such as housing, employment, and wealth. A racial perspective challenges us to see economic theory, markets, work, and policy in new ways and highlights the necessity and the challenge of confronting white supremacy within a system of capitalism. Prerequisite: ECON 1020.

**ECON 2500 Economic Development (4 Credits)**

This course introduces the student to several dimensions of, and forces pertaining to, development processes, including nature's inequalities, colonial legacies, the role and limitations of primary production, labor utilization, industrialization, trade, technology acquisition, foreign direct investment and other forms of capital flow, and the role of the state. If time permits, discussion include environmental concerns and cultural factors. Prerequisite: ECON 1030.

**ECON 2510 The Asian Economies (4 Credits)**

This course is based on a comparative approach, examining several Asian economies' colonial background, their primary producing sectors, the developmental state in these countries, attempts at industrialization, trade policies, technological development, liberalization to attract foreign capital, currency and financial crises. Prerequisite: ECON 1030.

**ECON 2530 Latin American Development (4 Credits)**

This course provides an in-depth exploration of the historical, political, and economic forces shaping development in Latin America. By integrating classical and contemporary perspectives, the course explores the region's colonial legacy, post-independence challenges, diverse development strategies, and evolving policy paradigms until the neoliberal reforms. Through the study of structuralism, dependency theory, neo-structuralism, and contemporary issues, the course equips students with the analytical tools to critically engage with debates on development in the Global South. Prerequisite: ECON 1030.

**ECON 2540 Law and Economics (4 Credits)**

This course provides an introduction to the study of law and economics, the objective being to provide a critical examination of the nexus between economics and law. After establishing foundational concepts and definitions the course turns to an investigation of legal history, traditions and movements. For example, this will include examination of common law and civil law (code), the progressive era, legal realism, critical legal studies, the law and economics movement, critical race theory, and law and neoliberalism. An assessment of distinct approaches to law and economics from different economic perspectives will also be undertaken. The latter half of the course covers the economic dimensions to various sources or core areas of law including property, contract, tort, administrative, criminal and constitutional law. Additionally, certain special topics will be introduced and analyzed throughout the course, including the social and legal construction of markets; public finance and the economic role of government; the legal foundations of money; and, environmental, international, family, public, corporate, competition and antitrust law. The course also offers exposure to hands-on and practical factors concerning the profession and practice of law including legal terminology, precedent, reasoning, case review, writing and procedure.

**ECON 2600 International Finance (4 Credits)**

The course covers history, institutions, and theory of international monetary relations. It encompasses topics such as balance-of-payments adjustment, exchange rates, international monetary arrangements, and foreign investment. Commencing with an introduction to national accounting and the balance of payments, the course provides a theoretical foundation for understanding exchange rate determination. Subsequently, it explores discussions surrounding floating and fixed exchange rate systems. The curriculum further delves into a concise history of international monetary relations spanning the last two centuries, including the Gold Standard and the Bretton Woods systems. Moreover, the course engages in a comprehensive examination of the role played by international capital flows and their global impacts. Finally, it concludes with an in-depth discussion on the role of international finance within contemporary global capitalism.

**ECON 2610 International Economics (4 Credits)**

The student learns about balance of payments, accounting, international monetary arrangements, international trade, and international investment. Certain policies that have a direct impact on a country's balance of payments, e.g. macroeconomic policies, exchange rate policy, and commercial policies, are examined. Some features of recent US trade policy stances is also be surveyed. Prerequisite: ECON 1030.

**ECON 2670 Quantitative Methods (4 Credits)**

This course offers an introduction to empirical work and statistics relevant to the study of economics. The course begins with a discussion of the use and creation of data, and various sources of data. It then presents the basic foundations of statistical methods for the description and analysis of data. Students learn how to calculate common descriptive statistics, test hypotheses related to the mean and differences between means, and how to perform and interpret bivariate linear regression analysis. In the process, students learn and use a popular software package commonly used for statistical analysis in economics. Prerequisite: ECON 1030.

**ECON 2701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 2710 Labor Economics (4 Credits)**

Labor theory and institutions; theory of labor demand and supply including market models, demographics and education; the labor movement and legislation, industrial conciliation methods, and modern industrial relations. Prerequisite: ECON 1030.

**ECON 2980 Internship (0 Credits)**

This online course integrates first-hand labor market experience and career readiness with economic knowledge and skill building. Students will actively build their professional networks, complete internship hours, engage in professional development, and critically reflect on their labor market experience. Students are responsible for applying to and securing their own internships prior to registering for the course with support from the internship coordinator. Prerequisites: ECON 2020 or ECON 2030.

**ECON 2988 Study Abroad Resident Credit (0-18 Credits)****ECON 3040 Marxian Political Economy (4 Credits)**

An exposition of Marx's theory of value through a detailed reading of Capital, vol. I. Excerpts from other readings by Marx, and some of the relevant secondary literature used. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Requires junior standing or above. Cross listed with PHIL 3075.

**ECON 3110 European Economic History (4 Credits)**

The emergence of capitalism from feudal society; the Industrial Revolution, English capitalism; European industrialization; state and economy in capitalism; 20th-century Europe and the global economy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3460 Monetary Theory and Policy (4 Credits)**

Studies the interaction between money and the economy. Examines the workings of the financial institutions and how they affect the economy. Looks at the questions of what serves as money, what determines interest rates, and how the central bank conducts monetary policy and its effect on the performance of the economy. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3480 Money & Financial Markets (4 Credits)**

Examines workings of the money and financial markets and their relation to the monetary system and to the macroeconomy. Restriction: junior standing. Prerequisite: ECON 2020 or ECON 2030.

**ECON 3500 Economic Development (4 Credits)**

Careful re-examination of the works of the prominent development economists of the immediate postwar decades to critically shed light on the treatment of topical development problems by modern economists. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3590 Urban Economics (4 Credits)**

Covers topics and issues of economic growth and decline in metropolitan areas, emphasizing urban economic issues. A broad range of policy areas is discussed, including labor market policy, welfare reform, housing policy, racial segregation, transportation, and environmental policy, among others. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3600 International Monetary Relations (4 Credits)**

Theory, policy, and history of international organization of money and finance; open-economy macroeconomics: balance of payments, exchange rate dynamics, monetary policy effectiveness. Cross-listed with INTS 3600. Restriction: junior standing. Prerequisite: ECON 2030.

**ECON 3610 International Trade Theory & Policy (4 Credits)**

Examines topical trade issues confronting the United States, policies proposed to tackle them, and the theoretical underpinnings of these policies. Studies how those policies could affect the less developed countries as determined by the environment established under the World Trade Organization. Prerequisite: ECON 2020 or 2030. Recommended: ECON 2610.

**ECON 3670 Econometrics: Multivariate Regression Analysis for Economists (4 Credits)**

This course develops the foundations of ordinary least squares (OLS) regression analysis and teaches students how to specify, estimate, and interpret multivariate regression models. Students have to apply what they have learned using a popular software package used for econometrics and real data. Special topics also covered include regression models that include dummy variables, log-linear models, fixed effects models, a brief discussion of instrumental variables, and an introduction to time-series analysis and forecasting. Prerequisites: ECON 2670. Cross-listed with ECON 4670.

**ECON 3701 Topics in Economics (4 Credits)**

Specialized topics in Economics. Check with the Department of Economics or the Schedule of Classes for further information.

**ECON 3740 Health Economics (4 Credits)**

This course is designed to study the nature of the organization of health care production, delivery and utilization according to economic theory. It introduces the up-to-date problems and issues in the U.S. health care system by studying demand for and supply of health care services, health care production and costs, and market analysis of health care industry. Important parties playing roles in health care industry such as private health insurance firms, physicians, pharmaceutical industry, and hospital services will be studied in detail. In addition, the course deals with the role of government in health care industry and various health care reforms proposed in the U.S. Restriction: junior standing. Prerequisite: ECON 2020 or 2030.

**ECON 3850 Mathematics for Economists (4 Credits)**

The frontier of the research in modern mainstream economics relies on the modeling of economic phenomena, which requires increasingly sophisticated mathematical tools. The purpose of this course is to introduce these tools to early graduate students and advanced undergraduates, particularly those interested in pursuing graduate studies in economics. While this is primarily a math course that covers topics from linear algebra, multivariate calculus, and constrained optimization, economic applications will be used to provide intuition. This course provides a solid foundation in mathematical economics as well as a glimpse of the kind of work that is currently being done in the field. For graduate students, the course will provide the necessary mathematical background for ECON 4030 and Econ 4020. Prerequisite: ECON 2020 and 2670.

**ECON 3900 Growth, Technology and Economic Policy (4 Credits)**

This course will introduce students to innovation dynamics – technological change as the foundation for the growth of and structural changes in economic activity - through the lenses of 1) economic theory, as evolutionary economics, in particular original institutional economics and neo-Schumpeterian economics, as well as Marxian themes around dynamics of change in economies and societies; 2) economic history, to further underline the nature of innovation as a social phenomenon that has impacted technological capability and economic activity, in scope, reach, and level, in societies as well as societies themselves; and 3) economic policy, to emphasize focus areas for the successful support of innovation, and desired innovation, with examples drawing from the economic development process as well as national innovation systems concepts and the role of the public sector as an active participant in economic activity in general. The focus for the course under all three perspectives will be on changes to technological capability, from a social perspective that emphasizes systemic components in the processes of innovating and change. Prerequisite: ECON 2050.

**ECON 3970 Environmental Economics (4 Credits)**

This course examines economic perspectives of environmental and resource problems, ranging from peak oil, food crisis, and climate change. Topics include the property-rights basis of polluting problems, environmental ethics, benefit-cost analysis, regulatory policy, incentive-based regulation, clean technology, population growth and consumption, and sustainable development. Restriction: junior standing. Prerequisite: ECON 2020.

**ECON 3988 Study Abroad Resident Credit (0-18 Credits)****ECON 3990 Capstone: Research, Evaluate, and Report on Living in CO (2 Credits)**

Gather and evaluate data to share the diverse economic experiences of all Coloradans. Collectively write and present an economic report. Engage with Colorado policymakers and policy advocates to explore how research informs policy and to enhance understanding of policymaking and outcomes throughout Colorado.

**ECON 3991 Independent Study (1-8 Credits)**

Prerequisites: ECON 1030.

**ECON 3995 Independent Research (1-4 Credits)**

This research project is based on a topic that the student picks in consultation with the chair of the economics department. During the consultation process a faculty supervisor is assigned to work with the student throughout the research process. The topic is preferably one that requires the student to demonstrate her/his ability to apply what he/she has learned in the intermediate-level required courses for the economics major. Restriction: senior standing.

**ECON 3997 Economics Honors Thesis (4 Credits)**

Students pursuing Departmental Distinction will write an Economics Honors Thesis of between 30 and 50 pages during their senior year. The subject of the Thesis must concern some important topic in Economics, the precise nature of which will be determined by the student and an advisor chosen from among the Economics faculty. A student wanting to try for this Distinction must first meet with the Department Chair to discuss which Professor he or she will request to supervise his or her Thesis. The Professor who agrees to supervise an Honors Thesis is responsible for certifying that the work is of sufficient quality for Departmental Distinction in Economics.

## Emergent Digital Practices (EDPX)

**EDPX 2000 Imaging in Emergent Digital Practices (4 Credits)**

This course introduces digital imaging and digital illustration. Foundational technical methods and semiotics are introduced as ways to explore contemporary visual language. Students gain understanding in the digital creation and deciphering of images in 2D space. The essential language and concepts concerning representation and digital reproduction are developed through critical study and making. Lab fee. No prerequisites.

**EDPX 2100 Interactivity in Emergent Digital Practices (4 Credits)**

This course provides the fundamental concepts of digital interactive software, including the study of how the computer processes information and can be leveraged to create relationships with and between people. Students learn programming fundamentals in ways that are applicable across all types of programming. The basic ideas of Human Computer Interface are introduced and put into practice. Lab fee. No prerequisites.

**EDPX 2300 Systems in Emergent Digital Practices (4 Credits)**

This course studies the fundamental concepts of systems, both analog and digital, analyzing how structure and operation combine to produce complex results and effect change in the world. Students will learn how the components of digital systems from simple electronics to complex software and distributed networks function systematically to solve problems and share information. Through study of the development of the computer, the internet and digital interfaces students will gain a critical understanding of how these systems have been historically shaped. Reading, writing, and making will synthesize practice and critical ideas. No prerequisites. Lab fee.

**EDPX 2400 Time in Emergent Digital Practices (4 Credits)**

This course introduces the fundamental concepts of time-based media, with an emphasis on audio and video production. Basic recording, capturing, editing and manipulation of time are covered. Students gain understanding on how to utilize, analyze, and manipulate time in digital media. Students learn the basic language and critical analysis techniques needed to understand when and how to take advantage of each time-based media for their practice. Lab fee. No prerequisites.

**EDPX 2710 Critical Game Cultures (4 Credits)**

This course is a critical investigation of contemporary ludic cultures. Ludic cultures are environments and practices of play. This course is taught with a teaching model where games are treated as texts, and outcomes are in the form of discussion and synthetic media responses. We co-construct and play a hyper-local canon of games, both in and outside of class. We read from the growing body of literature in game studies. We reflect and respond to these texts through shareable media. This course counts towards the satisfaction of the Cultures requirement for Emergent Digital Practices majors and minors. Lab fee. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2730 Understanding Digital Art (4 Credits)**

An exploration of digital art focused on artwork created since 2000. Topics include video art, MMO performances, interactive installations, VR, animation, and much more. Students will actively search for, share, and analyze artworks as a key component of the class. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2740 Animated Satire (4 Credits)**

This course will study the use of animated satire and irreverence as a tool to critique issues of our time, including socio-politics, culture, and environmental changes. The history and contemporary practices of this genre will be examined through text and media. Students will explore this field through media, theory, creating media and writings. Throughout history, artists, writers, performers, and activists have used satire as a powerful instrument to question those who abuse authority. Understanding the world through critical humor can position us to react to politics and culture with relevance, and even spark movements. The writing and creative making process open the opportunity for paths of self-discovery and vulnerability, which can contribute to empathy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2770 Exploring Digital Cultures (4 Credits)**

This course introduces fundamental concepts of digital technologies and networks from a cultural perspective. Students will critically examine the broader impact of the internet, search engines, social media platforms, algorithms, surveillance capitalism, technological bias, and online cultural exchange. How can we envision preferable futures for online cultures? What methods can be used to evaluate possible futures? Students will explore the different cultural aspects of critical speculation through theory, literature, speculative/science fiction, art, and making. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 2780 Computing Culture (4 Credits)**

This course focuses on the history and theory of computing technologies, and their impact on the arts and society. Computing, in this context, ranges from ancient mechanical computers, telecommunication, and colonial infrastructure and contemporary highspeed networks, social networks, and Artificial Intelligence. How do these technologies impact modern societies? What artworks (visual art, literature, music and more) utilize computing in creative and critical ways? How can art and computing create social change? What are the negative legacies of colonialism embedded in both art and computation? What are meaningful decolonial practices stemming from the Global South and North that enable the collective stewardship of new technologies? Students will analyze technologies, art, and human creations through qualitative analysis and creative interpretations. This course fulfills the Cultures requirement for Emergent Digital Practices majors and minors. This course also counts toward the Analytical Inquiry: Society and Culture Common Curriculum requirement.

**EDPX 3100 Programming for Play (4 Credits)**

This course offers an introduction to the creation of games and playful interactive objects. Students explore the space of socially conscious and humane games as well as investigate the creation of compelling interfaces and interactive opportunities. Specific topics will vary each time the course is taught, and the course is repeatable up to two times. Lab fee. Cross listed with EDPX 4100. Prerequisite: EDPX 2100 or permissions of the instructor.

**EDPX 3110 Rapid Game Design and Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, and the iterative design methodology through the rapid creation of paper-based and physical game prototypes. The ambition is for each student to create one new game per week in response to varying material and conceptual constraints. Participants both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time is devoted to play-testing and discussion. Lab fee. Cross listed with EDPX 4110. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3112 Rapid Physical Game Design & Prototyping (4 Credits)**

This course is a rigorous investigation into games, rules, systems, interaction, collaboration, and the iterative design methodology through the rapid creation of large, human scale, "Big Games." The ambition is for students, working in changing collaborative groupings, to rapidly create games in response to varying material and conceptual constraints. Participants will both create and constructively critique games created by classmates. Participants are expected to become reflective in their play. Class time will be devoted to play-testing and discussion. Prerequisite: EDPX 2300. Lab fee.

**EDPX 3120 Making Critical Games (4 Credits)**

Students are challenged to create games (board, physical, video-, and hybrid games) that respond to social conditions in a critical manner while still maintain an essential ludic quality. Public good and civic engagement projects are welcomed. The course may be repeated with instructor permission when projects vary. Specific topics will vary each time the course is offered, and the course is repeatable up to 3 times. Lab fee. Prerequisites: EDPX 3100 or COMP 1671, and EDPX 3110, or permission of the instructor. Cross listed with EDPX 4120.

**EDPX 3200 Data Visualization (4 Credits)**

This course explores the creation of informational graphics for the visual unpacking of relationships within and among data sets. Students learn to visualize large data sets as a means of revealing and exploring patterns of information. Creating interactive visualizations are also covered, allowing for deep and participatory engagement with information. The resulting mediums include print and web. Lab fee. Cross listed with EDPX 4200. Prerequisites: EDPX 2100, or permission of the instructor.

**EDPX 3210 Typographic Landscapes (4 Credits)**

This class is a rigorous investigation of the expressive potential of typography as a crucial element of visual expression and electronic media. This class presumes no background in typography. Students are guided through project-based explorations that range from hand-rendered inter-letter spatial relationships to the typesetting of modest sets of pages for paper and e-books. Lab fee. Prerequisite: EDPX 2000 or permission of the instructor.

**EDPX 3270 Making Networked Art (4 Credits)**

In this course networked art is understood in the broadest sense from art that natively exists on digital networks to art that critiques and engages with the concept of the network in contemporary society. This course aims to develop a critical understanding of and response to the social, cultural, aesthetic and technical contexts of network culture, building on a deep understanding of contemporary and historical networked art practices. Students will engage with network architectures and platforms developing experimental approaches to user interface and interaction, deploying a range of digital materials from data to rich multimedia content to create work that produces new understandings of the role of the network in a post digital age. Prerequisite: EDPX 2100. Lab fee. Crosslisted with EDPX 4270.

**EDPX 3310 Tangible Interactivity (4 Credits)**

Explores methods and devices for human-computer interaction beyond the mouse and keyboard. Students learn to create and hack electronic input and output devices and explore multi-touch augmented reality, and other forms of sensor-based technologies. Lab fee. Prerequisite: EDPX 2300 or permission of the instructor.

**EDPX 3320 Interactive Art (4 Credits)**

This course expands the concepts, aesthetics, and techniques critical to the exploration and authoring of interactive art. It explores human computer interactions; user/audience interface design/development; interactive logic, author-audience dialogue; meta data/multimedia asset acquisition and authoring environments. While utilizing student skills in numerous media forms, the class focuses on sensing, interactive scripting techniques, and emerging forms of digital narrative. Emphasis is on the development of interactive media deployment and distributions ranging from screen media to physical environments. Lab fee. Cross listed with EDPX 4320. Prerequisite: EDPX 3310 or EDPX 3450, or permissions of the instructor.

**EDPX 3330 Advanced Coding (4 Credits)**

This course is focused on text-based creative coding for multiple purposes. Specific applications change each quarter and can include mobile apps, computer vision, machine learning, generative art, programming reactive spaces, web animation, and other emerging ideas, all driven by creative coding. Prerequisite: EDPX 2100 or COMP 1671.

**EDPX 3340 Designing Social Good (4 Credits)**

This course focuses on interdisciplinary approaches to artistic, scholarly and cultural methods for creating change in contemporary societal mindsets for a more sustainable and equitable future. Our objectives are to understand how current practices are reinforced and then to make experiences that encourage new ideas in the personal and global sphere. Lab fee. Cross-listed with EDPX 4340. Prerequisite: EDPX 2100 or permission of the instructor.

**EDPX 3350 Sustainable Design (4 Credits)**

This course surveys and functionally implements the foundations of sustainable design strategies as a praxis intersecting the domains of digital media design, dissemination, community organization and networking. The course builds upon the basic paradigms that have coalesced in the organizational and critical platforms of the sustainable design movement including ecology/environment, economy/employment, equity/equality and education/pedagogy/dissemination. The class reviews a wide spectrum of sustainable design strategies including: mapping of consumptive origin-thru-fate, green materials usage, creative commons, open source software/hardware movements, collaborative design, predictive complexity modeling, biomimicry, evolutionary design methods, and greening infrastructure among others. Lab fee. Prerequisites: EDPX 2300 and EDPX 2400 or permission of instructor.

**EDPX 3370 Biomedial in Emergent Digital Practices (4 Credits)**

This EDP art-science course in Biomedial will survey and investigate the interplay between new media, biological systems/ technologies and bioethics as they relate to creative inquiry at the juncture of life sciences, digital media and contemporary technoculture. The course will build upon the basic paradigms and platforms of biosemiotics and biomimetics to expand into a coverage of our framing of corporeality, biological/environmental sensibilities and our perceptions and interconnections with biomaterials and lifeforms that we exist thru and within. Course topics will adapt to significant developments in biological sciences, emergent media and bioethics. The course can be repeated for credit with offering of new course topics. Cross Listed with EDPX 4370. Prerequisite: EDPX 2300. Course is open to Biology, Environmental Science majors and Sustainability minors with instructor approval.

**EDPX 3400 Video Art (4 Credits)**

This course continues the investigation of theories and practice of electronic media and expands into an exploration of video art, providing the basic principles of video technology and independent video production through a cooperative, hands-on approach utilizing various video formats. The course may be repeated for credit with permission of the instructor and when projects vary. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor. Cross listed with EDPX 4400.

**EDPX 3410 Advanced Video Art (4 Credits)**

This course continues the investigation of theories and practices of electronic media and expands into an individual exploration of video art focusing on off-screen time-based media through conceptual and technological experimentation. Projects explore creating digital video for projection into space, onto buildings, and in the form of installations, to name a few formats. Projects are used as a platform for creative expression focusing on the critical skills necessary for the conception and completion of ideas. Lab fee. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3440 Site-Specific Installation (4 Credits)**

This class produces projects investigating physical space, virtual space and site-specific public installation. Lab fee. Cross listed with EDPX 4440. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3450 Visual Programming (4 Credits)**

This course introduces intuitive visual programming that allows rapid building of personalized tools for data, video, image, and sound manipulation. These tools can be used in real-time editing or performance, complex effects processing, or to bridge between multiple pieces of software. Lab fee. Cross listed with EDPX 4450. Prerequisite: EDPX 2100.

**EDPX 3460 Visual Programming II (4 Credits)**

This class uses advanced visual programming concepts (as provided by Max/MSP and Jitter) to explore visualization and sonification techniques in an artistic context. Areas of exploration include OpenGL modeling and animation, virtual physics emulation, audio synthesis techniques, and external data manipulation. Students use these concepts to create art installation and performance projects. Lab fee. Cross listed with EDPX 4460. Prerequisite: EDPX 3450 or permission of the instructor.

**EDPX 3490 Expanded Cinema (4 Credits)**

This course introduces several forms of expanded cinema, such as video remixes and mashups; live cinema and audiovisual performance; VJing; sonic visualization; visual music; and ambient video. The class extends the student's multitrack video and audio mixing skills to an emphasis on both performative and generative approaches to audiovisual media. It introduces software and hardware sets including VJ tools and visual programming for generating as well as manipulating video files and real-time source streams. Lab fee. Cross listed with EDPX 4490. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3500 Sonic Arts (4 Credits)**

This class introduces the tools and techniques of the sonic arts, including field recording; sampling and synthesis; sound editing and effects processing; and mixing. Students survey a variety of sonic arts, historical and contemporary, to understand techniques and strategies for developing and distributing sonic artifacts. Lab fee. Cross listed with EDPX 4500. Prerequisite: EDPX 2400 or permission of the instructor.

**EDPX 3600 3D Modeling (4 Credits)**

This course serves as an introduction to 3D modeling, texturing, and lighting on the computer. Students complete a series of projects in which the processes of preparing and producing a 3D piece are explored. Various strategies and techniques for creating detailed models to be used in animation and games are examined. Additional attention is spent on virtual camera techniques as well as the use of composting in creating final pieces. Current trends in the field are addressed through the analysis and discussion of current and historical examples. Lab fee. Cross listed with EDPX 4600, MFJS 3600. Prerequisite: EDPX 2000 or permission of the instructor.

**EDPX 3610 3D Animation (4 Credits)**

This course examines animation within virtual 3D environments. Starting with basic concepts, the course develops timing and spacing principles in animation to support good mechanics. They also serve as the basis for the more advanced principles in character animation as the class progresses. Lab fee. Cross listed with EDPX 4610. Prerequisite: EDPX 3600 or permission of the instructor.

**EDPX 3620 3D Spaces (4 Credits)**

An exploration of 3D digital space and the possibilities found in games, narratives and visualizations in these spaces. A real-time engine is used by students to examine the opportunities of virtual 3D worlds. Lab fee. Prerequisite: EDPX 3600 or permission of the instructor.

**EDPX 3700 Topics in Emergent Digital Culture (4 Credits)**

This course provides an in-depth exploration of the emergent digital practice of a particular culture and a unique area of advanced study (for example, art and science studies; activism; youth culture; critical game studies; the philosophy of technology; or social networking). Students learn the social/historical context of the particular culture and observe and document the interplay between cultural practices and particular technologies. This course may be repeated. Prerequisite: varies with topic.

**EDPX 3701 Topics in Emergent Digital Making (1-4 Credits)**

Topics in Emergent Digital Making.

**EDPX 3730 21st Century Digital Art (4 Credits)**

An exploration of Digital Art and surrounding culture from the last 15 years. Topics will include machinima, demoscenes, MMO performances, interactive installations, VR, animation, video shorts, and much more. Students will actively search for, share and critically review much of the creative work for the class.

**EDPX 3740 Performance Cultures (4 Credits)**

This course explores the history and current state of technology and performance. Topics covered include expanded cinema, live cinema, VJing, performance art, and the intersections of audiovisual media and technologies with dance, theater, and more. This course incorporates reading and discussion of critical texts and documentation of theory, process and practices, and the class includes screening and discussion of examples of both historical and emerging forms of media-enriched performance. For output, students produce written media on a variety of performance-related issues, artifacts, and practitioners, culminating in a written document or interactive publication. Lab fee. Prerequisites: EDPX 2200 and EDPX 2400, or permission of the instructor.

**EDPX 3750 Sound Cultures (4 Credits)**

This course explores the sonic turn of emergence in contemporary digital culture. New sound technologies and practices, along with the development of interdisciplinary sound studies, have made avant-garde composition, sound art, film soundtracks, electronic music, turntablism, jazz, and alternative as well as popular musical forms equally essential zones in which we attune to changing technocultural conditions. To situate the course's emphasis on contemporary sonic experience and auditory ways of being in the world, an historical portion of the class establishes the ways in which new sound cultures have appeared since WWII to transform how musicians, artists, scholars, and listeners experience and understand sound. The class facilitates experiences ranging from the pole of auditory realism to that of sonic speculation and futurism. Students will develop a sonic literacy that includes: listening as a creative act; understanding how to work with diverse sonic materials; and appreciating the critical voice as a creative and cultural imperative. Prerequisites: EDPX 2400.

**EDPX 3770 Cybercultures: The Social Science of Virtual Spaces (4 Credits)**

This course encompasses a variety of lenses through which to view, evaluate and critique ideas of 'community' and communities in cyberspace (cyberculture). The course covers such issues as identity and race in cyberspace (including 'identity and racial tourism'); communication technologies and social control; digital censorship; and utopian and dystopian representations of digital technology. The course also engages with social theories involving issues of technological determinism and the popular representation of technology. It explores the views of a diverse set of critics to ask whether digital things are 'good' for you and your communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with EDPX 4770.

**EDPX 3772 Cybercultures: Art, Technology, and the Extended Body (4 Credits)**

This course explores the extensions of the body made possible by technology, with a particular focus on how artists have used both analog and digital technologies to extend the body and to influence their creative practices. Beginning with the camera obscura and ending with examples of contemporary computer-mediated artworks, the course will present for critical analysis a wide range of the various technologies used by artists to shape and alter their creative practice. We will explore the nature of the technological interface with attention to its varied effects on human perception and on creative practice itself. A combination of critical texts, examples of artist works, written assignments and creative projects will foster an in-depth assessment of how technological tools and processes influence, enhance and alter the creative processes and practices used by artists. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**EDPX 3780 Science Fiction: Digital Culture (4 Credits)**

This course explores the intersections of emergent digital practices and cultures with the extrapolative thought experiments, technical speculations, and social criticisms of science fiction. Students will engage with a range of both canonical and contemporary science fiction and speculative fiction media, including short stories and theory, film and television, and other expanded media such as visual art, audio, graphic novels, and games. Students will critically and creatively explore conceptual approaches such as world-building, speculative technologies, digital aesthetics, and much more. [This class fulfills the EDP Cultures requirement.].

**EDPX 3800 Topics in Digital Making (4 Credits)**

This course provides an in-depth exploration of the emergent digital practices of a technology or method for making (for example, wearables; interactive projections; augmented reality; immersive multi-channel soundscapes). Students learn the social/historical context of the particular method and consider the role and function their creations serve when it becomes public. This course may be repeated. Lab fee. Prerequisite: varies with topic.

**EDPX 3960 BFA Capstone (4 Credits)**

This course is required for all BFA students prior to taking the undergraduate capstone course. Students work independently with a faculty member to research and develop their capstone project in detail addressing ideas, making, venues, distribution, and other aspects of professional practice. Lab fee. Senior standing required. Must be a BFA student.

**EDPX 3980 Internship (1-8 Credits)**

Instructor approval required.

**EDPX 3990 Capstone (4 Credits)**

This course provides time and guidance for individual students to develop complex works that are a culmination of their studies. All projects must synthesize the principles of experience, emergence, and engagement taught throughout the program. All projects require both writing and making, the balance of these two to be determined by the nature of the work. Lab fee. Senior standing required.

**EDPX 3991 Independent Study (1-8 Credits)**

Independent Study form required.

## Engineering (ENGR)

**ENGR 1511 Engineering Connections (1 Credit)**

This course is designed to help engineering students bridge the gap from high school to a college environment in a very challenging major. Topics and activities may include academic success strategies; interviewing engineering alumni; the ethics of the profession; visits to industry sites; seminars by industry and academic experts; establishing the relationships between math, science, and engineering courses with design projects; critical and creative thinking activities; tours of the research labs of the engineering professors; disseminating information on the dual degree programs, the MBA programs, the honor code, and engineering program structures; and readings from and discussions about articles from professional publications. Membership in an engineering professional society is encouraged.

**ENGR 1572 Applied MATLAB Programming (3 Credits)**

The MATLAB programming environment is used to introduce engineering applications programming. It includes high performance numerical computation and visualization. Programming topics include an overview of an interactive programming environment, generation of m-files, variables and data types, arithmetic operators, mathematical functions, symbolic mathematics, graphic generation, use of programs in application specific toolboxes, embedding and calling C programs in m-files, file input/output, and commenting. Programming is oriented toward engineering problem solving. Prerequisites: COMP 1571 or COMP 1671 or COMP 1351, and MATH 1952.

**ENGR 1611 Introduction to Engineering Design (4 Credits)**

Introduction to concepts and practice in computer, electrical and mechanical engineering including engineering ethics. Engineering problem-solving as it applies to engineering analysis, synthesis and design. Students practice structured teamwork and program management skills in the context of projects. Emphasis on computer tools with immediate application to engineering practice.

**ENGR 1622 Introduction to Mechatronic Systems I (4 Credits)**

Introduction to elementary concepts and practices in mechatronic systems engineering, in particular electrical engineering concepts including current and voltage and basic electrical circuit analysis, interfacing electrical circuits with mechanical systems, and assembly and testing of mechatronics subsystems. Students are required to complete simple projects including mechanical and electrical components during which they practice teamwork while gaining skills in electrical and mechatronic systems troubleshooting. Introduction to Multisim circuit analysis software and Mathcad are among other topics covered in this course.

**ENGR 1632 Introduction to Mechatronic Systems II (4 Credits)**

Study of fundamentals of computer-based systems and electromechanical systems controlled by microprocessors or microcontrollers. Introduction to digital logic and electronics. Introduction to LabView and use of LabView to build and evaluate circuits and simple electromechanical systems. Use of logic circuits to build analog to digital converters. Program microcontrollers. Study of autonomous vehicles as mechatronic systems and the ability to control them (small cars, robots, helicopters, quadrotors, etc.). Course requirements include a report with detailed analysis of the vehicle control system, flow charts, and program documentation.

**ENGR 1700 Machine Shop Practice (1 Credit)**

Introduction to concepts and practice in basic machine tool work (i.e. mill, lathe, welding etc.). The course provides the necessary information for majors and non-majors to gain access to the DU Engineering Machine Shop. Class size is limited to 5 students per quarter. Enrollment priority will be given to engineering majors.

**ENGR 1911 Introduction to CAD (2 Credits)**

This course is intended for transfer students who have had an introduction to engineering, but who need to learn certain techniques and software typically dealt with in ENGR 1611 including engineering ethics. Instructor Permission Required.

**ENGR 1921 Introduction in Engineering II (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1622, Introduction to Mechatronic Systems I, but who need to learn certain techniques and software (Mathcad and Multisim) typically dealt with in ENGR 1622. Prerequisite: Permission of the instructor.

**ENGR 1931 Introduction to Engineering III (1 Credit)**

This course is intended mainly for transfer students who have had an introduction to engineering with topics similar to those in ENGR 1632, Introduction to Mechatronic Systems II, but who need to learn certain techniques and software (LabView) typically dealt with in ENGR 1632. Prerequisite: Permission of the instructor.

**ENGR 2610 Engineering Integration I (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisites: Junior standing in the appropriate engineering discipline and ENME 3511 for MME majors or ENCE 3210 and ENEE 2211 for ECE majors (the latter three can be taken concurrently).

**ENGR 2620 Engineering Integration II (3 Credits)**

Interdisciplinary course combining topics from computer, electrical and mechanical engineering including engineering ethics, with emphasis on laboratory experience and the design, analysis and testing of interdisciplinary systems. Manufacture of mechanical systems and/or circuit boards. Team project work on interdisciplinary "design-and-build" projects. Prerequisite: ENGR 2610.

**ENGR 2905 Engineering Cooperative Education (0-12 Credits)**

For students on full-time cooperative educational employment. This course may be taken up to four times. Any and all credits will not count toward your degree and you will receive a grade of NC (no credit) for all enrollments. You will choose between a residential and non-residential section.

**ENGR 2910 Engineering Economics and Ethics (3 Credits)**

This course focuses on the practical applications of economics to engineering focusing on the requirements for both the FE and PE exams. It explains concepts in accounting and finance and applies them to both engineering and personal situations. Topics that are discussed include: economic decision making, interest, inflation, depreciation, income taxes, and rate of return. In addition, the engineer's role in society, including global, economic, environmental, societal, and ethical issues will be discussed.

**ENGR 2950 Engineering Assessment I (0 Credits)**

Examination covering basic mathematics, science and sophomore-level engineering topics. Co-Requisite: MATH 2080; Prerequisite: ENME 2541 AND ENCE 2101 AND ENEE 2012 AND ENGR 1572.

**ENGR 2951 Engineering Assessment II (0 Credits)**

Students perform a lifelong learning experience and assessment-related tasks, e.g. a survey and exit interview. The course also includes career and professional development, as well as information on the Fundamentals of Engineering (FE) exam. Engineering students are encouraged, but not required to complete the FE exam. This course should be taken in the last year of attendance. Prerequisites: ENGR 3323.

**ENGR 3100 Instrumentation and Data Acquisition (4 Credits)**

This course examines different instrumentation techniques and describes how different measurement instruments work. Measurement devices include length, speed, acceleration, force, torque, pressure, sound, flow, temperature, and advanced systems. This course also examines the acquisition, processing, transmission and manipulation of data. Cross listed with ENGR 4100. Prerequisites: PHYS 1213 or PHYS 1214.

**ENGR 3200 Introduction to Nanotechnology (4 Credits)**

In this highly interdisciplinary series of lectures spanning across engineering, physics, chemistry and Biology, an introduction to the subject of nanotechnology is provided. The most important recent accomplishments so far in the application of nanotechnology in several disciplines are discussed. Then a brief overview of the most important instrumentation systems used by nanotechnologists is provided. The nature of nanoparticles, nanoparticle composites, carbon nanostructures, including carbon nanotubes and their composites is subsequently discussed. The course also deals with nanopolymers, nanobiological systems, and nanoelectronic materials and devices. The issues of modeling of nanomaterials and nanostructures are also covered in this class. Multiscale modeling based on finite element simulations, Monte Carlo methods, molecular dynamics and quantum mechanics calculations is briefly addressed. Most importantly, students should obtain appreciation of developments in nanotechnology outside their present area of expertise. Cross listed with ENGR 4200. Prerequisite: ENME 2410.

**ENGR 3313 Engineering Design Project I (2 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite: ENGR 2620 and ((ENME 3511 and ENME 2671) or (ENCE 3231)) and senior standing in engineering.

**ENGR 3323 Engineering Design Project II (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3313.

**ENGR 3333 Engineering Design Project III (3 Credits)**

Planning, development and execution of an engineering design project. The project may be interdisciplinary, involving aspects of computer, electrical and mechanical engineering. Projects have economic, ethical, social and other constraints, as appropriate. Design activities include: 1) preparation and presentation of proposals in response to requests-for-proposals from "customers," including problem description, quantitative and qualitative criteria for success, alternate designs and project plans; 2) generation and analysis of alternate designs, and choice of best design; 3) formulation of test procedures to demonstrate that the design chosen meets the criteria for success, and testing of the completed project where feasible; 4) reporting on the design and testing. Prerequisite ENGR 3323.

**ENGR 3340 Product Development and Market Feasibility (4 Credits)**

In this course, students gain knowledge of designing products for market success by developing a product and optimizing its design for specific mass manufacturing technologies. Students gain experience through the design development process including market feasibility research, human-centered design, brainstorming and ideating new concepts, refinement through design iteration, and constructing alpha and beta prototypes that are designed with mass manufacturing considerations. Projects are based upon real world new product development principles. Students learn and practice the fundamentals of design thinking, design process, and entrepreneurship.

**ENGR 3450 Biosensing Technology (4 Credits)**

Biosensors are defined as analytical devices incorporating a biological material, a biologically derived material or a biomimic associated with or integrated within a physicochemical transducer or transducing microsystem, which may be optical, electrochemical, thermometric, piezoelectric, magnetic or micromechanical. This course provides instruction in the basic science and engineering concepts required to understand the design and application of biosensors. This module serves as an introduction to some of the biosensors and measurement techniques.

**ENGR 3455 Fluorescence and Its Applications in Biomedical Sensors (4 Credits)**

The course introduces the principles of fluorescence and its applications in the real world. It covers various topics including fluorophores (dye, fluorescent proteins, quantum dots, etc.), nanomaterials and nanostructures, design of biomedical sensors, point-of-care systems, and wearable devices. Cross listed with ENGR 4455.

**ENGR 3510 Renewable and Efficient Power and Energy Systems (4 Credits)**

This course introduces the current and future sustainable electrical power systems. Fundamentals of renewable energy sources and storage systems are discussed. Interfaces of the new sources to the utility grid are covered. Prerequisite: ENEE 2012.

**ENGR 3520 Introduction to Power Electronics (4 Credits)**

This covers fundamentals of power electronics. We discuss various switching converters topologies. Basic knowledge of Efficiency and small-signal modeling for the DC-DC switching converters is covered. Furthermore, magnetic and filter design are introduced. Prerequisites: ENEE 2211 and ENGR 3722.

**ENGR 3530 Introduction to Power and Energy Conversion Systems (3 Credits)**

Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, and electric machinery. Cross listed with ENGR 4530. Prerequisite: ENEE 2022.

**ENGR 3535 Electric Power Engineering Laboratory (1 Credit)**

In this laboratory, the magnetic circuits, single phase transformers, power quality and harmonics synchronous machines, Induction machines and DC machines are studied and tested in a real physical setup. Prerequisite: ENGR 3530.

**ENGR 3540 Electric Power Systems (4 Credits)**

This course covers methods of calculation of a comprehensive idea on the various aspects of power system problems and algorithms for solving these problems. Prerequisite: ENGR 3530.

**ENGR 3545 Electric Power Economy (3 Credits)**

This course covers economy aspects of electric power industry and the implications for power and energy engineering in the market environment. Cross listed with ENGR 4545. Prerequisite: ENGR 3530.

**ENGR 3590 Power System Protection (3 Credits)**

This course covers methods of calculation of fault currents under different types of faults; circuit breakers, current transformers, potential transformers; basic principles of various types of relays; applications of relays in the protection of generator, transformer, line, and bus, etc. Prerequisite: ENEE 2022, ENGR 3530 or equivalent. 3.0 hours. Cross listed with ENGR 4590.

**ENGR 3611 Engineering Mathematics (3 Credits)**

Applied mathematics for engineers. Generalized Fourier analysis, complex variables, vector calculus, introduction to partial differential equations, and linear algebra. Prerequisites: MATH 2070, MATH 2080.

**ENGR 3621 Advanced Engineering Mathematics (4 Credits)**

Applied mathematics for engineers. Topics include vector spaces, normed vector spaces, inner product spaces, linear transformations, finite-dimensional linear transformations, linear operators, finite-dimensional linear operators, linear differential systems, linear difference systems, orthogonal transformations, amplitude estimation, fundamentals of real and functional analysis, and introduction to partial differential equations, and applications to engineering systems.

**ENGR 3630 Finite Element Methods (4 Credits)**

Introduction to the use of finite element methods in one or two dimensions with applications to solid and fluid mechanics, heat transfer and electromagnetic fields; projects in one or more of the above areas. Prerequisites: ENME 2541 AND ENGR 1572.

**ENGR 3650 Probability and Statistics for Engineers (4 Credits)**

This course covers quantitative analysis of uncertainty and decision analysis in engineering. It covers the fundamentals of sample space, probability, random variables (discrete and continuous), joint and marginal distributions, random sampling and point estimation of parameters. It also covers statistical intervals, hypotheses testing and simple linear regression. The course includes applications appropriate to the discipline. Prerequisite: MATH 1953.

**ENGR 3721 Controls (3,4 Credits)**

Modeling, analysis and design of linear feedback control systems using Laplace transform methods. Techniques and methods used in linear mathematical models of mechanical, electrical, thermal and fluid systems are covered. Feedback control system models, design methods and performance criteria in both time and frequency domains. A linear feedback control system design project is required. Prerequisites: ENEE 2022, ENGR 3611 or permission of instructor.

**ENGR 3722 Control Systems Laboratory (1 Credit)**

This laboratory course serves as supplement to ENGR 3721. It aims at providing "hands on" experience to students. It includes experiments on inverted pendulum, gyroscopes, motor control, feedback controller design, time-domain and frequency domain. Corequisite: ENGR 3721.

**ENGR 3723 Digital Control (4 Credits)**

The course focuses on modeling, analysis, and design of digital control systems. Topics include: z-Transform and difference equations; sampling and aliasing; Zero-Order Hold (ZOH); A/D and D/A conversions; pulse transfer function representation; time and frequency domain representations; input/output analysis; analysis of sample data systems; stability; design of discrete-time controllers; introduction to state-space representation. Cross listed with ENGR 4723. Prerequisites: ENGR 3721 and ENGR 3722.

**ENGR 3730 Robotics (3 Credits)**

Introduction to the analysis, design, modeling and application of robotic manipulators. Review of the mathematical preliminaries required to support robot theory. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning, and kinetics. Cross listed with ENGR 4730. Prerequisites: ENME 2520 and MATH 2060 or MATH 2200 or permission of instructor.

**ENGR 3731 Robotics Lab (1 Credit)**

Laboratory that complements the analysis, design, modeling and application of robotic manipulators. Implementation of the mathematical structures required to support robot operation. Topics include forward kinematics, inverse kinematics, motion kinematics, trajectory control and planning and kinetics. Applications include programming and task planning of a manufacturing robot manipulator. Corequisite: ENGR 3730 or permission of instructor.

**ENGR 3735 Linear Systems (4 Credits)**

This course focuses on linear system theory in time domain. It emphasizes linear and matrix algebra, numerical matrix algebra and computational issues in solving systems of linear algebraic equations, singular value decomposition, eigenvalue-eigenvector and least-squares problems, linear spaces and linear operator theory. It studies modeling and linearization of multi-input/multi-output dynamic physical systems, state-variable and transfer function matrices, analytical and numerical solutions of systems of differential and difference equations, structural properties of linear dynamic physical systems, including controllability, observability and stability. It covers canonical realizations, linear state-variable feedback controller and asymptotic observer design, and the Kalman filter. Cross listed with ENGR 4735. Prerequisites: ENGR 3611, ENGR 3721, and ENGR 3722, or permission of the instructor.

**ENGR 3800 Topics (ENGR) (1-4 Credits)**

Special topics in engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENGR 3900 Engineering Internship (0-4 Credits)**

Students in engineering may receive elective credit for engineering work performed for engineering employers with the approval of the chair or associate chair of the department. At the end of the term, a student report on the work is required, and a recommendation will be required from the employer before a grade is assigned. Junior, senior, or graduate status in engineering is normally required. May not be used to satisfy technical requirements. May be taken more than one for a maximum of 6 quarter hours. Prerequisite: permission of instructor.

**ENGR 3991 Independent Study (1-5 Credits)**

Topics in engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENGR 3995 Independent Research (1-10 Credits)**

## Engineering, Bio (ENBI)

**ENBI 3010 Intro to Biomedical Eng (4 Credits)**

An introduction to biomedical engineering, this course will serve as a survey of the field of study. During the course students will learn to identify a breadth of biomedical engineering problems and also learn about the technical challenges and opportunities that biomedical engineering brings to the life and medical sciences. Topics may include biomechanics, tissue engineering, medical imaging, bioinstrumentation, and medical device design.

**ENBI 3500 Biofluids (4 Credits)**

The application of fluid dynamics theory and design to problems within the biomedical community. Specific topics covered include the mechanics of inhaled therapeutic aerosols, basic theory of circulation and blood flow, foundations in biotechnology and bioprocessing, and controlled drug delivery. Cross listed with ENBI 4500. Prerequisites: ENME 2661.

**ENBI 3510 Biomechanics (4 Credits)**

An introduction to the mechanical behavior of biological tissues and systems. Specific topics covered include analysis of the human musculoskeletal system as sensors, levers, and actuators; joint articulations and their mechanical equivalents; kinematic and kinetic analysis of human motion; introduction to modeling human body segments and active muscle loading for analysis of dynamic activities; mechanical properties of hard and soft tissues; mechanical and biological consideration for repair and replacement of soft and hard tissue and joints; orthopedic implants. Cross listed with ENBI 4510. Prerequisites: ENME 2410, ENME 2520, and ENME 2541.

**ENBI 3800 Topics in Bioengineering (1-4 Credits)**

Special topics in bioengineering as announced. May be taken more than once. Prerequisite: varies with offering.

## Engineering, Computer (ENCE)

**ENCE 2101 Digital Design (3 Credits)**

Basic logic concepts. Boolean algebra, truth tables and logic diagrams. Karnaugh maps; programmable devices including ROM's, PLA's and PAL's; data selectors and multiplexors; flip-flops, and memory design of sequential logic circuits. State diagrams, counters, latches and registers; realization of sequential and arbitrary counters; monostable multivibrators. Course includes engineering ethics. Laboratory.

**ENCE 3100 Advanced Digital System Design (4 Credits)**

Design of logic machines. Finite state machines, gate array designs, ALU and control unit designs, microprogrammed systems. Hardware design of digital circuits using SSI and MSI chips. Introduction to probability and statistics. Application of probability and stochastic processes for cache and paging performance. Laboratories incorporate specification, top-down design, modeling, implementation and testing of actual digital design systems hardware. Simulation of circuits using VHDL before actual hardware implementation. Laboratory. Cross listed with ENCE 4110. Prerequisite: ENCE 2101.

**ENCE 3210 Microprocessor Systems I (4 Credits)**

Introduction to microprocessors and to the design and operation of computer systems. A study of the microprocessor and its basic support components. Analysis of CPU architectures of modern computers. Assembly language programming. Use of an assembler and other development tools for programming and developing microprocessor-based systems. Laboratory. Cross listed with ENCE 4210. Prerequisite: ENCE 2101.

**ENCE 3231 Embedded Systems Programming (4 Credits)**

Design, construction and testing of microprocessor systems. Hardware limitations of the single-chip system. Includes micro-controllers, programming for small systems, interfacing, communications, validating hardware and software, microprogramming of controller chips, design methods and testing of embedded systems. Prerequisite: ENCE 3210.

**ENCE 3260 Python for Engineers (3 Credits)**

This course introduces python programming to students and gives them programming and mathematical tools that will be useful in different areas of engineering. The course is divided into 2 main parts. Part 1 (Introduction to Python Programming), covers the fundamental concepts of python programming, covering topics from variables and data structures, functions, algorithm complexity, representation of numbers and basics of parallel computing. Part 2 (Introduction to Numerical Methods), gives an overview of a variety of numerical methods that are useful for engineers. The course reviews the basics of linear algebra, discusses the importance of eigenvalues and eigenvectors, regressions and concepts of "discrete Fourier transform" and "fast Fourier transform".

**ENCE 3321 Network Design (4 Credits)**

Introduction to network components. Layering of network architecture. Analysis of Local Area Network (LAN) concepts and architecture based on IEEE standards. Design principles including switching and multiplexing techniques, physical link, signal propagation, synchronization, framing and error control. Application of probability and statistics in error detecting and control. Ethernet, Token-ring, FDDI (Fiber Distributed Data Interface), ATM (Asynchronous Transfer Mode), ISDN (Integrated Service Data Networks). Prerequisite: ENEE 3111, ENCE 2101 or permission of instructor.

**ENCE 3501 VLSI Design (3 Credits)**

Design of Very Large Scale Integration systems. Examination of layout and simulation of digital VLSI circuits using a comprehensive set of CAD tools in a laboratory setting. Studies of layouts of CMOS combinational and sequential circuits using automatic layout generators. Fundamental structures of the layout of registers, adders, decoders, ROM, PLA's, counters, RAM and ALU. Application of statistics and probability to chip performance. CAD tools allow logic verification and timing simulation of the circuits designed. Cross listed with ENCE 4501. Prerequisite: ENCE 3231.

**ENCE 3620 Computer Vision (4 Credits)**

This course is an introduction to the basic concepts in image processing and computer vision. First, an introduction to low-level image analysis methods, including radiometry and geometric image formation, edge detection, feature detection, and image segmentation are presented. Then, geometric-based image transformations (e.g., image warping and morphing) for image synthesis will be presented in the course. Furthermore, methods for reconstructing three-dimensional scenes including camera calibration, Epipolar geometry, and stereo feature matching are introduced. Other important topics include optical flow, shape from shading, and three-dimensional object recognition. In conclusion, students learn and practice image processing and computer vision techniques that can be used in other areas such as robotics, pattern recognition, and sensor networks. Cross listed with ENCE 4620. Prerequisites: ENGR 3611 or ENGR 3621 AND ENGR 1572 or ENGR 3650 or ENCE 3260 or permission of instructor.

**ENCE 3631 Machine Learning (4 Credits)**

This class covers topics in machine learning including but not limited to Bayesian decision theory, supervised learning, unsupervised learning and clustering, linear discriminant functions, deep learning, neural networks, linear classification techniques, manifold learning, bag of words, and Support Vector Machines. Cross listed with ENCE-4631.

**ENCE 3830 Topics in Computer Engineering (1-5 Credits)**

Special topics in computer engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENCE 3991 Independent Study (1-5 Credits)**

Topics in computer engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENCE 3995 Independent Research (1-10 Credits)**

## Engineering, Electrical (ENEE)

**ENEE 2012 Circuits I and Laboratory (4 Credits)**

An introduction to electrical circuit analysis, design and evaluation. Emphasis on definitions of basic variables, passive circuit components and the ideal operational amplifier. DC analysis of circuits and circuit theorems are stressed. AC signals are introduced. Computer analysis software integrated throughout the course. Cross-listed with PHYS 2011. Prerequisites: PHYS 1213 or PHYS 1214, MATH 1953.

**ENEE 2022 Circuits II (4 Credits)**

AC analysis of linear circuits to include circuit theorems via classical and transform techniques. Emphasis is placed on the Laplace transform, including use of pole-zero and Bode diagrams to analyze and design circuits, including multiple filters (single pole cascade, Butterworth, Chebyshev), and step response circuits. Phasor applications to sinusoidal steady state analysis and AC power. Computer analysis software is used as an aid to circuit analysis. Laboratory program practicing time and frequency domain analysis and design techniques on step response and filter problems. Applications to instrumentation and circuits. Prerequisites: ENEE 2012, MATH 2070.

**ENEE 2211 Electronics (4 Credits)**

Circuit behavior of semiconductor devices. Bipolar and field-effect transistors and their models; basic physical explanation of the functioning of these devices; large- and small-signal analysis of practical circuits; electronic design using both hand and computer methods of calculation and design; biasing methods for amplifier circuits; power supplies and current-source circuits. Design laboratory. Prerequisites: ENEE 2022.

**ENEE 2223 Advanced Electronics (4 Credits)**

High-frequency transistor models and determination of parameters; Laplace and Fourier analyses of common amplifier circuits; design and analysis of broad-band amplifiers and multistage amplifiers. Basis feedback topologies; Nyquist, root-locus and Bode plot investigations of stability; introduction to amplifier noise; active filter design; sinusoidal oscillators. Prerequisite: ENEE 2211.

**ENEE 2611 Engineering Electromagnetics (4 Credits)**

The study of Maxwell's equations and their experimental and theoretical foundations. Topics include Static electromagnetic fields, time-varying electromagnetic fields, wave propagation, transmission lines, and antennas. Prerequisites: PHYS 1213 or PHYS 1214. Corequisite: ENGR 3611 or ENGR 3621.

**ENEE 3011 Physical Electronics (4 Credits)**

The basic physical concepts of electronics, electrons and holes in semiconductors, transport and optical processes. Concentration on device concepts, including material synthesis and device processing, P-N junction diodes, junctions with other materials, bipolar transistors, field effect transistors (JFET, MESFET, MOSFET) and optoelectronic effect transistors (JFET, MESFET, MOSFET) and optoelectronic devices (lasers, detectors). Prerequisites: CHEM 1010 or CHEM 1610, PHYS 1213 or PHYS 1214 or permission of instructor.

**ENEE 3030 Optoelectronics (4 Credits)**

The active and passive optical elements. Includes principles of light, optical sources (LED, LASER, Fiber Laser), optical fibers, photodetectors (APD, PIN, MSM) and practical optical transmitter and receivers. Laboratory. Cross listed with ENEE 4030. Prerequisite: ENEE 3011 or ENEE 2211 or permission of instructor.

**ENEE 3035 Photonics (4 Credits)**

Theory and techniques for the application of the optical electromagnetic spectrum from infrared to ultraviolet to engineering problems in communications, instrumentation and measurement. May include lasers, optical signal processing, holography, nonlinear optics, optical fiber communications, optical behavior of semiconductors, and similar topics in modern optics, depending on the interests and requirements of the students. Cross-listed with ENEE 4800. Prerequisite: ENEE 2611 or instructor's permission.

**ENEE 3111 Signals & Systems (4 Credits)**

Introduces continuous time and discrete time linear system analysis, Fourier series, Fourier transforms and Laplace transforms. Specific engineering tools for discrete time linear system analysis include discrete time convolution, Z-transform techniques, discrete Fourier transform and fast Fourier transform (DFT/FFT), and the design and analysis of analog and digital filters for real-world signal processing applications. Graduate students may have additional class requirements. Prerequisites: ENEE 2022, MATH 2070.

**ENEE 3130 Principles of Communication Systems (3 Credits)**

Introduction to the theory and analysis of communication systems. Emphasis on analog systems; application of probability and statistics, modulations and demodulations; noise and signal-to-noise ratio analysis; the measure of information, channel capacity, coding and design factors. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

**ENEE 3141 Digital Communications (3 Credits)**

Introductory course on modern digital communication systems. The basic communication system theory, probability and random processes, baseband digital data transmission, coherent and non-coherent digital modulation techniques and analysis of bit error probability. Bandwidth efficiency and transmission of digital data through band-limited channels. Prerequisites: ENEE 3111, ENGR 3611 or permission of instructor.

**ENEE 3620 Optical Fiber Communications (4 Credits)**

A comprehensive treatment of the theory and behavior of basic constituents, such as optical fibers, light sources, photodetectors, connecting and coupling devices, and optical amplifiers. The basic design principles of digital and analog optical fiber transmission links. The operating principles of wavelength-division multiplexing (WDM) and the components needed for its realization. Descriptions of the architectures and performance characteristics of complex optical networks for connecting users with a wide range of transmission needs (SONET/SDH). Discussions of advanced optical communication techniques, such as soliton transmission, optical code-division multiplexing (optical CDMA) and ultra-fast optical time-division multiplexing (OTDM). Laboratory. Cross listed with ENEE 4620. Prerequisite: ENEE 3030 or permission of instructor.

**ENEE 3641 Introduction to Electromagnetic Compatibility (4 Credits)**

The study of the design of electronic systems so that they operate compatibly with other electronic systems and also comply with various governmental regulations on radiated and conducted emissions. Topics may include Electromagnetic Compatibility (EMC) requirements for electronic systems; non-ideal behavior of components; radiated emissions and susceptibility; conducted emissions and susceptibility; shielding and system design for EMC. Cross listed with ENEE 4640. Prerequisites: ENEE 2611 and ENEE 2223.

**ENEE 3670 Introduction to Digital Signal Processing (4 Credits)**

Introduction to the theory and applications of Digital Signal Processing. Special attention is paid to the fast Fourier transform and convolution and to the design and implementation of both FIR and IIR digital filters. Prerequisite: ENEE 3111.

**ENEE 3810 Topics Electrical Engineering (1-5 Credits)**

Various topics in electrical engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENEE 3991 Independent Study (1-5 Credits)**

Topics in electrical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

## Engineering, Mechanical (ENME)

**ENME 2410 Materials Science I (4 Credits)**

Atomic structure, bonding and crystal structures in solids. Diffusion and crystal defects. Thermodynamics and phase equilibria in one-, two- and three-component systems, binary phase diagrams. Kinetics and phase transformations. Specific microstructure and mechanical properties of metals, glasses, ceramics, polymers and composites. Electrical conduction: energy levels and bands, charge carriers and insulators. Semiconductors of intrinsic and extrinsic types. Laboratory projects/demonstrations. Prerequisites: PHYS 1212 and CHEM 1010 and MATH 1952.

**ENME 2421 Materials Science II (3 Credits)**

Atomic structure, bonding and crystal structures in solids. Diffusion and crystal defects. Thermodynamics and phase equilibria in one-, two- and three-component systems, binary phase diagrams. Kinetics and phase transformations. Specific microstructure and mechanical properties of metals, glasses, ceramics, polymers and composites. Electrical conduction: energy levels and bands, charge carriers and insulators. Semiconductors of intrinsic and extrinsic types. Laboratory projects/demonstrations. Prerequisites: ENME 2410.

**ENME 2510 Statics (4 Credits)**

Study of static force systems. Topics include resolution and composition of forces and moments, equilibrium of two-dimensional and three-dimensional force systems, shear and moments in beams, friction, and moments of inertia. Includes a laboratory component where students will engage in hands-on projects that apply loading equilibrium, design of structures, and stress/strain. Prerequisites: MATH 1951 AND PHYS 1211.

**ENME 2520 Dynamics I with Lab (4 Credits)**

Particles Kinematics, Reference Frames, Coordinate Systems, Newton's Laws, Energy and Momentum, Multiparticle Systems, Collisions, Variable Mass Systems. These topics are addressed through analytical analysis, numerical simulation using Matlab, and experimental data collection. Cross listed with PHYS 2520. Corequisite: MATH 2080; Prerequisite: ENME 2510 AND MATH 2070.

**ENME 2530 Dynamics II (3 Credits)**

Rotating reference frames, rigid body kinematics, rigid body kinetics, Euler's Laws, inertia, energy and momentum, and three-dimensional motion. Cross listed with PHYS 2530. Prerequisites: ENME 2520.

**ENME 2540 System Dynamics (3 Credits)**

This course covers modeling, analysis, and control of single and multiple degree-of freedom dynamical systems, including mechanical, electrical, thermal, fluid systems and their combinations (mixed systems). Basic concepts in system theory, such as state variables and stability concepts, will be introduced as well as bond graph notation and approach. Prerequisites: ENME 2530, ENME 2661, ENGR 1572, and ENEE 2012.

**ENME 2541 Mechanics of Materials (3 Credits)**

Normal and shear stress and strain; elasticity, mechanical properties of materials, principal stresses; torsion, beams, deflection of beams under loads, methods of superposition, failure theory, columns. Prerequisite: ENME 2510.

**ENME 2651 Fluid Dynamics I (3 Credits)**

Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2510 and MATH 2070.

**ENME 2661 Fluid Dynamics II/Heat Transfer I (3 Credits)**

Course series provides students with the basic skills levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2651.

**ENME 2671 Heat Transfer II with Lab (4 Credits)**

Course series provides students with the basic skill levels required to solve fluid-mechanics and heat transfer problems. Topics include hydrostatics, dimensional analysis, incompressible and compressible flows, conduction, convection and radiation. Students explore a variety of solution techniques such as control volume, differential analysis, boundary layer analysis, finite differencing and resistance network analogies. Prerequisite: ENME 2661.

**ENME 2710 Engineering Thermodynamics I (3 Credits)**

Properties of a pure substance. Use of tables of properties. First and second laws of thermodynamics for closed and open systems. Work, heat, power and entropy. Engine, power plant and refrigeration cycles. Gas mixtures, thermodynamic relations and chemical reactions. Prerequisite: PHYS 1212.

**ENME 2720 Engineering Thermodynamics II (3 Credits)**

Properties of a pure substance. Use of tables of properties. First and second laws of thermodynamics for closed and open systems. Work, heat, power and entropy. Engine, power plant and refrigeration cycles. Gas mixtures, thermodynamic relations and chemical reactions. Prerequisite: ENME 2710.

**ENME 2810 Mechanical Engineering Lab I (3 Credits)**

Engineering experiments illustrating selected topics in heat transfer, fluid mechanics, solid mechanics, thermodynamics, measurement and control. Use of microcomputers in experimentation and control. This course encourages the development of laboratory experimentation skills, design skills and technical writing skills. Prerequisites: ENME 2540 AND ENME 2671.

**ENME 3320 Computer Aided Design and Analysis (4 Credits)**

Introduction to the use of computer aided design and analysis with applications to solid and fluid mechanics, heat transfer and vibrations; projects in one or more of the above areas. Emphasis on how to use the software to analyze engineering systems. Prerequisites ENME 2541 and ENME 2651.

**ENME 3400 Fatigue (4 Credits)**

A detailed overview of fatigue. Topics include: stress life and strain life approaches, fracture mechanics, constant amplitude and spectrum loading, life prediction, fatigue at notches, microstructural effects, environmentally assisted fatigue, retardation and acceleration, multi-axial fatigue, design against fatigue, and reliability. Cross listed with ENME 4400.

**ENME 3511 Machine Design (3 Credits)**

Application of statics, dynamics, mechanics of materials and manufacturing processes to the design of machine elements and systems. Properties of materials and design criteria. Synthesis and analysis of a machine design project. Prerequisites: ENME 2520 and ENME 2541.

**ENME 3545 Mechanisms (4 Credits)**

Synthesis, analysis and use of mechanisms. Mechanisms studied include cams, gears and planar linkages, with an emphasis on planar linkages. Prerequisites: ENME 2530 and ENGR 1572.

**ENME 3651 Computational Fluid Dynamics (4 Credits)**

This course introduces principles and applications of computational methods in fluid flow and topics chosen from heat transfer, mass transfer or two phase flow. The conservation equations, their discretations and solutions, are presented. Convergence and validity of solutions along with computational efficiency are explored. Students learn to apply these techniques using the latest software packages. Prerequisites: ENME 2671.

**ENME 3661 Mechanical Energy Systems Engineering (4 Credits)**

This course covers energy systems engineering analysis from a mechanical and materials engineering perspective. This course covers energy production from traditional energy systems that use fossil fuel combustion such as internal combustion engines, coal-fired plants, and natural gas turbines, to nuclear energy and renewable energy methods such as wind, solar, hydraulic, and geothermal. Lastly, the course will survey emerging technologies for future (21st century) energy systems. Students should have taken at a minimum Thermodynamics, Dynamics, and Fluid Dynamics courses. Prerequisites: ENME 2720, ENME 2510, ENME 2651.

**ENME 3720 Aerospace Engineering: Atmospheric Flight Dynamics (4 Credits)**

This course provides an introduction to aerospace engineering analysis and design. In the atmospheric domain, the basics of aerodynamics are covered, followed by flight mechanics. The approach is from a practical perspective in which analysis and design are intertwined. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3730 Aerospace Engineering: Space Flight Dynamics (4 Credits)**

This course is focused on the aerospace discipline of space environment and orbital mechanics. The topics in this discipline are discussed in detail and provide aid in designing spacecraft/space missions. Some of the topics covered in this course include space environment, satellite orbits, spacecraft configurations, transfer orbits, and elementary space propulsion. Prerequisites: ENME 2651 and ENME 2720 and ENME 2530.

**ENME 3810 Mechanical Engineering Capstone Laboratory (3 Credits)**

This course is the capstone mechanical engineering laboratory course requiring independent experimental design by student teams. Using experimental equipment available in heat transfer, fluid mechanics, solid mechanics, thermodynamics, and measurement and control, the student team is required to design experiments to solve given problems which will be unique to each team. This course encourages students to develop experimental design and research techniques while continuing to improve skills in fundamental lab notebook keeping, uncertainty analysis in measurements, data acquisition, data analysis, report writing, oral presentations, and laboratory safety and procedures. Prerequisite: ENME 2810.

**ENME 3820 Topics Mechanical Engineering (0-5 Credits)**

Mechanical engineering topics as announced. May be taken more than once. Prerequisite: vary with offering.

**ENME 3991 Independent Study (1-5 Credits)**

Topics in mechanical engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

**ENME 3995 Independent Research (1-10 Credits)**

## Engineering, Mechatronic Syst (ENMT)

**ENMT 3800 Topics (Mechatronics) (1-4 Credits)**

Various topics in mechatronics system engineering as announced. May be taken more than once. Prerequisite: varies with offering.

**ENMT 3991 Independent study (1-5 Credits)**

Topics in mechatronics engineering investigated under faculty supervision. May be taken more than once. Students must obtain and complete an Independent Study form from the Office of the Registrar. Prerequisite: permission of instructor.

## English (ENGL)

**ENGL 1000 Introduction to Creative Writing (4 Credits)**

Basic techniques of fiction and poetry.

**ENGL 1006 Art of Fiction (4 Credits)**

An introduction to the appreciation of fiction as an art form through practice in interpretation and creation.

**ENGL 1007 Art of Poetry (4 Credits)**

An introduction to the appreciation of poetry as an art form through practice in interpretation and creation.

**ENGL 1008 Art of Drama (4 Credits)**

An introduction to the appreciation of drama as an art form through practice in interpretation and creation.

**ENGL 1009 Art of Creative Non-fiction (4 Credits)**

An introduction to the appreciation of creative non-fiction as an art form through practice in interpretation and creation.

**ENGL 1010 Introductory Topics in English (4 Credits)**

Various topics in literary studies approached at the introductory level.

**ENGL 1110 Literary Inquiry (4 Credits)**

Literary Inquiry introduces students to the variety of ways that poetry, fiction, and/or drama expand our understanding of what it means to be human. Topics vary to engage students in the rewarding process of interpreting the literary art form as a unique cultural expression. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 1200 International Short Fiction (4 Credits)**

This class considers masterpieces of short fiction—stories and novellas—from around the world. Various linguistic communities, national traditions, and historical periods are represented through a wide-range of global texts. One goal of this course is synchronic: to identify significant themes, techniques, and conventions appearing in both western and non-western literary traditions. A second goal of this course is diachronic: to identify key developments in the forms of short fiction. Significant theoretical models are presented to provide a thorough overview of the concept of “world literature” and its associated problems.

**ENGL 1988 Study Abroad Resident Credit (0-18 Credits)****ENGL 2001 Creative Writing-Poetry (4 Credits)**

Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

**ENGL 2002 Creative Writing-Poetry (4 Credits)**

Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

**ENGL 2003 Creative Writing-Poetry (4 Credits)**

Techniques and forms of poetry. Prerequisite: an introductory creative writing course.

**ENGL 2004 Magical Realism in Literature and Cinema (4 Credits)**

This course examines the relationships between human groups and their sociocultural environments through the conjunction of history and alternative ways of seeing/being or magical realism. Our study is region-specific in sociocultural details as well as global in scope and involves the exploration of magical realism as a technique in literature and cinema.

**ENGL 2010 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2011 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2012 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2013 Creative Writing-Fiction (4 Credits)**

Techniques and forms of fiction. Prerequisite: an introductory creative writing course.

**ENGL 2020 Studies in Non-Fiction (4 Credits)****ENGL 2021 Business Technical Writing (3,4 Credits)**

Course open to Colorado Women's College students only.

**ENGL 2026 English Grammar (4 Credits)****ENGL 2031 Poetry Since 1945 (4 Credits)****ENGL 2035 History of Genre-Poetry (4 Credits)****ENGL 2036 History of Genre-Fiction (4 Credits)****ENGL 2040 Introduction to Publishing (4 Credits)**

Through lectures and field trips, students will learn how books get published - with all the steps involved. Cross listed with ENGL 3040, MFJS 3140.

**ENGL 2060 Modern and Postmodern Literature (4 Credits)**

This course will introduce students to two key movements in 20th century literary culture: modernism and postmodernism. Dealing in distinct but related ways with pervasive crises of modernity, these movements continue to exert a tremendous influence over literary culture in the present. In the realms of media and technology, politics, gender and sexuality, among others, modernism and postmodernism both reflected and helped usher in an age of relentless change. While covering this broad terrain, the course will have a different thematic focus each year. Contact the instructor or the Department of English and Literary Arts for details.

**ENGL 2061 Global Modernisms (4 Credits)**

This course examines the nature of global modernisms with examples from different countries or regions and from at least three perspectives: race and gender; markets and empires; and modernism and mass culture. From both a stylistic and thematic point of view, the course also explores the links between some avant-garde movements (such as Cubism, Futurism, Dadaism, Expressionism) and modernism as well as connections between modernism and postmodernism.

**ENGL 2070 Postcolonial Literature and Theory (4 Credits)**

An examination of the phenomenon of postcolonialism, taking into account the ways in which it has been conceptualized. Key interests include the contexts of imperialism and decolonization as well as critical readings of pertinent literature.

**ENGL 2090 20th/21st Century City Novels (4 Credits)**

How do we imagine cities? What do cities, in turn, do to our collective imaginations of belonging, to our sense of self, to our images of the future? The history of 20th and 21st century novels is often the history of how the city is imagined in prose. As new technologies, new ways of connecting, and new flows of money and goods resulted in massive growth of cities from the late 19th century on, how did literature reshape itself in response to the increasing pressure of mass information, and of new forms of imagining the life of the community? Students in this course will encounter the breadth of literature since 1900, with a geographical focus on Britain. Conceptually, the course will focus on how changing modes of urban life alter literary fiction, ideas of subjectivity, and modes of belonging across the century.

**ENGL 2100 English Literature I: Beowulf-Spenser (4 Credits)**

A survey of English literature from the earliest extant texts through works written in the late 16th century, ending with Spenser. Its purpose is to give students a historical grasp of the development and continuity of English literature during the Middle Ages and the 16th century. Old English and most Middle English texts will be read in translation, but Chaucer and Middle English lyrics will be read in the original.

**ENGL 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2104 and JUST 2104.

**ENGL 2110 The African Imagination (4 Credits)**

Focusing mainly on Africa, this course explores and connects aspects of the African imagination. These aspects include oral performances, thought systems, literature, art, cinema, and critical discourses in different eras and in various places. Studied together, these existential and intellectual signposts provide an expanded insight into African aesthetics from a continental and an interdisciplinary perspective. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2120 Chaucer-Selected Poetry (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2130 World Literature (4 Credits)**

A literary journey around the world, the focus of this course includes the study of modern literature from different parts of the world—such as Africa and the Caribbean, Asia and the Middle East, Europe and the Americas. Textual analysis as well as cultural and transnational contexts are emphasized. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2200 English Literature II: Donne-Johnson (4 Credits)**

This course explores the literatures of the 17th and 18th centuries. This 200-year period marks England's transition from a medieval, relatively static society bound by hierarchy, religion and shared cultural values into a restless early-modern society of cities, social mobility, civic unrest, colonies and cosmopolitanism. Students work on understanding genres and styles, the basics of scansion, and the terminologies, methods and ideologies of literary criticism. The course is divided into generic categories.

**ENGL 2202 Renaissance Poetry & Prose (4 Credits)****ENGL 2221 Shakespeare Seminar (4 Credits)**

This course traces Shakespeare's development by looking at representative plays from his early through to his late period and counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2230 Shakespeare and Film (4 Credits)**

An examination of film adaptation and staging of Shakespeare's plays. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2300 English Literature III (4 Credits)**

A survey of British literary works and contexts from the 19th century onwards. The course will include selected readings of British and Anglophone Romantic, Victorian and Modern writers across multiple genres. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2302 19th Century British Literature and the Empire (4 Credits)**

The coronavirus pandemic has intensified our focus on globalization, giving renewed urgency to matters such as human rights, racism, migration, citizenship, hospitality, and cultural difference. This course approaches these questions by looking at various reflections on globalization and "empire." While reading literary works in the nineteenth century, when the British empire extended its reach and control over literally every time zone, we also put them in dialogue with contemporary reports, databases, and fiction. We ask: How did nineteenth-century British and Anglophone authors react to issues directly relevant to and caused by imperial expansion and globalization? And how have their reflections shaped the way we think about power and inequality today? Apart from writers frequently taught in courses on British literature, we will also read British authors who are, ironically, often not classified under "British" (such as Mary Prince, an abolitionist born a slave in Bermuda, and Mary Seacole, also a woman of color, who traveled widely and served as a military nurse during the Crimean War). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2311 English Novel to 1800 (4 Credits)****ENGL 2350 Early Globalisms (4 Credits)**

A study of the commonalities and connections among cultures and texts across the world from the medieval and early modern periods. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2401 Blake, Wordsworth and Contemporaries (4 Credits)**

The first generation of British Romantic writers came of age during a time of revolution (American, French, Haitian). The inheritors of radical eighteenth-century ideas about natural rights, the first-generation Romantics found optimism in human feeling as well as human reason. They believed that the capacity for sympathy and lyrical transport would lead to a new, benevolent society, but their belief in social progress was checked by revolutionary violence and the rise of a hyper-rationalism that seemed more dangerous than the superstition it was meant to replace.

**ENGL 2402 Later Romantics (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2544 Globalization and Cultural Texts (4 Credits)**

The focus of this course is on theory (drawn from the social sciences) of how cultures worldwide may be increasingly internationalized through the powerful effects of globalization and on cultural texts that present the human and aesthetic faces of globalization, as seen through literature and film, with particular reference to India, the United Kingdom, South Africa, and Japan. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2700 Foundations of Early American Literature and Culture (4 Credits)**

Introduction to foundational narratives and culturally formative ideas in North American literary history from the era of discovery and the beginnings of colonialization to the Civil War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2703 Topics in English: International Literature (1-4 Credits)**

Topics in literature reflecting an array of trends, aesthetic movements, historic periods, and discursive forms of International literary discourse produced by authors from outside the USA and the United Kingdom. These topics courses will count toward the diversity/distribution attribute within the English major curriculum.

**ENGL 2704 Topics in English: Ethnic American Literature (1-4 Credits)**

Topics in literature reflecting an array of trends, aesthetic movements, historic periods, and discursive forms focused on ethnic American literary discourse. These courses count toward the diversity/distribution attribute within the English curriculum.

**ENGL 2705 Literature of the American South (4 Credits)**

An introductory course on the literature emanating from the American south. Texts may include fiction, poetry, drama, and non-fiction primarily spanning the 18th through the 21st century.

**ENGL 2706 Writing the American West (4 Credits)**

An introductory course on the literature emanating from the American west. Texts may include fiction, poetry, drama, and non-fiction spanning the 19th through the 21st century.

**ENGL 2707 Contemporary Literature (4 Credits)**

The course surveys contemporary books. The novel has never been a coherent genre, but especially since the 1960s its features, in some practitioners, have begun to resemble history, anthropology, poetry, science writing, or all of these. The course will include readings from Asia, South America, Europe and North America.

**ENGL 2708 Topics in English (1-4 Credits)****ENGL 2709 Topics in English (1-10 Credits)****ENGL 2710 American Novel-19th & 20th Century (4 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2711 20th Century American Fiction (4 Credits)**

Students read, evaluate and discuss the genre of the American immigrant novel. Topics include how this is a uniquely American literary form and what it says about life in America; the similarities and differences in how ethnic groups understand their experiences; how language and narrative techniques are used to convey the life of a new immigrant; how the experiences of men and women differ; how the immigrant novel has evolved as a literary genre. The readings will be analyzed as a means to consider how the immigration novel in America became a genre that expressed a variety of topics related to the American experience. The class will consider how these works helped to shape and define what it meant to be an American, and how that definition has changed over the last 100 years.

**ENGL 2712 American Short Story (4 Credits)**

Wide range of American short stories, quintessential American genre, from the early 19th century to present.

**ENGL 2715 Native American Literature (4 Credits)**

Native American Literature explores the relationships between contemporary Native American narratives and Native American oral traditions. We will examine the intellectual underpinnings of Native American literary expressions, focusing on tribally specific Native American concepts of language, perception, and process in relation to Native cultural and political survival. This course aims to celebrate Native American cultural expression through lectures and discussion, group work and intellectual exercises.

**ENGL 2716 American Poetry (4 Credits)**

This course examines American poetry by way of historical, thematic, and/or formalist approaches. Possible topics could include: post-WWII poetry, the New York School, Self and Other in American Poetry, Language poetry, etc.

**ENGL 2717 African American Writers (4 Credits)**

Defines, describes and analyzes the African-American aesthetic.

**ENGL 2718 Latina/o Literature (4 Credits)**

This course surveys U.S. Latina/Latino literature, with an emphasis on groups of Caribbean, Central American, Mexican, and South American descent. Representative readings will introduce the field's major critical trends, themes, genres, works, and writers. Social, historical, and political topics for investigation may include border theory, experiences of diaspora and im/migration, mestizaje, pan-latinidad, bildungsroman, labor, gender and sexuality, and language. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2719 The Harlem Renaissance (4 Credits)**

This course focuses on the flowering of African American literature, art, and music in the early 1900s known as the Harlem Renaissance. Referencing the works of artists, we explore the historical context, nature, and impact of the Harlem Renaissance. In examining racial consciousness and literary production during this era, the course emphasizes the study of representative African American writers.

**ENGL 2722 Asian American Contemporary Literature: Fiction and Nonfiction (4 Credits)**

This course surveys contemporary Asian American literature with a focus on fiction and nonfiction. By examining a range of texts from the past fifty years to the present, we will discuss critical concerns such as identity, the politics of representation, gender, class, and immigration and assimilation. A selection of memoirs, essays, short stories, novels, and graphic novels will help us expand our notion of Asian American literature, and our sense of what it is, who it's for, and its forms and aesthetics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2730 Borderlands Literature (4 Credits)**

This course introduces students to literature and stories about regions and spaces defined by borders, especially the U.S.-Mexico borderlands. The course engages with narratives that map the flows and fortifications of people and commodities, interrogate the politics of immigration, navigate the disputes over natural resources, and/or feature different contact zones or forms of encounter.

**ENGL 2741 American Jewish Literature: Immigrant Fiction (4 Credits)**

This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2741.

**ENGL 2742 Modern Hebrew Literature in Translation: Against All Odds (4 Credits)**

This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students will consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2742.

**ENGL 2743 Jewish Humor: Origins and Meaning (4 Credits)**

Writers, scholars, and comedians all claim to locate an identifiable strain of "Jewish humor" running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of "Jewish humor" in American from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with JUST 2743.

**ENGL 2744 Native Americans and Indigenous Peoples in Film (4 Credits)**

In this class we will be examining a wide range of representations of native American and indigenous culture, history, and society as presented through the medium of modern cinema. We'll begin with some documentary filmmaking and critical texts to help build a foundation of applicable knowledge to assist us in formulating our critical engagements, before diving into what was one of the most influential genres in shaping perceptions of native peoples: the classic Western. From here we'll explore subsequent films increasingly positioned outside the Western genre that strived (although not always succeeding) to represent native peoples and cultures in more accurate, sensitive, and nuanced ways. These studies will lead us into the realms of filmmaking in which native and indigenous people began to assert authority and representational control over their own cinematic portrayals. First through acting, and then through the realms of writing, directing, and producing—and ultimately with native and indigenous viewers as the implied audiences. Throughout this course, we will critically view and analyze the various ways in which native American and indigenous people have been portrayed through numerous cinematic genres and forms, with attention to relevant historical, political, and social issues and contexts. This will entail a consideration of the nature of cinematic images, while thinking about the influence they exert on societal attitudes and historical understandings of native and indigenous peoples and cultures. A portion of the course we will also be dedicated to comparative representations of indigenous (Aboriginal, Māori, and First Nations) cultures in Australia, Aotearoa (New Zealand), and Canada. Of particular interest to this class will be the production and reification of prominent native/indigenous tropes, metaphors, and stereotypes, such as the conceptions of primitive culture, the binary of the noble and the bloodthirsty savage, and the romanticized figures of the so-called ecological and spiritual Indian. We will examine how these stock figures influence how native/indigenous peoples are perceived in historical and literary discourses, as well as in popular culture—while having opportunities to listen to songs and consider music videos as another site where such representations clash and merge with traditions and modern forms through their lyrical and imagistic content. Pulling back for the wide-angle shot, as it were, we will seek answer questions concerning cultural contestation and power, the relationship between film and historical and literary production, representations of the Other, cultural fetishism/colonialism, and the semiotics of popular culture.

**ENGL 2750 American Literature Survey I (4 Credits)**

First part of American survey; introduction to major authors and genres.

**ENGL 2751 American Literature Survey II (4 Credits)**

Second part of American survey; further examination of major authors and genres.

**ENGL 2752 American Literature Survey III (4 Credits)**

A survey of American literature, including representative works of fiction, poetry and drama from the 1930s to the present.

**ENGL 2815 Studies in Rhetoric (4 Credits)****ENGL 2816 Advanced Writing (4 Credits)**

This class gives each student the opportunity to explore the humanities in an area of his or her particular interest. A research methods and writing course, this class guides students through the research and writing process from preliminary research to methodology to prospectus to drafting and finally revision. Class sessions operate as directed writing workshops, with students discussing their research and writing strategies. The final product of the course is a 15-page research essay on a subject of the student's choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2820 Philosophy and Literature (4 Credits)**

Hermeneutics, sometimes called "the art of interpretation," offers us the opportunity to explore strategies of engagement and exegesis that seeks to observe, question, and celebrate the ways in which we read and write the world. By bringing critical and creative inquiry to bear on the event of interpretation itself we can consider the ethical implications of how we deal with our individual identities as well as our collective, national, and global identities. In this course we pose big questions—What are we talking about when we talk about existence? What does it mean to have a body? How does desire and memory construct history and identity? Walking these questions through a variety of literary and philosophical texts and artistic lenses, we consider how "the creative" (writing, the literary) performs, becomes, and is "the critical" and vice-versa. Students should be prepared to write, read, and participate in discussion.

**ENGL 2825 Cultural Criticism (4 Credits)**

This course will introduce students to some of the major moments in the development of cultural studies and will show how the discipline "works" to make sense of culture at large. Cross listed with ENGL 3825.

**ENGL 2830 Representations of Women (4 Credits)**

Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with GWST 2830.

**ENGL 2845 Politics and Literature (4 Credits)****ENGL 2850 Literature of Utopia/Dystopia: Dystopian Fiction (4 Credits)**

This course addresses the concurrent and interrelated themes of utopian and dystopian thought and their primary expression through 20th and 21st century literary texts. As such, it critically engages and interrogates relationships between knowledge and power, and freedom and oppression that have long been expressed in world literature. At its core, utopian/dystopian literatures are always in conversation with historical, social, and cultural thought, expressing anxiety towards the relationship between social structures and institutions with the individuals and the imposition of coercive power. Texts addressed in this course include those by a range of diverse writers from Plato and Thomas More, to Charlotte Perkins Gilman, Yevgeny Zamyatin, Aldous Huxley, George Orwell, Albert Camus, Ray Bradbury, Margaret Atwood, Philip K. Dick, Octavia Butler, Claire G. Coleman, etc. \*In some years this course may count for international literature under the diversity/distribution attribute in the English curriculum. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ENGL 2855 Speculative Fiction (4 Credits)**

This course explores topics in speculative fiction. Speculative fiction encompasses a wide range of genres, contexts, and forms, from science fiction to alternative history to futurity. Topics might include apocalypse, cyberpunk, space-time, revolution, new communities, cyborgs and robotics, worldmaking, Afrofuturism, Chicanafuturism, or theories of possibility in different forms of fiction. All ask us to consider the role of imagination and speculation in fiction. Each iteration of this course will be designated with a specific topic, repeatable only under a new topic.

**ENGL 2980 Internship in English (1-5 Credits)**

This course provides academic credit for off-campus internships in fields related to the English major. One paper is required at the end, articulating how the internship complemented the student's studies in English. Requires approval by director of undergraduate studies in English.

**ENGL 2988 Study Abroad Resident Credit (0-18 Credits)****ENGL 3000 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3001 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3002 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3003 Advanced Creative Writing-Poetry (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3010 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3011 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3012 Advanced Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3013 Adv Creative Writing-Fiction (4 Credits)**

Technique, writing practice and criticism.

**ENGL 3015 Advanced Creative Writing: Non-Fiction (4 Credits)****ENGL 3017 Travel Writing-Fiction & Fact (4 Credits)**

A study of European, American and other narratives of travel. This course examines relevant postcolonial and literary theories of travel and nationhood.

**ENGL 3040 Introduction to Publishing (4 Credits)**

Cross listed with ENGL 2040, MFJS 3140.

**ENGL 3121 Chaucer: Canterbury Tales (4 Credits)**

Life, culture, language and literary trends of Chaucer's age as reflected in "The Canterbury Tales".

**ENGL 3320 Oral Literature and Orality in Literature (4 Credits)**

The term "oral literature" generally refers to narratives and poems (including songs) performed and disseminated orally from one generation to the other. Oral literature is, in some respects, the foundational 'text' of written literature. The questions that we explore in this course include: How did oral literature develop, and what are the characteristics? How has oral literature been shaped by time and place? How is it distinct from as well as related to written literature? To answer these questions, we explore different forms of oral literature and also study the use of orality in written literature. Our studies involve the examination of material and texts from different parts of the world.

**ENGL 3402 Early Romantics (4 Credits)****ENGL 3405 Postmodern Visions of Israel (4 Credits)**

This course investigates how representation of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual "multiverses." A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. Cross listed with JUST 3405.

**ENGL 3525 Sexuality and Textuality (4 Credits)**

This course explores literary, cultural, and theoretical texts that question and challenge concepts of gender and sexuality. Topics include gender roles and expectations, gender performance, the body, pleasure/desire, subject-object dynamics, queer and trans identities, and/or resistance to the normative. Particular attention will be given to texts and theories that intersect issues of gender and sexuality with questions of race, ethnicity, and marginalized subjectivities.

**ENGL 3550 The Literature of Dissent in New England (4 Credits)**

This course investigates writings related to various forms of dissent in New England, from 1630 to 1860. It focuses on moments of crisis such as the Antinomian Controversy, the Salem witchcraft trials, the Great Awakening, the Miracles Controversy, and the reaction to the Compromise of the 1850, among others. Related topics include the development of individualism, the lives and roles of early American women, the presence and influence of slavery on conceptions of reform, and the role of religion in the formation of political and social dissent.

**ENGL 3600 American Romantics and Radicals, 1820-1865 (4 Credits)**

This course covers the period of religious, philosophical, social, and political reform that runs from 1820 to the beginning of the Civil War. Focus will be on romantic ideas about nature, self-reliance, etc., as well as the contexts that surround and nurture these ideas, such as utopian social reform, the women's rights movement, abolition, temperance, and various health movements. Authors include Ralph Waldo Emerson, Henry David Thoreau, Nathaniel Hawthorne, Margaret Fuller, Frederick Douglass, and others.

**ENGL 3601 Literature of the Civil War (4 Credits)**

Historically based survey of literature related to the American Civil War. Includes works by such authors as Harriet Beecher Stowe, Frederick Douglass, Walt Whitman, Herman Melville, Emily Dickinson, Louisa May Alcott, and others.

**ENGL 3602 American Realism and Naturalism, 1860-1920 (4 Credits)**

This course addresses the period of post-Civil War American writing characterized by aesthetic theories that react against Romanticism and attempt to incorporate scientific (particularly Darwinian) thinking into artistic representation. It will present the development of these approaches in the historical contexts of Reconstruction, the Gilded Age, and the Progressive Era. Authors will include Mark Twain, Henry James, Frank Norris, Stephen Crane, William Dean Howells, Charles Chesnutt, Kate Chopin, Sarah Ornes Jewett, and others.

**ENGL 3618 20th Century British Literature (4 Credits)**

This course will explore the dramatic changes in culture and society that took place between the death of Queen Victoria and the start of the new millennium. The twentieth century transformed Britain from the center of a commercial and military Empire “on which the sun never set” to a multicultural island nation coming to terms with its colonialist past and seeking to redefine its place in the world. The same period also saw continual redefinitions of the concept of Britishness as the outcome of struggles over women’s rights, anticolonial and antiracist movements, LGBTQ+ activism, and workers’ demand for better conditions and the right to organize. These social changes emerged simultaneously with transformative effects of new media and transportation technologies.

**ENGL 3703 Advanced Topics in English: International Literature (1-4 Credits)**

Advanced topics in literature vary reflecting an array of specialized trends, aesthetic movements, historic periods, and discursive forms of international literary discourse produced by authors outside the USA and the United Kingdom. These advanced studies topics courses will count toward the diversity/distribution attribute within the English curriculum.

**ENGL 3704 Advanced Topics in English: Ethnic American Literature (1-4 Credits)**

Advanced topics seminars in literature reflecting an array of trends, aesthetic movements, historic periods, and discursive forms of ethnic American literary discourse. These courses will count toward the diversity/distribution attribute within the English major curriculum.

**ENGL 3706 Writing the American West (4 Credits)**

Explores historical and contemporary writing produced in and about the American West.

**ENGL 3707 Posthumanism: Androids, Cyborgs, A.I. & the Future of Humanity (4 Credits)**

As the term “posthumanism” suggests, the consideration of what may come ‘after’ or exist ‘beyond’ the conventional understanding of what it means to be human lies at the center of this emergent critical perspective. The literary and philosophic engagement with the complicated set of ideas around these questions call for a reevaluation of the notion of the corporeal human subject and a reconsideration of the limits of the human mind. Posthuman thought shifts the focus to a consideration of the ways in which embodiment and thinking are positioned in relation to technological advancements in fields as disparate as robotics, cybernetics, and artificial intelligence to bioengineering and genetics. Given the issues under consideration, ideas emerging from sci-fi, speculative fiction, cyberpunk and contemporary philosophy have long been at the center of posthumanism, while also reflecting in classic works from Pliny’s *Historia Naturalis*, Julien Offray de La Mettrie’s *L’homme Machine* (Man a Machine) and Mary Shelley’s *Frankenstein*, as well. Drawing on such a discursive foundation of works from around the world, our primary focus will be on texts produced by writers, thinkers and artists who best expand the possibilities and questions at the center of posthumanism, including Karel Čapek, Isaac Asimov, Stanisław Lem, Philip K. Dick, William Gibson and Shirov Masamune and Kazuo Ishiguro, with Hajime Sorayama, Donna J. Haraway, Manuel De Landa and N. Katherine Hayles. From this provocative (and evocative) foundation, this course will explore some of the most vital questions emerging out of posthumanism from innovations in robotics, computer technology and artificial intelligence, to ongoing developments in genetic modification, biomechanics, astrobiology and transgenic art.

**ENGL 3711 20th-Century American Fiction (4 Credits)**

Fiction, poetry, drama, and non-fiction on selected themes by 20th and 21st century American writers. Topics for study may include issues related to regionalism, ethnicity and gender, as well as specific social and historical concerns.

**ENGL 3730 Literature and Medicine: Addiction and Modernity (4 Credits)**

This course introduces students to accounts of substance use and addiction from the nineteenth century through the present day. We will examine canonical and contemporary literary texts, medical writings, visual representations, smartphone applications, and films alongside topics such as liberalism, inequality, imperial expansion, consumerism, “digital drugs,” and the pathologization of addiction. We will consider our readings in light of the following questions: What role do substance use and addiction play in constructing the modern self and society? What can representations of addiction teach us about our relationship with the external world? How does addiction act as a metaphor, a narrative device, or even a political sign? How do gender, class, and race affect narratives of addiction? How do accounts of addiction interact with philosophical texts, medical treatises, and imperial and colonial discourses? In addition to writing critical essays, students will evaluate smartphone addiction treatment apps and devise a creative project on a topic relevant to this course.

**ENGL 3731 Topics in English (1-4 Credits)****ENGL 3732 Topics in English (1-4 Credits)****ENGL 3733 Topics in English (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**ENGL 3742 Jesus in Jewish Literature (4 Credits)**

This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture’s engagement with Jesus’ life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as JUST 3742.

**ENGL 3743 Modern Jewish Literature (4 Credits)**

Stories, novels and memoirs by 20th-century Jewish writers; consideration of issues of generation, gender and idea of Jewish literature as a genre. Cross listed with JUST 3743.

**ENGL 3744 African American Literature (4 Credits)**

This course examines fiction, poetry, autobiography, and drama by African American writers, with strong consideration on the socio-historical conditions that gave rise to and continue to inform this literary tradition.

**ENGL 3800 Bibliography/Research Method (4 Credits)****ENGL 3803 Modernism/Postmodernism (4 Credits)****ENGL 3813 History and Structure of the English Language (4 Credits)**

A composite course studying both the structure of modern English and the history of the English language.

**ENGL 3815 Studies in Rhetoric (4 Credits)**

This course will examine the history and principles of rhetoric and how they pertain to theory and practice in the field of composition and rhetoric.

**ENGL 3817 History of Rhetoric (4 Credits)****ENGL 3818 Composition Theory (4 Credits)****ENGL 3819 Old English (4 Credits)**

This class introduces students to Old English grammar, prose, and poetry. This course is a prerequisite for ENGL 3200.

**ENGL 3821 Literary Criticism: 19th Century-Present (4 Credits)****ENGL 3822 Literary Criticism: 20th Century (4 Credits)**

Critical methods and philosophies of 20th-century critics; their relationship to traditions.

**ENGL 3823 Interpretation Theory (4 Credits)****ENGL 3825 Cultural Criticism (4 Credits)**

Cross listed with ENGL 2835.

**ENGL 3826 Latinx Cultural Studies (4 Credits)**

This course introduces students to cultural texts and theories by U.S. Latinx subjects and asks students to consider various forms of cultural and critical methodologies.

**ENGL 3852 Topics in Poetics (4 Credits)****ENGL 3900 Senior Seminar (4 Credits)**

The Senior Seminar is a deep, investigative course that takes students into a specific, usually narrow topic within a subject field. Such courses emphasize the further, more complex application of skills introduced in the department's "Introduction to the Major" course. Faculty are encouraged to develop connections between theory and practice and provide an intense, challenging intellectual experience for senior English majors. Students should have taken ENGL 1010 and be in their final year of study before taking this course.

**ENGL 3982 Writers in the Schools (2,4 Credits)**

This course operates mostly "in the field." Following the models of California Poets in the Schools and Teachers & Writers Collaborative, students are in training with a poet-in-residence, observing him as he conducts a residency in a public school. In addition, we have our own meetings to discuss pedagogy, classroom practices and management, teacher-writer relations, and all other necessary logistical planning. Placement in public schools is facilitated by Denver SCORES, an education program dedicated to increasing literacy in Denver's at-risk school population. For those wishing to work with middle or high school students, or in other community settings (e.g., homeless or women's shelters), special arrangements can be made. This course is a collaborative effort between CO Humanities, Denver SCORES, and the University of Denver.

**ENGL 3988 Study Abroad Resident Credit (0-18 Credits)****ENGL 3991 Independent Study (1-17 Credits)****ENGL 3995 Independent Research (1-10 Credits)**

## English General (ENGG)

**ENGG 1988 Study Abroad Resident Credit (0-18 Credits)****ENGG 3003 Integrated Communication Skills for International Graduate Students (0 Credits)**

This course assists international students in discovering and mastering the communication norms of graduate programs in U.S. universities. Beginning with a student-led needs analysis of communication expectations in their academic departments, students identify the language skills that will help them succeed in their field of study. The course follows a workshop format and includes a variety of speaking and writing activities, through which students learn to recognize and correct their own language errors, integrate sources appropriately, and develop confidence in interacting with professors and peers. Students are encouraged to bring assignments and projects from their major coursework as examples for class discussion. These discussions provide the foundation for work on oral skills (pronunciation, fluency, and interaction), writing skills (citation style, organization, and voice), and general language development (vocabulary and grammar).

# Entrepreneurship & Venture Mgt (EVM)

## **EVM 1100 Introduction to Entrepreneurship (4 Credits)**

Entrepreneurs play a critical role in driving innovation, promoting social change, creating jobs, and changing the way we live, work, and communicate. Entrepreneurs come from different backgrounds, professions and possess a wide range of skills and experiences. What entrepreneurs have in common, the desire to solve problems, make change and create value through innovation. This introductory entrepreneurship course is for students that are interested in learning about entrepreneurship or first-time entrepreneurs with an idea. Students will explore entrepreneurship and apply tools, mindsets, and frameworks for starting a for-profit business, a non-profit business, or a business within a business.

## **EVM 1400 Introduction To Franchising (4 Credits)**

Imagine running your own business with the tools, support, and strategy to make it thrive—this course introduces the business model that powers thousands of successful brands, from Chick-fil-A and Planet Fitness to Dunkin' and School of Rock. Franchising has evolved into one of the most dynamic and transformative business strategies in the world, with decades of observed data demonstrating success across hundreds of industries, thousands of franchise systems, and hundreds of thousands of franchised business units. This course offers students a comprehensive understanding of the franchise business model, including its language, structure, and perspectives from franchisees, franchisors, supply partners, and customers. We'll explore the history and evolution of franchising, comparing it to alternative business models to highlight its value and purpose, while also reviewing the legal framework that supports franchising in the U.S. Throughout the course, we'll examine the key stages of growth, and guide students through the critical factors and decisions in growing a franchise business, recognizing pivotal milestones, challenges, and strategies to boost performance and elevate brand value.

## **EVM 2100 Social Entrepreneurship "do well by doing good" (4 Credits)**

Interested in making a positive impact through business while also making money? Social entrepreneurship will teach you how you can 'do well by doing good.' This course examines how all types of organizations can be used to positively impact our global society. Students will explore their own passions and see how purpose and profit can combine to create rewarding and inspiring careers and companies. Human-centered design, alternative funding, business models, and impact measurement will all be integrated to prepare students to lead impactful careers. Through class discussions, case studies, guest speakers, and hands-on application, this course will prepare students to join the growing group of innovators using business to address society's greatest challenges.

## **EVM 2200 Global Entrepreneurship "Innovating and Creating Value Across Borders (4 Credits)**

Entrepreneurship is about solving problems, identifying unmet needs and opportunities. Where some see roadblocks, entrepreneurs see opportunity. As people, cultures and business become interconnected it is important for entrepreneurs to have a global mindset and approach to business. The Global Entrepreneurship course provides you with the skills and knowledge to start a business in another country, develop a market in another country, and identify opportunities across borders. Students will develop an intercultural understanding as they learn about history, religion, culture, economy, and government in other countries. Students will identify commonalities, shared interests, and differences between cultures and apply business frameworks to develop products and services for international markets.

## **EVM 2250 Entrepreneurship Interterm (2 Credits)**

This course provides you with the opportunity to explore and discover what makes for an effective entrepreneurial ecosystem. You will travel to a foreign country and meet with key actors throughout the entrepreneurial ecosystem. Additionally, you will learn about and engage with the local culture, learning how religion, customs, and culture all influence global entrepreneurship.

## **EVM 3350 From Idea to First Dollar Sale (4 Credits)**

Designed to serve as the capstone course for the Entrepreneurship Minor, From Idea to First Dollar Sale takes students through the process of starting a company, launching a product, creating a market, and learning how to embrace "failure" and manage uncertainty. Student will use and apply the knowledge, skills, and tools they have developed in previous Entrepreneurship Minor courses to spin up a business in ten weeks. Most types of businesses are welcome: retail, services, technology, hospitality, etc. Students may build on an existing idea, iterate, and take it to the next level or develop an entirely new idea. Through class discussions, activities, presentations, and guest speakers, students will explore the principles of planning, testing, measuring, analyzing, and rapidly iterating a product or service. Startups require significant effort, commitment, creativity, and passion. This class is no different and whether you have started a business in the past, you will know what it takes to be an entrepreneur by the time this class is finished!.

## **EVM 3370 Metrics & Financial Tools for an Emerging Business: Accounting and Finance for the Emerging Business (4 Credits)**

Students are taught to link physical activity occurring in the business venture to the movement of numbers on financial statements. They draft 3 years of flexible profit and loss, cash flow, and balance sheet statements; Year 1 is monthly, Year 2 is quarterly, and Year 3 is one annual period. Students learn how to visualize the activity, metrics, and assumptions needed to support the customer experience they intend to build and how these numbers flow through their financial statements including: Generating revenue leads; Convert leads to sales; Producing the product/service; Delivering the product/service; Converting customers into repeat business; Set-up and maintain Quick Books. Cash impact of corporate governance costs (indirect) are included, such as risk management (insurance), employee benefits and compensation, facilities, technology, legal and capital expenditures, etc., understanding the tax implication of setting up different governance devices and understanding recapitalization and its implications. Students learn to identify activity metrics to drive cash basis break-even for daily, monthly, and annual periods. They will also learn how to create a Use of Funds Statement linked to their proforma'd financial statements. Students will learn different types of financing and under which circumstances these types are used-credit cards, factor loans on inventory, bank loans- including small business administration loans, angel funding, and venture capital funding. Exit strategies like M&A and IPO will also be covered. Prerequisites: BUS 1000.

**EVM 3400 The Innovation Amphitheater (1 Credit)**

Want to start your own business and invent your own future but haven't landed on a great product/service idea? Already have a business and want to expand into new spaces and offerings? This course is for people who answered yes to either of those questions. The Innovation Amphitheater takes you through 16 proven strategies and techniques to help you innovate into new spaces and find opportunities. You'll explore such strategies as cross-overs, combos, slivercasting, inside-out, old school and retro, and many more.

**EVM 3401 Project Management (1 Credit)**

Learn the basic fundamentals of project management, focused specifically on high-performing teams while starting and running an early-stage business. Explore how to implement proven project management concepts and techniques using popular tools like Trello and Asana. 1 credit hour. Prerequisite: EVM 3350.

**EVM 3402 Creating Your Digital Presence (1 Credit)**

Creating awareness of your new business venture is one of the most important tasks in the early stages of building your business. Creating awareness by driving traffic through and to your digital presence is essential. To help you as you embark on an entrepreneurial effort, this course focuses on building an integrated digital presence with a website, Facebook Business Page, Twitter account, Pinterest account, and an Instagram account.

**EVM 3403 Ethics in Entrepreneurship (1 Credit)**

Creating a business for the sake of generating profit is not enough. Businesses must contribute to the betterment of society through social, environmental, and financial gains. This course will help you build the right vision for your business by 1) engaging you in ongoing reflection and dialogue about your ethical responsibilities in product and service innovation, and 2) helping you understand cognitive, behavioral, and principled approaches to ethical issues in product and service innovation.

**EVM 3404 Primary Research (1 Credit)**

To be successful in your business venture, you need to make data-driven decisions. Much of that data can come from internal operations or perhaps secondary sources. But, to truly be successful, you need to gather, analyze, and make decisions based on primary research data from your external market. In this course, you'll learn the basic tenets of performing primary research activities including defining your market segment, building a primary research instrument, gathering data using a primary research instrument, analyzing the data, and making recommendations.

**EVM 3407 The Perfect Pitch (1 Credit)**

Essential to most new business ventures is the ability to raise capital, most notably from angel investors and venture capitalists (VCs). Raising capital starts with the "pitch," a presentation that is exciting, informative, realistic, and addresses what funds are needed, how they will be used, and how the investor will financially benefit from providing the funds. This course will help you learn how to create the perfect pitch for your new business venture. We will review both successful and unsuccessful pitch presentations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3408 Accounting For Entrepreneurs (1 Credit)**

Accounting is an activity in any business that measures, processes, and communicates financial information and transactions. This vitally important activity will help you track your expenses, recognize your revenue, and in general keep an accurate and detailed view of the financial strength of your business. In this class, you'll learn how to process operating expense transactions (e.g., advertising and payroll expenses) and revenue transactions (both actual sales and sales on credit). You'll also learn how to appropriately handle the depreciation of long-term assets like vehicles and buildings. Finally, you'll learn how all of these transactions enable you to build a balance sheet for your new business venture.

**EVM 3409 Financial Statements For Entrepreneurs (1 Credit)**

Of the four major financial statements, the most important to a new business venture are the balance sheet, the income statement, and the statement of cash flows. Knowing how to build and interpret these are critical to your success during not only the early stages of spinning up your business but throughout the lifetime of your business. In this class, based on a wide variety of financial transactions, you will learn how to build and interpret an income statement and a statement of cash flows. (It is assumed that you already know how to build and interpret a balance sheet.) You'll also learn how to build a proforma income statement and statement of cash flows, based on the financial projections of your new business venture.

**EVM 3413 Design Thinking (1 Credit)**

Design Thinking is a creative problem solving process that builds your ability to first see and then solve human-centered opportunities. It starts with empathically looking at frustrations inside and around your organization, then moves through a variety of brainstorming sessions to build customer centric solutions. Design Thinking is a wonderful tool to help you monetize the human capital in your organization. Once we know the process, we will ask students to bring real challenges into the classroom where we will use Design Thinking to build potential new products, services and solutions.

**EVM 3414 Market Discovery and Product-Market Fit (1 Credit)**

Market discovery is about identifying demand for ideas and innovations. Students will discover that some markets have already been established and others have yet to be created. Product market fit takes time. At first new ideas and innovations may not fit an existing market, requiring a new market to be developed. We'll study example companies in a wide variety of industries that over time found the correct product market fit. Students in this Sprint will learn methodologies to find and assess product market fit for new ideas and innovations. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3417 Branding and Messaging (1 Credit)**

Branding is an essential element for any startup. Your brand is created by you and grows as your business grows. It's more than a logo, colors, and fonts contained in a style guide. It's the experience that you create for your customers. It's something your business should aspire to. Something memorable. And as you work through this course, you will get an understanding of what it takes to build the brand for your business.

**EVM 3420 Cloud Technologies (1 Credit)**

Welcome to the Cloud! What is the cloud, is it a thing, a concept, a nifty term? If you are starting a new business, thinking about starting a new business or improving the efficiencies in an existing business, you need to understand the available technologies and tools in the Cloud. Where do I host my website, how do I handle accounting, where is the email server, how do I track customers, how do I share information, what tools are available for customer support? These are just a few questions the Cloud will solve efficiently and cost effectively. The Cloud has dramatically changed the competitive landscape for startups by reducing the cost of starting a new business. The Cloud removes costly equipment, software and support expenditures; with the Cloud, you pay for what you use. This course will focus on identifying, analyzing, and implementing Cloud technologies to help run your business. Here are some of the topics we will explore and discuss: flexible costs, how and when to implement these tools, is your data safe, comparing similar services, improving collaboration.

**EVM 3421 Intellectual Property Issues for Startup Businesses (1 Credit)**

All businesses have assets, both tangible and intangible, and these assets must be managed, nurtured, accounted for, and protected. Among the most important of those assets today fall in the realm of intellectual property (IP) and are protected through mechanisms such as copyrights, trademarks, and patents. As a business owner, you must be aggressive and vigilant in ensuring that your most important IP assets are protected, as they are an important part of your brand portfolio. This class will introduce you to the role of copyrights, trademarks, and patents as tools for protecting your intellectual property. In doing so, you will learn about your rights as an IP owner and – equally as important – your responsibilities for not infringing on the IP assets of other organizations.

**EVM 3422 Startup Legal Issues (1 Credit)**

Starting a business involves a host of activities, from product/service development, to marketing, to sales and service. At the foundation of all of these activities are legal considerations. Legal considerations for startup businesses range from establishing a form of business operation, to registering with the government and obtaining the appropriate licenses, to filing sales taxes, to the management of employees (hiring, contracts, etc.), and a host of other essential activities. To get your business off “on the right foot,” this course introduces you to the legal considerations that are vitally important to your success.

**EVM 3424 Visualizing & Presenting Data (1 Credit)**

Being able to tell a compelling story, in particular with data, is a skill that is rarely taught. Today, most people either adopt reports that have existed in an organization for as long as time, or they create flashy reports using the latest tools. In most cases, neither of these reports give the end users what they want. This course will focus on giving you the tools to create purposeful reports by helping you answer the age old question around any design... Form, Fit and Function.

**EVM 3425 Rapid Prototyping - 3D Printing and Laser Engraving (1 Credit)**

The purpose of this course is to empower students to more effectively develop their creative and entrepreneurial capacities utilizing the tools of rapid prototyping. Students will identify appropriate rapid prototyping technologies to apply to unique situations. Curriculum over the course of the day progressively builds by presenting more challenging problems. At the conclusion of the course, students will be able to turn ideas into solutions that add value to a product, process, or service.

**EVM 3428 Developing a WordPress Website (1 Credit)**

What is WordPress? What is a CMS? What is Open Source? Is it a concept or a nifty term? If you are starting a new business or thinking about starting a new business you need to understand the available technologies and tools to build and manage a website. Where do I host the website? How do I create and update the website? What tools are available? These are just a few questions we will answer in the WordPress Grind. The WordPress Grind has been designed from a beginner's perspective. The goal is to provide a step-by-step tutorial for creating and publishing a WordPress website. The class will cover the conceptual framework of Open Source and Content Management Systems (CMS) and lead into the fundamentals and tools required to build and manage a WordPress website. At the conclusion of this grind, you will be able to develop, publish, and manage your own WordPress website.

**EVM 3430 Key Steps in Product Creation, Pricing, and Distribution (1 Credit)**

Learn how to bring a digital or physical product to market. This Sprint guides you through the essential steps of product creation, pricing, and distribution. Whether you have a product idea or simply want to understand how businesses develop and sell products, this course provides a practical framework for making intelligent decisions. What You'll Learn: Manufacturing Costs: Calculate production expenses, understand fixed and variable costs, and factor in economies of scale. Pricing Strategies: Set competitive prices, calculate profit margins, and explore strategies like value-based and psychological pricing. Distribution Channels: Choose the best sales channels (eCommerce, retail, DTC, or wholesale) and understand the costs and benefits of each. This course is perfect for anyone curious about how products are made, priced, and sold—or for entrepreneurs ready to launch a product. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3431 Emotionally Effective Leader (1 Credit)**

Did you know emotional and social skills are four times more important than IQ when considering success and prestige in professional settings? Emotional Intelligence (EI) can be confusing. What does it mean? Is it fluffy stuff or something really tangible? Now more than ever, employers and clients are seeking leaders who display emotionally intelligent thinking, decision making and actions. How do you know if you meet those requirements? Up until recently, EI was a “gut assessment” of someone’s ability to control their emotions or care about someone or something. Now, we have a valid and reliable way of understanding our emotional intelligence and that of others. We can even measure the EI of teams! It turns out EI is quite complex. Research has distinguished 12 components of EI including: self regard, self actualization, self awareness, emotional expression, assertiveness, independence, interpersonal relationships, empathy, social responsibility, problem solving, reality testing, impulse control, flexibility, stress tolerance and optimism. Want to know how you score in these areas? EI is a “talent” that, unlike IQ, can be learned and improved throughout one’s life. In the Emotionally Effective Leader Grind, you will have the opportunity to assess your own EI through a valid and reliable EI talent assessment. Revealing your strengths and weaknesses, you will learn how to build your own EI and maximize the magnitude of your impact within the organizations or teams you lead.

**EVM 3432 Getting to Know Your Customer (1 Credit)**

Developing lasting relationships with customers requires time and energy up front. You need to get to know who your customers are and what they value before they will develop lasting relationships with your brand. This course on Getting to Know Your Customer will introduce students to tools and data sources that can help with segmenting and targeting, developing personas that represent different customer groups.

**EVM 3433 The Sales Process for Entrepreneurs (1 Credit)**

Sales is all about getting a person to make a purchase. Each business needs a unique step-by-step sales process that aligns with the buyer’s journey. We will discuss the key aspects of the top, middle and bottom of a sales process: We will learn the key metrics and activities, both human and digital for sales teams in today’s modern world. We will learn about lead generation, prospecting, lead nurturing, deal qualification, designing a sales process, sales pipeline, and forecasting, managing customer relationships, negotiating, converting leads to clients. As a self-employed entrepreneur or as an employee who works for someone else, an innovative outlook and entrepreneurial mindset is key to solving the problems our companies and society face now, and in the future. Innovators are everywhere and can add value from any role or department within their company, for example: c-suite leaders, facilities staff, IT administrators, and human resource trainers. Innovators share common traits: they see emerging opportunities where others see hopeless problems, they solve problems with creative ideas, and they evaluate ideas for their merits and shortcomings. This course is designed to teach the tools, strategies, and mindset of an innovator to help students ideate, evaluate, and innovate quickly. Students will collaborate using proven strategies and techniques to solve problems in new and unique ways. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

**EVM 3435 How To Realistically Fund Your Business (1 Credit)**

Essential to most new ventures is the ability to raise capital (“funding”), initially from angel investors and then from venture capitalists (VCs). The capital raising process usually starts with the “pitch”, a presentation that is compelling, exciting, informative, and addresses what funds are required by the venture, how they will be used, and how the investor will financially benefit from their investment. But not all new companies are the same and the ways to fund starting a new business, business idea or a good old-fashioned startup are many. In this class we will discuss the different funding sources from a check from a friend or family member to loans, credit cards, equity investment, crowd funding and more. This course will help you learn how to identify and determine the best source capital for your business. You will also learn how to present and speak about basic and intermediate funding sources. We will define & review the basic elements of business funding while also listening to the perspectives of several entrepreneurs (small & big) and even a Venture Capitalist. You will ultimately work in groups around a hypothetical business idea. Please feel free to use an existing idea (particularly if you were in my pitch class) or feel free to choose one from the list I have posted in Canvas. Throughout class you and your group members will have several working session moments to create and draft your capital plan for your business.

**EVM 3436 High Performing Teams (1 Credit)**

Success in any business venture is often predicated on the strength of collaboration in and between high performing teams. But teams also come with their own unique set of challenges that can often hinder group productivity and cause friction, such as interpersonal issues, ambiguous goals and objectives, and competing agendas. There are techniques that team and group leaders can use to alleviate those challenges in the current era of volatility, uncertainty, complexity, and ambiguity. The High Performing Teams class is for students who are eager to build their capacity to connect as leaders more effectively and learn to leverage psychological safety to create cultures of connection where risk-taking leads to team success. Together we’ll explore how you can implement the latest trends in remote and hybrid team management in a post-COVID era as well as how to incorporate the principles of diversity, equity and inclusion (DEI) to improve team performance and cohesion. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3437 The Art of Branding: Design Tactics for Entrepreneurs (1 Credit)**

Join us on a journey of crafting compelling brands through a practical approach to design and strategy. This course immerses students in the brand design process, analyzing both successful and unsuccessful brand campaigns to extract valuable insights. By refining their aesthetic sensibilities, students will become adept at creating captivating designs. Leveraging cutting-edge digital technologies, students will master the creation of a brand style guide. In the final project, students will showcase their skills by developing a captivating style guide for a new or existing business, strategically positioning it in the market. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3438 How to Identify, Evaluate & Beat Your Competition (1 Credit)**

Every business has competitors, from large corporations, “main street” businesses, start-ups... they all compete for customers and market-share. Even The University of Denver competes for students. Leave The Competition Behind is for people who like to win and don't like to lose. In this class, you will study strategic frameworks and tools that you can use to identify, understand, and dissect your competitors, the levers that you can pull to beat them (like price, quality, service). We will identify and discuss front-line tactics you can use to outwork your competition. We will explore and discuss real life cases and personal stories from various industries to illustrate the key concepts used by professionals in competitive analysis and strategy. You will apply these concepts during the breakout sessions where we will take on the Media & Entertainment industry.

**EVM 3439 Social Entrepreneurship (1 Credit)**

Social entrepreneurship is simply applying entrepreneurship principles to societal challenges. This can be for-profit, non-profit, social business, or even not an official organization at all. The consistency across all these is the desire to make society better. Finding a problem that gives you purpose is a challenge in itself, as you cannot simply think about it. You need to create a life that allows you the freedom to find this purpose, and then successfully devote yourself to this purpose. In addition, if your goal is to make society better, you want to avoid the trap of working on one problem while actively contributing to others. So the ideal social entrepreneur creates an organization and life that offers a net improvement to society. This involves learning to “socially” manage others, environmental impact, finances, etc. The Social Entrepreneurship course is for people that are eager to improve the world. We will incorporate concepts from finance, management, psychology, and even neurobiology. You will learn how to find the problem you wish to work on, and how to be more successful in addressing that problem.

**EVM 3440 How to Effectively Negotiate in Business (1 Credit)**

Every day, and sometimes multiple times a day, we persuade and negotiate with people such as funders, classmates, friends, family members, potential employers, merchants, and coworkers. However, most of us know little about what it takes to be effective negotiators. This class teaches you proven methods to support your desire to reach principled agreements by broadening your basic negotiation skills. We will learn theory-driven negotiation skills, engage in simulated negotiations, and make concrete plans to conduct a future negotiation. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class meeting. There is a project that is due two weeks after the in-person class meeting.

**EVM 3441 How To Create A Business Startup Budget & Forecast (1 Credit)**

For many people creating and evaluating business budgets and forecasts is intimidating. This applied course is designed to demystify the subject as students study, create, and evaluate budgets and forecasts. This course will provide students tools as they create an entrepreneurial budget and forecast. In addition, you will learn about metrics that entrepreneurs, investors, and banks use to evaluate these financial materials. Along the way we will consider budgets for different types of businesses, including B2B, B2C, products, subscriptions, and services. We will cover budget topics such as unit economics, breakeven, margin analysis, customer acquisition cost, and marketing efficiency plus forecast topics like burn rates, scaling, margin creep, and north star metrics. Plus, we will touch on the basics of valuation and how budget materials relate to valuation.

**EVM 3442 Selling Online: Using Amazon as a Framework (1 Credit)**

Amazon has become the de facto tool for selling Consumer Packaged Goods (CPG) online. If you're not selling your product on Amazon, chances are that someone else is already doing it for you. Unlike real estate, Amazon squatters may have (and, retain) first-mover advantages in selling products and securing organic listing authority. Anyone planning to sell products for themselves or for an employer needs to understand the Amazon landscape. Amazon has become a ubiquitous metaverse for commerce. Everything known tangibly in bricks-and-mortar retail has a virtual analogue expected to move faster and cheaper, all while subject to the scrutiny of customer reviews. The Amazon eco-system includes an army of gig workers and service providers such as lawyers and marketing professionals, subject to the same constraints. Whether you wish to become a third-party seller on Amazon or plan to work for a CPG company, understanding the power of Amazon (and, related tools) has universal application. We plan to cover the risks of entering Amazon, the criteria to evaluate successful products, protecting your brand, organic and pay-per click strategies, third-party tools, and the broad market for trading in Amazon businesses. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3443 The Marketing Mix "Converting Prospects Across the B2B and B2C Buyer's Journey (1 Credit)**

How do people who have never heard of a product or company become loyal customers? Marketing leaders use a variety of tactics—from social media, digital advertising, content, customer service, reviews, emails, events, and more—to convert prospective customers to loyal ones. Converting prospects across the buyer's journey from awareness to consideration to purchase in a cost-effective manner is core to every B2B and B2C marketing campaign. During this Sprint we will learn the key elements of the marketing mix and the stages of the buyer's journey they apply to. We'll showcase common tactics and metrics used at each stage, and focus on the importance of using attribution data to improve the effectiveness of each conversion. We will also evaluate how marketing and sales leaders effectively partner across the buyer's journey, learn how the marketing mix can vary across B2B and B2C organizations, and showcase organizations that have developed highly effective marketing mixes. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3444 Using Sustainability to Drive Innovation (1 Credit)**

Want to learn how to make a difference in the world using Sustainability? This course is designed to give you the entrepreneurial skills to incorporate sustainability into a company's products, services, and day to day operations. If you want to learn how to innovate and develop sustainability initiatives that make massive societal and environmental impacts while tackling current challenges like climate change, water scarcity, equity & inclusion, this course is for you. This course provides an essential overview of the challenges that our planet and society are facing and provides you the tools you'll need to ignite your sustainable business vision and bring it to reality. If you have a passion for making a positive impact in the world and an entrepreneurial idea for a new business or a product or business solution within an existing company, come join us! Students will walk away with a working knowledge of sustainability issues and the tools to build sustainable programs into new and existing business ventures that address both a societal and market need. At the end of this sprint course, students should feel empowered with the ability to incorporate sustainable thinking into whatever their future careers hold – whether that be an entrepreneurial venture, the development of a new product, or helping businesses drive business value through sustainability. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross Listed with EVM 4444.

**EVM 3445 Life Design for Entrepreneurs (1 Credit)**

Building a meaningful life doesn't just happen - it happens on purpose. In this Life Design for Entrepreneurs sprint you will approach the challenge of designing your life as an entrepreneur the way a designer would - through empathy, experimentation, wayfinding, prototyping, and action planning. You will participate in highly interactive workshops tailored specifically for entrepreneurs, explore the social and personal narratives that shape your perspectives, and practice ways to reframe problems. A key outcome of this sprint is your design of three possible future paths as an entrepreneur – Odyssey Plans – for your life and career ahead. You will develop tangible ways to move forward and leave with an action plan with accountability. Through hands-on exercises, small group discussions, collaborative ideation, and personal reflection, this course will support the application of design thinking concepts, tools, and practices – all geared to empower self-discovery and design of your career and life as an entrepreneur. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3446 Entrepreneurship in the Arts (1 Credit)**

Whether you are a visual artist, musician, dancer, or other member of the arts community, entrepreneurial capabilities will be crucial for monetizing your artistic mission and interests. In this class, we will explore how to find gigs, successfully manage your arts-focused endeavors as a profitable business, negotiate compensation, and channel a range of experiences into career development. In addition to ensuring this foundational knowledge, we will go beyond entrepreneurial basics to help you develop the tools to support your artistic and entrepreneurial endeavors. We will bridge the gap between artistic and business training to provide an expanded perspective on arts entrepreneurship. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross listed with EVM 4446.

**EVM 3447 Produce Professional Videos with Your Phone (1 Credit)**

Anyone with a phone and an Internet connection can “shoot” and upload a video to a variety of social media platforms (Instagram, Tik Tok, YouTube, etc). Yet, many of these videos are overlooked due to their poor production, amateurish editing, and lack of a promotion plan. This “Sprint” is designed to introduce you to the world of professional phone videography and editing. Topics covered will include: getting the most out of your phone's camera (software and techniques), useful accessories for your phone camera, recording professional audio on your phone, editing video on your phone and connecting your phone to a larger editing system. Strategies for producing product videos, pitch videos, branded content, and entertainment focused media will be discussed. When you complete this course, you will be able to produce highly spreadable and professional looking videos with little more than your phone camera. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3448 Navigating the Gig Economy: Turn Your Passion into Profit (1 Credit)**

Through the emerging gig economy, individuals have many opportunities not previously available to them. Many are turning hobbies, skills, and passions into income-generating side hustles, supplementing their regular income, achieving a flexible work-life balance, experiencing an easier financial transition into a new career, having extra time to obtain additional education, or growing a side hustle into a new business venture. Gig workers provide temporary, short-term services or products to consumers, and over the next five years, this economy is expected to grow from 35% to 50%. As the entire U.S. economy continues to rely less on employees and more on technology, the decline in traditional employment requires a shift in how individuals make money. Whatever your goals, let's turn what you are already good at into a profitable activity that brings additional flexibility and independence to your life. This sprint provides a thorough understanding of the gig economy, including the benefits, challenges, opportunities, and, ultimately, how one can succeed as a gig worker. At the end of this sprint, students will be ready to participate in the gig economy by learning how to leverage freelancing platforms, develop a gig economy pitch, manage finances as a freelancer, enhance marketability, and ultimately understand gig work. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class. Cross listed with EVM 4446.

**EVM 3449 Entrepreneurship through Acquisition (1 Credit)**

Have you wanted to be an entrepreneur but don't have an idea for a new company to start? This course is designed for aspiring entrepreneurs who don't have a business idea or a desire to start a company from scratch but are interested in running and growing a business. The course will allow students to study the process of entrepreneurship through acquisition of an existing operating business. The course is designed to provide students with knowledge and insight about alternative methods of pursuing entrepreneurship and whether a career path of entrepreneurship through acquisition is a good fit for them. This Sprint has asynchronous work that is available 2-weeks prior to the in-person class. The asynchronous work, up to 40% of the total work for the class, is required to be completed prior to the in-person class. There is a post class project that is due two weeks after the in-person class.

**EVM 3700 Real Business Cases in Entrepreneurship (4 Credits)**

The Real Business course is designed to provide students with an opportunity to examine entrepreneurial business challenges through case studies, guest speaker, discussions and field experience. In addition to standard entrepreneurial start-ups, the course will cover international start-ups, gender issues relating to start-ups as well as fostering an entrepreneurial spirit in large organizations. Throughout the course, entrepreneurship will be examined from the perspective of business challenge as well as career choice. Prerequisites: EVM 3351 and degree checkpoint 2.

**EVM 3704 Topics in Innovation and Entrepreneurship (1-4 Credits)**

This course is custom designed to address topics that are currently in demand, such as social entrepreneurship, financing the startup after the Wall Street greed bust, finding angel investors and venture capitalists in Colorado, preparing for a pitch to investors, moving beyond startup stage, and others.

**EVM 3710 Innovation/Creativity-Business (4 Credits)**

This course is about identifying and creating customer needs, looking for innovative ways to address these needs, and pursuing those approaches that appear to have real profit potential. There are exercises to address and stimulate creativity, discussion of organizations that are considered to be creative businesses, and critical evaluation of the hurdles they face and the techniques they use. The course also includes innovative approaches to organizational effectiveness. Cross listed with EVM 4710. Prerequisites: LGST 2000 and degree checkpoint 2.

**EVM 3980 Entrepreneur Internship (0-4 Credits)**

Initial for-credit entrepreneur internship experience for students pursuing a business major and/or entrepreneurship minor, creating the opportunity to acquire meaningful work experience in a supervised, practical setting. Prerequisite: BUS 1440 (minimum grade of C-).

**EVM 3991 Independent Study (1-10 Credits)**

Student devises and completes a special learning project under faculty supervision. Topic and outline must be approved by supervising instructor and department.

## Environmental Awareness LLC (EALC)

**EALC 2001 ESLLC: Local and Regional Environmental Issues (1,2 Credit)**

This course introduces students to Denver and the Front Range region as we investigate the current environmental issues this region faces today. We explore Denver's environmental framework through visits to environmental non-profits and sustainable business, as well as by engaging in collaborative sustainability initiatives on our campus. Excursions to places such as Old South Pearl Street and historic Lower Downtown allow us to trace Denver's past through geological and historical lenses. Restricted to Environmental Sustainability LLC students.

**EALC 2002 ESLLC: The Impact of Development on the Environment (1,2 Credit)**

This course takes a detailed look at human/environmental interactions, with particular emphasis on the explosive population growth and pressures on the global water supply. We discuss the demand on water globally and locally to further demonstrate the impacts of development. Restricted to Environmental Sustainability LLC students.

**EALC 2003 ESLLC: Energy in American Society (1,2 Credit)**

This course examines key issues surrounding energy in American society. Using Colorado's environment as a backdrop, students learn about the different types of conventional, alternative and renewable energy as well as the associated benefits and risks that each option presents. We explore these associated benefits and risks from the raw materials used to create energy all the way to the outputs of energy consumption. Restricted to Environmental Sustainability LLC students.

## Environmental Science (ENVI)

**ENVI 2660 Environmental History of Sonora & Baja Mexico (5 Credits)**

Geography and ecology of desert southwest emphasizing Mexican states of Sonora, Baja California del Sur and Baja California. Traveling by van and lodging in tents, trip covers 3,500 miles, offers hands-on experience with principles and problems of physical geography and ecology in desert environments. Offered only during Interterm.

**ENVI 2950 Topics in Env. Science (1-4 Credits)**

An in-depth coverage of a specific environmental issue, topic, or problem. Topics vary with instructor.

**ENVI 3000 Environmental Law (4 Credits)**

Purpose and applications of federal laws pertaining to environmental protection, including NEPA, RCRA, CERCLA, and Clean Water and Clean Air Acts; addresses role of states in implementation of federal environmental laws.

**ENVI 3991 Independent Study (1-5 Credits)**

Study of a topic not covered in existing course offerings. May be used for work completed in off-campus internships that focus primarily on the mastery of existing knowledge.

**ENVI 3995 Independent Research (1-5 Credits)**

Original research in environmental science topic under sponsorship of a faculty member; applicable to studies that focus primarily on discovery of new knowledge through application of scientific method.

**ENVI 3999 Environmental Science Internship (1-5 Credits)**

Supervised internship in a state, local, or federal office or in the private sector. Prerequisites: 15 quarter hours in the environmental science major and approval of supervising faculty. Maximum of 5 quarter hours total.

## Finance (FIN)

**FIN 2030 Personal Finance for Non-Business Majors (4 Credits)**

This course provides an overview for all Non-Business Majors of topics which are critical to lifetime personal financial planning. The premise of the course is that personal financial planning starts early in life, regardless of a college major, as a new college graduate begins a professional career. The main topics in the course include Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision, and College Financial Planning for Children.

**FIN 2400 The Franchise Journey: Start-up to Exit (4 Credits)**

Gain knowledge, skills, and best practices to grow a business from one location to a national brand—this course is your guide to building, operating, and thriving in the world of franchising. Owning a business can be incredibly rewarding, but it often feels lonely and isolating. Entrepreneurs face challenges that few others understand, bearing the pressure of making pivotal decisions that determine success or failure. Franchising offers a solution—an opportunity to be in business for yourself, but not by yourself. From small beginnings to expansive growth, franchising has the power to transform a small business into a thriving network of entrepreneurs working toward a common goal. Building a successful franchise system requires vision, strategy, and collaboration. That's right—collaboration between a franchisor and its franchisees. This course takes students on a journey through the lifecycle of growing a franchise business, offering insights and practical skills from both franchisor and franchisee perspectives. Whether interested in franchising as a career path or an entrepreneurial venture, students will learn what it takes to start, operate, scale, and exit a franchise business while exploring critical functions, strategies, and tools required for success at each stage. Through real-world case studies and interactive discussions, students will develop the skills to navigate common challenges faced by franchisors and franchisees, equipping them to thrive as future franchisors, franchisees, or franchise business professionals.

**FIN 2800 Financial Decision Making (4 Credits)**

Basic financial principles and analytical skills including ratio analysis, breakeven analysis and leverage, net present value, internal rate of return, and standard forecasting techniques. Prerequisite: ACTG 2200. Restriction: Must be pursuing BSBA or BSACC degree.

**FIN 3030 Personal Finance for Business Majors (4 Credits)**

This course provides an overview of topics that are critical to lifetime personal financial planning, which is especially important as a college student and young professional. Main topics in this course include: Principles of Taxation, Basics of Estate Planning, Lifetime Asset Allocation, Principles of Insurance, Proper Debt Management, the Real Estate Housing Decision and College Financial Planning. Prerequisite: FIN 2800 or permission of the instructor.

**FIN 3060 Life Cycle -Financial Planning (4 Credits)**

This course is one of the intermediate courses for the wealth management track. Students who are interested in pursuing the Certified Financial Planner™ designation should take this course. Study will focus on several aspects of personal financial planning: goals, cash management, budgeting, investing, taxation and estate management. Prerequisite: FIN 3030.

**FIN 3090 Wealth Management (4 Credits)**

This course covers topics such as the Financial Planning Process, Insurance Basics, Investment Basics and Strategies, Retirement Planning, and Estate Planning. We are pleased to work with the College for Financial Planning (CFFP), located in Denver, to provide instruction from their “The Foundations of Financial Planning” program. This course can lead to the Financial Paraplanner Qualified Profession™, which will be a valuable addition to your resume.

**FIN 3110 Financial Institutions (4 Credits)**

FIN 3110 provides a comprehensive analysis of financial institutions and how they operate within the markets. Topics include the management of commercial banks and other financial institutions and their relationship to money and capital markets. Keeping up with current events is integral to this course, as the course evolves alongside current events. Prerequisites: C- in FIN 2800.

**FIN 3120 Commercial Bank Management (4 Credits)**

This course attempts to study the changing environment within which banks operate and develop solutions to current bank management problems. FIN 3120 is designed for students who want to learn more about the commercial banking industry, the impact of the economic environment, managing interest rate risks, services provided, changing regulations, and the vast array of current challenges facing the industry. Prerequisite or Co-requisite: FIN 3110.

**FIN 3150 Advanced Business Valuation (4 Credits)**

Business valuation is at the heart of intelligent decision-making in many areas of finance and business -corporate finance, investment banking, private equity, venture capital, investment management, entrepreneurial finance, estate planning, and financial litigation. This course covers the advanced topics related to business valuation in both a conceptual and practical framework. Students will be exposed to sound practices and the latest developments in valuation at the core of financial professions.

**FIN 3200 Corporate Financial Problems (4 Credits)**

This course is an advanced study of the theory, concepts, and techniques applied in managerial finance. The major focus will be on how managers of corporations create value for their shareholders through asset investment decision, such as capital investment decisions and lease or buy decisions. This course aims to use the application of corporate financial theory in “real world” problems and uses Excel spreadsheets, Excel solver, as well as financial calculators. Prerequisite: FIN 2800.

**FIN 3210 Corporate Financial Theory (4 Credits)**

This course provides an expansion to FIN 3200 to include mergers and acquisitions, risk analysis, valuation and capital structure, corporate financial planning, and financial applications of decision theory. Prerequisite: FIN 3200.

**FIN 3230 Entrepreneurial Finance (4 Credits)**

FIN 3230 focuses on the financial aspects of small and emerging businesses. This course places an emphasis on the new enterprise, funds acquisition and valuation. Upon completion of FIN 3230, students will be able to differentiate between the challenges faced by small businesses compared to large businesses, describe stages of development of a business, calculate the value of an emerging business, among other topics. Prerequisite: FIN 3200.

**FIN 3300 Investments (4 Credits)**

This course provides a survey of marketable securities, markets, regulation, and risk and return measurement alongside an introduction to fundamental and technical analysis. This is an introductory investment course that will provide a sound basis for making and evaluating investment decisions. This course is essential for students who want to become investment professionals, but it will also help with personal investing. Prerequisite: FIN 2800.

**FIN 3310 Equity Analysis (4 Credits)**

FIN 3310 is an advanced course that focuses on the analysis of equity securities. The curriculum is primarily derived from the Candidate Body of Knowledge (CBOK) from the Chartered Financial Analyst® (CFA) Program. The CFA Institute regularly surveys practicing investment experts to develop a CBOK that reflects the knowledge, skills, and abilities of a generalist investment practitioner with four years of experience. Prerequisite: FIN 3300.

**FIN 3340 Fixed Income Securities (4 Credits)**

Fixed income markets are huge and constantly growing. In order to succeed in the financial profession, it has never been more important to understand how these markets work. Additionally, understanding the many factors at play in the fixed income market will develop your skills that are applicable to all areas of investments and risk management as well as greatly improve your understanding of how some of the most significant financial institutions work. Prerequisite: FIN 3300.

**FIN 3360 Analysis of Derivatives (4 Credits)**

The objective of this course is to provide a theoretical foundation for the pricing of contingent claims and for designing risk-management strategies. It is intended for students who have a more quantitative background and are interested in enhancing their knowledge of the way in which derivatives can be analyzed. This course covers: option pricing models, hedging techniques, trading strategies, portfolio insurance, value-at-risk measure, multistep binomial trees to value American options, interest rate options, and other exotic options. Prerequisites: FIN 3300.

**FIN 3410 Multinational Financial Management (4 Credits)**

This course provides a survey and analysis of financial management within an international arena. It covers Eurodollars, Euromarkets, and foreign currencies. Prerequisite: FIN 2800.

**FIN 3500 Financial Modeling (4 Credits)**

FIN 3500 focuses on the construction and development of financial models from corporate finance, investments, and financial markets. It is intended for students who have basic familiarity with Excel, but are not necessarily familiar with R. The course addresses advanced topics such as pro-forma modeling in Excel and uncertainty modeling and portfolio optimization using R. Prerequisite: C- in FIN 2800.

**FIN 3610 Financial Forecasting (4 Credits)**

This course focuses on methods of forecasting both economic and financial variables. Emphasis will be placed on techniques used by business and forecasters. Cross listed with STAT 3620, STAT 4783. Prerequisite: FIN 2800.

**FIN 3700 Topics in Finance (0-4 Credits)**

Exploration of various topics and issues related to finance. Prerequisite: FIN 2800.

**FIN 3710 Reiman Fund I (4 Credits)**

This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the first in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 2800 and instructor's permission.

**FIN 3720 Reiman Fund II (4 Credits)**

This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the second in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3710 (minimum grade of C-).

**FIN 3730 Reiman Fund III (4 Credits)**

This course is a practical portfolio management class designed to cover the major areas of the investment management lifecycle. This course focuses heavily on learning and using leading industry data and analytical tools to support the investment decision-making process in a live portfolio environment. The class recommendations and decisions are implemented in the Reiman Fund portfolio. This is an elective course that is the third in the series of classes involving the Reiman Fund portfolio. Prerequisite: FIN 3720 (minimum grade of C-).

**FIN 3800 Organized Walk Down Wall Street (0-4 Credits)**

This course provides the opportunity to learn and reinforce financial concepts, tools, methodologies, and practices used by Wall Street professionals in the finance industry. After preparatory classes in Denver, students will spend a week in New York visiting and learning from investment bankers, leveraged lenders, individuals in private equity, and asset managers. Prerequisites: FIN 2800 and instructor's permission.

**FIN 3885 Investment Banking and External Financing (4 Credits)**

This course is an advanced Corporate Finance course, focusing on the activities involved in investment banking and the decisions by companies related to external sources of financing. There will be a mix of theory and practice, with many outside speakers providing insight into the practice component. Topics will include business valuation, mergers and acquisitions, startup financing, angel investing and venture capital, bank loans, private equity, stock issuance, and going private.

**FIN 3980 Finance Internship (0-10 Credits)**

Practical experience (field study); requires written report. Prerequisites: FIN 2800 and instructor's permission.

**FIN 3991 Independent Study (1-4 Credits)**

Independent research/study; requires written report. Prerequisites: FIN 2800 and instructor's permission.

## First-Year Seminar (FSEM)

**FSEM 1111 First Year Seminar (4 Credits)**

First Year Seminar topics reflect the intellectual passions of the faculty who lead them. Seminars introduce students to the rigorous academic expectations of university-level work; as small, highly interactive courses, they help students improve skills in one or more of the following areas: writing, quantitative reasoning, critical thinking, presentation and argument, and/or information literacy. The instructor of the seminar serves as the student's mentor for the student's entire first year. This course is required for all first-year students.

## French (FREN)

**FREN 1001 Français élémentaire (4 Credits)**

Connect with the diverse population around the world that uses French by developing practical language skills for meaningful communication in everyday situations. Explore and reflect on cultural practices and perspectives of the world's French-speaking communities while developing cultural insight and the foundations of cultural awareness and understanding. The communicative nature of this course focuses on using French as much as possible to interact with others in everyday situations and achieve basic proficiency. First quarter in a three-quarter sequence. The course is designed for students with no previous experience in French. Students with more than 2 years of high school French must take the placement exam and enroll in a higher-level course.

**FREN 1002 Français élémentaire (4 Credits)**

Connect with the diverse population around the world that uses French by developing practical language skills for meaningful communication in everyday situations. Explore and reflect on cultural practices and perspectives of the world's French-speaking communities while developing cultural insight and the foundations of intercultural awareness and understanding. The communicative nature of this course focuses on using French as much as possible to interact with others in everyday situations and achieve basic proficiency. Second quarter in a three-quarter sequence. This course is designed for students with no previous experience in French. Students with more than 2 years of high school French must take the placement exam and enroll in a higher-level course. Prerequisite: FREN 1001 or equivalent.

**FREN 1003 Français élémentaire (4 Credits)**

Connect with the diverse population around the world that uses French by developing practical language skills for meaningful communication in everyday situations. Explore and reflect on cultural practices and perspectives of the world's French-speaking communities while developing cultural insight and the foundations of intercultural awareness and understanding. The communicative nature of this course focuses on using French as much as possible to interact with others in everyday situations and achieve basic proficiency. Final quarter in a three-quarter sequence. Prerequisite: FREN 1002 or equivalent.

**FREN 1988 Study Abroad Resident Credit (0-18 Credits)****FREN 2001 Français du deuxième degré (4 Credits)**

Grammatical structures, conversation and reading of cultural and literary materials. First quarter of a three quarter sequence. Prerequisite: FREN 1003 or equivalent.

**FREN 2002 Français du deuxième degré (4 Credits)**

Grammatical structures, conversation and reading of cultural and literary materials. Second quarter of a three quarter sequence. Prerequisite: FREN 2001 or equivalent.

**FREN 2003 Français du deuxième degré (4 Credits)**

Grammatical structures, conversation and reading of cultural and literary materials. Third quarter in a three quarter sequence. Prerequisite: FREN 2002 or equivalent.

**FREN 2100 Ecrire, lire et parler (4 Credits)**

Writing, discussion and reading based on a topic or topics in French and Francophone cultures. Close attention paid to paper-writing skills.

Prerequisite: FREN 2003 or equivalent.

**FREN 2301 Capitalism vs. Socialism: Emile Zola (4 Credits)**

This course analyzes the complex interrelationship between the economic ideologies and practices of capitalism and socialism in the works of the nineteenth-century French novelist Émile Zola. Three novels in which these themes are a major driving force of the action will be studied. In the first, *Germinal*, the capitalist system is viewed from the outside by poor, oppressed workers who feel victimized by it. In the second novel, *Money*, the author delves into capitalism at its very heart, the Stock Exchange of Paris. He explores all its machinations but also shows the growing cracks in the system as socialist protestations make inroads at the top. The third work, *The Ladies Paradise*, proposes a possible reconciliation of capitalism and socialism, inspired in part by the writings of French socialist thinkers earlier in the century. In a new era department store, workers' rights and commercial profit are seen to be mutually beneficial. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**FREN 2302 The French Shakespeares: From Feudalism to Absolutism in 17th-Century France (4 Credits)**

This course studies the works of the three leading French playwrights of the seventeenth century: the tragedians Pierre Corneille and Jean Racine and the comic genius Molière. Each of these authors explores various forms of power play that played an important role in the society of their time. These include competitions for political dominance between the feudal aristocracy and an increasingly absolutist monarchy, between the same aristocracy and an emerging middle class, allied with the monarchy, between women and men in their conflicting assertions of rights and privileges, between traditional religion and modern secularism, between the established church and Protestants, between rival liberal and conservative factions within the established church, and between Christian Western Europe and the Muslim Ottoman Empire. Students will read and analyze two plays by each of the three dramatists. This course counts toward the fulfillment of the Analytical Inquiry- Society and Culture requirement.

**FREN 2303 Victor Hugo: Les Misérables and The Hunchback of Notre-Dame (4 Credits)**

The course deals with two famous novels by Victor Hugo: *Les Misérables* and *The Hunchback of Notre-Dame*. Though written in the nineteenth century, these works explore themes that are relevant in contemporary society, like racism, sexism, injustice, marginalization, and poverty. *Les Misérables* is the story of a man, Jean Valjean, a victim of social injustice who redeems himself to become a generous humanitarian, saving himself and everyone around him. This novel explores many social issues and calls out for reform. Discrimination against women and their mistreatment by a paternalistic system is a major theme. The inhuman exploitation of the poor, the homeless, and the marginalized is another major subject. This exploitation can lead to extreme suffering for some people and to criminal behavior for others. Hugo emphasizes the influence of the spiritual in human life. Individuals, even emperors like Napoleon, are invited in different ways to respond to divine love, but some are more able to do so than others. Hugo wrote *The Hunchback of Notre-Dame* to inspire the French public to save the famous cathedral, almost destroyed recently, from demolition back in the 1830s. He tells the story of Esmeralda, a beautiful, kindhearted, and talented young woman, who is a victim of discrimination and persecution because she is a woman and a person of color. She is loved by four men, each of whom contributes, wittingly or unwittingly, to her ultimate destruction. The cathedral itself and the Blessed Lady for whom it is named (Our Lady of Paris) are also major characters. The author shows that the same injustices, inequalities, and prejudices that he tried to combat in his own time already existed in the Middle Ages. Students will refine their critical reading and writing skills as well as substantially develop their argumentative skills. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**FREN 2304 Francophone Women Writers in Translation (4 Credits)**

Why do so many contemporary authors, whose ancestors came from various regions of Africa, Continental Southeast Asia, or the Caribbean's, choose to write their works in the French language? The reasons are to be found in the historical oppressive colonization of these parts of the world by the French Colonial empire of the 19th and early 20th centuries. In this course, we will turn our attention to four contemporary female writers, whose texts we will read and study in their English translation. We will discover the works of Guadeloupean author Maryse Condé, *Tales from the Heart*; Franco-Algerian author, Nina Bouraoui, *Tom Boy*; Vietnamese Canadian author Kim Thúy, *Ru*, and Ivorian author Véronique Tadjo, *In the Company of Men*. Each of these contemporary texts will present us with the often tragic, and also paradoxically heart-lifting, consequences of having to express oneself in the language of the historical oppressor. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**FREN 2400 Communication à l'écrit et à l'oral (4 Credits)**

This course features#intensive practice in spoken and written French, combined with study of a topic in French and Francophone literature and culture. The course also serves as an introduction to critical analysis and appreciation of French and Francophone literary texts. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills. Prerequisite:#FREN#2003 or equivalent.

**FREN 2401 Conversation et composition (4 Credits)**

This course features#intensive practice in spoken and written French, combined with study of a topic in French and Francophone literature and culture. The course also serves as an introduction to critical analysis and appreciation of French and Francophone literary texts. Course content differs from FREN 2400. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills. Prerequisite:#FREN#2003 or equivalent.

**FREN 2500 Qu'est-ce que la littérature? (4 Credits)**

Introduction to critical analysis and appreciation of French and Francophone literary texts. Critical examination and questioning of the conventionally recognized literary genres of fiction, poetry, and theater. This course counts toward the Analytical Inquiry: Society and Culture requirement.

Prerequisite: FREN 2400 or equivalent.

**FREN 2501 La Nature et les animaux (4 Credits)**

Nature and animals: as seen, imagined, and understood by humans. Literature has long made plants, landscapes, birds, and other animals into part of a human story. Through readings of French and Francophone literary texts, we will reflect on the various relationships that we construct with animals and nature. Works studied may include fables where animals serve to voice social values (La Fontaine) and poetry in which natural elements are symbolic of human concerns. But other works in this course will take a different approach: confusing or toppling the "normal" places occupied by humans and animals. Our discussions will occasionally touch on contemporary issues of environmental concern. This course may be taken in addition to other courses in the 25-series. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: FREN 2400 or its equivalent.

**FREN 2502 La France et ses autres mondes (4 Credits)**

IFREN#2502 La France et ses autres mondes (4 Credits) This course reexamines the historical relations and power dynamics between France and its "other" worlds. How and why has France built and maintained its empire in Africa, Asia, and the Americas? How do the leaders of the Francophone world cope with the politics of hegemony put in place by the (ex)rulers? How do the former question and reject the latter in their quest for self-affirmation and nation building before, during and after independence? Our wide range of Pan-Francophone textual and filmic selection from prominent writers and filmmakers will help us answer these questions and classic and newly emerging notions of civilizing mission, Francophonie, Francosphere, postcolonialism, neocolonialism, Afropeanism and Afropolitanism. This course is conducted in French. It counts toward Analytical Inquiry: Society and Culture. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills.##Prerequisite:##FREN#2003 or equivalent.

**FREN 2503 La Satire (4 Credits)**

This course is an introduction to satire in French and Francophone literature. A classical literary technique of denunciation, satire has been recently adopted and adapted in popular televised shows (Les Guignols de l'info in France, Kouthia Show in Senegal, SNL in the US) to recapture important sociopolitical events throughout the world. In our selection of literary texts, films, and sketches such as we will analyze why and how authors make use of satire to denounce the most prevailing problems faced by French and Francophone societies at given times of their historical trajectories. Courses at the FREN 2400 through 2701 level combine introductory study of a topic in literature and/or culture with grammar review and advancement in French language skills.##This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites:##FREN#2003 or equivalent.

**FREN 2504 La Culture au Cinema (4 Credits)**

We will read and interpret contemporary French feature films and other related journalistic or literary texts. We will analyze the ways in which the directors/authors of such films/texts understand and represent a certain notion of "French" culture, in general, and its diverse and varied expressions, in particular. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: FREN 2400, 2500 or any FREN 26XX course.

**FREN 2701 Sujets spéciaux (4 Credits)**

Selected topics in French or Francophone literature and/or culture. May be repeated for credit. Prerequisite: FREN 2400 or equivalent.

**FREN 2988 Study Abroad Resident Credit (0-18 Credits)****FREN 2988S Study Abroad Resident Credit (0-18 Credits)****FREN 3110 La Grammaire à l'oeuvre (4 Credits)**

Our most advanced language course, students perfect their knowledge of French grammar in all of its intricacies. Written and oral practice.

Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.

**FREN 3150 L'Art de la traduction: français-anglais et vice versa (4 Credits)**

In this course you will study techniques of translation from French to English and from English to French. There will be lots of practice which will allow a thorough review of French grammar. In addition, by translating texts we become more aware of the complexities of both English and French, and attuned to the working of literary or other styles of language. The course includes some study of theories of translation or commentaries on its cultural implications or its history. There will be time for reflection on the broader implications of translation such as intercultural understanding, differences, the question of what is a "faithful" translation, or the experience of living bilingually or in cultural translation Prerequisites: FREN 2500, FREN 2501, FREN 2503 or FREN 2701.

**FREN 3501 L'Afrique aux Antilles (4 Credits)**

FREN#3501 L'Afrique aux Antilles (4 Credits) This seminar examines the literary and political enterprises undertaken by Francophone Caribbean novelists, essayists, filmmakers, and artists in re-rooting/routing Africa in the Caribbean. We will particularly focus on how and why the Afro-Caribbean tradition is captured in the distinctive movements of Negritude, Antillanité and Créolité. We will use the latter as standpoints from which to examine the affective, historical, and political implications of Africa in the social lives of Caribbean people. We will also discuss the visions and stances of these writers and theorists on the Black Experience and the correlations that exist between the historical and the fictional in essays as well as novels and films. The seminar is conducted in French and emphasizes discussion, writing and critical thinking. Courses at the FREN 3150 through 3701 level combine a seminar approach to a topic in literature and/or culture with advanced language study, including translation, grammar, or other exercises.

Prerequisite: 8 credits of courses numbered 2400-2701 or their equivalent.

**FREN 3503 Voix/Voies Postcoloniales (4 Credits)**

This seminar is an introduction to Francophone postcolonial theory. Revisiting the postcolony, we will analyze how and why slavery and colonialism have left indelible marks on the lives of people living in the “former” French empire, socially, politically, and culturally. Through a diverse selection of pan-Francophone fictional and theoretical materials, we will examine the literary and political forms of resistance undertaken by the postcolonial authors to reject the status quo. Courses at the FREN 3150 through 3701 combine a seminar approach to a topic in literature and/or culture with advanced language study, including translation, grammar, or other exercises. Prerequisite: 8 credits of courses numbered 2400-2701 or their equivalent (Connect with the Instructor for approval).

**FREN 3504 Identité et Altérité (4 Credits)**

This course offers an examination of the complex notions of Self and Other in contemporary texts in French and Francophone Studies at a crucial time when the political debate on national identity reemerges in the West in general and in France in particular. Two fundamental questions have been at the center of the national debate in France: “Pour vous, qu’est-ce qu’être français aujourd’hui?” [For you, what does it mean to be French today?] and “Quel est l’apport de l’immigration à l’identité nationale?” [What is the contribution of immigration to national identity?]. These “controversial” questions subtly divide France into La France française [French France] and La France étrangère [foreign France]. Our textual and filmic selection features writers and filmmakers from France and the Francophone world who address these aforementioned issues by analyzing the power dynamics between the Self and the Other, the Français/es de souche [People of French descent] and the Immigré/es français/es [French Immigrants]. Courses at the FREN 3150 through 3701 level combine a seminar approach to a topic in literature and/or culture with advanced language study, including translation, grammar, or other exercises. Prerequisite: 8 credits of courses numbered 2400-2701 or their equivalent. (Connect with the Instructor for approval).

**FREN 3505 Masques du moi (4 Credits)**

Qui suis-je??? The question of self, identity, and discovering “who I am” has preoccupied many writers, filmmakers, or other artists. Identity, or one’s sense of self, can be shaped by families, personal experiences, or social and historical forces. Writers might recount the “true” facts of their lived experience or mix in some fictions as they fashion a story of the self. This course will explore the diverse ways that autobiography and others ways of “writing the self” represent the relation of self, world and word. Examples will come from French and Francophone contexts. The class is conducted all in French and emphasizes discussion, writing, and critical thinking. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: Two courses in the 25XX series or their equivalent.

**FREN 3507 Auteurs classiques (4 Credits)**

A comprehensive and analytical study of women authors of France from the Middle Ages to 2000. Courses at the FREN 3150 through 3701 level combine a seminar approach to a topic in literature and/or culture with advanced language study, including translation, grammar, or other exercises. Prerequisites: 8 credits of courses numbered 2400-2701 or their equivalent.

**FREN 3701 Séminaire (4 Credits)**

Selected authors, literary movements and genres in French-speaking world. May be repeated for credit. Prerequisite: FREN 2500.

**FREN 3980 Internship (1-4 Credits)****FREN 3988 Study Abroad Resident Credit (0-18 Credits)****FREN 3991 Independent Study (1-4 Credits)****FREN 3998 Undergraduate Honors Thesis (1-4 Credits)**

## Game Studies (GAME)

**GAME 2010 Foundations of Gaming (1-2 Credits)**

This course introduces students to foundational concepts in gaming from an interdisciplinary perspective. Students will explore what a game is and how games make interdisciplinary connections. Students will be invited to bring their passion, values, and lived experience to think critically through the challenges and opportunities in the rapidly-evolving field of gaming. Restricted to Gaming LLC Students.

**GAME 2011 Applications in Gaming (1-2 Credits)**

Games are as old as human culture, and their ongoing evolution makes them increasingly relevant to both human connection and the public good today. This course provides students with opportunities to explore how games connect with cultures and histories across the globe. In considering applications of gaming, students will engage with principles of ethics, inclusion, and equity in game development and gaming culture. Restricted to Gaming LLC Students. Prerequisite: Foundations of Gaming.

**GAME 2012 Future Directions in Gaming (1-2 Credits)**

This course challenges students to look to the future of gaming for the public good, addressing key questions such as: How do games intersect with large challenges and opportunities facing the world? How do we engage with the designers and players across games to advance the public good? Students will critically examine how game design and play intersect with concepts of the public good. Students will explore their agency in designing and using gaming as a strategy for public good discovery; and make connections with local industry professionals. Restricted to Gaming LLC Students. Prerequisite: Applications of Gaming.

# Gender and Women's Studies (GWST)

## GWST 1112 Introduction to Gender and Women's Studies (4 Credits)

This course provides an introduction to the discipline of gender and women's studies. All cultures engage in a complex process of assigning cultural values and social roles which vary according to the cultural environment in which human interaction occurs. Among these, the process of translating biological differences into a complex system of gender remains one of the most important. Gender and women's studies aims to understand how this process of 'gendering' occurs, and its larger effects in society. This course also explores how this system of meaning relates to other systems of allocating power, including socioeconomic class, social status, ethnicity, religion, sexuality, and nationality. Using this lens, this course explores contemporary social developments and problems. Gender and women's studies is about studying, but it is also about meaningful engagement with the world. This class presents students with a variety of types of texts from sociological articles to literary fictions and documentary and fictional cinema to explore gender from many different directions. This course counts toward the Scientific Inquiry: Society and Culture requirement.

## GWST 1988 Study Abroad Resident Credit (0-18 Credits)

## GWST 2212 Gender, Communication, Culture (4 Credits)

This course considers how gender is created, maintained, repaired, and transformed through communication in particular relational, cultural, social, and historical contexts. This course is designed to help students develop thoughtful answers to the following questions: what is gender, how do we acquire it, how do cultural structures and practices normalize and reproduce it, and how do we change and/or maintain it to better serve ourselves and our communities? Throughout the term, the class explores how dynamic communicative interactions create, sustain, and subvert femininities and masculinities "from the ground up." This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with COMN 2210.

## GWST 2215 Selling Sex, Gender and the American Dream: 1950 - Present (4 Credits)

This introductory course analyzes how commercial culture has evolved into the defining cornerstone of American life over the last sixty years. The first half of the quarter will examine the key historical movements including the Cold War, the Civil Rights/Women's and Gay Liberation movements and investigate how women, ethnic minorities, and members of the LGBTQ community evolved into important "consumer citizens" in the United States. The second half of the quarter will examine these same social groups from a contemporary perspective, and the degree that globalization, "multiculturalism" and "going green" have emerged as dominant tropes in contemporary culture. By moving from past to present, students will gain an understanding of the complex connections between consumption and U.S. nation-building, as well as the consequences "shopping" and the accumulation of "stuff" has had in both the shaping and reconfiguring understandings of what it means to live the "American Dream." This course counts toward the Analytical Inquiry: Society and Culture requirement.

## GWST 2420 Social Inequality (4 Credits)

Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with SOCI 2420.

## GWST 2650 Feminist Qualitative Research Methods and Design (4 Credits)

This course will introduce the fundamental elements of feminist qualitative research methods and design. We will begin by examining various research methods, including ethnography, interviews, oral history, media studies/discourse analysis, and community-based research and analyze the ways in which they aid (and help counter) ways of knowing and understanding the social world. In addition to gaining awareness of the more commonly used qualitative and ethnographic methodologies, you will be challenged to think critically about the mechanics, ethics, and politics of such research, including the role of researcher within it. Enrollment restricted to GWST majors only.

## GWST 2700 Topics in GWST (1-4 Credits)

Current issues or gender and women's studies faculty research interests.

## GWST 2701 Topics in GWST (1-4 Credits)

Current issues or gender and women's studies faculty research interests.

## GWST 2710 Introduction to Queer Studies (4 Credits)

This course provides an introduction to the discipline of Gender and Women's Studies by focusing on mostly queer theory. Queer theory is a comparatively new approach to understanding gender, sexuality, and the world around us, and it has created controversy and disagreement regarding its aims and approaches. What does it mean to queer something? Why is language — the words that we use and that are used on us — so important to queer theory, and what does it mean for how we approach ourselves and those around us? The world in general? How is queer theory different from, and complementary to, women's and gender studies broadly speaking? This course counts toward the Analytical Inquiry: Society and Culture requirement.

## GWST 2720 International Perspectives on Gender (4 Credits)

Gender studies is not only an American phenomenon, but has also developed and changed as it has developed around the world. This course examines gender studies in various countries and societies worldwide through critical works and novels in order to raise new and unexpected questions about our place in the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## GWST 2730 Gender in Society (4 Credits)

How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with SOCI 2730. Prerequisite: SOCI 1810.

**GWST 2785 Family and the Law (4 Credits)**

The government is actively involved in deciding who gets to be a family and what families should look like. The state and its laws are involved in shaping family life, making decisions for family members, and mediating familial conflict. This course looks at the appropriate role of the state in family life by examining state legislation and court decisions and social research on a variety of topics. Cross listed with SOCI 2785. Prerequisite: SOCI 1810.

**GWST 2830 Representations of Women (4 Credits)**

Consideration of images presented of and by women in works of English and American literature from Middle Ages to present. Cross listed with ENGL 2830.

**GWST 2981 Colloquium in GWST (2 Credits)**

Theme changes each year. May be repeated for credit as long as course titles are different.

**GWST 2988 Study Abroad Resident Credit (0-18 Credits)****GWST 3130 The Archaeology of Gender (4 Credits)**

This course examines the ways archaeology can contribute to the study of gender through investigations of the deep through recent past. The class will include readings on gender theory, the uses of archaeological data, and specific case studies of engendered lives in the past. Cross listed with ANTH 3130.

**GWST 3652 Culture, Gender and Global Communication (4 Credits)**

This course explores the ways in which culture, gender, and communication intersect and shape a variety of issues from an international and intercultural perspective. Using a global feminist perspective, it also focuses on paradigms and paradigm shifts in creating social change. Also explored are alternative paradigms of thought, action and media communications by women and indigenous peoples, which have often been ignored, discounted or buried in history. Cross listed with MFJS 3652.

**GWST 3700 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 3701 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 3704 Topics in GWST (1-4 Credits)**

Current issues or gender and women's studies faculty research interests.

**GWST 3710 Putting Feminism to Work (4 Credits)**

In this class students will explore the various ways people are putting feminism "to work" outside the classroom. The first part of the quarter we will examine how liberal arts degrees are translating into "work" for students (and feminists!) after college. Next, we will examine some contemporary issues and trends facing women and other minorities in the workplace (e.g., paid leave; equal pay; sexual harassment and racial discrimination; trends in 21st century jobs). Finally, we will explore organizations and careers where people have translated their feminist knowledge into action, including: local and global NGOs dedicated to gender equity and women's well-being; organizations that aim to advance public policy and political participation; initiatives that focus on racial justice, women's education and leadership; and possible career paths in science, technology, healthcare, and more. By the end of the quarter, GWST students should have a better understanding of current trends that feminists in the workplace face, as well as have some insight about how to harness the exciting opportunities and challenges that await them after college.

**GWST 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis) used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with JUST 3740, RLGS 3740.

**GWST 3950 Feminist, Gender, and Queer Theory (4 Credits)**

This course examines the major theoretical approaches (feminist, womanist, queer, etc.) to understanding gender and other intersecting systems of oppression and privilege. It explores the historical evolution of the theoretical traditions that have informed feminism, queer theory, and gender and women's studies, as well as examining more recent developments within these fields of inquiry. Students apply these theories to a range of texts, empirical data and/or the experiential world. This course may be repeated for credit as long as course subtitles are different. Prerequisite: GWST 1112; minimum of junior standing.

**GWST 3975 Capstone Seminar (4 Credits)**

This course provides students the opportunity to complete a substantial final project for their degree in gender and women's studies, which may take the form of preparation for a thesis, community-based research or service project, or a substantial creative or research project. Students work closely with the director of the program or a faculty member affiliated with the program to devise these projects after spending the first part of the course exploring recent research within the field of gender and women's studies. Prerequisites: GWST major or minor, GWST 1112, GWST 3950, senior standing, or permission of instructor.

**GWST 3985 GWST Internship (2-5 Credits)**

**GWST 3988 Study Abroad Resident Credit (0-18 Credits)**

**GWST 3991 Independent Study (1-10 Credits)**

**GWST 3995 Independent Research (1-10 Credits)**

**GWST 3998 Honors Thesis (1-5 Credits)**

## Geography (GEOG)

### **GEOG 1201 Environmental Systems: Weather (4 Credits)**

First class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; introduction to the fundamentals of the environmental system and the various processes that control weather and climate. The student will have a fundamental understanding of the basic components of the environmental system, familiarity with the role of energy in the atmosphere and its control over cycles of air temperature, a sound foundation in the mechanisms governing cloud formation and precipitation, a basic understanding of the atmospheric circulation and the storm systems which develop within it, and an introduction to the regional variation of climate. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

### **GEOG 1202 Environmental Systems: Hydrology (4 Credits)**

Second class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; the role of water in the environment. This course focuses on the matter and energy flows through the hydrologic cycles, together with the resulting spatial distribution and work of water. Various environmental issues concerning water including drought, water pollution, and human impacts on water supplies are included. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201.

### **GEOG 1203 Environmental Systems: Landforms (4 Credits)**

Third class in a three-quarter sequence that introduces the fundamental processes that govern the physical environment; geological phenomena in various places in the world. Topics include maps and air photos; rocks and minerals; plate tectonics and volcanoes; landforms produced by wind, water, earth forces and ice; and biogeography. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1201 and GEOG 1203.

### **GEOG 1216 Our Dynamic Earth I (4 Credits)**

This is the first quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. Natural processes become hazards when they have the potential to have an adverse effect on humans and their property, or the natural environment. This first quarter of the sequence introduces students to the physical processes associated with atmospheric natural hazards (tornadoes, hurricanes, severe storms) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

### **GEOG 1217 Our Dynamic Earth II (4 Credits)**

This is the second quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in geologic natural hazards (earthquakes, landslides, volcanoes) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1216.

### **GEOG 1218 Our Dynamic Earth III (4 Credits)**

This is the third quarter of a three-quarter sequence devoted to studying natural hazards and their impacts on society. In this course, students investigate the physical processes that result in hydrologic natural hazards (floods, drought, tsunamis) and their societal impacts. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1217.

### **GEOG 1264 Global Environmental Change I (4 Credits)**

First class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

### **GEOG 1265 Global Environmental Change II (4 Credits)**

Second class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1264.

### **GEOG 1266 Global Environmental Change III (4 Credits)**

Third class in a three-quarter sequence for honors students. This course examines the processes and drivers of global environmental change and its consequences for humans and the environment. Enrollment restricted to students in the Honors Program. A lab fee is associated with this course. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: GEOG 1265.

### **GEOG 1410 People, Places & Landscapes (4 Credits)**

In this course, students will study the location of people and activities across the surface of the Earth. Describing the locations and patterns of human activity only lays the foundation for exploring how and why such patterns have developed historically, and how they relate to the natural environment and other aspects of human behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 1988 Study Abroad Resident Credit (0-18 Credits)****GEOG 2000 Geographic Statistics (4 Credits)**

An introduction to statistics primarily for geography and environmental science students focusing on the scientific method, the nature of data, descriptive statistics, and analytical or inferential statistics. Enrollment restricted to Juniors and Seniors.

**GEOG 2020 Computer Cartography (4 Credits)**

Basic map design and execution using existing maps. Topics include map projections, symbolizing quantitative data, use of space, layout, compilation, verbal content, and the use of computer technology in design and production of maps.

**GEOG 2030 Field Methods (4 Credits)**

Part I, outdoor instruction in use of Brunton compass, level, plane table, and alidade; Part 2, data-gathering techniques and preparation for field work in urban problems.

**GEOG 2100 Introduction to Geographic Information Systems (GIS) (4 Credits)**

Overview of GIS, including background, development, trends, and prospects in this technological field; software package and hands-on exercises used to examine basic geographic concepts and spatial data characteristics associated with automated mapping, projections, scales, geocoding, coordinate referencing, and data structures for computerized land-based data bases.

**GEOG 2320 Andean Landscapes (4 Credits)**

This class introduces students to intensive field activities pertinent to the study of Andean individuals and societies. Students study the characteristics of people, activities, as well as landscapes across the locations of Lima, Cusco and Puno in Peru. This course focuses on geography, history, archaeology, anthropology, biology, ecology and sustainability issues surrounding the above mentioned destinations. This course involves moderate physical activity (Inca Trail hike).

**GEOG 2401 The Human Population (4 Credits)**

This course covers the fundamental concepts of demography with an emphasis on its relevance to inquiry in disciplines including economics, business, geography, environmental science, political science and sociology. This course includes computer laboratory work involving the exploration and analysis of census data using geographic information systems. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**GEOG 2410 Economic Geography (4 Credits)**

Economic elements as spatially arranged, distribution of economic activities on the Earth's surface; market, resource and transportation factors in location theory.

**GEOG 2430 World Cities (4 Credits)**

The study of world cities from a geographical perspective emphasizes the following general topics: 1) worldwide urbanization and globalization processes; 2) the study of cities as nodes within global, regional, and national urban systems; 3) the internal spatial structure of land uses within cities; 4) the spatial dimensions of economic, social, political, and cultural processes in cities; and 5) environmental elements, involving human interrelationships with the natural environment in an urban setting. Urban patterns and processes are examined in each of the world's major regions, including in-depth analysis of focus case study cities.

**GEOG 2500 Sustainability & Human Society (4 Credits)**

Sustainability has become a catch phrase in discussions concerning the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students are introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, and social justice, and various metrics used to assess sustainable behavior and practices. Students study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings.

**GEOG 2511 Principles of Sustainability - Honors (4 Credits)**

Principles of Sustainability introduces students to fundamental issues and concepts of Sustainability. This topic concerns the long-term viability of a number of phenomena, from the environment to the economy. Sustainability is commonly defined as meeting the needs of the current generation without compromising the ability of future generations to meet their needs. Students will be introduced to issues inherent in discussions of sustainability. The major areas of focus include definitions of ecological and environmental sustainability, economic and political sustainability, social justice, and various metrics used to assess sustainable behavior and practices. Students will study the theory, principles and practices of sustainability, and participate in discussion and writing exercises based on lecture and readings. This course counts toward the Scientific Inquiry: Society and Culture requirement. Enrollment restricted to students in the Honors Program.

**GEOG 2550 Issues in Sustainability (4 Credits)**

The capstone seminar focuses on a particular problem related to sustainability. Seminar topics vary by instructor, but include a combination of readings, discussion, guest speakers, a group project (either service learning or research), and individual research presentations. Prerequisite: GEOG 2500 and completion of all other requirements for the sustainability minor.

**GEOG 2700 Contemporary Environmental Issues (4 Credits)**

Principles, practices, issues, and status of care of environment; lectures, readings, and discussions focus on causes, effects, and mitigation of a selection of topical regional, national, and international environmental problems including Denver's air pollution, acid deposition, hazardous waste management, global warming, and tropical deforestation.

**GEOG 2701 Special Topics in Geography & Environmental Science (4 Credits)**

Special topics in geography and environmental science.

**GEOG 2730 Geography of Surfing (4 Credits)**

Surfing is often viewed simply as a recreational sport. But it is also so, so, much more. It is a multi-billion dollar global industry, a reflection of global climate patterns interacting with sedimentation regimes and the land, a globalizing culture diffusing from strong regional identities, and a reason to travel to exotic locations and explore the planet. This course uses geographic perspectives to study the many facets of the sport. Geography provides a perfect set of tools to study surfing ranging from the propagation of swells to the diffusion of culture. The goal of the course is to introduce students to the core analytical approaches used in Geography as well as for students to understand that surfing is much more than a recreational sport.

**GEOG 2750 Paleoenvironmental Field Methods (3 Credits)**

Paleoenvironmental Field Methods is a short course that focuses on the use of Quaternary paleoenvironmental research techniques, including extracting and interpreting sediment cores from wetlands and lakes to reconstruct and understand paleoclimatic events.

**GEOG 2810 Geography of Latin America (4 Credits)**

This course studies the countries and islands of Middle America; the interrelationships of peoples, resources and physical features. Cross listed with GEOG 4810.

**GEOG 2815 Geographies of Conquest: Christian, Jewish, and Islamic Societies in Andalusia (4 Credits)**

This course introduces students to the cultural landscapes, former and current, of the different societies that converged in Iberia. The class will focus on medieval Al-Andalus, the Islamic kingdoms that flourished there. During medieval times, Christian, Islamic, and Jewish societies lived side by side in an environment that oscillated between tolerance and open persecution. Science, art, scholarship, and political strategy motivated tolerance while religious fundamentalism and geopolitical considerations motivated persecution. This class will cover the human-environment interactions in the landscapes of Andalusia through an immersive field study and travel experience. This field class equals 4 academic credits. Over a period of 8 days we will visit the cities and surroundings of Madrid, Cordoba, Seville, and Granada in Spain where we will examine and compare cultural geography (past and present), history, and anthropological issues surrounding the communities that interacted in Al-Andalu.

**GEOG 2830 Geography of Europe (4 Credits)**

A field course that examines relationships between humans and the environment in Europe. We study both urban and rural environments to understand the following questions: What are the elements (climate, vegetation, landforms) that characterize European natural landscapes? How have humans modified these natural landscapes? How have environmental conditions influenced human activities (e.g. agriculture, architecture, economic development)? How are these human activities manifested at the landscape scale, and how are they organized in geographic space? How have humans attempted to preserve natural landscapes? Prerequisites: GEOG 1201, GEOG 1202, GEOG 1203 and field quarter application process through the geography department.

**GEOG 2835 Biogeographies of Conservation: Safari landscapes and protected areas (Tanzania) (4 Credits)**

This course introduces students to the landscapes, biodiversity, societies, and human-environment interactions in Tanzania mainland through an intensive and immersive field study and travel experience. This field intensive class equals 4 academic credits. Over a period of 9 days we will visit the greater Serengeti ecosystem, Tanzania where we will examine and compare geography, cultures, history, archaeology, ecology, biodiversity, and sustainability issues. The environment in this part of East Africa offers unique challenges for wildlife and societies. By understanding the locations and patterns of human and animal activity there, students can better appreciate the circumstances affecting individuals and countries other than our own. Through observations, lectures, discussions, readings, assignments and immersion, the course will stress the development of in-situ critical thinking skills and the promotion of environmental sustainability, cultural diversity, and global awareness.

**GEOG 2880 Geographies of South Africa (4 Credits)**

This travel course is designed to give students a first-hand look at the physical and cultural landscapes of South Africa. We will study the varied natural landscapes that produce the commodities (e.g., gold, diamonds, wine, and agriculture) that have attracted the interest of outsiders for centuries and that have influenced the cultural landscapes particular to South Africa. A systematic presentation of the geology of South Africa, and its human history, will unfold throughout our travels.

**GEOG 2988 Study Abroad Resident Credit (0-18 Credits)****GEOG 2990 Professional Development for Geography & Environmental Science (0 Credits)**

This course is designed to prepare graduating seniors for the transition to the working world or graduate study. Lectures and workshops focus on the use of LinkedIn and social media as a means of career networking, employment opportunities, professional development, and resume writing and related career services.

**GEOG 2995 Independent Research (1-10 Credits)****GEOG 3000 Advanced Geographic Statistics (4 Credits)**

The second in a sequence of two courses that address general statistical applications particular to geography, environmental science and other disciplines dealing with a spatial dimension in the data they work with. The focus of this second course is on the more advanced multivariate statistical techniques. The course has a strong applied orientation as particular attention is given to which technique is the most appropriate to use for a given type of problem and how to interpret and apply the resulting statistics. Extensive use is made of computer statistics packages. Homework exercises involving such statistical techniques as multiple correlation and regression analysis, principle components analysis, discriminate analysis and canonical correlation. Prerequisite: GEOG 2000.

**GEOG 3010 Geographic Information Analysis (4 Credits)**

Reviews many basic statistical methods and applies them to various spatial datasets. In addition, several spatial statistical methods are applied to spatial datasets. This course is an in-depth study of the interface between GIS, spatial data, and statistical analysis. Preferred prerequisite: GEOG 2000. Prerequisite: GEOG 2100.

**GEOG 3030 Advanced Field Methods (4 Credits)**

Various field methods used by researchers in physical geography; techniques include field mapping, laboratory analyses, geologic field methods. Prerequisite: GEOG 1201 or equivalent.

**GEOG 3040 GPS for Resource Mapping (4 Credits)**

This course is an introduction to GPS (Global Positioning Systems) concepts, techniques, and applications as they relate to GIS data collection. Lectures focus on satellite surveying, GPS technology, error sources, program planning, data collection design, and Quality Control and Quality Assurance issues for data collection programs. Hands-on lab exercises include navigation, mission planning for a GPS survey, designing a field data collection plan and associated data dictionary, field data collection, differential correction, and data integration into a GIS and map production.

**GEOG 3100 Geospatial Data (4 Credits)**

This graduate-level course is designed to provide graduate students from a broad range of disciplines with the skills to carry out applied research tasks and projects requiring the integration of geographic information system technologies and geospatial data. Students are introduced to a collection of techniques and data sources with a focus on acquiring and integrating data. Legal, ethical, and institutional problems related to data acquisition for geospatial information systems are also discussed.

**GEOG 3120 Environmental/GIS Modeling (4 Credits)**

Facing challenges brought by the dramatically changing global environment, environmental modeling is increasingly used to support geographical and environmental decision making (e.g., spatial conservation prioritization). Environmental modeling is concerned with the characterization, modeling and simulation of environmental phenomena and processes using conceptual and mathematical models. Environmental phenomena and processes taking place in the geographic space are regulated by spatial principles. They also interact with other phenomena or processes in the attribute space. For example, species distribution is not only constrained by spatial factors such as proximity to other species, but also influenced by environmental factors such as terrain and climatic conditions. Due to its superior capabilities of handling spatial data and modeling spatial and attribute relationships, geographic information system (GIS) provides the ideal tools for environmental modeling. This upper-level undergraduate/graduate-level course surveys the concepts and techniques of GIS supported environmental modeling in three general categories: 1) Modeling in the spatial domain where the focus is on modeling spatial principles (e.g., spatial autocorrelation); 2) Modeling in the attribute domain where the emphasis is on environmental correlations (e.g., environmental niche modeling); 3) Modeling in the combined spatial and attribute domain where both spatial principles and environmental correlations are exploited (e.g., geographically weighted regression). Throughout this course, several real-world applications are used to demonstrate the ideas, concepts, and techniques of GIS supported environmental modeling, including crime spatial pattern modeling, species distribution modeling, and soil-landscape modeling and mapping. Prerequisites: GEOG 2000 and GEOG 2100.

**GEOG 3130 GIS Programming with Python (4 Credits)**

This advanced course explores the more technical aspects of GIS functions and data structures. Students have hands-on access to both raster (grid-cell) and vector-based software packages in the form of lab exercises that culminate in a small student-designed GIS project. Prerequisite: GEOG 2100.

**GEOG 3135 Advanced GIS Programming with Python (4 Credits)**

This advanced course in Geographic Information Science (GIS) focuses on developing Python scripts for data manipulation, geospatial analysis, and thematic mapping. Students will explore advanced spatial data structures, 3D and temporal geospatial data, database operations, and spatial analysis, applying these techniques to solve real-world geospatial problems. Through practical exercises, assignments, and a capstone project, students will gain hands-on experience with Python and advanced GIS tools. These activities will equip students with the skills to design, implement, and present customized and automated solutions for geospatial challenges.

**GEOG 3140 GIS Database Design (4 Credits)**

Designing databases to provide a foundation for GIS functions and applications, including investigating techniques used for designing databases in non-spatial environments and learning the applicability to GIS problems. Building on concepts and techniques introduced in the first half to extend traditional techniques and methodologies to model the requirements of spatial problems. Students learn to translate the conceptual spatial model into a physical implementation specific to GIS products. Prerequisite: GEOG 2100 or GEOG 3100.

**GEOG 3165 Geospatial Artificial Intelligence (4 Credits)**

Geospatial Artificial Intelligence (GeoAI) combines geospatial data with artificial intelligence (AI) techniques to analyze, interpret, and model spatial patterns and processes. This interdisciplinary field integrates machine learning and deep learning with geographic information systems (GIS) and remote sensing technologies to extract meaningful insights from geospatial data. GeoAI enables more accurate mapping, modeling and prediction of geographic phenomena to support decision-making, and has been widely adopted in various domains, including environmental monitoring, disaster response, agriculture, urban planning, energy, transportation, etc. In this course, students will dive into the core principles and building blocks of GeoAI with a strong emphasis on real-world applications. Key topics include the use of machine learning and deep learning methods to analyze geospatial data such as satellite imagery and LiDAR point cloud data for image classification, object detection and feature extraction. Example applications include leveraging GeoAI models for land cover mapping, electric power lines identification, flood mapping, fire damage assessment, landslide susceptibility evaluation, etc. Students will also explore advanced GeoAI topics such as geo-foundation models and the most recent ChatGPT-like tools that are developed to automate spatial analysis and map-making workflows. Hands-on exercises, assignments and student projects in this class will involve using GIS tools (e.g., ArcGIS Pro), and AI frameworks to fine-tune existing, or develop and train new, GeoAI models and apply them for various case studies, such as detecting wind turbines, monitoring floods, and analyzing wildfire damages. Through this course, students gain experiences on using GeoAI methods to improve geospatial data analysis to support decision-making in application scenarios such as resource management and disaster response. Prerequisites: GEOG 3130 AND (GEOG 2100 or GEOG 3100 or GEOG 4110) or instructor's permission.

**GEOG 3170 Geospatial Analysis Project (4 Credits)**

This course provides an opportunity for students to apply geospatial data analysis to real-world applications. Students will work as a team to develop a project that requires GIS analysis and/or application development, design a project work flow and management plan, and implement a solution. Students will demonstrate competence in GIS techniques, geospatial data analysis, and project management at a professional level. Instructor permission required.

**GEOG 3190 Lidar: Theory and Applications (4 Credits)**

Overview: Lidar (Light Detection and Ranging) is an active remote sensing system that uses laser pulses to measure the distance between the sensor and a surface or objects. Lidar has become an established method for collecting very dense and accurate elevation values, as well as for characterizing the three-dimensional structure of vegetation and urban land cover. In this course, we will build an understanding of the physical principles behind lidar, develop experience working with Lidar datasets, and survey a wide array of lidar applications for mapping and natural resource management. The course will culminate with a student-directed final project. Prerequisites: GEOG 2100 or GEOG 3200.

**GEOG 3200 Remote Sensing (4 Credits)**

This course acquaints students with the basic techniques of the collection, processing and interpretation of information about the character of the earth's surface from remote locations. Students become familiar with the use of the visible, infrared, thermal and microwave portions of the electromagnetic spectrum as a means of determining land cover and/or land use. Both manual and computer-assisted techniques are discussed and include hands-on applications.

**GEOG 3230 Advanced Remote Sensing (4 Credits)**

This course will build on the basic remote sensing concepts presented in GEOG 3200. Students will explore more in-depth concepts relevant to satellite and airborne remote sensing, including radiative transfer and information extraction. In addition, students will be introduced to two cutting-edge sources of data about the Earth's surface: hyperspectral and lidar (Light Detection and Ranging) sensors. Students will study specific applications of advanced digital image processing techniques for environmental monitoring, natural resource management, and land-use planning. Finally, students will integrate remote sensing and other spatial datasets in the context of Geographic Information System (GIS) analysis. Prerequisite: GEOG 3200.

**GEOG 3300 Cultural Geography (4 Credits)**

Themes and methods of cultural geography including cultural area, landscape, history and ecology.

**GEOG 3310 Culture/Nature/Economics-Human Ecology (4 Credits)**

Cultural adaptation, livelihood strategies and environmental modification among subsistence and peasant societies: responses of such groups to technological change and economic integration.

**GEOG 3330 Political Geography (4 Credits)****GEOG 3340 Geographies of Migration (4 Credits)**

This course explores contemporary movement of people across international borders and the social, cultural, political, economic, and environmental repercussions of such movements. The class looks at the global flow of people across national boundaries and the ways in which these dispersed peoples build and maintain social networks across national borders. While doing so, we address the role of globalization in international migration processes. What motivates people to move long distances, often across several international borders and at considerable financial and psychological cost? How do migrants change—and how in turn do they bring change, social as well as economic, to new destinations as well as places left behind? This course examines politics and patterns of migration, transnational migration, and immigration to the United States.

**GEOG 3350 Qualitative Methods in Geography (4 Credits)**

This course focuses upon qualitative methods in the production of geographic knowledge. Qualitative methods are widely employed by geographers to understand patterns and underlying processes of human and human-environment issues in society. The course is designed to expose participants to the theories, purpose, scope, and procedures of qualitative research. Specific topics include: epistemological theories (ways of knowing); ethics and power in research; research design; data collection techniques in interviewing, participant observation and landscape interpretation, discourse and archive analysis, and case studies; data analysis; and writing and disseminating qualitative findings.

**GEOG 3400 Urban Landscapes (4 Credits)**

Urbanization as a process; national urban systems; internal spatial structure of cities; role of transportation in urban development; location of residential, commercial and industrial activities; agglomeration economies; residential congregation and segregation; environmental justice; urban growth and growth coalitions; decentralization and urban sprawl; edge cities; impacts on the urban environment; world cities; globalization.

**GEOG 3410 Urban Applications in GIS (4 Credits)**

This course uses the tools of geographic information systems (GIS) to explore concepts of traditional urban geography, including defining cities/metropolis, internal urban structures, urban systems, industrial location, social and residential patterns, urban form, environmental problems, and urban planning. The course allows students to practice fundamental skills in GIS (e.g., working with attribute tables, spatial analysis, spatial queries) and cartography (map design, color theory, display of information). Depending on the quarter, students pursue individual projects of interest or client-based projects. Prerequisite: GEOG 2100 or GEOG 3100 or equivalent.

**GEOG 3420 Urban and Regional Planning (4 Credits)**

Historical evolution of planning theory and practices; comprehensive planning process; legal, political, economic, social, environmental aspects of urban planning; urban design; urban renewal and community development; transportation planning; economic development planning; growth management; environmental and energy planning; planning for metropolitan regions; national planning.

**GEOG 3425 Urban Sustainability (4 Credits)**

The 21st century is being called the 'century of the city.' Now more than ever, humans across the globe call the city their home. Many of the world's most pressing crises are manifest in cities, including: greenhouse gas emissions, land degradation, high mass production and consumption, widespread poverty and hunger, and expanding socio-economic disparities. As 'sustainability' becomes part of mainstream discourse, this course explores what sustainability means for urban contexts around the globe. Arguably, the city has the potential to be the most efficient, equitable, and environmental form of modern human settlement. Covering all dimensions of sustainability from a social science perspective, this course focuses on theoretical groundings, practices of urban sustainability, and new research agendas. Major topics include cities and nature; planning and land use; urban form; community and neighborhoods; transportation systems and accessibility; livelihood and urban economies; and social justice and the city.

**GEOG 3440 Urban Transportation Planning (4 Credits)**

A specialized course in the urban planning sequence focusing on issues, practices and policies of urban transportation planning. Recommended for anyone interested in timely transportation topics, such as the feasibility and impacts of light rail transit, the planning and implementation of highway projects, and the role of freight and passenger transportation companies in transportation planning.

**GEOG 3445 Sustainability and Transportation (4 Credits)**

Sustainable transportation aims at promoting better and healthier ways of meeting individual and community needs while reducing the social and environmental impacts of current mobility practices. Given the importance of transport for economic growth, the uncertainties surrounding the availability and price of future sources of energy for transport use, as well as the social and environmental externalities of currently-utilized transport modes, it is imperative that more sustainable ways of providing transportation be developed and utilized.

**GEOG 3460 Air Transportation, High-Speed Rail and Tourism (4 Credits)**

This course delves into the world of commercial air passenger transportation, studying the foundations of the industry, its role in the travel and tourism, and strategies for the future. Foundational topics include the history and geography of air transportation, air travel and tourism, the geography of tourism, airline corporate cultures, the role of government, aviation law, regulation, deregulation, and globalization. Study of the principal elements of airline economics, finance, planning, management, operations, pricing, promotion, cost containment, marketing, and policy provide the opportunity for consideration of strategic options within the contemporary airline industry. Further discussion focuses on the planning and management of airport and airway system infrastructure, the issue of sustainable air transportation, and the role of the airline industry within the context of intermodalism. Cross listed with GEOG 4460.

**GEOG 3500 Reconstructing Quaternary Environments (4 Credits)**

Nature, magnitude, sequence and causes of Pleistocene and Holocene climatic changes; effects of climatic change on plant/animal distributions and human populations; paleoclimatic research methods. Laboratory and field trips. Prerequisites: GEOG core, ENVI 3000.

**GEOG 3510 Biogeography (4 Credits)**

Biogeography focuses on present and past distributions of plants and animals. In this course we consider a number of themes central to biogeography, including plate tectonics and biogeography, the effects of climate change of plant and animal distributions, biogeographic realms, island biogeography, biodiversity, human impacts on plants and animals, and the origins of agriculture.

**GEOG 3520 Geography of Soils (4 Credits)**

Spatial variation in soil characteristics; soil processes, soil morphology, their application in soil studies. Prerequisite: GEOG 1201-1203 Environmental Systems or instructor's permission.

**GEOG 3550 Topics in Physical Geography (1-5 Credits)**

Investigations into various aspects of physical environment.

**GEOG 3560 Fluvial Geomorphology (4 Credits)**

Examines how water and sediment interact at Earth's surface to create a variety of landforms ranging from small rills to continental-scale river systems. Introduces fundamental fluvial processes or channel hydraulics and sediment transport. Examines common fluvial landforms including alluvial streams, bedrock streams, floodplains and alluvial fans. Combines traditional lectures and in-class discussions with numerous field excursions to rivers in the Rocky Mountains and Great Plains. Prerequisite: GEOG 1203, GEOG 1218, or GEOG 1266.

**GEOG 3600 Meteorology (4 Credits)**

The basic theory and skills of weather forecasting. Topics include thorough coverage of atmosphere dynamics and thermodynamics, the evolution of various weather types, the mechanics of storm systems (cyclones, severe storms, hurricanes), creation and interpretation of weather maps, and forecasting techniques.

**GEOG 3610 Climatology (4 Credits)**

Climatology is the study of the processes that result in spatial and temporal variation of weather. This course introduces the student to the processes responsible for the transfer of matter and energy between the Earth's surface and the atmosphere and the average weather conditions that result. In addition, topics of global concern, such as greenhouse effect, El Nino, urban heat islands and acid rain, are discussed. Laboratory exercises provide an opportunity to investigate climate variation and climatic change through the use of a variety of computer simulations. Prerequisites: GEOG 1201, GEOG 1216, & GEOG 1264.

**GEOG 3620 Applied Climatology (4 Credits)**

Climatic impact on environmental systems and human behavior; techniques to investigate climatic characteristics of environmental extremes (floods, blizzards), urban climatology and socioeconomic impacts of climate. Prerequisite: GEOG 1201. Recommended Prerequisite: GEOG 3600 or GEOG 3610.

**GEOG 3630 Dendroclimatology (2-4 Credits)**

Systematic variations in tree ring width and/or density can be used to reconstruct changes in precipitation or temperature well before humans were around to record the variability. This class utilizes hands on methods to introduce the fundamental principles of dendroclimatology. Through readings and lectures, students will learn how tree ring growth can be correlated to climate change. Students will then undertake several research projects to reconstruct past climate variability in the Denver metro area using tree rings. Prerequisite: permission of instructor.

**GEOG 3640 Climate Change and Society (4 Credits)**

The science of anthropogenic climate change will be presented with an emphasis on critical evaluation of the evidence of climate change and future scenarios and migration strategies. Students will be introduced to the latest climate change research, including the Intergovernmental Panel on Climate Change report, and the most recent literature from the field. The societal and cultural implications of climate change will also be discussed. Prerequisites: GEOG 1201, GEOG 1216, or GEOG 1264.

**GEOG 3701 Topics in Geographic Information Science (1-4 Credits)**

Topics vary by instructor.

**GEOG 3720 Mountain Environments and Sustainability (4 Credits)**

Mountain Environments and Sustainability explores the unique physical and cultural aspects of high relief and/or high altitude environments. Covering one quarter of the Earth's land surface, mountains directly or indirectly impact the lives of millions of people. We examine the significance of mountains to climate, water resources, and human activities, and discuss the sustainability of these environments and communities in light of rapid changes in many mountain regions resulting from anthropogenic factors and global change. GEOG 1201, 1202, and 1203 or instructor approval.

**GEOG 3750 Topics in Human-Environment Interactions (1-4 Credits)**

This course investigates various aspects of the relationships between human societies and the natural environment.

**GEOG 3755 Geography of Health (4 Credits)**

The geography of health is a thriving area of study that considers the impact of natural, built, and social environments on human health. This course introduces students to three geographical contributions to health studies. First, it emphasizes the importance of ecological approaches to health, which consider interactions between humans and their environments, including topics such as how climate change might influence disease distributions, and how the built environment can influence patterns of physical activity. A second focus is social theory, exploring how aspects such as race, socioeconomic status, and identity play a critical role in influencing human health. A third section of the course considers how spatial methods (cartography, GIS, and spacial statistics) can help answer health-related questions.

**GEOG 3800 Geography of Colorado (4 Credits)**

This course focuses on the physical and human geography of Colorado, a state that includes the western Great Plains, the southern Rocky Mountains, and the eastern Colorado Plateau. Colorado's varied natural landscapes provide equally varied settings for human settlement and resource use. Recommended Prerequisites: GEOG 1201, GEOG 1202, and GEOG 1203.

**GEOG 3820 Kiwis and Kauris: Sustainability in New Zealand (4 Credits)**

With its tourist tagline of "100% Pure New Zealand," New Zealand prides itself as a world leader in sustainability, with great efforts made towards sustainable use of resources and renewable energy, conservation of indigenous species, and integration of indigenous Maori understandings of the land into sustainability approaches. At the same time, New Zealand faces significant sustainability challenges, particularly related to climate change, invasive species, continued reliance on extractive industries, and histories of oppression/exploitation of native peoples. This class uses a field-based case study approach to unpick some of these complex issues, as we visit local sites and explore topics such as preserving native species, sustainable resource use, ecotourism, and indigeneity.

**GEOG 3825 Geographies of International Development in Africa (4 Credits)**

What are the historical roots of (under)development in sub-Saharan Africa? How is sub-Saharan Africa typically depicted in the media? How can we explain the fact that the Niger Delta provides the bulk of Nigeria's revenue, and yet, it remains the poorest part of the country? Is climate change the major cause of persistent food insecurity in the drylands of Ethiopia and Burkina Faso? How can we make sense of the uneven geography of poverty in Ghana? What explains urban food insecurity in Cape Town, or land struggles in rural South Africa? What are the social processes underlying the spatial disparity in health status in Malawi, or gender differences in HIV rates in Nyanza province, Kenya? And why do land users often resist state conservation efforts in Tanzania? These are some of the critical questions explored in this course. The primary aim is to provide a critical introduction to the geography of sub-Saharan Africa. We will begin by exploring how "the Africa story" is told by the media, scholars and policymakers. Attention will then shift to understanding the key historical processes that shape (under)development in the region. We will cover a broad range of topics, including governance, colonial history, debt and structural adjustment, foreign aid, food and agriculture, gender, climate change, land grabbing, health, population growth, migration, remittances, and resource extraction. We cannot possibly cover all these topics in greater detail; indeed, some are too vast and complex. We will however use specific case studies to illustrate and discuss each of the topics.

**GEOG 3835 Sustainability in South Florida: The Everglades and Florida Keys (4 Credits)**

South Florida represents a unique region in the United States and faces the challenge of trying to balance a tourist economy with protection of natural landscapes and resources. The region's significant sustainability challenges include: climate change (particularly sea level rise), invasive species, fisheries management, and landscape protection. This class uses a field-based case study approach to unpick some of these complex issues as we visit local sites and explore topics such as protecting native species, sustainable resource use, and ecotourism.

**GEOG 3840 Water Resource Analysis (4 Credits)**

The focus of this course is on complex policy, economic and local, national and international, and political issues surrounding resource use in the western U.S. Issues include exploitation of nonrenewable and renewable energy and mineral resources; and flexible responses to changing public policy.

**GEOG 3870 Water Resources & Sustainability (4 Credits)**

In this course, we look at water as both a local and global resource and examine what sustainability means for human and ecological realms. After an overview of the physical processes that drive the hydrologic cycle, surface and groundwater hydrology, we examine how we humans have harnessed water for our use and how we both alter and treat its quality. We examine the legal aspects of water allocation in the U.S. and the groups and agencies that are most involved in managing and overseeing water issues. Finally, we examine the most pressing water "issues" related to wildlife, development, scarcity and conflict. We look forward to imagining the power of both the individual and the collective in meeting our future, global water needs.

**GEOG 3890 Ecological Economics (4 Credits)**

Ecological Economics is an emerging transdisciplinary endeavor that reintegrates the natural and social sciences toward the goal of developing a united understanding of natural and human-dominated ecosystems and designing a sustainable and desirable future for humans on a materially finite planet. In this course we start with a basic overview and summary of the neo-classical economic perspective with a particular focus on the recognized market failures of public goods, common property, and externalities. We begin with a reconceptualization of economic theory by imposing scientific constraints (e.g. conservation of mass and energy, the laws of thermodynamics, evolutionary theory, etc.). Using the ideas developed in this reconceptualization of economic theory we explore the implications for international trade and myriad public policies associated with the ethical, environmental, and economic aspects of sustainability.

**GEOG 3910 Geomorphology (4 Credits)**

An advanced course that examines how Earth's landforms are created by a range of physical processes. Most landforms can be viewed as a result of some combination of erosion, transport and deposition of rock, soil and sediment. The most common agents causing these geomorphic processes are water, wind, ice and waves. This course examines the processes responsible for eroding, transporting and depositing earth materials and compares these processes with the resulting landforms. Prerequisites: GEOG 1202 or GEOG 1217 or instructor's permission.

**GEOG 3920 Remote Sensing Seminar (4 Credits)**

Special topics in advanced remote sensing.

**GEOG 3930 Cultural Geography Seminar (4 Credits)**

Topics, methods and current research in cultural geography.

**GEOG 3940 Urban Geography Seminar (4 Credits)**

International comparison of economic and social, positive and negative aspects of urban systems.

**GEOG 3950 Physical Geography Seminar (2-4 Credits)****GEOG 3955 Pollen Analysis Seminar (3 Credits)**

Pollen grains preserved in sediment provide long-term records of vegetation conditions. Changing proportions of pollen types may reflect climatic fluctuation or human impacts. We review important recent research in pollen analysis (palynology), pollen sampling, laboratory techniques and pollen identification. Students are responsible for counting a number of samples and contributing data for a pollen diagram.

**GEOG 3990 Undergraduate Research Seminar (1 Credit)**

This course is designed to prepare students who will participate in faculty-supervised summer research projects. Students are introduced to research design, use of the scientific method, research expectations and reporting of results. Preparation of formal research proposal with adviser.

**GEOG 3991 Independent Study (1-5 Credits)****GEOG 3995 Independent Research (1-5 Credits)****GEOG 3999 Geographic Internship (0-5 Credits)**

Supervised internship in a government office at local, state or federal level or within private sector. Prerequisite: permission of instructor.

## Geology (GEOL)

**GEOL 2020 Historical Geology (4 Credits)**

Historical geology is the study of the evolution of Earth through geologic time. Geologic features such as rock types and fossils are used to interpret and date past events. This course specifically introduces the basic geologic principles underlying historical geology, the geologic evolution of North America, and the evolution of life on Earth.

**GEOL 2400 Geology and Ecology of the Southwest (5 Credits)**

This field class emphasizes firsthand observations of the interactions among environmental properties (including substrate geology, soils, and climate) and natural vegetation in the Colorado Front Range, Rio Grande Rift, and Chihuahuan desert regions of New Mexico and southeastern Arizona. The course also examines Pliocene and Quaternary volcanism in southern Colorado and New Mexico in addition to Paleozoic and Mesozoic geology along the uplands of the Rio Grande Rift. Prerequisite: permission of instructor.

**GEOL 3100 Environmental Geology (4 Credits)**

Environmental geology examines geologic hazards, both natural and those attributable to human impacts on the environment from urban and regional development. Specific topics may include disposal of municipal solid waste and radioactive waste; flood, earthquake, volcanic hazards; groundwater pollution and withdrawal; mass-wasting phenomena; and energy-related issues. Prerequisite: GEOL 1010, GEOG 1203 or instructor's permission.

**GEOL 3200 Sedimentology/Stratigraphy (4 Credits)**

This course reviews the origin, geologic history, and depositional environments of sediments and sedimentary rocks. Course work concentrates on the identification of sedimentary rocks and depositional environments by first-hand observations of rocks in the Denver area. Prerequisite: GEOL 1010, GEOG 1203 or instructor's permission.

**GEOL 3540 Hydrology (4 Credits)**

This course provides an overview of the hydrologic cycle with emphasis placed on the study of applied hydrology. Discussions include the fundamental characteristics of precipitation, runoff processes, calculation of flood hazards, aquifers (porosity and permeability), the geologic settings of groundwater, the basic physics of groundwater flow, and water supply and use. Prerequisite: GEOL 1010, GEOG 1203 or instructor's permission. Recommended prerequisite: one introductory statistics course.

**GEOL 3900 Geomorphology Seminar (1-5 Credits)**

Hill slopes comprise the vast majority of the Earth's land surface. It is upon these surfaces that nearly all of the human population must exist and, hopefully, flourish. Hill slopes assume various forms, and their shape influences their utility for various human endeavors. Numerous geomorphic processes operate upon hill slopes to determine their form, and human activities strongly influence the frequency and magnitude of these geomorphic processes. Consequently, hill slopes are an interface between the Earth and the human population. Prerequisite: GEOL 3010 or permission of instructor.

**GEOL 3991 Independent Study (1-5 Credits)**

## German (GERM)

**GERM 1001 Elementary German (4 Credits)**

DU's first-year German courses introduce learners to the German language and German- speaking cultures while teaching the skills to be a life-long second language learner. German 1001 is the first course in this series. The teaching style is communicative, focusing on using the language to interact with others in everyday situations. Additionally, we discuss (in English) topics that both the U.S. and German culture have in common such as immigration, health care, and education. This course will help you achieve basic proficiency in German across all three modes of communication: interpersonal, interpretive, and presentational. Our goal is that by the end of the first-year German sequence, you will produce language at the Novice High level and be able to comprehend language at the Intermediate Low level. We will use as much German as possible in class. Mistakes and misunderstandings will happen often and are an important part of the learning process. Our goal is communication, not perfection. To support our goal of communication, our textbook uses a flipped classroom concept. Pre-class work will be assigned so that when we are together, we can move more quickly and focus our energy on interaction and creation. This course uses a performance assessment model to give students feedback and assign grades.

**GERM 1002 Elementary German (4 Credits)**

DU's first-year German courses introduce learners to the German language and German- speaking cultures while teaching the skills to be a life-long second language learner. German 1002 is the second course in this series. The teaching style is communicative, focusing on using the language to interact with others in everyday situations. Additionally, we discuss (in English) topics that both the U.S. and German culture have in common such as immigration, health care, and education. This course will help you achieve basic proficiency in German across all three modes of communication: interpersonal, interpretive, and presentational. Our goal is that by the end of the first-year German sequence, you will produce language at the Novice High level and be able to comprehend language at the Intermediate Low level. We will use as much German as possible in class. Mistakes and misunderstandings will happen often and are an important part of the learning process. Our goal is communication, not perfection. To support our goal of communication, our textbook uses a flipped classroom concept. Pre-class work will be assigned so that when we are together, we can move more quickly and focus our energy on interaction and creation. This course uses a performance assessment model to give students feedback and assign grades. Prerequisite: GERM 1001 or equivalent.

**GERM 1003 Elementary German (4 Credits)**

DU's first-year German courses introduce learners to the German language and German- speaking cultures while teaching the skills to be a life-long second language learner. German 1003 is the third course in this series. The teaching style is communicative, focusing on using the language to interact with others in everyday situations. Additionally, we discuss (in English) topics that both the U.S. and German culture have in common such as immigration, health care, and education. This course will help you achieve basic proficiency in German across all three modes of communication: interpersonal, interpretive, and presentational. Our goal is that by the end of the first-year German sequence, you will produce language at the Novice High level and be able to comprehend language at the Intermediate Low level. We will use as much German as possible in class. Mistakes and misunderstandings will happen often and are an important part of the learning process. Our goal is communication, not perfection. To support our goal of communication, our textbook uses a flipped classroom concept. Pre-class work will be assigned so that when we are together, we can move more quickly and focus our energy on interaction and creation. This course uses a performance assessment model to give students feedback and assign grades. Pre-requisite: German 1002 or equivalent.

**GERM 1022 German Cinema: An Introduction to German Culture, History, and Politics through Film (4 Credits)**

This course is taught in English. It is an invitation to German film-making since the end of the First World War. In this class we will explore 20th-century German identity, culture, history, and politics through film analysis and readings. Studying the most famous and influential films in the history of German cinema, we will explore numerous topics (including "The Golden Twenties", national-socialistic propaganda, post-WWII German nation states, terrorism, reunification, multiculturalism, education and youth, the arts, gender, and class) and investigate how a popular culture medium like film can capture the political, social, and economic atmosphere in society at different times in German history. This courses fulfills the Analytical Inquiry-Society and Culture requirement.

**GERM 1416 German Civilization: History, Politics, and Culture (4 Credits)**

This course is an introduction to intellectual and cultural currents in German civilization from the Enlightenment to the present, emphasizing the arts in the context of history and philosophy from the late 18th century to around the mid-20th century. Readings include excerpts from such thinkers as Kant, Fichte, Marx, Nietzsche, Weber, as well as poetry and short fictional works by Heine, Jünger, Remarque, Borchert, and others. The readings are supplemented by films that students are expected to have watched at the beginning of each week. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERM 1417 Recasting German Identity: Germany since the End of the Cold War (4 Credits)**

Recasting German Identity: Germany since the end of the Cold War examines how Germany, a once divided nation in the heart of Europe held responsible for two World Wars, has wrestled to overcome forty years of division between a capitalist West- and communist East Germany. Our class will examine both the pains and gains of 30+ years of unity in the 'Berlin Republic'. We will analyze the so-called "normalization" of Germany's contemporary internal and international affairs. At the center of our class are various political, historical, but mostly cultural developments (& intellectual debates) that have reshaped German identity in profound ways given the country's exceptionally violent 20th century history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**GERM 1988 Study Abroad Resident Credit (0-18 Credits)****GERM 2001 Intermediate German (4 Credits)**

Continuation of German 1003. Taught in German. In this course, you will strengthen your communicative skills, intercultural competencies, and knowledge of German-speaking cultural history. Discussing a variety of shorter texts and visual arts, you will learn more advanced grammatical structures, expand our lexical repertoire, practice intercultural comparison, and develop an appreciation for diversity. Prerequisites: GERM 1003 or placement exam.

**GERM 2002 Intermediate German (4 Credits)**

Continuation of German 2001. Taught in German. In this course, you will strengthen your communicative skills, intercultural competencies, and knowledge of German-speaking cultural history. Discussing a variety of shorter texts and visual arts, you will learn more advanced grammatical structures, expand our lexical repertoire, practice intercultural comparison, and develop an appreciation for diversity. Prerequisites: GERM 2001 or placement exam.

**GERM 2005 Reading and Conversation (4 Credits)**

Continuation of German 2002. Taught in German. This class introduces you to more complex cultural topics, materials, and communicative settings. Reading a variety of texts, you will expand your vocabulary and gain a deeper understanding of German grammar, syntax, and inclusive language. You will also practice various oral communication tasks and scenarios, increasing your confidence and ability to communicate effectively with different audiences. This course prepares you for cultural discussion and literary analysis in our lower-level, content-based seminars. Prerequisites: GERM 2002 or placement exam.

**GERM 2100 Conversation and Composition (4 Credits)**

Taught in German. In this course, you will refine your writing and speaking skills through a variety of fun speaking and writing prompts. You will discuss sociopolitical, historical, and cultural topics, enhancing your critical and analytical thinking skills, intercultural competence, and appreciation for diversity. This course will help you communicate more freely, accurately, and creatively and produce detailed texts on a wide range of subjects. Prerequisites: GERM 2005 or placement exam.

**GERM 2350 German-Speaking Film and Media (4 Credits)**

Taught in German. This course explores the German-speaking media landscape. Engaging with film and media theory, we will examine the multi-faceted role of media in society and discuss how people choose, consume, and are consumed by media at various times in history and in different political systems. We will analyze selected cultural topics and their representation in German-speaking media (television, news media, digital media, film, etc.) and draw comparisons to their media coverage in other cultures. This course also introduces you to the history of German-speaking cinema, discussing movies from the beginnings of film to the present. Prerequisites: GERM 2005 or placement exam.

**GERM 2418 The Memory of Evil. Germany and the Holocaust since 1945 (4 Credits)**

The Memory of Evil examines the long and difficult path Germans faced in their (ongoing) efforts to atone for the crimes of the Holocaust, that is, to preserve the memory of evil associated with their national past. Anti-Semitic incidents in Germany receive considerably more international press than such incidents elsewhere. Yet, what generally gathers less attention is the way Germany reacts. Our class will investigate what the Jewish moral philosopher Susan Neiman considers the success story of Germany's decades-long process of "coming to terms with the past" – Vergangenheitsbewältigung or Vergangenheitsaufarbeitung – a process Neiman believes exemplary and worth replicating by other nations such as the US. We will start in the immediate aftermath of World War II, at a time when Germany lay in ruins, both physically and morally bankrupt. By means of written and visual sources, we will study examples of Germany's sweeping engagements with its violent past, increasing our awareness of the challenges and rewards that have accompanied this historical reckoning from an initial period of repression after the war to the unsparing cultural revolution of the 1960s and 70s, from the time around Germany's reunification in 1990 to the construction of the Memorial for the Murdered Jews of Europe that opened in Berlin after much debate in 2005, all the way to the current rise of right-leaning and antisemitic party Alternative for Germany (AfD) and the 'cancel culture' that has accompanied the most recent conflict between Israel and Gaza.

**GERM 2701 Topics in Literature & Culture (4 Credits)**

Taught in German. This course explores authors, topics and/or movements in the German-speaking world. Topics vary. Repeatable if topic differs. Prerequisites: GERM 2005 or placement exam.

**GERM 2800 Advanced German Grammar and Composition (4 Credits)**

Taught in German. This course offers an in-depth grammar review. We will practice advanced grammatical structures and inclusive language through quizzes, writing assignments, cultural projects, and presentations. This course will help you advance all four skills (reading, writing, listening, speaking), developing a high level of grammatical accuracy and complexity. Prerequisites: GERM 2005 or placement exam.

**GERM 2900 Comedy, Humor, Satire In German-Speaking Cultures (4 Credits)**

Taught in German. In this course, we will analyze comedy, humor and satire as tools to expose political issues or social injustices and to raise existential, religious, and philosophical questions. We will examine various German, Austrian, and Swiss works (drama, poetry, prose, films, cartoons, paintings, theoretical and autobiographical texts), discussing topics such as ethno-comedy, Jewish humor, satire in the visual arts, famous German-speaking humorists and comedians, escapist humor in the GDR, theories of humor and laughter. Prerequisites: GERM 2005 or placement exam.

**GERM 2910 Contemporary Trends and Tensions in the German-Speaking World (4 Credits)**

Taught in German. This course focuses on sociopolitical, economic, and cultural trends and tensions in contemporary German-speaking societies. Critically analyzing various authentic materials (newspaper articles, literary texts, caricatures, art, talk shows, documentaries, films), we will deepen our cultural knowledge and draw comparisons to other cultures. Topics include gender identities, religions, multiculturalism, poverty, sports, climate, economic trade, health, regional traditions, and topics that students suggest. Prerequisites: GERM 2005 or placement exam.

**GERM 2920 (Multi)Cultural Identities and Values in the German-Speaking World (4 Credits)**

Taught in German. Social roles and groups shape and/or are defined by shared cultural knowledge and history. This course explores historical and contemporary (constructions of) social identities in German-speaking societies. We will analyze the depiction of various social identities in literary, political and theoretical texts, films and other visual media, art and music and relate them to societal norms, expectations, and power hierarchies at the time. Topics include East and West German identities, youth cultures, multiculturalism, race, gender roles and identities, class, education, and topics that students suggest. Prerequisites: GERM 2005 or placement exam.

**GERM 2988 Study Abroad Resident Credit (0-18 Credits)****GERM 3050 Advanced Conversation and Composition (4 Credits)**

Taught in German. This course focuses on fluency, accuracy, and inclusive language in oral and written communication. Completing numerous writing and speaking projects, you will enhance your language confidence, intercultural competence, and appreciation for diversity. We will discuss complex cultural topics in various communicative settings and experiment with different writing styles, genres, and registers. This course will prepare you for cultural discussion and literary analysis in our upper-level seminars. Prerequisites: GERM 2005 or placement exam.

**GERM 3701 Topics Literature & Culture (1-4 Credits)**

Taught in German. This course explores authors, topics, and/or movements in the German-speaking world. Topics vary. Repeatable if topic differs. Prerequisites: GERM 2005 or placement exam.

**GERM 3910 Nature, Environmentalism and Sustainability in German-Speaking Cultures (4 Credits)**

Taught in German. This course critically analyzes the reputation and self-perception of German-speaking countries as 'green leaders' and models of engaged (local and global) citizenship. We will explore interrelations between three central manifestations of environmental awareness in German-speaking cultures: the long aesthetic tradition of depicting nature (as idyllic refuge, agent, inspiration, scientific object, or powerful threat) in literature, art and film, the history of green politics and contemporary environmental debates, practices and protests. Furthermore, we will search for bridges between the Sciences and the Humanities and compare Western interpretations of the non-human world with non-Western epistemologies, such as Traditional Ecological Knowledge. Prerequisites: GERM 2005 or placement exam.

**GERM 3920 Border Crossings: Exile, Migration, Travel (4 Credits)**

Taught in German. This course explores the importance of border crossings in contemporary and historical German-speaking cultures. Using a variety of cultural materials (images, music, film, political, theoretical and literary texts, travelogues, autobiographies), we will discuss the various reasons, challenges, and opportunities for border-crossers at various times in history and analyze how exile, travel, and migration experiences changed individual and cultural perceptions of Self and 'Other'. Furthermore, we will examine the impact that German-speaking border-crossers had on the lives, cultures, and lands of native populations. Topics include diasporic and national belonging, asylum, acculturation, integration, settler colonialism, Indianthusiasm, work migration, gender, race, construction of 'Otherness'. Prerequisites: GERM 2005 or placement exam.

**GERM 3930 Rebels and Revolutionaries in the German-Speaking World (4 Credits)**

Taught in German. The right to protest is essential in a democracy; protest is a form of political participation that can be a catalyst for social change. This course explores historical and contemporary protest movements in German-speaking cultures. We will analyze diverse cultural materials (political, theoretical, literary and autobiographical texts, movies and documentaries, paintings, songs) to discuss various revolutionary movements and their motivations, ideologies, goals and impact on German-speaking societies at different times in history. Topics include workers' movements, colonialism, resistance during dictatorships, terrorism, student protests, civil disobedience, climate activism. Prerequisites: GERM 2005 or placement exam.

**GERM 3940 Health, (Dis-)Ability and Well-Being in German-Speaking Cultures (4 Credits)**

Taught in German. In this course, we will analyze health, (dis-)ability, and well-being as key concepts in cultural identity constructions, not only for the imagination of the nation as a 'fit body' (body politic), but also for the definition and exclusion of presumed disposable, disabled/disabling, and worthless 'Others'. Analyzing various cultural materials, we will discuss the central role that health discourses played in the past (in European colonial ambition, in the establishment of democracies, in Nazi ideology and in socialist propaganda). We will also examine health(care) discussions in contemporary German-speaking cultures, focusing on topics such as healthcare systems, integration, women's health, refugees, climate, and other current topics that students suggest. Finally, we will compare Western understanding of health with other, non-Western epistemologies, such as Indigenous definitions of well-being. Prerequisites: GERM 2005 or placement exam.

**GERM 3950 Religion, Spirituality and Social Justice (4 Credits)**

Taught in German. Religion is a central cultural practice. As a unified system of beliefs and practices, religion influences individual, communal and national perceptions, values, behaviors and concepts of belonging. This course explores the histories of various religions in the German-speaking world: Christianity (Catholicism, Protestantism), Judaism, Islam and Buddhism. Analyzing political, theoretical, literary, autobiographical texts and visual arts, we will discuss topics such as migration and integration, holidays and practices, persecution and resistance, church and state, violence and war, science and ideology, spirituality and social justice, missions and colonialism. Prerequisites: GERM 2005 or placement exam.

**GERM 3988 Study Abroad Resident Credit (0-18 Credits)****GERM 3991 Independent Study (1-5 Credits)****GERM 3997 Internship in German (1-4 Credits)****GERM 3998 Distinction in German (1-5 Credits)**

## **Global Commerce and Transportation (GLBL)**

**GLBL 3100 Procurement, Sales, and Customer Relationships (4 Credits)**

This course exposes students to the theory and practices commonly used by best-in-class organizations relative to procurement, sales, and customer relationship management. The focus of the course is on the tactical approaches involved in marketing to potential customers, the procurement process, account set-up, quality customer experience, and customer relationship management including customer retention strategies.

**GLBL 3200 Transportation Modes and Nodes (4 Credits)**

This course provides an overview of the role of freight transportation to drive global economic development from its historical roots into the future. Global supply chains are built on a foundation of transportation modes. This foundation has evolved with value derived from speed, cost, capacity, flexibility, reliability, and technological adaption. Greater risk is now present in this foundation stemming from cyberthreats, political volatility, and public health crises. Transport modes have grown over time to include maritime (ships and barges,) surface (rail, trucks, and vans,) air (planes, helicopters, and drones,) and underground (pipelines.) Students will learn about the characteristics of these modes and the nodes with which they interact including ports, terminals, distribution centers, and flow centers. Whether working for a manufacturer, distributor, retailer, or e-tailer, students learn how effectively manage transportation, which is a key factor in profitability and customer satisfaction.

**GLBL 3250 Supply Chain and Logistics Systems (4 Credits)**

This class provides an overview of supply chain management as a key business function that holistically integrates functions such as planning, purchasing, inventory control, transportation, and warehousing. Students learn about topics such as designing supply and distribution networks aligned with the firm's business and supply chain strategy as well as improving supply chain performance via SCOR, Lean, and Six Sigma techniques. Students explore how various aspects of supply chain management are integrated within the firm as well as coordinated with suppliers, trading partners, and logistics/transportation providers to deliver superior customer satisfaction. Making sound strategic and tactical decisions are learned by managing a global consumer electronics supply chain via an online simulation. Best practices are investigated by studying some of the world's top supply chains.

**GLBL 3275 Warehouse and Asset Management (4 Credits)**

Learn the essential elements of warehouse management, focused on the role of an operations manager to lead people, develop and manage processes, and design and implement technologies. The scope of the course will be related to both warehouses and distribution centers within the supply chain. Gain an understanding of the role of warehouses and distribution centers in relation to the overall global supply chain system.

**GLBL 3300 Transportation Policy, Safety, & Security (4 Credits)**

This course provides an overview of the many public policy dimensions of transportation systems. It examines government regulations affecting transportation businesses, environmental regulations, labor laws, finance, public welfare, and the general relationship between economic policy and transportation investment. The class focuses on personal mobility (autos, highways, urban transit, and airlines), including freight transport (rail, ports, and pipelines). Future directions in transportation-related public policy are also addressed.

**GLBL 3325 Integrated Operations Planning and Inventory Management (4 Credits)**

The world of interconnectedness requires sophisticated planning and execution to supply the world. Sales, Inventory, and Operational Planning (SIOP) are parts of an integrated business management process through which the executive/leadership teams can continuously achieve focus, alignment, and harmonization among all functions of an organization. In this course, students will learn the essential components of this process, how strategic operational plans are developed and synchronized, the inputs and outputs of the process, and the ways Key Performance Indicators (KPI) influence and guide the organization.

**GLBL 3350 Transportation Safety and Security (4 Credits)**

Transportation security in the 21st century challenges the capabilities of our global transportation infrastructure. This course explores the ever-evolving requirements imposed on industry practitioners and encourages students to develop skill sets and knowledge required to embed security in transportation systems. We examine the evolution of the industry's concerns about safety, including concerns about security, and analyze how these concerns drive workforce training and resource allocation. Students assess technological and economic challenges to ensure safe and secure transportation systems. In addition to physical security issues, this course also examines the issues of resilience and preparedness, and how they drive industry practitioners, policy planners, and stakeholders.

**GLBL 3500 Field Experience in Transportation and Supply Chain (4 Credits)**

This course is an experiential learning collaboration between a student, a faculty advisor, and a professional supervisor, offering students an opportunity to apply their content knowledge to a professional setting. Students will integrate academic theory with practical experience in a professional field of interest. Additional site-specific learning outcomes are established in conjunction with the site supervisor.

## Global Studies (GS)

**GS 2050 21st Century Global Issues (4 Credits)**

As problems migrate across national boundaries, they become global issues which is known as globalization. These issues are related to population growth and the movement of people, international trade and finance, energy use, environmental impact, the spread of disease and hunger, and the control of weapons of mass destruction. These are all examples of challenges that must be addressed by all nations. This course guides students through the complex process of understanding the character of global issues, including identifying the root causes, the social and political implications, the impacted populations, and applicable power players. Students will analyze global issues, applying their analyses through team and individual projects. Additionally, students will be encouraged to reflect on how these issues may affect them personally and how to formulate strategies to critically assess with transnational problems.

**GS 2100 The Past as Prologue (4 Credits)**

The present-day character of the world's major regions—Africa, Asia, the Middle East, Europe, and Latin America—has been shaped by centuries of history, not only specific events such as wars, elections and peace treaties but also long-term developments in culture, language, religion and politics. This course provides a framework for thinking about general historical trends in selected regions of the world, while emphasizing case histories of countries in each region. By examining these national histories, students not only deepen their knowledge of key regions around the world, but also gain analytical skills that enable them to continue learning about other cultures and societies, and the many ways in which the past shapes the present.

**GS 3050 Economics and Finance (4 Credits)**

This course begins with a review of fundamental economic concepts, such as supply and demand, cost analysis, money and banking, saving and investment, and the nature and limitations of markets. The emphasis is on how basic economic factors influence all types of organizations and what organizations do to manage their financial affairs through budgets, financial controls, investments, and collaborations with other organizations. The role of international and financial institutions, such as the World Trade Organization, World Bank Group, and International Monetary Fund, will be examined. How globalization has altered the economic and financial arrangements between countries is also explored. Students learn to utilize economic and financial tools to identify and analyze international business opportunities.

**GS 3100 Understanding International Trade (4 Credits)**

Basic concepts of international economics are reviewed to explore how economic factors, such as exchange rates, balance of payments, inflation, labor, tariffs, and the flow of capital, affect trade. Using existing data sources, students explore what countries and regions trade with each other, to what extent, and in what products and services. Students analyze the international trade interactions of a particular state, country, or region, as well as the historical and current factors that impact these patterns. Students explore legal constraints to engaging in international trade, such as requirements for export licenses and screening for individuals and countries where trade is illegal.

**GS 3150 Global Politics (4 Credits)**

What will the global political landscape look like in the next 10, 25, 50 years? Which countries will dominate the political order? Will there be any dominant Superpowers, or will power be distributed among a variety of nations? In this course, students examine the shifting role of government as the world becomes more interconnected through global trade, communication, and travel. Historical theories of international relations are contrasted with new theories that attempt to describe the complex interdependence between countries. What strategies do nation-states employ to advance their global interests? How do nation-states and international organizations interact? What is global governance? In addition to answering these questions, this course also focuses on the changing role of people, of non-governmental organizations (NGOs), and of multinational businesses in this interconnected world.

**GS 3200 Global Peace & Security (4 Credits)**

Conflict abounds as do issues of safety and security in a global society. This course begins with a short history and theoretical understanding of global conflict and security issues in exploring paradigms of identity, difference, and otherness, including the rise of extremism. From there, students explore the impact that global conflict and security have on the following shared human experiences: economic, humanitarian, political, religious, cultural, and environmental/health. The content of the course is framed by a shared need to infuse more sustainable forms of diversity, equity, and inclusivity into the peace creation and safety needs of our global society in building greater ways to create awareness, empathy, and cooperation across nations and cultures.

**GS 3250 Society Through Novels and Film (4 Credits)**

Artistic modes of expression such as novels and film offer a lens for understanding the forces and concerns that have shaped countries, regions, and peoples. Literary and artistic movements arise because of the confluence of history, creative choices of artists, geopolitical events, technological advancements, and other sociological movements. Students will analyze key works of literature and film to learn how various works can provide an understanding of society's cultural values, politics, and diverse perspectives. Simultaneously, students learn how their values, history, assumptions, and technology trends influence the views of artistic creators and observers. Students examine themselves by looking at their presence in their interactions with creative works and how these factors affect their understanding of the region, area, people, and diversity.

**GS 3300 Human Geography (4 Credits)**

Human geography analyzes people and places and how they interact across broad expanses of history and multi-continental distances. This course examines the roles geography and humanity have played in shaping one another in space and time. This course pays special attention to how and why cultures have developed in particular spaces. Global, regional, and national factors are emphasized in considering how a specific place shapes one's identity, values, and traditions. This course also provides an introduction to GIS mapping and considers issues of global health, eco-refugees, climate change, poverty, sustainability, war, and economics. Students gauge the influence of media and governments on issues of geographic importance.

**GS 3800 The Puerto Rican Paradox: Challenges and Opportunities in Uncertain Times (4 Credits)**

The Commonwealth of Puerto Rico is a tropical paradise boasting vibrant communities, rich cultures, and abundant natural resources. Once coined a "natural jewelry box" by the BBC, Puerto Rico offers sparkling turquoise waters, bioluminescent bays, lush mountainous terrain, and colorful colonial architecture. It is also plagued by a debilitating debt crisis, political corruption, and a crumbling infrastructure, which, particularly in the aftermath of hurricanes Irma and Maria, have caused many residents to flee the island in search of better opportunities and more stable living conditions. In this course, students will examine the paradox that is Puerto Rico. Drawing from literature on culture, history, power, and politics, students will research a topic of their choosing, with the professor's approval. They will then work with local communities in Puerto Rico on a project of mutual interest and importance, culminating in an approach or proposal for addressing the issue(s) at hand. Students will be required to spend 5 days on-site in Puerto Rico, plus any necessary travel time. This course will give students broad exposure to the history and culture of Puerto Rico, in addition to a nuanced understanding of a specific industry, issue, or problem. It will additionally highlight the power, privilege, and oppression that exists in our own backyards on this U.S. Commonwealth island.

## Health Sciences (HLTH)

**HLTH 2000 Science of Human Health (4 Credits)**

This keystone course focuses on individual, community and population health. Students will be introduced to topics including health & wellness through the lifespan, population and public health, health promotion and education, and social determinants of health and health equity. This course will provide students not only the insight about the scientific basis, but also the social and cultural contexts of human health and health care. Students will gain an understanding about how behavioral health and social factors affect human biology and health. In addition, students will learn to effectively employ the critical skills and competencies necessary for understanding and evaluating human health and health care, as well as to effectively identify and learn to contribute to evidence-based health care.

**HLTH 2010 Health Systems Science (4 Credits)**

This keystone course will provide knowledge about how education, policy and healthcare delivery function within health care systems. Students will be introduced to topics including healthcare delivery systems and management, health policy and economics, and health informatics and technology. Students will gain an understanding about the healthcare delivery organizations and systems in the United States, contributions of government and public policy to health care, and the economics that drive healthcare systems. These content areas will be presented within the themes of the 3 pillars of health equity: access to health care, quality of care, and health outcomes. Students will gain an appreciation of a perspective from the patient experience in the healthcare system. Furthermore, this course will challenge students to effectively identify and critically consider the interactions and conflicts between these entities.

**HLTH 2200 Medical Terminology: Fundamentals and Applications (4 Credits)**

This course presents fundamentals and applications of medical terminology. This review and application of human anatomy and physiology is suitable for students who have completed some introductory biology and who are working toward a career in medicine or for whom communication with healthcare providers is essential. Students study basic anatomy and physiology at a level that is intermediate between introductory and advanced courses, discover the medical history behind medical terminology, analyze medical case studies, and work to develop skills for clear and concise articulation of the basic concepts of anatomy and physiology behind medical diagnosis and treatment. This mastery of medical terminology helps to build a strong foundation for advanced coursework in anatomy and physiology.

**HLTH 2210 Health Education and Promotion (4 Credits)**

This course will provide students foundational knowledge about how to deliver health education and promote healthy behaviors to community. Students will focus on integrating evidence-based research into instructional strategies including preparing culturally sensitive presentations, leading difficult conversations, and activities to reinforce healthy behaviors. This course includes a weekly service-learning activity, where students will present approved workshops to youth on topics such as: mental health, sexual health, healthy behaviors and harm prevention, and accessing health care. The content delivered to youth aligns with the National Health Education Standards.

**HLTH 3000 Seminar in Health Science (1-2 Credits)**

This seminar is the capstone course for the Human Health Science & Systems program. This class will focus on the current understanding of several topics in human health. Emphasis will be on critical reading and discussion of current scientific literature related to human health and health care. Students will learn to recognize and appreciate different approaches and methods of health-related research. Students will utilize and integrate knowledge from previous courses to understand to present effective discussions on current topics in health. For students' continued development of strong oral communication skills, student presentations of primary literature will generate the basis of discussion. Prerequisites: HLTH 2000 and 2010.

**HLTH 3155 Leadership in Health (1 Credit)**

This course addresses the basic leadership skills necessary to succeed in the dynamic professional environment of health science and healthcare. Topics covered include individual and team leadership strategies and professional skills related to communication, management, strategic planning, implementation of change, negotiation, conflict resolution, and team building. Students will determine leadership strengths and weaknesses and learn to adapt their leadership approach to meet specific situations and challenges. Students will strengthen their leadership practices through a series of lectures, case studies, guided interactions and group exercises. Prerequisites: HLTH 2000 and 2010.

**HLTH 3600 Cultural Responsiveness in Health Care (2 Credits)**

To contribute to reducing health inequities and improving health outcomes, this course will promote an improved understanding and responsiveness to the realities of social and structural impacts that influence the health of an individual or community. Topics will include health care delivery and access, political economy of health care, implicit biases, professionalism, relational leadership, dealing with patients in difficult situations, and health equity. The course will help students learn to provide more informed and effective care and promote a more culturally sensitive and responsive future workforce in healthcare, while also serving community needs.

**HLTH 3700 Topics in Health (1-4 Credits)**

Topics in the area of, but are not limited to, human health and disease, environmental or social impacts on health, healthcare delivery, evidence-based medicine. Students will gain knowledge of a specific topic in human health and/or health care through discussion of current literature and research. May be repeated for credit. Prerequisites: HLTH 2000 or 2010.

**HLTH 3870 Medical Ethics (4 Credits)**

This course will present knowledge and discussion of ethical issues that arise from advances in the biomedical sciences and medicine. Several specific ethical issues and policies related to methodologies and procedures, emerging medical technologies, treatment decisions, doctor-patient relationship, informed consent, medical experimentation/clinical research, and health care reform. The overall objective of this course is to enhance awareness and critical thinking skills for future science professionals who are able to express their views in a culturally-responsive manner and listen to and appreciate others' perspectives. This course will focus on discussions, case studies, and projects. Prerequisites: BIOL 2120, or HLTH 2000.

**HLTH 3991 Independent Study in Human Health Science and Systems (1-4 Credits)**

In this course, students can engage in independent study focused on a topic in human health science and/or human health system science under faculty supervision. The independent study in Human Health Science and Systems provides individualized opportunities to gain knowledge on a specific health topic of interest to the student. This course complements the student's didactic coursework in established health topics and provides an opportunity for students to delve deeper into a specific health-related topic. The student is responsible for identifying a faculty supervisor before registering for class. Maximum of 5 quarter hours of HLTH 3991 and/or HLTH 3993 and/or HLTH 3995 may be applied toward the 20-quarter-hour requirement for a minor in Human Health Science & Systems. Prerequisites: HLTH 2000 or HLTH 2010.

**HLTH 3993 Internship in Human Health Science & Systems (0-4 Credits)**

An internship is the opportunity to engage in a unique educational experience outside of the didactic setting of the classroom. This course includes a structured practical and productive internship experience that allows for the integration and application of coursework in a professional setting. The internship can be administrative, clinical, programmatic, or research focused. The internship must be a new experience for the student. If the proposed internship is within same setting as previous experience, the internship activities must be clearly different from past experiences. The course credit is variable (1-5 credits) depending on the rigor and time commitment required to complete the internship. Prerequisites: HLTH 2000 or 2010.

**HLTH 3995 Independent Research in Human Health Science and Systems (1-4 Credits)**

Independent research is an opportunity for students to be engaged in research within the fields of human health science or health systems studied under the guidance of a faculty member. This course complements the student's didactic coursework in established health topics and provides an opportunity for students to engage in focused research on health-related question. research. Students will effectively employ the critical research skills and competencies necessary critique and understand current literature, identify gaps in current knowledge, and understand and employ appropriate research approaches and methods for addressing the health-related research question. The student is responsible for identifying a faculty supervisor before registering for class. Maximum of 5 quarter hours of HLTH 3991 and/or HLTH 3993 and/or HLTH 3995 may be applied toward the 20-quarter-hour requirement for a minor in Human Health Science & Systems. Prerequisites: HLTH 2000 or 2010.

## Healthcare Leadership (HC)

**HC 3000 Healthcare Systems (4 Credits)**

Healthcare Systems provides a framework for providing management excellence in healthcare organizations. The administration, organization, human capital, governance, finances, and delivery of health care in the United States are emphasized throughout this introductory course. External influences and societal trends that impact value, access, and the cost of care will be examined so that students can help shape a future healthcare system in the United States.

**HC 3050 Healthcare Policy (4 Credits)**

This course provides the student with a theoretical as well as a practical exploration of healthcare policy both with the healthcare delivery system and the health industry. The motivations, creation, implementation, and evaluation of policy in healthcare are examined through the 4P (patient, provider, payer, population) perspective framework. Students will be introduced to key U.S. and global governmental and regulatory agencies related to the health industry. Students will objectively evaluate how policy changes occur at the federal and state levels and then how they subsequently affect functioning as a citizen and a professional. Students will assess the role of policy in the health industry from the community level to the federal level and its effect on public and private sectors. Students are strongly encouraged to complete HCA 3000 before registering for this course.

**HC 3100 Economic of Healthcare (4 Credits)**

This course introduces students to the economics of the healthcare delivery system and the health industry. Students will first examine fundamental economics and then transition to an overview of macro and micro economics. Due to the global reach of healthcare, students will survey international economics, and the course will conclude with a section on personal finance economics. These topics are explored through the 4P (patient, provider, payer, population) perspective framework, and this course relies heavily on case studies due to the broad scope and changing application of economics in healthcare.

**HC 3150 Healthcare in the Digital Age (4 Credits)**

This course is designed to familiarize students with the ever-evolving range of technology in the healthcare delivery system as well as the health industry. While the course covers electronic health records (EHRs) and health information exchanges (HIEs), the course is equally focused on the growing and diverse range of digital, virtual, and health information systems with the health industry. These topics are explored through the 4P (patient, provider, payer, population) perspective framework so students are prepared to progress in the digital age. The course concludes with a survey of strategies to connect the digital efforts in the health industry with digital efforts across multiple industries.

**HC 3250 Healthcare Administration (4 Credits)**

This course provides students the opportunity to explore the landscape of healthcare administration. Although administration spreads across both the healthcare delivery system and the health industry, this course will focus heavily on the complex structure of administration within the healthcare delivery system. The organizational structure, processes, and management involved in healthcare administration will be explored through the 4P (patient, provider, payer, population) perspective framework. This course concludes with an introduction to change management, integrated delivery systems, and cross-functional leadership.

**HC 3300 Quality Management in Healthcare (4 Credits)**

This course serves as an introduction to quality management in the healthcare delivery system as well as the health industry. Students will explore the planning, assurance, support, and improvement involved in quality management through the 4P (patient, provider, payer, population) perspective framework. Due to the collaborative nature of quality management in the health industry, students survey seminal and emerging principles and processes. This course relies heavily on case studies due to the broad scope and changing the application of quality management in healthcare.

**HC 3950 Healthcare Practicum (4 Credits)**

Practicum is an experiential learning collaboration between a student, a faculty advisor, and a professional supervisor. Students will integrate academic theory with practical experience in a professional field of interest. Additional site-specific learning outcomes are established in conjunction with the site supervisor.

**HC 3980 Healthcare Internship (4 Credits)**

Students will use their internships to integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting. Independent work products will be created.

## Hebrew (HEBR)

**HEBR 1001 Elementary Hebrew (4 Credits)**

Hebrew 1001 is designed for students with little or no prior knowledge of Hebrew. This course aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. First course in a three-quarter sequence.

**HEBR 1002 Elementary Hebrew (4 Credits)**

Hebrew 1002 is the second course in a three-quarter sequence. This course aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. Prerequisite: HEBR 1001 or equivalent.

**HEBR 1003 Elementary Hebrew (4 Credits)**

This is the third course in the elementary Hebrew sequence. It aims to provide practical language skills for meaningful communication in real-life situations. It is designed to develop all four language skills: listening, speaking, reading, and writing, weaving them all into daily classes through a communicative-cultural approach. Prerequisite: HEBR 1002 or equivalent.

**HEBR 2001 Intermediate Hebrew (4 Credits)**

Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 1003 or equivalent.

**HEBR 2002 Intermediate Hebrew (4 Credits)**

Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2001 or equivalent.

**HEBR 2003 Intermediate Hebrew (4 Credits)**

Continuation of language study with emphasis on the living language of contemporary Israel. Three-quarter sequence. Prerequisite: HEBR 2002 or equivalent.

**HEBR 2370 Multicultural Israel: Food, Film and Beyond (4 Credits)**

In this course participants will examine Israeli culture and identity using a broad array of materials and topics, including popular music, film, sports, and food. Topics include Israel's society, ethnic relations, and the Arab minorities in the Jewish state. Students also discuss whether there is a unique Israeli culture and the struggle for Israel's identity. Emphasis is on interdisciplinary approaches to exploring how cultural processes and artifacts are produced, shaped, distributed, consumed, and responded to in diverse ways. Through discussion, research, writing and various media resources, class members investigate these varied dimensions of culture; learn to understand them in their broader social, aesthetic, ethical, and political contexts. This course fulfills the Analytical Inquiry - Society & Culture common curriculum requirement.

**HEBR 2380 Multicultural Israel through Popular Music (4 Credits)**

The music of Israel is a combination of Jewish and non-Jewish music traditions that have come together over the course of a century to create a distinctive musical culture. This course presents a brief cultural history of Israel through popular music. To examine the central and lively role that songs have played in the shaping of Israeli identity, this class examines a range of diverse lyrics, including selections from folk music, pop and rock music, Levant influenced music, and more. Topics covered include Shirei Eretz Israel (the songs of the land of Israel), military ensembles, song festivals and competitions, the rise of minorities, outstanding performers and songwriters, international influences, and media's impact on audience preferences. This course fulfills the Analytical Inquiry: Society and Culture common curriculum requirement.

**HEBR 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)**

The course goals are three-fold: a) to facilitate students' communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students' knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with JUST 2745. Prerequisite: HEBR 2003 or equivalent.

**HEBR 2991 Independent Study (1-5 Credits)**

Independent Study.

**HEBR 3010 Aspects of Modern Hebrew: Readings, Films, Songs, and Discussion (4 Credits)**

This course is designed for students who have successfully completed Intermediate Hebrew. It facilitates communicative competence in Hebrew across interpretive, interpersonal and presentational modes through constant immersion in Hebrew. It also expands knowledge of Israeli culture while interacting solely in Hebrew. This course is not open to native speakers of Hebrew. Cross listed with JUST 3010. Prerequisite: HEBR/JUST 2003.

**HEBR 3991 Independent Study (1-5 Credits)**

## History (HIST)

**HIST 1110 Ancient Rome (4 Credits)**

This course examines the history and culture of Rome from earliest times to the death of Augustus in A.D. 14. We look at political and military developments of Rome as it went from a monarchy, a republic, and an empire. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1240 Comparative History of Medicine (4 Credits)**

This class examines the development of different traditions of medicine, comparing the history of modern scientific medicine with the histories of various forms of what today is called "alternative medicine." It requires no previous background in science, medicine, or history, but is meant to engage students interested in any one of those fields. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1250 Food in East Asian History (4 Credits)**

This class examines the relationship between food and health in East Asian history. We focus on how that relationship, and the way people understood it, changed over the past century and a half. In other words, we focus not only on how (and what) people in East Asia have eaten, but also on how they have thought about eating. This course asks how western dietary ideas and practices have interacted with traditional East Asian ideas and practices over the past century and a half. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1260 Modern South Asian History (4 Credits)**

This course will explore the modern history of the subcontinent, through the colonial experience to the postcolonial construction and division of nations, with a particular focus on India, Pakistan, and Bangladesh (although students are also welcome to take on optional readings on Sri Lanka, Afghanistan, and Nepal, among others). The course will consider the legacy of colonialism in India, and debates over whether postcoloniality is really "post." We will explore the history of nationalisms – state, ethnic, religious, and linguistic – and the ramifications of Partition and the wars over Bangladesh and Kashmir. This course will also explore the history of South Asia in the rest of the world, through the migration of its diaspora and its role in the Bandung moments of Afro-Asian solidarity in the global struggle against oppression. We will take into account discourses regarding tradition and modernity, democracy and secularity, and the terms "freedom" and "terror" – and what this means for the lived experiences of South Asians in today's world. Readings will include historical accounts, theoretical texts, films and literature, as well as primary sources. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1320 European Culture in the World Wars (4 Credits)**

This course covers the history of Europe in the first half of the twentieth century—a time of crisis, extreme violence, and fascinating cultural production. Within the context of war, economic crisis and political extremism, we study the ways in which artists, writers, composers and film makers responded to the dramatic events they witnessed. We also examine European governments' attempts to shape public opinion through propaganda and mass media. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1330 History of Ireland (4 Credits)**

We examine the creation of modern Ireland from the 16th-Century to the present, including a brief discussion of the Celtic and Medieval periods. Major themes of analysis and discussion include changing definitions and representations of 'Irishness', competing questions of identity and national membership and how these debates influenced the development of various nationalist movements in both the past and the present. The role of women, gender, violence, emigration, and other social and geographical factors within Irish society are used to examine Ireland's evolution into a modern state and its relationship with the United States, Britain, and the rest of Europe. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1340 The British Monarchy (4 Credits)**

This course explores the role of the monarchy in British society from Elizabeth I in the Sixteenth Century to Elizabeth II, the current Queen. We discuss how monarchs adapted to changing political situations and how they attempted to shape public perceptions. We also explore the ways in which expectations of the monarch have changed, from an almost absolute ruler to a constitutional monarch whose role has become largely ceremonial. Over the course of the nearly five hundred years covered in this period, Britain experienced a regicide, the forcible overthrow of a king, and a voluntary abdication, yet the institution of monarchy has proven remarkably resilient. In the twentieth century, as the royal family struggled with a series of scandals, some came to believe that the institution had run its course and was due for abolition, but today public fascination with royalty remains strong. We focus on the relationship between the public image of the monarchy and its political role as a way of understanding broader changes in British society in the modern era. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1350 History of the British Empire (4 Credits)**

This course explores the rise and fall of the British Empire from its origins during the English conquests of Wales, Scotland and Ireland; explorations of the world, through commercial expansion under the British East India Company; the rise of Britain as the preeminent world imperial power during the 19th century and its eventual decline and legacy during the late 20th century. Using a variety of secondary articles, primary sources, films and monographs, this course analyzes highly debated issues including the interconnected nature of British society and developments out in the Empire, both cultural and political; the important role that women, gender, and racial ideologies played in British dominance of one quarter of the globe; how the empire and representations of Empire changed over the century; and finally, the impact of that empire upon issues of identity and population in a post-colonial Britain. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1360 World War One (4 Credits)**

Historians have argued that the First World War definitively shaped the twentieth century. It set the stage for World War II; it redefined the role of government in citizens' lives; it brought technology full-force into power struggles between nations; it simultaneously birthed communism and fascism; and it desensitized entire generations to violence and brutality. In this class, students explore this very dramatic and influential war. Students unfamiliar with the war will more firmly grasp the historical significance of the event while students who may be familiar with the war will gain new insights and interpretation of how the war was conducted and why the war mattered. Students read the words and thoughts of those who participated in the war, as well as interpretations of the war by military, social, and political historians. This course counts toward the Analytical Inquiry: Society and Culture requirement. There are no prerequisites for this class.

**HIST 1370 Monks, Merchants, and Monsters: Medieval Travelers (4 Credits)**

When we think of the Middle Ages we tend to think a static and isolated world, one without the benefits of fast travel or the convenience of easy communication via cell phones and e-mail, a world where much of the map was blank or contained the ominous words 'Here There Be Dragons.' And yet even in this period enterprising and intrepid men and women were on the move, exploring new places and meeting new peoples. In this course we will examine a number of different medieval travelers, from missionaries and religious pilgrims to merchants and diplomats, to explore how and why medieval people left home, and how these voyages shaped not just the travelers themselves but the lands they came from and those they entered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1380 Barbarians at the Gates: Civilization and the Other in the Pre Modern World (4 Credits)**

From the birth of the first cities in Mesopotamia in c. 7000 BCE writers and thinkers have been concerned with the peoples who lived beyond their walls. The Ancient Greeks coined the term "Barbarian" and this word continues to have incredible resonance even today. This course will look at a variety of pre-modern primary sources, from the very first written epic all the way to the discovery of America to examine how ideas of civilization and barbarism are created and used by pre-modern authors to understand both the world around them and their own identities. As we engage with these sources we will also work to see how these pre-modern events and ideas continue to impact our own conception of the past and our present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1510 War and the Presidency (4 Credits)**

This course examines four wars in American history and the relationship of those wars to the sitting presidents. Together we explore the reciprocal influence of Abraham Lincoln and the Civil War, Woodrow Wilson and World War I, Franklin Roosevelt and World War II, and Lyndon Johnson and the Vietnam War. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1520 Immigrant Voices in Modern America (4 Credits)**

This United States has aptly been called "a nation of immigrants." In this course, we explore the immigrant experience of the last century by examining different forms of personal testimony—autobiographies, diaries, novels, personal correspondence, and oral histories. Listening to these various immigrant voices helps us to understand the processes at work as newcomers and their children (first- and second-generation immigrants) struggled to achieve economic stability and to define their identity as Americans. The course readings as well as the student projects are intended as instruments with which to assess the influence of old world customs, religion, education, work, gender and anti-immigrant prejudice in shaping the process of adaptation to American society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1530 History of the United States since 1865 (4 Credits)**

From the devastation left by slavery and the Civil War to the dizzying changes brought by globalization in our own time, this course sweeps through the last 150 years of the American experience. We wrestle with questions like the following: How did the Industrial Revolution, the Great Depression, two world wars and the Cold War change America, and ordinary Americans' everyday lives, and what legacies did these events leave for our own day? How have Americans defined and divided themselves—by race, gender, class, or otherwise—and how have such categories shifted over time? Where did we get our political parties and ideologies? Our work habits and habits of play? Our ideas about "big business," "big government," "American exceptionalism," or the "American dream"? As we consider these and other big questions, we also explore how historians make sense of U.S. history, and how we can make it relevant to our own times and our own lives. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1550 America in the Sixties (4 Credits)**

This course examines one of the most tumultuous eras in U.S. history, its role in the reshaping of American life after World War II, and its legacies for the present. What constitutes "the sixties"? Was it an era of discord, dissolution, and decline, or of empowerment and democratization? Together we sort through conflicting perceptions of the period and closely examine some of the most salient issues of the decade - including the war in Vietnam, ethnic and race relations, youth culture, feminism and gay liberation, and the rise of conservatism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1560 Seeing Red: Native Americans and Photography (4 Credits)**

The struggle over whether the photographic record would include only representations of the savage (dead savage, noble savage, the disappearing savage, Indian chief, Indian warrior, Indian shaman, Indian maiden), or would expand to include Native realities (the threat of violence, bureaucratic control, family relationships, traditional culture, engagement with modernity, humor/irony, and aesthetic sovereignty) has been fought throughout photography's 200-year history. This course introduces students to photographic visual analysis and an abbreviated history of Native Americans and photography. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1570 Pioneering in Colorado: Land, Bodies, & Violences in the Sand Creek Massacre (4 Credits)**

This course uses critical analysis of primary sources to understand Sand Creek as a crucial site necessary to understand the history of Colorado and Denver University. Students will critically read and analyze primary source documents including newspaper articles, testimonies from massacre participants and survivors, artwork, material culture, letters, oral history, music, and proclamations to understand Sand Creek as a place and a history related to the creation of Colorado and Denver University. Additionally, the class will visit specific sites associated with Sand Creek to understand place-making and memorialization as a function of historical meaning-making and analysis. These sites include the Sand Creek Massacre site, History Colorado, the Silas Soule memorial plaque, and Riverside Cemetery (where Silas Soule and Joseph Cramer are buried). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)**

This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with JUST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1610 The History of the Crusades: 1095-1300 (4 Credits)**

This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1705 Modern African History (4 Credits)**

This course is a survey and introduction to modern African history from the late 19th century to the present. We will explore the period of European colonialism and its postcolonial legacy, focusing on the experiences of Africans at this time. Themes addressed in this class will include gender, age, class, race and ethnicity, and the historical legacies of both the precolonial and colonial eras to the construction of the postcolonial nation-state. Assignments will be geared towards teaching students to think and write like historians, and understand the basic tenets of historical inquiry, such as how to use primary and secondary sources and differentiate between them, and construct a basic historical argument that advances historiographical understandings of the topic in question. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1715 Middle Passages: Atlantic World Migrations (4 Credits)**

Middle Passages examines first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians in order to trace the origins, expansion, and decline of traffic in captive Africans in addition to its impact on four continents. The course seeks to answer, among others, the following questions: Why were Europeans in Africa? Why were Africans enslaved? What did African experience on the journey to slavery in the Americas? Which came first, racism or slavery? What is the middle passage? If we want to understand how the US (and not only the South), Western Europe, parts of Latin America, and much of Africa got to be how they are now, we need to know something of the human commerce that profoundly shaped them. In this course, students consider individual, national, and institutional experiences of the Middle Passage by exploring a textbook that overviews the histories of the trans-Atlantic Slave Trade and accounts from a series of primary sources.

**HIST 1725 African American History to the Civil War Era (4 Credits)**

History 1725, African American History to the Civil War Era, is designed to introduce students to the trends, events, issues, and people that shaped African American history from Colonial America through the Civil War. In particular, this course will focus on presenting Black people as active agents in the American historical narrative that significantly shaped their lives even within the context of slavery. To this end, this course sets out to discredit American myths about people of African descent, examine critical elements of black slavery and freedom in the United States, analyze the slave experience with particular emphasis on black resistance and resiliency, and identify the economic, political, and social factors that shaped and were shaped by African slaves, their descendants, black communities and institutions, and plantation society. If we want to understand the US (and not only the South), but we also need to know something about how human commerce and those that became commodities profoundly shaped the nation. By examining first-hand accounts by enslaved people and enslavers, modern depictions, and analyses by historians, we trace the origins and narratives of Africans in America and their descendants. We seek to answer, among others, the following questions: Why were Africans enslaved? What did Africans and their descendants experience in slavery in the Americas? What did free and freed African Americans experience in the Civil War era? What influence did African Americans have on the North and South conflict and its resolution? In addition to treating the above questions, I intend to return often to two major content themes. First, this class is concerned with tracing the historical contours of the African American experience in America, noting the similarities in experiences of different gender, age, and (dis)ability categories and yet important variations over time and place. Understanding this experience is crucial for a comprehensive understanding of American history. Second, we explore the changing influences of labor and capitalism and how they shape people, places and institutions. We note in this course that African Americans fundamentally affected the social and economic lives and futures of the world, underscoring the global relevance of this history. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1850 20th Century LGBTQ History in the United States (4 Credits)**

This course uses a cultural history approach to explore the experiences of lesbian, gay, bisexual, transgender, and queer peoples in the “long twentieth century” (1880s-2010s) United States. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1900 Veterans Stories (4 Credits)**

This course will examine the history of Veterans and Veteran issues in the United States from the Civil War to the present. Students will learn about Veteran issues from multiple guest speakers and work to preserve and commemorate the historic contributions of Veterans. Students will participate in a variety of research projects, including conducting oral histories/interviews with members of Denver’s Veteran community, regarding their life experiences and their military service. Students will also research the lives and legacies of Veterans buried at Fort Logan National Cemetery, in the service of various Veteran community projects. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 1988 Study Abroad Resident Credit (0-18 Credits)****HIST 2015 Ancient Greece (4 Credits)**

A survey of the history of the Greeks and their civilization.

**HIST 2022 The Roman Empire (4 Credits)**

This course examines the history and culture of ancient Rome during the height of the empire. We look at political and military developments of Rome as it transformed from a republic into an imperial power. We also study social and cultural aspects of the Romans, who originally were simple pastoralists living along the Tiber but in time became the rulers of the entire Mediterranean region. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2030 Ancient Near East (4 Credits)**

This course traces the history of the ancient Near East from the earliest civilizations in the Fertile Crescent down through the Persian Empire. Particular attention is given to the political, military, and social developments in the region as well as the cultural contributions of Mesopotamia to the history of the ancient Mediterranean world.

**HIST 2071 American Jewish Experience (4 Credits)**

This course examines the history of the American Jewish immigrant experience from colonial times to the present as a means of trying to understand how newcomers navigate the processes of adaptation, acculturation, and integration into American life. We will pay careful attention to issues of race, gender, and class, and we will examine the impact of xenophobia and immigration laws on how Jewish immigrants were welcomed and treated.

**HIST 2074 Holocaust: Europe & Colonial Contexts (4 Credits)**

This course presents the history of the Holocaust as perpetrated by Nazi allies Romania, Hungary (occupying Romania’s Transylvania), and Vichy France with its corresponding African colonies. With the United States Holocaust Memorial Museum’s Encyclopedia of Camps and Ghettos Vol. 3 serving as the foundation, students will be required to read select entries and consider the primary sources that contributed to them, including memoir and the rich oral history of the Shoah Archive. The most recent scholarship by experts in these fields of Holocaust history as well as relevant films will be studied. This course asks us to comprehend what the full extent of this genocide was during WWII, and challenges us to answer how it fits into the conventional teaching of the Holocaust.

**HIST 2075 Nazi Art Looting (4 Credits)**

This course examines the history and legacy of Nazi art looting, which continues to impact museums and the art world today. We begin with an overview of plundering mechanisms used by the Nazis and their collaborators, and discuss restitution efforts since the end of the Second World War. Students carry out a research project focusing on a case study, working in small groups with other students. The work is interdisciplinary and experiential, with direct relevance to ongoing restitution cases.

**HIST 2105 The Dark Ages: Survey in Early Medieval History (4 Credits)**

This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning with the late Roman Empire and stretching to the year 1000, a period often referred to as the "Dark Ages." Throughout the semester we will read primary texts representative of ideas and historical developments that shaped the Early Middle Ages. Central to this course will be three major themes: the development of western Christianity, the ongoing struggle between centralizing governments and local powers, and the effects of cross-cultural contact on western society. As we examine topics such as the fall of Rome, the rise of the three great cultures of the early medieval period (Christendom, Byzantium, and the Islamic world), and the formation of kingdoms and states our readings and lectures will focus on one or more of these major themes as a way of approaching the complex and often unfamiliar pre-modern world. By analyzing and evaluating these texts and their authors we will gain a better understanding of the past and a clearer idea of how the institutions and ideas of the pre-modern world changed over time and how they continue to impact and influence modern societies.

**HIST 2106 The High Middle Ages: From Dark Age to Rebirth (4 Credits)**

This course is designed to introduce students to the societies and cultures of the pre-modern western world, beginning in the year 1000 and culminating in the end of the medieval period in 1453. The "High Middle Ages" was a period of tremendous development and innovation. The first universities appeared, men and women argued about belief and practice, traders and warriors forged new connections with the wider world, and the very structures of modern Europe appeared for the first time. As we examine topics such as the Crusades, heresy, popular revolt, and cross-cultural trade our readings, lectures, and discussions will examine how we can understand the development of "Western" civilization and the ways in which the medieval past continues to inform our modern lives.

**HIST 2120 Europe in the Renaissance/Reformation (4 Credits)**

Social, political, intellectual and cultural history.

**HIST 2125 Cold War Europe (4 Credits)**

Examines key issues in the history of Europe from the end of the Second World War to the disintegration of the Soviet Union. The clash of twentieth-century ideologies provides a framework for understanding European relations with the United States and the Soviet Union, along with broader political and cultural trends, decolonization, economic and social change, and class, gender, and race relations.

**HIST 2131 Early Modern Europe: 1600-1789 (4 Credits)**

Social, political and intellectual history of Europe during period of the Old Regime and Enlightenment.

**HIST 2132 19th-Century Europe (4 Credits)**

Social, political and intellectual patterns from French Revolution to outbreak of World War I.

**HIST 2210 The French Revolution and Napoleon (4 Credits)**

This course examines the many ways in which the French Revolution and Napoleonic period (1789-1815) marked a significant break with the past—politically, socially and culturally. Yet these changes could not occur with some continuity in social and political institutions. We will work to answer a central question: as Napoleon dominated most of the European continent militarily and established a dictatorship at home, to what degree was he promoting ideals of the Revolution?

**HIST 2260 Jewish Food: From the Bible to Bagels (4 Credits)**

"We are what we eat," the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion, consumption, and identity. The study of Jewish food practices is a study of dualities: kosher and trayf (non-kosher), meat and milk, modernity and tradition, insiders and outsiders, men and women, authentic and artificial, ethical and unethical, and more. Beginning with biblical laws about permitted and forbidden foods and ending with a study of the emergence of the modern kosher food industry in the United States, our course will examine how Jewish food and foodways have evolved over thousands of years in response to social, political, cultural, and economic change. We will explore the links between Jewish food practices and local cultures in order to understand how each one shapes the other, and to become familiar with the diversity of Jewish foodways across the Diaspora and within Israel and the Middle East. We will also explore the politics of authority and authenticity with regards to Jewish food — what makes a food "Jewish" or kosher, and who decides? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2300 The Arab-Israeli Conflict, 1881-2001 (4 Credits)**

This course introduces students to the Arab-Israeli and Israeli-Palestinian conflicts from the initial Jewish migrations to Palestine starting in the 1880s through the failed Oslo Accords. Key themes that will be covered include the origins and development of Zionism and Palestinian nationalism, the impact of Ottoman and British rule in Palestine on Jews and Palestinians, differing narratives about the origins and development of the conflict, and the impact of U.S. and Soviet involvement in the Middle East on Israelis, Palestinians, and Arabs. In addition students will be exposed to historiographical debates surrounding various aspects of the conflict, notably the 1948 War. Cross listed with JUST 2300.

**HIST 2320 US Foreign Policy in the Middle East (4 Credits)**

This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2320.

**HIST 2335 Early Islamic Empires in Comparative Perspective, 632 CE - 1300 CE (4 Credits)**

This course looks at the social, economic, political, and environmental histories of Islamic empires from the 7th through the 13th centuries CE. In doing so, this course also examines how early Islamic empires ruled over both Muslim and non-Muslim, especially Christian and Jewish, populations. Additionally, this course aims to compare these Islamic empires with non-Islamic Afro-Eurasian empires from the same general time periods. Students should be aware that this course will not cover every early Islamic empire but will adopt a case-study approach, meaning the professor will select key empires to examine.

**HIST 2400 Women in European History: 1800-Present (4 Credits)**

A survey of women in the modern age. Topics include women's work, sexuality, cultural movements, feminism and domestic life.

**HIST 2401 European Women's History: 1500-1800 (4 Credits)**

Changes and continuities in women's experiences during the early modern period, as well as changing ideas about gender; family, work, religion, sexuality, political power.

**HIST 2405 World War Two in Europe (4 Credits)**

World War Two (1939-45) was the most devastating conflict the European continent experienced, affecting soldiers and civilians in equal measure, devastating cities and infrastructure, and setting the scene for the ideological "cold war" that dominated European politics (1945-89). This course examines different aspects of the war from the perspectives of soldiers and civilians. In this course, students will examine and engage with a variety of sources (diaries, memoirs, military newspapers, official records, interviews, documentaries) in order to more fully understand the events of the war. Students will also examine sources from individuals and groups in diverse countries and situations, piecing together a complex narrative of this terrible war.

**HIST 2410 Histories of the Body (4 Credits)**

This course explores the histories of human bodies. The body has been a focal point to social, political, and cultural discourses throughout history. Based on literature of human difference through sex, gender, (dis)ability, age, and body/mind distinctions, this course aims at leading students to deepen their perspectives on the body and its social, racial, and philosophical underpinnings. We will examine the body in different historical periods to explore the developments of ideas surrounding the production of the body as representative of the cultural reality of the time. We will move within and alongside time and ideas to provide a depth of understanding and connect the past to the present. How is race connected to skin? What is the impact of ideas of race, gender, and geography on the perception of the body? What is a perfect body? By asking and contemplating these questions, students will be able to broaden their historical understanding of the body, which will contribute to their scholarship in history and other disciplines.

**HIST 2450 History of the Italian Mafia (4 Credits)**

For two centuries, an entity called "Costa Nostra" has dominated the histories of Sicily and Italy. Costa Nostra has long been a shadowy and poorly-understood organization, yet it has changed the world in dramatic and unexpected ways. In this class, students learn what the Italian Mafia is and explore its history in Italy, particularly the Mafia's developing relationship to the law, the Italian government, and Sicilian culture. Students examine the nineteenth-century origins of the Mafia as well as the more recent "Mafia Wars" (1962-69 and 1970-82) that rocked Italy and resulted in the first widespread prosecution of Mafiosi. The recent trials of notorious Mafiosi have led to political scandal and charges of conspiracy, collaboration, and cover-up at the highest levels of Italian government. Lastly, students learn about the efforts of the Anti-Mafia movement to reform and redirect Italian and Sicilian culture and society.

**HIST 2510 American History to 1789 (4 Credits)**

Encounters between Native Americans, Europeans, and Africans in the American colonies; the Revolution, the confederation period; the framing and adoption of the Constitution.

**HIST 2520 American History: 19th Century (4 Credits)**

Establishment and development of new nation; emphasis on political history; experience in analysis of source materials.

**HIST 2525 Great Depression in America (4 Credits)**

This course will investigate the social, political, economic, and cultural dimensions of the Great Depression in America. Students will be exposed to a variety of sources, including photographs, posters, film, fiction, and documentaries, as well as more traditional historical sources, both primary and secondary.

**HIST 2530 American History: 20th Century (4 Credits)**

This course surveys the major political and social developments in the United States since the turn of the century, including the Progressive Movement, World War I, the Depression and New Deal Liberalism, World War II, the Cold War and American internationalism, the Civil Rights Movement and the growth of feminism, the Great Society, the Vietnam War, and the Watergate crisis.

**HIST 2531 Twentieth Century Native American History (4 Credits)**

This class reviews Native history from the late 19th century to the present, focusing on the interplay between large institutions and structures – such as federal and state governments, or the US legal system – and the lived, local experience of tribal communities. The major themes followed throughout the course of the semester include: place, space, and indigeneity (indigenous identity).

**HIST 2541 The Roots of Modern America (4 Credits)**

This course surveys one of the most tumultuous periods in U.S. history, one that encompassed industrialization, massive immigration, urbanization, settlement in the American west, and the confrontation between Victorian and Modern culture. Special attention is paid to asking how political, cultural, and social dissent has been defined through time. Topics include Darwinism and social Darwinism, capitalism and its dislocations, agrarian and labor radicalism, cultural and political radicalism, the progressive movement, feminism, the home front during World War I, and the aftermath of the war.

**HIST 2551 The American West Since 1860 (4 Credits)**

Everyone knows the romantic and violent mythology of the Old West: cowboys and Indians, lawmen and gunslingers, trappers, miners, railroaders, homesteaders. This course explores the history behind the myths. Sweeping from the Civil War era to the resorts and suburb of today's West, we follow such themes as the history of western land and resource use; the migration of peoples and the communities they created; the story of racial, religious, cultural, and political conflict; and the significance of those famous western myths to the nation as a whole.

**HIST 2555 United States Since 1945 (4 Credits)**

This course examines the social, cultural, economic and political developments that have shaped life in the United States since the 1940s. Special attention is given to the Cold War, suburban America, the civil rights movement, social conflict in the 1960s, and the rise of postwar conservatism.

**HIST 2565 The Church in American History: Challenges and Changes in the Protestant Tradition (4 Credits)**

For most of its history, a Protestant majority dominated religion in America. At times, Protestants seized new opportunities to shape and reshape the course of the nation. At other times, influence waned and tensions mounted. This course surveys the history of religion in the U.S. with a primary focus on the challenges and changes within the Protestant church as it has navigated a shifting and increasingly pluralistic culture. We explore how the faithful—from John Winthrop to the modern day evangelicals—have attempted to create a "city upon a hill" through their beliefs, practices, movements, and institutions. Special attention is given to Puritanism, disestablishment, revivalism, Mormonism, the Civil War, the Social Gospel, fundamentalism, civil rights, modern evangelicalism, and pluralism. Cross listed with RLGS 2565.

**HIST 2570 Civil War & Reconstruction (4 Credits)**

This course covers the causes and consequences of the most important conflict in American history. We will investigate the problem of slavery, the question of states' rights, the sectional crisis, the experience of war, the role of Lincoln, the struggle over reconstruction, and the meaning and memory of the war in American life.

**HIST 2575 Disease in Early America (4 Credits)**

Scholars have recently focused their attention on the way that diseases - Yellow Fever, Smallpox, Measles, Malaria - shaped the social and political landscapes of early America. In this course, we take up this investigation by examining both the diversity and pervasiveness of disease and the ways that non-human agents such as pathogens and insects had a destructive impact on African, European, and Indian peoples and influenced the course of events in early America. Our study therefore ranges from the virgin soil epidemics that decimated indigenous peoples to how smallpox outbreaks affected the Revolutionary conflict. In addition to examining the medical discourse of causes, symptoms, and treatments, we consider how disease influenced perceptions of personal and familial interactions, race and class relations, community and public health, and national culture and literature. For our investigation, we pay particular attention to the 1793 Yellow Fever outbreak in Philadelphia.

**HIST 2630 American Women's History (4 Credits)**

This course is a survey of U.S. women's history from the colonial period to the present. It examines the social, cultural, economic, and political developments shaping American women's public and private roles over several centuries, in addition to the ways in which women gave meaning to their everyday lives. Particular attention is paid to the variety of women's experiences, with an emphasis on the interplay of race, class, ethnicity, and sexuality. Cross listed with GWST 2630.

**HIST 2640 Race and Ethnicity in Twentieth Century America (4 Credits)**

This course will examine America through its cultural and racial diversity, comparing and contrasting the historical experiences of African Americans, Latina/os, European Americans, and Asian Americans over the "long" twentieth century. Together we will investigate the ways in which major events and episodes in the century affected a variety of racialized populations, and how these groups responded to their social and political environment. Attention will also be paid to changes in "American" national identity and citizenship over time, helping students think about such questions as: who is an "American"? And how did that definition change over time? How did debates over citizenship reflect Americans' ideas of race, class, ethnicity, and gender? How were racial and ethnic minorities, women, and immigrants defined at various times in opposition to Americanness?.

**HIST 2645 Immigration in Twentieth Century America (4 Credits)**

Immigration holds a peculiar place in our national narrative. At the same time that the United States celebrates its identity as a self-proclaimed "nation of immigrants," immigration policy and the presence of diverse peoples from around the world have historically generated intense battles over identity, national security, and civic belonging. This service-learning history course examines major topics in 20th century U.S. immigration history. Utilizing a thematic and comparative approach, we will explore how immigration and immigrants have shaped the social, political, and economic contours of American life, and how discourses of race, gender, sex and class have determined how Americans conceive of immigrants and of the nation. As part of their service-learning curriculum, students will examine salient issues in political discourse today—including xenophobia, detention and deportation policy, border policing, and the human side of the immigration debate—by volunteering with Casa de Paz, an Aurora, Colorado non-profit organization that offers support to migrants recently released from detention.

**HIST 2680 Historical Memory (4 Credits)**

Why do successive generations rewrite the stories that teach Americans their history? Why do various social groups endorse alternate versions of past occurrences? This course explores the idea of historical memory by examining the narratives (stories) that have been composed about our country's past and how these stories have been revised over the years. We will focus on several major symbols of the American past and the narratives that have developed surrounding them. Our goals are to understand how and why these sites of memory have been interpreted and reinterpreted over the years.

**HIST 2701 Topics in History (2-4 Credits)****HIST 2702 Topics in History (2-4 Credits)****HIST 2703 Topics in History (2-4 Credits)****HIST 2710 From Sea to Shining Sea: Nature in American History to 1900 (4 Credits)**

In ways often hidden or ill understood, natural and environmental factors powerfully shaped the history of America from colonial times to the nineteenth century. In this course, we consider how natural resources like fish and forests became the basis for European empire-building; how colonists, Indians, slaves, settlers, and industrialists all acted to transform the landscapes and ecosystems of North America; and how ideas about nature helped mold the market economy and an emerging sense of American national identity. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2720 Paved Paradise? Nature and History in Modern America (4 Credits)**

Oil drilling and outdoor recreation, "medical miracles" and natural disasters, the making of national parks and suburban landscapes, and political battles over pollution, property rights, energy, wilderness, endangered species, and toxic waste all belong to the environmental history of the recent U.S. In this class we explore that history, weighing how Americans from the late nineteenth century to the present day have thought about nature, modified and made use of it, and competed for control of resources and land.

**HIST 2850 Imperial China (4 Credits)**

In this class, students learn about change and continuity in imperial China, from the third century BC to 1911 AD. Over the course of this more than two thousand years, what we refer to as "China" changed a great deal politically, economically, and socially. We will explore many of these changes, while at the same time keeping an eye on the continuities that continued to characterize the place and its people over the long term.

**HIST 2870 Modern China (4 Credits)**

In this class we focus on China from the nineteenth century to the present. We examine historical change and continuity, including the revolutions that created the Republic of China and the People's Republic of China, the transformation of traditional values, economic liberalization in the post-Mao Zedong era, and the challenges that China has faced in recent years.

**HIST 2885 Migration, Mobility, and Movement in Africa (4 Credits)**

This course will span the precolonial, colonial, and postcolonial eras of African history to consider narratives of historical migration within and beyond the continent. Central to these narratives are ideas of indigeneity and foreignness, firstcomer and newcomer status, articulated in the colonial and postcolonial period as differences of race and ethnicity. Through this course, students will be introduced to the historiography of migration in Africa, as well as theories and methodologies based on linguistics, oral traditions, and archaeology. We will begin with the Bantu expansion patterns of second millennium BCE up to 1500 CE, considering the linguistic trajectory that this migration took in considering the origins of modern language groups on the continent. We will then move on to Indian and Atlantic Oceanic networks of trade and migration, including the slave trades that led to the dispersion of peoples both within and outside of the continent, and the creation and recreation of kinship groups and polities. We will consider the history of the mfecane in southern Africa, or the period of dispersal and warfare that led to wide-scale migration throughout the region in the nineteenth century. We will also explore the histories of migration to the continent by European colonizers as well as the settlement of communities from the Middle East and South Asia as part of systems of indentured labor as well as free migration. Finally, this course will take a look at contemporary issues of citizenship and xenophobia in postcolonial nations. All required readings for the course will be posted online.

**HIST 2910 Colonial Latin America (4 Credits)**

This course explores the encounters, struggles and realignments of Europeans and Native Americans in the process of conquest and colonization, the development of political, economic, and religious institutions, the racial and gender hierarchies that emerged in colonial society, the strategies of resistance and accommodation to Spanish and Portuguese colonial rule, and the origins, process and outcomes of the wars of independence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2920 The Making of Modern Latin America (4 Credits)**

This is a general and introductory course of the history of Latin America that pays special attention to the modern period (19th and 20th centuries). The course is structured around themes dealing with the region's colonial legacy, economy, social life, politics, processes of modernization, urbanization, revolution, the quest for democracy and national development, and contemporary achievements and challenges. While much of Latin America's history has been a tale of violence and suffering, it has also been a story of great perseverance and self-affirmation. Using a historical perspective, the course seeks to understand how and why the struggle for independence, nation-building, economic growth, and social justice in the region has raged on for so long, and where it stands today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit each of these locations, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis.

**HIST 2940 Sports and Empire (4 Credits)**

This course will look at the history of sports and colonialism over the past two centuries, considering the ways in which imperialism led to the dissemination of Western sporting traditions and culture to the global south, focusing in particular on British and French colonies in Africa and Asia (although we also take a few trips to the Caribbean, too). Each week, we will look at the history of a different sport, including cricket, tennis, soccer, golf, rugby, and hockey, and explore the intersection of race, class, and gender in how these sports were played and transformed in the imperial world. We will consider the ways in which sport was used not only as an element of the racialized "civilizing" mission of imperial ventures, but also how sport was coopted by indigenous populations to resist colonial structures of segregation and oppression. This class will ask us to reconsider the intersections and divergences in the way sports are both played and viewed by national sporting teams, local leagues and schools, and transmitted to audiences through live viewing, television, radio, and other forms of media. We will also look at the representations of sports and colonialism through films, fiction, and television shows. Finally, we will analyze the postcolonial legacies of colonial sporting cultures after decolonization, looking at the ways in which countries in the global south have taken over transnational leagues and institutions to make what were once colonial and European-dominated sporting cultures their own.

**HIST 2945 Slavery and Samba: Race and Ethnicity in the Making of Modern Brazil (4 Credits)**

This is a survey history course focused on how race and ethnic relations helped shape the historical formation of the Brazilian society. The course offers students an opportunity to study the historical evolution of Brazil, from the colonial period to the present day, as a way to understand how the historical exclusionary economic, political, and social structures of the country were shaped by racial elements, as well as how traditionally excluded groups have historically coped with and reacted to this reality.

**HIST 2950 U.S. and Latin American Relations: The Historical Struggle for Autonomy (4 Credits)**

This course examines how Latin American nations have tried to maneuver in the world sphere under the dominant role played by the United States in the hemisphere. Latin American countries and the United States have had a complex and, at times, difficult relationship that dates back to the early nineteenth century. In response to the challenges of this complicated relationship, Latin American nations have adopted a range of strategies to deal with the United States, most of which are examined in this course.

**HIST 2955 Latin America at the Movies (4 Credits)**

This is an introduction to the experiences of Latin America primarily aimed at reflecting about the process of formation of present-day Latin American societies, and secondly at motivating students to reflect about the historical evolution of multi-racial, multicultural societies in general. The activities for the course are structured around themes dealing with the region's historical evolution and the present-day challenges of building a modern, developed and egalitarian society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**HIST 2988 Study Abroad Resident Credit (0-18 Credits)****HIST 2990 What is History? (4 Credits)**

Introduction to historical concepts, methodologies and historiography. Intended for history majors who will take Senior Seminar the following fall.

**HIST 2998 Issues in Comparative History (4 Credits)**

This is a team-taught course in comparative (either geographical or temporal) history. Each time it is taught, it addresses a particular theme or topic from a comparative approach. Students are exposed to different approaches to the study of history, as embodied in the work of the individual faculty members.

**HIST 3100 Cities and Society in Latin America (4 Credits)**

This course approaches the history of Latin America through the prism of its cities, paying particular attention to the ways in which the urban environment defined and was affected by the regional path of socio-economic and cultural development. In addition to examining how cities evolved, and how people have therein lived (worked, engaged in political activities, etc.), we seek to understand how cities were historically conceived as a primary focus of public policies and projects to the goal of modernization in the region.

**HIST 3275 The Past and Afterlives of Apartheid (4 Credits)**

In 1948, after a close election, a government founded on the platform of apartheid, or a radical form of racial segregation, came into power in South Africa. Apartheid as a system remained in place until 1994. This seminar delves into the roots and trajectory of apartheid, and considers its effects on the lives of South Africans. As a 3000-level topics course, the readings for this course will be interdisciplinary, but will be founded in historical methodology and process, while also considering representations of apartheid and the history of South Africa through mediums such as literature, film, music, and sports. While the origins and institutions of apartheid will be studied, as well as the history of South African nationalist and resistance movements, one of the goals of this course will be to look at the lives of ordinary South Africans, and how they resisted the apartheid state in more quotidian ways. This course will also focus on the moment of 1994 and the legacy of apartheid in South Africa's postcolonial future, one in which the ideal of a rainbow nation was disrupted by the persistence of structural inequality and the memories of violence brought up by the Truth and Reconciliation Commission. We will also explore the comparative literature between apartheid South Africa and Jim Crow in the United States, considering the transnational implications of institutions of white supremacy and the legacy of British colonialism and white nationalism across the globe, as well as the fight against apartheid led by the independent nations of the global south in the United Nations.

**HIST 3335 The Viking World (4 Credits)**

In the late eighth century Europe was rocked by the first of the Viking attacks. Over the next two centuries they left a legacy that has been immortalized in books, TV shows, and movies. But what drove these renowned seafarers to set sail from Scandinavia to shores as far as North America and the Black Sea? In this course we will examine the world of the Vikings, looking at the social, cultural, and political changes that the Viking Age ushered in not just in Scandinavia but across Europe. We will discuss how raiding and trade went hand in hand, how new ideas of kingship and worship crossed cultural boundaries, and the ways in which history and legend overlap, coloring our ideas of the medieval past.

**HIST 3340 Popular Culture in Early Modern Europe (4 Credits)**

Early modern European popular culture including witch-craft, magic, fertility cults, popular religion, gender roles, carnivals and festivals, riots, and folktales.

**HIST 3345 Women and Gender in Early Modern Europe, 1500-1800 (4 Credits)**

It is easy to assume that today's ideas about gender roles have always existed, but beliefs about women's and men's "natural" behavior have changed dramatically over time. In 1500, for instance, it was a well-known fact that women are sexually voracious creatures who needed strict control to keep their appetites in check; by 1800, it was an equally well-known fact that women are inherently chaste and modest. The ideal male in 1500 was someone who used violence to maintain his authority; in 1800, masculinity was about self-discipline and politeness. In this course, we explore changing ideas about femininity and masculinity in the early modern period and consider how those changes related to broader shifts in culture and society.

**HIST 3350 Social History-Modern Britain (4 Credits)**

This course investigates the intersections of class, gender, and race in nineteenth-century British society. During this period, Britain became the preeminent world power thanks to its spectacular industrialization and its even more impressive empire. Such success often fostered smugness and complacency, yet British society was also riddled with dissension as people struggled to cope with the enormous changes they were witnessing. Discussions focus on the ways in which Victorian people themselves understood their society and its problems, and how they attempted to construct solutions to those problems. Who was implicitly or explicitly excluded from British society? As we consider these topics, we use a variety of secondary and primary sources, including fiction; one goal of the course is for us to think about how to integrate different kinds of sources as we analyze historical problems and create our own interpretations. Cross listed with MUAC 3350.

**HIST 3351 Crime & Lowlife in 18th & 19th-Century London (4 Credits)**

How did poor people survive in London during the eighteenth and nineteenth centuries? Why did people commit crimes, and what kinds of crimes did they commit? What punishments did they face if they were caught, and what did their trials look like? What were the norms and expectations governing social responses to poverty and crime? This course will consider some of the ways historians have tried to answer those questions, but it will focus above all on exploring the primary sources that enable us to develop our own answers. In order to do so, students will dive deep into an extraordinary archive: the records of trials held at London's Central Criminal Court, more commonly known as the Old Bailey. These documents give us information not just about criminals but about victims and bystanders; they provide insights not only into criminal justice but into the everyday lives of ordinary people. Other archival material will allow us to trace the lives of criminals after conviction, to see what kinds of consequences they faced. We will spend most of our time on the period between about 1780 and 1880.

**HIST 3355 Latin America's Cold War (4 Credits)**

The Cold War is usually thought of as a conflict between superpowers in a bipolar world. Often, this interpretation omits the important histories of non-industrial or developing countries. This course will explore the experiences of Latin America during on the most important and impacting socio-political, economic, ideological, cultural, and diplomatic contests ever faced by human societies. The course will explore the motives and consequences of the US government's actions to counter the perceived Communist threat, as successive administrations expanded intelligence gathering, increased military and economic aid, backed anti-communist government in Latin America, and used US troops in direct military interventions. Students will engage with materials and learn about the interaction between historical experiences taking place in a global, regional, national, and local realities. In so doing, the history of the Cold War will be examined as a complex web of interrelated conflicts, projects and events. Students will get an overview of the events and major interpretations of the Cold War in Latin America. By engaging with class materials and assignments, students will refine their analytical skills, research abilities, historiographical knowledge and narrative expressions.

**HIST 3370 Comparative Fascism in Europe (4 Credits)**

A comparative survey of fascist Italy and Nazi Germany, from the origins of fascist movements in the 19th century to the establishment of political regimes, World War II and the Holocaust.

**HIST 3372 Nations and Nationalism (4 Credits)**

This seminar will focus on the twin processes of nation-building and nationalism in Europe. We will look at how the idea of an organized nation-state took root and how people came to think of themselves as belonging to a particular nation. We will examine these processes by using different national examples and by taking a variety of approaches—cultural, social, political—to understanding what a nation is.

**HIST 3375 Empire: Revolt and Repression (4 Credits)**

This seminar examines imperialism through case studies of European powers' repression of anti-colonial revolts. We study, for example, the case of Algeria, which gained independence from France in 1962 after a brutal war of independence. We discuss the establishment and nature of the empire in the mid-nineteenth century, the moderate decolonization movement beginning in the early twentieth century, and the radical revolt of the 1950s that prompted the French to use torture in counter-terrorism operations. This case study also is relevant to post-9/11 U.S. foreign policy, when the George W. Bush administration was widely condemned for its use of "enhanced interrogation techniques" at Guantanamo Bay and other detention sites. Facing criticism from around the world, Secretary of Defense Donald Rumsfeld studied the history of French operations in Algeria and the French response to allegations of human rights abuses. In light of this recent history, we examine the lessons that the history of French Algeria teaches us about war, terrorism and counter-terrorism in our own times.

**HIST 3380 WWII History and Memory in France (4 Credits)**

This seminar examines the history and memory of World War II in France. We discuss French collaboration with the Nazis and resistance, investigating myths and reality, as documented in historical research. Students analyze a variety of sources, such as diaries, memoirs, poetry, monuments, films, and media broadcasts.

**HIST 3400 Revolts and Revolutions in the Afro-Atlantic World (4 Credits)**

This course uses the examples of major and general slave revolts and acts of resistance which include the Haitian (1791-1804) Revolution as material that students can use to practice the skills of professional historians. We will study the basic concepts and methods of Afro-Atlantic history, with a focus on free, freed, and enslaved people acting during the Age of Revolutions. We will examine the slave revolts in Jamaica (1673, 1690, and 1745 and 1759) Stono (1739), New York (1712), Haitian Revolution (1791-1804), New Orleans (1811), Barbados (1816), and Southampton, (1831) through an Afro-Atlantic perspective, exploring the relevant scholarship and critically analyzing primary sources. In the process, we will consider the following questions: What makes an event "Afro-Atlantic"? What is the Atlantic scope? Why do historians think of the Age of Revolutions as a discrete, unique historical period? How common were slave revolts? What were the local and international dimensions of these political events? In addition to treating the above questions, I intend to return often to two major content themes: The significance of historical contours of the slave revolt and resistance, noting its similarities and yet important variations over time and place. Second, we explore the changing influences of resistance to oppression, power and slavery and how they shape people, places and institutions. We note in this course that revolutions fundamentally affected the social and economic lives and futures of the world and can be expansively defined.

**HIST 3455 Living Dangerously: Hazards and Disasters in American History (4 Credits)**

Monster storms, deadly pandemics, climatic doomsday scenarios, tragic accidents like the Titanic: our news, popular culture, and national nightmares are filled with imagery of disasters. They make for upsetting and almost irresistibly gripping stories, but the stories too often fall into cheap sensationalism, simplistic morality tales, and other clichés. In this seminar, sweeping from pre-Columbian calamities to Hurricane Katrina, covid, and the climate disasters of our own time, we'll move past the clichés to consider the historical significance of disasters in America: how they've disrupted people's lives, but also reshaped ideas of what's "natural" or "normal." We'll ask: what roles have humans played in "natural" disasters like floods, droughts, wildfires, and earthquakes? How have Americans tried to guard against environmental hazards, and what unintended consequences—including new kinds of disasters—have resulted from these efforts? We'll also study why some people are more vulnerable than others, and how environmental hazards and disasters have helped shape social inequality. Disaster history not only sheds new light on America's past, but also intertwines it with environmental questions that are literally matters of life and death—so the class welcomes students of history, environmental studies, sustainability, politics and public policy, geography, and other fields too.

**HIST 3510 American Revolution and Its Background (4 Credits)**

Causes, progress, consequences and significance of movement for independence in light of American colonial experience and problems of imperial authority.

**HIST 3570 American Thought and Culture (4 Credits)**

This course exposes students to writers, artists, philosophers, and reformers who have addressed some of the major intellectual and cultural transformations related to modernity: the problems of knowledge and communication, the struggle to achieve a democratic and equal community, and the endeavor to build a national culture.

**HIST 3620 United States Involvement in the Persian Gulf, 1933-Present (4 Credits)**

This course looks at U.S. involvement in the Persian Gulf from the initial search for oil in Saudi Arabia up until the so-called "Arab Spring". The main focus of the course is on U.S. relations with Saudi Arabia, Iran, and Iraq although Kuwait and other Gulf States, as well as broader regional developments, will also be discussed. Emphasis is placed on developments related to the free flow of oil during the Cold War and increasing U.S. involvement in the region following the first Gulf War of 1991.

**HIST 3650 Native Crude: Indigenous Oil Politics and Activism (4 Credits)**

The extraction and development of oil resources is one of the central issues driving U.S. geopolitical policy in the late 20th and early 21st centuries. As the U.S. government engages in covert and overt overseas incursions in order to secure oil supply, we have also reevaluated our domestic supply priorities. Both these dynamics—as well as the work by multinational oil companies to continually explore and develop/exploit new oil resources—have led to fraught negotiations between states, multinational corporations, and indigenous populations across the globe. This course explores the history of such past and present negotiations using books, articles, and documentary films.

**HIST 3670 The U.S. Home Front in World War II (4 Credits)**

This course examines the social changes taking place on the U.S. home front between the late 1930s and 1940s, including an investigation of the effects of war on American government, society, culture, and economy. Particular attention is paid to the war's impact on gender, ethnicity, race, and everyday people's lives.

**HIST 3680 The Strange History of American Suburbia (4 Credits)**

Everyone knows the emblems of American suburbia: single-family houses with attached garages, grassy lawns, curving streets and cul-de-sacs, office parks and shopping malls. But there's a history behind these settings that's poorly understood - that that is key to understanding much about the U.S. Suburbia sheds light on American popular attitudes toward nature, technology, health, politics, and patriotism, and on the complicated dynamics of race, gender, family, class, and religion in American society. In this course, we explore how the U.S. became a "suburban nation," from the Romantic retreats of the nineteenth century, through suburbia's triumphant yet troubled "golden age" in the 1950s, to the stereotype-shattering suburbs of our own time. We consider the surprisingly powerful ways suburbia history has shaped U.S. history more broadly.

**HIST 3703 Topics in History (4 Credits)****HIST 3704 Topics in History (4 Credits)****HIST 3705 Topics in History (1-4 Credits)****HIST 3875 Chinese Science and Global History (4 Credits)**

This class introduces students to the ideas and contexts of pre-modern Chinese science and critically examines ways in which modern historians have incorporated science and technology into their global narratives about China and the West. Intended for students familiar with the methods of historical inquiry. No prior knowledge of Chinese history is expected.

**HIST 3980 Internship (0-8 Credits)****HIST 3988 Study Abroad Resident Credit (0-18 Credits)****HIST 3989 Senior Seminar I (4 Credits)**

Development of research skills and historiographical understanding; preparation for senior research seminar.

**HIST 3990 Senior Seminar II (4 Credits)**

Completion of a substantial research project, based on original sources. Students should consult their departmental mentor no later than beginning of spring quarter of their junior year to begin the formulation of the research project.

**HIST 3991 Independent Study (1-10 Credits)****HIST 3993 History Honors Thesis (4 Credits)**

Independent study specifically for graduating seniors wishing honors. Prerequisites: HIST 3989 and HIST 3990.

**HIST 3995 Independent Research (1-10 Credits)**

## Honors (HNRS)

**HNRS 1000 Honors Summit (0 Credits)**

Welcome to DU Honors! This is the first course of the core Honors sequence. It provides space for you to reflect on your values and what brought you here and to set goals for your college journey and your participation in the Honors community. We also want to be sure you have all the resources that you need to succeed in the University Honors Program, and to introduce you to the staff, faculty, and other students in the program. We will focus on advising and graduation planning that will help you to maximize your college experience. Additionally, we will highlight the resources at DU that are particularly important for Honors students, including opportunities for undergraduate research and other signature work, competitive external fellowships, and distinction resources. This is a zero-credit course. Students must attend one in-person four-hour session.

**HNRS 2000 Extreme Academics: Defining Success and Forging Your Path (0-1 Credits)**

How do you make the most of your experience at DU? How do you set yourself up for success after graduation? This course will provide resources and strategies for students to cultivate their passions and purpose through signature work and distinction, develop their networks, design a meaningful DU experience, identify and prepare for impactful opportunities like fellowships and graduate school programs, and tell their story. In doing so, it will advance students' 4D Experience, enabling reflection, connection, and discovery. The culminating project for the course will be a personal statement, designed to help students reflect on and articulate how their experiences and values have shaped their academic and professional identity and make them a fit for opportunities of interest. Prerequisite: HNRS 1000.

**HNRS 2400 Honors Seminar (0-2 Credits)**

A number of these seminars are offered every year on a rotating basis. Topics vary every quarter. Honors Seminars are taught in a faculty member's area of expertise — often on niche subjects that bring students directly into dialogue with faculty research, scholarship, or creative work. They are an opportunity for students to get to know faculty and engage with advanced content in small discussion-oriented seminars that are open to students from all majors.

**HNRS 2401 Adventures in Fellowships (2 Credits)**

This course is designed to empower students to develop their personal narratives and to pursue "good-fit" fellowship competitions that create pathways to impact. Students will explore external fellowships, parse funding organizations' criteria and priorities, and work through applications to tell a coherent narrative with attention to common application components such as personal statements; letters of recommendation; and reflections on leadership, service, and impact. Class sessions and assignments will guide students through reflection about interests and goals, telling the story of their experiences, and identifying and preparing for competitive fellowships that will help them drive change on the issues that matter to them. Students will gain a foundation for expanded knowledge and growth in line with the 4D Experience as well as practical tools and strategies for crafting competitive applications for external opportunities. Cross-listed with LDRS 2920. This course counts as an Honors Seminar (HNRS 2400) for the University Honors Program and as an elective towards the Leadership Studies Minor.

**HNRS 2701 Wildlife Conservation & Cultur (4 Credits)**

The focus of the course is the intersection of conservation and culture. The goal is to generate new and creative ways to think about conservation. Students will be exposed to different examples of conservation governance, ranging from state-controlled access commonly found in national parks to indigenous communities that are assisting conservation efforts. They will inquire as to what impacts different projects are having in not only helping stem the loss of habitat and wildlife, but also the informal governance institutions managing their unique ecosystems in sustainable ways. Importantly, we will consider our main questions through a very broad and informal cost/benefit analysis that encompasses more than the limiting economic factors normally used. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**HNRS 3000 Into the Unknown (0-1 Credits)**

For many high-achieving students, college is a given. It is the clear next step in life after high school. As you consider your post-baccalaureate plans, the future may feel less certain. This course is designed to give you space to reflect on your college experiences and to articulate their meaning – both to yourself and to potential future employers or collaborators. It also provides opportunities for you to consider goals and strategies for the future, including questions like: How do you define success and design the life you want? How do you decide whether an opportunity is a good fit? How do you assess and redirect when you experience failure, ambiguity, or change? The course provides repeated opportunities to engage in structured self-reflection, both individually and in community with peers who are also preparing to go into the unknown. This course is intended for Honors students in their final year at DU.

**HNRS 3991 Independent Study (1-5 Credits)**

By arrangement.

## Hospitality Management (HOSP)

**HOSP 1100 Exploring Hospitality Mgmt (2 Credits)**

This is an introductory course designed to provide students with a broad overview of the hospitality industry and the various segments that comprise the industry. The course focuses particularly on the industry areas captured by the concentrations available to Knoebel students, the elements that make hotels and resorts what they are—food and beverage/restaurants; strategic lodging management, lodging real estate, and event sales and management—and other facets of hospitality.

**HOSP 1101 Hip Hotels: Delivering Amazing Guest Experiences (2 Credits)**

Through an immersive, behind-the-scenes experience in Denver's hotels, students learn about: The challenges hotel executives face; the interplay between hotel design and service delivery; how to positively influence the guest experience, and the career paths available in the industry.

**HOSP 1200 Industry Work Experience (0 Credits)**

Faculty supervised work experience. Prerequisites: HOSP 1100 and completion of 500 hours of approved work experience. Advisor will register students for course as needed.

**HOSP 2201 International Experience (0 Credits)**

Students spend one quarter in an international setting taking courses while touring and observing overseas hospitality operations. Advisor will register students for course as needed.

**HOSP 2202 Management Intern Program (0 Credits)**

Preferably, this internship is full-time, continuous employment for ten-weeks with a minimum of 400 hours and is designed to allow students to increase their exposure to the hospitality industry and continue to reconcile their classroom learning with industry practice. Advisor will register students for course as needed. Prerequisites: HOSP 1200.

**HOSP 2360 Managing a Restaurant Business (4 Credits)**

In HOSP 1100, Exploring Hospitality Management, students are introduced to various aspects of restaurant/food and beverage management and basics about them. From here, we advance to a more thorough overview of the management of various food and beverage operations, specifically focusing on restaurants. Topics include safe food and beverage service, product specification and procurement, labor scheduling, revenue control and collection, and other management functions required for success in food and beverage operations. Prerequisite: HOSP 1100.

**HOSP 2361 Contemporary Cuisine (4 Credits)**

Judging by their high failure rate, restaurants can be one of the most difficult and complex businesses to manage. This course builds on previous food and beverage courses by providing hands-on experience running and managing a restaurant environment. Through the opening and running of two live restaurant operations for a night each, the course enables students to put into practice the managerial aspects of full-service restaurant operation, from menu planning and implementation to financial analysis, including systems, tools and reporting. Prerequisites: HOSP 2360 and HOSP 2401.

**HOSP 2401 Hotel and Resort Management (4 Credits)**

This course presents an overview of the management of a various lodging properties, specifically focusing on rooms division operations. The perspective taken is strategic, identifying and considering issues of concern to general managers of all types of lodging properties, with a particular focus on profit maximization (yield/revenue management) and distribution channel management. The broader political, economic, social, and technological environments and trends and their impact on lodging operations are considered. The perspective is global and includes considering how lodging operations differ in various parts of the world. Prerequisite: HOSP 1100.

**HOSP 2402 Revenue Management (4 Credits)**

This course provides an introduction to the basic principles and practices of revenue management in the hotel and restaurant industry. Students acquire the fundamental analytical skills needed to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels and restaurants. The course includes certification in STR tools. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2200.

**HOSP 2501 Managing Human Capital in Hospitality (4 Credits)**

People are the heart of any organization and can be a source of competitive advantage, particularly in a hospitality environment. This course prepares students to develop and manage successfully the processes and systems that help hospitality firms develop a competitive advantage through people and build a service culture, including recruiting, selecting, onboarding, and developing employees in order to retain them in both union and non-union environments. Prerequisites: HOSP 2360 and HOSP 2401.

**HOSP 2502 Hospitality Cost Management (4 Credits)**

The use of industry statistics and a uniform system of accounts for hotels and restaurants to determine an operation's position in the marketplace. Prerequisites: HOSP 2360, HOSP 2401 and ACTG 2300.

**HOSP 2504 Hospitality Technology and Analytics (4 Credits)**

Hospitality Technology and Analytics serve as an introduction to hospitality technologies and technology-enabled data analytics. This course surveys diverse aspects of consumer-facing hospitality technologies (social media, mobile, distribution channel, sharing economy, etc.) and in-house systems of hospitality operation (event-planning system, property management system, and point-of-sale system, etc.) In addition, this course provides an introduction to the field of business intelligence and data analytics, which has been defined as the extensive use of data, statistical and quantitative analysis, and fact-based management to drive decisions and actions in the hospitality industry. Specifically, the course looks at the managerial aspects associated with the application of hospitality technologies and technology-enabled data analytics to achieve strategic business goals. Prerequisites: HOSP 2360, HOSP 2401.

**HOSP 2506 Hospitality Sales & Marketing (4 Credits)**

This course addresses all that is involved in hotel and resort sales, including lodging/room group sales and catering sales. Also addressed are negotiation, the production of catered events, trade shows, and meetings, from the perspective of planners, venue salespeople, and event managers. Students learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other sales and planning functions. Prerequisites: HOSP 2360, HOSP 2401 and MKTG 2800.

**HOSP 2601 Environmental Sustainability in Hospitality (2 Credits)**

This course aims to provide students with knowledge of environmental challenges facing the hospitality industry. In addition, students learn best practices in hospitality and the emergence of new environmentally friendly technologies available for hospitality businesses. This course includes hotel operations with reference to energy efficiency, waste management, water conservation, and eco-design and architecture of current hotels or future hotel developments. Another objective of this course is to provide students with an understanding of sustainable food and beverage operations and certification in relation to sustainability in hospitality. The course discusses issues surrounding ethical, organic, local, seasonal, and another type of food often associated with sustainability. Prerequisite: HOSP 2360 and HOSP 2401.

**HOSP 2602 Hospitality Social Sustainability (2 Credits)**

In addition to environmental sustainability, hotels need to manage their social impact on their internal stakeholders (employees), an issue of increasing importance to their external stakeholders (customers and the community). Issues regarding a living wage, stressors of the working poor in low skill hospitality jobs, the impact of outsourcing hotel functions on the sustainability of employees' lives, and efforts of unions to organize hotels to fight for better working conditions, wages, and benefits will all be addressed in this course. The focus is on examining how the characteristics of, compensation associated with, and recruitment and retention practices for, low skill, low wage hospitality jobs impact the sustainability of employees' lives as well as the short-term and long-term profitability of the hotels. Prerequisite: HOSP 2360 and HOSP 2401.

**HOSP 3000 Wines of the World (4 Credits)**

A survey course of the wines of the world, including old and new world wines; still, sparkling, dessert and fortified wines; viticulture and viniculture. Prerequisite: must be at least 21 years of age. Non-HPM majors only.

**HOSP 3120 Distinguished Lecture Series (1 Credit)**

This course is the springboard for seniors to transition from a student mindset to that of a professional. It enables personal exploration, values clarification, and the narrowing in on an initial career focus. Hearing from and networking with senior executives from various segments of the hospitality industry who provide students with their insights about competition and challenges within the industry motivate the introspection described above.

**HOSP 3301 Beverage Management (4 Credits)**

Organization and management of the beverage operation of resorts, restaurants, hotels, clubs and other licensed premises. Emphasis on product knowledge, responsible beverage service, facility design and operational practices. Prerequisites: senior standing in the HPM major.

**HOSP 3302 Advanced Beverage Management I: Wine, Spirits & Beer (4 Credits)**

This course provides a deep dive into the production of wine, spirits and beer. Students enrolled in this course will sit for the Wine and Spirit Education Trust (WSET) Level 2 Spirit Certification, WSET Level 2 Wine Certification and Cicerone Certification exams. Enrollment is by invitation of the instructor(s).

**HOSP 3303 Advanced Beverage Management II: Wine (2 Credits)**

The final course in the beverage management sequence, this course is designed to enable you to refine your palate, significantly expand the portfolio of wines you have tasted and take a deep dive into grape varietals, growing regions, production styles, viticulture and viniculture. It rounds out and deepens your preparation to work directly in the beverage space or apply this knowledge in a broader food and beverage role.

**HOSP 3360 Rest/F&B Concept Devel (4 Credits)**

In previous food and beverage courses you obtained the knowledge and skills to perform the basic management functions required for a successful career in F&B operations, put these skills into practice and opened two "restaurants for a night." In this course you will acquire the skills required to develop and brand a new restaurant. Prerequisites: Senior standing in the HPM major, HOSP 2361 and HOSP 3301 and restricted to students pursuing the Restaurant/Food & Beverage Management Concentration.

**HOSP 3400 Advanced Revenue Management (4 Credits)**

This course provides students with the advanced knowledge, skills, and abilities to make sound business decisions and implement revenue management strategies and solutions to influence consumer behavior and maximize revenue and profits for hotels. Students will acquire the analytical skills to apply revenue management concepts and methods in demand forecasting, pricing, and revenue optimization techniques in hotels. Prerequisites: HOSP 2402, ACTG 2300.

**HOSP 3402 Hospitality Investments (4 Credits)**

This course exposes students in the lodging real estate concentration to hotel investing and the types of hotel ownership and hotel investment strategies that exist today. Students acquire knowledge in critical lodging investment topics including hotel investment metrics/returns, underwriting a hotel, capital markets (debt/equity), negotiating a hotel management agreement, hotel brands v independent hotels, franchise license agreements, construction and development challenges, asset management, hybrid lodging, and more. Pre-requisite: HOSP 2502.

**HOSP 3501 Robotics, AI & Service Automation (2 Credits)**

With demographic and immigration changes, the pool of available workers to fill hospitality jobs is shrinking. Hospitality organizations are faced with critical decisions regarding how to create an experience for their guests, being the most efficient yet effective with their scarce supply of human capital. Hence, deciding to replace labor with technology to fulfill certain tasks has ramifications on the guest experience. This course will examine societal trends leading to an uncertain labor supply; criteria for making labor-replacement technology decisions; and impacts of the human-technology interface on the hospitality guest experience. Prerequisite: HOSP 2501.

**HOSP 3506 Special Event Management (4 Credits)**

This course addresses all that is involved in the sales and production of catered events, trade shows, and meetings, from the perspectives of planners, venue salespeople, and event managers. Students will learn how to market and sell a venue; produce and respond to requests for proposals; work directly with clients during the booking process and event execution; address risk management and contractual issues; and perform other event and meeting sales and planning functions. Prerequisite: HOSP 2506.

**HOSP 3600 Lodging Valuation Principles (4 Credits)**

This course introduces students to the basic fundamental analysis of methods and techniques of real estate investment, finance, and valuation as they apply to the lodging industry. The course covers time value of money, basic discounted cash flow techniques, financing instruments, appraisal methods, and valuation techniques for income producing lodging properties. Students utilize computer software and spreadsheets for solving real estate problems. Practical applications provide students with the analytical tools and techniques to make effective real estate investment and financing decisions. Prerequisites: HOSP 2502.

**HOSP 3601 Hotel Development & Feasibility (4 Credits)**

This advanced capstone experiential learning course integrates lodging real estate financial analysis and valuation techniques to emphasize the fundamental concepts and techniques involved in the hotel development process and the various steps involved in performing a market feasibility study of a proposed hotel. Students will propose, establish and refine a concept from inception to completion, perform a market and site analysis, plan the development and construction, estimate the cost, and determine the financial viability of a full-service or limited-service hotel. Additional discussion topics include the regulatory process, financing, and risk management. Guest speakers, site visits, cases, text, practical examples and extensive use of spreadsheet software will provide students with specialized real-world knowledge and enhance their understanding of the complexities and challenges faced in lodging real estate development projects. Prerequisite: HOSP 3600.

**HOSP 3602 Facility Layout and Design (4 Credits)**

The course is focused on students who are going to become hospitality managers and will inevitably be involved with the design and planning of facilities. They will develop confidence in understanding the design process, reading and understanding plans, how to effectively critique designers to obtain the best results, what it takes to create functional spaces, and the importance of economic balance in creating designs that promise the best potential for financial success. Students will emerge with a heightened vision that will allow them to assess every hospitality experience that they encounter. They will plan a restaurant and a hotel to develop planning skills and to demonstrate creativity.

**HOSP 3650 Leadership in Hospitality (3 Credits)**

This course provides students with the knowledge, skills, and attitudes necessary to undertake leadership responsibilities in complex organizations. This course applies concepts and methodologies from the social and behavioral sciences in the analysis of leadership behavior in diverse organizational and community settings. Must have senior standing in the HPM major.

**HOSP 3700 Topics in Hospitality Management (1-4 Credits)**

Exploration of various topics and issues related to the hospitality industry. Prerequisite: HOSP 1100.

**HOSP 3800 Hospitality Experience Management (4 Credits)**

The evaluation, design, and management of service delivery systems through operations management topics from a service perspective. Included are other related topics such as customer satisfaction and managing organizational change. Must have senior standing in the HPM major.

**HOSP 3991 Independent Study (0-10 Credits)**

Independent research/study; requires written report. Prerequisite: instructor's permission.

## Information and Communications Technology (ICT)

**ICT 3100 Systems Analysis and Design (4 Credits)**

This course examines the systems analysis and design process from understanding what a system should do through how a system should be implemented. Topics include the System Development Life Cycle (SDLC); the roles of the Systems Analyst and Designer; an introduction to requirements gathering, including identifying user stories, use cases, use of modeling tools; and system design, user interface design, and database design. The course encourages interpersonal skill development with clients, users, and personnel involved in development, operation, and maintenance of a system. Quality issues such as software testing, configuration management, quality management, and process improvement are addressed throughout the course.

**ICT 3200 Cybersecurity (4 Credits)**

Given the constant increase of global technology usage, coupled with an escalation of threats to those systems, cybersecurity is a crucial practice for every learner to understand. This course will provide students with a fundamental overview of cybersecurity, including a set of basic skills needed to evaluate, remediate, and defend against risks within a technological environment. Additionally, students will gain the knowledge required to develop security plans for technological frameworks that are used personally and in organizations. This course is designed for students with varying cybersecurity experience and will empower them to acquire and maintain a strong security posture in their personal and professional lives. From those tasked with building new IT infrastructures to those managing marketing teams, this class will teach students how to best leverage cybersecurity for a safer digital community.

**ICT 3300 Programming and Data Structures (4 Credits)**

This course provides a first exposure to algorithms and fundamental data structures. Working "hands-on" with an integrated development environment, students learn to write and modify code in a widely used contemporary programming language, and discover how their acquired programming skills contribute to the plans, designs, implementations, tests, and maintenance of software solutions. Emphasis is placed on language syntax and structure, data types, arrays, Boolean logic, and functions. The course progresses to topics such as indirection, list and tree structures, object-oriented programming, application programming interfaces, and simple user interfaces.

**ICT 3350 Software Development (4 Credits)**

This course offers a streamlined journey through the essential stages of software development. Students will delve into the art of translating product requirements into actionable designs, followed by bringing those designs to life through fundamental programming practices. Throughout the course, students will use of version control systems to maintain a well-organized codebase and explore communication tools vital for team collaboration. The course also covers the deployment of code to live servers, and equips students with strategies for monitoring software performance. This enables them to proactively optimize functionality, troubleshoot issues, and refine their products based on user feedback.

**ICT 3400 Database Fundamentals (4 Credits)**

This course introduces databases and database system concepts. The material covers information systems design and implementation within a database management system environment. Incorporating lecture content and lab exercises, this course gives students a solid comprehension of the benefits and limitations of databases, while allowing them to get hands-on experience building a user interface to an existing database. All application development will be done in a graphical environment, using a popular desktop database workbench. File processing issues will also be introduced. Prerequisites: ICT 3100, ICT 3300, or equivalent experience.

**ICT 3450 Emerging Professional Concepts (4 Credits)**

New ideas arise in the technology sector almost daily. This course is designed to focus on emerging professional concepts that are timely, relevant, and forward-thinking. The course topics will change as trends emerge. Students will research, write, and present about the special topic in context.

**ICT 3500 Web Fundamentals (4 Credits)**

This course explores the fundamental development techniques of web page design using Hypertext Markup Language (HTML). Students learn how to create fully functional web pages by utilizing web fundamentals and best practices, including: how to effectively create layouts, use graphics, create hyperlinks, and use text formatting features of HTML. In addition, students are introduced to the use of cascading style sheets (CSS) to enhance the look of web pages. To better prepare students for evolving web standards, the course introduces students to the new HTML5 specifications and CSS3 features.

**ICT 3800 Network and Internet Fundamentals (4 Credits)**

This course covers networking and Internet technologies, hardware, software, and network communications protocols. Students gain knowledge of networking and telecommunications fundamentals including Local and Wide Area Networks, wireless communications, and the Internet. The core of the TCP/IP protocol suite is explored. Voice and data communication concepts, models, standards, and protocols are studied. Students learn about the ramifications of network characteristics such as throughput, latency and jitter on applications and the user experience. Students are introduced to the process of evaluation, selection, and implementation of different communication options within an organization.

**ICT 3950 Field Experience in Information Technology (4 Credits)**

This course is an experiential learning collaboration between a student, a faculty advisor, and a professional supervisor, offering students an opportunity to apply their content knowledge to a professional setting. Students will integrate academic theory with practical experience in a professional field of interest. Additional site-specific learning outcomes are established in conjunction with the site supervisor.

**ICT 3980 Information Technology Internship (0-4 Credits)**

Students will use their internships to integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting. Independent work products will be created.

## Information Technology and E-Commerce (ITEC)

**ITEC 3155 Business Data Skills and Concepts (4 Credits)**

This course is designed to give students an understanding of the technology underlying accounting information systems and help students develop more advanced data analysis skills. We will use the programming language Python to develop an understanding of the digital business logic that supports the operations of modern firms. We will learn to use Business Process Modeling Notation (BPMN) to graphically document operations and their underlying business logic. We will discuss and analyze a set of studies that use survey data from a global sample of executives and analysts to develop an understanding of the levels of technological sophistication in modern firms. We will also discuss and analyze distributed databases, information security, and eXtensible Business Reporting Language. Prerequisites: ACTG 3034, ACTG 3038 and ACTG 3037.

**ITEC 3325 Emerging Technologies (4 Credits)**

This course is for students who want a strategic edge: to understand how the advanced information technologies that are emerging today will impact business in the near to medium future. This course will equip students with an understanding of the key information technologies central to the knowledge economy, their current and prospective business uses, and lifelong skills in how to think about business uses of these technologies - to identify, critically analyze, and evaluate them. This course is for students who want to become key players in the coming economy by combining substantial understanding of the technology side with substantial understanding of the business side – applications and strategy. Prerequisites: INFO 2020.

**ITEC 3980 Internship (1-5 Credits)**

Practical experience (field study); requires written report. Instructor approval required.

**ITEC 3991 Independent Study (1-8 Credits)**

Independent research/study; requires written report. Instructor approval required.

## International LLC (ILLC)

**ILLC 2007 The International Experience (1,2 Credit)**

These 2-credit seminars are offered in the fall, winter and spring quarters. An interdisciplinary team of DU faculty select the courses annually. Two of the goals of these classes are to (1) Provide students with a fundamental set of critical knowledge skills that facilitate learning about diverse cultures, lifestyles and customs; (2) Strengthen student curiosities associated with intercultural issues through collaborative, experiential learning and collective inquiry. Course topics change each quarter and vary from year to year. ILLC seminar topics have included international film, intercultural communication, service learning, women of the world, human rights, and global social problems. Restricted to International LLC students.

**ILLC 2008 The International Experience (1,2 Credit)**

These 2-credit seminars are offered in the fall, winter and spring quarters. An interdisciplinary team of DU faculty select the courses annually. Two of the goals of these classes are to (1) Provide students with a fundamental set of critical knowledge skills that facilitate learning about diverse cultures, lifestyles and customs; (2) Strengthen student curiosities associated with intercultural issues through collaborative, experiential learning and collective inquiry. Course topics change each quarter and vary from year to year. ILLC seminar topics have included international film, intercultural communication, service learning, women of the world, human rights, and global social problems. Restricted to International LLC students.

**ILLC 2009 The International Experience (1,2 Credit)**

These 2-credit seminars are offered in the fall, winter and spring quarters. An interdisciplinary team of DU faculty select the courses annually. Two of the goals of these classes are to (1) Provide students with a fundamental set of critical knowledge skills that facilitate learning about diverse cultures, lifestyles and customs; (2) Strengthen student curiosities associated with intercultural issues through collaborative, experiential learning and collective inquiry. Course topics change each quarter and vary from year to year. ILLC seminar topics have included international film, intercultural communication, service learning, women of the world, human rights, and global social problems. Restricted to International LLC students.

**ILLC 2100 Globalization: A View from Costa Rica (4 Credits)**

Globalization" is a widely used word these days; however, there is little agreement on what it means. The diverse use of "globalization" may range from utopian to dystopian, from a losing proposition for some to the winning streak for the others, from the "civilizing power of free markets" to the "barbarism of state-controlled markets," from clash of civilizations to cosmopolitan ethics, from universally accepted values to honoring unique beliefs cherished by individuals, from protecting the rights of smaller countries to embracing a global order of a world government, from euphoric optimism to debilitating pessimism, from a melting pot of cultures to a loss of cultural identity—the list goes on and on. For all practical purposes though, globalization can be defined as the intensification of economic, political, legal, social and cultural interconnectedness across international borders (Paul, Roy and Mukhopadhyay, *Journal of International Marketing*, 2006). In this course, we examine this definition of globalization firsthand, by visiting Costa Rica. Costa Rica provides a perfect opportunity for studying the phenomenon of globalization. It is a close, sage and friendly country, yet quite different from the U.S. We learn about the similarities and dissimilarities in cultural, political, legal, social public policy, and economic systems that exist between Costa Rica and the U.S. We investigate the impact of globalization in Costa Rica and compare that with our experience in the U.S. Course activities include visits to local businesses, service learning projects with local schools and environmental groups, and guest speeches by government officials.

## International Studies (INTS)

**INTS 1500 Introduction to the Global Economy (4 Credits)**

Introduction to a range of pressing problems and debates in today's global economy, such as global economy, global markets and the global commons. Students will have a good understanding of the policy challenges posed by global economic integration and theoretical frameworks for understanding the functioning of the global economy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**INTS 1700 Introduction to International Politics (4 Credits)**

This course critically examines the nature of contemporary global society. It is designed to familiarize students with the broad parameters of international politics and takes into account numerous methodological and theoretical perspectives. The course explores both the historical development of international politics and how the business of international politics is "done." The course examines issues such as war and peace, human security, the politics of climate change, and international human rights. The overall goal of this course is to introduce students to the field of International Politics and to make them conversant about the major issues facing the global system in the 21st century. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**INTS 1988 Study Abroad Resident Credit (0-18 Credits)****INTS 2180 Politics of Development (4 Credits)**

This course seeks to answer an overarching question that plagues development studies: why are some countries poor while other countries are rich? Furthermore, we ask why poverty is persistent around the world, and how the economic, political, and social structures of a society can improve conditions of poverty within a country. We begin answering these questions by reviewing the history of development, especially development conceived since the 1950s, when the post-war world saw a need to rebuild societies in Europe, up to the present time, when human development became the focus in the decade following the end of the Cold War. The course covers the major documents promoting theories of development, as well as looks at the historical record of the implementation of development policies (noting the divergence between theory and practice). We consider specific case studies in the process of asking why some countries are poor and others are rich. Furthermore, we are concerned with the role of country policies and implementation practices, with the impact of international organizations (multilateral development organizations), and the influence of bilateral foreign aid, on development progress or decline within countries.

**INTS 2218 Intelligence and National Security (4 Credits)**

This course will provide an overview of the intelligence collection and analysis cycles, as well as the national security policymaking process. It will examine case studies in which both the perceptions and biases of analysts or policymakers resulted in intelligence failures, and discuss ways to avoid those misperceptions and counter biases. The course will conclude with a short simulation in which students will each play a member of the National Security Council, debating over the pros and cons of an important foreign policy decision.

**INTS 2235 Gender and International Relations (4 Credits)**

How does gender shape international relations (IR)? How do ideas about masculinity and femininity affect war and peace? The global economy? Migration? Foreign policy? What do feminist perspectives contribute to the study of IR? These questions have relevance for the academic study of IR as well as the lived experiences of people around the world. Answering them requires attending to the ways in which gender and aspects of sexuality are constructed through social and political relations, and the hierarchies of power they reflect and maintain. Overall, this course encourages students to grapple with the issue of if and how gender matters in international relations. We will begin by introducing the concepts and theories necessary to investigate, research, analyze, and understand the gendered nature of international relations. Next, we will use this knowledge to compare gendered and feminist perspectives on IR to mainstream IR and explore why they have not been fully integrated. Then we will engage in gendered analyses of a variety of topics in IR, focusing especially on security and the economy. We will finish by carrying out research on a topic of our choosing, using the lenses and tools we have developed. In the end, students should consider whether this sort of perspective provides a more nuanced and holistic way of understanding IR.

**INTS 2275 Introduction to the Environmental Crisis (4 Credits)**

We live in a time when the planet is undergoing great stress and strain. Multiple global environmental problems are pushing us to the precipice, but few people address the scope and scale of the problem. Clearly, the planet is undergoing powerful changes, much of it due to human activity. Indeed, this is exactly what we mean when we say we are now living in the Anthropocene epoch, where human activity has significantly altered the Earth. However, as complex the problems facing humanity are, a very simple question arises: Will humanity have enough time to turn away from going over the cliff and become sustainable? Although it is impossible to answer that question with any certainty, we have a much better chance of discovering an answer by realizing two basic components of the problem: 1) planetary stability, and 2) the planet as a system. This class distills the complex relationship between human activities and planet stability by understanding what planetary boundaries are and what it means when we push past them.

**INTS 2293 Democracy and Militarism in Latin America (4 Credits)**

Many note that even as democratization has taken place throughout Latin America, there has been a persistent and evolving role for the military, police, and private security forces in many cases. The purpose of the class is to explore this apparent contradiction by examining the various internal and external pressures that have come to bear on these societies. Through approaches derived from comparative politics and international political economy we study domestic factors such as interest groups, political parties, social movements, and governing institutions on one hand, and the role of international relations and organizations on the other.

**INTS 2370 Globalization and the Knowledge Economy (4 Credits)**

Much has been made of a new "knowledge economy" in which human capital has ascended to prominence over the traditional components of capital and labor. Further, the concept of "economic globalization" captures the realities of increasing interactions but exaggerates the notion of a single world economy connecting all producers, distributors, and consumers. In this class we examine the meaningful yet variable processes of increased knowledge diffusion and economic interaction to identify clusters of innovation, indicative of the knowledge economy. We then assess the applicability of globalization on a sector/ industry basis to identify ongoing transformations and future implications for knowledge development.

**INTS 2377 War in Ukraine (4 Credits)**

The war in Ukraine is a tragedy for all who are impacted. It is also a critical political/strategic event of the early 21st century and an insight into how political violence and the reactions/responses it provokes play out in a globalized world. Given we, sadly, cannot wish away war however defined, it is important to understand how/why this war started (the past), how/why it is playing out the way it is (the present), and what might happen going forward both specifically in the case of the Ukraine-Russia War/conflict and in other potential cases of future state level political violence (the future). As we are all citizens of states/societies confronting how to respond to threats to peace, our states/societies, and the world we live in, the war in Ukraine is a critical case study we can learn from and test our knowledge and preferences against in real time. Only in this way can we think seriously about the realities of political violence, international/global politics and strategic practice, and the humanitarian, social, economic, political, and physical costs that stem from war in a global age.

**INTS 2380 Comparative Development Strategies (4 Credits)**

Why do people in some countries have so much, while people in other countries lack basic necessities? This course explores the field of development economics, exploring the challenges improving quality of life in poor countries. We look at national-level indicators and explore theories of aggregate economic growth. But we also zoom in on particularly pernicious challenges, including health, education, the environment, agricultural transitions, demographic shifts, and human mobility. Students are invited to act as development practitioners themselves, developing skills in data analysis as well as grant writing.

**INTS 2430 History of the Middle East (4 Credits)**

This course treats the emergence of the modern Middle East in the modern period, roughly from the late 18th century to the present and examines the following topics: reformist attempts to meet the European challenge; the age of colonialism; the rise of nationalism; development strategies of socialism and capitalism; the impact of Israeli and Palestinian nationalism; the petroleum factor; the Islamic revolution in Iran; Saddam Hussein's Iraq; the Gulf War and the war on terror.

**INTS 2440 Women, War, and Peace (4 Credits)**

Conflict is gendered: it both shapes and is shaped by the gendered roles people play in society. Traditionally, men fight while women play supportive roles, men are perpetrators of violence while women are victims of this violence. However, this simple story is not only inaccurate, it limits our capacity to identify and analyze the full range of activities that men and women pursue during conflict. This story encourages us to valorize the warrior man and condemn men as cowards who will not take up arms. This story encourages us to expect women to be the victim and to ignore or treat as aberrant women who are perpetrators of violence themselves. This story also ignores the reality that the male/female dichotomy does not represent the full continuum of gender expression. The processes of peace-building are similarly gendered as it is elites who sit down to discuss the cessation of violence and design peace agreements and these are nearly always men who fight. Post-conflict environments are structured by peace agreements. When agreements are written by particular men, institutions and social structures tend to maintain the same kinds of gender bias that existed during conflict. This class will explore a range of issues guided by the question: how are conflict and post-conflict processes gendered?

**INTS 2468 Resolving Conflict by Negotiation (4 Credits)**

Social conflict is a national and global issue often expressed in violent ways culminating in shootings, civil war, and international terrorism. It is easier to escalate conflict than diffuse it, and easier to fight rather than negotiate, situations that often lead to frustration and insecurity for disputants. This course examines approaches and mechanisms of conflict resolution within the context of personal, cultural, and political barriers to understand why parties continue to fight or manage to solve their differences through settlement and reconciliation, and teaches techniques of conflict resolution, essential skills for progress and prosperity in the modern world.

**INTS 2470 Crime & International Politics (4 Credits)**

What constitutes a crime in one location may constitute a personal right, a survival strategy or legitimate business opportunity in another. So how then does one address criminality in a global society? This course explores the roots of transnational crime and both domestic and international response to criminal networks. Topics include corruption, the drug trade, and human trafficking.

**INTS 2490 Introduction to Global Health (4 Credits)**

This class is an introduction to the field of global health and explores relationships between social, political, cultural, and economic conditions of mostly low and middle-income countries and their impact on health and health services. We will spend some time covering health issues in high-income countries as well. A major focus of the course is the evolution of primary health care and alternative strategies in global health. Topics addressed include: maternal and child health, nutrition, the rise of non-communicable diseases, water and sanitation, community engagement, global health agencies, and funding sources. The course presents an overview of the multiple factors that influence global health and emphasizes the importance of a multidisciplinary approach to global health challenges.

**INTS 2565 Debates On Democracy (4 Credits)**

This course will cover a range of questions and issues related to the contemporary practice of democracy around the world. We will begin the course by briefly addressing questions about how to study democracy, including definitions and measurement. We will then turn to the question of why some countries adopt and practice democracy, while many others remain under authoritarian systems of rule, paying special attention to why and how democracy is apparently under increasing threat in some parts of the world. The second part of the course will assess issues of governance – why and how democracies do (or do not) effectively address the security, economic, environmental, and social needs of their populations. The third part of the course will address emerging challenges for democratic systems of government such as changes in information technology, migration and the management of diversity, and globalized capitalism.

**INTS 2595 Political Risk and International Politics (4 Credits)**

Political risk has risen in both scale and relevance since the start of the 21st Century to become a vital tool for policymakers, military planners, and global business leaders to chart a course forward. This course will provide you with an introduction to this exciting and growing discipline, introducing concepts like scenario analysis, field reporting skills, forecasting, and other tools of the risk consulting industry to familiarize you with this evolving practice area. We will explore how modern governments, NGOs, and multinational businesses factor risk into the decision-making process. We live at a time of great geopolitical transition and risk lurks around every corner. From the War in Ukraine to the debate over climate change to gyrating interest rates and energy prices, there has never been a more important moment to understand how to integrate risk into your thinking.

**INTS 2605 Nuclear Weapons in International Security (4 Credits)**

What role do nuclear weapons play in international politics? Why do states develop nuclear weapons? How are these weapons used in different crises? This course is an introduction to different themes in nuclear politics. The course will introduce students to the history of nuclear weapons, theories of nuclear deterrence, crises, non-proliferation, and disarmament. We will examine the nuclear weapons choices of different states, including those who have developed nuclear weapons, and those which have chosen to give them up. We will also assess if the international nuclear non-proliferation regime has been successful in attempting to spread nuclear weapons. The course will train students to pay attention to theoretical debates on nuclear weapons and how they speak to policy considerations and assess these arguments using historical empirical evidence. The course will also use these tools to assess current nuclear challenges with regard to U.S.-China competition, and the different crises involving North Korea, Iran, Russia, India, and Pakistan.

**INTS 2667 Illicit Markets (4 Credits)**

This course explores the relation between illicit networks, security, and the state in the global economy. We study the links between what is considered formal and informal, and legal and illegal, to examine what official views obscure in the everyday relations of transnational activities. The material largely examines illegal practices from the ground-up from the perspectives of everyday people, communities, and those involved in extra-legal activities. We begin with a critical examination of the categories of "illegal," "illicit," "the state," and "corruption." We reveal these categories as socio-cultural and political constructs rather than as pre-existent neutral categories of analysis. Who applies these definitions? How have they changed and what interests do they serve? Are distinctions between "illegal" and "illicit" useful or do they obscure the power of the state to determine legitimacy? Are some activities inherently illegal? Moreover, we explore the impacts of state security and militarization efforts on extra-legal networks and experiences of insecurity.

**INTS 2700 Topics in Intn'l Studies (4 Credits)****INTS 2701 Topics in Int'l Studies (4 Credits)****INTS 2702 Topics in Int'l Studies (4 Credits)****INTS 2703 Topics in Int'l Studies (4 Credits)****INTS 2704 Topics in Int'l Studies (4 Credits)****INTS 2708 Contemporary US Foreign Policy (4 Credits)**

When the United States first won its independence, its leaders sought to avoid at all costs the countless problems awaiting any country engaging in foreign affairs. Indeed, John Quincy Adams, in 1821, warned the United States of the dangers of "going abroad in search of monsters to destroy." In September of 2002, however, as American forces occupied one country and prepared to invade another, the Bush Administration released its National Security Strategy of the United States, which states: "To contend with uncertainty and to meet the many challenges we face, the United States will require bases and stations within and beyond Western Europe and Northeast Asia, as well as temporary access arrangements for long-distance deployment of U.S. forces." How did we go from isolation to empire? In this course, we will attempt to answer this question by exploring the progression of American foreign policy from its emergence out of isolation to its current stage of interventionist superpower. We will also identify and discuss key issues that are driving America's conduct abroad as well as evaluate the strengths and weaknesses of the given policies addressing these important issues. By the end of the class, students should have a solid knowledge of the major themes and developments in the history of American foreign policy as well as the ability to reflect critically upon on-going foreign policy debates.

**INTS 2715 Introduction to Comparative Politics (4 Credits)**

This course offers an introduction to the comparative study of political systems throughout the world. In the years following World War II, social scientists traveled extensively to newly decolonized regions of the world to examine societies there. Many found conditions so distinct from those of the western world that they warranted new models of political development. The distinguishing of development patterns in remote regions from those of western nations became the origin of modern comparative politics. The course considers both the impact of internal and external variables on political development. Internal or "domestic" variables include ideology, geography, economics and culture, while external variables include "globalization" and international conflict. Class includes understanding and critique of models of political development including classical liberal, authoritarian, communist, post-communist, "late" development, and social democratic models. It also includes discussion of possible new models in light of globalization and other factors.

**INTS 2725 Comparative Politics of the Middle East (4 Credits)**

In this course we will study the political systems of the contemporary Middle East, with particular attention to dynamics of stability and change. The course introduces students to contemporary Middle Eastern politics. The goal is to provide students with historical background and theoretical tools to answer the following core questions: (i) Why there are no Arab Democracies? (ii) What accounts for the rise and fall of popular uprisings in the Arab world since 2010? (iii) What accounts for the region's current economic hardships? and (vi) Would the adoption of Western-style political institutions improve governance and stability in the region? We will evaluate possible answers to these questions by scrutinizing the logic of theories, identifying their implications, and assessing them with available data. All of these questions will be examined in the context of the ongoing Arab uprisings. Throughout the course, we will study three different topics; first, we will study the making of the Middle East; second, we will study a variety of dynamics shaping the current politics of the region; and finally we will tackle a number of case studies in the Middle East. Prerequisite: INTS 1500 and INTS 1700.

**INTS 2760 Epidemics, Pandemics, and Panic (4 Credits)**

Sickness has terrorized humankind for centuries. Be it the Black Death, HIV/AIDS, Ebola, or the flu, diseases sweep through society leaving death and destruction in their wake. At times, it is the microbes that cause the greatest amount of suffering. Smallpox, for example, is believed to have killed 200-300 million people in the 20th century alone. But at other times, it is the people, who respond with ignorance and fear, that exacerbated the situation and inflict untold pain. Public policies which punished the poor for their poverty resulted in a million plus deaths during the Irish Potato Famine is one such example. Likewise, community responses couched in fear and victim blaming left tens of thousands to die from HIV/AIDS before serious public efforts to attack the disease began. Although illness brings out the worst in humanity, it also brings out its best. It was the pain and suffering from smallpox that led to the creation of the vaccine, a tool that saved millions of lives. It was belief in the benefits of a smallpox-free world that led mortal enemies to work together during the Cold War to eradicate this threat. This course will examine threats to the health of people around the world, it will look at the scientific tools available to protect our health, and will explore how both biological and social factors contribute to successes and failures of such efforts. This course is designed for those who do not have any background in public health, biology, or in public policy but are fascinated by how global society shapes and is shaped by the most humble or living things—microscopic organisms. Throughout the class, you will learn the basics about biological factors that influence the spread of disease, and learn about medical and social tools we have to control the same. We will examine public and policy response to ancient and modern plagues. Case studies include Black Death, Smallpox, influenza, HIV/AIDS, famine, and emerging biological threats.

**INTS 2780 Global Corporate Responsibility and Accountability (4 Credits)**

The course explores the role of corporate responsibility and accountability in a global context. Neoliberal globalization characterized by free trade has greatly expanded the role of global corporations in most countries. The practices and behavior of corporations are determining the quality of life for people throughout the globe. Yet there are few rules and laws that govern corporations on a global scale. While a corporation may exhibit social and environmental responsibility and respect human rights in one country, it may be a different matter altogether in the Global South where there are fewer restrictions on corporate behavior. Transnational corporations increasingly recognize that engaging in good practices to improve lives and communities extends beyond ethical and moral considerations. In many cases, corporations have been forced to change practices due to actions by civil society and governments. These actions have meant that corporations must consider monetary and reputational risks when considering the effects of their operations. These risks are increasingly built into business models to reduce expected and unexpected costs of community resistance and civil unrest. This has resulted in the "business case for global corporate responsibility." Against this backdrop are charges by NGOs and labor unions of corporations engaging in "greenwashing" and "blue-washing." The course seeks to expose students to various forms of corporate responsibility and accountability together with several global governance systems. The course will be useful to those students who are concerned about the ethics of global corporate investment and may want to work inside a transnational company. The course will also appeal to those who want to affect change through government or civil society organizations. It will also be advantageous to those interested in pursuing further study in this area. Finally, third party social auditing of transnational corporations is expanding, and the course provides some insights on work in this area.

**INTS 2790 Ethics and International Affairs (4 Credits)**

This course examines the following: social science and ethics, power-rivalry and capitalism versus human rights and democracy, the dimensions of poverty, what role the World Bank plays, the laws of the people, the two classes of human rights, national interest, and tolerance. At the end of this course, 1) students will have listened to the voices of indigenous, Black, and Latin women describing the oppression their communities have faced, 2) thought deeply about the "solidarity-dividend" (Heather McGhee) available to all including white folks in college education, health care, and every aspect of economic and social wellbeing, 3) have an understanding the role of settler colonialism and colonialism in the initial emergence and reemergence of fascism, and 4) understood the characteristic features, from Nazism to Putin to today in America, of the anti-democratic and inhuman Right.

**INTS 2810 Racism and Resistance: Denver and Beyond (4 Credits)**

Our country and our University have achieved some great things. But our history is also one of genocidal racist misogynies, starting at DU and in Denver with the Sand Creek Massacre and the later rule of the KKK and "eugenics." Listening to the voices and responding to the actions of those whose humanity has long been denied is a first step to creating a genuine democracy which upholds the equal basic rights of each person (what is foreshadowed - though only for some - in the First Amendment). Growing out of discoveries about this history in the University Report on John Evans and the Sand Creek Massacre as well as a new manuscript, "Murderous Bigotries," which relies on extensive research in the DU and Denver Public Library Archives, this course will honor first and foremost the voices of those long denied or forgotten who worked, mainly from below, to challenge these oppressions. It will also identify the destructive consequences for all of us of "'white' supremacist" misogyny.

**INTS 2930 Contemporary Latin American Politics (4 Credits)**

This course provides an introduction to the study of Latin American politics. It is designed to provide students the opportunity to better understand how Latin American societies and political systems are organized and the major issues facing these governments and their citizens. Although a wave of democratic transitions in the 1980s and 1990s transformed most Latin American countries into electoral democracies, the extent to which countries can be said to have fully democratic regimes varies widely today.

**INTS 2975 Global Issues Research Practicum (4 Credits)**

This is the third and final required course for all international studies majors. In the first two introductory classes, you acquired knowledge about international politics and the global economy. In this class, we investigate where that knowledge came from. How do researchers learn things about the political world? And how can you do this kind of research yourself? Students will learn about different types of international studies research, and will practice collecting and evaluating evidence from interviews, surveys, the written record, and quantitative sources. You will learn to ask a compelling research question, critically evaluate existing research on your subject, and find evidence that will help you answer your question. Your final project will be to design a research project that you could feasibly conduct in a future quarter. Prerequisites: INTS 1500 and INTS 1700.

**INTS 2988 Study Abroad Resident Credit (0-18 Credits)****INTS 3000 Research Methods & Design (4 Credits)**

This course is designed for advanced International Studies majors, including Department Distinction, that intend to write a thesis in INTS. It introduces students to the fundamental elements of social science research and will serve as a workshop to complete a literature review and write a research proposal. The basis of any scientific investigation is the research proposal in which you formulate a question and design a process by which you will explore that question through a systematic collection and analysis of evidence. The design process is the same whether you are writing a short class research paper, or are conducting a major research project, such as a thesis. The manner in which evidence is gathered and analyzed, however, will vary based upon the research question, research goals, and resources. We will therefore go through the process of research design. Because international studies provides multiple methods of inquiry, we will also explore quantitative and qualitative methods that may be used to gather and analyze evidence. Prerequisites: INTS 1500 and INTS 1700. Must be an INTS major and receive departmental permission.

**INTS 3002 International Trade and Development (4 Credits)**

This course introduces students to the politics and economics of international trade. Special attention is paid to the relationship between international trade and economic development and to the experiences of developing countries in the international trading system. Alternative perspectives are introduced and applied, both historically and to a selection of contemporary issues that affect developing countries.

**INTS 3013 Corruption – A Global Epidemic (4 Credits)**

Corruption is a ubiquitous phenomenon in all political systems, whether democratic or authoritarian - from illegal campaign contributions and lobbying tactics in America, to vote buying and hijacking elections in Africa, from rigging official government-issued macroeconomic reports in Europe, to securing safe havens for drug, arms, and human trafficking in Latin America and Asia. This class explores corruption from a comparative and international perspective and raises questions such as: What is corruption and how is it measured? What are its causes and effects? Do they vary across countries or regions in the world? When and how does it impede economic opportunity and can it actually lead to efficiency gains? Through what mechanisms does it erode political legitimacy and democratic institutions? What are the “human” costs of corruption? In asking these questions, the course features a number of documentaries and tries to evaluate how conditions for and outcomes of corrupt behavior are similar and different across Europe, North America, Africa, Asia, and Latin America. In addition to the issues related to corruption, the class will also offer a critical review of the contemporary recommendations for “fixing” the problem. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3016 Global Governance (4 Credits)**

The term “global governance” is often associated with the deepening of globalization. Many parts of what we see as global governance, though, from international law to international organizations to international regimes to international norms have longer histories. The architecture of global governance has often been assumed to be nation states organized into international organizations but in the last 30 years we have witnessed an increasing range of different actors and forms. In this course, we will examine these various actors and forms and how they interact in the governance of three issues areas: climate change, business/security/human rights, and cyber. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3017 The Revolutions of Black, Brown, and Indigenous Peoples: Violence and Nonviolence (4 Credits)**

This course focuses on revolutions of black, brown and indigenous people in the Americas, ones historically forgotten in academia, as well as the issue of violence and nonviolence in the Chinese, Indian, Tibetan and South African revolutionary movements. It will set this glaring omission and rich discussion in the context of the eugenics which marked the study of international relations and sociology, including of revolutions, in the United States in the 1920 and 1930s and whose influence continues until now. We will begin from Robert Vitalis's surprising White World Order, Black Power which underlines the central role of W.E.B. Dubois in challenging these racist disciplines. We will also read Aldon Morris's The Scholar Denied on Dubois' founding of an anti-racist American sociology and how, for political reasons, this came to be denied by the famous, egregiously racist “Chicago” school of Robert Park. We will begin from the great struggles – black soldiers on both sides in the American Revolution and how black Patriots played the decisive role on the American side, benefiting all revolutionaries (Gilbert, Black Patriots and Loyalists), the great insurrection of people who were enslaved which made Haiti (CLR James, Black Jacobins and Elizabeth Fick, The Making of Haiti), and the role of pardos (blacks) and indigenous people in Venezuela (Robin Blackburn, The Overthrow of Colonial Slavery) – in the New World. We will trace the role of those who were enslaved in forging many great revolutions – each of which is vital to creating a free society for all - which have been hidden academically and historically, by a kind of amnesia. We will then explore the debates about violence and nonviolence central in mass uprisings against colonial racism and domination in China, Tibet, India, and South Africa. We will consider explanations of why such major revolutionary movements have been long “forgotten” in academic study and ask what new light these revolutions cast on the standard trajectory of European revolutions. At the end of the 19th century, W.E.B. Dubois, for example, refers to the “color line” in projecting twentieth century movements. In academia, the past is often interpreted in a “too European” and, unselfconsciously, “White” (often “forgetting” colonialist and racist crimes...; hostile to ordinary white folks) idiom. In addition, we will discuss the revolution from below in China - rarely considered with dispassion or even sympathetically, though Theda Skocpol and William Hinton do - as well as the oppression/ethnic cleansing of minorities in China, particularly in Tibet. We will thus contrast some strengths and weaknesses of regimes emerging from violent revolutions in the Americas, Haiti, and China, and look at attempts to forge mass nonviolent revolutions and learn from/modify Gandhi in India, Tibet and South Africa. We will also compare movements of indigenous people in the Americas, Palestinians, and Tibetans against settler colonialism. Finally, we will ask to what extent the nonviolent transition to a new regime actually limits future oppression and violence in India and South Africa. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3020 Introduction to Middle East and Islamic Politics (4 Credits)**

The contemporary politics of the Middle East cannot be understood without some debate of the West's relationship with the region and the associated view of the Orient that grew out of this relationship. In light of this reality, the state system that has emerged in the region since the demise of colonialism forms a suitable framework in which to understand the major themes of this course. The first major theme to be discussed is the impact of colonialism on the region, particularly in the latter half of the nineteenth century and first half of the twentieth century. In this section of the course we explore the nature of political rule and government and the prevailing economic motive behind this imperial and colonial relationship. The second theme of this course explores political ideologies, both secular and religious. A historical overview of this development will be explored in the context of current theories of nationalism posited by authors such as Benedict Anderson, Eric Hobsbawm and Ernest Gellner. The final section of this course briefly explores the theme of democratization and its discontents in the Middle East. The focus is on recent debates about democratization that have been promoted from outside the region as a means of combating tyranny within the region, particularly the perceived anti-democratic nature of political Islam. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3021 Introduction to Islam and Politics (4 Credits)**

Since the eruption of the 'Islamic Revolution' in Iran in 1979, 'political Islam' has influenced both public and academic debates. Though often accused of being 'anti-democratic' forces, Islamic political actors have dominated electoral politics in the Middle East and have spread politically elsewhere in world politics. The Islamic Salvation Front “ISF” in Algeria, the Justice and Development Party “AKP” in Turkey, the Islamist Hamas in Palestine, Nahda in Tunisia, and Muslim Brothers in Egypt have all defeated their secular opponents in democratic elections in the last three decades and many of them were ousted by military interventions. What is political Islam about? Is it harmonious with democracy? What are its intellectual, social, and historical roots? How do Islamists behave when in power and opposition and why? These are some of the pivotal questions to be addressed in this course. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3030 Sports and International Politics (4 Credits)**

This advanced undergraduate course in international studies explores the complex connections between sports and international politics in the past and present and sport's relationships to international peace, both historically and in contemporary times. At the heart of this contribution is the need to examine sport as an international issue, to explore and its relationship to the protection and advancement of human rights (to include gender equality and the rights of those with disabilities), and to critically examine the role of sport in fostering community-level social cohesion and inclusive national unity. Participants in the course will gain a critical knowledge of the origins, background, and issues in global sport, especially the Olympic Games, and a critical awareness of the potential opportunities and obstacles for sport in social development. Learning outcomes are attained through faculty presentations, guided discussions, and student-led research. The course is designed as a research colloquium in which participants develop and share a research dossier on course topics with a capstone seminar to integrate learning and share findings on historical and contemporary issues at the intersection of sport, power, profit, and peace.

**INTS 3040 Technology and Development (4 Credits)**

From the classic works of Adam Smith and Karl Marx to contemporary analyses by noted development economists Jeffrey Sachs and William Easterly, the role of technology in fostering economic growth and wider well being is firmly established. As the application of embodied knowledge, technology enables increased productivity, as well as new capabilities, goods, and services. While the role of technology in promoting human advancement is well established, the specific processes required for the effective development and use of technologies is less understood. Further, technological development varies considerably between developed and developing contexts with persistent inequalities hindering basic needs for billions.

**INTS 3070 Political Economy of Latin America (4 Credits)**

The study of development in Latin America, exceptionally rich in natural resources, offers an opportunity to explore the interplay between the forces of economic development and efforts to achieve greater equity, representation, and ecological balance. We open with a consideration of different perspectives on development. Should the purpose be to increase wealth, reduce poverty, become more "modern"? How much attention should be given to protecting the environment? We follow with a discussion of the external influences in Latin American development including the role of the U.S., investors, banks, and other major powers. Along the way, we will give special attention to the increasing emphasis on the extractive industries and their impacts, including economic growth, urbanization, and the rise of some of the largest fortunes in the world, along with adverse effects on the environment, human health, and the prospects for the survival of many indigenous and rural communities. Finally, we will be looking at social movements and other strategies, which address these adverse conditions. In many cases, individual communities, specific sectors, and broad segments of civil society are resisting the harms of neoliberal policy and advancing alternatives that stress greater equality, democratic participation, and ecological balance. These struggles are some of the most exciting events in political economy.

**INTS 3085 Global Economic Challenges (4 Credits)**

This course deals with the major challenges facing policymakers in the global economy today. We discuss how policymakers balance competing objectives of pursuing economic progress, ensuring national and international security, and advancing global equity and sustainability. We focus on global institutions as well as informal mechanisms for cooperation between world leaders and key national decision-makers. Topics covered include globalization and economic interdependence, the provision of global public goods, achieving sustainable development, tackling inequality, responding to economic crises, pursuing productivity growth, dealing with international migration, and promoting democracy.

**INTS 3090 Human Rights Challenges (4 Credits)**

This course explores current practical human rights challenges around the world and how social science research can be used to understand and promote human rights. The field of human rights is bedeviled by several challenging obstacles to research, including reporting bias, hidden abuses, missing data, and politicization of the facts. To deal with these obstacles, we will learn about various methodological tools and how they are applied for the analysis of special human rights topics. The course will cover issues such as truth commissions and human rights legal proceedings, quantitative and qualitative human rights data, impact evaluation of human rights programs, and event mapping. By the end of the course, students will be equipped to compile and present information to highlight patterns of rights abuses and identify patterns of cause and effect.

**INTS 3111 Global Human Migration (4 Credits)**

This course focuses on the human dimensions and impacts of global migration, as well as the expanding global architecture of attempts to contain and/or selectively filter cross-border mobilities. To explore current topics such as the quest for asylum and refugee status, the familial and community impacts of separation, carceral detention and deportation, the racialized and gendered dynamics of migrant labor, the outsourcing of militarized borders, human trafficking, and grassroots solidarity, resistance, and humanitarianism, we center the human lives and stories that are frequently left out of polarized discourses, reduced to simplistic archetypes, or detached from top-down policy frameworks. We include the lives of migrants, refugees, and their loved ones, NGOs, humanitarians, activists, border officials, guards, and policy-makers, employers, smugglers, and the everyday people who wrestle with both the impacts of migration and states' attempts to manage it. The course attempts to be global in scope, ranging from cases in the United States to Europe, the Middle East and Gulf region, Africa, and reaching to Australia's waters. The course centers around a book-based approach, with a combination of ethnographies or graphic novels, and is supplemented by photography, blogs/creative works, and films to encourage students to develop a holistic understanding of migration, grasp the complicated, diverse human protagonists and impacts, and draw comparisons among topics and regions. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3112 Challenges in International Development (4 Credits)**

The position of developing countries in the international system puts them on the front lines of multiple crises, including climate catastrophe, poverty, inequality, war, state failure, and migration. Students who have taken INTS 2180 Politics of Development or an equivalent political economy class are invited to take this advanced course on international development challenges. Each week, we will tackle an issue area of concern to developing countries. Examples will include economic statecraft, urban development, digitalization and development, BRICS, China, war in Ukraine, the architecture of international aid, migration and development, de-growth and climate, gender and development, and neofascism and the crisis of international development.

**INTS 3130 International Relations Theory (4 Credits)**

This course examines the important classical, behavioral, and post-behavioral theories of international relations, and the nature of theory in international relations. Topics include the role normative theory; levels of analysis, structure-agent relationships, and concepts of foreign policy behavior and decision making; utopian/neo-liberal and realist/neo-realist theory, and democratic peace theory; theories of power and its management; theories of integration, cooperation, conflict, war, and geopolitical and ecological/environmental relationships; constructivism; systems theory; regime analysis; the relationship between theory and the international system in the early 21st century; traditional and contemporary paradigms of the international system. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3210 The Utility of Force in the 21st Century (4 Credits)**

This course centers on the nature, character, strategies and termination of the range of forms political violence – violence used to achieve political ends be it by states, the international community, or non-state actors – takes in the early 21st century. After a general discussion of the lexicon of security, force, war, and war termination, each of the five forms of political violence are explored beginning with a discussion of the fundamentals, an exploration of the current context and character of the form centering on a leading book on the subject, and then a discussion of counter-strategies and broader political/societal considerations. The course ends with a similar three part discussion of the political/military realities and necessities of violence termination. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3212 Civilian Protection in Armed Conflicts (4 Credits)**

There are many courses on security topics. Civil wars, terrorism, violence, genocide, peacekeeping and peacebuilding, humanitarian intervention, human security...the list goes on. This course is different. This course is about the protection of civilians in wartime. Civilian protection is one of the great challenges of our time. The means of violence have been distributed and small groups of people are able to inflict harm as never before in human history. Yet there are also emerging and cutting-edge procedures and technologies available to the “protectors.” Civilian protection is a new perspective on security that differs from existing treatments of this topic. We will begin the course with an overview of theories of violence and legal and ethical frameworks governing the use of force. We will consider issues such as what it means to be a civilian, and what normative and strategic considerations motivate decision-makers to take protective actions. The rest of the course is organized by the different actors that might provide protection. We will consider (theoretically and empirically) how various actors throughout society, from state actors, to international organizations, to illegal armed actors, to NGOs, to civilians and their communities—the would-be victims of violence—can either promote or restrain the use of violence. We will also consider the conditions under which the protection of civilians is most feasible as well as research methods for analyzing populations and their protection strategies. In their final projects, students will analyze the threats of violence faced by a particular population and design appropriate protection strategies and policies to deal with them. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3214 International Peace & Security (4 Credits)**

At a moment of deep domestic division over the nature of challenges to peace and security, either at home or abroad, crucial actors in defining and meeting those challenges will be ordinary citizens, whose personal views are reflected in forms including voting, political action, and—as we tragically saw on January 6, 2021—the use of force. In an increasingly autocratic world, citizens of the U.S. and other struggling democracies are now crucial actors on the world stage. While this course will include traditional “state centric” approaches to international peace and security, it seeks to enable students to reach personal conclusions regarding what is worth fighting for and against, informed by one’s values and judgments over what is politically realistic to pursue, domestically and internationally. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3215 Major Issues in International Security (4 Credits)**

This course begins (in Part I) by considering the threat that created the field of “security studies” following the second World War: the origins and evolution of the nuclear danger. Part I ends with an assessment of the most dangerous manifestation of that threat in several decades: North Korea’s acquisition of nuclear weapons and long-range missiles. We turn next to addressing (in Part II) a question that seemed answered since the dawn of the nuclear age, when the United States moved from its defeat of Fascism in World War II to the containment of communism in the Cold War, to expanding the zone of free market democracies during the post-Cold War era: What does the United States seek to secure? Even if all could agree on the nature of particular security threats and the fundamental goals of security policy (as occurred for the United States after the attack on Pearl Harbor), enormous challenges confront the formation and implementation of national security strategy and policy. Part III of the course will identify and evaluate those challenges, using the 2003 decision to invade Iraq as a case study of the enduring problems that confront national security policy-making. We finally turn (in Part IV) to analyzing a series of current issues, including the threat posed by violent Islamist organizations, the consequences of U.S. disengagement in the Middle East, the impact of changing technology on the international security environment, (drones, surveillance, cyberwar, hybrid warfare), and the risk of conflict between the United States and two other major powers: Russia, and China. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3218 Intelligence Threat Assessment (4 Credits)**

This course will provide an overview of the intelligence collection and analysis cycles, as well as the national security policymaking process. It will examine case studies in which both the perceptions and biases of analysts or policymakers resulted in intelligence failures, and discuss ways to avoid those misperceptions and counter biases. The course will conclude with a short simulation in which students will each play a member of the National Security Council, debating over the pros and cons of an important foreign policy decision.

**INTS 3220 Trafficking in Persons/Smuggling of Migrants (4 Credits)**

Through the Education for Justice (E4J) initiative, the United Nations Office on Drugs and Crime (UNODC) has developed a series of university modules with a focus on the subject areas of crime prevention and criminal justice, anti-corruption, organized crime, trafficking in persons and smuggling of migrants, firearms, cybercrime, wildlife, forest and fisheries crime, counter-terrorism as well as integrity and ethics. In recent years there have been few topics garnering as much widespread interest as trafficking in persons (TIP) and smuggling of migrants (SOM). These issues have attracted the attention of Governments, NGOs, International Organizations, the media as well as academia. While this attention tends to provoke vivid discussions in political circles, social networks and other media platforms, there is little solid understanding of TIP and SOM, the difference between them and their implications. Last Spring, I joined 12 other academics with expertise in human trafficking and human smuggling from around the world for a week in Doha, Qatar to create a syllabus primarily for the teaching of TIP and SOM at universities and colleges. The 14 Modules on TIP and SOM will provide students with a practically oriented, though still theoretically grounded, tool to understand these issues. Thanks to the inputs received from an addition 100+ academics from all around the world, the Modules' contents are substantively robust. This strength is reinforced with a series of illustrative examples and exercises aimed at generating debates and consolidating knowledge among students. Given the considerable safety risks posed by TIP and SOM and the related need to ensure that perpetrators are made accountable, the course relies heavily on a legal approach, acknowledging the importance of clarifying concepts and employing rigorous terminology. This notwithstanding, the course is also grounded in a multidisciplinary methodology, recognizing that the complexity of the trafficking in persons and migrant smuggling phenomena extends beyond the legal realm. Consequently, a comprehensive understanding of TIP and SOM is not possible without the convergence of various disciplines, expertise and perspectives, including the historical, economic, social, political, and gender prisms, that are all considered in developing the course. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3222 International Law and Human Rights (4 Credits)**

An introductory course examining the concept of human rights, including political, economic, social, and cultural rights. International, regional and national institutions, norms and procedures to protect individual and group rights are discussed. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3225 Terrorism (4 Credits)**

Over the last century, the term terrorism has been applied most often to the illegal use of violence aimed at governments—directly or indirectly—in an attempt to influence policy or to topple an existing regime. Terrorist acts are designed to create widespread fear across an audience far beyond their immediate victims in order to weaken the general sense of security in society, and to mobilize publics and pressure leaders to change. Historically, terrorism has been practiced by political organizations on the right and on the left, used by nationalist and religious groups, by revolutionaries, and by state institutions including military forces and intelligence services. Numerous definitions of terrorism have been proposed. Many are confusing and controversial owing to the value-laden basis of the concept and its intense stigma. Who seeks to be called a 'terrorist'? This derogatory term is designated by its victims and ideological opponents. But it is not applied to all episodes of politically-based violence.

**INTS 3347 China in the Global Economy (4 Credits)**

It is impossible to discern the 21st century without having some level of understanding of China, which now possesses the largest army in the world, the biggest economy in terms of purchasing power parity, and the greatest number of people. Chinese firms provide foreign direct investment (FDI) worth \$3.8 trillion in stocks by 2018 and Chinese policy banks fund official financing totaling around \$648 billion between 2000 and 2018. Chinese technology firms have launched some of the most widely used applications such as TikTok and Zoom. The Ministry of Finance, the People's Bank of China, and the State-owned Assets Supervision and Administration Commission of the State Council have been able to rewrite some of the global development architecture, launching the Asian Infrastructure Investment Bank and the Belt and Road Initiative. Global trade passes through Chinese land or maritime economic zones, comprising 12.4% of global trade in 2019. In security issues, the Chinese Ministries and the People's Liberation Army have been at the forefront of redefining norms, such as the responsibility to protect, global intervention, and the universal declaration of human rights. In climate change, Chinese electric vehicle companies have been at the front and center of these new carbon-free technologies, and renewable energy firms have made strides at limiting carbon emissions within the Chinese borders. China often produces the newest billionaires in the world, comprising individuals who are responsible for investments in online gambling or wildlife hunting. Prerequisite: INTS 1500 and INTS 1700.

**INTS 3365 African Development (4 Credits)**

This is an undergraduate course on Development in sub-Saharan Africa (SSA). It introduces the student to the main issues and themes confronting contemporary African development. It draws on literature from development economics, history, comparative politics, sociology, anthropology, geography and international relations, as well as a broad range of country case studies. The course reviews patterns of development in the SSA region. It then engages with the main theories of economic growth and development and evaluates their application to Sub-Saharan Africa. The main issues include the impact of Africa's geography, natural resources endowments and climate; the legacy of slavery and colonialism; independence, state formation and failure; patrimonialism, clientelism and corruption; Africa's economic crisis and reform efforts; foreign aid and debt; democratization and; reflections on Africa and the sustainable development goals. The course will equip the student with knowledge and skills to be a positive and effective player in the area of African development. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3372 Comparative Genocide (4 Credits)**

Violence is, and will continue to be, a central feature of our social world. Despite repeated choruses of "never again," genocides and campaigns of widespread atrocities have occurred with alarming frequency since the Nazi Holocaust during World War II. This course introduces you to this depressing – but important – topic by examining the historical origins, patterns, and legacies of contemporary genocides around the world. We begin with the UN Convention on the Prevention and Punishment of the Crime of Genocide in 1948, which legally codified the definition of genocide and compelled ratifying parties to prevent its reoccurrence. We will discuss the definitional and analytical challenges facing this subject, as well as academic and policy debates regarding how to define and prevent genocide. We will also focus on how individuals and communities have resisted such atrocities through solidarity, art, non-violent action, and other creative strategies to reclaim their humanity together. We will also talk about how and when institutions, civil society, and a free press can serve as important bulwarks against such violence. And we will pay particular attention to how mass atrocities end and how they might be prevented. Prerequisite: INTS 1500 & INTS 1700.

**INTS 3385 Migrants and Refugees: Humanity on the Move (4 Credits)**

This course begins with the pre-history and history of human migrations and moves to cover the era of European colonization and forced dispersal (and in some cases aggregation) of peoples in the Americas, Southeast Asia, and Africa. The "contemporary" (i.e., post-WWII) era then covers not only the movements of peoples from Central Africa, Southeast Asia, the Balkans, and elsewhere, but will highlight the achievements of immigrants and refugees in such areas as technology, the arts, and the field of human rights. Issues of ethnicity, nationalism, and political diasporas will bring the contemporary era to a close. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3415 State Department Tradecraft (4 Credits)**

This is a foreign policy skills-based course designed to foster an ability to more effectively engage internal leadership, the press, and foreign audiences while working in a government context. Students will draft a range of communication products including policy memos, diplomatic cables, and talking points and practice essential oral communications skills ranging from negotiation, speaking to the media, and delivering briefings to officials. The State Department's communications model will be used as a template for engagement, but the skills will be broadly useful to any individual planning to formulate, implement, and educate on policy in executive and legislative settings. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3420 Climate Security (4 Credits)**

Since the dawn of agriculture (~7000 BCE), but rapidly accelerating in the industrial age (1750 CE to the present), humanity has conducted an uncontrolled experiment in bending the natural environment to fit human needs and desires. Despite the perceived distance that technology has placed between our physical environments and our daily lives, human interactions with our natural environment are still fundamental – and set to be disrupted by climate change, one of the most vexing issues of our time. It poses a wicked problem: a socio/cultural problem that is seemingly impossible to solve due to incomplete knowledge, the number of people and opinions involved, the large changes required, and the linked nature of the problem with other major social issues and problems. Since the end of the Cold War, much attention has been paid to the role of natural resources and environmental scarcity as a source of conflict, ranging from "water wars" between states sharing a common river basin to communal conflict between pastoralists and farmers in the Sahel and even the Syrian Civil War. This course will survey the impacts of climate change on livelihoods and human security, evaluate the expanding literature on environmental impacts on conflict, and address the emerging role of environmental stressors and climate change as US national security issues. Prerequisite: INTS 1500 and INTS 1700.

**INTS 3421 Environmental Justice and Policy (4 Credits)**

Environmental justice (EJ) asks how we can ensure a fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the design, implementation, and enforcement of environmental laws, regulations, and policies. In short, how can we facilitate an environment where people live, work, and play exempt from unequitable allocations of environmental benefits (such as natural resource distributions) and harms (such as environmental health hazards). The course will present a historical overview of the EJ movement in the United States and its intersections with global EJ. It will cover the theoretical and practical methods used in environmental policy to assist government agencies, from the local to the global, in addressing immediate and long-term environmental justice challenges. Particular attention will be placed on the Colorado State legislature and how different environmental justice bills are designed and negotiated through the legislative session. Students will examine proposed bills and their relationships to social theories on EJ, diverse actors' interests and needs, and the appropriateness of the solutions presented to address specific environmental inequities. This will require group collaboration to examine specific EJ bills and produce in-class presentations and a policy brief that engages students critically with the course material and a real-world EJ issue. In short, with this course you will:

- Learn about the EJ movement history
- Create and share your own EJ story
- Explore issues in water access & air quality, food insecurity, access to nature and open spaces, and more
- Understand EJ policy in Colorado and beyond
- Analyze EJ policies in the Colorado State legislature

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3425 Political Psychology (4 Credits)**

Political psychology provides an important lens for studying and understanding political phenomena and global patterns. It maintains that the study of individuals and groups is essential for understanding political behavior, and such study must go beyond rational actor assumptions to an understanding of how individuals and groups behave in political contexts and what influences this behavior. Political decisions and actions are ultimately taken by individual actors, whether they be leaders, elites, or average citizens. This course will explore this important area of theory and research lying at the intersection of several fields – psychology and political science of course, but also sociology, anthropology, organizational studies, and even neuroscience. Why do we see a rise in populism across many countries? How do atrocities and genocides occur? Why is developing peaceful and multicultural societies so difficult? How is voter choice influenced? Why do leaders do what they do? What does security actually mean to people? How is reconciliation achieved? The course will use a combination of readings, case studies, and discussions to enhance class members' understanding and appreciation of the central concepts, theories, research methods, and applications of political psychology.

**INTS 3431 Data and Forecasting for International Studies (4 Credits)**

Countries vary in relative levels of wellbeing, governance, stability, and sustainability for several reasons, often involving complex interactions that limit our ability to divine a single, general explanation. That said, social science theory, data collection, and quantitative methods have improved significantly over the years, providing insights into complex, systemic interactions. These relationships not only help in understanding past outcomes but also indicate potential future trajectories under variable assumptions. Using data freely available from groups like the World Bank, CIA, and others, along with forecasts from the International Futures (IFs) system, we can begin to understand "where we've been," "where we're headed," and "where might we want to be." In this course, students will obtain a general understanding of quantitative data, causal analysis, and forecasting techniques relevant to international studies. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3435 Political Economy of Globalization (4 Credits)**

This course aims to provide an in-depth understanding of globalization and its differential impact on advanced and developing countries, using a wide range of literature from political science and political economy. The term 'globalization' connotes many different developments and processes and has become a leitmotiv of contemporary debate. It is an 'essentially contested' concept, which means that there are multiple meanings attached to it and that it has been heavily invested with normative claims. It can be used to capture the increasing speed and volume of communications, the spread of mass media, the growth of the internet, and the expansion in cross-border and transnational flows of goods, services, jobs, and capital. All of these things are important. But precisely because of the range of phenomena it is used to refer to, and because of its frequent deployment for ideological ends, the notion of globalization must be handled with care. Though it conveys a reality that needs to be understood, it is often used lazily by the media, as a means of avoiding blame by politicians and for personal aggrandizement by certain public intellectuals. All play on the fear of what lies beyond our control. As employed in this course, 'globalization' lies primarily in the domain of economics—and in the social and political implications of economic change. Globalization in this sense can be reduced to: • trade (the movement of goods and services across national borders); • direct investment (the purchase of factories or equipment abroad); • and capital flows (the movement of money across national borders).

**INTS 3455 Modeling for Development, Sustainability, and Security (4 Credits)**

This course is intended to provide students with an introduction to the current state of affairs in macro-level human development across issue areas. It will provide them with tools to better understand how to think about these complicated and potentially intractable challenges. This course introduces students to analysis using one class of quantitative tools called integrated assessment models (IAMs), which quantitatively represent complex systems in interaction. IAMs are tools that formally model the interaction across key development systems, like demographics, economics, energy, and the environment. They can be used to 1) think critically about how key trends are unfolding, 2) identify leverage points; and 3) explore the impact of changing policies and environmental uncertainties on desired outcomes.

**INTS 3485 The Role of Religion in International Affairs (4 Credits)**

The role of religion in international affairs was largely unexplored by scholars prior to September 11, 2001 when religiously based acts of terrorism shook the world. Since that time there has been an increased interest in examining religion in terms of its' impact on the international system. Is religion a force for good or evil within the international system? How influential is religion in international politics? Does religion matter or is it merely background noise in our study of the international system? In short, this course examines the role of religion in international affairs with an eye toward understanding political violence, political economy and conflict resolution in terms of religion and religious actors. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3505 International Health and Development (4 Credits)**

Investment in health and investment in development work symbiotically in the production of economic and human well-being. However, what constitutes health and development varies across context, institutions, and geographies. This course will focus on the meaning, measurement, financing and delivery of inputs to human well-being and other aspects of development. This course will explore dominant models of health and development, what assumptions inform these models, and who is left unaccounted for within each. We will examine how macro-level decisions, decisions made by global or national institutions, impact both options and outcomes at the community and individual level. The exchange between development policies and health interventions will be explored. We will examine and critique the instruments and methods that are used to measure health and development and the assumptions that inform mainstream development and health paradigms.

**INTS 3530 Politics and Economics of Food/Agriculture (4 Credits)**

This course asks students to critically explore contemporary debates about the global food and farming system with an eye to understanding its structure, operation, ideological basis, and impacts on people around the world. Of special interest in the course is the manner in which the global food and farming system both creates and aggravates global inequalities. Students focus partly on theories of and ideas about the role of agriculture in the economy, society and the development process, the appropriate structure and orientation of agricultural production and distribution, the role of the state in directing food production and distribution, and the nature of justice for farmers and eaters. Students further engage a spectrum policy debates and case studies that particularly illustrate the workings of the global food and farming system and the harsh contradictions that underpin it. Among other topics, students are exposed to debates about food prices, hunger and famine, obesity, commercial production and agribusiness, the peasantry and subsistence farming, biotechnology, free agricultural trade, fair trade, agricultural pollution and agriculturally-induced climate change. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3560 Globalization and International Security (4 Credits)**

Globalization moved a long time ago from social science to omnipresent buzz word, but with increased usage has not always come increased understanding. Globalization is the increased participation, and consciousness of that participation, by individuals in global, that is to say trans-regional or transnational, networks. Today's globalization is made possible in large part by dramatic and continuing changes in technology, but its impacts are social, economic, political, and potentially military changes in perception, in scale, in magnitude, and in threat. This course specifically concentrates at the intersection of global networks, the technology that makes them possible today and tomorrow, and current political and military security challenges to include national and internal state security, global terrorism, global insurgency, and cyber warfare. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3562 Civilian Protection Practicum (4 Credits)**

The harm to civilians in contexts of armed conflicts presents an ongoing challenge for humanitarian and defense practitioners. These challenges are only expected to increase as the second- and third-order effects of the Coronavirus reverberate through the international system and spark new armed conflicts. While there are no prerequisites for this course, it is designed as a follow-on to the introductory course on "Civilian Protection in Armed Conflict." The course will enable students to put their insights on the protection of civilians into practice. Students will undertake collaborative research projects with a variety of U.S. and international humanitarian and defense organizations. Faculty and practitioner mentorship will help students learn how to advocate for ethical and evidenced-based protection policymaking. At the end of the course, students will brief their final research products to the practitioner clients. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3590 Politics in Africa: A Theoretical Approach with a Comparative Perspective (4 Credits)**

This course introduces students to basic concepts and arguments in the study of contemporary African politics. The focus is on the politics in Africa post-independence. The course emphasizes theory in a comparative perspective as a way to understand politics in Africa. The basic question is whether politics differ so much in Africa as to be in a category by itself or is it simply a variation on patterns, habits, and institutions found in other regions and countries in the world? The course goal is to provide students with important concepts so as to gain a better understanding of processes in Africa and the problems that in some fashion or other account for the continent's current marginality in the world and persistent underdevelopment. In addition, the course exposes students to the application and usefulness of general theories of development in comparative politics. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3591 Contemporary African Security (4 Credits)**

The end of apartheid in 1993 signaled a critical juncture for African liberation and security. The fall of South Africa's repressive regime marked a new era in African statehood and security apparatus. Apartheid posed the most threat to sovereignty especially for Southern Africa countries and undermined independence on the continent. With the new African National Congress government led by the Nelson Mandela, African countries were poised to focus on development and regional integration to cement cooperation, economic growth and improve the wellbeing of the African people. However, the new epoch coincided with novel challenges to statehood and security as the continent was quickly ravaged by civil wars. Today the continent continues to face numerous security challenges that are interwoven in contemporary global problems like climate change and the rise non-states actors. Using an interdisciplinary approach, this course assesses contemporary security challenges in Africa such as terrorism, insurgency and piracy by examining the causes and institutional frameworks put in place to address them. Prerequisites: INTS 1500 & INTS 1700.

**INTS 3600 The Global Financial System (4 Credits)**

We investigate the operation and evolution of today's international monetary system; the course will investigate both the politics and economics of international monetary negotiations, and will examine several key public policy debates that concern governments and investors around the world. The course will be an introduction to these timely and important issues, and will be organized around lecture, class debates, and discussion. Prerequisites: ECON 1020 and INTS 1500.

**INTS 3621 European Democracy in Crisis (4 Credits)**

This course is a comparative study of democratic governments in Western Europe, how these systems are structured and function, and more particularly the new challenges and problems that are emerging in the region: Euroscepticism, populism, support for right-wing parties, and political polarization. Democracy is the institutionalization of conflict, but democratic regimes vary in regard to the ways that they structure the arenas within which conflict is expressed. We will explore some of those institutional distinctions that vary across Western Europe such as Presidential vs. parliamentary systems, fragmented multi-party systems vs. majoritarian two-party systems, as well as the nature of political parties and the dynamics of party systems. The study of Western European democratic polities however requires some retrospective historical analysis of the nature of the conflicts emerging since the creation of the Modern State and the establishment of democracy. Because many of the present conflicts and problems in today's democratic regimes are legacies with roots in conflicts from the emergence of contemporary states, we will also spend some time in analyzing some of these historical conflicts.

**INTS 3625 Introduction to Contemporary Latin American Politics (4 Credits)**

This course provides an introduction to the study of Latin American politics. It is designed to provide students the opportunity to better understand how Latin American societies and political systems are organized and the major issues facing these governments and their citizens. In particular, this course will explore the establishment of democracy and the prospects for the consolidation of democratic regimes in the countries of the region. Throughout the twentieth century, economic, social and international factors contributed to political instability in the region and the establishment of non-democratic forms of rule. Although a wave of democratic transitions in the 1980s and 1990s transformed most Latin American countries into electoral democracies, the extent to which countries can be said to have fully democratic regimes varies widely today. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3630 Global Environment (4 Credits)**

The linkages between social change, economic change and alterations to ecosystems have been apparent, if not overtly acknowledged, throughout history. It was not until 1987, however, with the publication of *Our Common Future*, that such linkages were couched in terms of development and explicitly placed on the international development agenda. The idea appears simple—environmental change, patterns of social change and economic development, social and political factors operate together and impact local, national, regional and global ecosystems. But impacts of the change in any one sector are seldom confined within national boundaries. How then does one address environmental issues across different regulatory, political, institutional and geographic scales? This course examines the connectivity between diverse elements of our planet's ecosystem, explores how a change in one element can have immediate and long-term impacts across local and global territory, and looks at strategies to create greater harmony across environmental, social, political and economic interests. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3665 Comparative State Building (4 Credits)**

Since the fall of the Berlin Wall, countries in East Central Europe have experienced some twenty-five years of fascinating political, economic, and social change as they have tried to rebuild themselves, undergone democratization, and transitioned to a free market. But the legacies of the region's dramatic and often tragic encounters with war and ideology in the 20th and 19th centuries are still shaping how East Central European societies respond to the new horizons following the collapse of the Soviet bloc. This course is designed as an overview and analysis of the processes of state-building in East Central Europe from the eve of imperial independence in the late 19th century to the present day. We will learn about the condition of the states and nations of East Central Europe before WWI and how they embarked on their nation-building projects after the demise of the foreign empires, the Ottoman, the Austro-Hungarian, and the Russian, that had ruled the region for 500 years. We will then discuss the onset of yet another foreign mode of control – communism – and we will learn how communist reality and Soviet hegemony was lived by the people of Poland, Hungary, Czechoslovakia, Serbia, East Germany, Romania, and Bulgaria for over forty years. After the initial wave of optimism after independence, the political chaos and economic backwardness of the interwar period 1918-1939; after the resistance, collaboration and murder of the Second World War; after the terror and senselessness of Stalinism; after the exhilaration and disappointment of the Hungarian Revolution in 1956, of the Prague Spring in 1968, and of Solidarity in Poland in 1981; after the gray monotony of decaying communism and the lonely voices of dissidents, we will come to the triumphant revolutions of 1989 and the challenges of the post-communist transition. For many of these states, the project of building a liberal democratic state and a functioning market economy over the last twenty years can be considered an impressive success. For others, however, the transition has been undermined by political mismanagement, economic backwardness, and ethnic nationalism. We will weigh the roles of domestic actors and of international institutions in bringing about East Central Europe's successes and failures over the last century. At the end we will discuss some of the key outcomes, positive and negative, of the accession to another ("foreign") empire - the European Union, which ten of these post-communist states joined in 2004-07. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3701 Topics in Int'l Studies (1-4 Credits)**

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3702 Topics in Int'l Studies (1-4 Credits)**

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3703 Topics in Int'l Studies (1-4 Credits)**

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3705 Topics in Int'l Studies (1-4 Credits)**

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3708 Topics in Int'l Studies (1-4 Credits)**

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3715 The Politics and Policy of Sustainable Energy (4 Credits)**

Energy is much in the news, with highly visible controversies over everything from hydraulic fracturing here in Colorado to oil pipelines to mountaintop removal for coal mining to raptor mortality at wind farms. These controversies range from local city ordinances to global treaties and involve everyone from environmental groups to governments to businesses of all sizes. It can be difficult to make sense of this cacophony of events. Where is the global energy system now, where is it going, and what will impede progress toward an energy system that will both serve human needs and protect the environment? Understanding these questions requires background knowledge that puts them into context and creates the opportunity to understand them more deeply. This course will introduce you to the politics and policies involved in sustainable energy, from the local to the global level. In order to make sense of those policies and politics, it will also introduce students to the basics of the energy system, including both conventional and alternative sources.

**INTS 3761 Diplomacy in the 21st Century (4 Credits)**

The course examines questions and dilemmas in the practice of contemporary statecraft and diplomacy. It will focus particularly on the changing nature of the tools available to states, the context in which they are used, and the players (including non-state actors) that are involved. The instructor will draw from recent experience to round out the topics discussed in class, and focus on the challenges of modern statecraft and diplomacy.

Prerequisites: INTS 1500 and INTS 1700.

**INTS 3785 Professional Ethics in Public Affairs (4 Credits)**

Over the course of their careers, graduates of schools of international affairs occupy professional positions in which they enjoy substantial authority and influence over the lives of others, and in which they encounter difficult ethical challenges that stem in part from the roles they perform and the expertise they acquire. And yet, schools of international affairs typically do not offer courses on professional ethics in general, or on the professional ethical challenges that await those who will enter the world of international affairs in particular. This course is intended to begin to fill this gap in professional training.

**INTS 3850 Foreign Aid, Debt and Development (4 Credits)**

This course analyzes third world debt relief including the role of major powers, the World Bank and IMF in creating debt and the relationship between debt relief and poverty alleviation. The effects of debt relief upon globalization issues are also covered. Prerequisites: INTS 1500 and INTS 1700.

**INTS 3975 Data Science in International Relations (4 Credits)**

Students will use research methods and data science tools to describe, analyze, and evaluate contemporary topics in international security. We will use the R statistical programming language to generate descriptive statistics, visualizations, and basic inferential statistics while using data on international conflict, human security, trade, development, and many other topics relevant to INTS. The course will culminate in a group presentation and report on a specific topic related to international studies. These tools will help equip students for additional coursework, research, and careers that use data science and quantitative analysis. There are no prerequisite in terms of statistics or computer science, but students should be willing to engage with new and challenging content.

**INTS 3980 Internships in International Studies (0-4 Credits)**

Experience is an important asset when applying for any job. As you will find after graduation, the job market is incredibly competitive, and becoming more so. Gaining real world experience during college will make you a much stronger candidate when seeking that first position after graduation. Through INTS 3980, you have the opportunity to earn between 0 and 5 quarter credit hours for internships of 100 hours or more. The internship portfolio facilitates a student's academic, professional, and personal growth by providing documentation and representation of the internship experience. Elements of the portfolio will help bridge academic experience with career possibilities, and provides an opportunity for self-reflection through your experience. Analysis of your internship will help identify areas of success and points where you could improve overall. The objective of all aspects is to enable you to be more competitive in a global job market. Internships require departmental approval and must be undertaken during the quarter in which you register for credit. The BA program in INTS will not award credit retroactively for internships completed prior to the quarter in which students are registered. Prerequisites: Must be an INTS major and receive departmental permission.

**INTS 3988 Study Abroad Resident Credit (0-18 Credits)****INTS 3990 Thesis (4 Credits)**

The thesis project is an original contribution to the understanding of issues relevant to international studies and to at least one of the concentration areas in international studies. The thesis must feature original research; that is, it must critically investigate a theoretically informed hypothesis, using sources to support an evaluation of the research question. The thesis must show clearly the following elements: excellent critical thinking and writing quality, coherent presentation, and adherence to the general guidelines set forth by the faculty advisor. Prerequisites: Must be an INTS major and receive departmental permission.

**INTS 3991 Independent Study (1-4 Credits)**

In-depth study of a particular issue under the guidance of a professor. Prerequisite: prior agreement with department and permission from registrar.

## Internationalization (INTZ)

**INTZ 1234 Directed Independent Language Study: Yoruba (4 Credits)**

Directed Independent Language Study (DILS): Yoruba provides students the opportunity to study Yoruba language and culture. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students with cultural, academic and professional interests in Nigeria, Benin and/or the Yoruba language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1255 Directed Independent Language Study: Swahili (4 Credits)**

Directed Independent Language Study (DILS): Swahili provides students the opportunity to study Swahili (Kiswahili) language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in the African Great Lakes region and the Swahili Coast, as well as those with cultural, academic and professional interests in the Swahili language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1301 Portuguese: Beginning Level 1 (4 Credits)**

This course is an introduction to the Portuguese Language, emphasizing interpretive listening and reading, presentational speaking and writing, and interpersonal communication skills. The course consists of teaching and practical exercises pertaining to vocabulary, pronunciation, and sentence structure. Cultural topics pertaining to Portuguese and Brazilian society aim to facilitate students' transition into study abroad. This is an online course with lectures delivered synchronously via an online meeting software platform (Zoom) by a Portuguese Instructor at the Universidade Catolica Portuguesa. Attendance at remote class sessions is mandatory.

**INTZ 1810 Directed Independent Language Study: Arabic (4 Credits)**

Directed Independent Language Study (DILS): Arabic provides students the opportunity to study Arabic language and Arabic-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various Middle-Eastern countries, as well as those with cultural, academic and professional interests in the Arabic language and Middle East Studies. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA) or approval.

**INTZ 1891 Directed Independent Language Study: Hindi (4 Credits)**

Directed Independent Language Study (DILS): Hindi provides students the opportunity to study Hindi language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in India, as well as those with cultural, academic and professional interests in the Hindi language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1910 Directed Independent Language Study: Quechua (4 Credits)**

Directed Independent Language Study (DILS): Quechua provides students the opportunity to study Quechua language and Quechua-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in various South American countries, as well as those with cultural, academic and professional interests in the Quechua language, Andean Studies, Indigenous languages and cultures. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1946 Directed Independent Language Study: Swedish (4 Credits)**

Directed Independent Language Study (DILS): Swedish provides students the opportunity to study Swedish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Sweden, as well as those with cultural, academic and professional interests in the Swedish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1955 Directed Independent Language Study: Portuguese (4 Credits)**

Directed Independent Language Study (DILS): Portuguese provides students the opportunity to study Portuguese language and Portuguese-speaking cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Brazil or Portugal, as well as those with cultural, academic and professional interests in the Portuguese language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1982 Directed Independent Language Study: Korean (4 Credits)**

Directed Independent Language Study (DILS): Korean provides students the opportunity to study Korean language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in South Korea, as well as those with cultural, academic and professional interests in the Korean language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 1990 Directed Independent Language Study: Turkish (4 Credits)**

Directed Independent Language Study (DILS): Turkish provides students the opportunity to study Turkish language and cultures. The DILS program is appropriate for dedicated and disciplined students who can maintain a rigorous course of self-study that is supplemented with regular meetings with a Language Partner (LP). Students are provided with suggested curriculum and materials, develop their learning goals and plan to achieve those goals, reflect upon the language-learning process and are evaluated at mid-term and the end of quarter by an expert in the language from another institution. This course is recommended for students planning to or returning from study abroad in Turkey, as well as those with cultural, academic and professional interests in the Turkish language. First year undergraduate students should not register for this course. Prerequisite: Application through the Center for World Languages & Cultures and completion of the Common Curriculum foreign language requirement (FOLA).

**INTZ 2501 Exploring Global Citizenship (1-2 Credits)**

Examining questions of identity, globalization, cross-cultural communication and ethical engagement, this course is required of all students at DU intending to study abroad. The intent of the class is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken within the year prior to study abroad and is followed while abroad by the second course in the sequence, INTZ 2502, also required for students on unaffiliated programs. This is a 2 credit course. To take the course for 1 credit, students must provide documentation forwarded by academic and major advisor(s) directly to the course director that they have not been able to nor would be able to take the course for 2 credits prior to study abroad based on required (non-elective) course selection for the entire year prior. The department will then review the materials and determine whether the petition process is warranted.

**INTZ 2502 Global Citizenship in Practice: Maximizing Study Abroad (1 Credit)**

Examining questions of identity, globalization, and cross-cultural communication, this is a pilot course that may eventually be required of all students at DU to be taken while studying abroad. The intent of the course is to help give students the tools and knowledge needed to be able to benefit from their experience abroad. The course is normally taken during a student's study abroad experience and is preceded by INTZ 2501.

**INTZ 2503 Learning to Return: Moving Toward an Impact for Public Good (2 Credits)**

This course focuses on life back from an experiential learning opportunity whether abroad or within the U.S. and seeks to generate understanding(s) about integration back into DU and various related cultural contexts. The aim of the course is to actively continue application and engagement beyond this formal course. With an intentional focus on reflection, students will be expected to read, write, reflect, and share their abroad experiences to help foster meaningful connections across their cultural learning experiences. A central activity will focus on analyzing and reflecting on an artifact students "collected" while abroad – a blog they created, a series of images they took, a video they made, etc. Students will be expected to read, write, reflect, and share their experiences abroad as a way to better understand who they currently are from having those experiences. This will be leveraged to connect their experiences with future goals or purposes around intercultural and global learning.

**INTZ 2700 Topics in Cultures and Languages Across the Curriculum (1-2 Credits)**

Cultures and Languages Across the Curriculum (CLAC) provides students the opportunity to continue advanced study of a language and incorporate language and cultural knowledge within a course in their major field of study. The CLAC program is appropriate for dedicated and disciplined students who possess an intermediate to advanced level of proficiency in their target language. Meeting once a week with an instructor/language partner while enrolled in the major course, students will discuss the content in the target language extending their intercultural and international perspectives on the course content, as well as maintaining and enriching their abilities in that language. Students will research and utilize sources in the target language and will be responsible for discussion participation, weekly assignments, and a final project.

**INTZ 3700 Topics in Culture and Language Across the Curriculum (1-2 Credits)**

Cultures and Languages Across the Curriculum (CLAC) provides students an opportunity to continue advanced study of a language and incorporate language and cultural knowledge within a course in their major field of study. The CLAC program is appropriate for dedicated and disciplined students who possess an intermediate to advanced level of proficiency in their target language. Meeting once a week with an instructor/language partner while enrolled in the major "parent" course, students discuss course content in the target language. Students extend their intercultural and international perspectives on the course content, as well as maintain and enrich their abilities in that language. Students will research and utilize sources in the target language and will be responsible for discussion participation, weekly assignments, and a final project.

**INTZ 3980 Virtual International Internship (0-10 Credits)**

This course facilitates your learning and professional development while you participate in a Virtual International Internship. It provides a framework for you to reflect on and analyze the specific skills gained throughout your virtual internship. This course also supports your self-awareness and personal growth in a cross-cultural context.

**INTZ 3991 Independent Study (1-4 Credits)**

## Italian (ITAL)

**ITAL 1001 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Italian 1001 is designed for students with no prior knowledge of Italian. Students with experience with the Italian language should complete the placement test to determine the appropriate course level for their background.

**ITAL 1002 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1001 or equivalent.

**ITAL 1003 Elementary Italian (4 Credits)**

Build practical communication skills to interact with speakers of Italian and participate in multilingual communities, with a focus on interpersonal and interpretive communication. Explore and reflect on Italian cultural practices and perspectives to develop cultural insight and the foundations of intercultural awareness and understanding. Learners that complete the beginning Italian sequence will have the linguistic skills and foundational cultural knowledge to navigate straightforward situations and manage familiar tasks in an Italian context, operating at the novice high to intermediate low proficiency level. Prerequisite: ITAL 1002 or equivalent.

**ITAL 1988 Study Abroad Resident Credit (0-18 Credits)****ITAL 2001 Intermediate Italian (4 Credits)**

Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 1003 or equivalent.

**ITAL 2002 Intermediate Italian (4 Credits)**

Intermediate Italian is a 2-part intermediate communicative sequence in Italian. It is designed for students who have completed Italian 1003 or the equivalent. The aim of the course is further to develop listening, reading, writing and speaking skills through communicative in-class activities and at-home assignments. The sequence presents new grammatical and vocabulary functions as well as review patterns already presented in the elementary sequence. Intermediate Italian also includes the study of contemporary cultural and literary readings that will serve as the basis both for at-home work and in-class discussion. Prerequisite: ITAL 2001 or equivalent.

**ITAL 2005 Reading and Conversation (4 Credits)**

In Reading and Conversation, students learn the ease of expression in Italian through the intermediate-level reading of cultural and literary materials and through the study of vocabulary. Readings and contemporary issues are discussed in class. Prerequisite: ITAL 2002 or equivalent.

**ITAL 2201 Italy: Modern History, Culture (4 Credits)**

This course provides a historical and cultural approach to modern Italy. Students refine their critical thinking skills as well as substantially develop their argumentative skills. This course centers on selected authors, literary movements, genres and historical and contemporary cultural phenomena in Italy. Topics may include film, TV, poetry, short stories, fascism and the resistance movement, Italian women, etc. Each week a new decade is discussed in a historical context and supplemented with cultural artifacts that are either centered on the decade in question or produced during the period. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2355 Images of Rome in Literature & Film (4 Credits)**

The city of Rome has been a major protagonist on the stage of history for several millennia. In 2,500 years of existence, Rome has seen more of the world's history unfold at its doorsteps than any other capital in the western world. It has been the site of the building and the expansion of a vast and powerful Empire, the center of a major world religion, and a magnet for the arts throughout the centuries. This course focuses on late 19th- and 20th-Century Rome from the point of view of selected works of Italian literature (poetry, short stories, and novels or selections from novels) and films in which the city of Rome plays a prominent role. Students demonstrate the ability to identify, interpret, and analyze the connections between the texts and films. This course is taught in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2500 Introduction to Italian Literature (4 Credits)**

Introduction and overview of Italian literature from 13th century to present; works representing major authors, periods, themes and forms. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 2750 Italian Jewish Literature and Cinema (4 Credits)**

This course is cross-listed with JUST 2750 and offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**ITAL 2988 Study Abroad Resident Credit (0-18 Credits)****ITAL 3010 Advanced Conversation and Composition (4 Credits)**

This course continues to refine students' oral and written skills while enhancing their cultural awareness. Concepts, such as contemporary Italian politics, economy, and gastronomy, are introduced through authentic texts. Specific emphasis is placed on written skills—providing students with the necessary writing skills for continued study in Italian. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3701 Topics in Italian Studies (4 Credits)**

Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3702 Topics in Italian Studies (1-4 Credits)**

Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3703 Topics in Italian Studies (1-4 Credits)**

Selected authors, literary movements, genres, and historical and contemporary cultural phenomena in Italy. Recent topics have included Nord-Sud: Viaggi in Italia, Italian City in Literature and Film, Italian Contemporary Novel, Identità a tavola, Teatro del '700, Il fantastico, Love and War in the Renaissance, Performance of Italian Theatre, Boccaccio e la novella, Poeti del romanticismo, Dante. May be repeated for credit. Prerequisite: ITAL 2005, equivalent, or instructor's permission.

**ITAL 3988 Study Abroad Resident Credit (0-18 Credits)****ITAL 3991 Independent Study (1-5 Credits)****ITAL 3995 Independent Research (1-10 Credits)****ITAL 3998 Undergraduate Honors Thesis (1-5 Credits)**

This course will guide students who are majoring in Italian in the selection of a topic for their honors thesis, research materials, and individual meetings with the professor(s) directing the thesis.

## Japanese (JAPN)

**JAPN 1001 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. First quarter of a three-quarter sequence. Japanese 1001 is designed for students with no prior knowledge of Japanese. Students who have experience with the Japanese language should complete the placement test to determine the appropriate course level for their background.

**JAPN 1002 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Second quarter of a three-quarter sequence. Prerequisite: JAPN 1001 or equivalent.

**JAPN 1003 Elementary Japanese (4 Credits)**

The Elementary Japanese sequence helps students develop communicative competence in basic spoken and written Japanese and explore Japanese cultural practices and perspectives to enrich cultural competence and reflect on their own. Third quarter of a three-quarter sequence. Prerequisite: JAPN 1002 or equivalent.

**JAPN 1005 Japanese for the Real World (4 Credits)**

This fun and challenging intermediate-level, task-based language course develops Japanese language & cultural competency for students preparing to study abroad in Japan or travel to Japan independently. In this course students synthesize and build on their reading, writing, speaking, listening and cultural skills prior to departure in order to maximize their study/travel abroad experience. The task-based curriculum will help students improve their communicative skills in the Japanese language through authentic materials and concrete, task-based language learning. Students also deepen their knowledge about Japanese culture and have online and face-to-face discussions when possible with Japanese native speakers to enhance their cultural competence. Prerequisite: JAPN 1003 or instructor permission.

**JAPN 1216 Popular Culture of Japan (4 Credits)**

In this course we examine and analyze the emergence of particular forms of mass-produced culture, or culture for mass consumption, in Japan from the early modern period to the present. Using a variety of cultural materials enjoyed from the early modern period (1600-1868,) during which Japanese society underwent extensive urbanization, secularization, and cultural commodification, through to the present, the course focuses on overarching themes: media and information technology (woodblock printing, newspapers, and the internet); entertainment and gender (the all-male kabuki theatre and all-female Takarazuka revue); commodified romance; fiction (illustrated fiction, manga, and novels); anime and television fandom; healer-bots and cyborgs. No knowledge of Japanese required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 1416 Postwar Japan: Changing Perspectives in Literature and Culture (4 Credits)**

This course explores a range of Japanese cultural perspectives from the end of the Second World War to the present. The main focus is on the analysis and interpretation of Japanese literary texts, but during the course students also examine film, visual art, and other cultural products within a historical framework, to lead to a deeper understanding of the influences and events that have shaped both contemporary Japan and the wider world. Prerequisites: JAPN 1001.

**JAPN 1988 Study Abroad Resident Credit (0-18 Credits)****JAPN 2001 Intermediate Japanese (4 Credits)**

Continuing study of complex grammatical structures, vocabulary expansion and reading skills. First quarter of three quarter sequence. Prerequisite: JAPN 1003 or equivalent.

**JAPN 2002 Intermediate Japanese (4 Credits)**

Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Second quarter of three quarter sequence. Prerequisite: JAPN 2001 or equivalent.

**JAPN 2003 Intermediate Japanese (4 Credits)**

Continuing study of complex grammatical structures, vocabulary expansion and reading skills. Third quarter of three quarter sequence. Prerequisite: JAPN 2002 or equivalent.

**JAPN 2101 Conversation and Composition I (4 Credits)**

Intensive practice in oral skills, grammar review, reading and writing. Prerequisite: JAPN 2003 and JAPN 1416.

**JAPN 2102 Conversation & Composition II (4 Credits)**

Intermediate training in speaking, reading and writing. Prerequisite: JAPN 2101 or equivalent and JAPN 1416.

**JAPN 2200 Multicultural Japan (4 Credits)**

Multiculturalism in Japan has evolved significantly over the years, reflecting a blend of historical influences and contemporary shifts. Historically, Japan has been considered relatively homogeneous, with its diversity largely shaped by interactions with neighboring countries such as China and Korea. However, in the modern era, Japan has increasingly embraced multiculturalism, evidenced by its growing acceptance of foreign residents and international influences. The Japanese government and society have made strides in recognizing racial and ethnic diversity, though challenges remain, particularly for marginalized groups such as the Ainu, Ryukyuan, and other minorities. Gender diversity has seen notable progress, with movements advocating for gender equality and the rights of women gaining momentum, despite persistent traditional norms. Additionally, LGBTQ+ rights have been gradually advancing, with increasing visibility and legal recognition for sexual orientation and gender identity issues. Geographic diversity is also notable, with distinct cultural identities preserved in regions like Hokkaido and Okinawa, enriching the nation's multicultural fabric. The ongoing dialogue around race, gender, and sexual orientation continues to shape a more inclusive and varied Japanese society. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2400 Hey, Girl, Hey: Japanese Girlhood from the Moga to Shōjo (4 Credits)**

This course explores the figure of Japanese girlhood from the Moga "modern girl" of the early twentieth century to the contemporary figure of the shōjo. Japanese cultural production has had a significant impact on East Asian girl's media in the pre-war period and again in the post-war to contemporary period. The course will explore the "modern girl" in all her iterations, from European modernism to East Asia, Africa, and the Americas, especially in the contexts of colonialism and nationalism. The course also considers the roles of girls and women in the formation of the modern state(s) and contemporary societies across East Asia, and juxtapose those roles to how girls and women are depicted in fiction and media. Students will trace the transition from the comparative modernisms legible in the figure of the moga to the transnationally circulated figure of the shōjo.

**JAPN 2450 Superflat: Postmodern Japanese Literature and Media (4 Credits)**

When Yoshimoto Banana won the prestigious Kaien Newcomer Writers prize in 1989, the head of the judging panel said of her novel *Kitchen*: "[Kitchen's] naïve rejection of the very question of whether it does or does not conform to conventional concepts [of literature] is precisely what makes it strike me as a new sort of literature." As confounding as *Kitchen* was for literati, it struck a chord not just within Japan but also without, ushering Japan's postmodern literary movement. Yoshimoto, Murakami Haruki, Kanehara Hitomi, Sayaka Murata, and many more globally famous Japanese writers often write in this vein, a vein in which the effusive and maudlin introspection of previous literary generations is set aside in favor of an amorphous, consumerist literary style that might best be described by Murakami Takashi's contemporary "superflat" artwork. In this class, through literature, visual arts, and film media, students will consider conceptions of "postmodern" in the context of Japan. What is this "new sort of literature?" Why did it emerge in the 80s and why has it persisted? Why do these works seem to circulate so well on the global market, even as critics in Japan have expressed dismay at their "naïve rejection" of what came before? By considering aspects of aesthetics, affect, consumerism, we will explore this "postmodern" "superflat" media landscape and discuss how it impacts our experiences in and of the world, especially in the realm of popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2500 Cultures of the Floating World (4 Credits)**

During the Edo period (1600-1868), the literature and visual culture of Japan flourished after centuries of devastating warfare. The floating world of kabuki theaters, woodblock print culture, and the pleasure quarters arrested the imagination of the populace and attracted the unwanted attention of governmental authorities. Over the course of the Edo period, the shogunal government expelled Christians from Japan, the city of Edo became the largest in the world, and woodblock print culture spread throughout the Japanese archipelago. Through reading various genres of literary and cultural production, students will explore how society shapes culture and culture shapes societies. Topics include: premodern literary representations of love and eros, the emergence of the "floating world print" (*ukiyo-e*), Christians as Others, representing landscapes and the past in *haikai* poetry and prose, early modern comic books, and vendetta stories. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JAPN 2700 Classical Japanese Women Writers: The Poets, Priestesses & Princesses in their Literary Golden Age (4 Credits)**

The course explores the extraordinary female-centered belles-lettres of classical Japanese literature, including a myth-history detailing the origins of Japan, the development of the rich poetic tradition, female diaries, *zuihitsu* and personal essays, the classic *Tale of Genji*, and literature of religious hermetic and travel diaries. The course will critically consider how women writers were able to flourish in this period and interpret their literary output through a consideration of the cultural and historical context for the texts. This course will also deploy principles of literary analysis and interpretation.

**JAPN 2988 Study Abroad Resident Credit (0-18 Credits)****JAPN 3701 Topics in Japanese Culture (4 Credits)**

Selected topics in Japanese culture. Texts and films in both Japanese and English, with a focus on modern and contemporary Japanese culture. May be repeated for credit. Prerequisite: JAPN 3100 or equivalent.

**JAPN 3800 Robots and Posthumanism in Japanese Visual Culture (4 Credits)**

Automata and robots lumber, glide, rampage and ambulate their way through Japanese visual culture. Robots, cyborgs and other posthuman bodies and subjectivities have offered visions of new future worlds and have critiqued past and present social conditions. In this course, students will investigate representations of robots and posthumans in Japanese visual culture of the 20th and 21st centuries. Completion of JAPN 2003 or equivalent required.

**JAPN 3810 Sexuality and Gender in Japanese Culture (4 Credits)**

Sexuality and Gender in Japanese Culture is designed for students who have completed JAPN 2001-2003 or the equivalent. In this class, we will focus on developing reading, discussion, speaking, and critical thinking skills centered around representations of gender and sexuality in Japanese culture. Students will read texts by poets, critics, manga artists, and bloggers. In doing so, students will not only expand their critical vocabulary in Japanese, but also critically contend with representations of gender and sexuality in the Japanese context. Prerequisite: JAPN 2003 or equivalent.

**JAPN 3820 Frogs in a Pond: Japanese Translation Theory and Practice (4 Credits)**

This course takes a multi-pronged approach to literature and translation, considering aspects of translation theory, methodology, and practice; literature in translation; and the function of translation in global dynamics of canon, colonization, power, and literary stylistics. With a language like Japanese, which shares no linguistic roots with European languages, questions of translation are magnified and problematized by linguistic difference, histories of Orientalism and colonization, and fundamentally different literary aesthetics, especially in literatures of premodern Japan and early modern Europe. Questions this course considers include: with what modes of translation practice might we approach Japanese literature? How has the translation of European literature into Japanese impacted Japanese literary aesthetics and vice versa? How might we more equitably represent Japanese literature to a global Anglo audience? By what processes does the business of translation occur and how do those processes impact the actual production of literary canon and study? This class requires Japanese language ability of intermediate and higher. Prerequisites: JAPN 1416 and JAPN 2003 or equivalent required.

**JAPN 3988 Study Abroad Resident Credit (0-18 Credits)****JAPN 3991 Independent Study (1-5 Credits)****JAPN 3995 Independent Research (1-10 Credits)**

## Judaic Studies (JUST)

**JUST 1600 Jews in the Islamic World, 632 C.E. - 1948 C.E. (4 Credits)**

This course deals with Jewish history in the Islamic world from the death of Muhammad to the establishment of the state of Israel. Students are exposed to the political, social, and economic histories of various Jewish communities, many of which no longer exist, in numerous Islamic empires and/or political units. While studying these communities we also compare the treatment of Jews under Islamic rule to the treatment of Jews under Christian rule and the treatment of Christians under Islamic rule. Cross listed with HIST 1600. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 1610 The History of the Crusades: 1095-1300 (4 Credits)**

This course traces the origins and development of the Crusading movement as well as its impact on Christian, Muslim, and Jewish society in Europe and the Middle East from the 11th through the 14th centuries C.E. This course also examines ideas of Christian/Muslim/Jewish difference in this period. We pay special attention to primary source material. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 1610.

**JUST 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that "Jews earn like Episcopalians, and vote like Puerto Ricans." This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with RLGS 2012.

**JUST 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and RLGS 2014.

**JUST 2025 Coexistence (4 Credits)**

Building skills for ethical, emotionally-intelligent, and equity-minded encounter, this course is about facing neighbors responsively, responsibly, and non-violently—even when our values clash, and even as we work to defeat each other in the voting booth. Exploring new civic modes of “dialogue across difference” and serving as an antidote to polarization and rising tides of hate, the course invites students to consider new ways of holding onto their own views, values, and identities without erasing others—but also without necessarily embracing or being embraced by them. And it does so while helping them understand and utilize “phenomenology,” a philosophical method for assessing “lived feels” in complex relation to human meaning-making in a range of personal, professional, and political contexts. Focused in particular on interhuman coexistence, the course attends to the three-fold human cord of “our structures, our neighbors, and our selves.” It invites students to navigate between structural equity, interpersonal ethics, and personal authenticity. And it equips students to consider the “feels,” “flavors,” and “temperatures” of different coexistence strategies: from the lukewarm framework of tolerance to the warm embrace of friendship to the complicated contours of responsibility-without-friendship in such thinkers as BIPOC thought-leader Martin Luther King, Jr, philosopher and Holocaust Survivor Emmanuel Levinas, and political theorist Karl Marx. Helping students consider what sorts of coexistence goals are most and least appropriate for different contexts and why, the course asks questions like: When it comes to opponents, should we be aiming to befriend them or is it sometimes OK to set the bar lower? Should we try to “find common ground” or is it sometimes OK to “agree to disagree”? Is bridge-building always the best goal, or do we sometimes need to learn to live alongside one another without violence but also without bridges? Drawing on an inclusive reading list of BIPOC, Jewish, Islamic, Christian, African, Indigenous, and Japanese traditions, the course delves into Ubuntu principles of coexistence alongside Aztec principles of selfhood, BIPOC principles of justice alongside spiritual and atheist existentialisms, Queer Chicana feminism alongside the practice of Kintsugi, spiritual calls to love alongside political calls to respect, multicultural calls to recognition alongside social justice critiques of such calls, philosophical traditions of friendship alongside critiques of civility, and ancient wisdom traditions hand-in-hand with popular contemporary insights from Brené Brown’s work on vulnerability and Harvard’s near-century-long study of happiness. The course also explores the dangers of Islamophobia and Antisemitism; includes a visit to the campus’ Holocaust Memorial Social Action Site inspired by “radical ethics”; considers new modes of activism; and invites participants into a “Belonging and Expression” framework for navigating possibilities and tensions in important joint calls to social justice and freedom of expression. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is crosslisted with PHIL and JUST.

**JUST 2050 Jewish Philosophy (4 Credits)**

This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2050.

**JUST 2070 American Jewish Experience (4 Credits)**

In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry’s religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life. Cross-listed with ANTH 2070 and RLGS 2070.

**JUST 2071 American Jewish Experience (4 Credits)**

This course examines the history of the American Jewish immigrant experience from colonial times to the present as a means of trying to understand how newcomers navigate the processes of adaptation, acculturation, and integration into American life. We will pay careful attention to issues of race, gender, and class, and we will examine the impact of xenophobia and immigration laws on how Jewish immigrants were welcomed and treated.

**JUST 2074 The Holocaust: Europe & Colonial Contexts (4 Credits)**

This course presents the history of the Holocaust as perpetrated by Nazi allies Romania, Hungary (occupying Romania’s Transylvania), and Vichy France with its corresponding African colonies. With the United States Holocaust Memorial Museum’s Encyclopedia of Camps and Ghettos Vol. 3 serving as the foundation, students will be required to read select entries and consider the primary sources that contributed to them, including memoirs and the rich oral history of the Shoah Archive. The most recent scholarship by experts in these fields of Holocaust history as well as relevant films will be studied. This course asks us to comprehend what the full extent of this genocide was during WWII, and challenges us to answer how it fits into the conventional teaching of the Holocaust.

**JUST 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and RLGS 2104.

**JUST 2202 New Testament (4 Credits)**

This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church’s slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion’s encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2202.

**JUST 2260 Jewish Food: From the Bible to Bagels (4 Credits)**

"We are what we eat," the saying goes. But is that true? How do choices and practices connected to eating define us and our communities? Our study of Jewish food traditions from the Bible to the present will engage this and other important issues related to religion, consumption, and identity. The study of Jewish food practices is a study of dualities: kosher and trayf (non-kosher), meat and milk, modernity and tradition, insiders and outsiders, men and women, authentic and artificial, ethical and unethical, and more. Beginning with biblical laws about permitted and forbidden foods and ending with a study of the emergence of the modern kosher food industry in the United States, our course will examine how Jewish food and foodways have evolved over thousands of years in response to social, political, cultural, and economic change. We will explore the links between Jewish food practices and local cultures in order to understand how each one shapes the other, and to become familiar with the diversity of Jewish foodways across the Diaspora and within Israel and the Middle East. We will also explore the politics of authority and authenticity with regards to Jewish food — what makes a food "Jewish" or kosher, and who decides? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2300 The Arab-Israeli Conflict, 1881-2001 (4 Credits)**

This course examines the origins and developments of the Arab-Israeli conflict from the arrival of the first Jewish settlers in the early 1880s until the failure of the Oslo Accords in 2000. A central theme of this course will be nationalist myth-making and its impact on collective and individual social and political identities. This course will also pay special attention to how political developments in Europe, the United States, the Jewish world, and the broader Middle Eastern world have impacted the Arab-Israeli conflict. No prior knowledge of Middle Eastern or Arab-Israeli history is expected.

**JUST 2320 US Foreign Policy in the Middle East (4 Credits)**

This course aims to introduce students to both Middle Eastern history and American Foreign Policy by exploring the politics and culture of U.S. involvement in the Middle East in the post-WWII period. In doing so this course pays special attention to the impact of the Cold War in the Middle East, American policy towards the Arab-Israeli conflict, the role of oil in American foreign policy, American responses to the rise of Islamist movements, the impact of media and culture on the formulation of America's Middle Eastern policies, and U.S. relations with dictatorial governments in the Middle East. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with HIST 2320.

**JUST 2360 Israeli Society Through Film: Narratives of the Holocaust, War and Terror in Israeli Life (4 Credits)**

This course analyzes fundamental aspects of Israeli-Jewish collective identity through a consideration of the trauma of the Holocaust, and explores the representation of these issues in Israeli film from the 1960s to today. The course presents and analyzes narratives of human experience in traumatic times and their after-effects via cinematic perceptions of Holocaust survivors and their offspring, the relationship between the Israeli native Sabra and the Holocaust survivor, the impact of war on soldiers and their families, and the Israeli experience of terror. Screenings of Israeli film is a central part of the course. All films are in Hebrew with English subtitles. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**JUST 2370 Multicultural Israel: Food, Film and Beyond (4 Credits)**

In this course participants will examine Israeli culture and identity using a broad array of materials and topics, including popular music, film, sports, and food. Topics include Israel's society, ethnic relations, and the Arab minorities in the Jewish state. Students also discuss whether there is a unique Israeli culture and the struggle for Israel's identity. Emphasis is on interdisciplinary approaches to exploring how cultural processes and artifacts are produced, shaped, distributed, consumed, and responded to in diverse ways. Through discussion, research, writing and various media resources, class members investigate these varied dimensions of culture; learn to understand them in their broader social, aesthetic, ethical, and political contexts. This course counts toward the common curriculum requirement of Analytical Inquiry: Society & Culture.

**JUST 2380 Multicultural Israel through Popular Music (4 Credits)**

The music of Israel is a combination of Jewish and non-Jewish music traditions that have come together over the course of a century to create a distinctive musical culture. This course presents a brief cultural history of Israel through popular music. To examine the central and lively role that songs have played in the shaping of Israeli identity, this class examines a range of diverse lyrics, including selections from folk music, pop and rock music, Levant influenced music, and more. Topics covered include Shirei Eretz Israel (the songs of the land of Israel), military ensembles, song festivals and competitions, the rise of minorities, outstanding performers and songwriters, international influences, and media's impact on audience preferences. This course counts toward the common curriculum requirement of Analytical Inquiry: Society & Culture.

**JUST 2390 Music in Jewish Spiritual Life (4 Credits)**

This course exposes students to the variety of music and musical practices encountered in contemporary Jewish worship spaces, broadly defined. In addition to standard academic modes of learning, the course has an extensive experiential component in which students sing, chant, and meditate together for long durations without inhibition. The "Jewish worship spaces" in question have diverse geographical origins, ranging from North America and Eastern Europe to communities with origins in North Africa and the Middle East, and students will learn of the musicians involved, the liturgy they sing, their historical lineages, approaches to pitch organization and meter, and relationship to past practices. Assessment is made through writing assignments (an essay on music and spirituality, an album review, and a listening journal), midterm and final exams, moderation of class discussions of reading and music, and participation in experiential components of the course. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2400 Israel Unfiltered: Identity, Humor, and Culture (4 Credits)**

In Israel Unfiltered, students will examine the rich and complex tapestry of Israeli culture and identity through interdisciplinary approaches. Topics in this course may include — but are not limited to — the concept of Israeli identity, humor, memes, innovations, startup culture, and the Israeli army, with attention to the diverse experiences of women, LGBTQ+ soldiers, Orthodox Jews, and the role of cellphones and social media in military life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2418 The Memory of Evil. Germany and the Holocaust since 1945 (4 Credits)**

The Memory of Evil examines the long and difficult path Germans faced in their (ongoing) efforts to atone for the crimes of the Holocaust, that is, to preserve the memory of evil associated with their national past. Anti-Semitic incidents in Germany receive considerably more international press than such incidents elsewhere. Yet, what generally gathers less attention is the way Germany reacts. Our class will investigate what the Jewish moral philosopher Susan Neiman considers the success story of Germany's decades-long process of "coming to terms with the past" – Vergangenheitsbewältigung or Vergangenheitsaufarbeitung – a process Neiman believes exemplary and worth replicating by other nations such as the US. We will start in the immediate aftermath of World War II, at a time when Germany lay in ruins, both physically and morally bankrupt. By means of written and visual sources, we will study examples of Germany's sweeping engagements with its violent past, increasing our awareness of the challenges and rewards that have accompanied this historical reckoning from an initial period of repression after the war to the unsparing cultural revolution of the 1960s and 70s, from the time around Germany's reunification in 1990 to the construction of the Memorial for the Murdered Jews of Europe that opened in Berlin after much debate in 2005, all the way to the current rise of right-leaning and antisemitic party Alternative for Germany (AfD) and the 'cancel culture' that has accompanied the most recent conflict between Israel and Gaza.

**JUST 2500 Migration and Diaspora Narratives (2 Credits)**

This course examines the movement and resettlement of people from one locality to another, especially across borders. Focusing on different regions of the world – Africa, the African and the Jewish Diasporas, Europe and America – we will study the nature and consequences of migration from historical, socioeconomic, and literary/artistic perspectives. Because the movement of people includes the relocation of memories, we will closely study migration and diaspora narratives, which provide insights into a contemporary phenomenon that references the earliest history of humanity.

**JUST 2700 Topics in Judaic Studies (1-5 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 2701 Topics in Judaic Studies (1-5 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 2702 Topics in Judaic Studies (1-5 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 2704 Topics in Judaic Studies (4 Credits)**

Topics vary, reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 2741 American Jewish Literature (4 Credits)**

This course surveys over 100 years of American Jewish immigrant narratives beginning with the great exodus of Eastern European and Russian Jewry at the end of the 19th century and ending with recent arrivals from Israel and the former U.S.S.R. Canonical works by central authors reveal the great successes of Jewish immigrants alongside their spiritual failures. A selection of memoir, novels, short stories, and poetry in English and in translation from Hebrew and Yiddish demonstrate the multilingual character of the Jewish experience in America. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2741.

**JUST 2742 Modern Hebrew Literature (4 Credits)**

This course offers a survey of some of the most significant works of modern Hebrew literature available in translation. Students consider how the development of Hebrew literature has contributed to the formation of contemporary Israeli identity, and how the conflicts that define the turbulent history of Israel are treated in works by canonical authors. The selection of diverse voices and literary materials exposes students to the social, political, and historical changes wrought by the rise of modern day Israel. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2742.

**JUST 2743 Jewish Humor: Origins and Meaning (4 Credits)**

Writers, scholars, and comedians all claim to locate an identifiable strain of "Jewish humor" running from the Bible through to today's literary humorists and provocative stand-up comics. This course takes humor seriously in an effort to reveal the development of "Jewish humor" in America from a comparative context. But is there such a thing as Jewish humor? And if so, what are its sources and characteristics? Does it exist across cultures and in different linguistic communities? Through lectures, discussion, exercises and papers, students gain a broad understanding of the history, psychology, and philosophy of humor as it relates to Jewish arts and letters in America. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is cross-listed with ENGL 2743.

**JUST 2745 Israeli Television and Cinema: Representing Cultural Diversity in Israeli Life (4 Credits)**

The course goals are three-fold: a) to facilitate students' communicative competence in Hebrew across the interpretive, interpersonal and presentational modes through constant immersion in Hebrew, b) to expand students' knowledge and understanding of Israeli society and culture while interacting solely in Hebrew, and c) to help students develop a lifelong interest in learning the Hebrew language and its culture. Screening of Israeli films is a central part of the course. All the films are in Hebrew. The course is not open to native speakers of Hebrew. Cross listed with HEBR 2745. Prerequisite: HEBR 2003 or equivalent.

**JUST 2750 Italian Jewish Literature and Cinema (4 Credits)**

This course is cross-listed with ITAL 2750. It offers an overview of Italian Jewish literature and cinema from the Middle Ages to the present. Students will read and discuss prose and poetry, essays and articles, as well as watch and discuss films that address issues such as religious and cultural identity, the right to difference, anti-Semitism and the Shoah. The course will also give students an overview of the formation and transformation of the Jewish community in Italian society. In addition to well-known Jewish Italian writers like Primo Levi and Giorgio Bassani, students will read pertinent works by non-Jewish writers like Rosetta Loy. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**JUST 2991 Independent Study (1-5 Credits)****JUST 3001 Judaism (4 Credits)**

A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with RLGS 3001.

**JUST 3023 Great Thinkers: Maimonides-Politics, Prophecy and Providence (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on: principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and RLGS 3023. Prerequisite: junior standing or instructor's permission.

**JUST 3102 Early Judaism (4 Credits)**

This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with RLGS 3102.

**JUST 3146 Great Thinkers: Levinas (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, *Ethics and Infinity* and *Otherwise Than Being or Beyond Essence*, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with PHIL 3146.

**JUST 3150 The Bible and the Dead Sea Scrolls (4 Credits)**

This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with RLGS 3150. Prerequisites: None. The Scrolls will be read in English translation, but those with Hebrew reading skills will have an opportunity to read/translate portions of the Scrolls in community.

**JUST 3151 Dead Sea Scrolls (4 Credits)**

The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with RLGS 3151.

**JUST 3215 Modern Jewish Philosophy (4 Credits)**

Covering a range of modern thinkers from the seventeenth to the late-twentieth century, topics include reason and revelation, human autonomy and responsibility, aesthetics, post-Holocaust theology, responses to Kant, responses to Heidegger, ethics, and the quest for authenticity. Cross listed with PHIL 3215. Prerequisite: junior standing or instructor permission.

**JUST 3405 Postmodern Visions of Israel (4 Credits)**

This course investigates how representations of Israel as a modernist utopia have been replaced in contemporary literature with images of Israel as a dystopia. The class discusses the historical context that gave rise to visions of an idealized Israel, and the role the Hebrew language played in consolidating and connecting narration to nation. Next the class considers how belles-lettres from recent decades have reimagined Israel as a series of multilingual "multiverses." A selection of fiction translated from Hebrew forms the core of class reading. Theoretical exploration of postmodernism help us conceptualize the poetics of postmodern literature. No knowledge of Israeli history or Jewish culture is necessary to succeed in this course. This course is cross-listed with ENGL 3405.

**JUST 3700 Topics in Judaic Studies (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 3703 Topics in Judaic Studies (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 3704 Topics in Judaic Studies (1-4 Credits)**

Topics vary reflecting the interdisciplinary nature of the department and studies of the faculty.

**JUST 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How has Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, RLGS 3740.

**JUST 3742 Jesus in Jewish Literature (4 Credits)**

This course surveys literary depictions of Jesus in Jewish literature. Readers are often surprised to learn that throughout the twentieth century and into the twenty-first century, major Jewish writers have incorporated the figure of Jesus of Nazareth into their work. This class explores the historical, aesthetic, and spiritual reasons for the many Jewish literary representations of Jesus and of his literary foil, Judas. A selection of materials including short stories, poems, novels, scholarly essays and polemics in English and in translation from Hebrew and Yiddish demonstrate the depth of Jewish literary culture's engagement with Jesus' life and teachings. Among the many writers we will read are: S.Y. Agnon, Sholem Asch, Uri Zvi Greenberg, Haim Hazaz, Emma Lazarus, Amos Oz, Philip Roth, and L. Shapiro. Ultimately, this class will consider how literary representations of Jesus can destabilize perceived distinctions between Jews and Christians. While helpful, no knowledge of Jewish languages, religious tradition, or cultural practice is necessary to succeed in this course. This course is cross-listed as ENGL 3742.

**JUST 3890 Religion and Diaspora (4 Credits)**

When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with RLGS 3890.

**JUST 3891 Justice: A Biblical Perspective (4 Credits)**

This course explores the ways in which the Bible has been applied to questions of social justice in contemporary society. In addition to studying major theological and philosophical theories of justice, students read a variety of biblical texts related to major issues of social and economic justice such as world hunger, the poor, revolution, just war theory and pacifism, environmentalism, and the role of government. This course includes a service-learning component. Cross listed with RLGS 3891.

**JUST 3991 Independent Study (1-5 Credits)**

Prerequisites: HEBR 1003 or JUST 1003 or equivalent and instructor's permission.

## Kinesiology and Sport Studies (KINE)

**KINE 1005 Resistance Training and Strength and Conditioning Methods (4 Credits)**

Resistance training is an overarching term for human physical activities performed against a force at a given velocity. Examples of resistance training include the use of free weights, dumbbells, flywheel and pneumatic machines, bodyweight, bands, chains, and more. Strength and conditioning methods is an overarching term for modes of physical activity commonly used in sport and fitness settings. In this foundational course, students will develop an introductory-to-intermediate scientific and practical understanding of resistance training and strength and conditioning methods.

**KINE 1015 Foundations of Olympic Weightlifting and Powerlifting (4 Credits)**

Powerlifting and weightlifting (Olympic lifts and their derivations) are two widely popular strength- and power-based sports and these movements offer numerous physiological, psychological, and social benefits. The primary movements, including the deadlift, bench press, squat, clean and jerk, and snatch are also nearly universally applied to sports performance training. From recreational to world champion athletes, understanding the rules, equipment, and training practices of powerlifting and weightlifting is essential to developing mastery as a lifter and instructor. Students in this course will learn by doing and acquiring foundational content knowledge in these lifts and the organization of the sports. Students will also learn about powerlifting and weightlifting national governing bodies and how the sport is administered.

**KINE 2000 Foundations of Kinesiology and Sport Studies (4 Credits)**

People often ask, "What is kinesiology?" This course prepares students to answer that very question. Students will explore the various subdisciplines that inform the field of kinesiology and sport studies such as sport history, sport sociology, exercise physiology, anatomy, biomechanics, motor behavior, and sport psychology. This course will also examine career opportunities and graduate school options in the field, and prepare students to navigate advanced courses and topics. At the end of this course, students will be able to: Articulate how historical moments have influenced the field of kinesiology and sport. Identify and prepare for a career path in kinesiology or sport studies. Describe and differentiate the subdisciplines of kinesiology. Apply concepts and theories from kinesiology to self, others, and society.

**KINE 2010 Motor Learning for Skill Acquisition (4 Credits)**

This course will provide students with an understanding of how individuals (e.g., athletes, performers, recreationists) learn, perform, and retain motor skills. The course will explore how individual psychology, dynamic environments, and varying group and cultural practices affect skill acquisition. Students will develop foundational skills to develop and implement instructional strategies (e.g., practice plans, activities, feedback, affordances) to facilitate skill learning and performance enhancement, skill modifications for injury prevention, and rehabilitation of injury. This course will cover a variety of theoretical and scientific concepts pertaining to skill acquisition and learning across a variety of settings. Prerequisite: KINE 2000.

**KINE 2020 Sociology of Kinesiology and Sport Performance (4 Credits)**

An applied approach to the sociology of kinesiology and sport performance integrates theory and practice, also called praxis, to help students become critical thinkers and problem solvers. Students will be exposed to traditional sociological frameworks such as functionalism, interpretivism, and critical theory; themes such as gender, race, class, and ableism; and topics such as identity, deviance, coaching, performance, health, exercise, and sport. The applied focus will prepare students to see sociologically in everyday kinesiology and sport contexts in order to enhance performance and other outcomes, inclusive of ethical considerations. Prerequisite: KINE 2000.

**KINE 2030 Administration of Sport, Fitness, and Wellness (4 Credits)**

Organization and administration of sport, fitness, and wellness prepares students to manage and lead in diverse contexts. Course topics introduce students to relevant theoretical and practical aspects of administration, such as managerial functions, human resource management, marketing, budgeting, risk management, and finance. The breadth of the course will set a foundation for students to expand and specialize their skills while pursuing specific career opportunities. Prerequisite: KINE 2000.

**KINE 2035 Anatomical Kinesiology (4 Credits)**

Anatomical kinesiology is the study of muscles, bones, and joints and how they function to produce human movement. This course covers major bodily structures of the human body, from head to toe. A foundational understanding of human anatomy is beneficial or needed for advanced study of many kinesiology topics and careers, such as biomechanics, strength and conditioning, sport science, athletic training, sport psychology, and allied health. By design, this course focuses on anatomical kinesiology to prepare students for application in a variety of kinesiology and sport contexts.

**KINE 2040 Athletic Nutrition (4 Credits)**

From the youth to high-performing athletes on to master's athletes and weekend warriors, nutrition effects recovery, performance, and a host of other processes. This course provides students with an understanding of the physiological, psychological, and cultural aspects of athletic and fitness nutrition. Students will learn how to prepare athletes and clients for practice, competition, transitions, and everyday life. Additional course topics include disordered eating, ergogenic aids and supplements, professional nutrition organizations and career development, and sport-specific nutrition strategies.

**KINE 2050 Sport Psychology (4 Credits)**

Sports psychology aims to improve athlete well-being and performance. In this class, students learn about the key concepts and theories from sport psychology such as motivation, anxiety, goal setting, imagery, and team cohesion. A key component of the course requires students to not only apply these concepts through cornhole tournaments throughout the semester, but to also interrogate taken-for-granted assumptions embedded in the field of sport psychology.

**KINE 2701 Special Topics in Kinesiology and Sport Studies (4 Credits)**

Kinesiology and sport studies topics of special interest to faculty and students as needed to complement and expand existing curriculum and test innovative subject matter or teaching and learning practices. May be taken more than once. Prerequisite may vary based on specific special topic.

**KINE 3000 Diversity, Equity, and Inclusion in Kinesiology & Sport (4 Credits)**

This course exposes students to diversity, equity, and inclusion in kinesiology and sport. Related terminologies and frameworks such as social justice, critical studies, and power, privilege, and oppression will also be explored and in relation to the often more palpable term DEI. Students will develop a shrewd understanding of how inequalities, identities, and forms of hate and discrimination were created and how they manifest in sport contexts (e.g., ownership, labor, leadership, science). Students will also develop practical skills to advance a praxis (theory and practice) of DEI that embraces continuous development and inclusive excellence.

**KINE 3005 Research in Kinesiology and Sport (4 Credits)**

This course focuses on the wide variety of research in kinesiology and sport to prepare students to become critical consumers of scholarship. Students will understand the ethics, values, and other assumptions underpinning kinesiology research. Issues to be explored in relation to research include diversity, equity, and inclusion, marginalized ways of knowing, and how in the name of science people have been harmed. Course topics will include framing a research problem, designing a research study, and doing research, including writing and dissemination. Students will appreciate a wide understanding of qualitative and quantitative, descriptive and explanatory, laboratory and naturalistic approaches to scholarship. Prerequisites: KINE 2000.

**KINE 3010 Ethics and Leadership in Kinesiology and Sport (4 Credits)**

This course examines moral issues, reasoning, and theories in kinesiology and sport. Students will develop a deep understanding of sport ethics and embody a profound sense of integrity as a leader and citizen. The course will approach ethics from the leader's role on topics such as equality, diversity, equity, and inclusion, science and research, violence, capitalism, government regulation. Kinesiology and sport-specific ethical issues will be covered, such as drugs and performance enhancing substances, technology and genetic testing, deviance, violence, and fair play.

**KINE 3015 Sport Science (4 Credits)**

Sport science is often defined as the scientific study and application of science for sport and performance enhancement. Sport scientists often possess a range of industry titles and roles, but share commonalities in engaging in scientific research, using scientific thinking to enhance outcomes and dispel myths, and instill best practices in the use of performance technology and evidence-informed training practices. Foundational areas of sport science tend to include: physiology, biochemistry, biomechanics, nutrition, skill acquisition, psychology, statistics, analytics, and technology management. Prominent course topics include theoretical and conceptual knowledge of sport training theory, athlete monitoring and assessment, managing data and analytics, and educating and disseminating information. Students will also consider ethical and interdisciplinary aspects of sport science, including psychology of optimal performance, surveillance technology, and informed consent. Prerequisites: KINE 1005 or KINE 1015 and KINE 2035 or BIOL 3241.

**KINE 3020 Biomechanics of Kinesiology and Sport (4 Credits)**

Biomechanics of kinesiology and sport entails the study of mechanics applied to the biological systems of the body, with a focus on athletic and human movement performance. Students learn foundational knowledge of biomechanical principles and laws to explain how the body functions to produce movement, which can be used to analyze and enhance movement and quality of life in a variety of settings (e.g., athletics, wellness, sports science, coaching). Prerequisite: KINE 2035 or BIOL 3241.

**KINE 3021 Biomechanics of Kinesiology and Sport Lab (1 Credit)**

Biomechanics of kinesiology and sport lab facilitates students applied skills in the kinematics and kinetics of human movement, with a focus on sport, wellness, and clinical settings. Students collect and analyze data generated from movement analysis technology and make recommendations for how to improve function and reduce dysfunction. A variety of human and athletic movements are explored, and students learn to improve movement performance and reduce injury. Prerequisite: KINE 2023 or BIOL 3241.

**KINE 3025 Prevention and Care of Athletic Injuries I (4 Credits)**

This course introduces students to the principles and practices of sports medicine, athletic training, and the sports performance team. In this first course in a two-course series, students learn about the professional development and responsibilities of healthcare providers and juxtapose this to sport, fitness, and wellness providers who often have different goals and environmental pressures. Course topics also include risk management, pathology of sports and movement injury, management skills, musculoskeletal conditions, and general medical conditions. Prerequisite: KINE 2035 or BIO 3241.

**KINE 3026 Prevention and Care of Athletic Injuries II (4 Credits)**

In this second course, in a two-course series, students learn about the professional development and responsibilities of healthcare providers and juxtapose this to sport, fitness, and wellness providers who often have different goals and environmental pressures. This course introduces students to the principles and practices of sports medicine, athletic training, and the sports performance team. Course topics also include risk management, pathology of sports and movement injury, management skills, musculoskeletal conditions, and general medical conditions. Prerequisite: KINE 2035 or BIOL 3241.

**KINE 3030 Strength and Conditioning Coaching (4 Credits)**

This course focuses on developing students' applied leadership, management, and instruction skills, and professional judgment in kinesiology and sport fields, with an emphasis on strength and conditioning and fitness contexts. Students learn to instruct a variety of strength and conditioning methods, such as speed, plyometrics, agility, resistance training, and strength athletics (e.g., Atlas Stones, Highland Games). Students also learn about the associated ethical, psychological, sociocultural, pedagogical, andragogical, and political aspects and issues with the practice of being a strength and conditioning and health and wellness practitioner. The course will also help students seeking certification with the National Strength and Conditioning Association and related organizations. Prerequisite: KINE 1005 or KINE 1015 and KINE 2035 or BIOL 3241.

**KINE 3031 Scientific Aspects of Strength and Conditioning (4 Credits)**

Scientific Aspects of S&C prepares students to understand the scientific research areas informing strength and conditioning practices. Students will learn about foundational scientific ways of understanding the human and athletic body, particularly the varying systems of the human body, endocrine responses, and anaerobic and aerobic adaptations to training. Additional, rudimentary consideration will be given to psychological, nutritional, and organizational aspects of strength and conditioning. The course will also help students seeking certification with the National Strength and Conditioning Association and related organizations. Prerequisite: KINE 1005 or KINE 1015 and KINE 2035 or BIOL 3241.

**KINE 3035 Physiology of Sport Performance (4 Credits)**

Sport physiology is the study of how sport participation, physical activity, training, and/or exercise alters the structure and function of systems of the body. This course examines the acute physiological responses and chronic adaptations of the muscular, endocrine, cardiovascular, metabolic, respiratory, and immunological systems of the body as they apply to sport performance. Environmental influences (e.g., altitude and heat), performance choices (e.g., nutrition), and selected developmental considerations (e.g., as related to identity and aging differences) are discussed as they intersect with physiological performance for sport participation and performance. A foundational understanding of sport physiology is needed for the advanced study of many kinesiology topics and careers, such as strength and conditioning, sport science, athletic training, sport psychology, and allied health fields. By design, this course focuses on sport physiology topics to prepare students for applying training principles, methods, programs, and practices to a variety of kinesiology and sport contexts and sport participants.

**KINE 3980 Internship in Kinesiology and Sport (0-8 Credits)**

The purpose of this course is to provide students in the kinesiology and sport studies major an experience for gaining knowledge, skills, and attitudes in related career fields through experiential learning and reflective practice. Through real-world experience, students will develop a more accurate and nuanced understanding of the realities of everyday practice in kinesiology and sport. These experiences are essential for students in the major to test out, integrate, negotiate, and transform their newly acquired theoretical and evidence-based academic subject knowledge within the realities of everyday practice. During internship, students will complete additional course assignments via distance technologies.

**KINE 3991 Independent Study (0-10 Credits)**

Independent research/study.

## Language, Literature and Culture (CLTR)

### CLTR 2100 Introduction to Literary and Cultural Studies (4 Credits)

This course is an introduction to the comparative study of literature and culture across the boundaries of language, genre, nation, artistic medium, historical period, and socio-political context. It focuses both on the methods of literary theory and on the practical applications of critical tools to literary and cultural analysis. Texts and topics reflect LL&C's curricular strengths and include critical theory, film, literature & the other arts, World Literature, European languages and literatures, and translation. Prerequisite is the completion of 1003 or higher in any language taught at DU. Readings in English with a reflective module conducted in the target language. This course provides a critical foundation that supports students' continued language-specific curricula in the Department of Languages, Literatures & Cultures. Students will work on developing reflective, interpretive and analytical competencies, in order to apply these competencies in future courses.

### CLTR 2200 Journeys in World Literature (4 Credits)

How does literature take readers on voyages around the world and how does it lead us on quests to self-discovery and self-cultivation? Structured around the theme of "journeys," this course explores the literature and culture of multiple geographic and linguistic regions. Students will become acquainted with important contexts and critical tools to understand a variety of journeys across cultures and time. We will examine journeys both literally and figuratively and may focus on a selection of the following: epic quests, travel literature, immigration narratives, as well as the Bildungsroman, auto-biography, self-writing, and others. Students will also be introduced to the field of digital humanities. This course provides hands-on training for utilizing Stanford University's web-based platform, Palladio (<https://hdlab.stanford.edu/palladio/>). Palladio is an innovative, free research tool used to visualize complex multi-dimensional data. Students will discover and gather data while researching journeys and acquire the skills necessary to create visualizations of this research, further preparing them for DH research in the 21st century. This course provides a critical foundation that supports students' continued language-specific curricula in the Department of Languages, Literatures & Cultures. Students will work on developing reflective, interpretive and analytical competencies, in order to apply these competencies in future courses. Prerequisite is the completion of 1003 or higher in any language taught at DU.

## Leadership (LDRS)

### LDRS 2000 Foundations of Leadership (4 Credits)

LDRS 2000 focuses on developing an understanding of the foundations of leadership through an overview of leadership theories and definitions, an exploration of the present and future contextual demands on leaders, and in-depth self-assessment which includes identification of strengths, weaknesses, social identity, and leadership practices. The course will also explore the role of leadership and followership in teams. LDRS 2000 is designed to broaden your understanding of what constitutes leadership while challenging you to understand yourself better and begin to apply civically engaged leadership in new ways. This course is designed to broaden your understanding of "who" and "what" constitutes leadership.

### LDRS 2017 Inclusive Leadership (1,2 Credit)

In this academic entree to the study of leadership, we explore the fundamental nature of leadership and how to develop as students of leadership in a diverse world. This course encourages students to discover their personal identities, values, preferences, risk-taking propensity and other characteristics as these relate to their leadership potential. Students integrate learning in a Personal Leadership Statement, declaring what they stand for as an inclusive leader. We explore the idea of "community" and our obligations to take on a leadership role in the community with whom we identify. Service as an act of leadership will be expected both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisite: membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

### LDRS 2018 Leadership: Theory to Innovation (1,2 Credit)

This course continues the process of learning about leadership as a process and the role of the leader and follower in that process. Particular attention will be paid to developing passions, self-interests and facilitation skills that allow leaders and followers to innovate and create change. Service as an act of leadership continues both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisites: LDRS 2017 and membership in the Pioneer Leadership Program (PLP), or permission of PLP faculty.

### LDRS 2019 Teaming for Social Change (1,2 Credit)

Teams are the primary vehicle by which many, if not most, complex tasks are accomplished in our society. As a result, there is an increasing demand for leaders who can build, lead and participate in effective teams. With this course, you are completing your first-year sequence as a student of leadership. It will help lay the theoretical and conceptual foundations you need to prepare you to (a) reflect on teams of which you have been a part; (b) develop strategies for making your teams more effective, whether you are a leader or a team member; and (c) help you develop skills for your sophomore service project. Prerequisites: LDRS 2018 and membership in the Pioneer Leadership Program, or permission of PLP faculty.

### LDRS 2021 Leadership and Social Movements (1-2 Credits)

This course continues the process of learning about leadership as a process and the role of the leader and follower in that process. Particular attention will be paid to developing passions, self-interests and facilitation skills that allow leaders and followers to innovate and create change. Service as an act of leadership continues both as a course requirement and overall program requirement in the Pioneer Leadership Program. Prerequisites: LDRS 2017, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), membership in the Colorado Women's College or permission of PLP faculty.

**LDRS 2040 Leading Community Change (4 Credits)**

This course builds on the themes we began in the first-year PLP sequence. Specifically, we continue to expand your understanding of community, citizenship, and spheres of influence. Last year, you explored theories of leadership as well as your own assets and passions you carry into leadership. During the second-year course series we learn how to think strategically and act purposefully to make change happen in a larger context—the community. This course asks you to look at and practice leadership as a relational process that brings people together around common interests in order to effect positive change within institutions and/or communities. We will examine and practice key leadership concepts including self-interest, power, and collaboration. We will also practice specific leadership strategies, including 1-1 interviewing techniques, issue research, developing mission statements and action plans, and conducting community research. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019 and membership in the Pioneer Leadership Program (PLP), or permission of the PLP faculty.

**LDRS 2050 Collaborative Leadership: Local Perspectives (2 Credits)**

This course is a continuation of LDRS 2040 and the exploration of the topics of collaborative leadership and community change. In this course you will begin the implementation of the Community Change Initiatives you developed in LDRS 2040. To effectively enact community change, “change agents” must manage project logistics, continually develop as leaders, and be competent communicators. By the end of this course, you will further develop your abilities to effect community change through knowledge and awareness of strategies to effectively impact these areas. Prerequisites: LDRS 2017, LDRS 2021, LDRS 2019, LDRS 2040 and PLP membership or approval.

**LDRS 2060 Collaborative Leadership: Global Perspectives (2 Credits)**

This course is a continuation of LDRS 2040 and LDRS 2050. We will pursue the exploration of leadership and community change adding a focus on global cultural differences. In LDRS 2050, much of our class was devoted to communication, particularly “crucial conversations,” where we applied new ideas and skills to leadership and followership in CCI teams. This quarter, we will focus on communication skills in diverse cultures and how leadership is enacted and perceived in different cultures around the globe. Students in this course will also finalize the implementation of their CCI developed in LDRS 2040 and LDRS 2050. Community change initiatives require students to understand the communities where they live and work, to be confident in the appropriateness of their community change efforts, and to fairly and conceptually assess their efforts and impacts. By the end of this course, you will develop a deeper understanding of the community change process. Prerequisites: LDRS 2050 and PLP membership or PLP approval.

**LDRS 2070 Envisioning & Enacting Anti-Racist, Feminist Leadership (2 Credits)**

This course explores the complex intersections of race, gender, and the complexities of setting life goals for leadership. Students will consider race and gender as socially constructed concepts and discuss the biases and systemic barriers in which these constructs have developed and how this may influence their understanding and enactment of leadership. The course focuses on practical application of goal setting, career planning, and tools for navigating systemic barriers to leadership. To address these perspectives, the course reviews research from a variety of disciplines, including education, social psychology, sociology, economics, and management and organizational science.

**LDRS 2100 Finding Our Path: Discovering Meaning and Purpose (4 Credits)**

The Finding Your Way course is an opportunity to slow down and identify your passion, deep commitment, and calling. To locate a more holistic center, a sovereign-self, away from the influences of academic work, social-networks, family, or self-imposed expectations. In the midst of the busy and compressed experiences of campus life it is easy to lose track of one's intrinsic drive, an internal-compass of meaning and purpose. The Finding Your Way course is an invitation to meet and develop relationships and sense of belonging with fellow DU students who are also struggling with finding ways to understand the emerging sense of self at the interface between the demands of academia, larger social pressures, and expectations from loved ones. Nationally the rates of depression, anxiety, burnout, cynicism, and loss of heart are increasing on college campuses. It seems that many students are in need of tools and strategies for locating meaning and purpose in their academic life, to make sense of the tension between self and external demands. The Finding Your Way course will address these concerns by: -Disconnecting from the pace and intensity of campus life through dedicated time for rest and personal renewal; -Developing a more wholehearted and integrated self by exploring sources of fragmentation; -Seeking a deeper understanding of identity and sense of purpose through reflection; -Connecting with fellow DU students so as to develop a sense of collegial belonging; and -Experiencing the healing gift of being listened too at the deepest levels of your heart. Finding Your Way course is structured around a retreat format consistent with Courage to Teach practices and principles that have guided the inner-work of young leaders, students, teachers, physicians, faith leaders and members of the helping professions for over 20 years. You and a group of 20-25 DU students are invited (not required), through small group conversation, reflective readings, personal time, journaling, and art to find your way toward wholeness. The retreat will provide participants with greater clarity on how to slow down and attend to one's deep sense of selfhood with courage, fearlessness, and imagination.

**LDRS 2120 Mentorship: Theory to Practice (2 Credits)**

Whether being mentored, or mentoring another person, understanding how to make the most of the experience is important. This course will explore the theory and practice of mentoring. Students will explore mentoring philosophy, design, implementation and assessment, as well as the potential benefits and pitfalls of mentoring relationships. They will examine diversity and inclusion in mentoring and the impact of mentoring in different academic pursuits and professional capacities. Students will have the opportunity to hear from professionals who have utilized mentoring in their careers, research important elements of mentoring for their desired career paths, design their “ideal” mentoring experience from both the mentee and mentor experience, and learn how assessment can help evaluate the effectiveness of mentoring programs.

**LDRS 2130 Listening and Discernment (2 Credits)**

Leadership scholars and practitioners alike name listening as an essential practice of creating change and building sustainable and healthy relationships. The ability to hold a listening-first disposition aids a leader's ability to engage with the volatile, uncertain, complex, and ambiguous (VUCA) modern world. Without listening and discernment practices, the distinction between one's intention/impact, power over/power with, and tyranny/leadership is unknowable. In this course, students will learn about different models of effective, active, and embodied listening. True listening and discernment is an active practice, which can be grown and developed into a generative habit. By learning practices and approaches for listening and discernment as a means of enriching one's capacity to create generative social change.

**LDRS 2140 Exploring Lives of Leadership and Character (1 Credit)**

What does it mean to possess and develop character? How can you ensure that you live a life of purpose? LDRS 2140 is the beginning of the exploration of these questions and makes up a piece of the 4D-Leadership and Character Micro-credential. Through this course, you will identify virtues comprising character such as resilience, compassion, and integrity and identify strategies to develop them through this micro-credential and beyond. Reflecting upon your own experiences, you will design a portfolio that explores your own character development including these virtues and others.

**LDRS 2150 Reflecting on Cultivating Lives of Leadership and Character (1 Credit)**

In LDRS 2140, you explored character development with a focus on three different virtues: resilience, compassion, and integrity. In this course, we will build on that foundation and integrate the lessons you've learned in the additional courses through the 4D-Leadership and Character Micro-credential. We seek to answer some of these questions: How has your understanding of resilience, compassion, and integrity changed? How have you developed these virtues? How might you incorporate the development of these virtues into your own development as a leader? Drawing upon texts on these virtues and servant leadership, compassion, you should gain a clearer perspective on how your character contributes to a life of purpose.

**LDRS 2310 Leadership in a Virtual World (4 Credits)**

Distributed organizations are commonplace in the high-tech world in which we now find ourselves living and working. Leading in private and public settings requires a developed set of skills to utilize the virtual environment to advance a shared goal. Technical skills and communication take on new importance for leading virtually. This course focuses on these new realities of today's work and community environments. Through readings of current research on virtual work and team leadership as well as online assignments to recognize, practice and develop needed skills, students gain a strong foundational understanding of what constitutes effectiveness in virtual work and community leadership.

**LDRS 2340 Gender and Leadership (4 Credits)**

This course explores the complex intersections of gender and the intricacies of enacting leadership. Students will consider gender as a socially constructed concept and discuss the historical inequities in which this construct has developed and how this has influenced their understanding and enactment of leadership. This course considers the experiences of trans\*, genderqueer, ciswomen, and cismen leaders, as well as concepts of gender expression and the intersectionality of identities as influencers on leadership access and practice. To address these perspectives, the course reviews research from a variety of disciplines, including education, social psychology, sociology, economics, and management and organizational science.

**LDRS 2360 Leadership in Film (2 Credits)**

This course initiates a thoughtful consideration about the nature of leadership by ways of film analysis of narrative-based films. A focus on discernment regarding the personal, organizational, systemic, and global levels of leadership lends this courses use of narrative analysis and semiotic film analysis. However, students are encouraged to use whatever analysis styles they resonate with the most to delve into the elusive and complex emergence of leadership of the film and the making of the film. Through seeking understanding in dialogue with fellow learners, students are encouraged toward greater discernment of the person, the collective, and the context with regard to the dynamic systems involved in leadership. Film provides unique insights to investigate character and motive, as well as culture, allowing us to access meaning and significance through theoretical, analytic and dialogic inquiry. The course helps form in students the ability not only to be leaders, but in the words of Robert Frost, "awakeners." Through the time spent viewing films and entering into discourse, we will become more sophisticated observers and practitioners of leadership as we seek to understand the essence of leaders through artistic representation.

**LDRS 2370 Leading with Development in Mind (4 Credits)**

Leadership is an emergent phenomenon predicated on relationships and power. It is imperative for leaders and leadership scholars to understand social construction to be sensitive to, recognize, and hopefully utilize generative power dynamics that influence individuals, collectives, and systems. Robert Kegan's constructive development model aptly outlines the social constructivist epistemology and has been found to coach and develop more effective leaders and organizations for volatile, uncertain, complex, and ambiguous (VUCA) situations. The course itself is a deep dive into different methods using social constructivist epistemology and a constant evaluation, or reevaluation, or how different paradigms influence our social behaviors. While the structure appears to separate theory with practice, the deep connections between the two realize the applied praxis of a leadership philosophy. Beginning with an overview of the theory and epistemology of Robert Kegan's cognitive development theory and social construction. The second half of the course will focus on integration of the theory into personal practice.

**LDRS 2400 Leadership and Sustainability in Belize (4 Credits)**

Every day, decisions are made by leaders in business, government, and non-profit settings that impact sustainability in its many forms. This course explores multiple meanings and interpretations of sustainability. The course location of Belize provides a perfect learning laboratory to examine how one country is attempting to balance the sometimes competing demands of economic, cultural, and environmental sustainability. Course activities include staying at a low-environmental impact conference center in the rainforest, visiting a model environmentally sustainable island community, hearing guest lectures from various country experts, and exploring Mayan ruins. Through these activities students examine the role that leadership plays in contributing to small and large scale sustainability efforts. Students must apply and receive instructor permission to register for this course.

**LDRS 2420 Leadership in the Movement for Irish Independence (4 Credits)**

Much can be learned from the journey toward Irish Independence. Through an intensive study of this movement, students will explore Irish history and culture with specific focus on the role leaders played in gaining independence. Students will visit historical sites in Dublin, Limerick, and Cork and learn about leaders and their legacies from multiple national experts. From these experiences, students will reflect upon and draw connections between historical rebellion movements and those of today. Priority for this course is given to leadership studies minors.

**LDRS 2430 Leadership, Peace, and Conflict in Northern Ireland (4 Credits)**

Much can be learned from the journey toward peace amidst the conflict in the Republic of Ireland and the United Kingdom of Great Britain and Northern Ireland. Through an intensive study of historical events and their resulting sociopolitical outcomes today, students will gain a deep understanding of the role of leadership, peace, and conflict studies in Irish history. Students will visit multiple sites, explore Irish historical resources, and learn about leaders and their legacies from multiple national experts. From these experiences, students will reflect upon and draw connections between historical movements and those of today. Ireland provides the ideal context for deep study of understanding leadership through conflict and efforts for peace. The history of Ireland is a history of seeking independence, and many would say that complete independence was never truly achieved. Indeed, when the Irish Free State was declared in 1921, only 4/5 of Ireland became independent, with six remaining counties becoming a part of the United Kingdom as Northern Ireland. A significant contingent of Irish Republicans disagreed with many provisions of the Anglo-Irish Treaty and started a Civil War lasting almost a year. Struggles for Irish independence continued in many ways, most specifically with "The Troubles", through most of the 20th Century until the Good Friday Agreement in 1998. Today, Ireland maintains an open border with Northern Ireland and although peace in Northern Ireland is present, it remains tenuous with wounds that are still raw, and divisions that exist between Catholics and Protestants to this day. This course will focus on the period of the Troubles and examine how conflicts from the past inform current contexts for the leadership needs of our time.

**LDRS 2440 Nature's Lessons for Leadership (4 Credits)**

What can we as human beings learn from nature? How do we lead in a way that is responsible to our vision and can echo out to our communities? Students will explore these questions together at the Kennedy Mountain Campus through an intensive hands-on approach. Grounded in theoretical perspectives such as nature's principles for living, process leadership, and relational cultural theory, students will deepen their leadership practice through interactive exercises related to mindfulness, presence, and embodiment. Various activities, like art creation, using senses to connect with nature, and strengthening empathy through listening, students will explore the interconnection of humanity while deepening awareness to self and others.

**LDRS 2450 Decolonisation and Leadership in Aotearoa (New Zealand) (4 Credits)**

The north island of Aotearoa (New Zealand), home of the Māori, Pacific Islanders, and Pākehā (white New Zealanders), is host to unique cultural, political, and societal paradigms. Due to the history of settle colonialism on Aotearoa by the British Empire, Te Tiriti (Treaty of Waitangi) which granted Māori chiefs mana and rangatiratanga over their lives and lands, and 1975 Treaty of Waitangi Act, Aotearoa is at the forefront of decolonisation activism, scholarship, and praxis. Auckland, specifically, is the most integrated city in New Zealand with Te Reo Māori (the Māori language) on most signage and communications. Aotearoa is a society working diligently on multiple levels to honor members of a diverse ethnic, racial, religious, or social groups maintain and develop their traditional culture or special interests within a common civilization. There is a transcendent Māori saying about creating change: "we, as leaders, step into the future together walking backwards." To invite ourselves to be better neighbors, we require the strength and support from the collective, while always looking back at our past actions, relationships, and progress already made. Leadership, entangled with the co-construction of an emerging future, ought to learn a great deal from anti-colonial dispositions. Inspired by Patrick Wolfe's words, "settler invasion is a structure, not an event" this course aims to engage in critical consciousness about our participating with settle colonialism as an act at unsettling our minds, relationships, behaviors, and systems. As Lorenzo Veracini explains, "I am a settler, but indigenous resurgence is in my interest. It will make me a better human being and a worse settler." To actively engage in humanist socially just and inclusive leadership, we must follow genuine decolonisation.

**LDRS 2460 Leadership in Prague History (4 Credits)**

The Velvet Revolution, Franz Kafka, Prague Spring, Vaclav Havel, and International Students Day are all significant movements and figures in the history of what is now Czechia (Czech Republic). Travel with other DU students to Prague to gain a deep perspective of the dynamics of the leadership movements exhibited in this rich and unique history. Students will explore examples of leadership in literature, historical leaders, and nonviolent protest movements.

**LDRS 2470 Stories of Leadership and Immigration in New York City (4 Credits)**

How can we best understand the role that leadership played in the immigrant experience in the United States? This New York City travel interterm course will explore this question through temporal, hegemonic and cultural lenses. Learners will gain deep insight into how immigration has shaped our country and culture through a variety of experiences and visits in the city that is known the world over as the heart of immigration.

**LDRS 2701 Topics in Leadership (2,4 Credits)**

This course introduces students to major topics in Leadership Studies that expand the parameters of the Leadership Studies program. Topics vary reflecting the interests and expertise of the faculty. The course is repeatable. Prerequisites: WRIT 1122 and WRIT 1133. Course open to Colorado Women's College students only.

**LDRS 2911 The Job & Internship Search: Taking the Lead in Your Career Development (2 Credits)**

This course is designed to give students the unique resources, skills, confidence and tools necessary to be successful in the job and internship search and develop a mindset for strong workplace excellence and leadership. The search process involves much more than simply submitting a resume in the current economy. Through in-class activities and assignments, students will understand workplace complexities, deepen self-knowledge around their abilities, strengths, and interests; and, integrate this information to develop a strong career action plan to successfully navigate their professional development. The course will include content delivered by Career & Professional Development professionals, employers, and alumni.

**LDRS 2912 Careers and Leadership Development (2 Credits)**

This course is designed to facilitate student's career and professional development through self-reflection, industry knowledge, and building professional connections. Students will develop deep knowledge around their strengths and personal characteristics relevant to the world of work and how to leverage those unique abilities to successfully navigate future internship and work experiences, along with communicating their story and value add when connecting with employers. Through targeted exercises and experiential learning, including readings and assignments, students will learn how to increase their emotional intelligence, self-esteem, and confidence, which is vital to workplace and leadership success. Additionally, students will hear from local leaders and DU alumni to provide further training and insight on topics that promote effective decision-making and planning for lifelong career progression and development.

**LDRS 2920 Adventures in Fellowship (2 Credits)**

This course is designed to empower students to develop their personal narratives and to pursue "good-fit" fellowship competitions that create pathways to impact. Students will explore external fellowships, parse funding organizations' criteria and priorities, and work through applications to tell a coherent narrative with attention to common application components such as personal statements; letters of recommendation; and reflections on leadership, service, and impact. Class sessions and assignments will guide students through reflection about interests and goals, telling the story of their experiences, and identifying and preparing for competitive fellowships that will help them drive change on the issues that matter to them. Students will gain a foundation for expanded knowledge and growth in line with the 4D Experience as well as practical tools and strategies for crafting competitive applications for external opportunities. Cross-listed with HNRS 2401. This course counts as an Honors Seminar (HNRS 2400) for the University Honors Program and as an elective towards the Leadership Studies Minor.

**LDRS 3000 Capstone: Leadership Ethics (4 Credits)**

This course completes the leadership studies minor as an undergraduate at DU. It is designed to help students think in a structured, reflective way about the philosophical and behavioral ethics as relates to inclusive leadership. Students will gain a greater understanding of their own and others' ethical perspectives and develop stronger ethical decision making skills to navigate ambiguous situations and conflicting interests associated with future roles in society. A final leadership statement and code of ethics paper will allow students to summarize their learning, values and hopes for future leadership development and impact. Prerequisites: LDRS 2017, LDRS 2018, LDRS 2019, LDRS 2040, LDRS 2050, and LDRS 2060.

**LDRS 3500 Ethics in Leadership (4 Credits)**

To fully understand effective leaders, one must also appreciate and apply ethical perspectives and principles to leadership action. All forms of leadership communication involve ethical issues. This course is designed to increase students' understanding of the scope of ethical issues embedded in leadership activities, and to provide the opportunity to identify and discuss current ethical issues and challenges in our local to global world. Research on and application of ethical leadership are discussed in a course environment that encourages and supports the expression of diverse ideas, opinions, and beliefs. The overarching goal of the course is to learn how to ethically navigate ambiguous situations and conflicting interests in one's role as a leader. Prerequisites: LDRS 2517, LDRS 2518 and LDRS 2540 or LDRS 2541. Course open to Colorado Women's College students only.

**LDRS 3650 Co-Learning as Co-Leading: Critical Reflection on Development Praxis in South Africa (4 Credits)**

Co-Learning as Co-Leading: Critical Reflection on Development Praxis in South Africa is a virtual summer module offered over a period of four weeks. It is a 4-credit elective focused on Development, Leadership, and Gender in faith-based organizations in Southern Africa. The class is a collaboration between the University of Denver leadership studies department and the University of KwaZulu-Natal department of theology in Durban, South Africa. The course offers a space for reflection and deliberation to activists, community organizers, and students in leadership, theology, and community/non-profit development. It is designed as a productive learning space for students, researchers, and activists committed to harnessing feminist, queer, race-critical, and indigenous approaches to development in Southern Africa in general, and in faith-based NGOs in particular. The course uses a collaborative and decolonial learning approach that draws on the knowledge and methods of all the participants. The course will offer a mix of classroom learning, facilitation, community-based service-learning and application, and praxis reflection in collaboration with the Alan Paton Struggle Archives at UKZN. The course comprises of two sets of participants: (1) student-participant who will be doing the course as part of a university/college degree, and (2) activists-participants who will do the course as a way to reflect on their development praxis as it relates to the organization or social movement they are attached to. Course participants will be collaborators and co-teachers/learners within the learning environment.

**LDRS 3980 Internship (1-6 Credits)**

The PLP Internship program provides individualized opportunities to gain valuable professional experience and build leadership skills. This hands-on program complements a student's academic major or a specified interest area that supports the student's leadership development through careful placement in community based learning. All three sectors of government, not-for-profit and private enterprise are available for internship learning opportunities.

**LDRS 3991 Independent Study (1-5 Credits)****LDRS 3995 Independent Research (1-4 Credits)**

# Leadership and Organization Studies (LOS)

## LOS 1000 Frontline Manager Essentials (5 Credits)

The course delivers foundational leadership and management skills necessary to succeed in a first management position and incorporates extensive one-on-one learner coaching. The core concepts for this course include the following: Understanding oneself as a leader, including styles of leadership; strengthening relationships by understanding others; professional communication skills (oral, written, listening); delivering and receiving feedback and coaching employees; transitioning from a peer to a leader/manager role, developing a robust and inclusive team culture; building and motivating a high-performance team; and hiring, onboarding, and individual performance management. Practical experience and application of content form the student experience. Students leave with a professional leadership development plan for implementation in their front-line manager roles.

## LOS 1010 Essential Skills: Goal Setting, Time Management & Communication (0 Credits)

This course delivers essential and practical skills in goal setting and motivation, time management, and communication. Core concepts include professional communication skills (non-verbal, verbal, written, and listening), motivators to inform short and long-term goal setting and achievement, and time management techniques to better utilize time, prioritize tasks, and adapt to unexpected circumstances. Learners can customize their learning journey through three different skill development levels. The course utilizes a work-based learning design that allows learners to integrate skill development with critical reflection for professional and personal growth.

## LOS 2025 Leadership Development in Action (4 Credits)

Developing effective and successful leadership competencies is a lifelong endeavor that begins with the self and evolves throughout our career journey. In this course, inclusive leaders will be examined, including core leadership competencies and practices that may vary due to the organizational culture and structure. Students will identify core behaviors and practices along with effective communication skills and problem-solving tools to effectively move an organization forward. Students will assess their own leadership competencies and areas for growth to construct a personal leadership development plan.

## LOS 2050 Organizational Behavior (4 Credits)

Organizations serve as the fundamental building blocks of society. Most people spend hours of time weekly working in organizations. This course focuses on organizational structure and design by uncovering the dynamics of individual, work group/team and corporate behavior. Through reading, case studies and interaction, students learn about decision-making, problem-solving, patterns of interaction and facilitation of change.

## LOS 2100 Leadership (4 Credits)

What is leadership and how do leaders lead? Can leadership be learned? What skills do 21st-century leaders need? This course provides an opportunity to examine leadership theories, to develop a personal understanding of leadership, and to explore the relations of leaders and followers. The essential skills of effective leaders are explored, such as elaborating a vision, facilitating communication, working with diversity in organizations, shaping an ethical climate, and facilitating change. Students will be encouraged to examine systematically their own leadership potential as they reflect on historical and contemporary examples of effective business and political leaders as well as leaders of causes and social movements.

## LOS 3050 Financial Management (4 Credits)

All organizations, businesses, governments, and not-for-profits must deal with financial matters. This course provides opportunities to learn how to read and use financial data in order to develop systems for budget creation and control, profit forecasting, and long-range development. Basic principles of accounting, cost analysis and control, revenue and expense forecasting, return on investment, and capital reinvestment are studied and applied to examples. The leader's roles in financial management are examined, including technical, conceptual, and value considerations.

## LOS 3100 Leading with an Entrepreneurial Mindset (4 Credits)

Many people dream of being their own boss or starting their own business. This course explores the challenges of entrepreneurship, both starting a new business and bringing the entrepreneurial mindset to a large organization. Students examine the basic processes underlying entrepreneurship, including idea generation, prospect assessment, cost analysis, creating buy-in, and launching the product or service. Examples of successful and unsuccessful entrepreneurs will be examined to identify common patterns. Students will study and discuss entrepreneurship as a set of skills, values, and attitudes, and are invited to consider how they can apply entrepreneurship as a life skill.

## LOS 3150 Leading Groups and Teams (4 Credits)

All teams are groups, but not all groups truly function as teams. Successful organizational leaders recognize the differences and are adept at strategically creating diverse groups and teams to accomplish organizational goals. This course offers applied leadership strategies addressing the various types of teams, principles of team behavior, strategies for avoiding team dysfunction, effective team leadership, and leveraging interpersonal strategies and organizational resources to ensure collaboration, synergy, and effectiveness.

## LOS 3200 Cross-Cultural Leadership (4 Credits)

This course examines the leadership dynamics of culture, including but not limited to gender, socioeconomic status, race, religion, and social values at a global level. The purpose is to allow for the students to understand cultural competencies and give them the ability to manage in a diverse workforce in our twenty-first-century global society. #Because most successful companies recognize the value of workplace diversity and its impact on organizational effectiveness, many invest considerable time and resources into the development of cross-cultural leadership. #This course explores the dynamic subject of cross-cultural leadership from multiple perspectives, using both domestic and international lenses for inquiry. #It examines the related concepts of organizational communication, culture and cultural awareness, conflict resolution, and inclusive business systems. Students will learn about leadership prospects and examine how cooperation among different cultural backgrounds lead to the achievement of common goals. Students will explore best practice models that address cultural differences in the professional and personal space. Additionally, they will learn how to adapt, communicate, and think critically in professional and personal settings.

**LOS 3250 Learning in Organizations (4 Credits)**

Accelerating change in society and in organizations challenges individuals and the organization as a whole to engage in a process of continuous learning. In this course, basic concepts of individual and organizational learning are explored both in terms of their intrinsic value to individuals and as the source of competitive advantage to the organization. How is learning conceived of and structured throughout organizations? How is the return on investment in learning evaluated? This course provides an overview of what organizations do for the training and development of employees, how they structure knowledge sharing, and how they institutionalize within the organization the knowledge of its members through effective knowledge management practices.

**LOS 3300 Project Management (4 Credits)**

Work in organizations, or in the collaboration among organizations is often structured as projects. Almost any individual in an organization can be called upon to participate in or lead a project. Projects have deliverables that must be met within an agreed-upon time frame and budget. In this course, students learn the basic concepts and processes of project management including how to establish standards of performance, allot time, calculate costs, develop work-break-down structures, and delineate critical pathways. Students also learn about software tools available to plan and track successful projects to completion. Work in organizations, or in the collaboration among organizations, is often structured as projects. Almost any individual in an organization can be called upon to participate in or lead a project. Projects have "deliverables" that must be met within an agreed-upon time frame and budget. In this course, students learn the basic concepts and processes of project management: how to establish standards of performance, allot time, calculate costs, develop work breakdown structures, delineate critical pathways, enlist people and resources, and motivate accomplishment.

**LOS 3325 Applied Project Management II (4 Credits)**

This applied project management course is a continuation of concepts learned in LOS 3300 Project Management and focuses on project management strategies and tactics, including understanding data, tracking, and software used to manage projects. A project will be managed from conceptualization to evaluation, and will employ hands-on use of project management tools to execute projects related to their major. Students focus on real-world examples, best practices, and have the opportunity to develop, deploy, and evaluate project management tools and technologies. Prerequisite: LOS 3300.

**LOS 3326 Applied Project Management II Lab (1 Credit)**

Taken in conjunction with LOS 3325 Applied Project Management, this course provides students with hands-on use of project management tools to execute projects related to their major. Students focus on real-world examples, best practices, and have the opportunity to develop, deploy, and evaluate project management tools and technologies. Prerequisite: LOS 3300.

## Living and Learning Centers (LLC)

**LLC 2001 IELLC: Mindsets and the Design Process (1,2 Credit)**

The innovation and entrepreneurship course is not exclusively about teaching students how to be innovative and/or entrepreneurial. This course is very "hands-on". We do not use prescribed textbooks or give lecture-based instruction. Instead, innovation and entrepreneurship are concepts that must be experienced and actively engaged in, in order to gain an understanding of what these concepts look like and mean. The fall quarter focuses on developing an entrepreneurial mindset and discovering theories of product development and design thinking. This happens through various activities including practicing the design thinking process, reflecting on how our own personalities affect how we work in interdisciplinary teams, participating in improv, playing games, engaging in creativity exercises, amongst many other activities. Restricted to Innovation & Entrepreneurship LLC students.

**LLC 2002 IELLC: Consumer Insights, Design and Business Issues (1,2 Credit)**

The course focuses on a variety of important themes including topics such as iterative design, validating consumer insights, designing minimum viable products, and starting to develop business models considering costs and income/expenses of operating a business. We will also be joined by a number of guest speakers from the local community. Restricted to Innovation & Entrepreneurship LLC students.

**LLC 2003 IELLC: Building Our Own Business or Non-Profit (0-2 Credits)**

Students will work in teams, collaborating with others to share skills, and problem solve a particular challenge that exists in the local community, either at the University of Denver or within the surrounding city, nationally, or a global problem. Using the design thinking and new product development framework, which is rooted in human-centered design methodology, and other skills from fall, winter and spring quarters, students are tasked with developing a real-world solution that adds value or makes a positive difference whether it be through a business or a non-profit organization. Restricted to Innovation & Entrepreneurship LLC students.

**LLC 2021 Justice, Equity, Diversity and Inclusion Ethics in Technology I (1-2 Credits)**

This course is the first in a 2-part series that introduces students to technology ethics using a Justice, Equity, Diversity & Inclusion (LEDI) lens. Students will explore issues and challenges by reading articles, watching videos, class and group discussions, and projects/presentations that illustrate the importance of considering who and how people are impacted by technology and who participates in creating technology. Consideration and practice of multiple perspectives on ethical decision making will center this LLC learning experience in the majors of engineering and computing.

**LLC 2022 Justice, Equity, Diversity and Inclusion Ethics in Technology II (1-2 Credits)**

This course continues to introduce students to technology ethics challenges using a Justice, Equity, Diversity & Inclusion (LEDI) lens. Students will explore issues through reading articles, watching videos, class and group discussions, and projects/presentations that illustrate the importance of considering who and how people are impacted by technology and who participates in creating technology. Prerequisite: LLC 2021.

# Management (MGMT)

## **MGMT 1988 Study Abroad Resident Credit (0-18 Credits)**

### **MGMT 2021 Managing Complex Organizations (4 Credits)**

The course will consider the dynamics of corporate governance, beginning with a brief history of management thought and its relevance to decision-making today. It will introduce strategic planning, problem solving and the criteria for competitive market choice. It will consider risk, ethics and CSR as components to decision making. It will introduce modern organizational design and culture (including global cultures) and their impact on effective governance. It will review the dynamics of agency theory, conflict, ADR and corporate politics on governance. Prerequisite: C- in MGMT 2100 and admission to Daniels.

### **MGMT 2040 Managing Human Resources (4 Credits)**

This course focuses on the administration of human resources, including the processes of personnel management and personnel systems in complex organizations, both public and private. Techniques for recruiting and staffing; orienting, training and development; motivation, performance management, employee relations, compensation systems, and reward and retention systems; and safety and health issues will be addressed.

Prerequisite: C- in MGMT 2100 and admission to Daniels.

### **MGMT 2100 Leading High Performance Organizations (4 Credits)**

Have you ever wondered why some organizations thrive while competitors with the same technology and capital resources fail? Often the difference is the human factors: the many ways in which savvy organizations harness the commitment and creativity of their workers. In this course, you learn about the human factors that foster career success for you and high performance for your organization. Technical skills are important entry level requirements for leaders and managers. What sets the great ones apart is their ability to motivate and inspire colleagues and employees alike. In MGMT 2100 you learn the essentials of organizational behavior and acquire a toolkit of evidence-based people skills that complement the technical skills you gain in other DCB core courses. Prerequisite: BUS 1440.

### **MGMT 2300 Leading for Collaboration (4 Credits)**

Leading for Collaboration is an advanced undergraduate course to prepare students for a working environment where they are required to collaborate with others to reach individual and organizational goals. Students learn about the fundamental design principles of high-performing teams and groups, as well as how and when it is best to use them. Students also learn how to sustain team performance through effective decision-making, group communication, conflict management, and reward and motivation systems. Students also cover current topics in teams such as virtual teams, self-managed teams, and team-based innovation. Students also learn about and improve their ability for formal and informal leadership in a group or team.

Prerequisites: C- in MGMT 2100 and admission to Daniels.

### **MGMT 2420 Global Management (4 Credits)**

Introduction to multinational corporations and management of international profit and non-profit organizations; how management theory and practice are impacted by particular cultural contexts; analysis of current issues related to international trade and investments, and problems and opportunities of multinational operations. Prerequisites: C- in MGMT 2100 and admission to Daniels.

### **MGMT 2650 Introduction to Management Consulting (4 Credits)**

This course is designed to provide a broad overview of the management consulting profession, including its industry and competitive dynamics, major practice areas, approaches to implementation, management of consulting firms and the future of consulting. In addition, emphasis is given to the practice of consulting through the development of certain high impact skills in evaluation, proposal writing, data gathering and client presentations. The course is relevant to those who: 1) are specifically interested in consulting careers, 2) have job interests that involve staff positions in corporations, 3) want to become line managers who might one day use consultants, 4) wish to develop general consulting skills and familiarity with the consulting industry. The learning process in class will consist of lectures, cases, readings, exercises and guest speakers. This wide variety of learning methods is intended to convey both the necessary knowledge and practical skills necessary for building a sound foundation for becoming a professional consultant. It is essential that everyone comes well-prepared to class, as the learning process depends heavily upon participation.

Prerequisite: MGMT 2100 and admission to Daniels.

### **MGMT 2700 Topics in Management (1-4 Credits)**

Consideration and in-depth analysis of current issues in the field of management. Prerequisites: MGMT 2100 and admission to Daniels.

## **MGMT 2988 Study Abroad Resident Credit (0-18 Credits)**

### **MGMT 3000 Business Policy and Strategy (4 Credits)**

Management 3000 focuses on the strategic management of an organization as a whole. This course will introduce students to key decisions that top executives have to make when developing and implementing strategies, methodologies for informing those decisions, and how to interpret information from those approaches to guide strategic decision-making. Overall, from the perspective of leading an organization, students will learn how strategic decisions impact upon a firm's performance and success. Enforced Prerequisites and Restrictions: Microsoft Excel, Word, & PowerPoint certifications; BUS 2099, MKTG 2800, LGST 2000, INFO 2020, ACTG 2300, FIN 2800, and BUS 3000.

### **MGMT 3010 Developing a Business Plan (4 Credits)**

This is the culminating course for the business minor. It integrates the various functional areas (e.g., business law, management, accounting, marketing, and finance) with environmental scanning, competitive strategy, market feasibility, and innovation. Students study various business models through case studies, learning what leads to business success and failure. Students also learn about the business planning process, from start to finish, and develop an actual business plan for either a new, entrepreneurial venture or an established business.

Prerequisites: BUS 1000, LGST 2000, ACTG 2010, FIN 2010, and MKTG 2800. For Business minors only.

**MGMT 3100 Business Ethics and Social Responsibility (4 Credits)**

This course introduces students to ethical concepts, theories and issues as they relate to business and managerial decision making, including the social responsibilities of business. Case studies, group projects and lecture format. Cross listed with LGST 3100. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3150 Creativity, Innovation, and Design Thinking (4 Credits)**

Creativity is the #2 most important and in demand soft skill in business right now, yet very few people know how to truly leverage it. Design thinking is becoming a critical component to business relevance and competitive advantage. The primary purpose of this course is to equip you with the knowledge, tools, and processes so you can leverage your creative superpowers to problem solve and create innovative solutions based on design thinking, personally and professionally. When you leave this course, you will have sharpened a new skillset that will differentiate you and increase your value to a company, or as an entrepreneur, in today's business landscape. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3200 Employee Relations (4 Credits)**

This course provides a practical and orderly perspective on how to create an effective employer/employee relationship. Students learn the components and factors that promote and destroy effective employee relations. We learn the evolution of the labor movement in the United States and its influence on the business workplace. We learn techniques that can be used in fostering effective employee relations and learn about the challenges that face management. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3220 Leading a Not-For-Profit Organization (4 Credits)**

To educate students on management strategies to enable them to successfully lead and fund a not-for-profit (NFP) organization. Prerequisites: C- in MGMT 2100 and admission to Daniels.

**MGMT 3270 Negotiation and Dispute Resolution (4 Credits)**

The ability to negotiate effectively is critical for success in business and in everyday life. This class provides a comprehensive introduction to negotiation theory, strategies and styles within an employment context, with an emphasis on principled negotiation. Students will actively learn about negotiating by participating in a series of in-class exercises and outside readings. The exercises range from simple two-party negotiations to complex multiparty negotiations, including cross cultural negotiation and third party interventions. Prerequisites: C- in MGMT 2100 and admission to Daniels.

**MGMT 3280 Business Plan (4 Credits)**

For both startups and established companies, innovation is a critical capability, driving customer satisfaction, competitive advantage, and growth. This course provides rich, comparative exposure to alignment tools to research a customer opportunity. The course uses a combination of interactive class discussion, real-world case analysis and a team project to explore a critical thinking approach to innovation and product development, incorporating both quantitative and qualitative perspectives. As capstone this integrative course leverages accumulated coursework in application to create, design, evaluate, and analyze strategic opportunities. Also, presentations and idea challenges center on defining target customers, understanding customer needs, generating and evaluating concepts, forecasting demand, designing products and services, and confirming your hypothesis.

**MGMT 3300 Introduction to Project Management for Leaders (4 Credits)**

Project Management is a discipline which supports innovation by examining how to facilitate one time events such a constructing a building, installing a software system, taking a product to market, reengineering a marketing process, or merging an acquired company. In this course, we examine the science, practice the art, and discuss the folklore of project management to enable students to contribute to and manage projects as well as to judge when to apply this discipline.

**MGMT 3400 Leading in the Digital Age (4 Credits)**

Even before the computer Hal took over the spaceship in the film 2001: A Space Odyssey (released in 1968), we have been aware that robots and other advanced technologies would be part of our future. It is now fifty years later, and they are here! Robots (and many other technologies such as artificial intelligence) are joining the workforce. Is this a good thing? Or a bad thing? Clearly, the advent of robots will impact all aspects of work and organizations as we now know them. This course will be taught in seminar style with robust discussion, virtual field trips, and guest speakers. Topics will include: How does society benefit from the widespread adoption of advanced technologies? What jobs will be eliminated? What's left for humans? What will leadership look like in this new world? Prerequisite: MGMT 2011.

**MGMT 3500 Growth Strategies: How to Grow the Organization (4 Credits)**

This course will introduce students to the decisions on selecting among alternatives for growing organizations, including internal development, licensing and alliances, mergers and acquisitions, and how the resulting business combinations can be governed most effectively to create value for the organization. Students will learn about the relative strengths and weaknesses of the major growth modes, when to use each, how to avoid traps and errors, how managers combine the alternatives as part of a larger growth campaign and how joint value can be shared to maximize partner contributions. Overall, students will learn that how leaders select, implement and manage growth alternatives can influence the trajectory of the firm and its success. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3560 Resilient Leadership (4 Credits)**

Now more than ever, organizations need people who can thrive in uncertain and ambiguous environments, can embrace change and can inspire others with their resiliency and sense of purpose. In this course you will integrate your learnings from your management courses and prepare to be a resilient and purposeful leader in your future career. We will use a variety of activities and assignments to explore change, resilience and purpose and what they mean for you and your future colleagues and organizations. Main topics include: 1) skills and resources for individual resilience; 2) building collective resilience in groups, organizations and communities; 3) crisis management; and 4) managing and leading change.

**MGMT 3700 Topics in Management (1-8 Credits)**

Exploration of various topics and issues related to management. Prerequisites: Minimum grade C- in MGMT 2100 and admission to Daniels.

**MGMT 3708 Topics in Management (4 Credits)**

Exploration of various topics and issues related to management. Course open to Colorado Women's College students only.

**MGMT 3710 Business Process Management (4 Credits)**

Change is one of the foremost, if not the most important business topic today. To address these rapidly changing critical organizational, management, and technology issues, Business Process Management, Modeling and Analysis has become the preeminent innovative business performance technique over the past five years. This course helps all individuals to understand better Business Process Management, Modeling and Analysis by gaining insights into business process management concepts and principles, the use of process change enablers, a structured business process management methodology, business process management tools and techniques, change management and why organizations fail or succeed in implementing Business Process Management, Modeling and Analysis, highlighting five critical success factors. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3720 Knowledge Management (4 Credits)**

To become more innovative, responsive to customers and suppliers and adaptable to change, leading organizations are learning how to learn from high numbers of knowledgeable people. This course helps all individuals to understand Knowledge Management by gaining insights into knowledge managements concepts and principles, the use of knowledge management enablers, a structured methodology and framework for knowledge management, tools and techniques for knowledge management, effective change management programs for implementing knowledge management, and why organizations fail or succeed in implementing knowledge management, highlighting five critical success factors. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3730 Nongovernmental Organizations and Business (4 Credits)**

Nongovernmental Organizations (NGOs), with increasing credibility and authority, have a measurable impact on the intersection of business, government and society. NGOs are defined broadly as nonstate, nonfirm actors. NGOs may include environmental and consumer groups, business associations, labor unions, human rights organizations, church and religious groups, academic institutions, think tanks, trade and industry associations, and grassroots not-for-profit organizations. NGOs have emerged as important stakeholders in discussions over the terms and conditions under which business, government, multilateral institutions and local communities manage the process of globalization, one of the most complex issues facing public policy makers, corporate executives, and broader society. These NGOs conduct business by undertaking research, organizing boycotts, and often publicizing the shortcomings of multinational corporations in terms of social, ethical, and environmental responsibility. Yet these impressions are only the most public, and often the most negative images of NGO activism. This course examines the intersections of NGOs, MNEs and respective business practices with a goal of developing informed perspectives. Prerequisites: MGMT 2100 and admission to Daniels.

**MGMT 3980 Internship in Management (0-6 Credits)**

Practical experience (field study); requires written report. Prerequisites: MGMT 2100 and instructor's permission.

**MGMT 3988 Study Abroad Resident Credit (0-18 Credits)****MGMT 3991 Independent Study (1-10 Credits)**

Independent research/study; requires written report. Prerequisites: MGMT 2100 and instructor's permission.

## Marketing (MKTG)

**MKTG 1988 Study Abroad Resident Credit (0-18 Credits)****MKTG 2800 Introduction to Marketing (4 Credits)**

Marketing is, at its core, the interface a company has with its customers, and what could be more important in business? This introductory course is a must for any business professional, and anyone seeking to be a savvy consumer or to learn about promoting oneself. It is a challenging, hands-on course with an integrated approach to learning the basic fundamentals of the subject. It develops a student's ability to make sound marketing decisions using real information from the external environment to determine market feasibility for a product or service. The course has a segmented approach, allowing students to practice application of important concepts in the classroom and engage in teamwork. The segments build upon one another to allow students to create a complete and logically reasoned marketing plan or to participate in a marketing simulation. In teams, students prepare a written report and deliver an oral presentation about their marketing plan, or submit decisions for the marketing simulation. Restriction: Students cannot take this course as a first-year student. Prerequisites: (MGMT 2100 and INFO 1020) or Marketing Minor Non-Business 1. Students must earn a minimum grade of C- in MKTG 2800 in order to progress further in MKTG major/minor courses.

**MKTG 2910 Consumer Behavior (4 Credits)**

Understanding customers is an essential role for a marketer and this course provides important context for strategic and tactical decision making. This course gives students a fascinating look at why consumers buy what they do, where there is often more to it than meets the eye. CB uses frameworks from psychology, sociology, and other disciplines to describe how consumers learn and how they arrive at purchase decisions. The course also delves deeper into consumer demographic and psychographic characteristics. Concepts are integrated and applied as students consider how they have impacted or could affect their own lives, personally or as marketers. Prerequisite: C- in MKTG 2800.

**MKTG 2920 Business-to-Business Marketing (4 Credits)**

What is a Market? It is a problem-solving mechanism to meet the needs of individuals and organizations. Organizations are customers too, and the B2B market is the largest of all the markets, far surpassing the consumer market in dollar value. End consumers may need to be aware of what happens behind the scenes. Still, a lot of business activity must be undertaken, with the business-to-business sector being the largest employer for most companies. Today's fast-paced markets require professionals who are problem-solving across organizations and end consumers. This course teaches students how to succeed in markets through problem-solving and interpersonal relationships. PREREQ: MKTG2800.

**MKTG 2930 Methods of Marketing Research (4 Credits)**

In today's dynamic business environment organizations must do more than have a great product or service. Businesses must now invest in discovering what the needs of their customers are and anticipate what their customers' future wants will be to remain competitive. This course instructs students in the customer "discovery process" by teaching them the methods of collecting and analyzing qualitative and quantitative data, learning appropriate research concepts, and presenting marketing research results to internal and external customers. In this course, students will gain hands-on market research experience specifically by designing surveys, conducting customer interviews, and performing various analyses on the data they collected to support their research recommendations. Prerequisites: MKTG 2800 and INFO 1020.

**MKTG 2988 Study Abroad Resident Credit (0-18 Credits)****MKTG 3110 The Power of Professional Selling (4 Credits)**

Do you want to have multiple job offers when you graduate? Studies suggest that students who embrace sales as a professional career are in greater demand than any other type of job. This course explores sales as an integral part of your personal and professional development. Students will learn the importance of moving others through non-sales selling as well as how to create value for customers. The coursework includes opportunities to put theory into action through a series of team and individual selling activities and challenges. Ultimately, this course will help students develop skills that make them more capable advocates and influencers in their lives and careers. PREREQ: MKTG 2800.

**MKTG 3130 Selling in a Digital World (4 Credits)**

Selling is no longer about knocking on doors and cold-calling strangers. Business has been disrupted by the integration of digital processes and communication. As power continues to shift to customers, sales professionals must be equipped to build relationships and create value in a digital world. In this course, students will learn how to leverage the power of digital selling in the way salespeople manage interactions with customers, solve problems, and measure their impact. Through lectures, activities, and weekly interactions with sales professionals, students will build on their foundation of sales concepts to learn how to create value for their future stakeholders. Prerequisites: MKTG 2800 and MKTG 3110.

**MKTG 3140 Sales Management and Leadership (4 Credits)**

Salespeople are the primary channel of communication between enterprise and customers and therefore, managing them is of paramount importance to sales organizations. Studies suggest that students who undertake sales curriculum are more likely to land a sales job upon graduation and have a higher success rate in their first position. This course uses lectures, case studies, and role-plays to cover critical topics in salesforce management and sales leadership including recruiting, training, deployment, compensation, and evaluation. Prerequisite: MKTG 2800. MKTG 3110 is strongly recommended (but not required) as a prerequisite for students pursuing the minor in Sales Leadership.

**MKTG 3220 Customer Experience Management (4 Credits)**

Customer Experience (CX) is a customer's brand perception throughout all aspects of the buying journey. As companies integrate with digital platforms, customers are now demanding to connect with brands before purchasing and beyond the features and benefits of a product or service. Marketers are utilizing customer insights, digital preferences, Open AI, and analytics to execute and deliver an outstanding end-to-end customer experience and build brand loyalty. This is a client-project-based course that explores the 5-component framework of customer experience (CX) strategy and includes digital user experience (UX), brand experience (BX), and stakeholder experience (SX) to understand how marketing efforts can drive brand loyalty. Through industry-relevant concepts such as customer journey mapping, CX ecosystem, ESG standards, voice of the customer (VoC), and other stakeholders' experiences, students will gain a tactical understanding and execution of customer experience management plans. This is an eight-week course and includes two-day experiential learning opportunity at our Kennedy Mountain Campus (KMC). There will be a course fee for use of KMC, which is \$75.00 per student. Student must attend the weekend retreat.

**MKTG 3380 Supply Chain Management (4 Credits)**

Take a look around you to see everything that was designed, planned, procured, manufactured, and fulfilled through a complex and dynamic arrangement of supply chains. As a consumer, you do not need to understand how it happens, but the success of these systems impacts our lives, for better or worse. This course addresses the challenges and illustrates the tools required to build, maintain, and expand global supply chains. The course discusses the "six pillars" of the supply chain that commences through the design and ideation process and ends with a discussion on sustainability. Students will learn structured problem-solving to understand and run these global operations. Prerequisite: MKTG 2800. Requires at least sophomore standing.

**MKTG 3400 Introduction to Advertising (4 Credits)**

Tap into your creativity and get some practical experience with this popular and omnipresent form of promotion. This course introduces students to the field of advertising and gives them the opportunity to experiment with strategic and creative ideas in developing a persuasive campaign. Students will learn practical ideas for identifying and understanding target markets, developing design concepts with strong copy, and related considerations for many forms of media and integrations of them. They will work together on a team project and presentation to practice these concepts. Prerequisite: MKTG 2800.

**MKTG 3435 SXSWi: Marketing, Technology & Innovation (4 Credits)**

This class is focused on documenting/sharing lessons learned from the SXSWi conference in Austin Texas, the premier innovation conference in the US. The course is divided into two distinct halves. First, we will research the SXSWi sessions around subject matter and speaker background as well as planning the final deliverable that summarizes the entire SXSWi event. The second half includes participation in the conference to learn the most up-to-date digital marketing techniques in social, mobile, data and usability. Prerequisite: MKTG 2800.

**MKTG 3450 Advertising Media Strategy (4 Credits)**

This is not your grandparents' media landscape, or even your parents' for that matter! And it is no simple task to reach today's consumer with advertising. The world of media is ever changing; with the digital revolution, media planners and buyers face more challenges than ever. In this course, students learn the process of advertising media planning and the role it plays in campaign development. The course provides students an opportunity to create a media plan and creative materials and present them to a "real world" client. Recent clients for student projects have included General Motors (Cadillac) and Altitude Sports. Prerequisite: MKTG 2800 & MKTG 3400.

**MKTG 3460 Advertising Creative Strategy (4 Credits)**

This course provides an opportunity to go even further with advertising concepts and strategy. Students learn what it takes to collaborate with a team in creating brand-building, power ideas, focusing on a campaign assignment for a real product. Students work from strategy brief through to execution. The course includes evaluation of one's own work and that of others, application of theories about the presentation of information and images, and strengthening of presentation skills. Creativity is emphasized in all tasks, from ad design through media selection to presentations. Prerequisite: MKTG 2800.

**MKTG 3465 Data Science for Marketers (4 Credits)**

Data is an essential part of (digital) marketing. In fact, data enables the promise of digital marketing: real-time feedback enabling businesses, marketing campaigns to pivot and become predictive. We'll cover what it takes to become a data-driven organization and how to tell stories through data.

**MKTG 3475 Mobile Marketing (4 Credits)**

Smartphones are the device for today's consumer. Mobile usage easily eclipses all other digital venues, and you will be learning how to harness this ever-evolving field. Knowledge of mobile search, mobile applications, mobile advertising, and location-based services are essential for today's business leaders. This course covers how mobile marketing is defining business today, including strategy, tracking ROI, advertising, mobile websites, mobile apps, text messaging, QR codes, and the laws and ethics of mobile marketing. Students will use the design thinking process to design a mobile app and create a prototype of the app to solve their target market's problem. At the end of the course, students will deliver a prototype of the mobile app and a mobile marketing plan to promote their mobile tactics. PREREQ: MKTG 2800.

**MKTG 3480 Foundations of Digital Marketing (4 Credits)**

According to LinkedIn, the "Digital Marketing Specialist" role is among the top 10 most in-demand jobs in the USA. Knowing how to utilize digital marketing tools as part of a business strategy is critical in today's marketplace. This course provides the knowledge and skills necessary to plan and implement a digital marketing strategy, create and manage digital marketing campaigns, and select and utilize the most effective tools and technologies to achieve the business's objectives. This is a hands-on course where students will learn how to successfully integrate online tools, including user experience (UX), search engine optimization, pay-per-click advertising, email marketing, content marketing, reputation management, social media, and AI (e.g., ChatGPT.com / WriteSonic.com), within the overall marketing mix. Through simulations, certifications, and in-class assignments, students will acquire the fundamental digital experience that is a "must-have" for a marketing career in today's workplace.

**MKTG 3485 Search Engine Marketing: Google Analytics & Google Ads (4 Credits)**

Search marketing is the cornerstone of many digital marketing campaigns. An understanding of consumers' search behavior provides deep insight into how people make purchasing decisions and form brand affinities. This course examines the strategic use of search engine optimization in marketing to build profitable customer relationships. Topics in the course will include consumer search behavior, search engines and algorithms, website user-experience, on- and off-page SEO, and strategies for conducting SEO campaigns for traditional and niche search engines. The course is designed to teach the fundamentals of SEO through experience with Google Ads and Google Analytics. By the end of this course, students obtain relevant and applicable certifications in search engine marketing. PREREQ: MKTG 2800.

**MKTG 3490 Social Media Marketing (4 Credits)**

Social Media Marketing is used by marketers to increase brand awareness, identify key audiences, generate leads, and build meaningful relationships with customers. Social media allows businesses to gain a competitive advantage through the creation and distribution of valuable, relevant, and consistent content to attract and retain clearly defined audiences. Marketing professionals entering the workforce today need to be equipped with how to utilize new and constantly updated social media marketing strategies for businesses. By the end of the course, students will know how to implement a successful content strategy for multiple platforms including but not limited to Facebook, Instagram, Twitter, Snapchat, Pinterest, LinkedIn, and YouTube. We will be working with real-world clients and scenarios to help them drive marketing ROI! PREREQ: MKTG 2800.

**MKTG 3495 Tech in Marketing: Design Tools and Digital Foundations (4 Credits)**

"Software is eating the world." That was the quote from Marc Andreessen way back in 2011. His point was now that software had disrupted the tech industry, it was now evolving into every other industry. Agriculture. Mass transit. Construction. Everything. This prediction has become true with companies like Google and Uber. We're at a point where coding/technology are now a matter of literacy. We are going to work together as a class to make you more literate. We are going to learn how to utilize digital design tools such as Adobe Photoshop and Illustrator to create brand imagery. We'll then move on to learn HTML/CSS and APIs: the building blocks of the Internet. We'll also spend some time prototyping software such as Axure and tap into memes and Gifs. This will be a tactical, hands-on, and fun class. Cross-listed with MKTG 4845. Prerequisite: MKTG 2800.

**MKTG 3630 International Marketing (4 Credits)**

The shrinking planet and constant pressure to maintain a firm's growth mean that global marketing continues to grow in importance. This course introduces the various economic, social, cultural, political, and legal dimensions of international marketing from conceptual, methodological and application perspectives, and emphasizes how these international environmental factors should affect, and can be integrated into, marketing programs and strategies. This course provides students with methods for analyzing world markets and their respective consumers and environments, and to equip students with the skills in developing and implementing marketing strategies and decision making in international context. It is designed based on a combination of lectures and discussions of relevant concepts, case analyses of real global marketing issues, videos and readings from the business press, country snapshots, and a group research project in which student teams launch a discrete product in a foreign country of their choice. Prerequisite: MKTG 2800.

**MKTG 3640 Services Marketing (4 Credits)**

Because of the prevalence of services in the modern economy, exposure to practical ideas for business improvement makes this a valuable course for nearly any student. The unique challenges of selling the "invisible" characteristics inherent to services marketing are identified and addressed. Students will investigate customer requirements, alignment of service design and standards, service failure and recovery strategies, and the importance of long-term customer relationships to service organizations. Students will apply a variety of concepts to actual service businesses through cases and experiential learning that contribute significantly to the student's overall understanding of the service environment. Prerequisite: MKTG 2800.

**MKTG 3650 Innovation Strategies (4 Credits)**

This course is a fresh and dynamic course, which both challenges and leverages traditional marketing thinking in new and creative ways. Students read a variety of pieces from contemporary thought-leaders in the world of business, marketing, philosophy, and education to give context and perspective to innovative thinking and ideation techniques which are relevant and necessary for today's marketing leaders. Hands-on activities, reality-based projects, and interactive debates are the hallmarks of this course. Recent guest speakers have included William Espey (CMO, Chipotle), Justin Breseler (VP Marketing, Visit Denver) and recent alumni. One past Innovation Strategies student recently said, "After going through this intellectually stimulating class marketing no longer feels like consumer manipulation but rather it feels like strategy, design, and solutions that can come together and make culture and business better – it is really important." Prerequisite: MKTG 2800.

**MKTG 3660 Sports & Entertainment Marketing (4 Credits)**

There are few products about which consumers are more passionate than their sports and entertainment expenditures, so this topic is always an exciting one in marketing. This course provides an in-depth look at the processes and practices of marketing sports, concerts, film and other entertainment. The course emphasizes the practical use of advertising, promotion and public relations in creating athlete or entertainer images, providing a quality fan experience, promoting sponsorship or driving event ticket sales. Cross listed with MKTG 4660. Prerequisite: MKTG 2800.

**MKTG 3704 Topics in Marketing (1-4 Credits)**

Topics in Marketing.

**MKTG 3705 Topics in Marketing (4 Credits)****MKTG 3820 Brand Management (4 Credits)**

Designing a compelling brand is the foundation of marketing. Explore the intricacies of developing a brand strategy to drive growth and ensure consistent brand messaging across the company and product/service lifecycle. Through this client-based course, explore how organizations create a compelling corporate image that inspires trust, builds a sense of community, differentiates, and fosters loyalty to generate brand value. As the digital landscape propels and empowers consumers, discover how brands are co-creating with customers to increase inclusiveness while reducing risk. Learn the concepts and models from brand authorities, then apply this knowledge to real-world business challenges. The learning outcomes are to create a goal-driven brand plan, harness tactics to cultivate brand loyalty, foster brand experiences, and ultimately build sustainable brand equity while measuring success. Prerequisite: MKTG 2800.

**MKTG 3950 Integrative Marketing Strategy (4 Credits)**

You may have heard the saying that "The journey is as important as the destination." In organizations the corollary is that strategic planning is as important as the plan. As a result, the planning process has become increasingly important for all business functions (e.g., production, accounting, R & D, marketing). The objective of this course is to enable students to utilize a rigorous planning process to develop marketing programs. This activity involves integrated problem-solving using concepts, theories, and primary and secondary information, and is characterized by logical use of facts leading to alternatives, which in turn lead to solutions. By the end of the course students should be able to develop effective marketing programs, and to understand the applications and limitations of the principal planning tools a marketing manager has at their disposal. This course needs to be taken within 2 quarters of graduation. Prerequisites: MKTG 2800, MKTG 2910, and MKTG 2930.

**MKTG 3980 Marketing Internship (1-8 Credits)**

We learn by doing. That's what a marketing internship at Daniels is all about. Recent studies show that one to three internships on a resume go a long way towards landing that first job in marketing. At Daniels, we network with some of the top marketers in Denver and across the US. Our marketing students have worked at National CineMedia, Integer Advertising, Bank of America, Enterprise, Northwestern Mutual Insurance, eBags, Crispin-Porter + Bogusky, Einstein's, Johns Manville, Ski Magazine, the Pepsi Center, 15 Million Elephants, Flextronics, Merrill Lynch, Dish Network, AEG Live, Altitude Sports & Entertainment, and the list goes on. Not only will you earn school credit, but you may also very well land a paid internship, and eventually a full-time job.

**MKTG 3988 Study Abroad Resident Credit (0-18 Credits)****MKTG 3991 Independent Study (1-10 Credits)**

Independent study provides opportunities for the capable student to do special work under individual supervision in areas not covered by class offerings. Undergraduate students should demonstrate qualities necessary for interested and intensive inquiry. The topic and outline must be agreed upon by the student with the approval of the instructor and department concerned. Restricted to marketing majors. Prerequisites: Marketing major and instructor's permission.

## Materials Science (MTSC)

**MTSC 3020 Composite Materials I (4 Credits)**

An introduction to composite materials. Properties of fibers and matrices, fiber architecture, elastic properties of laminae and laminates, interface in composites. Cross listed with MTSC 4020. Prerequisites: ENME 2410 and ENME 2541.

**MTSC 3800 Topics in Materials Science (1-5 Credits)**

Various topics in materials science as announced. May be taken more than once. Prerequisite: varies with each topic.

## Mathematics (MATH)

**MATH 1010 Elements of College Algebra (2,4 Credits)**

This course is designed to review the required algebra skills to be successful in Business Calculus. The following topics are covered: review of basic algebra, solving equations and inequalities, rectangular coordinate systems and graphing, polynomial and rational functions, exponential and logarithmic functions, and solving exponential and logarithmic equations. Students who completed a MATH course numbered 1200 or higher may not take this course.

**MATH 1070 College Algebra and Trigonometry (4 Credits)**

Selected topics in algebra and analytic trigonometry intended to prepare students for the calculus sequence. Cannot be used to satisfy the Analytical Inquiry: The Natural and Physical World requirement. Students who completed a MATH course numbered 1951 or higher may not take this course.

**MATH 1150 Foundations Seminar (4 Credits)**

The seminars offer challenging and interesting mathematical topics that require only high school mathematics. Examples of seminars are Introduction to Cryptography, Patterns and Symmetry, Mathematical Art and Patterns of Voting. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**MATH 1190 Algebra Workshop for Calculus for Business and Social Sciences (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1200, Calculus for Business and Social Sciences. The course will help support students in the algebra skills which are essential for success in MATH 1200.

**MATH 1200 Calculus for Business and Social Sciences (4 Credits)**

This is a one-quarter course for students in business, social sciences, and liberal arts. It covers elementary differential calculus with emphasis on applications to business and the social sciences. Topics include functions, graphs, limits, continuity, differentiation, and mathematical models. Students are required to attend weekly labs. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**MATH 1941 Calculus I Workshop (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1951 Calculus I. Students will work in groups on challenging problems from Calculus to gain deeper understanding of the covered material. The workshop is not intended for remediation, tutoring, or working on homework assigned in the accompanying course. The workshop cannot be used toward math major/minor. Co-requisite: Students must be concurrently enrolled in MATH 1951 Calculus I.

**MATH 1942 Calculus II Workshop (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1952 Calculus II. Students will work in groups on challenging problems from Calculus to gain deeper understanding of the covered material. The workshop is not intended for remediation, tutoring, or working on homework assigned in the accompanying course. The course cannot be used toward math major/minor. Co-requisite: Students must be concurrently enrolled in MATH 1952 Calculus II.

**MATH 1943 Calculus III Workshop (1 Credit)**

This is a workshop that students can enroll in to accompany the course MATH 1953 Calculus III. Students will work in groups on challenging problems from Calculus to gain deeper understanding of the covered material. The workshop is not intended for remediation, tutoring, or working on homework assigned in the accompanying course. The course cannot be used toward math major/minor. Co-requisite: Students must be concurrently enrolled in MATH 1953 Calculus III.

**MATH 1951 Calculus I (4 Credits)**

Limits, continuity, differentiation of functions of one variable, applications of the derivative. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Prerequisite: MATH 1070 or equivalent.

**MATH 1952 Calculus II (4 Credits)**

Differentiation and integration of functions of one variable especially focusing on the theory, techniques and applications of integration. Prerequisite: MATH 1951.

**MATH 1953 Calculus III (4 Credits)**

Integration of functions of one variable, infinite sequences and series, polar coordinates, parametric equations. Prerequisite: MATH 1952 OR math 1962.

**MATH 1962 Honors Calculus II (4 Credits)**

Same topics as MATH 1952 treated rigorously and conceptually. Topics include differentiation and integration of functions of one variable especially focusing on the theory, techniques and applications of integration. Prerequisites: MATH 1951 and permission of instructor.

**MATH 1963 Honors Calculus III (4 Credits)**

Same topics as MATH 1953 treated rigorously and conceptually. Topics include integration of functions of one variable, infinite sequences and series, polar coordinates, parametric equations. Prerequisites: MATH 1952 or MATH 1962 and permission of instructor.

**MATH 1988 Study Abroad Resident Credit (0-18 Credits)****MATH 2050 Symbolic Logic (4 Credits)**

Modern propositional logic; symbolization and calculus of predicates, especially predicates of relation. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with PHIL 2160.

**MATH 2060 Elements of Linear Algebra (4 Credits)**

Matrices, systems of linear equations, vectors, eigenvalues and eigenvectors; idea of a vector space; applications in the physical, social, engineering and life sciences. Prerequisite: MATH 1200 or MATH 1951.

**MATH 2070 Introduction to Differential Equations (0-4 Credits)**

Solution of linear differential equations; special techniques for nonlinear problems; mathematical modeling of problems from physical and biological sciences. Prerequisite: MATH 1953 or MATH 1963.

**MATH 2080 Calculus of Several Variables (4 Credits)**

Multivariable processes encountered in all sciences; multiple integration, partial differentiation and applications; algebra of vectors in Euclidean three-space; differentiation of scalar and vector functions. Prerequisite: MATH 1953 or MATH 1963.

**MATH 2200 Mathematical Reasoning & Proof (4 Credits)**

Introduction to theory of sets; relations and functions; logic, truth tables and propositional calculus; proof techniques; introduction to combinatorial techniques.

**MATH 2988 Study Abroad Resident Credit (0-18 Credits)****MATH 3000 The Real World Seminar (1 Credit)**

Lectures by alumni and others on surviving culture shock when leaving the University and entering the job world. Open to all students regardless of major. Cross listed with COMP 3000.

**MATH 3010 History of Mathematics (4 Credits)**

This course surveys major mathematical developments beginning with ancient Egyptians and Greeks and tracing the development through Hindu-Indian mathematics, Arabic mathematics, and European mathematics up to the 18th century. Prerequisite: MATH 1953 or MATH 1963.

**MATH 3040 Lattices and Order (4 Credits)**

Ordered sets, lattices as relational and as algebraic structures, ideals and filters, complete lattices, distributive and modular lattices, Boolean algebras, duality for finite distributive lattices. Prerequisite: MATH 2200.

**MATH 3050 Set Theory (4 Credits)**

Zermelo-Fraenkel axioms, axiom of choice, Zorn's Lemma, ordinals, cardinals, cardinal arithmetic. Prerequisite: MATH 2200.

**MATH 3060 Mathematical Logic (4 Credits)**

Classical propositional calculus (deductive systems and truth-table semantics), first-order logic (axiomatization and completeness), elements of recursion theory, introduction to nonclassical logics. Prerequisite: MATH 2200.

**MATH 3080 Introduction to Probability (4 Credits)**

Basic probability models, combinatorial methods, random variables, independence, conditional probability, probability laws, applications to classical problems. Prerequisite: MATH 1953 or MATH 1963.

**MATH 3090 Mathematical Probability (4 Credits)**

Limit theorems for independent random variables, multivariate distributions, generating functions. Prerequisites: MATH 2080 and MATH 3080.

**MATH 3110 Topology (4 Credits)**

Point set topology including topological spaces, connectedness, compactness and separate axioms; preparation for advanced courses in analysis. Prerequisite: MATH 3161. Cross listed with MATH 4110.

**MATH 3151 Advanced Linear Algebra (4 Credits)**

Vector spaces, linear mappings, matrices, inner product spaces, eigenvalues and eigenvectors. Prerequisite: MATH 2060 and MATH 2200.

**MATH 3161 Introduction to Real Analysis (4 Credits)**

A theoretical introduction to the structure of real numbers, to convergence of sequences and series, and to the topology of the real line, including limits and continuity. Prerequisites: MATH 2080 and MATH 2200.

**MATH 3162 Introduction to Real Analysis II (4 Credits)**

A rigorous introduction to the analysis of functions of a real variable, including differentiation, Riemann integration, and the notions of pointwise and uniform convergence for sequences of functions. Prerequisite: MATH 3161.

**MATH 3166 Group Theory (4 Credits)**

Groups and homomorphisms, isomorphism theorems, symmetric groups and G-sets, the Sylow theorems, normal series, fundamental theorem of finitely generated abelian groups. Cross listed with MATH 4166. Prerequisite: MATH 3170.

**MATH 3170 Introduction to Abstract Algebra (4 Credits)**

Examples of groups, permutations, subgroups, cosets, Lagrange theorem, normal subgroups, factor groups, homomorphisms, isomorphisms, rings, integral domains, quaternions, rings of polynomials, Euclid algorithm, ideals, factor rings, maximal ideals, principal ideals, fields, construction of finite fields. Prerequisite: MATH 2060 and MATH 2200.

**MATH 3176 Rings and Fields (4 Credits)**

Rings, domains, fields; ideals, quotient rings, polynomials; PIDs, UFDs, Euclidean domains; maximal and prime ideals, chain conditions; extensions of fields, splitting fields, algebraic and transcendental extensions; brief introduction to Galois theory. Cross listed with MATH 4176. Prerequisite: MATH 3170 or equivalent.

**MATH 3260 Metric Spaces (4 Credits)**

Metric spaces and continuous functions; completeness and compactness; examples including norm spaces; pointwise and uniform convergence; Baire Category Theorem. Cross listed with MATH 4260. Prerequisite: MATH 3161 or equivalent.

**MATH 3311 Linear Programming (4 Credits)**

Linear optimization models, simplex algorithm, sensitivity analysis and duality, network models, dynamic programming, applications to physical, social and management sciences. Prerequisite: MATH 2060.

**MATH 3312 Markov Chains (4 Credits)**

Discrete-time and continuous Markov Chains, ergodic theorems, random processes, elementary queueing theory, applications. Prerequisite: MATH 2060 and MATH 3080.

**MATH 3351 Introduction to Dynamical Systems (4 Credits)**

Dynamical systems (one-parameter families such as circle rotations/tent maps, shift spaces); global properties (transitivity/mixing/sensitivity); behavior of trajectories (chaos, long-term averages, periodicity). Prerequisite: MATH 3161.

**MATH 3400 Introduction to Geometry (4 Credits)**

Specific geometrical systems including finite, Euclidean, non-Euclidean and projective geometries. Prerequisite: MATH 2200.

**MATH 3451 Chaos, Dynamics & Fractals (4 Credits)**

Introduction to one-dimensional dynamical systems, fractals; fixed and periodic points; sources and sinks; period doubling and tangent node bifurcations; chaotic dynamical systems; Sarkovskii's Theorem. Prerequisite: MATH 3161.

**MATH 3550 Introduction to Theory of Numbers (4 Credits)**

Concepts of nonanalytic number theory and its history; prime numbers, divisibility, continued fractions, modular arithmetic, Diophantine equations and unsolved conjectures. Prerequisites: MATH 2200.

**MATH 3600 Numerical Analysis (4 Credits)**

An introduction to numerical methods. Topics include: iterative methods, Banach fixed point method, Runge-Kutta and finite element methods for partial differential equations, numerical optimization and gradient descent algorithm, and back propagation in neural networks. Prerequisites: MATH 2200.

**MATH 3605 Mathematics of Complex Networks (4 Credits)**

An introduction to the study of complex networks, focusing on the modeling, classification and geometrical properties of complex systems. Topics include stochastic and non-stochastic models of complex networks, measures of centrality and clustering, influence propagation and geometric data (expansion, the small world phenomena and PageRank). Prerequisite: MATH 2200.

**MATH 3610 Machine Learning: Linear Models and Regression (4 Credits)**

An introduction to modern regression techniques, with an emphasis in theoretical foundations and applications in artificial intelligence and machine learning. Topics include multilinear regression, polynomial regression, logistic regression, and support vector machines, including kernels methods. Prerequisite: MATH 3151 & MATH 3080.

**MATH 3615 Statistics and Stochastic Methods (4 Credits)**

Statistical decision theory, estimation, testing, confidence intervals. Bayesian statistics, introduction to Markov chains, and hidden Markov chains with applications to artificial intelligence. Prerequisite: MATH 2200 & MATH 3080.

**MATH 3651 Ordinary Differential Equations (4 Credits)**

Modeling of phenomena by ordinary differential equations; techniques of analysis and solution of such equations; oscillation theory and boundary value problems, power series methods, special functions, Laplace transforms and difference equations. Prerequisites: MATH 2060 and MATH 2070.

**MATH 3661 Partial Differential Equations (4 Credits)**

First and second order linear equations, Fourier series, the wave equation, the Cauchy problem, the heat equation, maximum principles, Laplace's equation, Green's functions. Prerequisites: MATH 2070 and MATH 2080.

**MATH 3701 Combinatorics (4 Credits)**

The principle of inclusion and exclusion, elementary counting techniques, systems of distinct representatives, partitions, recursion and generating functions, Latin squares, designs and projective planes. Prerequisite: MATH 2200.

**MATH 3705 Topics in Mathematics (4 Credits)**

Varying selected advanced topics in mathematics, depending on student demand and instructor interest.

**MATH 3710 Graph Theory (4 Credits)**

Paths, cycles, trees, Euler tours and Hamilton cycles, bipartite graphs, matchings, basic connectivity theorems, planar graphs, Kuratowski's theorem, chromatic number, n-color theorems, introduction to Ramsey theory. Prerequisite: MATH 2200.

**MATH 3720 Coding Theory (4 Credits)**

Goals of coding theory and information theory, instantaneous and Huffman codes, Shannon theorems, block and linear codes, generating and parity-check matrices, Hamming codes, perfect codes, binary Golay code, Reed-Muller codes, cyclic codes, BCH codes, Reed-Solomon codes, ideas of convolutional and turbo codes. Prerequisite: MATH 3170.

**MATH 3851 Functions Complex Variable (4 Credits)**

Complex numbers, analytic functions, complex integration, series expansions, residue theory, conformal maps, advanced topics and applications. Prerequisites: MATH 2060 and MATH 2080 and MATH 2200.

**MATH 3951 Advanced Proofs and Problem Solving (4 Credits)**

Problem solving techniques for contest-style math problems, with applications to areas including calculus, linear algebra, geometry, number theory, and linear recurrences. Emphasis will be on short introductions to a variety of topics, and meticulous and careful proof-writing requiring creative solutions to open-ended problems.

**MATH 3988 Study Abroad Resident Credit (0-18 Credits)****MATH 3991 Independent Study (1-10 Credits)**

Cannot be arranged for any course that appears in regular course schedule for that particular year.

**MATH 3995 Independent Research (1-10 Credits)**

## Media Film Journalism Studies (MFJS)

**MFJS 2000 Introduction to Film Criticism (4 Credits)**

Theories and methods of social, cultural and aesthetic criticism of film; emphasis on critical writing. Laboratory fee required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2001 Producing Video for Social Media (4 Credits)**

This course covers the basics in video production and video storytelling for all undergraduate students at the University of Denver who are interested in YouTube and other social media video content creation. Students will maximize their video storytelling abilities, producing storytelling content that can be shared across multiple social media platforms using mobile phones or equivalent basic consumer equipment. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills requirements within several MFJS majors and the MFJS minor and serves as a university elective.

**MFJS 2140 Storytelling & Reporting (4 Credits)**

Fundamentals of newswriting and reporting for print and broadcast journalism. Laboratory fee required.

**MFJS 2150 Scriptwriting (4 Credits)**

Examines the creative process for writing the motion picture screenplay. Topics include format and structure; character and dialogue; rising conflict and confrontation; visualization and imagery; and understanding the conventions of the medium and its limitations. Students will complete a short screenplay by the conclusion of the course. Prerequisite: MFJS 2000. Cross listed with MFJS 4450. 4 qtr. Hrs.

**MFJS 2160 Sexualities and Screens (4 Credits)**

This course offers a critical introduction to the ways that sexual identities and practices are rendered (in)visible within screen-based, digital media culture: television, film, online spaces and platforms, and video games. As a socially contested, disruptive, and liberatory element of social life, sexuality's mediation offers a lens for us to think about cultural norms, ideologies, and politics, as well as issues related to the commodification of bodies. Throughout the quarter, you will immerse yourself in diverse perspectives, reflective writing exercises, textual analysis, small group discussions, and other active learning measures that will deepen your critical thinking around the intersection of media culture and sexuality. Issues such as sexualization, intimacy coordinators, the mediation of consent, queer digital activism, and the politics of casting will be explored through the lens of Media Studies, Cultural Studies and Intersectional Feminism. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2170 Globalization and Film (4 Credits)**

MFJS 2170 (Globalization and Film) explores the varying ways that globalization impacts cinema on a national and transnational level. This course is broken down into three units: theories on globalization; implications of globalization behind-the-scenes; and representations of globalization onscreen. Through a selection of assigned readings and filmic texts, you will be encouraged to think critically about what "globalization" means and how it influences films, both behind-the-scenes and onscreen. In addition to several in-class screenings, you will be required to view a few films on your own. Finally, you will have the opportunity to research and write original scholarship on one of two angles to engage further and apply course material: 1) the impact of globalization on the film industry of your choice, or 2) the impact of globalization on representational issues in the film of your choice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2205 International & Development Communication (4 Credits)**

Virtually everywhere we look, whether we are watching a kidfluencer on YouTube, streaming music on Spotify, or scrolling through TikTok, it is evident that we are living in an increasingly interconnected and globalizing world. What does this mean for us as individuals, as Coloradans, as Americans? What does this mean for global humanity? Do we now have a transnational social order and a global culture? If so, what or who is driving this process, and who remains on the sidelines? These are some of the broader questions this class addresses, with an eye toward how media, culture, and communication fit into the larger network of globalization.

**MFJS 2210 Introduction to Media and Culture (4 Credits)**

Course introduces students to the organization of the U.S. media industries and their historical and contemporary role in U.S. culture. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2220 Popular Music and Social Justice (4 Credits)**

What makes popular music a powerful medium for us to “fight the power” and motivate social change, and what hinders it from achieving its full potential? This course examines a range of 20th and 21st century popular music (blues, folk, rock, hip-hop, musicals, etc.) to better understand the complex relationships between music and social (in)justices. Sitting at the intersection of critical media studies, critical race & ethnic studies, popular music studies, and project-based learning, this course examines an array of 20th and 21st century popular music (blues, folk, rock, hip-hop, pop, indie, etc.) to understand the complex relationships between music and social (in)justices.

**MFJS 2240 Multimedia Journalism (4 Credits)**

With the abundance of competing voices online, seeking accurate information has become a major challenge in today's world. Information now comes in different shades, including incorrect statements, fakes news, rumors, doctored audio, and deepfake videos. They float together in traditional media outlets as well as on social media and they can play a destructive role in creating fear, tarnishing reputations, undermining social cohesion, influencing elections, and, at times, fueling killings. To overcome those challenges, the world needs credible, balanced, and technology savvy journalists as well as critical media consumers more than ever before. MFJS 2240 is a project-based, collaborative, hands-on class that engages with the new media challenges to the field of journalism. The readings, multimedia projects, and class activities aim to empower students to grasp the basic principles, key terms, media production skills, and the organizing structures of digital journalism. Prerequisite: MFJS 2140.

**MFJS 2270 Activist Media (4 Credits)**

Various media have played roles in the social and political movements of the past, with social media platforms accelerating the possibilities for intervening in social and political life. Activist media harnesses new communication technologies to resist the domination and limitations of mainstream corporate media, creating new media strategies and messages to promote social change. This class examines the spaces of activist media that have enabled citizens, protesters, journalists, PR professionals, tech developers and hacktivists to harness a diverse range of media tools and platforms for change. It also explores how these platforms have created new risks and challenges, especially for activists. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2280 Politics and Media (4 Credits)**

We examine the nature of the media and how media institutions shape the way citizens understand politics. We discuss global media institutions and the role media play in various societies. We explore the role of media in providing information for citizens in a democracy, examine how the media influence the political process, and investigate how the goals of and changes within the media industry influence the effect media coverage has on the political process. Through our study, we explore how the media either enhance or limit the potential for citizens to contribute to democracy. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**MFJS 2290 Innovations in Media, Artificial Intelligence, & Communication (4 Credits)**

This course considers information and communication technologies in relation to “the new,” exploring the ways that technological, historical, legal, economic, and social contexts combine to enable the changes that we think of as innovations in media and communication. Taking a critical/cultural historical perspective, we explore questions such as where technologies come from, who controls them, who profits from them, how they are used, and with what potential implications? We also consider how today's artificial intelligence technologies are similar to and different from the new technologies of previous ages, how bias and misinformation are (re)produced, and countermovements such as “slow” technology, with an eye toward imagining what the future might hold. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MFJS 2400 Strategic Communication Planning (4 Credits)**

This course introduces students to various career paths and foundational principles in strategic communication, including public relations and advertising. Students learn and apply the elements of a comprehensive strategic communication plan, including conducting research, setting communication goals, designing messaging strategies and tactics, and evaluating the plan's effectiveness. An emphasis on ethical communication practices is central to the course. Prerequisite: sophomore standing.

**MFJS 2420 #CannabisMedia: Studying the Culture of America's New Normal (4 Credits)**

This course will examine the legalization of marijuana — both medical and recreational — as it is being covered in Colorado and in states across the country. Ever since the 2012 legalization of recreational marijuana, Colorado has been a leader in considering the medical, political, social and legal issues emergent with legalization. In this course, which is the first of its kind in the U.S., not only will we be investigating the scope of the marijuana legalization movement and its many political and practical intricacies, we also will be conducting a research project with original data and multimedia elements conceived and designed to push and promote enterprising storytelling. Students will visit dispensaries, interview industry professionals and produce a portfolio piece of narrative journalism using the modes and methods of their choice, with direction of the instructor.

**MFJS 2421 Studying Star Wars: Lessons From a Galaxy Far, Far Away (4 Credits)**

We are at a time that seems to be "peak Star Wars," some 40 years after the movie was first released to the moviegoing public. After a period of dormancy, resurgency and now primacy, the three-part trilogy of the Star Wars saga enters into its fifth decade with new films, new popularity and deeper integration into popular culture with the acquisition by Disney. In the class we'll analyze the historical foundations of the original film and its storytelling devices, and along the way discuss marketing, mythology and the critical takes on the movie's role in the canon of filmmaking. Expect to learn about sound design, movie scoring, special effects and the many twists and turns of the universe set in a galaxy far, far away. You will pick one aspect of the Star Wars universe to dissect in WordPress.com thinkpiece, and you will be required to participate in daily class discussions, in person and on Twitter.

**MFJS 3040 Media Law (4 Credits)**

Introduction to freedom of expression and media law. Students learn how the American legal system works and gain an understanding and appreciation of the philosophical foundations of free expression. In addition, students confront many of the issues facing professional communicators today. Topics include incitement, hate speech, student speech, copyright, defamation, and other issues crucial to mass media professionals. The course examines also explores challenges to free expression brought by new(er) communication technologies. The purpose of this class is to give students the knowledge and critical thinking skills needed to be successful in today's rapidly changing communication environment. Cross-listed with MFJS 4300.

**MFJS 3110 Audience and Communication Research (4 Credits)**

This class offers an introduction to social science methods applied to communication and audience research. By the end of the course, students will be familiar with: the role and functions of communication and audience research in contemporary society; the processes and practices involved in developing and executing a research project; the basic different forms of research, both qualitative, such as interviews and focus groups and quantitative, such as surveys and experiments; how to use research skills for different career paths. Cross-listed with MFJS 3110/4560.

**MFJS 3120 Media Ethics, Race & Technology (4 Credits)**

What are your ethical obligations as a professional communicator, a communication creator and consumer, and as a citizen? This course examines ethical dilemmas that take place at the individual, organizational, corporate, and technological levels, with attention to Critical Race Theory and to various epistemological approaches to ethical reasoning. You will consider issues of privacy, mis- and disinformation, copying and distribution, games, trolls, bots, and more. Junior standing required.

**MFJS 3170 Infographic Storytelling (4 Credits)**

We swim in a world of data - from election results, budgets and census reports, to Facebook updates and image uploads. Journalists need to know how to find stories in data and shape them in compelling ways. This hands-on course teaches reporters and editors to gather, analyze, and visualize interactive data-driven stories. This emerging discipline touches on information and interactivity design, mapping, graphing, animation tools, and data analysis. You are expected to think like a journalist by evaluating data critically and applying what you learn to news stories, information graphics or web applications. Familiarity with HTML/CSS is helpful, but not required. This is not a course in coding, but programmers of all skill levels are welcome.

**MFJS 3180 Media Studies Research (4 Credits)**

This capstone course in the Media Studies major is open to all students interested in engaging in the work of media research, which includes identifying a research question, collecting and analyzing data, and writing research reports. The course covers interviewing, textual analysis, ethnography, historical research, and is rooted in project-based learning. Junior standing required.

**MFJS 3201 Publication & Graphic Design (4 Credits)**

This course explores publication design and techniques for creating effective layouts. We employ the scope of the Adobe Creative Suite, primarily InDesign, to incorporate and manipulate text, photographs and illustrations. The course serves as a visual elective for all MFJS students. Laboratory fee required. Prerequisites: MFJS 2140 or MFJS 2400 or instructor approval.

**MFJS 3202 Horror Films (4 Credits)**

Horror films serve as tales of morality and, as such, their themes tend to fluctuate in accordance with cultural zeitgeists. They offer commentary on socio-cultural-political aspects, and they also have an ongoing market. Since they are inexpensive to make but have the potential to bring in profit, horror films are popular among producers. Due to their construction of fear aspect, they tend to create a lot of intrigue and dedicated fan bases. From their production to their ideological messaging to their reception, horror films offer spaces rich for cultural understanding and critical dialogue. In fact, it is these aspects that make horror films a wonderful jumping off point for discussion—students tend to love them and they are usually very accessible. With this in mind, this course will use the platform of horror films to discuss cultural differences, including anxieties and fears, the impact of globalization on horror films, the implication of franchises on horror cinema, and the representation of intersecting identity markers (both on and off-screen). Prerequisite: MFJS 2000.

**MFJS 3207 Justice Equity Diversity and Inclusion in Health Communication (4 Credits)**

The course will begin with an overview of Health Communication in the United States and the ways in which health and illness are defined through communication, including media. We will discuss existing health disparities and social determinants of health as we examine health communication in multicultural settings in the U.S. We will further examine multicultural audiences and perspectives about health and illness, including diverse meaning systems and their influences on health attitudes and behaviors. Students will learn about cross-cultural conceptions of health and disease and how those conceptions are represented in communication about health and illness. As students learn about what it means to develop culturally grounded health communication campaigns, they will examine culture centric messaging in health promotion. We will also discuss the ways in which health care systems are promoting patient-centered health care that takes intersectionality and identity into consideration.

**MFJS 3208 Narrative and Longform Journalism (4 Credits)**

Students spend time learning the nature and functions of in-depth news reporting for online and print, with a focus on magazine-style feature article writing and editing. Laboratory fee required. Prerequisite: MFJS 2140.

**MFJS 3212 History of Cinema 1930-1960 (4 Credits)**

This course surveys international film history starting with the "talkies" through innovations in widescreen formats and post-war filmmaking. We will study cinema between the 1930s-1960s from a variety of perspectives: as a technological apparatus, an economic institution, an aesthetic form, and a social force. Lab fee required. Prerequisite: MFJS 2000 Introduction to Film Criticism.

**MFJS 3213 Producing the Music Video (4 Credits)**

This course is designed to provide you with a basic understanding of the music video production process. We will work with partners in the Lamont School of Music and Theater to deliver 3 high quality music videos to local DU bands by the end of the quarter. These videos will be conceived, shot, and edited in class. Guest speakers from the industry will offer guidance and critique. Your knowledge of cinematography, editing, and set design will expand in this class. The 3 bands will be our clients; we will deliver them videos of the highest quality.

**MFJS 3214 Representational Issues in U.S. Film (4 Credits)**

This course explores the varying ways that race and ethnicity, gender, sexual orientation, gender identity, socioeconomic status, physical and mental (dis)ability, and age are represented in and by film—both historically and culturally. In addition to class discussions regarding mainstream and independent film production, students will employ close readings of filmic texts to better understand how off-screen factors greatly impact what is seen onscreen. This course will encourage students to think critically about the filmic images that they are consuming on a regular basis, as means to interrogate what is at stake when it comes to representational issues such as dominant ideologies, visual style, and assigned character roles. Finally, students will engage the texts critically as a way to understand how these onscreen identities impact the way that individuals treat others but also how they are treated themselves. Prerequisite: MFJS 2000.

**MFJS 3215 Introduction to Filmmaking (4 Credits)**

This course is designed to provide students with a basic understanding of television and film production with a focus on the complete production process: pre-production (planning), production (lighting, shooting and sound gathering) and post-production (editing). At the completion of this course, students will have a basic understanding of the process involved in producing a field-based production, the skills necessary to complete it and, most importantly, the critical understanding behind all decisions. Because people are the most important part of any production, emphasis will be placed on students' ability to work effectively with production team members. Laboratory fee required. Prerequisite: MFJS 2000. Restricted to FILM and MDST majors.

**MFJS 3217 Indie Film vs Hollywood: A History of American Independent Cinema (4 Credits)**

American Independent Film", provides an introduction to the American independent film movement. The course focuses on the rise of independent cinema in the 1950s and 1960s, examines the height of the independent film movement (1984-1994), and provides a survey of the current state of "indie film." Directors studied include: John Cassavetes, Roger Corman, Melvin Van Peebles, Barbara Loden, John Sayles, Robert Rodriguez, Lizzie Borden, Steven Soderbergh, Spike Lee, Jim Jarmusch, Richard Linklater, and Wes Anderson. A significant amount of time is devoted to a comparison of the Hollywood Studio System and independent production techniques.

**MFJS 3218 Narrative Film Production I (4 Credits)**

This is the first of a two-quarter capstone class that fulfills a two-quarter capstone requirement for Film Studies and Production majors and can be taken by others who have completed the pre-requisites and are juniors or seniors. Majors can take both two-sequence Narrative and Documentary capstones, counting one set for the major and one as electives if they so choose. The narrative course is both process and product oriented with a goal for students to work collaboratively to develop a 7-10 minute original narrative film script or web series (2-3 episodes that run approximately 10 minutes total) and complete all of the pre-production tasks necessary to take it into production spring quarter. Depending on class size we will make 3-5 films. We will examine the scriptwriting revision and pre-production processes, and students will finish the quarter with a completed pre-production notebook that will include, among other things, a shooting script, overheads, a script breakdown, production schedules, casting decisions, location scouting reports, a look book, a pitch deck and a shooting schedule. Likewise, through readings, discussions and screenings, the course is designed to expose students to the larger world of narrative filmmaking. During the second quarter students will film, edit and present finished work. Prerequisites: MFJS 2000 and MFJS 3215 and Junior/Senior standing.

**MFJS 3219 Documentary Film Production I (4 Credits)**

This course is the first half of a two-course capstone sequence. It presents an integrated (theory and practice) approach to film and video documentary. The theoretical component presents a historical overview of the various styles and modes of documentary with a discussion of the way each has developed in response to perceived limitations of the mode then dominant and the ethical decisions that filmmakers continue to face. The production component focuses on selecting and researching a topic for documentary production during the second quarter of the capstone. Prerequisites: MFJS 2000 and MFJS 3215 and Junior/Senior standing.

**MFJS 3220 Narrative Film Production II (4 Credits)**

What are your ethical obligations as a professional communicator, a communication creator and consumer, and as a citizen? This course examines ethical dilemmas that take place at the individual, organizational, corporate, and technological levels, with attention to Critical Race Theory and to various epistemological approaches to ethical reasoning. You will consider issues of privacy, mis- and disinformation, copying and distribution, games, trolls, bots, and more. Junior standing required.

**MFJS 3221 Documentary Film Production II (4 Credits)**

This is the second of a two-quarter capstone class that fulfills a two-quarter capstone requirement for Film Studies and Production majors and can be taken by students who have completed the pre-requisites and have junior or senior standing. Students must have taken MFJS 3219 in the previous quarter to register for this class. Majors can take both Documentary and Narrative capstones, counting one for the major and one as electives if they so choose. Students will collaborate with their teams in the production and post-production phases of a documentary project. This includes filming, editing, sound design, scoring, color correction and mastering. In-class critique sessions and guest speakers bolster this experiential quarter. Prerequisites: MFJS 2000, MFJS 3215 and MFJS 3219 and Junior/Senior Standing.

**MFJS 3222 Experimental Film/Video Theory & Production (4 Credits)**

This class includes a historical and critical overview of experimental film and video movements as well as technical and aesthetic training in experimental production. Students integrate theory and criticism into the production of several experimental projects. Laboratory fee required. Cross listed with MFJS 4222. Prerequisite: MFJS 3215.

**MFJS 3223 Advanced Editing (4 Credits)**

Building on the basic non-linear editing skills gained in Introduction to Filmmaking, this course focuses on advanced techniques of image and color manipulation, movement and graphic effects, advanced sound sweetening and manipulation and advanced text/credit effects. Prerequisite: MFJS 2000: Introduction to Film Criticism and MFJS 3215: Introduction to Filmmaking.

**MFJS 3224 Cinematography (4 Credits)**

This course focuses on the visual aspects of telling a cinematic story. Students develop an understanding of advanced lighting concepts, lenses, grip equipment, and color science. The class emphasizes visual storytelling, using lighting, art design and camera movement to develop character and theme. Lab fee required. Prerequisite: MFJS 2000 and MFJS 3215.

**MFJS 3226 Directing for Film and Television (4 Credits)**

This course will focus on the art and craft of film/television directing, emphasizing the relationship the director cultivates with actors, developing an understanding of movement and creating a vision for a scene. Students will apply theory to actual scene work with actors. Prerequisites: MFJS 2000 and MFJS 3215.

**MFJS 3227 Producing the Environmental Documentary (4 Credits)**

This course is designed to provide you with a basic understanding of cinematography: cameras, lenses, grip equipment, lighting, and composition. When you complete this course, the goal is for you to have an intermediate understanding of cinematography and that which motivates lighting and composition choices. Because people are the most important part of any production, emphasis will be placed on your ability to work effectively with class members. Learning to collaborate is crucial to your success in this class.

**MFJS 3229 Video Editing is for Everybody (4 Credits)**

The goal for this course is for students to have a basic working knowledge of editing using various media elements (video, audio, photos, music, graphics), developing proficiencies using different editing software, and applying a mixture of editing theories and techniques. This is a summer course only.

**MFJS 3242 Reel Women (4 Credits)**

Reel Women explores films from the U.S., England, Senegal, India, Canada, Colombia, and Saudi Arabia that are made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives across the world.

**MFJS 3245 Producing Client Video (4 Credits)**

This course provides students with an experiential learning opportunity in film and video production as part of the MFJS Keystone Experience series. Students work with a community or not-for-profit organization, learning how to work with clients and fulfill client video/film needs as part of a broader communication plan. Students in this course utilize research and communication strategy work that has been developed by students working with the same client in previous quarters. Learning takes place within justice, equity, diversity, inclusion and internationalization frameworks consistent with department, College, and University expectations. The course fulfills requirements within several MFJS majors and the MFJS minor. Prerequisites: MFJS 2000 AND MFJS 3215. 4 credit hours.

**MFJS 3310 Advanced Storytelling & Reporting (4 Credits)**

This is a writing-intensive course designed to strengthen your abilities in the gathering and analysis of public documents and big data, the conduct of interviews with a range of stakeholders, and the use of observational techniques that provide a basis for in-depth investigative reporting. Laboratory fee required. Prerequisite: MFJS 2140 or MFJS 3410.

**MFJS 3325 Advanced Screenwriting (4 Credits)**

Advanced Screenwriting takes writers through the process to create creative fiction content for film and television. This may include writing television pilots, web series and other fiction media material. The course will include live table reads, peer-to-peer feedback and industry speakers. In addition to creating original content, students will be taught how to create their writer's portfolio, market themselves to industry decision makers and land writing jobs. Prerequisites: MFJS 2000 and MFJS 2150.

**MFJS 3410 Strategic Messaging (4 Credits)**

This course focuses on learning and applying strategic communication principles to the creation of strategic messages for a client. Students also evaluate strategic communication techniques as they learn how to target a specific audience and learn how strategic messages fit within an overall strategic communication plan. Prerequisite: MFJS 2400.

**MFJS 3420 Strategic Communication Seminar (4 Credits)**

This is the capstone course in the strategic communication sequence. In this course, students examine special topics in strategic communication and apply what they have learned to group projects in which they take on a client and work together as a team on a strategic communication campaign. Cross listed with MFJS 4070. Prerequisites: MFJS 2400 and MFJS 3410.

**MFJS 3440 Global & Multicultural Campaigns (4 Credits)**

Globalization is having a major impact on the communications field, including strategic communication and public relations. As a growing number of organizations, businesses and governments seek to communicate and interact with organizations and individuals from diverse cultures and countries, they depend upon public relations professionals with international and cross-cultural expertise to help them achieve their goals and objectives. Likewise, more organizations and businesses are recognizing the importance and value of cultural diversity and inclusion within their organizations as well as among their clientele and need assistance from public relations professionals to communicate effectively and build healthy relationships around this diversity. This course will explore several aspects of global and cross-cultural public relations campaigns, using a combination of readings, lectures, discussions, and presentations from guest speakers with experience in this rapidly expanding field. Prerequisite: MFJS 2400 or Permission of Instructor.

**MFJS 3501 Web Design & Content Development (4 Credits)**

This course covers the building and management of web pages and the creation of sites using open source content management systems. You will develop the ability to plan, create and integrate social media and third-party content into web sites, and utilize analytical tools that measure audience engagement. Laboratory fee required. Prerequisite: MFJS 2140 or MFJS 2400.

**MFJS 3503 Social Media Strategies (4 Credits)**

In this class, students get familiar with the principles of social media strategy and learn how to design messaging strategies and tactics for social media. In addition, students work with a real client on a strategic communication campaign for social media. Prerequisite: MFJS 2400 or MFJS 2140.

**MFJS 3504 Advanced Multimedia Web Storytelling & Publishing (4 Credits)**

This course is one of two possible capstone classes for journalism students. In this course, students tap the reporting, writing, editing, and multimedia production and editing skills and knowledge learned and practiced in previous journalism studies classes and apply them to building from scratch, an open content management based multimedia web site. Laboratory fee required. Prerequisites: MFJS 2140 and MFJS 2240, or instructor approval.

**MFJS 3505 Advanced Multimedia Journalism with PBS Partnership (4 Credits)**

This capstone course for journalism majors provides students with opportunities in experiential learning as together they bolster the coverage and amplify the voices of underserved communities in Colorado. Rural, BIPOC, LGBTQ+, people with disabilities, and religious minority communities, among others, will be the subject of our attention and the focus of the class media projects. Students produce several mini-documentaries and written pieces that will be submitted for consideration to, and may air on, the RMPBS program, Colorado Voices, and on the PBS Video app. Prerequisite: MFJS 2140 and MFJS 2240.

**MFJS 3506 Audio Documentaries (4 Credits)**

In the past decade, an explosion in the production and accessibility of audio documentary work has created an unprecedented interest and expansion of the documentary form in nearly all sectors of public life. Building on this trend, this course teaches the skills of ethnographically informed audio documentary work that can record and interpret culture and lived experience. We focus on learning the techniques of non-fiction storytelling used in established public radio programs like This American Life, Radio Lab, or Snap Judgement, as well as newer podcasts like Reply All, Invisibilia, or Embedded. The course will prepare students to tell complex stories using strong character-driven narrative. Sound documentation and representation will not be done along journalistic principles, but instead through rigorous ethnography that relies on participant-observation and immersion. Through practical application and the exploration of ethnography and documentary approaches to communication, the course explores questions that surround the interpretation and representation of socio-cultural experience via a sonic medium. To understand the basic mechanics of sound and its narrative form, participants will learn to digitally record and edit audio. Storytelling will then become more complex as students learn to conduct ethnography, interviews, and develop a script for radio. Students will ultimately analyze and create audio documentaries in an effort to understand a significant form of digital storytelling. There are three central learning objectives that will guide us through the course: (1) we will practice ethnographic and documentary methodology, (2) learn to write for radio, and (3) learn the workflow of audio editing to produce an audio documentary.

**MFJS 3652 Feminist Media Studies (4 Credits)**

MFJS 3652 (Feminist Media Studies) explores the gendered intersections between media and society through the analytical lens of Feminist Media Studies (FMS). While aligned with the discipline Media Studies, FMS centers questions related to power and patriarchy, and aims to create space for praxis. Paying close attention to issues of intersectionality, this course surveys the historical emergence, and contributions, of feminist methodology and inquiry related to issues such as sexism within gaming, the politics of visibility in television production, the celluloid ceiling, and networked bodies. During the quarter, you will engage in multiple points of active and reflective learning that provide the space to strengthen both your understanding and application of FMS. Assignments include discussion questions, self-reflective analysis, and a final project that highlights application, creativity, and subversion.

**MFJS 3655 JEDII (Justice, Equity, Diversity, Inclusion, & Internationalization) Storytelling (4 Credits)**

This course focuses on multiperspectival approaches to journalism and media, with an emphasis on representations and news coverage related to gender, race/ethnicity, class, (dis)ability, religious, and national identities. The class explores journalistic writing as a creative process and craft that emphasizes social justice. Prerequisite: MFJS 2140: Storytelling & Reporting or MFJS 3410: Strategied Messaging. Cross-listed with MFJS 4655.

**MFJS 3656 Cross-cultural Travel Seminar: Immigration, Communication & Border Cultures (4 Credits)**

This is a one-week intensive travel course that takes place in Tucson, Arizona and south to the US-Mexican border region. The focus of this experiential learning class is to study immigration issues, border cultures, and the role of communication and media through testimonies of immigrants, and visits to key sites such as the migrant trail, immigration detention center and courts. Also included are talks by activists and officials involved in the immigration debate. Class meets for two pre-class sessions in spring quarter. Requires junior standing. Cross-listed with MFJS 4656.

**MFJS 3700 New Media Law & Regulation (4 Credits)**

An examination of recent developments in internet and social media law and regulation.

**MFJS 3852 Advanced Design, Layout, and Editing (4 Credits)**

This course teaches students advanced layout and design for media publications using contemporary software applications for journalists and public relations professionals. Prerequisite: MFJS 3201.

**MFJS 3900 Topics in Media Film & Journalism (1-4 Credits)****MFJS 3980 Internship in Media, Film, and Journalism Studies (1-4 Credits)****MFJS 3991 Independent Study (1-10 Credits)****MFJS 3995 Independent Research (1-10 Credits)**

## Music-Academic Classes (MUAC)

**MUAC 1000 Fundamentals of Music Theory (4 Credits)**

Meant for students with little to no experience with music notation, Fundamentals of Music Theory introduces pitch, rhythm, scales, chords, and other elements of Western notation. Students will develop facility in reading and hearing music, as well as an understanding of the syntax of tonal music, ranging from the music of Mozart to film music to Miles Davis. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1001 Music Theory I (2 Credits)**

The Fall quarter of Theory I covers fundamentals (key signatures, triads, seventh chords rhythm and meter, etc.) and first-species counterpoint, in both creative and analytic contexts. Although some entering students may be familiar with these concepts, the course emphasizes speed and mastery.

**MUAC 1002 Music Theory I (2 Credits)**

The Winter quarter of Theory I introduces basic voice-leading and analytic techniques, emphasizing syntax and grammar of music so that students can begin to write their own music. Second species counterpoint is also covered.

**MUAC 1003 Music Theory I (2 Credits)**

The Spring quarter continues the study of voice-leading and musical progression, building part-writing skill and analytic accuracy. The final project in this course is the composition and performance of a theme and variations set.

**MUAC 1012 Music, Society, and Culture (4 Credits)**

This course introduces students to the music of a variety of world areas. For each unit, students examine a diverse array of genres, analyzing music's relationship to religious life, aesthetics, politics, social organization, and identity. We also discuss the impact of globalization, transnationalism and immigration on the shaping and transformation of musical practice and meaning in each region. Reading materials, listening assignments, and discussion topics are supplemented by in-class performance workshops, designed to give students firsthand experience in non-Western performance traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1013 Jazz Theory and Aural Skills (4 Credits)**

The foundational study of jazz theory and aural skills. Must be a BM student with a major in Jazz Studies or Commercial Music.

**MUAC 1014 Jazz Theory and Aural Skills (4 Credits)**

The foundational study of jazz theory and aural skills.

**MUAC 1015 Jazz Theory and Aural Skills (4 Credits)**

The foundational study of jazz theory and aural skills.

**MUAC 1016 History of Jazz (4 Credits)**

This course examines the short history of jazz and all its sub-styles (swing, bop, cool, etc.) from its roots to the early eighties. Students have access to the entire course online, including all the fantastic listening. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1017 History of Rock and Roll (4 Credits)**

The "birth of rock" occurred in the mid 1950's as a result of the convergence of pop, country and western, and rhythm and blues. This course traces that evolution by way of examining a broad picture of the general flow of those styles and their artists. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1018 Understanding Music (4 Credits)**

In this course, students acquire a greater appreciation of musical history, context, composers, and genres. Through listening activities, texts, movies, and live concerts, students become educated listeners, able to describe intelligently musical experiences using appropriate vocabulary. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course.

**MUAC 1019 American Popular Music (4 Credits)**

American Popular Music combines the study of social and cultural history on the one hand with the analytical study of music styles on the other. Basically, it serves as an introduction to the wealth of American popular music from minstrelsy to hip hop. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class is not available to music or performance majors.

**MUAC 1020 Aural Skills I (2 Credits)**

Development of aural analysis skills in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

**MUAC 1021 Aural Skills I (2 Credits)**

Development of aural analysis skills in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

**MUAC 1022 Aural Skills I (2 Credits)**

Development of aural analysis in meter, mode, harmonic function and song forms through solfeggio, singing and dictation.

**MUAC 1024 Black Sacred Music: A Survey (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. This course counts toward the Analytical Inquiry: Society and Culture requirement. Note: Music majors do not receive Common Curriculum credit for this course and thus it will not fulfill AI: Society requirements for music majors.

**MUAC 1025 Hip-Hop and Rap Music (4 Credits)**

From its origins in dance parties in the Bronx in the late 1970s to its identification as the soundtrack of social movements around the globe, rap music has become perhaps the most prominent genre of popular music. This course, primarily, analyzes the musical features of rap music as a specific manifestation of the wider aesthetic of hip-hop. To set the stage for later musical analysis, the course includes brief introductions to technologies of hip-hop (e.g., sampling, drum machines, Autotune, streaming, etc.), earlier Afro-diasporic expressive forms and aesthetics (e.g., the dozens, toasts, double-dutch, etc.), and rap music's relation with gender, race, identity, and politics. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1028 Hearing the Movies (4 Credits)**

Although we usually say that we watch movies, we might more accurately say that we "see-hear" or "audioview" them. Film sound tracks feature speech, sound effects, and music that fulfill practical storytelling roles, and that combine with imagery and narrative to create powerful emotional resonance in viewers. This interdisciplinary course explores the sonic elements of film history from 1895 to the present. Course activities include weekly film viewings and reading assignments set against lecture/discussions offering a topical survey of developments in film sound as both a technical practice and an art. Graded assignments include weekly online responses, a film introduction, a midterm exam, and a final project in which each student will re-score a film clip and compose an essay reflecting on that process. Assignments are designed to promote achievement of the Analytical Inquiry: Society and Culture learning outcomes of the Common Curriculum: • Apply the methods or techniques appropriate to disciplines in the arts or humanities in order to interpret texts, ideas or artifacts, or engage in creative activity. • Analyze the relationship between texts, ideas, or creative works and a broader context in ways appropriate to disciplines in the arts or humanities. No prior formal experience in music or film studies is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1029 Methods of Mastery (4 Credits)**

Musicians, athletes, artists, software engineers, actors, financial managers, dancers, writers, mathematicians, scientists, game designers, and even social media influencers spend their days in radically different ways, but top performers share habits and approaches that contribute to success. "Methods for Mastery" offers students an opportunity to explore the habits and mindsets of great achievers in different disciplines, ranging from classical music to creative writing to sports, finance, and more. What do writer Isabel Allende, dancer Twyla Tharp, soccer star Cristiano Ronaldo, Apple inventor Steve Jobs, cellist Yo-Yo Ma, and the artist formerly known as Prince have in common? What is required to do life-changing work? Inspiration or Perspiration? The Seven Habits of Highly Effective People? Can everyone be a virtuoso, genius, or prodigy? Through shared assignments, the class will discuss performances and research in four different areas: "Practice and Work Habits"; "Mindfulness Techniques"; "Performance Anxiety, Stage Fright, and other Mental Blocks"; and "Flow". Videos, podcasts, live performances, trade paperbacks, websites, and academic research will inform our understanding of these topics. In addition, each student will develop two personal projects—one on cultural attitudes towards mastery, and one on a specific technique for creating better work routines, overcoming stage fright, or maintaining focus. Students from different disciplines will share their ideas with peers. Throughout, each class member will keep a daily journal, culminating in a final reflection that charts progress over the quarter. By the end of the quarter, students will integrate their research with new skills and greater awareness of their own path towards achievement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 1031 Study Abroad Perf. Attendance (0 Credits)**

Fulfills concert attendance requirement for music majors in the Study Abroad program.

**MUAC 1161 Theory at the Keyboard I (4 Credits)**

This course is the first of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

**MUAC 1162 Theory at the Keyboard II (4 Credits)**

This course is the second of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

**MUAC 1163 Theory at the Keyboard III (4 Credits)**

This course is the third of a year-long sequence of MUAC 1161-1163 Theory at the Keyboard I-III. The purpose of the class is for students to develop and apply theoretical concepts through piano playing. Each quarter, students will play chords, scales, intervals, and analyze short pieces on a regular basis. By the end of the year, students will be able to sight-read, transpose, harmonize a melody, and improvise at the piano. Students will also gain experience in using the piano as a tool for composition and arranging. Successful completion of MUAC 1163 Theory at the Keyboard III can satisfy piano proficiency requirements for undergraduate Music majors.

**MUAC 1190 Jazz at the Keyboard (4 Credits)**

This course will guide students through a study of foundational jazz piano skills. Through listening, analysis, and practice assignments, students will gain skills in basic jazz piano techniques, allowing them to demonstrate and apply chord voicings and perform melodic interpretations over standard jazz tunes, improvise using specific strategies, and display a fundamental knowledge and understanding about the history of jazz piano and its many styles. Prerequisite: MUAC 1162 Theory at the Keyboard II or instructor permission.

**MUAC 1211 Music Technology (4 Credits)**

This course is a one quarter survey exploring inventive ways today's musician/creative can incorporate technology as competitive advantage in their future careers. Musicians must be aware that emerging and disruptive technologies are moving faster than they can be assimilated. This course accelerates student functionality by providing a practical and hands-on approach to web-based professional resources, notation software, MIDI sequencing and electronic instruments, digital audio and video applications, and the laptop as a performance instrument. The course spends significant time on professional development including the design of web based promotional materials. Although tailored for music majors, this course is open to, and often taken by, non-majors.

**MUAC 1920 Basic Conducting (2 Credits)**

Introduction to techniques of conducting; a basis and prerequisite for specialized courses in choral, orchestral, and wind conducting. Prerequisites: MUAC 1001, MUAC 1002, MUAC 1003, MUAC 1020, MUAC 1021, and MUAC 1022.

**MUAC 1988 Study Abroad Resident Credit (0-18 Credits)****MUAC 2004 Music Theory II (2 Credits)**

The Fall quarter of Theory II reviews common musical progressions and places them in the context of phrase structures such as the period and the sentence.

**MUAC 2005 Music Theory II (2 Credits)**

The Winter quarter of Theory II introduces tonicization, modulation, and other chromatic techniques and applies these topics to binary forms and art song.

**MUAC 2006 Music Theory II (2 Credits)**

The Spring quarter of Theory II adds additional chromatic harmonies (e.g., Neapolitan triad) and examines complete movement forms, including ternary, rondo, and sonata forms.

**MUAC 2020 Aural Skills II (2 Credits)**

Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

**MUAC 2021 Aural Skills II (2 Credits)**

Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

**MUAC 2022 Aural Skills II (2 Credits)**

Dictation and sight singing of melodic, harmonic and contrapuntal examples from common practice period.

**MUAC 2051 Musicology: Foundations of Musicology (3 Credits)**

This course introduces students to "doing musicology." The theme is "beyond the boundaries": music is rarely neat and tidy; it defies the stereotypes, and it spills over its borders. To highlight this perspective, we focus on pieces that bring to the surface contemporary American society's code words for going beyond the boundaries: sex, drugs, and rock 'n' roll. Students develop two skills: articulating what they are hearing and connecting different approaches to understanding music (including musical style, musical structure, history, context, reception, historiography, performance practice, and music in and as culture). The course provides a rigorous background for all the following quarters of musicology coursework, which may include Western art music from the medieval period through the present, jazz and commercial music, and music from other cultures around the world.

Prerequisite for music majors: MUAC 1002 or MUAC 1014.

**MUAC 2052 Musicology: Medieval And Renaissance Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 800 to c. 1600. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2053 Musicology: Baroque Music (3 Credits)**

Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1600 to c. 1750. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2054 Musicology: Classical Music (3 Credits)**

Through the study of selected vocal, instrumental and operatic works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1750 to c. 1820. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2055 Musicology: Romantic Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1830 to c. 1890. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2056 Musicology: Modern Music (3 Credits)**

Through the study of selected vocal and instrumental works, this course explores the musical style, performance practice issues and the historical context of Western European music from c. 1890 to the present. Scores, recordings, primary sources and secondary sources accompany the textbook. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2057 Musicology: Introduction to World Musics (3 Credits)**

This course is designed as an introduction to select world music traditions and to ethnomusicology, a discipline many define as the study of music in culture. We focus on three world areas: North India, Brazil, and Senegal. For each of these units, we examine various genres and musical systems and explore music's connection to ritual, belief, aesthetic ideals, politics, and social organization, asking what makes music meaningful for practitioners and audiences. Lectures and discussions are supplemented by regular guest lecture-demonstrations, films and hands-on workshops. Because students interpret the musical works as they represent the ideas and artifacts of human culture and analyze the connections between these and varied human experiences and perceptions of the world, this course may be used to partially fulfill the general education requirement Analytical Inquiry: Society and Culture. Prerequisite for music majors: MUAC 2051.

**MUAC 2058 Jazz and Commercial Music History and Repertoire I (1900-1955) (3 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2059 Jazz and Commercial Music History and Repertoire II (1955-Present) (3 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2060 Introduction to Electronic Music/Synthesizer Programming (4 Credits)**

In this class students will learn how to create musical sounds using music synthesizers. Most modern synthesizers, whether hardware or software, are designed after paradigms established by designers of the modular analog synthesizer systems of the late 1960's (Moog, Buchla, et al.). A basic foundation of the physics of sound and electricity will comprise the first module of the course. After that follows an in depth program of training in the creation of sound using a modern modular analog synthesizer (ModCan) as well as free, open source modular synth emulation software (VCV Rack). Students will learn synthesis techniques from a historical perspective including but not limited to subtractive, additive, FM, wavetable, sample based, and granular. Modularity will be emphasized as mastery of this approach makes it possible to quickly learn any existing hardware or software synthesizer. After this class the successful student will be proficient on a wide variety of devices real and virtual, on the DAW of their choice. This proficiency will empower students who record and produce their own music in electro-acoustic, rock, or EDM genres. Class format will be lecture/lab. Students will be expected to conduct independent research and learning and contribute to class discussions. Grading will be based on the quality of your work and the quality contribution to class discussions as evidence of diligence in your independent study.

**MUAC 2061 Sound Synthesis and Electronic Music Production (4 Credits)**

In this course students will learn to create original musical and non-musical sound using virtual as well as analog and digital modular and stand-alone synthesizers. Topics include timbre creation, extensive control of parameters via MIDI plus analog patching, multi-device synchronization, MIDI and analog sequencing as well as recording, mixing, and mastering in stereo and surround in an electronic music production context. The course covers studio production as well as live performance and improvisation techniques. A software platform such as Ableton Live will be used in the class.

**MUAC 2062 Audio Engineering and Production I (4 Credits)**

In this course students will learn the foundational skills necessary to begin producing professional-quality music and sound recordings using industry-standard digital audio workstation (DAW) software. Specific attention will be given to monophonic, stereophonic, and multi-track recording and production techniques for spoken word, sound design, and classical, jazz, and popular music genres. Course content includes in-depth coverage of recording, processing, mixing, and mastering techniques, plus use of microphones, equalization, dynamics processing, effects, and mix automation. Additional topics include an introduction to MIDI (Musical Instrument Digital Interface) and use of virtual instruments and synthesis plugin software for music production. Students will use their own laptop computers but will also have access to on-campus audio production studios.

**MUAC 2063 Computer Music: Programming, Performance, and Production (4 Credits)**

In this course we will explore ways of using the Max/MSP programming environment for music- and multimedia-oriented interactive performance, composition, and improvisation including synthesis and live processing of music, sound, and video. Through learning various programming tools and techniques, students will acquire skills and direction necessary to complete an original final composition or interactive performance project. Generative techniques involving machine learning and AI will be introduced.

**MUAC 2067 Audio Practicum (1-4 Credits)**

Clinical training in audio recording and sound reinforcement for bachelor of music audio production concentration majors.

**MUAC 2068 Songwriting Workshop (2 Credits)**

Songwriting can connect our deepest sense of self to others through the art of emotive expression and the craft of creative communication and collaboration. This course focuses on growth, engagement, and connection through real-life experience, practice, and performance. Included are creative assignments, in-class performances, community performances, and recording and producing an original song in the Lamont School of Music recording studio.

**MUAC 2104 Drumming Across the Americas (4 Credits)**

This course looks at rhythm as a fundamental organizing principle for Black music, dance, and life in the Americas. We will focus on multiple percussion-and-dance traditions from North America, South America, and the Caribbean as a window onto the people, cultures, and histories of the African diaspora. We will be especially attuned to the intersection and divergence of practices across present day national boundaries, due to political shifts and alternative cultural geographies forged through ongoing circulation of people and culture throughout the hemisphere. We will also explore trans-temporal rhythmic connections between practices originating in various eras. Overall, we will consider thematic links across genres, including issues of identity (race, gender, sexuality, ability, class), technology, freedom seeking, and spirituality. We will learn by doing, with music and dance practice at the center of our meetings. We will begin our study with the Gullah-Geechee ring shout, next engage in comparative work with Afro-Puerto Rican bomba, and finally apply the rhythmic lessons learned to the contemporary electronic practices of hip hop, reggaeton, and dance hall. Guest artists will visit some of our sessions to provide additional insight and guidance in these forms. Our practice will be supported by reading, listening/viewing, and discussion about our core styles as well as others, providing a critical framework for our creation. We will also attend several performances in order to see how these practices function in a live setting. No prior experience is necessary, only a willingness to jump in!

**MUAC 2174 Music of the Civil Rights Era (4 Credits)**

The decades of the mid-20th century were an explosion of political unrest, social change, and cultural innovation. While the world was rocked by numerous anti-colonial struggles, disenfranchised populations in the U.S. forged their own battles in what is commonly referred to as the Civil Rights Era. In this course, we engage music as a way to understand this history – both as a record and agent of change. We explore a variety of music and other art from this period, including genres related to the African American freedom movement, multiracial folk revival, and Asian American, Chicano, and Women's movements. In what ways did social movements employ culture as a political tool? What do we mean by the word "political"? How can music express politics, with or without words? How might music provide an alternative record of history? In order to address these questions and more, we will engage readings on music, politics, history, and identity. We will also view, listen to, and perform the traditions we study. Ultimately, while the tale of the Civil Rights Era is often told as separate, compartmentalized struggles based around identity, our investigations will reveal the intense interracial and intercultural political solidarities and creative dialogues that took place.

**MUAC 2189 Jazz Performance Techniques (2 Credits)**

Individual study of jazz performance techniques in a directed study environment.

**MUAC 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2251.

**MUAC 2253 Hildegard: Mystic, Musician, Muse (4 Credits)**

Hildegard of Bingen was a polymath even by the standards of her own era, the twelfth century. She was active as a musician, artist, mystic, theologian, natural healer, philosopher, and diplomat. This interdisciplinary team-taught course will read across many academic fields of study including religion, women/gender/sexuality studies, music, and art history as well as primary sources. Students will experience 12th century scholarly and every-day practices through in-class projects such as manuscript illumination or cookie baking, and participate in experiential learning through journaling, meditation, and singing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2260 Music, Race, and Ethnicity in Latin America (4 Credits)**

In this class, music-culture is a medium to understand how people in Latin America maintain religions, strengthen social relations, and negotiate their racial and ethnic identities in the context of social inequality, racial discrimination, and land disposition. Concepts such as mestizaje, creolization, and "blackness" will be examined in the context of nation formation, the inheritance of colonialism, and the spread of neoliberalism while students will engage critically in readings coming from ethnomusicology, anthropology, ethnic and racial studies, as well as history, and geography. The lectures are multimedia, including visiting performers and speakers. As such, this class is a great introduction to explore music-culture, race, and ethnicity in Latin America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2390 Music in Jewish Spiritual Life (4 Credits)**

This course exposes students to the variety of music and musical practices encountered in contemporary Jewish worship spaces, broadly defined. In addition to standard academic modes of learning, the course has an extensive experiential component in which students sing, chant, and meditate together for long durations without inhibition. The "Jewish worship spaces" in question have diverse geographical origins, ranging from North America and Eastern Europe to communities with origins in North Africa and the Middle East, and students will learn of the musicians involved, the liturgy they sing, their historical lineages, approaches to pitch organization and meter, and relationship to past practices. Assessment is made through writing assignments (an essay on music and spirituality, an album review, and a listening journal), midterm and final exams, moderation of class discussions of reading and music, and participation in experiential components of the course. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUAC 2413 Vocal Literature Survey I: Italian and English Composers (1 Credit)**

This course is a Vocal Literature Survey of Art Songs in English, Italian, concentrating on the works of composers of the 18th century, the Romantic Era (19th century), and composers of the 20th and 21st centuries.

**MUAC 2414 Vocal Literature Survey II: German and French Composers (1 Credit)**

This course is a Vocal Literature Survey of Art Songs in German and French, concentrating on the works of composers of the 18th century, the Romantic Era (19th century), and composers of the 20th and 21st centuries.

**MUAC 2415 Acting and Movement for the Stage I (2 Credits)**

In this beginning course, students develop a basic understanding of stagecraft, and stage terminology. Various skills that are taught in successive quarters, such as theatre games, body movement, character research, and audition techniques, are introduced at this time. Body movement and specific dance forms used in opera will be discussed as well as monologue and scene work.

**MUAC 2416 Acting and Movement for the Stage II (1 Credit)**

In this continuing course, students develop a more advanced understanding of stagecraft and stage terminology. Various skills that are taught in successive quarters, such as theatre games, body movement, character research, and audition techniques, are introduced at this time. Body movement and specific dance forms used in opera will be discussed as well as monologue and scene work. Prerequisites: Acting and Movement I (MUAC 2415).

**MUAC 2820 Introduction to Piano Pedagogy I (2 Credits)**

Philosophy and psychology of teaching, basic skills in recognition of students' strengths and weaknesses, assessing musical and technical abilities, problem solving; in-class opportunities to teach followed by critical analysis; related readings, projects. Required for piano pedagogy majors.

**MUAC 2821 Introduction to Piano Pedagogy II (2 Credits)**

Philosophy and psychology of teaching, basic skills in recognition of students' strengths and weaknesses, assessing musical and technical abilities, problem solving; in-class opportunities to teach followed by critical analysis; related readings, projects. Required for piano pedagogy majors.

**MUAC 2940 Choral Conducting (2 Credits)**

Beginning course in choral conducting. Fall quarter only.

**MUAC 2950 Orchestral Conducting (2 Credits)**

Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Prerequisite: MUAC 1920 Basic Conducting. Spring quarter only.

**MUAC 2970 Wind Conducting (2 Credits)**

Beginning course in wind conducting. Winter quarter only.

**MUAC 2988 Study Abroad Resident Credit (0-18 Credits)****MUAC 3002 Form and Analysis (4 Credits)**

Analysis of structural elements and stylistic features in solo, chamber and orchestral literature from 1600 to present. Prerequisite: MUAC 2006.

**MUAC 3006 Post-Tonal Theory: Mode/Rhythm (4 Credits)**

Works of Stravinsky, Bartok, Satie, Debussy, and others are studied, employing various transformational theories, diatonic set theory, and 20th-century metric theories. Prerequisite: completion of Music Theory I and Music Theory II sequences.

**MUAC 3007 Post Tonal Theory and Analysis: Set Theory and Serialism (4 Credits)**

This course has two components: (1) A study of selected analytical techniques for post-tonal music, primarily pitch-class set theory and twelve-tone (serial) theory; (2) Analysis of representative works from the twentieth century, focusing on the music from the first half of the century (Schoenberg, Berg, Webern, Stravinsky, and Bartok). Six credits of Theory 2 or permission of instructor required. Cross listed with MUAC 4007.

**MUAC 3008 Modal Counterpoint, Renaissance Vocal Style (4 Credits)**

This course teaches students to compose vocal music in the Renaissance style. After surveying species counterpoint, students learn imitative techniques en route to composing three- and four-voice textured pieces. Cross Listed with MUAC 4008.

**MUAC 3009 Pedagogy of Music Theory (4 Credits)**

Materials, devices, techniques of teaching theory. Students must have successfully completed undergraduate music theory or passed graduate review theory. Cross listed with MUAC 4010.

**MUAC 3014 Music-Theoretical Approaches to Popular Music (4 Credits)**

This course is an environment for engaging with generating music-theory scholarship on popular music. "Popular music" in this context refers to commercially successful music (e.g., hip-hop, rock, pop, country, etc.) as well as the predecessors of those genres (e.g., bluegrass, funk, soul, etc.). The course surveys a scholarly ecosystem that includes both analytical methods designed for older repertoires as well as newer methods that engage popular music's current particularities. These methods explore form, rhythm and meter, timbre, modality, harmony, race & ethnicity, gender & sexuality, interaction & improvisation, music instrument studies, text expression, multimedia, music & technology, philosophical concerns of ontology and groove, and more. The structure of the course is not set by the instructor in advance. Rather, the instructor and individual students will devise a grading contract in the first week that guides the topics in which the students will complete their work. The aim of the work is the further students' scholarly agendas and improve their capacity to read and present secondary scholarship, write and present their own scholarship, transcribe music, and provide feedback to their peers. Cross Listed with MUAC 4014.

**MUAC 3023 Rhythm & Meter in Music (4 Credits)**

Rhythm pertains to experienced or measured durations in music. Meter pertains to the cyclic organization of music's durations. A hegemonic view of meter emerged in music theory and related disciplines in the mid-20th century, one most appropriate to Western classical music and, to a lesser extent, Anglo-American popular music. This view holds that meter "in music" consists of (1) hierarchically arranged beats (2) whose durations are nominally equivalent and (3) whose onsets among coordinated musicians are nominally aligned. This course examines rhythm and meter by interrogating three components of the standard view of the topic. Looking at Western classical music, but also traditional and commercial music from Africa and the African diaspora, we will explore the nature of meter and rhythm in music where durations might not be arranged hierarchically, of equal length, or aligned.

**MUAC 3025 Topics in Analysis: Brahms (4 Credits)**

This course explores a variety of analytical techniques used to understand the compositions of Brahms. We examine works by musicologists and theorists such as Allen Forte, Walter, Frisch, Arnold Schoenberg, Carl Schachter, and David Lewin. Issues discussed include developing variations, rhythm, form, and ambiguity in Brahms. We cover a wide range of repertoire, ranging from piano works to choral works to symphonies.

**MUAC 3026 Sonata Form (4 Credits)**

This is a team-taught course on the topic of "sonata form," one of the central musical structures in classical Western art music, from Mozart to Brahms and beyond. The course will feature a dialogue between history, analysis, and performance, reflected in class activities at multiple levels.

**MUAC 3027 Arranging for the Classical Musician (4 Credits)**

Music initially created for one context becomes music for a new context through the art of arranging. How much of your professional life will you spend performing or teaching arrangements? Have you ever thought about writing your own? Is an arrangement automatically less worthwhile, or can it ever surpass the quality of the original? Class sessions will be spent studying arrangements of music by Bach, Björk, Chopin, Michael Jackson, Mahler, et al. as arranged by Brahms, Jacob Collier, Gil Evans, The Piano Guys, Ravel, and others. Students will also receive individual guidance as they plan, write, and perform arrangements of pieces and songs of their choice.

**MUAC 3030 Seminar-Performance Psychology (2 Credits)****MUAC 3058 Audio Production III (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the second sequence in the audio production concentration.

**MUAC 3059 Audio Production II (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the first sequence in the audio production concentration.

**MUAC 3061 Audio Production I (4 Credits)**

An introduction to analog and digital synthesis, MIDI sequencing, and DAW software.

**MUAC 3064 Audio Production IV (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as on-site training at Lamont School of Music performances. This is the third sequence in the audio production concentration.

**MUAC 3065 Audio Production V (4 Credits)**

This course covers theory in audio engineering and provides hands-on training in professional audio engineering for studio sessions and live events. Students receive classroom instruction as well as onsite training at Lamont School of Music performances. This is the fourth sequence in the audio production concentration.

**MUAC 3066 Audio Production VI (4 Credits)**

This course is an advanced seminar wherein students propose and execute complex, professional level audio production projects toward the goal of establishing a professional audio production portfolio. Students may also incorporate pre-production work in preparation for the audio production concentration senior project. Students serve as engineers and producers at Lamont School of Music recording sessions and live performances.

**MUAC 3087 Intermedia Arts and Cross-Disciplinary Creativity (4 Credits)**

In this course we will focus on intermedia and interdisciplinary artistic practices through the study of boundary crossing works drawn from sonic arts, multimedia opera, and dance. We will study artists who have combined their work as musicians with other kinds of mediums and disciplines to create uniquely individual artistic practices. We will also be considering what issues arise when working across disciplines and how to foster effective collaborations. Course assignments will give students opportunities to explore their own cross-disciplinary interests and creativity. As a main assignment, each student will develop an intermedia or interdisciplinary project suited to their individual interests and aimed at enhancing their work as musicians.

**MUAC 3088 Composing for Voice: Approaches by Contemporary Female Composers (4 Credits)**

This course focuses on composing based on pre-existing models. Students will compose works for voice studying varying approaches by contemporary female composers.

**MUAC 3092 The Business Side of Music (4 Credits)**

A personal and clinical approach to developing music business skills and strategies.

**MUAC 3121 Seminar in Music Theory (4 Credits)**

Seminar in Music Theory focuses on special topics chosen by faculty members. Students should expect rigorous course work and a final project or paper. Cross listed with MUAC 4121.

**MUAC 3122 Spectral and Microtonal Music (4 Credits)**

This course will follow composers' departure from equal temperament and conventional notions of pitch and harmony (tonal or atonal) in the 20th and 21st centuries, focusing particularly on spectral and microtonal music. Spectral music – in the most general sense – is music that focuses on timbre above all other musical parameters and derives its musical material from the acoustic properties of sound itself (sound spectra), the overtone series, electronic music techniques, and psychoacoustics. Though spectralism was initially developed by a small group of young Parisian composers in the 1970's, its influence has since spread around the world, seemingly achieving wider use and acceptance with each new generation of composers. Microtonality describes a wide array of disparate practices, including those influenced by early music, non-Western music, studies of acoustics, and more intuitive approaches. Over the quarter, we will consider the different ways composers have incorporated these ideas into their music through listening, score study, readings, and analysis.

**MUAC 3124 Composition Seminar (1 Credit)**

Composition Seminar focuses on the reading and performance of modern scores by Lamont and recognized composers. Any student composing music or wishing to perform new compositions at Lamont may register and participate. Requirements for composers include the completion, rehearsal and performance of a piece of music at the New Music Ensemble concert each quarter. Non-composers are required to rehearse and perform at the New Music Ensemble concert. Composers enrolled in the ensemble may be required to play compositions submitted as well.

**MUAC 3161 Topics in Modern Opera (4 Credits)**

This course involves the close study of selected twentieth- and twenty-first-century operas, their respective musical styles and their videotaped performances. This study will include such issues as opera and film, opera libretto criticism, and the personal and public politics of the opera.

**MUAC 3204 Afrofuturism in Music (4 Credits)**

Numerous Black artists have used images of space travel, extraterrestrials, mysticism, the future, science fiction, and technology in their creations. This course will examine the recurrence of these elements in African diasporic music, focusing on genres including jazz, funk, hip hop, and experimental music. How have artists' racialized views of the future served to critique their contemporary worlds and pose radical visions of the future? In what ways has Black music shaped and been shaped by recording and other technologies? What are "technology" and "Blackness," and how can one help us to understand the other? To answer these questions, we will engage a variety of readings on music, race, gender, sexuality, sound technology, and cyber-theory and view/listen to key Afrofuturist performances. We will also engage in our own music making (no experience required). In all, we will come to better understand the long encounter between people of the African diaspora and the so-called modern world.

**MUAC 3212 Digital Music Creation (4 Credits)**

In this course, students will create, produce, and present their own digital music. Using one of the industry's leading digital music creation platforms (such as Ableton Live), students will learn the history of electronic music creation, create their own digital music portfolios, become familiar with relevant copyright issues, and oversee public performances of their music.

**MUAC 3240 Vocal Pedagogy I (1 Credit)**

Psychological and physical aspects of teaching of singing.

**MUAC 3241 Vocal Pedagogy II (1 Credit)**

Psychological and physical aspects of teaching of singing.

**MUAC 3243 Recitative in Opera (2 Credits)**

Working as a professional singer your proficiency with recitative should be high. Though a major part of many operas recitative is still often overlooked as a skill set. Through this course we will explore several different approaches to recitative from various compositional styles and time periods.

**MUAC 3282 Suzuki Violin Seminar II (2 Credits)****MUAC 3283 Suzuki Violin Seminar II (2 Credits)****MUAC 3284 Suzuki Violin Seminar II (2 Credits)****MUAC 3439 Teaching Note Reading (2 Credits)****MUAC 3460 Suzuki Cello Practicum (1 Credit)**

The Suzuki Cello Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and philosophy covered in the seminar classes. The course will also include some lecture and discussion on developing teaching strategies for effective technical development and communication in lessons.

**MUAC 3463 Suzuki Cello Seminar I (2 Credits)****MUAC 3464 Suzuki Cello Seminar I (2 Credits)****MUAC 3465 Suzuki Cello Seminar I (2 Credits)****MUAC 3466 Suzuki Cello Seminar II (2 Credits)****MUAC 3467 Suzuki Cello Seminar II (2 Credits)****MUAC 3468 Suzuki Cello Seminar II (2 Credits)****MUAC 3470 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3471 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3472 Suzuki Violin Seminar I (2 Credits)**

Comprehensive study of Suzuki philosophy, repertoire and teaching techniques for violin. Offered fall, winter, and spring quarters. May be repeated for credit.

**MUAC 3477 Suzuki Violin Practicum (1 Credit)**

The Suzuki Violin Practicum is designed to give the students enrolled in the Suzuki Seminar classes a forum to practice teaching using the pedagogical points and teaching philosophy covered in the seminar classes. The course will include some lecture focusing on teaching strategies for effective technical development and effective communication in the lessons. Prerequisite: MUAC 3470.

**MUAC 3492 History of Opera: From Monteverdi to Minimalism and Beyond (4 Credits)**

This seminar course surveys the history of opera from the invention of the genre c. 1600 to the present day. In addition to assigned excerpts, students view three complete operas during the quarter. Primary and secondary source readings supplement the required text and class lectures. Students write a research paper that may examine some aspect of a particular opera or that may compare a particular aspect found in several operas. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3493 Approaches to American Popular Music (4 Credits)**

We explore a number of topics involved in the study of popular music, including tensions between analytical and cultural approaches; issues of race, class, and gender; and constructions of authenticity and personae. Listening and reading are wide-ranging, encompassing diverse styles. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3494 Music and Belief in World Cultures (4 Credits)**

How does music affect religious experience and how does religion shape musical practice? Why is music vital in some religious rituals and expressly banned in others? If humans use music to create, reflect, and comment upon the worlds they experience and imagine, then the use of music in religious practice is among its most powerful and ephemeral. Students are introduced to a wide range of musical traditions and their relationship to many of the world's religions, including Islam, Judaism, Christianity, Buddhism, Hinduism, Native American belief and the religious practices of Africa and its diaspora. Readings, lectures and discussions are supplemented by guest lecture demonstrations, film/video screenings and hands-on workshops. Prerequisite: Junior or senior standing required; sophomores allowed with instructor approval.

**MUAC 3497 Studying Music in the Field: Theory and Method in Ethnomusicology (4 Credits)**

This course introduces issues that motivate ethnomusicological research and techniques for carrying out fieldwork, the ethnographic method which has largely come to define the discipline. Our primary texts include Bruno Nettl's classic text, *The Study of Ethnomusicology*, and *Shadows in the Field*, a seminal volume of essays discussing ethnomusicological fieldwork. This course also involves hands-on experience in some of the major fieldwork techniques, including field observation and writing fieldnotes, musical transcription and interviewing. This course culminates in a field research project in a Denver musical community determined in consultation with the professor. Note: this course is not open to freshman; sophomores with permission of instructor.

**MUAC 3498 Music, Dance, and Everyday Life in South Asia (4 Credits)**

This course serves as an introduction to a diverse array of performance traditions from the South Asian subcontinent. We examine the significance of music and dance in everyday life, the influence of media technology, and the relationship of performance to issues such as caste, gender, nationalism and globalization. Class discussions are supplemented by guest lectures, hands-on workshops and film screenings. Our study of music outweighs that of dance, and a music background is strongly encouraged. This course is not open to first-year students. Sophomores allowed with instructor approval.

**MUAC 3499 Topics in Musicology (4 Credits)**

This course focuses on particular musicology topics determined by the instructor. Course materials may include primary and secondary source readings, theoretical writings from other disciplines, a variety of listening assignments, film/video screenings, guest lecture demonstrations, and hands-on workshops. Students are expected to participate in class discussions and may be asked to write short response papers and/or to give short oral presentations. The course concludes with individual research projects, presented orally and in written form, on topics chosen and developed in consultation with the instructor. Expectations for graduate students enrolled in the course are commensurate with their training and background as compared to undergraduates enrolled in the course. In some cases, with the prior consent of the instructor, students may choose to combine performance with the final research project. Prerequisite: Junior standing.

**MUAC 3502 Gender & Genre in World Music (4 Credits)**

How are concepts of "maleness," "femaleness" and other gendered categories constructed, maintained, and contested through musical performance? This course examines the issues explored and debated in recent studies of gender relation to music of various cultures including Western art music, popular music, and other world genres. We focus on reading and discussion of ethno-musicological and anthropological ethnographies, musicological studies focusing on gender and theoretical writings from gender and women's studies. Lectures and discussions are supplemented by guest lecture-demonstrations, film/video screenings and hands-on workshops. This course is not open to freshman. Sophomores can register with instructor approval.

**MUAC 3503 Black Music and Abolition (4 Credits)**

From spirituals to jazz to funk to hip hop, music created by or associated with Black people has long been intertwined with notions of freedom. This seminar explores the ways in which Black music has been a site for working out the possibilities and pitfalls of liberation. In particular, we will trace the histories of U.S. abolition movements (against slavery, police, and prisons) and ongoing musical and non-musical efforts to eradicate oppressive institutions. Examining a variety of sonic practices—from the colonial period to today—we will ask: In what ways has sound been used to contest, dismantle, or reinforce systems of oppression? How might Black musical history provide a window onto present calls to defund police departments, pay reparations, build new systems for community care, and ensure that Black lives matter? How might music offer a unique method, approach, or context for abolitionist conversations? We will explore these questions through scholarly and popular readings, media examples, discussion, written reflections, and creative exercises. Finally, we will examine our own identities, scholarship, and creative work to explore our relationship to Black music and social justice, interrogating how we might or might not engage in contemporary abolitionist dialogues.

**MUAC 3511 Mahler and Musical Culture (4 Credits)**

We explore Gustav Mahler's life, historical context, and music, all in relation to one another. The focus is on recent and important scholarly approaches to this conductor and composer. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3512 Stories of Music History (4 Credits)****MUAC 3513 Wagner and the Ideology of the Artwork (4 Credits)**

We explore Richard Wagner's music dramas, particularly the Ring operas, as well as theories and ideologies surrounding them. The focus is on recent and important scholarly approaches. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3520 Topics in Baroque Music (4 Credits)**

Through the study of selected Baroque instrumental, vocal and operatic works, this seminar course considers various approaches to performance practice issues such as "authenticity," the "historically informed" performance, period instruments, ornamentation, continuo realization, and editing. Facsimile editions and primary and secondary source readings serve as the texts for the course. Students write a research paper that examines some aspect of Baroque music with an emphasis on performance practice. With the prior consent of the instructor, students may submit an alternative final project, one that combines performance with some form of written work.

**MUAC 3521 Topics in World Music (4 Credits)****MUAC 3525 Four Books on Music: An Essential Reading List for Musicians (4 Credits)**

Think of this course as a book club curated just for young musicians. In a fast-paced world where information hits us from all sides in small packages, this class will slow down and savor just four books that we will read cover to cover. Silence your phone and lengthen your attention span as we grapple with some of the biggest questions about music making, musical training, the music industry, and more. I've chosen four books that I think offer life-changing value to every musician. We'll read an 18th-century guide to being a musician, a recent book about how the classical music industry is adapting to the changing economic landscape, an anthropological dissection of an orchestra concert, and even a novel about the power of music and voice in the 1960s. The class will involve a lot of reading but not research. Instead, we will focus on wide-ranging discussions and reflection, just like a book club. Feel free to bring your own tea and cookies!.

**MUAC 3536 Topics in Hindustani Music (4 Credits)**

This course explores the melodic system (raga) and rhythmic system (tala) of Hindustani music, the classical music of North India. These conceptual frameworks act both as sound structures to be realized in improvised performance and as aesthetic entities manifested in the related traditions of dance, iconography, and film. A major emphasis of this course is developing an understanding of raga and tala as musical structures through intensive listening as well as practical instruction. Accordingly, each class incorporates hands-on music-making through singing, rhythmic exercises, and/or dance. By the end of the term, students will become familiar with several ragas and talas and the stages by which they are developed in performance. A second, equally important objective is to learn to appreciate ragas as aesthetic entities. We analyze their musical characteristics as well as the "extra-musical" characteristics of sentiment (rasa), performance time and/or season and iconographic associations (ragamala painting). Must be at least junior standing or obtain instructor approval.

**MUAC 3537 Crouch, Hawkins, and Smallwood: Three Pioneers in Contemporary Gospel Music (4 Credits)**

Andraé Crouch, Walter Hawkins, and Richard Smallwood have each influenced the course of black gospel music for the last 50 years. Through listening to recordings, watching video performances, score analysis, readings, performance, and improvisation, this course will examine the music of these unique composer/performers and how their contributions have impacted black gospel music. Rather than simply read about and analyze the music, students will play the music of these composers and literally have hands-on experience with the colors and textures of the music that has shaped church music and the gospel music industry for the last five decades.

**MUAC 3538 Psalms, Hymns, and Spiritual Songs: The Music of the African American Worship (4 Credits)**

This course is an experiential exploration of the spirituality of African-American sacred song. Participants will sing, consider the history of the music and explore their own connection to the songs, as well as the inspiration and challenge these songs may offer to present and future communities. Cross listed with MUAC 4537.

**MUAC 3539 Music, Politics, and Policy (4 Credits)**

This course examines the ways in which policies and politics engage with popular, jazz, folk, and classical musics around the world. Students will explore contemporary and historical cases in which governments and NGOs foster, transform, reject, and otherwise use musics to promote their own ideas about local economies, national cultures, diplomacy, democracy, innovation, cultural diversity, and even criminal law. We ask, can music promote peace? Democracy? How? How do governments create local and national music scenes? Which local and national cultures do they promote and protect? To what end? We look at how the Cuban government has embraced rap music as emblematic of the nation's revolutionary ethos; how the United States government used jazz as a diplomatic tool during the Cold War; how NGOs in Israel and Palestine used popular and classical musics to promote peace and understanding; how American courts have used rap music as evidence in criminal cases; and how funding and intellectual property laws impact musical ownership, tradition, innovation, and creativity. Cross listed with MUAC 4539.

**MUAC 3544 Music and Activism (4 Credits)**

In many times and places, people around the world sing, chant, and drum in the streets. Their lived experiences don't line up with the equality and opportunity their governments claim to champion. Music is an integral part of their advocacy work. They play and sing as they draw attention to injustices, foster cohesion and community, communicate messages (both covertly and forcefully), express pain, joy and pride, energize and sustain themselves, as well as (de)humanize themselves and others. This course explores the special place music has in activism around the world. We examine protest movements such as the South African anti-apartheid movement, the American Abolitionist and Civil Rights movements, American/European White Nationalist movements, the Arab Spring, and the worldwide Black Lives Matter movements. We will explore community music projects with social justice agendas such as Youth on Record, The Spirituals Project, and the West-Eastern Divan Orchestra. We ask, why is music a particularly important part of activist work? What special place does it have? How is it used for both good and bad? For community mobilization, peace, and violence? Drawing on the fields of ethnomusicology, musicology, and cultural policy, we explore music, not just as a means to achieve certain ends, but as integral to the way humans position themselves in the world and advocate for themselves and others. Cross listed with MUAC 4540.

**MUAC 3577 Advanced Engraving and Notation (4 Credits)**

This course will focus on creating scores and parts that are professional, clear, reflective of your individuality and artistry, and able to express any unconventional or difficult-to-notate idea you may need to express.

**MUAC 3578 Advanced Composition (4 Credits)**

Advanced composition with students composing works of large scope and using a variety of advanced techniques consistent with interests and abilities; emphasis on imagination and originality of personal expression.

**MUAC 3590 Guitar History (4 Credits)****MUAC 3630 Basic Jazz Arranging (2 Credits)**

A study and practical analysis of the foundational techniques involved with composing and orchestrating for small group jazz ensembles. This course will cover the basics of form, notation, and orchestration in the small group jazz idiom, consisting of one to four horns and/or vocals, guitar, piano, bass, and drums.

**MUAC 3650 Orchestral Excerpts-Cello (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3655 Orchestral Excerpts-Bass (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock audition and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3660 Orchestral Excerpts-Violin (4 Credits)**

This course will explore excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students will be given a list of excerpts and coached on how to prepare them. They will participate in mock auditions and receive feedback. This course will also address the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3661 Orchestral Excerpts Viola (4 Credits)**

This course explores excerpts from the standard orchestral literature, highlighting favorite audition materials of the major symphony orchestras. Students are given a list of excerpts and coached on how to prepare them. They participate in mock auditions and receive feedback. This course also addresses the mental aspects involved in taking successful auditions and the expectations demanded of them in the professional world of orchestras.

**MUAC 3662 Orchestral Studies for Brass (2 Credits)**

Study of orchestral literature brass players are likely to be asked to play at auditions for professional orchestras. Undergraduate participants should have passed their Sophomore Proficiency jury with distinction.

**MUAC 3663 Orchestral Excerpts, Viola II (4 Credits)**

Companion course to Orchestral Excerpts Viola I, this section expands the repertoire list beyond the standard works used for auditions today. In addition to further honing basic requisite material from section I, students study and prepare less frequently required works and principle viola solo repertoire. There is more extensive discussion of the audition process and mock auditions as a part of the course. While it is advised and preferable that students complete the first section of this course it is possible to take the course with the approval of the instructor.

**MUAC 3682 Topics-Orchestral Repertoire (4 Credits)**

We explore the history of the orchestra and orchestral literature from the baroque through modern eras, and examine a number of test cases in which conventional understanding has been challenged in recent years. The course concludes with individual research projects and presentations on topics students choose and develop.

**MUAC 3684 Choral Literature I (2 Credits)**

This course is an analysis of the development of choral repertoire from the Middle Ages through the Baroque era.

**MUAC 3686 Choral Pedagogy I (2 Credits)**

The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

**MUAC 3688 Choral Pedagogy II (2 Credits)**

The Choral Pedagogy course focuses on effective choral methods and techniques indigenous to primary schools of thought that have risen to prominence or have proven successful in practice and performance throughout the last 50 years in the academic and professional choral idiom. Through study and analysis of selected works by various composers, effective teaching techniques are explored in performance practice and style interpretation.

**MUAC 3689 Choral Literature II (2 Credits)**

This course is an analysis of the development of choral repertoire from the Classical period until the present day. This course is meant to be taken in sequence after Choral Literature I.

**MUAC 3698 Carillon History and Mechanics (4 Credits)**

A survey of the evolution of signal bells into the musical instrument known as the carillon. This subject is often called "campanology." The history will be traced from the 16th century in the Low Countries through modern times in Europe, North America, Australia/New Zealand and Japan. Topics will include bell foundries, bell casting and tuning, bell chambers, playing actions, carillonneurs, carillon schools, carillon organizations, the use of the carillon in its various regions and basic carillon maintenance.

**MUAC 3700 Carillon Repertoire (4 Credits)**

A survey of the music expressly produced for carillon from the earliest times through the present. Categories include automatic music (e.g., De Sany, Wyckaert, Eggert), the earliest compositions for manual play (Van den Gheyn and the Louvain manuscripts of the 18th century), and the 20th-century categories: Flemish, Dutch, French and North American. Mainstream publishers as well as incidental publications will be covered. The labs will focus on analysis through recordings and live performances by participants.

**MUAC 3706 Pedagogy & Repertoire Tuba (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the tuba.

**MUAC 3708 Pedagogy & Repertoire Horn (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the horn.

**MUAC 3710 Carillon Pedagogy I (2 Credits)**

An exploration of the physical and psychological elements that can lead to effective carillon teaching: technique, handling/pedaling ("fingering" on the piano), and developing an attitude that fosters successful performance.

**MUAC 3712 Pedagogy & Repertoire Trombone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the trombone.

**MUAC 3718 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3719 Pedagogy & Repertoire Percussion (4 Credits)**

Teaching techniques and survey of literature and teaching materials for percussion.

**MUAC 3724 Pedagogy & Repertoire Guitar (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the guitar.

**MUAC 3730 Pedagogy & Repertoire Cello (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the cello.

**MUAC 3733 Pedagogy & Rep Double Bass (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the double bass.

**MUAC 3736 Pedagogy & Repertoire Harp (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the harp.

**MUAC 3737 Pedagogy & Repertoire Harp (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the harp.

**MUAC 3738 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3739 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3740 Pedagogy & Repertoire Organ (2 Credits)**

Teaching techniques and survey of literature and teaching materials for the organ.

**MUAC 3742 Pedagogy & Repertoire Trumpet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the trumpet.

**MUAC 3748 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3749 Pedagogy & Repertoire Flute (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the flute.

**MUAC 3751 Pedagogy & Repertoire Clarinet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the clarinet.

**MUAC 3752 Pedagogy & Repertoire Clarinet (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the clarinet.

**MUAC 3754 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3755 Pedagogy & Repertoire Saxophone (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the saxophone.

**MUAC 3757 Pedagogy & Repertoire Oboe (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the oboe.

**MUAC 3758 Pedagogy & Repertoire Oboe (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the oboe.

**MUAC 3761 Pedagogy & Repertoire Bassoon (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the bassoon.

**MUAC 3762 Pedagogy & Repertoire Bassoon (4 Credits)**

Teaching techniques and survey of literature and teaching materials for the bassoon.

**MUAC 3765 Professional Brass Techniques (4 Credits)**

This 4-hour per week course will be divided into a lecture/seminar for two hours and performance practicum for two hours. Topics discussed and performed include orchestral playing, sight reading, practice, solo performance, jazz survival, ornamentation, transposition, and warm-up/maintenance routine.

**MUAC 3801 Introduction to Schenkerian Analysis (4 Credits)****MUAC 3804 Topics in Music (1-5 Credits)****MUAC 3810 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3811 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3812 Voice Repertoire (2 Credits)**

Styles, periods and traditions of vocal repertoire from earliest music to contemporary compositions.

**MUAC 3822 Piano Repertoire I (2 Credits)**

Performance and analysis.

**MUAC 3823 Piano Repertoire II (2 Credits)**

Performance and analysis.

**MUAC 3824 Piano Repertoire III (2 Credits)**

Performance and analysis.

**MUAC 3828 Songwriting Exploration I: Pop, R&B, & Hip hop (2 Credits)**

Songwriting Exploration I is an intermediate to advanced level course for songwriting Pop, R&B, and Hip hop styles. This course focuses on developing the skills necessary for writing thought provoking, creative, and fun songs to compete in today's popular music market. Students will learn song forms and creative lyric writing techniques used by successful songwriters to create hit songs. Students will also learn instrumentation, chord progressions, and the importance of rhythms that are commonly heard in the Pop, R&B, and Hip hop genres. This course will involve video and listening examples of classic and modern songs, in-class discussions, online assignments, student collaboration projects, and in-class presentations/performances of original works. Students will also receive online resources on music technology (electronic instruments) and software that current songwriters/producers are using to create basic recordings at home using a computer and DAW (Digital Audio Workstation). During the final week of the course, students will have an opportunity to record their songs in the Lamont recording studio on a pre-scheduled date or record at home.

**MUAC 3829 Songwriting Exploration II (2 Credits)**

MUAC 3829 is an intermediate to advanced level course for songwriting in Contemporary Jazz/Fusion, World, Pop, Rock, and R&B styles. This course focuses on developing the skills necessary for writing thought-provoking and creative songs to compete in today's contemporary and jazz market. Students will analyze more complex song forms, harmony, and creative lyric writing techniques used by successful songwriters. Students will also learn instrumentation, advanced chord progressions, and the importance of rhythms that are commonly heard in the Jazz, World, Pop, Rock and R&B genres. This course will involve video and listening examples of classic and modern songs, in-class discussions, transcription assignments, student collaboration projects, and in-class presentations/performances of original works. Students will also receive online resources on music technology (electronic instruments) and software that current songwriters/producers are using to create basic recordings at home using a computer and DAW (Digital Audio Workstation). During the final week of the course, students will have an opportunity to record their songs in the Lamont recording studio on a pre-scheduled date or record at home. Course Objectives and Relationship to Total Departmental Offerings • Establish and build upon techniques to write creative and compelling lyrics to compete in the modern contemporary music industry • Traditional and modern approaches to songwriting • How to write compelling melodies for lyrics • How to apply advanced harmonic devices and chord progressions to accompany lyrics • Techniques used by successful songwriters past and present • Collaborating with other writers, composers, and producers for projects through interaction with classmates and discussions • Perform works for an audience through in-class performance and other potential performance opportunities • Basic recording techniques for a professional recording studio or home studio • Compose and perform/record 4 songs (undergrad) or 5 songs (graduate) This is a new course being offered by a new faculty member in their area of expertise. This faculty member already offers a 2000 level class in songwriting and recently added the first part of a Songwriting sequence for Winter quarter (covering different writing styles and serving as the prerequisite for this new course). This class is an upper-division class exploring more advanced songwriting techniques and additional styles compared to what was covered in Songwriting Exploration I.

**MUAC 3830 Advanced Jazz Arranging I (2 Credits)**

A study and practical analysis of small to medium jazz ensemble writing with extended instrumentation. Consisting of nonette-style orchestration including orchestral instruments such as horn, tuba, woodwinds, and voice along with extended electronic textures, this course will cover the basics of form, notation and orchestration in the 21st Century hybrid small to medium size jazz ensemble idiom.

**MUAC 3831 Advanced Jazz Arranging II (2 Credits)**

A study and practical analysis of large "studio orchestra" type jazz writing with extended instrumentation. Consisting of medium to full orchestral string section, woodwinds, harp, percussion, brass plus jazz rhythm section, voices, and soloists. Exemplified by such modern ensembles as Snarky Puppy with the Metropole Orchestra, this will be a full studio orchestra with modern 21st Century jazz, rock, and pop sensibilities. String bowings and aspects of dynamic ensemble balances in the studio orchestra will be studied, as well as writing for the harp.

**MUAC 3832 Arranging for Computer-Based Media (2 Credits)**

This course will be an introduction to techniques of composition and arranging music for media, with an emphasis on practical assignments that the student will encounter in the professional world of media composition. Students will learn how to work in collaboration with filmmakers, master techniques of timing and synchronization, use traditional techniques of composition/arranging/orchestration to serve dramatic needs, and work efficiently in the recording studio under time and budget restraints.

**MUAC 3844 The Artist Entrepreneur (2 Credits)**

The Artist Entrepreneur is a course of study that examines the full spectrum of attributes and skills necessary for a student to “survive and thrive” in the every-changing landscape of the 21st Century. With a two-fold approach of examining effective strategies for a “modern artistry mindset” along with extensive case studies of successful 21st Century professionals, this course will offer the student a wide array of important recourses to guide their career. The case study aspect of The Artist Entrepreneur will be based on multiple evaluations of successful artists in the 21st Century in partnership with local presenters.

**MUAC 3845 Writing for The Modern Large Jazz Ensemble I (2 Credits)**

A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Frank Foster, Sammy Nestico, Slide Hampton, Bob Brookmeyer and other modern practitioners. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

**MUAC 3846 Writing for the Modern Large Jazz Ensemble II (2 Credits)**

A study and practical analysis of the major methods for writing for the modern large jazz ensemble (big band) as exemplified by Bob Brookmeyer, Maria Schneider, Gil Evans, Darcy James Argue, and others. A special emphasis will be placed on creating full works for the large jazz ensemble that uses textures and modern extended form approaches indicative of these artists. Application of analysis will be in the form of a complete arrangement or original composition for modern big band.

**MUAC 3860 Basic Jazz Improvisation (4 Credits)**

The study of jazz improvisation techniques and forms. Open to music majors or by instructor permission.

**MUAC 3870 Jazz Improvisation & Composition (4 Credits)**

Improvisational styles of major jazz soloists studied through transcription and analysis of selected recorded jazz solos; scales and modes; rhythmic styles and devices; practice and development of individual student’s improvisational technique. Prerequisites: MUAC 1011, MUAC 1012, MUAC 3830.

**MUAC 3910 Orchestration (4 Credits)**

Techniques of instrumental scoring.

**MUAC 3933 Graduate Music History Review (0 Credits)****MUAC 3959 Movement and Expression for Conductors (4 Credits)**

Conductors use their whole body to communicate and elicit successful performances from their ensemble. If you have unnecessary tension or lack of ease in your body, this is communicated unconsciously to your ensemble, hindering quality of performance. Additionally, physical tension can prevent your ability to communicate and think clearly under pressure. This course is an exploration of freedom of movement and the physicality of musical expression. Classes will include group activities in free-movement, dance, acting, keeping your cool, poise, balance, tension release, as well as hands-on instruction applying Alexander technique to your conducting.

**MUAC 3960 Advanced Orchestral Conducting (2 Credits)**

Discussions of and exercises in score study, interpretation, and techniques associated with orchestral conducting. Includes practical experience conducting orchestral repertoire. Required of MM Conducting students with Choral or wind concentrations. Open to other students with permission of instructor. Prerequisite: Permission of instructor (not needed for MM Conducting students with Choral or Wind concentration). Fall quarter only.

**MUAC 3961 Advanced Choral Conducting (2 Credits)**

Conducting complex choral works, including those with instrumental accompaniment; phrasing, interpretation and score reading. Prerequisite: MUAC 2940. Fall quarter only.

**MUAC 3962 Advanced Wind Conducting (2 Credits)**

Conducting complex wind compositions; phrasing interpretation and score reading. Prerequisite: MUAC 2970. Spring quarter only.

**MUAC 3973 Advanced Wind Literature I (2 Credits)**

This course is an overview of wind literature appropriate for junior high school, high school, college and professional programs including strategies in effective programming and creation of appropriate program notes.

**MUAC 3974 Advanced Wind Literature II (2 Credits)**

An in-depth study of successful compositional techniques by prominent composers of wind literature. Prerequisite: MUAC 3973.

**MUAC 3980 Advanced Jazz Improvisation and Composition (4 Credits)**

A three term sequence continuing the in-depth study of the theory, performance practices, style, and history of jazz improvisation and composition. Prerequisite: satisfactory completion of the three terms of Jazz Improvisation and Composition or consent of the instructor.

**MUAC 3988 Study Abroad Resident Credit (0-18 Credits)****MUAC 3990 Internship in Music (0-8 Credits)**

Internship in Music will offer opportunities for music majors to experience actual music related careers within a sponsoring music organization chosen by the student and accepted by the supervising faculty of the School of Music.

**MUAC 3991 Independent Study (1-10 Credits)**

# Music-Ensembles (MUEN)

**MUEN 1701 IPA & Lyric Italian Diction (1 Credit)**

Learn the practical application of proper pronunciation in Italian for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

**MUEN 1702 Lyric French Diction (1 Credit)**

Learn the practical application of proper pronunciation in French for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

**MUEN 1703 Lyric German Diction (1 Credit)**

Learn the practical application of proper pronunciation in German for singing, a necessary tool for communication with an audience. Preparation for a group Liederabend at the end of the quarter.

**MUEN 1988 Study Abroad Resident Credit (0-18 Credits)****MUEN 2988 Study Abroad Resident Credit (0-18 Credits)****MUEN 3025 Ensemble Block (3 Credits)**

Ensemble Block can be taken by students who are assigned to multiple ensembles in one quarter without full participation in each group. Instructor permission is required for registration.

**MUEN 3029 Steel Drum Ensemble (0-1 Credits)**

The steel drum music of Trinidad and Tobago as well as other styles of music from around the world are studied and performed by this ensemble. Participation in this ensemble does not require music notation. Participation in the ensemble is limited; therefore, students are selected by a simple audition process.

**MUEN 3037 Vocal Repertoire Combo (0-1 Credits)**

The Vocal Repertoire Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz solo repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

**MUEN 3038 Vocal Jazz Combo (0-1 Credits)**

The Vocal Jazz Combo is coached by one of our faculty of performing jazz and commercial music artists and is concerned with vocal jazz repertoire and performance practices. The combo performs one concert each term on campus and frequent concerts in the community and on tour. Admission is by audition.

**MUEN 3041 North Indian Classical Ensemble (0-1 Credits)**

The arts of India are distinguished by their close interrelationship; rhythm, melody and movement are all encompassed by the term "sangeet." In keeping, DU's North Indian Classical Ensemble is dedicated to the practice of all three of these arts, through singing, rhythmic recitation and dance. Participation in this ensemble involves studying the ornate and highly refined systems of Hindustani music and Kathak dance. No prior experience is necessary; all that is required is a positive attitude and a desire to learn!

**MUEN 3045 Flex Jazz Ensemble (0-1 Credits)**

The Flex Jazz Ensemble is a modern jazz group with open-ended instrumentation. The ensemble consists of traditional jazz instruments and vocalists as well as nontraditional jazz instruments (such as double reed, French Horns, strings, etc). While there is no specific instrumentation for the ensemble, the core of the group will always be the traditional modern jazz rhythm section: piano (keys-synth), bass (acoustic and electric), drums (plus an extra percussionist as needed), and guitar (hollow body and Stratocaster-styles with the full range of pedals and gear. With the addition of non-traditional instrumentation, the ensemble reaches out to the classical side of Lamont to give those students a jazz opportunity. Along with the regular fare of programmed concerts, this ensemble also provides opportunities to other departments (theatre, creative writing, studio art, EDP, etc) to incorporate their disciplines in performances.

**MUEN 3047 Xperimental Jazz Ensemble (0-1 Credits)**

The Xperimental Jazz Ensemble is a pan-genre ensemble with a focus on creativity expressed through improvisation, transcription, arrangement, and composition. XJE will have variable instrumentation that may include vocalists, all "classical" and "jazz" instruments, and emergent electronic instruments and software. This course counts toward the Analytical Inquiry: Society and Culture requirement. Registration requires Departmental Approval.

**MUEN 3048 Bluegrass Ensemble (0-1 Credits)**

In this class, students will receive instruction on proper bluegrass performance fundamentals with traditional bluegrass instruments, the harmony and rhythm of bluegrass music, the art of simultaneous playing and singing, the proper interpretation of the chosen repertoire per the composers' style, and the social and cultural influences that inspired the music. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3100 Lamont Jazz Small Group (0-1 Credits)**

All Lamont jazz small groups will focus on the basic elements of communication and musicality that make up high-level jazz performance practices. Students will transcribe, compose and or arrange their own material and will have numerous opportunities to perform each quarter. Admission to all small groups is by audition only.

**MUEN 3677 Bow Art Ensemble (0-1 Credits)**

The Bow Art Ensemble explores the study and rehearsal of traditional and contemporary chamber orchestra repertoire, history, and culture, to be led in conjunction with Lamont performance faculty and guest artists. Students will receive instruction on proper techniques, musical styles, study of traditional and contemporary collaborative leadership and democratic approaches to performing in a conductor-less ensemble.

**MUEN 3678 Lamont Baroque Orchestra (1 Credit)**

Immerse yourself in the dramatic and expressive world of Baroque music and learn the basics of Baroque performance practice. Fall quarter will serve as an introduction to Baroque string playing while Winter and Spring quarters will focus on exploring diverse repertoire. Historically Informed Performance (HIP) is the practice of approaching music of the past with knowledge about the musical styles and musical technologies with which it was originally conceived and performed. It is not a recreation of the past but rather an exploration of what the past offers us as 21st-century performers. HIP involves 1) "performance practice"—what kinds of approaches and instrumental techniques are appropriate to the given repertoire; and 2) the use of period instruments—what instrumental technologies (such as bows and strings) are appropriate to the given repertoire. While a culturally- or historically-informed approach is possible to any music, this ensemble will focus on the music of the 17th and 18th centuries (primarily in Europe). Baroque bows will be available for students to borrow. Open to all string players. Singers, keyboardists, and others may also participate with permission.

**MUEN 3679 Lamont Consort of Viols (1 Credit)**

The viola da gamba, or viol, is a six-stringed instrument with frets that is bowed underhand and comes in several sizes, from violin sized to cello sized. Extremely popular in 16th and 17th-century Europe, it was particularly prized among aristocratic amateur players in England. Explore the beautiful fantasias and polyphony written for a group of viols (called a consort). Open to both new and returning viol players, instruments are available to borrow. While previous string experience is useful, it is not required.

**MUEN 3710 Opera (0-1 Credits)**

Practical experience in operatic performance. One production each quarter; major production in winter quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3712 Lamont Chorale (0-1 Credits)**

The Lamont Chorale is a select mixed voice choir that performs choral literature from the Renaissance to present and strives for a high level of artistry. The choir performs works from the great masters of music, as well as living composers, world music, and spirituals. The Lamont Chorale is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the AI-Society credit requirement for undergraduate students.

**MUEN 3720 Pioneer Pep Band (0-1 Credits)****MUEN 3730 American Heritage Chorale (1 Credit)**

This ensemble will explore through choral music the various ways in which music written by American composers has been influenced and has its roots in music from other cultures and regions of the globe. Special attention shall be given to music by African American composers. American Heritage Chorale is open to all students interested in singing. Prior choral experience is not required. A brief vocal interview will determine appropriate placement within the ensemble. The course will conclude with a performance at the end of the quarter. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3731 The Spirituals Project Choir (0-1 Credits)**

This ensemble will explore African American spirituals as an art form, tradition, and tool for social change through performance, reading, and listening. Because the core of this ensemble is a multi-ethnic, multi-generational community choir, students will have the unique opportunity to join with and learn from a group of singers immersed in this musical tradition. Students will participate in 2-3 performances over the course of the term, the majority of which will be outside of Lamont. Through performance and study of spirituals and related music, students will gain a musical and cultural understanding of this dynamic music and gift from African Americans to the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3740 Voces Fortes (0-1 Credits)**

Voces Fortis is a low voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

**MUEN 3750 Modern Music Ensemble (1 Credit)**

The 20th- and 21st-Centuries have produced some of the most expressive, intriguing, and diverse music ever written. In this course, students have the opportunity to prepare and perform chamber music by 20th-Century masters, as well as recent works by living composers and new pieces written for them by students. This repertoire often involved unusual combinations of instruments (potentially including strings, woodwinds, brass, percussion, plucked instruments, keyboards, vocals, and electronics), providing an opportunity for students to work in less familiar ensembles. Students may also participate in the course by conducting or composing. The course is limited to music majors who are graduate students or advanced undergraduate students. Students in their first or second undergraduate year, and music non-majors may enroll with instructor approval.

**MUEN 3751 Lamont Jazz Orchestra (0-1 Credits)**

This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3752 Lamont Wind Ensemble (0-1 Credits)**

Open to all students by audition and approval of conductor; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3753 Lamont Jazz Ensemble (0-1 Credits)**

Open to all students by audition and approval of director of jazz studies; regularly scheduled concerts. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3760 Lamont Symphony Orchestra (0-1 Credits)**

The LSO generally performs six symphonic concerts and one opera each year. Students are exposed to orchestral repertoire from all periods and styles of music as well as appropriate performance practices associated with each period and style. The LSO is open to all university students by audition. However, because the course objective is to prepare students for successful professional orchestra careers, all participants are held to a very high standard and level of expectation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**MUEN 3769 Organ Accompanying (0-1 Credits)**

Major choral/vocal and major instrumental repertoire with organ accompaniment are studied and prepared for possible performance with chamber groups or local professional/church choirs.

**MUEN 3770 Chamber Ensemble-Piano (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3772 Chamber Ensemble-Harp (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3774 Chamber Ensemble-Brass (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3775 Piano Accompanying (0-2 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3776 Chamber Ensemble-Percussion (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3777 Chamber Ensemble-Strings (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3778 Chamber Ensemble-Woodwind (0-1 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3781 Chamber Ensemble-Guitar (0-2 Credits)**

Small ensembles studying chamber music repertoire for various groups.

**MUEN 3800 Vocal Chamber Ensemble (0-1 Credits)**

A small group of outstanding singers interested in singing soloist vocal chamber music.

**MUEN 3900 Voces Aureas (0-1 Credits)**

Voces Aureas is a treble voice choir that performs a wide variety of choral literature, including masterworks, a cappella works, spirituals, new music, and world music. The choir is open to undergraduate and graduate students, music majors, non-music majors, and community members. Credits from this course can fulfill the Analytical Inquiry: Society and Culture credit requirement for undergraduate students.

**MUEN 3988 Study Abroad Ensemble (2 Credits)**

Ensemble credit for music majors in the Study Abroad Program. Students must have consulted with a Lamont ensemble director for approval to register.

**MUPR 2660 Percussion (2 Credits)**

BA music emphasis.

**MUPR 2661 Percussion Set (2 Credits)****MUPR 2670 Percussion (4 Credits)**

BM performance.

**MUPR 2671 Percussion Set (4 Credits)****MUPR 2680 Oboe (2 Credits)**

BA music emphasis.

**MUPR 2690 Oboe (4 Credits)**

BM performance.

**MUPR 2780 Saxophone (2 Credits)**

BA music emphasis.

**MUPR 2790 Saxophone (4 Credits)**

BM performance.

**MUPR 2900 Carillon (2 Credits)****MUPR 2910 Carillon (4 Credits)****MUPR 2920 Composition (2 Credits)**

One-on-one instruction for composition majors.

**MUPR 2925 Composition (4 Credits)**

One-on-one instruction for composition majors.

**MUPR 2930 Applied Improvisation (2 Credits)**

Lessons are catered toward an individual student's needs and interests. Undergraduate students will consistently develop their foundational tools through the full range of the instrument, addressing tone, intervals, scales, arpeggios, and patterns. Students will develop their sense of improvisation vocabulary through transcription work, "licks" in all keys, and listening. Improvisation will be practiced through the memorization of standard repertoire and weekly application of a variety of improvisation tools. A student's rhythmic foundation and variety will be developed through metronome practice. Advanced students will develop odd time signature playing, interactive improvisation, and composition skills. Finally, etudes and performance pieces that challenge a player's abilities will be a part of the course as well.

**MUPR 2988 Study Abroad Resident Credit (0-18 Credits)****MUPR 2990 Study Abroad Applied Lessons (4 Credits)**

Applied lessons for students in the Study Abroad Program. Restricted to Bachelor of Music students only.

**MUPR 3120 Alexander Technique (2 Credits)**

The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion.

**MUPR 3121 Alexander Technique (4 Credits)**

The Alexander technique is a skill that can be incorporated into practice, performance, and everyday life. Using the principles discovered by F. Matthias Alexander, students will learn how to identify and change faulty patterns of thought and movement. Emphasis will be placed on recognizing how these patterns may affect music-making in practice and performance. Lessons are individually tailored and topics may include injury recovery and prevention, pain and tension reduction, stress management, performance anxiety, freeing the breath, using the back effectively, balance, and ease of motion. This class is tailored to the needs of BM students who are experiencing pain or injury and cannot take their regular studio lesson in a given quarter.

**MUPR 3190 Jazz Piano (2 Credits)**

**MUPR 3210 Piano (2 Credits)**

For non-majors only. If you are interested in Piano for Non-Majors, please email lamontpiano@du.edu.

**MUPR 3230 Voice (2 Credits)**

For non-majors only. If you are interested in Voice for Non-Majors, please email lamontvoice@du.edu.

**MUPR 3250 Violin (2 Credits)**

For non-majors only.

# Philosophy (PHIL)

## PHIL 1610 Discovering Philosophy (4 Credits)

In this course we explore a range of philosophical questions and examine the replies that have been made by historical figures. We also think through the methods and strategies that have been used for thinking through those replies and explore these questions further on our own. Topics may include how do we know what actions are moral? What is knowledge? What is the basic structure of the world? What is justice? What assumptions are made by the disciplines that take themselves to study the natural world? This course counts toward the Analytical Inquiry: Society and Culture requirement.

## PHIL 1988 Study Abroad Resident Credit (0-18 Credits)

## PHIL 2001 Philosophy and Fiction (4 Credits)

Examination of diverse aspects of the relationship between philosophy and fiction. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## PHIL 2003 Philosophy and Popular Culture (4 Credits)

This course critically explores philosophical questions and issues in the context of contemporary popular culture. On the one hand, it considers more general questions about the nature and function of popular culture, including how popular culture has been defined and "theorized"; the connections between popular culture and the traditional and new media; the economic bases and functions of popular culture; and the political implications of popular culture. On the other, it explores particular philosophical issues—historical, ethical, political, aesthetic, and metaphysical—as they appear in selected areas or examples of popular culture: literature, film, the visual arts, digital media, graphic novels, music, television, etc. The aims are both to enhance students' critical understanding of the ways in which philosophical assumptions and ideas underlie popular culture and to present traditional and contemporary philosophical arguments, movements, and ideas using examples drawn from popular culture as reference points. As examples, we might explore ethical dilemmas posed in the "Sopranos" or "Mad Men"; mind-body problems in the "Matrix" or "Avatar"; or metaphysical issues in "Donny Darko" or "Run, Lola, Run." This course counts toward the Analytical Inquiry: Society and Culture requirement.

## PHIL 2004 Philosophy of Race (4 Credits)

This course is a systematic study of the scientific, metaphysical, ethical, and political issues surrounding the notion of race. We undertake a critical study of the following questions: Is race a scientifically legitimate concept, or is it a social construct? Is race a legitimate census category? How should questions of race be decided, and by whom? Why do we think of humans in terms of race—for evolutionary or psychological reasons? Religious reasons? What is racism? Why is racism morally wrong? What do psychological studies show about our racist tendencies? Does affirmative action provide a morally acceptable way of achieving racial justice? What race is a mixed race person? This course counts toward the Analytical Inquiry: Society and Culture requirement.

## PHIL 2005 Philosophy of Religion (4 Credits)

What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with RLGS 2005.

## PHIL 2009 World Mythology (4 Credits)

This class will introduce students to key mythological texts and traditions from around the world including but not limited to Egyptian, Mesopotamian, Indian, Greek, Chinese, Japanese, Norse, Mayan, Uralic, and Polynesian myths.

## PHIL 2010 Existentialism (4 Credits)

Philosophical, religious, literary and psychological views of the existentialists including Kierkegaard, Sartre, and Camus. This course counts toward the Analytical Inquiry: Society and Culture requirement.

## PHIL 2014 Religious Existentialism: Christian and Jewish (4 Credits)

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with RLGS 2014 and JUST 2014.

**PHIL 2025 Coexistence (4 Credits)**

Building skills for ethical, emotionally-intelligent, and equity-minded encounter, this course is about facing neighbors responsively, responsibly, and non-violently—even when our values clash, and even as we work to defeat each other in the voting booth. Exploring new civic modes of “dialogue across difference” and serving as an antidote to polarization and rising tides of hate, the course invites students to consider new ways of holding onto their own views, values, and identities without erasing others—but also without necessarily embracing or being embraced by them. And it does so while helping them understand and utilize “phenomenology,” a philosophical method for assessing “lived feels” in complex relation to human meaning-making in a range of personal, professional, and political contexts. Focused in particular on interhuman coexistence, the course attends to the three-fold human cord of “our structures, our neighbors, and our selves.” It invites students to navigate between structural equity, interpersonal ethics, and personal authenticity. And it equips students to consider the “feels,” “flavors,” and “temperatures” of different coexistence strategies: from the lukewarm framework of tolerance to the warm embrace of friendship to the complicated contours of responsibility-without-friendship in such thinkers as BIPOC thought-leader Martin Luther King, Jr, philosopher and Holocaust Survivor Emmanuel Levinas, and political theorist Karl Marx. Helping students consider what sorts of coexistence goals are most and least appropriate for different contexts and why, the course asks questions like: When it comes to opponents, should we be aiming to befriend them or is it sometimes OK to set the bar lower? Should we try to “find common ground” or is it sometimes OK to “agree to disagree”? Is bridge-building always the best goal, or do we sometimes need to learn to live alongside one another without violence but also without bridges? Drawing on an inclusive reading list of BIPOC, Jewish, Islamic, Christian, African, Indigenous, and Japanese traditions, the course delves into Ubuntu principles of coexistence alongside Aztec principles of selfhood, BIPOC principles of justice alongside spiritual and atheist existentialisms, Queer Chicana feminism alongside the practice of Kintsugi, spiritual calls to love alongside political calls to respect, multicultural calls to recognition alongside social justice critiques of such calls, philosophical traditions of friendship alongside critiques of civility, and ancient wisdom traditions hand-in-hand with popular contemporary insights from Brené Brown’s work on vulnerability and Harvard’s near-century-long study of happiness. The course also explores the dangers of Islamophobia and Antisemitism; includes a visit to the campus’ Holocaust Memorial Social Action Site inspired by “radical ethics”; considers new modes of activism; and invites participants into a “Belonging and Expression” framework for navigating possibilities and tensions in important joint calls to social justice and freedom of expression. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course is crosslisted with PHIL and JUST.

**PHIL 2040 Practical Logic (4 Credits)**

In this course students will learn how to identify and understand real arguments, the kinds of arguments that they confront everyday in the media, textbooks and periodicals, in addition to those made in philosophical writings. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement.

**PHIL 2050 Jewish Philosophy (4 Credits)**

This course sets out to explore the self and the sacred in Jewish tradition by exploring the nature of faith and reason, the call to ethical response, and the meaning of divine revelation in multiple Jewish philosophical voices across the ages, including Philo, Saadya, Halevi, Maimonides, Soloveitchik, Buber, Rosenzweig, and Levinas. This course counts toward the Analytical Inquiry: Society and Culture requirement. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2050.

**PHIL 2100 Philosophy of Mind (4 Credits)**

Topics include nature of persons, consciousness, criteria of personal identity, the relation between mental and physical, and the role of neuroscience in the study of the mind—epistemological and ethical. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2101 Philosophy of Language (4 Credits)**

What do linguistic expressions mean, and how do we use them to communicate? What value judgments are embedded in linguistic practice? In our study of it? How can logical tools illuminate language? What are the limitations of formalism for modeling meaning and language? How might tools in philosophy of language need to be revised in light of investigating oppression and injustice in linguistic communication? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2110 Classical Greek Philosophy (4 Credits)**

The philosophical thought of classical Greece that developed between about 500 and 300 BCE is the basis of all subsequent European philosophy and, arguably, of European culture itself. Besides its indisputable historical importance, it is also rich in ideas and insights that are as striking and relevant today as they were over 2000 years ago. This course serves as an introduction to this seminal period of philosophy, its historical and cultural context, and in fact, to philosophy itself. In the course, we focus primarily on the teachings of Socrates, the dialogues of his student Plato, and the writings of Plato’s student Aristotle. In addition, we begin by considering the cultural and intellectual context, including the Homeric epics and the tragedies, that enabled such thinkers to arise and concludes with a brief look at the paths Greek philosophy took after the “Golden Age of Greece” has passed. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2111 Greek Moral Philosophy (4 Credits)**

In this course we examine the “Good Life” in the writings of Plato, Aristotle, Epictetus and Lucretius and in selected Greek drama. Questions to be explored are as follows: What is justice? Why should I lead a just life? What is friendship? What is happiness? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2120 Nature & Limits of Human Knowledge (4 Credits)**

A study of both traditional and contemporary answers to the following questions: What is knowledge? How do we acquire it? What is the extent of our knowledge? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2130 Philosophy of Early Modern Age (4 Credits)**

Problems of reason and experience, mechanistic view of human beings, new interpretations of mind from Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume and Kant. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2140 Kant to Nietzsche (4 Credits)**

German idealism; human beings as self-consciousness; counter-concept of alienated existence; Kant, Hegel, Kierkegaard, Marx, Nietzsche. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2144 20th-Century Philosophy (4 Credits)**

A general overview of prominent 20th-century philosophers and philosophical movements. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2145 Between Deleuze and Foucault (4 Credits)**

Gilles Deleuze and Michel Foucault are widely accepted to be central figures of post-war French philosophy. Philosophers, cultural theorists, and others have devoted considerable effort to the critical examination of the work of each of these thinkers, but despite the strong biographical and philosophical connection between Foucault and Deleuze, very little has been done to explore the relationship between them. This course addresses the critical deficit by providing rigorous comparative discussions of the work of these two philosophers. The relationship between Foucault and Deleuze, however, is as strong as it is disparate: it is perhaps best described as a parallelism. As Deleuze says, "I never worked with Foucault. But I do think there are a lot of parallels between our work (with Guattari) and his, although they are, as it were, held at a distance because of our widely differing methods and even our objectives." While the two were drawn together through their novel readings of Nietzsche, their commitment to a non-teleological theory of history, their activism in contemporary politics (with prisons, '68, Palestine, etc.), their return to the stoics, and a theory of the event, Deleuze and Foucault were often decisively divided in their methods and motivations. Through primary and secondary readings, this course focuses on the similarities and differences in between these two thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2150 Philosophy of Law (4 Credits)**

Principles, aims and methods of legal reasoning (judicial decision making); relationship between legal and moral reasoning. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2160 Symbolic Logic (4 Credits)**

Principles and methods of formal reasoning, their practical and philosophical applications. This course counts toward the Analytical Inquiry: The Natural and Physical World requirement. Cross listed with MATH 2050.

**PHIL 2180 Ethics (4 Credits)**

Alternative theories of morals and values, ethical problems and solutions offered by classical and contemporary thinkers. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2181 Aesthetics & Philosophy of Art (4 Credits)**

Although critical reflection about art goes back at least to Plato, developments both in modern philosophy and in the arts themselves have produced an unprecedented, intense, and ongoing dialogue between artists and philosophers that has deeply affected the practices of both. Just as modern philosophers have come to view the arts as vitally important ways of experiencing and knowing, so modern artists have drawn heavily on philosophical ideas and views in creating their own works. The focus of this course is on some of the major ways in which new developments in the arts have influenced philosophical thought and have, in turn, been influenced by it. In particular, we consider some of the most representative artworks (many contemporary) that have raised the question, "Why is this art?" together with the major philosophical and critical theories that have attempted to respond to this question. Besides discussing specific works of art, we read and discuss some of the major statements and theories about them by both classical and contemporary philosophers, art historians and critics, and the artists themselves. This course is of interest both to students of philosophy wishing to explore contemporary developments in the arts as well as to art and art history students interested in a deeper understanding of the philosophical views that underlie so much modern and contemporary art. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2182 The Making of the Modern World: Science, Art, and Philosophy (4 Credits)**

A combined on-campus/travel course exploring the ways in which the complex interactions among science, the arts, and philosophy served to create and define the 'modern world.' This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2183 Popular Film and Philosophy (4 Credits)**

This course explores philosophy and film in popular culture. Film, like other art forms, deals with profound philosophical questions: What is the nature of reality? What is that we desire? What is God? What is the right thing to do? What is love? Film remains one of the most popular cultural expressions and dramatizations of these questions.

**PHIL 2186 Feminist Ethics: Justice and Care (4 Credits)**

In the late 1950's psychologists began to theorize a notion of human moral development and they created instruments with which to measure such development. By the 1970's there were claims that even well-educated women were—on average—stunted in their moral competence according to these measures. Once a sufficient number of women were engaged in moral theory in both psychology and philosophy, they began to diagnose these theories and instruments as prejudiced by what we would today call 'white, cisgender, male privilege.' The scales were centering a detached notion of justice and equality for all, whereas researchers found that women centered notions of care and engaged in relational (rather than detached) thinking when asked ethical questions. Thus, was born the discipline of Feminist Ethics. While many women (and some men) celebrated the alternative 'ethics of care' over an 'ethics of justice,' others worried that these women had been harmed by their male dominated society and were showing signs of a 'slave mentality' in their moral reasoning that was to be overcome and not celebrated. Predictably (in hindsight), women of color complained that their perspective was not taken into account by these 'caring' white female professors. In this class we will look at this conversation as it unfolded. In the process we will evaluate these theories from a philosophical perspective and see which parts seem most helpful for thinking about current ethical issues. Many or all of the readings were probably written before you were born. In fact, there is very little philosophical literature that labels itself 'feminist ethics' or 'ethics of care' that was written in the 21st century. We will ponder why this is the case. Are these ideas outdated, or have they been sufficiently incorporated into mainstream academic thinking that they no longer wear the label of marginalization? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2200 Social & Political Philosophy (4 Credits)**

Topics covered include the relation of the "social" to the "political," the nature and role of political ideology, issues in democracy and globalization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2260 Philosophical Perspectives on Perception and Reality (4 Credits)**

An examination of the theoretical hypothesis that our perceptions match up with, and therefore give us information about, an external and independent reality (what we call "the physical world"). In order to engage this issue, we look at the philosophical explorations of a number of historical figures in the Western philosophical tradition. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2346 Philosophy of Nature (4 Credits)**

This course will discuss the nature of nature, the ethics of nature, our knowledge of nature, the politics of nature, the history of the philosophy of nature, physics, and aesthetics. We will read, poetry, philosophy, and literature to pose and answer these questions.

**PHIL 2401 Theories of Justice (4 Credits)**

It is commonplace to associate justice with equality. But without specifying such a principle further, it may be an empty formality. We may say that a society is just if it treats persons as equal under the law or that a legal system is just when it treats like cases as alike. But in other contexts, it should be plain that persons are not equal, e.g., in the technical or even moral abilities. Some might simply be better than others. Still others are wealthier, and under certain conditions it may be good to that there is a class of wealthier persons. Perhaps justice also demands inequality at times. What is clear is that what justice is is itself a matter of dispute. This course examines several theories of justice. It identifies the deep sources of disputation among them and assesses their implications for the design of the most fundamental political, economic, and social institutions. Further, it asks whether a consensus or at least a convergence on a conception of justice is possible for pluralistic, democratic societies. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2555 The Philosophy of Technology (4 Credits)**

Serious thought about technology commences with the beginnings of philosophy itself, although it becomes an urgent theme and explicit field of philosophical inquiry only in the 20th century. This course will approach the theme of technology from five perspectives: (1) Historical: How did technology arise as a philosophical concern and how did the development of technology influence thought about it? (2) Metaphysical: What role does technology play in our understanding of 'reality'? Is technology one element among others in what we take to be 'real,' or does it determine our views of 'reality'? (3) Epistemological: What is the relation between science and technology? Is technology a result or application of 'scientific knowledge,' or does technology govern or drive science itself? (4) Ethical/Political: In what ways does technology influence and/or challenge our views about what is 'valuable' about our individual and collective ways of living? Is the development of technology something to be embraced or rejected/limited with respect to human values and aspirations? (5) 'Futurist': Can the 'digital revolution' be understood as continuous with the history of technology itself or does it represent some new metamorphosis of both what it means to be 'human' and of 'reality' itself? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2700 Biomedical Ethics (4 Credits)**

Discussion of some of the most pressing ethical issues engaged by contemporary developments in biology and medicine. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2701 Topics in Philosophy (1-4 Credits)****PHIL 2702 Topics in Philosophy (1-4 Credits)****PHIL 2703 Topics in Philosophy (1-4 Credits)****PHIL 2704 Topics in Philosophy (1-4 Credits)****PHIL 2705 Topics in Philosophy (1-4 Credits)****PHIL 2706 Topics in Philosophy (1-4 Credits)****PHIL 2707 Topics in Philosophy (1-4 Credits)****PHIL 2708 Topics in Philosophy (1-4 Credits)****PHIL 2709 Topics in Philosophy (1-4 Credits)****PHIL 2710 Topics in Philosophy (1-4 Credits)****PHIL 2711 Topics in Philosophy (1-4 Credits)****PHIL 2770 Philosophy of Science (4 Credits)**

This course provides an introduction to some major topics in the philosophy of science focusing on issues concerning what science is and how it works, the scientific method, the objectivity of science and the goal of science. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**PHIL 2785 Environmental Ethics (4 Credits)**

A study of current issues and controversies regarding the natural environment from a variety of philosophical and ethical perspectives, including anthropological, animal rights, "land ethic," deep ecology, eco-feminism, and postmodern approaches.

**PHIL 2988 Study Abroad Resident Credit (0-18 Credits)****PHIL 3000 Plato's Metaphysics (4 Credits)**

A systematic study of Plato's Middle and Late Period Dialogues that focuses on his arguments for the existence of abstract objects and the development of Plato's theory of Forms. Prerequisite: At least Junior standing or permission of instructor.

**PHIL 3003 Plato's Theory of Knowledge (4 Credits)**

A systematic investigation of Plato's treatments of knowledge throughout the dialogues with a focus on the theory of recollection, Forms as objects of knowledge, the relationship between the Forms and perceptual experience, and the challenges posed by notions of true and false belief. Prerequisites: At least Junior standing or permission of instructor.

**PHIL 3010 Great Thinkers: Aristotle (4 Credits)**

A study of Aristotle's central theories and doctrines. Prerequisite: junior standing or instructor's permission.

**PHIL 3011 Great Thinkers: Virginia Woolf (4 Credits)**

In this course we will read Virginia Woolf as a philosopher. We will discuss her philosophy of nature, knowledge, art, politics, science, sensation, gender, and materialism throughout her fiction and non-fiction writings.

**PHIL 3023 Great Thinkers: Maimonides: Politics, Prophecy and Providence (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with RLGS 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**PHIL 3050 Great Thinkers: Hume (4 Credits)**

A detailed study of Hume's "radical" empiricism and its impact on contemporary analytic philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3063 Kant on Religion (4 Credits)**

A study of Immanuel Kant's major writings on religion and their subsequent influence on theology and the philosophy of religion. Prerequisite: junior standing or instructor's permission. Cross-listed with RLGS 3456.

**PHIL 3070 Great Thinkers: Hegel (4 Credits)**

Hegel's "Phenomenology," later system and place in the history of modern philosophy. Prerequisite: junior standing or instructor's permission.

**PHIL 3075 Marxism (4 Credits)**

This course is a survey in the theoretical and political work influenced by the writings of 19th century philosopher and economist, Karl Marx. The course covers both the historical traditions in Marxism in the 19th, 20th, and 21st century as well as the geographical traditions of these time periods in France, Germany, England, Italy, Russia, China, and America. It is not necessary that students have a prior background in Marx's work, but it is highly recommended. Cross listed with ECON 3075.

**PHIL 3090 Great Thinkers: Heidegger (4 Credits)**

Study of "Being and Time" and related essays by a major 20th-century philosopher. Prerequisite: junior standing or instructor's permission.

**PHIL 3100 Great Thinkers: Wittgenstein (4 Credits)**

The course introduces students to Ludwig Wittgenstein's two masterworks, the *Tractatus* (1922) and *Philosophical Investigations* (1953), both of which provide fresh, often counterintuitive and conflicting, insights into topics ranging from logic and language to ethics, religion, art and culture. The course explores how the end of the Austro-Hungarian Empire and the pressures of an incipient modernity impacted the style, direction and substance of Wittgenstein's thought, developments that had profound existential and spiritual import for him as he wrestled with the many contradictions of his life and thought. The course concludes with a consideration of the relationship between Wittgenstein's later philosophy and the existential-phenomenology of Martin Heidegger, both of whom insist upon humanity's radical finitude and the pre-ontological understanding (forms of life) that always already conditions and guides our questions about reason, truth, beauty and meaning.

**PHIL 3101 Great Thinkers: Kierkegaard (4 Credits)**

Each year, the philosophy department offers at least two courses in great thinkers. Specific figures may vary from year to year. Cross-listed with RLGS 3102. Prerequisite: 10 hours of Philosophy at the 2000 level or permission of instructor.

**PHIL 3120 Metaphysics (4 Credits)**

In the course of this study, we will cover a broad range of philosophical topics falling within metaphysics, philosophy of language, philosophy of science, and epistemology. Prerequisite: junior standing or instructor's permission.

**PHIL 3130 Knowledge Problems (4 Credits)**

Problems in the foundations and justifications of claims to knowledge. Prerequisite: junior standing or instructor's permission.

**PHIL 3146 Great Thinkers: Levinas (4 Credits)**

Emmanuel Levinas (1906-1995), famous for his arresting and original idea of "ethics as first philosophy," is an important figure in the histories of phenomenology, metaphysics, and theology. In this course, we set out to explore Levinas' insights on ethics, alterity, and infinity, including the connection of his ideas to Plato, Descartes, Kant, and Husserl, as well as his critical responses to Heidegger and his positive contributions to Derrida. In this course, we work through Levinas' two major works, *Ethics and Infinity* and *Otherwise Than Being or Beyond Essence*, as well as a number of shorter writings—including material from his Talmudic commentaries. Themes to be covered include: Being, Goodness, Risk, Ethics, Alterity, Transcendence, Law, Judaism, Gift, Forgiveness, Politics, Theology, and Justice. This course is cross-listed with JUST 3146.

**PHIL 3175 Morality and the Law (4 Credits)**

A systematic study of various elements of the relation between law and morality. Are we obligated to obey every law the government enacts? Why? If we do have an obligation to obey the law, are civil disobedients like Martin Luther King, Jr. justified in disobeying the law? Are immoral laws, laws at all, or must a law connect with some higher moral truth to have any authority? To what extent is it morally permissible for the law to restrict our personal freedoms? To what extent is it morally permissible for the law to enforce morality in general? If it is not permissible for the law to enforce morality, do we incur any obligation to obey the law? Prerequisite: junior standing or instructor's permission.

**PHIL 3178 Metaethics (4 Credits)**

This course systematically and critically examines the metaphysical, semantic, and epistemic issues central to the study of metaethics. Do moral properties exist? If so, how are they related to natural properties? Do moral properties exist independent of human agency, or do we construct morality? If moral properties exist, how can we come to have justified belief about them? Is it possible to know that a moral belief is true? Doesn't the phenomenon of widespread, intractable disagreement about moral matters establish that there are no objective moral truths? Is the process of gaining scientific knowledge really that different from the process of gaining moral knowledge? Prerequisite: junior standing or instructor's permission.

**PHIL 3179 Virtue Ethics (4 Credits)**

Virtue ethics purportedly provides a distinct approach to moral deliberation, moral reasoning, moral decision-making, and moral justification. This course is a systematic study of the nature of virtue ethics, the nature of a virtue, and the alleged superiority of virtue ethics over its more familiar consequentialist and deontological alternatives. We also study various responses to the following questions: Have moral psychologists generated any valuable studies on the nature of virtue? What virtues ought we to endorse? At least Junior standing required or permission of the instructor.

**PHIL 3210 Philosophy of Movement (4 Credits)**

Everything is in motion. Yet, philosophers have consistently considered motion to be a derivative or secondary form of being. Why? What are the political and metaphysical consequences of marginalizing motion in the history of philosophy? The aim of this class is to read the history of philosophy with a unique focus on the status of movement and motion from the ancient to contemporary period.

**PHIL 3211 Contemporary Political Philosophy (4 Credits)**

This class focuses primarily on the philosophical problems generated by thinking about political authority and justice. We discuss the nature of political authority, justice, rights, equality and the role of property in a modern state.

**PHIL 3212 Philosophy and Mythology (4 Credits)**

Before philosophy there was the myth of chaos. In this class we will read the oldest recorded myths in the world to see how their vision of cosmogonic chaos gave birth to form and order. We will track the birth, rise, and fall of creation stories from chaos and identify what may have caused these major shifts, including the rise of philosophy, the state, and imperialism. Specifically we will read the earliest Egyptian, Mesopotamian, Indian, Greek, and Chinese creation stories.

**PHIL 3215 Modern Jewish Philosophy (4 Credits)**

Prerequisite: junior standing or instructor's permission. Cross listed with JUST 3215.

**PHIL 3333 Logic, Language, and Metaphysics (4 Credits)**

This course provides a systematic exploration of the foundations of contemporary philosophy—namely, logic and language—and their metaphysical implications. The class can be divided in three broad modules. Our starting point is the collapse of Kant's system due to staggering discoveries in physics and geometry. Next, we shall discuss the subsequent development of mathematical logic and the philosophy of language in the work of Frege, Russell, Tarski, and Gödel. The last portion is devoted to philosophical applications of these logical results in the field of metaphysics. Specifically, we shall explore the work of Carnap, Quine, and Kripke. Junior or senior standing required (or instructor permission).

**PHIL 3445 Cultural Theory and Critique (4 Credits)**

This course will provide an overview of the major theories of culture and cultural critique, as well as a consideration of some of the major controversies and recent developments in this field. It will proceed roughly chronologically, beginning with liberal humanist critique and continuing with hermeneutics, materialist and Marxist critique, psychoanalysis, the Frankfurt School, structuralism, post-structuralism, and contemporary British cultural studies. It will also consider more recent developments, such as feminist critique, GLBT critique, and postcolonialism. While the approach will be mainly philosophical, implications for other areas such as literature, art, emergent media, religion, and politics will also figure in the discussions, so it is appropriate for students in many fields, not just philosophy. Prerequisite: Junior standing or permission of the instructor. Note that this course will serve as a foundational offering for students interested in participating in the Critical Theory specialization.

**PHIL 3446 Philosophy in the American Tradition (4 Credits)**

The course introduces students to the thought of the three premier American Transcendentalist writers: Ralph Waldo Emerson, Margaret Fuller, and Henry David Thoreau. These three writers—by turns friends, rivals, neighbors, and even housemates in nearby Concord, Massachusetts—created what Emerson called “a poetry and philosophy of insight and not of tradition” and laid the foundations for American philosophy and literature as we know it today. They also led the first countercultural movement in American history, advocating causes as varied as environmentalism, abolitionism, women's rights, and the “higher law” of the individual conscience in an age of unbridled capitalism and populism. We will consider the Transcendentalists as both writers and reformers, examining their calls for a uniquely American literature and their romantic sacralization of nature as well as their deep commitment to reform and their engagement with the turbulent politics of their time. In the final weeks of the course, we will explore the Transcendentalists' profound influence on American cultural history, ranging from their contemporaries (Frederick Douglass, Walt Whitman, Emily Dickinson, and Nathaniel Hawthorne) to ours (Marilynne Robinson, Terrence Malick, and W. S. Merwin).

**PHIL 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and “subjectification” (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled *The Hermeneutics of the Subject*. This course is cross-listed with RLGS 3448.

**PHIL 3460 Nietzsche & the Death of God (4 Credits)**

This course involves an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spoke Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Prerequisite: junior standing or instructor's permission. Cross listed with RLGS 3460.

**PHIL 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with RLGS 3465. Prerequisite: junior standing or instructor's permission.

**PHIL 3466 Contemporary Continental Philosophy (4 Credits)**

A critical study of current trends in European philosophy, focusing on such thinkers as Deleuze, Badiou, Žižek, Meillassoux, or Laruelle. Prerequisite: junior standing or instructor's permission.

**PHIL 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PSYC 3610. Prerequisites: PSYC 1001 and junior standing (or instructor approval).

**PHIL 3611 The Boundaries of Scientific Knowledge: A Philosophical Exploration (4 Credits)**

Despite its staggering successes, public trust in science is disquietingly low. What has gone wrong? Why is a substantive portion of the population unwilling to trust the advice of specialists? A central problem lies in the tendency of scientists, philosophers, and various pundits to hype, bloat, and overemphasize the promises and results of scientific research. This leads to scientism, broadly conceived as the imperialist tendency to reduce all knowledge to scientific knowledge. But what exactly is scientism? Despite the pejorative connotation of the term, is it an intellectual sin or a virtue? The aim of this course is to map the terrain, exploring various dimensions of scientism, and how it affects the public dimensions of scientific research and its relation to the humanities, religion, and other domains of knowledge, culture, and society.

**PHIL 3612 AI and Robotics (4 Credits)**

In this interdisciplinary seminar we will discuss foundational issues regarding artificially intelligent systems. We will seek to understand how recent advances in AI research bear on our understanding of the nature of the mind, intelligence, agency, rationality, and consciousness. We will also discuss how philosophical advances can advance empirical progress. Additionally, we will discuss some barriers to progress that these technologies might pose. In particular, we will be focused on three groups of questions: 1. What special opportunities and challenges are presented by deep neural net and deep learning technology regarding building and understanding artificially minded intelligent agents? 2. What is the role of the body and environment in producing intelligence? 3. Deep neural net algorithms are already commonly used to predict recidivism rates, diagnose illnesses, and make advertising more effective. In what ways might such algorithms be approaching human or animal intelligence, or shed light on such intelligence? In what ways might human and animal intelligence be importantly different? In what ways might contemporary intelligence research perpetuate injustice and oppression? This seminar is designed to be interdisciplinary, and I welcome students working in philosophy, robotics/AI, and cognitive science who want to work hard and dig deeper. There are no strict prerequisites, but some background knowledge in relevant disciplines will be highly useful.

**PHIL 3618 Philosophy of Biology (4 Credits)**

A survey of conceptual issues that lie at the intersection of biology and philosophy: the central concepts of evolutionary theory (such as natural selection, fitness, adaptation and function), the relation of biology to other "lower" sciences (can it be reduced to physics and chemistry?), whether there are genuine scientific laws in biology, and the relation between biology and other fields like cognitive science and ethics. At least Junior standing required.

**PHIL 3620 Philosophical Perspectives on Economics and Social Sciences (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, economics, and the social sciences. More specifically, the main goal is to engage in a critical discussion of how sciences such as psychology, sociology, and neuroscience can challenge and modify the foundations and methodology of economic theories. The course is structured around three broad modules. After a brief introduction, we begin by discussing the emergence of rational choice theory which constitutes the foundation of classical and neoclassical economics and present some paradoxical implications of expected utility theory. The second module focuses on the relationship between economics and psychology. More specifically, we examine the emergence of behavioral economics, the study of the social, cognitive, and emotional factors on the economic decisions of individuals and institutions and their consequences for market prices, returns, and resource allocation. Finally, the third module focuses on the implications of neuroscience on decision making. We discuss some recent developments in neuroeconomics, a field of study emerged over the last few decades which seeks to ground economic theory in the study of neural mechanisms which are expressed mathematically and make behavioral predictions.

**PHIL 3699 Proseminar in Philosophy (4 Credits)**

Philosophy is a diverse discipline with various subfields, most of which are becoming increasingly specialized and methodologically autonomous. Specialization is often (rightly) perceived as an indicator of disciplinary progress and intellectual development. However, it is important that students of philosophy pursue breadth as well as depth. The goal of this course is to provide an overview of a series of seminal texts in philosophy, from a variety of subfields, epochs, and traditions. Each weekly meeting is devoted to the presentation, analysis, and discussion of a text that any student of philosophy should read at some point in her or his career. Requires junior standing or instructor's permission.

**PHIL 3700 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3701 Topics in Philosophy (1-4 Credits)**

Prerequisite: junior standing or instructor's permission.

**PHIL 3702 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3703 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3704 Topics in Philosophy (1-4 Credits)**

Prerequisite: 10 hours of Philosophy at 2000 level or permission of instructor.

**PHIL 3988 Study Abroad Resident Credit (0-18 Credits)****PHIL 3991 Independent Study (1-8 Credits)****PHIL 3995 Independent Research (1-8 Credits)****PHIL 3999 Philosophy Assessment (0 Credits)**

This course involves a required assessment of graduating philosophy majors' knowledge of the discipline based on coursework taken after completing 75% of their coursework. It is available to anyone who has completed at least 30 credits of philosophy courses and is required for graduation.

# Physics & Astronomy (PHYS)

## **PHYS 1011 21st-Century Physics and Astronomy I (4 Credits)**

First class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

## **PHYS 1012 21st-Century Physics and Astronomy II (4 Credits)**

Second class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

## **PHYS 1013 21st-Century Physics and Astronomy III (4 Credits)**

Third class in a three-quarter sequence that explores the meaning of discoveries in our physical world in terms of astronomy and astrophysics, and how they shape modern research into our knowledge of the nature of the universe. In this course sequence, students (1) survey the fundamentals of the cutting-edge astronomy and astrophysics and (2) learn how physics works in explaining varieties of observed astronomical phenomena that encompass the origin and evolution of the universe and its contents—from galaxies to stars and planets. In this way students become familiar with the essential concepts of modern physics in terms of astronomy and astrophysics. Lab fee associated with these courses. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement.

## **PHYS 1050 Descriptive Astronomy (4 Credits)**

Introduction to the cosmos, including stars, galaxies, and origin and fate of universe; constellations and observing techniques. Includes laboratory and observing sessions at Chamberlin Observatory's 20-inch refractor telescope.

## **PHYS 1070 Solar System Astronomy (4 Credits)**

Introduction to advances in knowledge of atmospheres, surfaces and interiors of other planets in our solar system and elsewhere; emphasis on interpretation and significance of discoveries for the nonspecialist. Includes observing at Chamberlin Observatory. Recommended Prerequisite: PHYS 1050.

## **PHYS 1090 The Observable Universe (4 Credits)**

In astronomy, the Universe is our laboratory! By actively studying the dynamic cosmos, we can understand where we came from, where we are going, and how physics works under conditions that are impossible to recreate on Earth. In this course, we will explore the origin and fate of the Universe: how it all began, how it might end, and how we can use astronomical observations to peer back into ancient time and predict the far future. We will also enjoy exclusive access to DU's historic Chamberlin Observatory for actual use of the telescope. By actively engaging with the night sky, we learn by hands-on observation and kinetic learning modalities. For some, astronomy provides a sense of wonder and awe, while others see it as a way to uncover the secrets of the cosmos. No matter what your motivation, whether it comes from artistic wonder or a wish to understand humanity better, astronomy has the power to change your perspective on everyday life. Recommended prerequisite: PHYS 1050.

## **PHYS 1111 General Physics I (5 Credits)**

This is the first of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in mechanics (kinematics, dynamics) including forces, one and two dimensional motion, work, energy and momentum. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

## **PHYS 1112 General Physics II (5 Credits)**

This is the second of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1111. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1113 General Physics III (5 Credits)**

This is the third of a three-quarter sequence for students in any Natural Science and Mathematics field of study. The course stresses physics concepts rather than equation derivation as in the calculus-based course (PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214). Algebra and trigonometry are used regularly to solve problems and make predictions. Includes topics in rotational motion, torque, vibrations, fluids, heat and thermodynamics, kinetic theory, and particles and matter waves. The course includes a rigorous algebra-based laboratory that exposes students to a broad range of the real physical phenomena investigated using equipment as well as computerized instrumentation and data acquisition techniques. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisites: high school algebra, trigonometry, PHYS 1112. Students majoring in physics or engineering are required to take PHYS 1211/PHYS 1212/PHYS 1213 or PHYS 1214. Lab fee associated with this course.

**PHYS 1200 Physics Preparatory (2 Credits)**

This course is strongly recommended to everyone considering a major in physics and astronomy. It introduces students to problems, techniques, and tools used in physics and astronomy and offers an overview of the research carried out in the Department of Physics and Astronomy. High-school physics knowledge is not required.

**PHYS 1211 University Physics I (5 Credits)**

First of a three-quarter sequence. Kinematics, vectors, force, energy and work, linear momentum, rotation of rigid bodies. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The course includes a rigorous calculus-based laboratory that exposes students to a broad range of the real physical phenomena studied in the lecture course. Through the use of experimental apparatus, computerized instrumentation and data acquisition, data analysis and graphical representation, students use the observed phenomena to exemplify the laws of physics. Physics theory and other relevant background information are explored individually by students in weekly prelab exercises. Students learn to write introductory-level laboratory reports and become familiar with good laboratory technique. Emphasis for this lab is on mechanics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Corequisite: MATH 1951.

**PHYS 1212 University Physics II (5 Credits)**

Second of a three-quarter sequence. Gravitation, fluids; oscillatory motion; waves; thermal physics. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1211 lab portion and builds on laboratory skills and knowledge from that course. Emphasis for this lab is on waves, oscillations, sound, fluids and thermodynamics. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Prerequisite: PHYS 1211. Corequisite: MATH 1952.

**PHYS 1213 University Physics III (5 Credits)**

Third of a three-quarter sequence. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all physics and engineering majors and recommended for all science majors who are also required to take calculus. The lab portion of this course is a continuation of the PHYS 1221 and 1222 lab portions and builds on the students' laboratory skills and knowledge from those labs. Emphasis for this lab is on electricity, magnetism and circuits. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1214. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

**PHYS 1214 University Physics III for Engineers (4 Credits)**

This is the third course of a three-quarter sequence and is for engineers only; this is equivalent to PHYS 1213, but does not include lab component. Electrostatics, electric circuits, magnetism and electromagnetism; electromagnetic waves. Required for all engineering majors. This course counts toward the Scientific Inquiry: The Natural and Physical World requirement. Cross listed with PHYS 1213. Prerequisite: PHYS 1212. Corequisite: MATH 1953.

**PHYS 1991 Independent Study (1-10 Credits)****PHYS 1995 Independent Research (1-10 Credits)****PHYS 2011 Circuits I (3 Credits)**

Cross-listed with ENEE 2012. An introduction to electrical circuits analysis and design. Emphasis is on definitions of basic variables, passive circuit components and the ideal operational amplifier. DC analysis of circuits and circuit theorems are stressed. AC signals are introduced. Computer analysis software is integrated throughout the course. Cross listed with ENEE 2011. Co-requisites: PHYS 1213 or 1214, MATH 1953, PHYS 2015 or instructor's permission.

**PHYS 2015 Engineering Applications I (1 Credit)**

Cross-listed with ENEE 2015. Laboratory program introduces electronic test equipment, verifies circuit theorems and practices elementary interface circuit design. Cross listed with ENGR 2015. Co-requisite: PHYS 2011 or instructor's permission.

**PHYS 2021 Circuits II (3 Credits)**

Cross-listed with ENEE 2021. AC analysis of linear circuits to include circuit theorems via classical and transform techniques. Emphasis is on Laplace transform, including use of pole-zero and Bode diagrams to analyze and design circuits, including multiple filters (single-pole cascade, Butterworth, Chebyshev), and step response circuits. Phasors applications to sinusoidal steady state analysis and AC power. Computer analysis software is used as an aid to circuit design. Cross listed with ENEE 2021. Prerequisites: PHYS 2011, PHYS 2015. Corequisites: PHYS 2025, MATH 2070.

**PHYS 2025 Engineering Applications II (1 Credit)**

Cross-listed with ENEE 2025. Laboratory program practicing time and frequency domain analysis and design techniques on step response and filter problems. Applications to instrumentation and circuits. Cross listed with ENEE 2025. Prerequisite: PHYS 2011. Corequisite: PHYS 2021 or instructor's permission.

**PHYS 2050 Ways of Seeing and Sensing: Astrophysics (4 Credits)**

Ways of Seeing and Sensing represents a new collaboration between the departments of Media, Film & Journalism Studies, Biological Sciences, and Physics & Astronomy. The class is a place-based exercise revolving around the idea that what we know about our surroundings depends on how we “see” or “sense.” We will examine various aspects of nature specific to the Kennedy Mountain Campus (KMC) using both micro and macro approaches to “seeing” through a variety of technologies, including microscopes, trail cameras, photo and video cameras, night vision glasses, and telescopes. To develop the concept of “sensing,” we will explore the soundscapes of the KMC as well as the ways plants and animals endemic to this ecosystem sense their surroundings. We will also explore using human senses other than sight to navigate the nighttime environment. The course will focus on science communication, storytelling, and the creation of professional-quality photo and video content for dissemination on the Internet, at environmental film festivals, in galleries, at campus events, and potentially via broadcast outlets. Students will work in teams of 3–4 to develop and produce documentary stories unique to the ecology and astronomy of the KMC. Students choosing the astrophysics focus will also complete assignments on optics and telescope design, coordinates and motions of the night sky, and the use of non-optical wavelengths and multimessenger techniques as ways of “sensing” in modern observational astronomy. This course will meet together with BIOL 2050 and MFJS 2050 courses, which have different prerequisites and discipline-specific assignments. Prerequisites: PHYS 1013 or PHYS 1113 or PHYS 1212.

**PHYS 2051 Astrobiology (4 Credits)**

The nature of our solar system, and those of recently discovered solar systems around other stars, will be examined using the tools of modern physics and astronomy, with a focus on biogenic opportunities in these diverse environments. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2052 Stellar Physics (4 Credits)**

The physics of stars will be examined using the tools of modern physics and astronomy, with the focus on their structure, interiors, origin and evolution, including single and multiple star systems, white dwarf, neutron stars and black holes. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2053 Galaxies and Cosmology (4 Credits)**

Modern discoveries involving galaxies in our universe and cosmological theories based on these and particle physics findings will be examined using the tools of modern physics and astronomy. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213, PHYS 1214, or instructor's permission.

**PHYS 2061 Telescopes and Instrumentation (4 Credits)**

The student will develop and refine facility and experience with telescopes, software, methods, catalogs, libraries, astronomical instrumentation and assorted contents of the universe, including ground-based and space-based telescopes and detector systems. Observing projects included; use of the Student Astronomy Lab and/or internet telescope(s) for observing projects and variable star monitoring, plus occasional use of the 20 inch Clark/Saegmuller refractor or Mt. Evans reflectors for observing, measuring and practicing public instruction. Math tools include algebra, statistics, Excel, Mathcad, IDL, C++, etc. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1050 or PHYS 1070 or PHYS 1090 or PHYS 1112 or PHYS 1212 or instructor's permission.

**PHYS 2062 Astronomy with Digital Cameras (4 Credits)**

The revolution brought about with digital recording systems has revolutionized astronomy by providing access to faint source imaging and in-depth astronomical spectroscopy not possible during the photographic era. This course will train students to apply this technology to problems associated with light and spectrum measurement that facilitate tests of modern astrophysical theories. Each student will select an observing project to develop during the term, pursue data collection and analysis at the Student Astronomy Lab or other telescope(s), and report results on a personal website and/or in poster format. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1050 or PHYS 1070 or PHYS 1090 or PHYS 1113 or PHYS 1213 or instructor's permission.

**PHYS 2063 Observing & Data Analysis (4 Credits)**

Students will learn fundamentals of astronomical research with hands-on data analysis opportunities. After going over the basics of astronomical observations and the standard FITS data file format, students will practice both imaging and spectroscopic data reduction processes using actual astronomical data. Proficiency in computer programming/scripting is strongly desired (strong preference is given to Python, IDL, C, and any other for which FITS I/O routines are available). Students are required to bring their own laptop to class. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, or PHYS 1213, or PHYS 1214; or instructor's permission.

**PHYS 2251 Modern Physics I (4 Credits)**

First of a two-quarter sequence. Topics covered: Introduction to special relativity; photons, de Broglie wavelength, Heisenberg uncertainty principles, quantum numbers and invariance principles; introduction to quantum physics of atoms, molecules, solids and nuclei; radioactive decay; elementary particles. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214 and MATH 1953. Corequisite: MATH 2070.

**PHYS 2252 Modern Physics II (4 Credits)**

Second of a two-quarter sequence. Topics covered: Advanced topics in quantum mechanics: particle in a box, tunneling, variational principle, symmetry; introduction to statistical physics and thermodynamics: ensembles, Bose-Einstein condensation, super-fluidity, superconductivity, nano-science; introduction to chaos: maps, stability analysis, bifurcations; introduction to computational physics. Prerequisite: PHYS 2251. Corequisite: PHYS 2260.

**PHYS 2259 Uncertainty and Error Analysis (2 Credits)**

In this course, students will build on the laboratory experience gained in University Physics Lab. Students will learn why uncertainty analysis is crucial to reducing and correcting errors in science. Additionally, students will develop the theory behind, and learn how to carry out, uncertainty and data analysis calculations. Uncertainty analysis topics include statistical analysis of data, propagation of error, the normal distribution, rejection of data, weighted averages, least-squares fitting, covariance and correlation, the binomial and Poisson distributions, and the chi-squared test. Strong emphasis for this course is placed on having students develop independence with their laboratory skills, as well as preparing students for Modern Physics Lab (PHYS 2260). Prerequisites: PHYS 1213 or PHYS 1214 and MATH 1953 or MATH 1963.

**PHYS 2260 Modern Physics Lab (1 Credit)**

Laboratory to accompany PHYS 2252. Students will perform laboratories that demonstrate special relativity, the wave/particle duality of light, the quantization of charge, and the discrete nature of energy levels in bound systems. Laboratories include the Michelson-Morley experiment, spectroscopy, blackbody radiation, laser diffraction and the double slit experiment, the photoelectric effect, the Millikan oil drop experiment, the charge-to-mass ratio of the electron, and the Franck-Hertz experiment. Students will apply uncertainty and error analysis to real experimental data. Strong emphasis for this lab is placed on having students develop independence with their laboratory skills. A Windows-based laptop computer is required for this lab. Lab fee associated with this course. Prerequisites: PHYS 2259 and MATH 2070. Corequisite: PHYS 2252.

**PHYS 2300 Physics of the Body (3 Credits)**

This is the first course required for a medical physics minor. Muscles and forces; physics of the skeleton; energy, heat, work and power of the body; osmosis and kidneys; lungs and breathing; cardiovascular system; electrical and magnetic signals in the body. Prerequisite: PHYS 1113, PHYS 1213, or PHYS 1214.

**PHYS 2311 Intermediate Lab I (2 Credits)**

In this lab, students learn to develop laboratory instrumentation to make physical measurements using electronic circuitry and the personal computer. Laboratory exercises include a review of DC circuits including transistors, LabVIEW programming, the PC parallel port, AC circuits and the oscilloscope, operational amplifiers and the RS-232C serial port. Strong emphasis for this lab is placed on having students develop independence with their laboratory skills. Prerequisites: PHYS 2260 and MATH 2070.

**PHYS 2312 Intermediate Lab II (2 Credits)**

This lab is a continuation of PHYS 2311 and builds heavily on the concepts learned during that first quarter. Laboratory exercises include using the personal computer, LabVIEW programming, and electronic circuitry for single point and waveform data acquisition including the Fast Fourier Transform, GPIB and serial devices, transducers, controls and feedback systems, counting, and timing. Strong emphasis for this lab is placed on having students develop independence with their laboratory skills. Prerequisite: PHYS 2311.

**PHYS 2313 Intermediate Lab III (2 Credits)**

This lab is the final lab in the Intermediate Lab sequence. Students leverage the knowledge gained in the first two quarters to perform physics experiments using electronic circuitry and the personal computer. It is expected that students will be independent in their ability to perform in the laboratory. Prerequisite: PHYS 2312.

**PHYS 2340 Medical Imaging Physics (3 Credits)**

This is the second course required for a medical physics minor, following Physics of the Body (PHYS 2300). X-rays; nuclear medicine instrumentation; radiography and fluoroscopy; computed tomography; ultrasound; magnetic resonance imaging; radiobiology. Prerequisites: PHYS 1112, PHYS 1212.

**PHYS 2350 Radiology and Nuclear Medicine (3 Credits)**

This course will give students an understanding of the physical underpinnings of diagnostic radiological techniques (including x-ray imaging, CT, ultrasound, and MRI), and nuclear medicine (including radiation safety, dosimetry, PET and SPECT imaging, and radiation therapy). Pre-requisites: PHYS 1113 or PHYS 1213 or PHYS 1214.

**PHYS 2400 Introduction to Quantum Computing (4 Credits)**

This physics course will introduce students to the theory and applications of quantum computing. Students will gain a foundational understanding of quantum computing concepts, principles, and applications, and will gain experience simulating and programming quantum gates – culminating in students designing a quantum computation and running it on a real quantum computer. This experience will prepare students to engage with quantum science and engineering. Prerequisite: MATH 1953.

**PHYS 2510 Applied Mechanics I (3 Credits)**

First of a three-quarter sequence. Co-listed with ENME 2510. Statics of particles, equivalent systems of forces, centroids and center of gravity, frames and machines, friction, moments of inertia, method of virtual work. Kinematics of particles, Newton's second law, energy and momentum, central force motion, impulsive motion, kinematics and motion of rigid bodies in two and three dimensions; accelerated frames of reference; mechanical vibrations. Cross listed with ENME 2510. Prerequisite: PHYS 1211.

**PHYS 2520 Applied Mechanics II (3 Credits)**

Second of a three-quarter sequence. Statics of particles, equivalent systems of forces, centroids and center of gravity, frames and machines, friction, moments of inertia, method of virtual work. Kinematics of particles, Newton's second law, energy and momentum methods for particles and systems of particles, angular momentum, central force motion, impulsive motion, kinematics and motion of rigid bodies in two and three dimensions; accelerated frames of reference; mechanical vibrations. Cross listed with ENME 2520. Prerequisites: PHYS 2510, ENGR 3610.

**PHYS 2530 Applied Mechanics III (3 Credits)**

Third of a three-quarter sequence. Statics of particles, equivalent systems of forces, centroids and center of gravity, frames and machines, friction, moments of inertia, method of virtual work. Kinematics of particles, Newton's second law, energy and momentum methods from particles and systems of particles, angular momentum, central force motion, impulsive motion, kinematics and motion of rigid bodies in two and three dimensions; accelerated frames of reference; mechanical vibrations. Cross listed with ENME 2530. Prerequisites: PHYS 2520, ENGR 3610.

**PHYS 2610 Physics of Climate (4 Credits)**

The course will examine energy from the sun and how it flows into the land, atmosphere, and oceans and then out to space, and how that regulates the average temperature of Earth (and other planets). Emphasis will be placed on the carbon cycle of the Earth and related topics: atmospheric chemistry of greenhouse gases, forests and phytoplankton, weathering, glaciers, paleontological climate, and the formation of ancient hydrocarbons. Algebra will be used in the class. A 1000-level NSM course or permission of the instructor is required.

**PHYS 2710 The Nanoscale Physics of Energy, Information, and Environment (4 Credits)**

This course, intended for physics majors with interests in nanoscale science and applications in condensed matter physics, sustainability, complex systems, and similar topics but open to other science or engineering majors on request, is formed from a series of quantitative explorations of the physics underpinning critical challenges for science and society in the 21st century. The level goes beyond introductory material, and students will exercise a basic understanding of quantum mechanics, chemical bonding, and thermodynamics. The goal is provide the bedrock understanding of the grand challenges that enables scientifically "literate" citizenship and action. Planned topics include the molecular and chemical physics that influences climate, the fundamentals of energy consumption in organisms, the nanoscale physics of information technology and energy generation. We will naturally explore connections between these areas. Enforced Prerequisites and Restrictions: (PHYS 1213 OR PHYS 1214) AND MATH 1953.

**PHYS 2830 Natural Optics (3 Credits)**

An investigation of naturally occurring optical phenomena with an emphasis on observational characteristics and causes. The winter 2020 planned offering will be hybrid, with in-class and online meetings. Credit can apply toward physics or astrophysics minor. Prerequisite: PHYS 1113, PHYS 1213 or PHYS 1214 or instructor's permission.

**PHYS 2991 Independent Study (1-10 Credits)****PHYS 2995 Independent Research (1-10 Credits)****PHYS 3100 Senior Seminar (2 Credits)**

This course offers primers on literature research, practices of a good scientific writing, putting together a good presentation or report, carrying out and documenting research, preparing for graduate program and/or job. Required for all Physics majors. Prerequisite: PHYS 2252.

**PHYS 3111 Quantum Physics I (4 Credits)**

First of a two-quarter sequence. The Schrödinger equation: interpretation of wave functions; the uncertainty principle; stationary states; the free particle and wave packets; the harmonic oscillator; square well potentials. Hilbert space: observables, commutator algebra, eigenfunctions of a Hermitian operator; the hydrogen atom and hydrogenic atoms. Prerequisites: PHYS 2252, PHYS 2260, PHYS 2556, PHYS 3612 and MATH 2070.

**PHYS 3112 Quantum Physics II (4 Credits)**

Second of a two-quarter sequence. Angular momentum and spin; identical particles; the Pauli exclusion principle; atoms and solids: band theory; perturbation theory; the fine structure of hydrogen; the Zeeman effect; hyperfine splitting; the variational principle; the WKB approximation; tunneling; time dependent perturbation theory; emission and absorption of radiation. Scattering: partial wave analysis; the Born approximation. Prerequisite: PHYS 3111.

**PHYS 3251 Astrophysics: Radiative Processes (4 Credits)**

Because light is the primary means by which astronomers learn about the Universe, understanding the production and subsequent behavior of light is key to interpreting astronomical observations. This course introduces students to the physics of astrophysical radiation and its interaction with matter as it travels from its source to our detectors. Topics may include radiative transfer, emission and absorption processes, Compton processes, synchrotron radiation, thermodynamic equilibrium, radiative and collisional excitation, and spectroscopy of atoms and molecules. The course is aimed at advanced undergraduates, as well as graduate students focusing on astrophysics research. Credit can apply toward physics or astrophysics minor. Prerequisites: PHYS 2252 and MATH 1953, or instructor's permission.

**PHYS 3252 Astrophysics: Observations (4 Credits)**

Astronomy is fundamentally an observational science and as such it is important for practitioners to understand how their data are collected and analyzed. This course is therefore a comprehensive review of current observational techniques and instruments, aimed at advanced undergraduates, as well as graduate students focusing on astrophysics research. This class introduces students to the capabilities and limitations of different types of instruments while exploring the sources and types of noise and providing statistical tools necessary for interpreting observational data. Credit can apply toward physics or astrophysics minor. Prerequisites: PHYS 2252 and MATH 1953, or instructor's permission.

**PHYS 3254 Astrophysics: Stars (4 Credits)**

Stars are the fundamental building blocks of the Universe. Hence, understanding the nature of stars is the first step toward understanding the Universe. This course is therefore intended to introduce students to the rigorous physical and mathematical treatise of stellar structure and evolution. Topics may include the theoretical origins and applications fundamental equations of stellar structure and other supporting equations, and theoretical and observational applications of stellar evolution. The course is aimed at advanced undergraduates, as well as graduate students focusing on astrophysics research. Credit can apply toward Physics major or Astrophysics minor. Prerequisites: PHYS 2252 and MATH 1953, or instructor's permission.

**PHYS 3255 Black Holes and Cosmology (4 Credits)**

The very small, the very large, and the very gravitational provide extreme tests of physics. In this course, we will cover two of these: cosmology, i.e., the universe on large scales, or as a whole (the very large) and black holes (the very gravitational). We will cover some basics of special and general relativity and quantum mechanics relevant to these topics, and discuss recent research testing these frontiers of physics, emphasizing analogies that help to relate these exotica to more familiar physical systems. Prerequisites: PHYS 2252 and MATH 1953.

**PHYS 3270 Workshop: Practical Astronomy (1-5 Credits)**

Capstone coursework featuring studies in experimental, computational, and/or theoretical work in astronomy and astrophysics. Credit can apply toward physics or astrophysics minor.

**PHYS 3310 Quantum Electronics & Topology (4 Credits)**

This Physics course will introduce students to the basics of electrical and topological phenomena in quantum materials. The course will focus on phenomenology in two-dimensional (2D) materials, in which quantum electronic transport and topology play a major role. Starting from quantum mechanics and condensed matter basics, we will introduce the most widely used 2D systems, such as graphene, and explore their electronic properties. Students will learn about modern concepts in the field of 2D materials, such as topology, electronic correlations, moiré physics, and fractionalization. Students will also have hands-on experience with basic electrical measurements and 2D device fabrication, designed to supplement the lecture.

**PHYS 3320 Introduction to Quantum Materials (4 Credits)**

General: This physics course will introduce students to the recent experimental and theoretical developments in the field of quantum materials. Students will gain a basic understanding of how reducing the dimensions of materials to the nanoscale can produce extraordinary physical properties. The course will focus on fundamentals and recent advances in the fields of quantum transport, 2D materials, strongly correlated electronic systems, topological materials, and superconductivity. The goal of this course is to prepare students to engage with the modern condensed matter physics research and application engineering of novel quantum materials.

**PHYS 3333 Magnetism and Spintronics: from Classical to Quantum (4 Credits)**

This Physics course will introduce students the fundamentals of magnetism and spintronics as well as their applications in both classical world and quantum world. Besides understanding the principle of modern technologies such as motors, hard disk drives, MRI etc., the students will also have hands-on experience with microelectronics, microwave and laser techniques specially designed to supplement the lecture.

**PHYS 3350 Physics and Information (4 Credits)**

Students in Physical Sciences are often well versed in the art of model building but less so in the process of model-selection when multiple models can describe the same data. Students rarely learn tools beyond curve fitting and least square error minimization for model selection. Consequently, students are often unaware of the scope of different tools and fail to make judicious choice of algorithms/theories when faced with diverse problems. For example, building a model from data is very different from generating data (stochastic or deterministic) from a model. Next consider two contrasting challenges of model building i) when there is limited data vs ii) when there is too much data. For the first problem – inferring models from limited data – the solution can be traced back to Boltzmann's formulation of Statistical Physics describing motion of atoms. The connection between Information theory, Inference and Boltzmann's description, however, is often overlooked in introductory or even advanced classes in Physics, and Statistics. Studying these similarities can unlock novel solutions for problems well outside of thermodynamics, even as far as Image processing, Biology and Network science. Inference also requires us to appreciate fundamental topics in Probability – difference between frequentist and non-frequentist approach, Bayesian formalism – that are rarely taught to physical scientists, life scientists or engineers. At the other extreme, faced with data deluge, we routinely ask: how do we make sense of too much data? We use clustering, PCA, Neural Networks. In this course we will discuss and connect all these seemingly disparate concepts and apply them – at the appropriate context – to diverse problems in Physics, Chemistry, Biology and beyond. In the process we will gain an in-depth knowledge about commonly heard but perhaps less understood topics such as: Entropy, Likelihood maximization, Bayesian statistics, PCA, Classification algorithms, and Neural Networks. We will also address another often overlooked but fundamental and fascinating topic, biology's inherent ability to encode and decode information. Currently there is no such course that address all these topics in Information and Data Science in an unified manner – deeply connecting their formal basis, regime of applicability – grounded on physical principles, with a forward looking approach towards application in many areas well outside of traditional sciences. A lot of learning in the course will happen 'on the fly', where the tools and application problems are learnt as needed. Prerequisites: Calculus I, Calculus II, and at least two other courses focusing on application of mathematics to problems in physics/chemistry/biology or engineering. Example of this course can be University Physics, Modern Physics, Biostatistics, Differential Equation, Linear Algebra, Computational Physics, or other equivalent courses (upon Instructor approval).

**PHYS 3510 Analytical Mechanics I (4 Credits)**

Lagrangian and Hamiltonian mechanics. Prerequisites: PHYS 1113, PHYS 1213, or PHYS 1214 and MATH 2070 and consent of instructor.

**PHYS 3520 Analytical Mechanics II (4 Credits)**

Second of a two-quarter sequence: two-body central force problems, moving coordinate systems, rotational motion of rigid bodies, coupled oscillations and normal modes, and Hamiltonian mechanics. Prerequisite: PHYS 3510.

**PHYS 3611 Electromagnetism I (4 Credits)**

First of a two-quarter sequence. Vector algebra; differential vector calculus (gradient, divergence and curl); integral vector calculus (gradient, divergence and Stokes' Theorems); line, surface and volume integrals; Electrostatics: the electric field, electric potential, work and energy in electrostatics; method of images, boundary value problems and solutions to Laplace's equation in Cartesian, spherical and cylindrical coordinates; multipole expansion of the electric potential; electric fields in matter: polarization; the electric displacement vector; boundary conditions, linear dielectrics. Magnetostatics: magnetic fields and forces. Prerequisites: PHYS 1113, PHYS 1213, or PHYS 1214 and MATH 2070.

**PHYS 3612 Electromagnetism II (4 Credits)**

Second of a two-quarter sequence. Magnetic vector potential; magnetic fields in matter: magnetization; fields of magnetized objects; linear and nonlinear magnetic materials; electromotive force, Ohm's law; electromagnetic induction; Faraday's law; Maxwell's equations; the displacement current; boundary conditions; the Poynting theorem; momentum and energy density of the fields; the Maxwell stress tensor; the wave equation and electromagnetic waves in vacuum and matter; absorption and dispersion; wave guides; the potential formulation and gauge transformations; retarded potentials; dipole radiation. Prerequisite: PHYS 3611.

**PHYS 3700 Advanced Topics: General (3 Credits)**

Offered irregularly, depending on demand. May be taken more than once for credit. Prerequisite: instructor's permission.

**PHYS 3711 Optics I (4 Credits)**

First of a two-quarter sequence. Gaussian optics and ray tracing; matrix methods and application to optical design; elementary theory of aberrations; light as electromagnetic wave, diffraction and interference; interferometers and their applications. Elementary theory of coherence; selected topics. May include laboratory work as appropriate. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214, and MATH 2070.

**PHYS 3720 Light-Matter Interaction (4 Credits)**

This course will introduce the theory and applications of light-matter interactions. Fundamental theory will be explored from both semi-classical and quantum perspectives, and photon-carrier interactions will be studied in a variety of physical systems, including atoms, glasses, semiconductors, and metals. Experimental techniques will also be discussed, such as absorption, photoluminescence, and coherent spectroscopies, in addition to ultrafast nonlinear optical interactions. Students will also build their own demonstration and teaching module for elementary-age children, and will use their module to teach children at a local school.

**PHYS 3841 Thermal Physics I (4 Credits)**

First of a two-quarter sequence. Laws of thermodynamics; thermal properties of gases and condensed matter; kinetic theory of gases, classical and quantum statistics. Prerequisites: PHYS 1113, PHYS 1213 or PHYS 1214 and MATH 2070.

**PHYS 3850 Foundations of Biophysics (3 Credits)**

The course highlights application of basic physics principles to the study of cells and macromolecules. Topics include random processes, thermodynamics, statistical mechanics, diffusion, to provide a quantitative description of different processes in biology at the molecular and cellular level.

**PHYS 3860 Numerical and Computational Methods in Physics (4 Credits)**

The main goal of this course is to gain a better understanding of physical problems by solving them numerically; in the process, students learn about several numerical methods and computational techniques that have a very broad range of applications in many other scientific fields. Depending on the problem, students work with a software package (Mathematica), and also acquire coding experience in different programming languages.

**PHYS 3870 Special and General Relativity (4 Credits)**

This course will start with the techniques in Special Relativity and build familiarity with tensors. In the second part of the quarter, we will generalize to curved spaces and the Schwarzschild solution. And, finally, we will set up and solve the Einstein equations using the Cartan equations of structure to study the Robertson Walker metric spacetime used to construct the energy budget of the universe. Prerequisites: MATH 1953 and either PHYS 1213 or PHYS 1214.

**PHYS 3991 Independent Study (1-10 Credits)****PHYS 3995 Independent Research (1-10 Credits)**

## Political Science (PLSC)

**PLSC 1000 Introduction to American Politics (4 Credits)**

Philosophical traditions, historical background, structure and functioning of American government, and political attitudes and behavior. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1110 Comparing Politics around the World (4 Credits)**

This course introduces students to the study of comparative politics, a sub-field within political science that uses a "comparative method" to compare and contrast countries to understand questions such as Where do 'states' come from? Why are only some democratic? How do states promote economic development? Why are some states increasingly rich while others remain poor? Why do people mobilize peacefully to influence politics in some places while they violently attack the established order in others? How do distinct identities rooted in ethnicity, gender, race, and religion influence politics differently around the world? How does globalization affect various countries, and why do some seem to cope with contemporary challenges more effectively than others? This course counts toward the "Scientific inquiry: Society and culture" requirement.

**PLSC 1610 Introduction to Political Thought: Citizenship and Action (4 Credits)**

This course presents an introduction to some of the key ideas and questions in the study of politics. As an introductory course, it cannot present a systematic overview of the entire study of politics; rather, it seeks to introduce students to some central concerns in the study of politics. In this course we learn about the basic principles of human conduct in social contexts and explain how social scientific methods are used to understand these underlying principles. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1810 Introduction to Law and Society (4 Credits)**

This course introduces the relationship between law and society, exploring principles of legal conduct in social contexts and explaining how social scientific methods are used to understand these principles. Questions discussed include what is the relationship between the “law-on-the-books” and “law-in-action,” and what can we learn from gaps between formal law and the “real” law that is experienced in society? Empirical examples may include international comparisons and the evolution of law over time. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PLSC 1988 Study Abroad Resident Credit (0-18 Credits)****PLSC 2001 Law and Politics (4 Credits)**

Introduces the relationship between law and politics, describing the basic principles of legal conduct in political contexts and explaining how social scientific methods are used to understand these underlying principles. Questions explored may include the following: Where does the law come from? Whose interests does it reflect? Does formal legal change lead to practical political and social change? Why do we comply with the law? What are the limits of enforcement? This course counts toward the Scientific Inquiry: Society and Culture requirement. It also satisfies the department distribution requirement in law. Prerequisite: sophomore standing & either PLSC 1000, 1110, 1610, or 1810.

**PLSC 2002 Abortion Politics and Law (4 Credits)**

Abortion has been, and continues to be, a defining issue in America politics and law. As the traditional story goes, the country has been locked in a high-stakes and highly controversial fight over abortion since the Supreme Court legalized access in 1973 via the *Roe v. Wade* decision. While a convenient story, it egregiously oversimplifies both the past and present of abortion politics and law. This class aims to explore the cyclical and complex relationship between law and politics of abortion in America: how it came to become a national issue; how and why its contours have changed over time; what effects it has had on people's lives and the country's politics; and how we can constructively think about the new, post-*Roe* US. In doing so, we will also consider how the case study of abortion can inform our more general understandings of American politics, law, movements, and political parties.

**PLSC 2010 Polarization in America (4 Credits)**

This course covers major themes surrounding polarization in American politics. From the 1930s through the 1970s, the most conservative Democrats in the Senate were actually further to the right than the most liberal Republicans. Since that time, the parties slowly but steadily distanced themselves from each other, leading to our current state of politics; One defined not by compromise and conference committees, but rather by obstruction, gridlock, and filibusters. Voters mimic this divide, becoming increasingly hostile and antagonistic to their political opponents.

**PLSC 2020 Politics of Desire (4 Credits)**

This course surveys political theory literatures on the topic of desire—with a focus on sexuality. Readings will survey historical and contemporary theories of relationships, sexual identity, and power, and topics will include the relationships between ideas about desires and ideas about bodies, needs, and preferences. We will think about desire as it manifests in our individual and collective lives, such as its relationship with race, gender, aesthetics, and freedom. We will especially tackle the problem of how to transcend affinities for hierarchy and distinction and in their place generate desires for democratic equality.

**PLSC 2025 Youth Political Participation: Comparative Perspectives (4 Credits)**

This advanced undergraduate seminar examines how young people engage in politics across the world, comparing patterns of participation, disengagement, and mobilization across generations. Students explore major debates in youth political participation and citizenship studies through scholarly readings, documentaries, and discussions of current events. This course fulfills the international/comparative politics subfield requirement for political science majors.

**PLSC 2070 Power, Politics and Religion in Sub-Saharan Africa (4 Credits)**

Focusing primarily on Anglophone cases and the growth and diversification of Christianity over time, this course examines religious justifications for independence struggles, the anti-Apartheid movement, and church-led campaigns for democratization and international debt relief. It also explores the contemporary rise of born-again Christian nationalism in many African states and its policy implications. It uses a combination of audiovisual and written materials, guest speakers, student presentations, lectures, and discussions. This course counts toward the comparative/international politics sub-field requirement for PLSC majors.

**PLSC 2100 Political Psychology of Identity (4 Credits)**

This course introduces you to the interdisciplinary field of political psychology with a focus on exploring the various foundations of social identity and the implications of these identities for political outcomes in the United States. Throughout the quarter, we'll compare the influence of different identities and examine the psychological and political implications of social identities. The class focuses on two key identities: gender and race. We'll examine the psychological foundations of gender and racial stereotyping and prejudice, how race influences perceptions of the criminal justice system, and the ways in which White identity shapes citizens behavior and opinion in American politics. We finish the quarter with a focus on new, emerging scholarship that further complicates the relationships between human psychology and gender and racial identity.

**PLSC 2200 Politics of China (4 Credits)**

Napoleon Bonaparte allegedly said, "let China sleep, for when she wakes up, she will shake the world." Two hundred years later, China is indeed waking up, and the world is feeling the dragon's hot breath. In this class we will examine the fall and rise of the Chinese state, with a focus on its political and economic trajectories after the founding of the People's Republic of China (PRC) in 1949. Some of the key issues to be examined are: China's "economic miracle," when, if ever, will China democratize, its potentially explosive relations with Taiwan, its challenges to America's global hegemony, etc.

**PLSC 2220 Comparative Democratization: East and West (4 Credits)**

This course brings the contested notion of democratization into the East Asian context and tests its relevance for countries at various stages of political and economic development in the region. After introducing the general debates over what democratization is and tracing its emergence in Western Europe and North America, class explores the rise of democratization movements in East Asia and examines the various forms of democratization in different political and economic settings. Satisfies the department distribution requirement in comparative/International politics. Prerequisite: Sophomore standing.

**PLSC 2225 European Political Economy (4 Credits)**

Examines major challenges facing European political economies from the postwar era, including transformations in the welfare state, liberalization in light of market transitions and European integration, and global pressures. Prerequisite: sophomore standing.

**PLSC 2235 Politicized "Ethnicity": Cross-Disciplinary Approaches to the Study of Identity Politics (4 Credits)**

What are racial and ethnic identities? Are they more likely to influence political outcomes than other types of identity (e.g., gender, profession, class), and if so, why? This course introduces competing concepts of ethnic identity and connects them to the historical construction of race and national identities. By studying these issues in cases outside of the United States, you will gain unique comparative perspective about the idiosyncrasies of U.S. politics and history. Course materials include readings, podcasts, videos and documentary footage from political science, sociology, legal studies, and other disciplines. Why take this course? Gaining insight into the construction of ethnic, racial, and national identities will help you better understand yourself, your relationships, political campaigns, activist tactics, and episodes of political violence, among other things. The course satisfies the departmental sub-field requirement for majors in comparative/international politics. Recommended before taking this course: one introductory level course in political science.

**PLSC 2250 Democratic Erosion: Comparing Experiences Across Countries and Over Time (4 Credits)**

As the conclusion of the Cold War spurred a tidal wave of democratization around the globe, western policy makers and pundits often assumed that even in weak, poverty-impacted states attempts to democratize were bound to succeed – at least eventually. By 2008, however, the discourse of democratization had been transformed. "Celebrations of democracy's triumph are premature," wrote a noted scholar of democratization; "in a few short years, the democratic wave has been slowed by a powerful authoritarian undertow." Recently, both the quality and quantity of "democratic" states have declined. Even the world's oldest, most taken-for-granted liberal democratic regimes increasingly flout democratic norms and policies. We consider a range of comparative cases from across world regions. Along the way, we engage with several prominent theories of democratic backsliding or authoritarianization. The course satisfies the departmental sub-field major requirement in comparative/international politics.

**PLSC 2260 Politics of Japan (4 Credits)**

How did Japan rapidly catch up with more advanced industrial powers? Can other developing countries copy the Japanese model? What was the "darker side" behind Japan's economic miracle? How do we come to terms with the sudden burst of Japan's "Bubble Economy?" Will Japan's current economic recovery process, which started in 2002, be sustainable? Is a genuine international reconciliation between Japan and its neighbors possible? These are just some of the questions we will examine in this class. Prerequisite: sophomore standing.

**PLSC 2290 Comparative Politics of Latin America (4 Credits)**

Latin America is home to the uneasy marriage between politics and economics. This course will focus on two major themes in Latin American politics. First, this course will examine why Latin American countries swing between democratic and authoritarian regimes. Second, the course will examine how local and global economic forces interact with politics in the region. The course will also cover some contemporary issues in Latin America such as corruption, inequality, migration, and climate change.

**PLSC 2360 Settler Colonialism and Indigenous Resistance in Three Continents (4 Credits)**

This course explores historical and contemporary aspects of racialized power structures as they have specifically impacted indigenous peoples in Australia, the United States, and Latin America. How did the dynamics of imperialism, capitalism, liberal state-building, and racist (and racist) ideology combine to devastate indigenous communities around the world? How did distinct perspectives on time, space, property, and community allow colonizing populations to conquer native populations even while advocating the most egalitarian political structures ever attempted? Satisfies department distribution requirement in comparative/international politics. Sophomore standing required.

**PLSC 2370 Global Political Economy (4 Credits)**

Global Political Economy (GPE) examines the interplay between politics and economics within and across nation-states in response to international politics and economics. The course explores the effect of political factors on international economic relations and the impact of international economic factors on domestic and international politics. The objective is to evaluate various theories of the global political economy through observation of the global political-economic system. Satisfies the department's distribution requirement in comparative/international politics. Prerequisite: Sophomore standing.

**PLSC 2410 American Government Simulation (4 Credits)**

This course explores American politics by simulating the legislative process of the federal government. Students play either a member of the House of Representatives or a member of the Executive Branch. The simulation requires that students seek the goals related to their position. By putting theory into practice, students gain a better understanding of Washington politics. Satisfies the department distribution requirement in American politics. Prerequisite: Sophomore standing.

**PLSC 2415 Campaigns and Elections (4 Credits)**

The U.S. holds hundreds of elections every year, but presidential elections stand alone as the only truly national contests. What influences presidential selection? What information can we gain as citizens and scholars from national presidential debates? These elections are guided by distinct rules (including nominations via primaries and caucuses, evolving campaign finance laws, and the strict requirements of the Electoral College) with ever-changing strategies to maximize support under these rules. This class provides students with the historic context and political science concepts and theories to better understand the many steps involved in electing U.S. presidents.

**PLSC 2420 American Presidency (4 Credits)**

Historical development and current role and powers of the U.S. presidency. Prerequisite: sophomore standing.

**PLSC 2425 Religion in American Politics (4 Credits)**

This course offers a broad, critical overview of the relationship, and some of the tensions, between religion and politics in the United States. We first review how the historical presence of a variety of American religious groups and perspectives on the relationship between church and state have impacted the nation's often conflicted sense of identity as well as the tenor of our ongoing debates about - and within - religion in American politics. That gives us a foundation for exploring a number of current "hot button" issues like debates over "moral values" and faith-based initiatives. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2430 Political Parties & Interest Groups (4 Credits)**

Evolution and structure of political parties; how they mobilize voters and provide leadership of political issues. Satisfies the department distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2450 Latina/x/o/e Politics in the United States (4 Credits)**

This class will examine the political trajectory of the Hispanic/Latina/e/x/o/@ population in the U.S. political system. This course serves as an intensive introduction to the scholarship on Latino Politics. The first half of the class will cover different Latin American national origin groups separately. The readings on national origin groups will examine and analyze political outcomes such as political behavior and preferences. The second half of the course will focus on policy outcomes, political behavior, and recent elections as they pertain to Latinos in the United States.

**PLSC 2460 Re-Inventing Europe (4 Credits)**

Politics, economics and culture of Europe of today including basics of parliamentary democracy, contemporary political economy and national identities of major European countries as well as developments in the European Union and Eastern Europe. This course counts toward the sub-field requirement for PLSC majors in the comparative/international politics.

**PLSC 2470 State and Local Politics (4 Credits)**

This course examines the general and the unique traits of the politics, institutions, and policy processes of state governments. We will, in addition, take advantage of our location and focus on the government and politics of Colorado. Satisfies the department distribution requirement in American politics. Prerequisite: Sophomore standing.

**PLSC 2480 U.S. Congress (4 Credits)**

Structure and functions of U.S. Congress and congressional behavior. Satisfies the department distribution requirement in American politics and counts toward the Scientific Inquiry: Society and Culture common curriculum requirement. Prerequisite: sophomore standing.

**PLSC 2500 Political Psychology (4 Credits)**

This course examines the intersection of politics and psychology. Students will examine how emotion, cognition, and group psychology influence political actors and policy outcomes. Students will apply these concepts to voting, foreign policy decision-making, and the formation of belief systems.

**PLSC 2510 Women in U.S. Politics (4 Credits)**

This course focuses on the role of women in U.S. politics, with an emphasis on voting, elections, and representation. Topics include the woman suffrage movement, women's voting patterns, women as candidates, and women holding elected office. Prerequisite: sophomore standing.

**PLSC 2520 Public Opinion & Behavior in the US (4 Credits)**

Why do people believe the things they believe about American politics? Why do people get involved in politics at all? Through this course, we'll explore the attitudes, beliefs, and behavior of the American voter through traditional participation like voting, higher cost activities like volunteering for campaigns, or less traditional forms like running for office or participating in protests. This class provides a strong background on the scholarly literature surrounding participation and opinion and helps to dispel common myths about voters.

**PLSC 2530 Race & Ethnicity in US Politic (4 Credits)**

This course addresses the issues of race and ethnicity in American politics through two lenses: the crafting and implementation of domestic policies (such as welfare, education, and the criminal justice system) and the framing of political decisions. After an introduction to historical, sociological, and psychological approaches to the study of race and ethnicity, we apply these approaches to studies of American public policy. The course then transitions, examining the explicit and implicit racialization of political decisions. Throughout the course, students consider the role of institutional design, policy development, representation, and racial attitudes among the general public in shaping the American political environment.

**PLSC 2611 Neoliberalism: The Privatization of Everything, and its Problems (4 Credits)**

This course examines the origins, evolution, and implementation of "neoliberalism," the policy persuasion that advocates privatizing, marketizing, and deregulating the provision of almost all goods and services. Special attention will be given to the privatization of the provision of national security, what historically has been viewed as the most central function of government. This course satisfies the department's political theory distribution requirement.

**PLSC 2620 Quest for Community (4 Credits)**

This course explores how political theory over the past several decades has grappled with the benefits, limitations, and paradoxes of liberalism in the post-modern world. Inquiry revolves around whether and how liberalism can deal with the identities, differences, and distributive inequalities that complicate our world today. Is liberalism -or its successor ideology, neoliberalism- an appropriate model for political community, or should it be replaced with a different paradigm? What would it mean to think beyond liberalism to something more radical and democratic? Satisfies the department distribution requirement in political theory. Junior standing required.

**PLSC 2630 American Political Thought (4 Credits)**

Where do distinctly "American" values and beliefs come from and why are they so fiercely held? Are there viable alternatives to the classic ways in which Americans tend to address our social and political problems? This course offers an exploration of these questions from the perspective of a diverse array of American political thinkers. Starting before the Founding and continuing to political thinkers of the present day, this seminar-style course will examine different interpretations of American identity—and the unique ways they intersect—in American political speech and theory. Satisfies the department distribution requirement in either American politics or political theory. Prerequisite: Sophomore standing.

**PLSC 2660 Feminist Political Thought (4 Credits)**

This course surveys political theory literatures on feminist thinking and activism. Readings will survey historical and contemporary theories of gender, identity, patriarchy, misogyny, and liberation. Course will center trans and of-color feminist narratives thinking and practices. Emphasis on critical analysis of various feminist texts in writing and in class discussion.

**PLSC 2670 Radical Democracy (4 Credits)**

What does it mean to say "the people acted"? What is democracy, or what could it be? This course pursues answers to these questions through an exploration of works in political theory. We will read texts that attempt to move beyond procedural forms of democracy such as elections and representation and argue for more substantive forms of democracy in the form of deliberation, racial justice, and disagreement. To think about the ideas in these texts as resources for enacting radical democracy from within less than democratic institutions, we will also conduct voter registration and/or education on or off campus.

**PLSC 2701 Topics in American Politics (4 Credits)**

Focuses on specific issues in politics of the United States. PLSC 2701 satisfies the department's distribution requirement in American politics. Prerequisite: sophomore standing.

**PLSC 2702 Topics in Comparative Politics (4 Credits)**

Focuses on topics in comparative and/or international politics. Satisfies the departmental sub-field requirement in comparative/international politics. Prerequisite: sophomore standing.

**PLSC 2703 Topics in Law and Politics (4 Credits)**

Focuses on topics in law from a political science perspective. Satisfies departmental distribution requirement in law. Prerequisite: sophomore standing.

**PLSC 2704 Topics in Political Theory (4 Credits)**

Focuses on topics in political theory. Satisfies departmental sub-field requirements in political theory. Prerequisite: sophomore standing.

**PLSC 2755 Legal Actors and Institutions (4 Credits)**

This course examines the legal system from the points of view of those who work within it. It considers the social characteristics of lawyers, judges, regulators, elected officials and non-state actors, and how they matter to the social construction of law. The emphasis is on the social organization of law and the everyday interactions that bring meaning to the legal system. It considers and seeks to understand how legal roles, legal institutions and power relations within the law influence its development and practice. Throughout the course, students are required to think critically about how society and the social relationships of law influence law's outcomes. Prerequisite: Sophomore standing.

**PLSC 2820 Constitutional Law: Civil Rights and Liberties (4 Credits)**

This course addresses major ideas and principles of U.S. constitutional law, with a focus on equal protection of the law, fundamental rights, and freedom of speech and religion. Within each of these areas, we will consider the development of court rulings over time, economic and political influences on court decision-making, and policy implications of these rulings. While PLSC 2860 complements this course, it is not necessary to take both courses. Satisfies the department distribution requirement in law. Prerequisite: Sophomore standing.

**PLSC 2825 The Politics of Rights (4 Credits)**

This course examines rights and rights-claims as complex and contingent resources for political actors. The class aims at equipping students to be better able to identify, understand, and critically evaluate how, why, and to what end rights claims are used in politics. Particular attention is paid to social and political movements that use rights-claims, as well as the various advantages, limitations, and problems that can accompany rights-based political appeals. Prerequisite: sophomore standing or above.

**PLSC 2830 Judicial Politics (4 Credits)**

This course considers the role of courts, especially the Supreme Court, in the U.S. political system. Topics include the the potential dangers and benefits of allocating significant power to un-elected justices, judicial decision-making, Court-Congress interaction in developing public policies, the social and political effects of court rulings, and legal interest groups.

**PLSC 2835 European Union law and politics (4 Credits)**

This course explores the law and politics of European integration in the postwar era, examining how and why states that invented sovereignty became bound by a supranational legal system that regulates the largest single market in the world and diverse communities across European countries. Questions include the following: What is the origin and future of the European Union (EU)? Why did Russia invade Ukraine about a decade after the EU won the Nobel peace prize for its promotion of peace, prosperity, and democracy in Europe? What are the causes and consequences of the United Kingdom's (UK) withdrawal from the EU, in a process called "Brexit" (British exit)? How has the EU responded to the erosion of democracy and the rule of law in multiple member states? This course may count toward the Scientific inquiry: Society and culture common curriculum requirement and either the law or comparative politics sub-fields of the Political Science major.

**PLSC 2840 International Law & Human Rights (4 Credits)**

This course explores the role that international law plays in promoting human rights. Why did states first commit to international human rights protections after the Second World War? Why did states voluntarily surrender their sovereignty by signing and ratifying human rights treaties that limit their freedom to act domestically? Does this international law influence governments' human rights practices? Who enforces international human rights law? Which countries are leaders or laggards when it comes to international human rights? This course can count toward the sub-field requirement for PLSC majors in either law or comparative/international politics.

**PLSC 2850 Politics of Criminal Justice in the US (4 Credits)**

Problems and reforms in American criminal justice system; causes and extent of crime, excessive use of force by police, systemic racism, bail reform, probation and parole; prisons and police/community relations. Prerequisite: sophomore standing.

**PLSC 2855 Conservative Politics and the Courts (4 Credits)**

This course focuses on the reasons for and uses of litigation and judicial politics in the pursuit of conservative ends. As such, the class critically examines the different major sub-groups that define modern American conservatism; how these subgroups compare to and interact with one another; the conditions that allow for political movements generally to use courts in pursuing policy ends; and the specific steps that various American conservative groups have taken in order to influence courts, law, and policy. Introduction to American Politics (PLSC 1000) is recommended, but not required.

**PLSC 2860 Constitutional Law: Governmental Structures and Powers (4 Credits)**

This course addresses major ideas and principles of U.S. constitutional law, with a focus on federalism, the growth of national power, and separation of powers. Within each of these areas, we will consider the development of court rulings over time, economic and political influences on court decision-making, and policy implications of these rulings. While PLSC 2820 complements this course, it is not necessary to take both courses. Satisfies the department distribution requirement in law. Prerequisite: Sophomore standing.

**PLSC 2880 Comparative Constitutional Politics (4 Credits)**

Many fear that democracy is in decline, in the US and around the world. Citizens in the US and many other countries look to judicial review of written constitutions as a way to preserve democracy while protecting rights. Yet can judges serve effectively as guardians of democracy or rights? Do US-style "checks and balances" violate the "separation of powers" when judges declare that laws – approved by elected representatives in the legislative and executive branches – are unconstitutional and must be overturned? Does this approach of "constitutionalism" create a "juristocracy" – government by judges – that is incompatible with representative democracy? In this course, we examine constitutional politics comparatively, (1) exploring why constitutionalism spread widely during the postwar and post-Cold war eras and (2) analyzing its implications for contemporary democracies and their citizens. As a course in the sub-field of comparative and international politics, cases from outside the US will be the focus of our inquiry, with the US discussed in comparative perspective.

**PLSC 2901 Political Inquiry (4 Credits)**

Introduces political inquiry within the discipline of political science, examining quantitative, qualitative, and historical research methods with a focus on basic principles of effective research design and data analysis; no previous mathematical background is necessary. By the end of the course, students are able to evaluate scientific research, frame a research question, and design a research study. Prerequisite: sophomore standing.

**PLSC 2988 Study Abroad Resident Credit (0-18 Credits)****PLSC 3290 Capstone Seminar in Politics (4 Credits)**

This capstone seminar is required for all majors and explores theoretical and empirical issues of politics with application to specific political developments. Topics vary by section and instructor. All students complete a significant independent research paper based in part on analysis of primary source materials. Senior standing required. Political Science majors only.

**PLSC 3701 Topics in Political Science (1-4 Credits)****PLSC 3702 Topics in Political Science (1-4 Credits)****PLSC 3703 Topics in Political Science (1-4 Credits)****PLSC 3704 Topics in Political Science (1-4 Credits)****PLSC 3982 Political Internship (1-4 Credits)**

This is a hybrid on-line/in-class internship course. Students may work on political campaigns at the federal, state, or local level. Students will keep journals structured by questions from a faculty member, meet in a seminar with others doing an internship to reflect on service in their placement, respond to on-line assignments and writing prompts, and write a research paper integrating their experience with relevant scholarship.

**PLSC 3985 Legal Internship (4 Credits)**

This is an online class for students working in internships related to the legal profession. Students may work in the local courts, advocacy organizations, the public defender's office, or the district attorney's office, either in Denver or elsewhere in the U.S. Students will complete internship hours in addition to engaging in an online course that focuses on professional development, reflections on the internship experience, and relevant legal scholarship. Students are responsible for applying to and securing their own internships (with assistance from the professor), and should plan to begin this process early, typically in advance of registration.

**PLSC 3988 Study Abroad Resident Credit (0-18 Credits)****PLSC 3990 Honors Thesis (2-8 Credits)**

Independent work on honors thesis. Prerequisite: senior standing.

**PLSC 3991 Independent Study (1-4 Credits)**

Independent scholarship on a theoretical or empirical project. Prerequisite: faculty approval.

**PLSC 3995 Independent Research (1-10 Credits)**

Students must get instructor permission and fill out an Independent Study/Research form in order to enroll in an independent research course.

## Psychology (PSYC)

**PSYC 1001 Foundations of Psychological Science (4 Credits)**

The goal of this course is to provide a general introduction to psychology examining the biological basis of behavior, perception, learning, memory, developmental transitions, personality, psychopathology, treatment, and social contexts for behavior. After completing this course, students will be able to (1) demonstrate an understanding of the defining principles and perspectives central to the inquiry of psychological science, (2) understand appropriate methods, technologies, and data that social and behavioral scientists use to investigate human functioning and conduct, and (3) develop and communicate alternative explanations or solutions for social issues considering cultural and social contexts. This course has a required recitation/discussion meeting each week. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**PSYC 1700 Topics in Psychology (0-4 Credits)****PSYC 2010 Psychology of Women (4 Credits)**

The Psychology of Women examines psychological theories, research, and applications related to women's experiences through an intersectional feminist perspective. Throughout this course, students: 1) analyze psychological research through an intersectional feminist lens, 2) critically evaluate psychological theories related to gender, identity, and mental health, and 3) engage in informed discussions on key topics, including gender socialization, reproductive health, power dynamics, and mental health disparities. Prerequisite: PSYC 1001.

**PSYC 2031 Introduction to Cognitive Neuroscience (4 Credits)**

The goal of this course is to examine the relations between brain and behavior to better understand how complex behavior is mediated by the brain. Prerequisite: PSYC 1001.

**PSYC 2070 Child and Lifespan Development (4 Credits)**

This course explores biological, cognitive, social and emotional development across the lifespan, from the prenatal period through old age. After completing this course, students will be able to understand developmental methods and data that scientists use to investigate human development, apply developmental concepts to real-life situations and contexts, and understand explanatory systems and theories. Special attention is given to the influence of cultural and socioeconomic variations on human development. Prerequisite: PSYC1001.

**PSYC 2090 Human Sexuality (4 Credits)**

Physiological, behavioral and social aspects of human behavior. Prerequisite: PSYC 1001.

**PSYC 2100 Political Psychology of Identity (4 Credits)**

This course introduces you to the interdisciplinary field of political psychology with a focus on exploring the various foundations of social identity and the implications of these identities for political outcomes in the United States. Throughout the quarter, we'll compare the influence of different identities and examine the psychological and political implications of social identities. The class focuses on two key identities: gender and race. We'll examine the psychological foundations of gender and racial stereotyping and prejudice, how race influences perceptions of the criminal justice system, and the ways in which White identity shapes citizens behavior and opinion in American politics. We finish the quarter with a focus on new, emerging scholarship that further complicates the relationships between human psychology and gender and racial identity.

**PSYC 2112 Psychology Research (1-5 Credits)**

Through this course, students receive course credit while working on research projects in faculty-directed research groups. Roles and responsibilities vary by type of research conducted, phase of research projects that are active, and experience of the student participating in research. Students should reach out to those running research groups to ask about availability for any given quarter. Permission of instructor required.

**PSYC 2300 Introduction to Statistics (4 Credits)**

Elementary statistical methods in psychology and education. Required for all students, but especially important for students planning graduate work in psychology. Recommended: knowledge of basic algebra. Prerequisite: PSYC 1001.

**PSYC 2500 Adult Psychopathology (4 Credits)**

Nature, causes, treatment and prevention of patterns of psychopathology (clinical disorders), primarily in adults. Prerequisite: PSYC 1001.

**PSYC 2540 The Psychology of Couples Relationships: From Dating to Mating and Beyond (4 Credits)**

The primary complaints of couples in therapy include: "We can't communicate." "We fight too much." "We have grown apart and have no sex." "He/she cheats on me and /or is aggressive." We cover research on these issues, as well as how to help couples select great mates and have a lifetime loving healthy relationship. Throughout the course we cover overarching themes including the influence of popular culture (listening to music, watching movie clips) diversity in relationships (e.g., Same-sex Marriage). Prerequisite: PSYC 1001.

**PSYC 2610 Forensic Psychology (4 Credits)**

Scientific study of the intersection of human behavior and the legal process. Prerequisite: PSYC 1001.

**PSYC 2620 Psychology of Diversity (4 Credits)**

This course provides a deep investigation into issues of diversity from a psychological perspective, including how we can understand both the value of and the threats to diversity in regards to gender, race, age, weight, and more. Prerequisite: PSYC 1001.

**PSYC 2630 Organizational Psychology (4 Credits)**

This course will provide an introduction to the field of Organizational Psychology. Organizational psychologists aim to understand behavior in organizational settings. Additionally, they apply psychological research to understanding behavior at work. The course will be broken into three units that focus on different levels of the organization. In the first unit, we will discuss the individual-level, including topics such as personality and diversity. The second unit will focus on groups, including topics such as group dynamics and negotiation. In the third unit, we will apply what we've already learned to understand the system-level, including discussions of organizational culture and organizational change. Prerequisite: PSYC 1001.

**PSYC 2650 Environmental Psychology (4 Credits)**

One simple fact about our existence is that we are influenced by the physical environment, and our actions shape the environment in which we live. The course will use a case study approach to focus on the interaction between the environment and human beings, examining how the physical features of the environment impact our cognition, behavior, and well-being, and how our actions in turn produce immediate and long-term consequences on the environment. This course will also provide an overview of several pressing environmental challenges (e.g., climate change), and explore how these issues impact individual human beings, and what we can do to promote sustainability.

**PSYC 2700 Topics in Psychology (1-4 Credits)**

Prerequisite: PSYC 1001.

**PSYC 2701 Topics in Psychology (1-4 Credits)**

Prerequisite: PSYC 1001.

**PSYC 2740 Social Psychology (4 Credits)**

Concepts, data and principles regarding social influences on human behavior. Prerequisite: PSYC 1001.

**PSYC 2751 Junior Honors Research Seminar (1-4 Credits)**

First course in a two-year sequence. Research, design and methodology to facilitate a senior research thesis. Prerequisites: PSYC 1001. PSYC 3050. Requires acceptance to psychology distinction program and permission of instructor.

**PSYC 2752 Junior Honors Research Seminar (1-4 Credits)**

Second course in a two-year sequence. Research, design and methodology to facilitate a senior research thesis. Prerequisites: PSYC 1001. Requires acceptance to psychology distinction program and permission of instructor.

**PSYC 2760 Field Experiences in Learning & Applied Behavior Analysis (4 Credits)**

Introduction to the application of learning principles and applied behavior analysis. Students obtain first-hand experiences working in a community setting. Prerequisites: PSYC 1001. Permission of instructor required.

**PSYC 3010 Psychology Micro-credential (2 Credits)**

In this class, students brainstorm, develop, and execute an experiential project in the area of either Diversity and Inclusion, Data-informed Decisions, or Mental Health, while engaging in a variety of professional development activities (e.g., mock interviews, in-class workshops on writing CVs, resumes, and personal statements). Each student's experiential project is unique, related to their chosen micro-credential pathway, and based on their personal area(s) of interest. For example, a student pursuing a Diversity and Inclusion micro-credential might choose to investigate the efficacy of workplace diversity trainings and create an industry-facing resource for effective training approaches. A student on the Data-informed Decisions pathway might propose or conduct a research study or learn a new data analysis software (e.g., R, JASP, SPSS). Finally, a student pursuing a micro-credential in Mental Health might engage in an internship or interview clinicians and write a report on their findings. Overall, this class allows students the opportunity to delve deeper into an area of psychology they are personally passionate about and helps them to be better prepared for whatever comes next after graduating from the University of Denver. By passing this class and (separately) passing two required classes and one elective class (based on the student's chosen micro-credential pathway; course options can be found here: <https://liberalarts.du.edu/psychology/academics/psychology-micro-credentials>), students can earn a micro-credential and digital badge. (More information about micro-credentials and digital badges can be found here: <https://www.du.edu/registrar/academic-programs/micro-credentials-badges>). Instructor approval is required to join this course and is only granted after interviewing and applying (contact Dr. Daniel Storage at [Daniel.Storage@du.edu](mailto:Daniel.Storage@du.edu) for more information).

**PSYC 3015 Nonverbal Behavior (4 Credits)****PSYC 3020 Adolescence (4 Credits)**

This course examines development during the adolescent years exploring biological, cognitive, and social transitions central to this developmental stage. It considers key contexts in which adolescents develop: families, peer groups, schools, work, leisure, and the mass media. Special attention is given to the importance of diverse social and cultural experiences and its impact on adolescent behavior and cognition. Prerequisites: PSYC2070 and PSYC3050, must be major or minor in psychology, must have junior or senior standing.

**PSYC 3028 Social Cognition (4 Credits)**

Social cognition describes how people make sense of themselves and others. The emphasis on “how” is important—social cognition research focuses on perceptual, cognitive, and affective processes that help people think about themselves and others. You will learn about the theories, findings, and methods in a specific area of study. If you have not taken one of those courses, you should talk the instructor before signing up for this class.

Prerequisites: PSYC 2740 and PSYC 3050. Course is restricted to psychology majors or minors with at least junior standing.

**PSYC 3029 Imaging the Mind (4 Credits)**

Imaging the Mind is an introductory course to the basic theory and data analysis techniques used in functional magnetic resonance imaging (fMRI).

It will cover basic brain anatomy, the basic physics of MRI, experimental design, data processing and the issues associated with data processing, and interpretation of fMRI data. Students in this course will receive hands-on experience in processing a data set from start to finish. They will apply different image preprocessing techniques, statistical design parameters, and statistical models to determine how these factors influence the outcome of the data and how these factors influence the interpretation of that data. In this manner, each student will be exposed individually to the decision issues and interpretation pitfalls involved in fMRI data analysis. Cross listed with PSYC 4255. Prerequisites: PSYC 2031 and PSYC 3050, must be major or minor in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3032 Introduction to Neural Networks (4 Credits)**

Introduction to basic principles and computational methods in artificial neural network modeling; neural models of cognitive and psychological processes examined and evaluated. Cross listed with PSYC 4254. Prerequisite: PSYC 1001 and PSYC 3050. Must be major or minor in psychology. Must have junior standing. Permission of instructor required.

**PSYC 3035 Seminar: Cognitive Neuroscience (2 Credits)**

This seminar is for students in the cognitive neuroscience specialization, a joint program with Biological Sciences. The goal of the seminar is to provide an opportunity for senior-level cognitive neuroscience majors to apply the knowledge and skills they have acquired in other courses to current cutting-edge topics in the field. Prerequisites: PSYC 2031 and PSYC 3050, must have cognitive neuroscience concentration, must have senior standing.

**PSYC 3045 The Developing Brain (4 Credits)**

This course presents an overview of current research and methods in the field of developmental cognitive/affective/social neuroscience. The course examines what the brain tells us about development and what development tells us about the brain. Topics include sensitive periods for neuroplasticity, pediatric neuroimaging methods, attention, language, affective and social development. Prerequisites: PSYC 2031 and PSYC 3050. Must be major or minor in psychology, must have junior standing.

**PSYC 3050 Research Methods (4 Credits)**

Survey of research methods and research designs in psychology used to study behavior. Required for all psychology majors, especially foundational for those planning graduate work focusing on research in psychology. Prerequisites: PSYC 2300 or INFO 1020 or BIOL 2090 or STAT 1300. Must be major or minor in psychology.

**PSYC 3055 The Neuroscience and Psychology of Parenthood and Parent-Child Relationships (4 Credits)**

This course explores the theory, research and issues relevant to parenthood and parent-child relationships. The course overviews the evolutionary, neurobiological, and psychological perspective of parent-child relationships with a focus on the understanding of recent advances in neuroscience research. Topics include neuroplasticity of parental brain, maternal vs. paternal biology for parenting, and social and biological determinants of parent-child relationships. Emphasis is placed on discussion of current research, evaluation of the findings, and proposals and ideas of new research in the field. The goal is not to memorize facts but rather to learn to think like a developmental cognitive/social neuroscientist. Cross-listed with course PSYC 4055. Prerequisites: PSYC 2031 and PSYC 3050; must be major or minor in psychology; must have junior standing.

**PSYC 3060 Eating Disorders (4 Credits)**

Overview of etiology, clinical presentation, prevention and treatment of eating disorders. Prerequisites: PSYC 2500 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3080 Drugs and Behavior (4 Credits)**

Nature of licit and illicit drugs; their short- and long-term biological and psychological effects. Prerequisites: PSYC 2031 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3085 Autism (4 Credits)**

This course offers an in-depth examination of autism spectrum disorder (ASD) including a discussion of the characteristics of ASD, variables that contribute to one's likelihood of developing ASD, and treatments and strategies that are effective in supporting individuals with ASD. Prerequisites: PSYC 2070 and PSYC 3050; must be majoring or minoring in psychology, must have junior standing.

**PSYC 3090 Infancy and Early Childhood (4 Credits)**

The objective of this course is to introduce the study of early development focusing on the prenatal and infant periods. This course considers the exciting changes that take place during pregnancy for both mom and fetus. This course considers biological, cognitive, social, and physical development. This course is part of the field of Developmental Science. The prominent theories and research in the field are considered. Questions developmental psychologists currently and historically study and the research they conduct to help answer these questions are explored. Prerequisite: PSYC 2070 or PSYC 2050 or PSYC 2055, and PSYC 3050. Must be either a major or minor in psychology. Must have junior standing.

**PSYC 3095 Middle Childhood (4 Credits)**

Introduction to the physical, social-emotional, and cognitive development of children ages 6 to 12. The influence of families, culture, race/ethnicity, and teacher/school characteristics on children's development will be emphasized. Prerequisites: PSYC 3050; Must be either a major or minor in Psychology; Junior standing.

**PSYC 3109 Depression (4 Credits)**

This course extends knowledge acquired in PSYC 1001 and in PSYC 2500 to the in-depth study of mood disorders (unipolar and bipolar depression) across the lifespan. It covers in depth various topics, including description and classification of mood disorders, the various causes of these emotional disturbances (e.g., psychosocial, biological, genetic), and treatments of these disorders across the lifespan. Prerequisites: PSYC 2500 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3112 Advanced Psychology Research (1-5 Credits)**

This course provides an opportunity for students who have already completed 10 hours of PSYC 2112 Psychology Research to gain advanced experience in a current research group run by a faculty member in psychology. Prerequisites: 10 hours of PSYC 2112, 40 credit hours in psychology, and permission of instructor.

**PSYC 3120 The Science of Love (4 Credits)**

This course explores the theory, research and issues relevant to love in parent-child and romantic relationships. Prerequisites: PSYC 1001, and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3130 Couples Therapy and Relationship Education: Current Status and Future Directions (4 Credits)**

There are two major approaches to helping couples achieve happy and healthy relationships over time: Couples Therapy and Couples Relationship Education. Whereas therapy helps distressed couples improve an unhappy relationship, relationship education serves as a preventative intervention designed to help happy couples protect and preserve their happiness. This course covers the major research-based approaches to couples therapy, including Cognitive-Behavioral Therapy, Integrative-Behavioral Couples Therapy and Emotional-Focused Couples Therapy. In addition, the class covers the major research-based approaches to couples relationship education, including PREP, CouplesCare, and Relationship Education. The class also focuses on both common and distinctive challenges that couples face, including: long-distance relationships, having a child, overseas deployments for military couples, psychological issues, substance abuse, medical issues, infidelity, aggression, dealing with social media and aging. Finally, the class covers issues related to diversity, including same-sex couples, interracial couples and couples from other countries and cultures. Prerequisites: PSYC 3050, PSYC 2740 and PSYC 2300 or equivalent. Must be a major or minor in psychology, must have junior standing.

**PSYC 3150 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2751 and PSYC 2752.

**PSYC 3151 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2750, PSYC 2751 and PSYC 2752.

**PSYC 3152 Senior Honors Research Seminar (1-5 Credits)**

In conjunction with senior research thesis. Prerequisites: PSYC 2751 and PSYC 2752.

**PSYC 3155 Motivation and Emotion (4 Credits)**

Social and biological approaches to study of motivation and emotion in humans and lower animals. Prerequisites: PSYC 2031 and PSYC 3050. Must be major or minor in psychology. Must have junior standing.

**PSYC 3160 Emotion Regulation (4 Credits)**

This course covers the current state of psychological and neuroscience research on how we're able to control our emotions (emotion regulation). This topic includes studies of different types of emotion regulation strategies, such as cognitive reappraisal and expressive suppression, stress and coping, as well as self-regulation more broadly. This is a service learning course; students are required to give presentations to the class and to community members. Prerequisites: PSYC 2031 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3240 Neurodiversity Affirming Assessment and Intervention (4 Credits)**

This is a cross-listed course with both a graduate section and an undergraduate section. The primary goal of this course is to teach undergraduate students about neurodiversity across the lifespan by examining the assessment practices for diagnosis and examining the research on the evidence-based interventions. The course will discuss neurodiversity generally; however, when discussing assessment and intervention practices, the course will focus on practices specific to autism spectrum disorder. For graduate students, the course will cover these same topics with an additional goal of providing graduate students in the Clinical Child Psychology Ph.D. program with deeper knowledge of how to assess and conduct evidence-based practices with neurodiverse clients themselves. For both undergraduate and graduate students, course instruction will involve a combination of didactic reading, guided practice (i.e., role-play) and case presentations/case examples. For graduate students in the Clinical Psychology Ph.D. program, course instruction will also include supervised experience conducting evidence-based assessment and/or interventions for neurodiverse clients who present to the Center for Child and Family Psychology for diagnosis or treatment. Pre-requisites: PSYC 3530. Must have junior standing.

**PSYC 3262 Affective Neuroscience (4 Credits)**

Affective neuroscience is the study of emotions in the brain. In this course, we explore how new frontiers in emotion research, from brain scans to psychoactive drugs to monkey colonies, have changed the way we think about emotions and moods. We aim to learn how scientists ask these new questions: How and what can we learn about emotion from animal models, patient studies, genetic studies, brain scans, and drugs? We learn and debate different theories about what emotions are: When are emotions helpful and harmful? Why do we have them? How many are there? Can we control how we feel? Finally, we learn how to think about emotions scientifically: What kind of evidence matters? How do emotion scholars talk about their work? What kind of questions can we ask, and what kind can we hope to answer? Cross listed with PSYC 4262. Prerequisites: PSYC 2031 and PSYC 3050; must be major or minor in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3300 Psychology of Inequality (4 Credits)**

Living in contexts of high economic inequality has psychological implications for everyone, not just those at the upper or lower ends of the economic spectrum. In this course, we will explore current trends in economic inequality and discuss how people think about inequality. We will also examine the consequences of inequality for individuals and for social groups. We will pay particular attention to how the cultural and social environment may lead to thought processes that justify and reinforce inequalities. Finally, we will discuss potential strategies that can help reduce inequality or buffer against its consequences. Prerequisites: PSYC 2740 and PSYC 3050.

**PSYC 3350 Cultural Psychology (4 Credits)**

This seminar examines how people's sociocultural context shapes their thoughts, feelings, and behaviors. To approach this question, we read and discuss classic as well as recent theoretical and empirical articles from the field of cultural psychology. Topics include defining culture; dimensions of cultural variation; culture-biology interactions; methodological considerations; cultural influences on cognition, emotion, the self, moral judgment, and health; cultural neuroscience; cultural approaches to race and ethnicity; and mechanisms of cultural influence. Throughout, this course emphasizes sociocultural diversity in psychological processes. Students are encouraged to develop empirically tractable ways of asking and answering questions relating to cultural psychology and to apply concepts of cultural psychology to their own research. Prerequisite: PSYC 2740 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3450 Anxiety & Stress (4 Credits)**

What are anxiety and stress, what purpose do they serve, and why do they sometimes interfere with daily life? This undergraduate seminar provides an overview of what scientific findings have taught us about anxiety- and stress-related disorders and symptoms. Course content includes a review of theoretical models of the etiology and maintenance of stress and anxiety, heterogeneity in symptom presentation across individuals and across development for DSM-V-TR anxiety- and stress-related diagnoses, treatment and prevention, and ongoing debates in the field that impact, and result from, scientific findings and clinical practice. Pre-requisites: PSYC 2500 (Adult Psychopathology) AND PSYC 3050 (Research Methods). Must be a major or minor in Psychology. Must have junior standing.

**PSYC 3520 Introduction to Clinical Psychology (4 Credits)**

Overview of clinical roles theory and research; function and dilemmas of clinical psychologists. Prerequisites: PSYC 2500 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3530 Child Psychopathology (4 Credits)**

Child Psychopathology surveys the latest theory and research in the field of developmental psychopathology, which is the study of abnormal behavior from a developmental perspective. Students learn about what the emotional and behavioral disorders of childhood and adolescence are, what causes them, and how they are treated. Additionally, the course covers how we judge what is considered to be abnormal or atypical, how we classify abnormal or atypical behavior, and how we acquire knowledge about developmental psychopathology. Prerequisites: PSYC 2500 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3550 Personality (4 Credits)**

This course will provide an introduction to the study of personality. Personality psychologists aim to understand how people make sense of who they are, why people behave the way that they do, and how individuals are similar to and different from one another. Course restricted to psychology major or minor students with at least junior standing. Prerequisites: PSYC 2500 and PSYC 3050.

**PSYC 3610 Advanced Topics in Philosophy, Psychology, and Cognitive Science (4 Credits)**

This course provides an advanced survey of conceptual and methodological issues that lie at the intersection of philosophy, psychology, and cognitive science. More specifically, our main goal is to engage in a critical discussion of how the study of the mind requires an interdisciplinary approach that integrates empirical findings with conceptual and philosophical theorizing. Cross listed with PHIL 3610. Prerequisites: PSYC 1001 and PSYC 3050; must have junior standing.

**PSYC 3625 Couple Therapy with Diverse Populations (4 Credits)**

This is a cross-listed course with both a graduate section and an undergraduate section. The primary goal of this course is to teach undergraduate students about the field of couple therapy, the different therapeutic approaches in evidence-based couple therapy and research on couple therapy and couple-focused interventions. For graduate students, the course covers these same topics with an additional goal of providing graduate students in the Clinical Psychology Ph.D. program how to conduct evidence-based couple therapy in practice. For both undergraduate and graduate students, course instruction involves a combination of didactic reading, guided practice (i.e., role-play) and case presentations / case example. For graduate students in the Clinical Psychology Ph.D. program, course instruction will also include supervised experience conducting evidence-based couple therapy with couples who present to the Center for Child and Family Psychology for treatment of relationship distress, co-morbid chronic health conditions and relationship distress, or relationship enhancement.

**PSYC 3660 Perception: A Cognitive Neuroscience Approach (4 Credits)**

An introduction to human perception with a strong emphasis on visual perception. This course evaluates the current understanding of how neural activity in the brain allows people to perceive basic sensory features (e.g., brightness, color, size, position, depth, movement, loudness and pitch) as well as recognize and discriminate complex perceptual patterns (e.g., 2D-shapes, 3D-objects, faces, and scenes). The underlying mechanisms are discussed on the basis of behavioral, neurophysiological, and computational evidence. We attempt to understand how the brain creates what we see and hear. Cross-listed with PSYC 4660. Prerequisites: PSYC 2031 and PSYC 3050; must be a major or minor in psychology, must have junior standing.

**PSYC 3665 Executive Functioning (4 Credits)**

This course provides an overview of current research, theories, and methods in the study of executive function and cognitive control. We will explore executive function from an interdisciplinary perspective, drawing on work from cognitive psychology and neuroscience, clinical neuropsychology, and developmental and educational psychology. Topics include the brain basis of executive function and cognitive control, the unity and diversity of executive functions, the development of executive functions, emotion and motivation as modulating influences on executive control, executive function in psychopathology, the role of individual differences, and links between executive function performance and higher-order behavioral outcomes. Prerequisites: PSYC 2031. Enrollment restricted to PSYC majors or minors with Junior standing.

**PSYC 3666 Brain Development & Cognition (4 Credits)**

Examines what the brain tells us about development and what development tells us about the brain. Topics include subcortical and cortical developments to the acquisition of language and drawing. Prerequisites: PSYC 2070 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3688 Clinical Psychopharmacology (4 Credits)**

This course offers an in-depth examination of medications used to treat mental disorders, including the neurobiology of these medications. Different options available for each disorder will be discussed, along with issues related to the effective use of psychiatric medications. Prerequisites: (PSYC 3080 or BIOL 3642) and PSYC 3050, must be major or minor in psychology, must have junior standing.

**PSYC 3700 Artificial Intelligence and Psychological Science: Exploring Human-Computer Interactions (4 Credits)**

This seminar explores the intersections of artificial intelligence, human-computer interaction, psychology, and neuroscience with a focus on how AI technologies—such as generative AI, conversational agents, and social robots—shape and are shaped by human cognition, social behavior, development, and cultural context. Students will critically analyze research on AI's impact on social relationships, child development, cognition, brain function, and mental health. Students will engage in discussions that bridge psychological theory with AI technology. Topics include emotional and social connections with robots, cultural influences on AI interaction, ethical and safety concerns, and the neurocognitive implications of AI in our daily lives. This course aims to provide an understanding of AI's role in human psychological processes and its impacts on our functions across various domains, including education, health care, and social relationships.

**PSYC 3701 Topics in Psychology (1-4 Credits)**

Prerequisites: PSYC 1001 and PSYC 3050; must be major or minor in psychology, must have junior standing.

**PSYC 3759 Foundations for Field Experiences (2 Credits)**

Students prepare for internships in the helping field by learning about various placement settings that provide services to client populations, learning basic therapeutic skills, and preparing to seek internships. Prerequisites: PSYC 2500 or equivalent, 21 years old by October 1, must be major in psychology, must have junior standing. Permission of the instructor required. Corequisite: PSYC 3760.

**PSYC 3760 Field Experiences in Psychology (2 Credits)**

Students meet weekly with professor and complete an unpaid internship at a community organization. Prerequisites: PSYC 2500 or equivalent, 21 years old by October 1, must be major in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3761 Field Experiences in Psychology (4 Credits)**

Students meet weekly with professor and complete an internship at a community organization. This class has a service learning component. Prerequisites: PSYC 2500 or equivalent, PSYC 3760, must be major in psychology, must have junior standing. Permission of the instructor required.

**PSYC 3762 Field Experiences in Psychology (4 Credits)**

Students meet weekly with professor and complete an unpaid internship at a community organization. This class has a service learning component. Prerequisites: PSYC 2500 or equivalent, PSYC 3760, PSYC 3761, must be major in psychology, must have at least junior standing. Permission of the instructor required.

**PSYC 3800 Internships in Psychology (4 Credits)**

Students complete an internship in the mental health or social work field while simultaneously completing assignments via our online classroom environment aimed at enhancing their understanding of 1) the application of psychological knowledge, b) professional development issues, and c) ethical and legal guidelines that impact social service providers. Must be a psychology major. Permission of instructor required and written confirmation from an internship site that indicates they will provide an unpaid internship slot for the student during the course duration. Prerequisites: PSYC 1001 or its equivalent, and PSYC 2500 or its equivalent.

**PSYC 3991 Independent Study (1-10 Credits)**

Maximum of 5 hours per quarter not to exceed a total of 10 quarter hours.

**PSYC 3995 Independent Research (1-10 Credits)**

Independent research in Psychology.

# Public Policy (PPOL)

## **PPOL 1910 Introduction to Public Policy (4 Credits)**

This class will focus on three main areas. First, we will review the policy-making process in the U.S. and methods of evaluation of critical public policy issues. Second, we will review basic issues with decision-making and their relevance for public policy. Third, we will apply these analytic techniques to some of the most urgent public policy problems, solutions, and tradeoffs we as a society currently confront in the areas such as: government spending, immigration, health care, education, environment, foreign policy. In sum, we will examine a broad range of complex policy choices that our nation faces in this era of remarkable social, economic, and political change. This course counts toward the Scientific Inquiry: Society and Culture requirement.

## **PPOL 2000 The Politics of American Policymaking (4 Credits)**

This course is designed as a rigorous, analytical introduction for public policy majors to the ways in which American public policy is actually made and includes discussion of (1) Congress; (2) the President; (3) the Supreme Court; and (4) Regulatory agencies. The course is problem-centered and core policy dilemmas are discussed from both cost-benefit and decision-making perspectives. Key topics include the following interrelated issues: (a) fiscal policy and the federal budget; (b) entitlement reform; (c) health care; (d) national security; (e) the financial crisis and economic growth; (f) education; (g) criminal justice; and (h) environmental policy.

## **PPOL 2350 Governing Cities Today (4 Credits)**

This course introduces students to current major policy challenges that urban areas worldwide must face. We will begin with a general overview of the evolution of the urban form until today and then we will delve deeper into selected topics of interests for city populations in and out of the U.S., in the developed as well in the developing world. Topics will include development, housing urban mobility, sustainability, safety, and more. The class will feature prominent guest speakers from city governments, businesses, policy organizations, and other urban-relevant sectors.

## **PPOL 2701 Topics in Public Policy (4 Credits)**

Various topics in public policy are covered. Topics change each term as deemed appropriate with local, regional, and federal policy issues and regulation changes. Prerequisite: PPOL 2000.

## **PPOL 2710 Demography of Public Policy (4 Credits)**

Demography is destiny." The consequences for American public policy are profound. America is aging, but becoming more diverse. A society in the midst of dynamic change is a society full of possibilities, but vulnerable to conflict. Values become indeterminate, with traditional communities vying for legitimacy with emergent cultures. Social movements, often populist in nature, challenge the established political order. This course focuses on the delineation of effective public policies to deal with demographic challenges, including (1) immigration policy; (2) the process of assimilation; (3) education; (4) geographic realignment; (5) competitive advantage of the United States relative to the European Union, Russia, and China. This course counts toward the Scientific Inquiry: Society and Culture requirement.

## **PPOL 2802 Supreme Court & Public Policy (4 Credits)**

Students examine the policy-making role of the Supreme Court in such areas as civil rights, economic policy, freedom of expression, and criminal justice, while studying the overall power of the Court to determine social policy.

## **PPOL 3115 Economics for Public Policy (4 Credits)**

The tools and techniques of economics are essential for policy analysis. This course provides an intensive and comprehensive introduction to the field of economic analysis, with a specific emphasis on the applicability of economics to public policy and problem solving within the field of policy analysis. Topics include supply and demand; gross domestic product; business cycles; classical and neo-classical economic theory; Keynesianism and Keynesian equilibrium; the "Chicago School"; fiscal policy; inflation; stimulation of aggregate demand; employment and unemployment equilibrium; creation of money; the Federal Reserve system; national debt; the financial sector; public and private debt. Prerequisite: sophomore standing. Recommended Prerequisite: PPOL 2000.

## **PPOL 3117 The Making of Economic Policy (4 Credits)**

This course deals with how economic policy is made. We seek to understand how policymakers confront key decisions and how social, political, and economic forces impact the choices that they make. We will study selected examples of policy design, discussing the views, constraints, and motivations of key actors and groups that influence the policy formation process and explore how these results differ from the policy prescriptions of micro and macroeconomics. We seek to understand key debates around major government policy decisions and analyze the options open to policymakers at the time at which they took those decisions. Through in-depth discussions of selected policy cases, we will explore key issues in macroeconomics, international economics, and development economics that are relevant to the perspective of international relations practitioners. Topics covered include global financial and health crises, fiscal deficits, structural adjustment, the role of multilateral organisms, high and runaway inflation, the causes of underdevelopment, economic sanctions, debt limits, the spread of globalization, and the reliability of economic data.

## **PPOL 3125 Power and Policy (4 Credits)**

This course focuses on the historical development of American 20th-century policy trends and will emphasize (1) the creation of the regulatory state, beginning in the late 1890s and accelerating through the Progressive Era; (2) the Great Depression, the New Deal, and the rise of entitlement culture; (3) World War II, the rise of the military-industrial state and the suburbanization of the 1950s; (4) the Civil Rights Revolution, the New Frontier and Great Society of Kennedy and Johnson—together with the value changes of the 1960s; (5) the Regan Era and the conservative challenge to big government; and (6) the policy dichotomies and uncertainties.

**PPOL 3230 Analytical & Critical Skills (4 Credits)**

Students gain the tools necessary to analyze competing points of view using empirical techniques and statistical inference. Students also learn the history and development of the scientific method; how to distinguish between speculation, theory, fact, and opinion; how to identify the validity of data; how to identify the intentional obfuscation of issues; and how to evaluate one's own prejudices and vulnerability to argument.

**PPOL 3250 Evidence & Logic in Public Policy (4 Credits)**

This course provides a focus for public policy majors on actual decision-making process within the executive and legislative branches of the federal government. Consideration is given to (1) the role of evidence, empirical analysis, and logic; (2) the role of politics; (3) the role of party affiliation and ideology in the decision-making process; (4) the role of key actors and agencies and the distribution of responsibility; (5) the role of outside experts, such as think tanks and journalists; and (6) the influence of lobbyists and other "rent seekers." Students consider such critical examples of decision-making as the Cuban Missile Crisis; the Gulf of Tonkin Resolution; the decision to invade Afghanistan and Iraq; congressional decisions relating to "health care reform" in 2009 and 2010; and the executive branch decisions involving the financial crisis of 2008, including the emergency implementation of the Troubled Asset Relief Program (TARP). Students write a detailed policy memorandum to a member of the executive branch or to a congressional leader, containing a situational analysis and action recommendation pertinent to a significant "real time" policy controversy.

**PPOL 3300 Ethics for Public Policy (4 Credits)**

1. Survey prominent fields of ethical discourse—academic and public intellectual—ranging from ancient understandings of virtue through contemporary humanism. 2. Evaluate these approaches to ethical decisions by examining a number of current moral issues. 3. Analyze the fundamental relations between morality and the law in general and in a pluralistic, democratic society in particular. 4. Practice civil dialogue. Consider the absolute necessity, but also the limits, of publicly reasoned discourse on this country's most pressing moral challenges. 5. Consider the role of normative theory in personal decision-making, community decision-making, and overlap between the two.

**PPOL 3310 Race, Inequality, and Public Policy (4 Credits)**

This course will examine the history of structural racism in the U.S. by analyzing how spatial inequality, economic inequality, and dominant culture privilege have contributed to a history of injustice. Additionally, the course will explore the impact of the anti-racist movement on mitigating racial injustice. Finally, the course will critically analyze policies that have served to exacerbate racial inequality but also identify policies that serve to repair racial inequities.

**PPOL 3701 Topics in Public Policy (1-4 Credits)****PPOL 3715 Sustainable Energy Policy (4 Credits)**

Energy is much in the news, with highly visible controversies over everything from hydraulic fracturing here in Colorado to oil pipelines to mountaintop removal for coal mining to raptor mortality at wind farms. These controversies range from local city ordinances to global treaties and involve everyone from environmental groups to governments to businesses of all sizes. It can be difficult to make sense of this cacophony of events. Where is the global energy system now, where is it going, and what will impede progress toward an energy system that will both serve human needs and protect the environment? Understanding these questions requires background knowledge that puts them into context and creates the opportunity to understand them more deeply. This course will introduce you to the politics and policies involved in sustainable energy, from the local to the global level. In order to make sense of those policies and politics, it will also introduce students to the basics of the energy system, including both conventional and alternative sources.

**PPOL 3980 Internships in Public Policy (0-4 Credits)**

Experience is an important asset when applying for any job. As you will find after graduation, the job market is incredibly competitive, and becoming more so. Gaining real world experience during college will make you a much stronger candidate when seeking that first position after graduation. Through PPOL 3980, you have the opportunity to earn between 0 and 4 quarter credit hours for internships, depending on the number of hours worked. The internship portfolio facilitates a student's academic, professional, and personal growth by providing documentation and representation of the internship experience. Elements of the portfolio will help bridge academic experience with career possibilities, and provides an opportunity for self-reflection through your experience. Analysis of your internship will help identify areas of success and points where you could improve overall. The objective of all aspects is to enable you to be more competitive in a global job market. Internships require departmental approval and must be undertaken during the quarter in which you register for credit. The BA program in PPOL will not award credit retroactively for internships completed prior to the quarter in which students are registered. Prerequisites: Must be a PPOL major and receive departmental permission.

**PPOL 3990 Thesis (4 Credits)**

The Departmental Distinction Program in Public Policy is geared towards advanced students who wish to pursue their study in public policy in a more intensive manner. The thesis provides an opportunity for students to do in-depth research on a topic of their choice, focusing on providing evidence-based solutions to a real-life policy issue.

**PPOL 3991 Independent Study (1-10 Credits)****PPOL 3995 Independent Research (1-5 Credits)**

# Public Policy and Social Service (PPSS)

## PPSS 2050 Ethical Decision Making (4 Credits)

Ethical decision making is essential for values-based leadership. Most decisions have ethical implications, but discerning the ethical dimension requires skill and an understanding of how ethical issues are shaped and informed by ethical theory. In this class students encounter theories from the field of ethics such as utilitarian, deontological, social contract, communitarian, and natural law. Students also interact with major philosophical concepts such as principles of non-maleficence; beneficence; justice and respect for persons; and virtues of care, compassion, integrity and courage. Through the use of case studies, students cultivate their capacity for ethical perception, learn to distinguish tough choices from genuine ethical dilemmas, and gain practice deliberating effectively about a variety of ethical issues drawn from both social and professional contexts.

## PPSS 2100 Concepts of the Public Good (4 Credits)

All societies have to deal with natural and social inequalities, tension between individuality and community, and competing concepts of what constitutes the good society. What are the forces that create differing concepts of the public good and how are conflicts between competing visions settled? Case studies from cross-cultural research as well as historical and current examples from United States culture are used to explore the role of power, class, and group identification in shaping ideas of the public good. An important focus of this course is on understanding how concepts of the public good translate into structures that provide or limit the provision of social services.

# Real Estate (REAL)

## REAL 1700 Fundamentals of Real Estate and the Built Environment (4 Credits)

An exploration of the importance of real estate and the built environment through triple bottom line analysis of its social, environmental, and economic impacts. The course considers a "cradle to cradle" sustainability model that links the various phases, functions, and professions of real estate, project delivery, and asset/facility management to create holistic, value-generating solutions for society. Professional practices/skill sets associated with the many career options that engage the built environment are demonstrated. Also covered are the principles of real estate, real estate industry and its markets; legal aspects of home ownership from consumer's point of view, including property rights, title concepts, deeds, purchase contracts, listing contracts, law of agency, environmental issues and disclosures, types of mortgages, basics of home loan finance, appraisal investment and tax benefits. Partially satisfies Colorado real estate broker licensing requirements.

## REAL 3007 Real Estate Financial Analysis (4 Credits)

Alternative analysis formats that can be applied to a wide array of real estate analysis issues; simulates working/decision-making environment; structured overview of analysis tools focused on specific facets of multidimensional real estate decision-making environment; applications in investment analysis, feasibility analysis, valuation, market analysis, and report writing and presentation. Prerequisites: REAL 3307.

## REAL 3010 Real Estate Capital Markets (4 Credits)

This course will expose students to the commercial real estate capital markets that have evolved from exclusively private in the 1980's to a mix of private and public including commercial mortgage backed securities (CMBS) and real estate investment trusts (REITs) in the 1990's. Any person involved in real estate today must understand all the alternative capital sources available and their requirements. Students will be exposed to the positives and pitfalls of all the capital market products. Prerequisite: REAL 3307.

## REAL 3140 Global Immersion (0-4 Credits)

Inbound U.S. and outbound U.S. real estate topics, with a mix of cultural issues that impact real estate transactions. Application of sustainability concepts is important in this course dealing with international real estate. This course will require on campus preparation for projects followed by 1-2 weeks of travel which will include working with host universities, students and industry partners. Prerequisites: REAL 1700 or REAL 3438, Junior Standing or higher. There is an additional travel fee for this course.

## REAL 3210 Planning, Entitlements, and Public Finance (4 Credits)

Real estate development, place making and community building require the combined efforts of the public, for-profit, and non-profit sectors. Participants in the real estate development process need to understand and appreciate the sometimes competing, and sometimes collaborative interests of governments, agencies, and the private developer. This course is designed to familiarize students with the overall context of urban planning and land use. Students discover the variety of participants in the development process and become familiar with the project entitlement process, zoning and land use regulation. Students also examine public/private financing structures such as public-private-partnerships (P3s) and become familiar with detailed calculations relating to Tax Incremental Financing (TIF) and Metropolitan Districts. Prerequisite: REAL 1700 or REAL 3438.

## REAL 3307 Real Estate Finance (4 Credits)

Sources of financing including institutions and individuals, primary and secondary mortgage markets, mortgage banking, impact of monetary and fiscal policies on financing, underwriting analysis, traditional and alternative or creative financing techniques. Prereq. MATH 1200 or MATH 1951.

## REAL 3317 Real Estate Valuation and Appraisal (4 Credits)

Appraisal principles, including market, cost and income approaches to value, highest and best use, neighborhood and site analysis; valuation of income properties applying market, cost and income approaches to value; capitalization theory and techniques, mortgage-equity analysis, and investment value concepts. Prerequisites: REAL 3307.

**REAL 3337 Real Estate Securities and Syndications (4 Credits)**

Introduction to real estate securities; emphasis on private offerings; determining whether a contemplated transaction involves a security, and what happens if it does; exemptions from registration (Reg D); registration requirements; investor suitability, how to syndicate, acquisition of property, marketing of the property, tax structure and formation of syndication, compensation to syndicators, real estate tax considerations. Application of sustainability concepts is important in this class dealing with real estate securities issues. Prerequisites: Junior or Senior Standing.

**REAL 3357 Corporate Real Estate and Management (4 Credits)**

This course provides a snapshot view of the corporate real estate life cycle and how to strategically plan and manage it. Over the ten week period we will address the diverse but critical components that together account for Facility Management. These shall include: Building Life Cycles and sustainability, facility management as part of the enterprise model within a corporate structure, regulatory agencies, professional relationships and the impact of the build environment on the bottom line, contracting and budget management, move-add-change (MAC) / operations, and general administrative services. Prereq. REAL 1700 or REAL 3438.

**REAL 3367 Development and Feasibility (4 Credits)**

This course is designed to give students a hands on approach of the steps necessary in performing market feasibility analysis to emphasize market research in the development process and understand site selection factors for commercial (office, industrial, retail, apartment, hotel) real estate. The physical and financial development process is covered in a real world project chosen by the student. Prerequisite: REAL 3307.

**REAL 3369 Real Estate Taxation (4 Credits)**

Tax factors affecting real estate investments; legal forms of ownership, capital gain and loss; deductions, credits, depreciation, tax basis, tax impacts on exchanges, syndications, real estate securities, and other federal tax laws affecting real estate. Application of sustainability concepts are important in this course dealing with real estate tax issues. Prerequisite: Junior or Senior Standing.

**REAL 3377 Real Estate Investment Seminar (4 Credits)**

Case method applied to real property development and real estate investment analysis for decision making; computer software for discounted cash flow, risk and simulation analysis; growth, sustainability and environmental issues, portfolio strategy and analysis. Prerequisite: REAL 3307.

**REAL 3438 Legal Aspects of Real Estate and the Built Environment (4 Credits)**

General contract and real estate law, tax law, landlord-tenant law, and various areas of liability for real estate practitioners. Construction contract preparation, bonding and insurance requirements, indemnity agreements, rights and remedies of property owners, contractors and subcontractors, emphasis on administration of a complete contract package for procurement and construction.

**REAL 3701 Topics in Real Estate (0-4 Credits)****REAL 3980 Real Estate Internship (0-5 Credits)**

Daniels College of Business's undergraduate curriculum is designed to be experiential and build upon practical experience. To gain the full benefit of this curriculum, students are encouraged to expand their experiential learning beyond the short term experiences required in the classroom. Internships that allow students to apply newly learned skills and theories in the workplace are considered an integral to the curriculum and all students are strongly encouraged to seek such opportunities. Please review REBE Internship Guidelines: o Internships must be requested via PCO at least two weeks in advance of the quarter in which the work will commence. Final PCO approval is the Burns School Director. o Undergraduate students must be Junior (90 hrs+) or Senior level o No internships will be approved once the quarter begins. o Internships in arrears will not be approved. o Students may use a maximum of 4 Internship credits towards their REBE major degree with up to 6 additional credits to be used towards general electives, if interested. o Students have the option to obtain these 4 REBE internship credits by completing one or multiple internships combined for a maximum of 4 credit hours. o For students working full time at a company, they cannot seek internship in the same company they are working for and receive credit (in advance or arrears). o Not allowed for those seeking a REBE minor.

**REAL 3991 Independent Study (0-4 Credits)**

Independent study/research; requires written report. Prerequisite: Approval of School Director.

## Religious Studies (RLGS)

**RLGS 2002 Comparative Religion and Interreligious/Interfaith Dialogue (4 Credits)**

This course is an introduction to the comparative study of religion, a venerable sub-discipline in the field of religious studies. It is also an introduction to a new, emerging sub-discipline: interfaith or interreligious dialogue. It seeks to equip students with the knowledge base and skill set needed to engage religious diversity in ways that promote, admittedly, idealistic, 21st-century goals: cooperation, stability, and peace. The course seeks to increase religious literacy by introducing students to a variety of religious traditions by means of site visits to several religious communities and interaction with religious leaders and practitioners. Through this course, students will gain experience-based knowledge of religious traditions other than their own.

**RLGS 2004 Anthropology of Jews & Judaism (4 Credits)**

This course is cross-listed with ANTH 2004 and JUST 2004. This course pairs anthropological texts about American Jews and Judaism with related film, television, and literary representations. The objective of this course is to teach course participants to use anthropology as an interpretive lens through which to consider American Jewish life and culture. Through the study of texts on Jewish nostalgia and memory, class, race, gender, and heritage tours, course participants will learn the history of Jews within anthropology and the place of Jews in the history of disciplinary anthropology. The ultimate objective of this course is to introduce anthropological theory and method in a way that provides students with a powerful analytical tool for thinking about contemporary Jewish life.

**RLGS 2005 Philosophy of Religion (4 Credits)**

What is God? Can God be known or is faith precisely a relationship to something that cannot be known in the ordinary sense? What is the relationship between God and morality? Between God and science? Is it more reasonable to believe that your religion is the only path to God or more reasonable to believe that God is manifest in many ways across different cultures? Is it reasonable to believe in God at all? If it is reasonable to believe in God, what are the reasons? And if believing in God is not based on reasons in the ordinary sense, are there philosophical grounds for believing in God anyway? This course takes a "God friendly" approach to philosophical questions about religion, setting out to investigate ontological and epistemological questions about belief-in-God toward the goal of understanding different ways that philosophers over the years have philosophically gone about developing, upholding, and talking about relationship with God. The course includes consideration of philosophers from analytic and continental traditions, from American and European schools of thought, from ancient, medieval, modern and post-modern traditions, and from Greek, Islamic, Jewish, and Christian traditions. Thinkers to be addressed include Pascal, Anselm, Plantinga, Van Inwagen, Hick, Hume, Descartes, Spinoza, Plato, Aristotle, Ibn Tufayl, Averroes, Maimonides, James, Levinas, Marion, Badiou, Rosenzweig, Aquinas, Buber, Cohen, Mill, Lycan, Kant, Wittgenstein, Kierkegaard, and Kafka. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with PHIL 2005.

**RLGS 2008 Stereotyping and Violence in America Today (4 Credits)**

This course is cross-listed with PHIL 2008, COMN 2008, JUST 2008. This course offers students the opportunity to explore key issues relating to diversity and inclusion in the contemporary United States, focusing on the themes of stereotyping and violence, from multiple disciplinary perspectives. Students will engage with scholarly and popular culture artifacts to examine the kinds of stereotyping and types of violence, visible and invisible, that characterize and challenge political, social, cultural, economic, religious, and educational life in today's United States, and will do so by working with the course instructor as well as faculty members from across the arts, humanities, and social sciences. Students will work together to connect the given week's speaker's assigned readings and insights to readings and insights from previous weeks' speakers; assignments and classroom discussion will in this way be very interdisciplinary and will compare and contrast multiple diverse points of view and disciplinary lenses on the question of stereotyping and violence. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2010 Hildegard: Mystic, Musician, Muse (4 Credits)**

Hildegard of Bingen was a polymath even by the standards of her own era, the twelfth century. She was active as a musician, artist, mystic, theologian, natural healer, philosopher, and diplomat. This interdisciplinary team-taught course will read across many academic fields of study including religion, women/gender/sexuality studies, music, and art history as well as primary sources. Students will experience 12th century scholarly and every-day practices through in-class projects such as manuscript illumination or cookie baking, and participate in experiential learning through journaling, meditation, and singing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2011 Religion, Environmentalism, and Politics (4 Credits)**

How does religion mediate the relationship between people and the natural world? How do different religious traditions understand and interpret the natural world and humans' responsibility to and for it? Is it possible to reconcile an understanding of the world as divinely created with human destruction of the environment—and, if not, then what are the political consequences? In this course, we will consider a variety of disciplinary approaches to topics related to religion, environmentalism, and politics, taking Abrahamic and indigenous religions as our key examples. From urban gardening to green Islam to Standing Rock to eco-feminism, we'll use theories about religion and culture to understand the complex intersections of faith, policy, and planetary crisis. The course includes a community engagement component that will bring us to a local faith-based urban farm where we will discuss course texts as we help prepare for the 2020 growing season. Cross-listed with ANTH 2011 and JUST 2011.

**RLGS 2012 Jewish Politics and Political Jews in the United States (4 Credits)**

Milton Himmelfarb famously quipped that "Jews earn like Episcopalians, and vote like Puerto Ricans." This statement captures the surprising loyalty of American Jews to liberalism and the Democratic party despite the group's significant socioeconomic achievement in the post-World War II era. This course considers Jewish political behavior in the United States through a variety of disciplinary lenses. Our study will be enriched through archival research in the Beck archives (held at DU) and through conversations with local political figures. The course will also track and analyze relevant developments for Jews and politics related to the 2020 Presidential election. This course counts toward the Analytical Inquiry: Society requirement for the Undergraduate Core Curriculum. Cross-listed with JUST 2012.

**RLGS 2014 Religious Existentialism: Christian and Jewish (4 Credits)**

Existentialism focuses on the human experience of living, often with a focus on the sheer freedom of the human condition. Religious existentialism subtly modifies this picture through its own vision of human freedom as the ultimate encounter between the human subject and God (with 'God' understood in various ways). The religious existentialist in this sense philosophically explores that which is most-fully-human as a moment of relation and encounter between self and that which is beyond self. Starting with Sartre's non-religious statement of existentialism in *Existentialism is a Humanism* (1946), we go on to examine the Christian and Jewish existentialisms of Kierkegaard (1813-1855), Tillich (1886-1965), Buber (1878-1965), and Heschel (1907-1972). In the course of our reflections, we compare non-religious with religious approaches to basic questions about self, God and world, and we consider the relationship between Christian and Jewish existentialist approaches to these questions. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with PHIL 2014 and JUST 2014.

**RLGS 2022 Religion and Empire (4 Credits)**

The course will explore in both a past and present context how religious forms, traditions, and practices are integrally bound up with the rise and fall of empires. It will also explore from a theoretical standpoint certain social, political, and economic factors that explain the development and historical persistence of imperial governance as well as the role of religion in both preserving and undermining empire. It will also touch on the phenomenon of "religious nationalism" in these processes. Specific empires to be studied include the Roman empire, the "Holy Roman empire", Islamic empires, the British and American empires (including what has come to be known as "neoliberalism"). This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2025 Race, Social Justice, and Religion in the US Public Square (4 Credits)**

The US public square is a fundamental aspect of civic engagement and identity construction. This course uses the lenses of race and social justice to explore how religious expression impacts the cultural, social, political, and personal narratives/discourses that comprise the modern public square. We will consider public spaces in the context of anti-Asian and anti-Black racism as well as Islamophobia and the intersectional privileges and prejudices these communities negotiate. Issues such as immigration, borders, racialization, entrenched beliefs and traditions dovetailing with structural racism in the American context will be discussed each through video modules from the Interfaith Youth Core along with supplemental readings. By centering the lived practices and discourses through which access and agency is forged within public spaces (material and virtual), I want students to learn how they are both participants in and makers of these spaces. This course asks students to interrogate the ways in which their personal identities intersectionally determine how public spaces are constructed, which public spaces we enter, and how we participate in those spaces. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2026 Race: Black, Jew, Other (4 Credits)**

In its investigation of philosophical writings on race and racism, this course explores a range of existential and phenomenological lenses for interrogating race and racism, with a focus on the shared theoretical and practical intersections of anti-Black and anti-Jew discourse. The course aims to help participants read and understand difficult primary philosophical (and some theological) texts—many of which are cited and engaged by contemporary writings across a number of disciplines. In this respect, we work through philosophical writings related to race, exile, “negritude,” “the wandering Jew,” and “otherness” by engaging such authors as: Sartre, Wright, De Bois, Levinas, Senghor, Fanon, Freud, Appiah, Jankelevitch, and Cone, alongside Gilman’s work on the “Jew’s Body” and “Jewish Self-Hatred,” Bernasconi’s work on the phenomenology of race, and discourses of “Other-as-disease” in American and Nazi eugenics. In all of its content, the course aims to engage participants with key issues and questions around race and racism, including extending the implications of anti-Black and anti-Jew discourses / practices to a range of other anti-Other discourses / practices at play in the world around us. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with JUST-2026 and PHIL-2026.

**RLGS 2070 American Jewish Experience (4 Credits)**

In the aftermath of World War II, the United States emerged as the largest, wealthiest, and most organized Jewish community in the world. Taking the premise that America is a Jewish center as its key organizing principle, this course introduces and challenges theories of diaspora and looks at American Jewry’s religious and institutional innovations. The course will proceed inductively, taking Denver-based resources and experiences as starting points for an expansive exploration of American Jewish life, culture, and religion. We will focus on mainstream narratives alongside religious and cultural expressions at the margins of American Jewish life. Cross-listed with ANTH 2070 and JUST 2070.

**RLGS 2102 Judaism, Christianity & Islam (4 Credits)**

This course introduces students to the three major monotheistic religious traditions: Judaism, Christianity, and Islam. In the process of tracing the long and rich histories of Judaism, Christianity, and Islam, we examine the beliefs and practices that became central and definitive for Jews, Christians, and Muslims. We begin with the ancient heritage of each religion (scriptures, founders, early institutions). Then we explore how these foundational traditions were preserved and re-invigorated in response to centuries of social change and critical moments of political upheaval. Most significant, in this regard, is the Jewish, Christian, and Muslim encounter with their respective holy Scriptures—as generation after generation of adherents have attempted to understand the revealed words of God, to proclaim their continual relevance for all places and all times and to inscribe them upon their bodies and hearts through prayer, worship, and daily life. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2103 Religions of China & Japan (4 Credits)**

This is an introduction of some of the major East Asian religious and ethical traditions, focusing on Buddhism, Confucianism, Daoism, and Shinto. By examining both translations of sacred texts as well as scholarly analyses, we explore the basic ideas, practices, and historical development of these varied and interconnected traditions. Special attention is paid to how people incorporate East Asian religious and ethical ideas and beliefs into contemporary life and how gender shapes the experience of religion. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2104 The Bible as Literature (4 Credits)**

The Bible has been one of the most important works in all of Western society. In this course we read the Bible as a masterpiece of literature. Rather than focusing on theological questions about this work as inspired scripture, we instead focus on its rich literary qualities and explore some ways in which these stories have influenced modern society. Reading select passages, we discuss its literary genres, forms, symbols and motifs, many of which are important in literature today. Of the latter, we encounter stories of creation and hero tales, parables, apocalyptic literature, and themes of paradise and the loss of Eden, wilderness, covenant, and the promised land. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with ENGL 2104 and JUST 2104.

**RLGS 2106 Religious and Social Justice in Vienna (4 Credits)**

This special travel course provides an opportunity for students to learn how certain major religions are globally engaged in the promotion of social justice through humanitarian relief work and cultural exchanges. In addition to a brief survey of the historical relationship between the beliefs, teachings, and social practices of the major Western traditions, the course offers hands-on experience and interaction with Jewish, Catholic, and Protestant relief agencies as well as other non-governmental organizations in Vienna, Austria, which has become the international center for UN-directed human services and humanitarian relief efforts as well as global headquarters for leading NGOs. Students discover how the culture, history, and geography of Vienna have nurtured the vast global human services “economy” to which these religious organizations contribute and which are built around the work of the United Nations. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2108 Islam in the United States (4 Credits)**

A historical introduction to the presence of Islam and Muslims in the United States, from an examination of the first Muslims in North America, to the substantive influence of the minority Indian evangelical Ahmadiyya movement, to Islam in African American communities. Also examines contemporary Muslim communities in the U.S. and the ways in which ritual and faith are today developing with "American" accents. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2109 Religions of Tibet (4 Credits)**

This course explores the religious terrain of Tibet by looking at the historical and cultural development of the four main Tibetan Buddhist traditions: Nyingma, Sakya, Kagyu and Geluk, as well as the indigenous religion called Bon. Topics include the sacred landscape of Tibet; key doctrinal features; cultural artifacts like sacred biographies, art, and poetry; the 20th-century spread of Tibetan Buddhism from the Himalayas to North American communities; the future of Tibetan Buddhism in exile; and China and the West. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2110 Buddhism in the U.S.A. (4 Credits)**

Exploration of different viewpoints on complex issues related to the assimilation, acculturation and reinvention of Asian Buddhist traditions both locally and globally in the past 150 years. Students consider the "two-way traffic" between recent developments in various traditions of newly Americanized Buddhism and their respective cultures of origin through the processes of globalization and transnationalism. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2111 Islam and United States Politics (4 Credits)**

This course offers students a historically grounded introduction to the relationship(s) between Islam and United States politics. Students consider the role played by Islam and Muslims in early American political thought, Americans' relationships with Muslims abroad and at home, as well as evangelization efforts. It examines the impacts of the Nation of Islam, the Cold War, Iranian Revolution and Gulf War I, as well as of the September 11 terror attacks, the Iraq and Afghanistan wars, the 2006 and 2008 elections, and concludes by reflecting on the 2012 election and suggesting how Islam might impact U.S. politics over the next decade. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2112 Major Islamic Thinkers 1900s-2000s (4 Credits)**

This course offers students a substantive introduction to major Islamic thinkers of the 20th and 21st centuries. Starting with Abu `Ala Maududi, whose work on Qur'anic interpretation and the meaning of jihad laid the groundwork for new waves of radical activism in the modern Muslim world, this course exposes students to the works of "movers and shakers" like Sayyid Qutb and Ayatollah Ruhollah Khomeini. Students engage these thinkers through a mix of primary and secondary sources, developing a sense of context as they work through their arguments. The course continues with some of the major later 20th-century Islamic thinkers active in Muslim-minority spaces, focusing on Bosnian Grand Mufti Mustafa Cerić and the Moroccan-French scholar Mohammed Arkoun. It concludes by looking at two major figures of the early 21st century, noting how they blend intellectual and political activism: Iranian cleric Mohsen Kadivar and American scholar Amina Wadud. Throughout the course, student groups present on various contemporary issues, helping them develop presentation and writing skills while allowing them to apply course knowledge to real-world issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2114 Roots of Yoga and Tantra: Methodologies and Modern Practice (4 Credits)**

This class will explore the pluralistic origins of yoga and tantra both within South Asia and a global context, the relationship between yoga (union, control) and tantra (ritual/material technologies), how they function as a ritual/spiritual practices, and conclude by examining how yoga and tantra have become popular, transnational phenomena. The first half of the class focuses on the history of yogic/tantric traditions, texts, and communities while the second is devoted to study of the guru/shiṣya (teacher/student) relationship as the foundation of modern yoga. Some of the issues we will engage include different conceptions of the human self, how and why particular cultural and religious practices cross geographical and cultural boundaries, the role of the guru, and secularization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2115 Common Figures in the Bible and Qur'an (4 Credits)**

This course offers students a thematic introduction to the key common figures in the Bible and Qur'an, focusing on the major prophets, from Adam to Jesus, as well as Eve and Mary. Grounded in the primary source texts while exposing students to classic and contemporary scholarly work on these figures, it concludes with a look at the figure of God in the two scriptures. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2116 American Mythology (4 Credits)**

Myths convey social and moral values. Myths, moreover, serve as conceptual models for society and furnish "symbolic articulation of the social patterns" of a given society. In this class, students will establish clear connections between social order and the myths that sustain it, against the view that myths are merely imaginary, misguided perceptions of reality with little social value. In this course, you will need to ask yourself, "How do each of these myths translate into social behavior? In other words, how have these myths been acted out historically and how are they "performed" today? The United States of America has always had a strong, mythic sense of identity, mission, and destiny. It is worthwhile to reflect for a semester on how the "idea of America" has taken shape and is continuing to evolve and diversify. Robert Bellah introduced the influential concept of an American "civil religion"—a secular myth of America. In addition, we must understand that America is the result of contact between at least three different groups of people: Native Americans, Europeans, and Africans. The functional equivalents of creed, scripture, prophets and religious mission are seen in the Declaration of Independence, the Founding Fathers and Manifest Destiny. Concepts of freedom, the pursuit of life, liberty, and happiness, democracy, and the right to bear arms flow from these myths. Beyond the notion of a master myth of America, we will discover that there are other myths of America that are themselves proper objects of study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2117 Religions of India (4 Credits)**

This course introduces students to the religions of India, which include Jainism, Buddhism, Islam, Sikhism, Christianity, Judaism, and Hinduism. These religious traditions are distinct but always in dialogue and often in competition with one another. Students will explore how different religious communities intersect and overlap in different contexts and historical periods, including in religious spaces: temples, monasteries, pilgrimages sites, and sacred spaces. Students will learn about histories, rituals, and literature, with a focus on lived religions, past and present. This course counts toward the Analytic Inquiry: Society and Culture requirement.

**RLGS 2118 "Women as the Gateway to Hell": Gender and Identity in South Asia (4 Credits)**

This course explores the role of women in public and private spaces in South Asia through the lens of religious praxis and belief. We will explore the ways in which Hindu, Jain, Buddhist, Sikh, Muslim, Christian, and Adivasi (indigenous) traditions have portrayed the role of women in scripture and consider these textual proscriptions and descriptions in the context of the lived experience of these belief systems. The primary aim of the course is to expose students to the complex relationship between the deified "feminine" and the construction of gender within modern South Asia. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2119 Caste, Race and Colonialism (4 Credits)**

This course explores intersections of social, political, and personal structures that shape the various identities we hold. We have chosen three categories: caste, race, and colonialism, to showcase how identities emerge as unique intersectional sites of contestation and negotiation between individual difference, historical context for how to understand that difference, and the ways social/political structures valorize difference. To foreground lived experience in the construction of identity, our course will draw on a number of resources including: blogs, opinion pieces, podcasts, peer-reviewed articles, selections from books, documentaries and film, and social media both within and outside the US. The goal of this course is to encourage students to consider how "identity" and "privilege" are contingent terms that operate on multiple levels (e.g. personal, social, and political) and help uncover the networks of vulnerability, power, and access/accessibility that inform identity. Furthermore, we invite students to engage with these terms through practical assessments (e.g. producing a podcast) in order for them to "see" how they both produce and are "produced" by the various public squares in which they participate. Students will deconstruct the categories of caste, race, and colonialism in the context of socio-political and cultural structures (e.g. religion, gender identity, ability, political beliefs, etc.) We ask students to consider the following questions: In what ways, do these categories shape our personal and public identities? How do these categories work within contemporary public and private spaces? This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2202 New Testament (4 Credits)**

This course takes a multifaceted approach (historical, literary, and critical) to the writings that comprise the Christian New Testament. The New Testament are read as a collection of primary documents that chronicle the primitive Church's slow and often painful process of self-definition. In these writings it is possible to discern the tension that arose because of the strong religious and cultural ties early Christianity maintained with Palestinian Judaism, from which it emerged as a sectarian or reform movement. The careful reader also finds evidence of the new religion's encounter with the Greco-Roman world from whose variegated ethos and culture it borrowed considerably on the way to becoming an important religious force in the first century. In exploring the New Testament, then, we attempt to recover something of the sense of what it meant to be a Christian in New Testament times. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross listed with JUST 2202.

**RLGS 2205 Women, Gender, and the Bible (4 Credits)**

From Eve to Mary Magdalene, women play essential roles in biblical texts. While many courses, books, and Bible studies focus primarily on men, this course will focus women included in biblical and apocryphal texts as well as the way the Bible has been used to regulate gender in society, leadership, churches, and homes. Feminist and womanist biblical criticism will be used throughout this course, as will a focus on gender critical readings. Through critical reading and reflection on both primary texts and secondary texts, students will form their own views of the representations of female characters, named and unnamed, in the Bible. Additionally, students will ponder the ways that these texts still affect women today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2250 Introduction to African American Religions (4 Credits)**

This course will explore the nature and the meaning of black religion. We will examine the historical development of African American religion in the United States and explore diverse African American religious groups, such as the Nation of Islam, the Moorish Science Temple of America, Black Jews of Harlem, and others. Specific attention is given to the ways in which African American religious groups have developed in North America, especially the United States and the Caribbean, during slavery and beyond. The course will have three sections. First, we will attempt to define religion in the larger context of religious studies. Second, we will investigate how black religions and black religious scholars deploy Africa as a deep symbol. Finally, we will survey the historical and theological development of a variety of black religions that have been influential in North America. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2251 Contemporary Gospel Music: Religion, Culture, and the Black Church (4 Credits)**

This course seeks to examine the ways in which gospel music, and contemporary black gospel music in particular, has impacted not only black church culture but broader society in general. Through audio and video media, readings, and class discussion, we will discover how gospel music has influenced black church culture and popular culture. This course counts toward the Analytical Inquiry: Society and Culture requirement. Cross-listed with MUAC 2251.

**RLGS 2301 American Indian Religion (4 Credits)**

This course will provide an overview of the religious beliefs and practices, histories, cultures, and contemporary lives of the Native American communities in the Rocky Mountains (Ute) as well as those commonly referred to as the “Great Plains Indians” (primarily the Blackfoot, Cheyenne, Sioux, and Crow). Made up of thirty different tribes with seven different language groups, Plains Indians constitute a diverse range of languages, customs, social structures, and religious beliefs. As we learn about the various worldviews and lifeways of Rocky Mountain and Plains Indians peoples, we will also explore the relationships between religion and culture, religion and society, religion and land, and religion and conflict. We will watch several films covering a variety of Native American issues. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2303 Lived Religions (4 Credits)**

The concept of “lived religions” has become prominent in religious studies since the 2000’s. While people may think of religions as sets of sacred writings, rules, and rituals, the “lived religions” approach focuses on the ways that people incorporate religion into their activities. The approach is new enough that scholars have not yet come to full agreement on what the term “lived religions” should include and what it implies about religions and how to study them. The course will make room, therefore, to debate the advantages and drawbacks of studying religions through the ways people use religion to shape their life. Students will examine examples of how people live their religion and trace the relationships of these practices to religious teachings and ideas. This effort will involve asking a variety of questions. How closely are religious practices related to teachings and ideas? Does a specific religion put greater emphasis on engaging in specific activities or on agreeing with particular teachings? If people’s behavior does not fit with a religion’s teachings but the people still consider it to be related to key aspects of religion, does it count as religious? Or have these people moved away from religion into a practice that is spiritually meaningful but not religious? Or is spirituality something even more sharply different from religion? Or is spirituality also part of religion? If we look closely at how people in a religious tradition live, what do we see that we would not notice if we were looking at the religion as only a system of beliefs? For instance, does the sense of time of people who adhere to the religion’s calendar of remembrances differ from the sense of time of people who do not? And what specifically would we do to learn about religion, if we concentrate on people’s actions? In opening up such inquiries students will learn both about studying religions and about major facets of religious traditions. The course will require reading and successful completion of tests. Visits to off-campus sites and completion of reports on site visits will facilitate learning through encounter and participation. Students will also undertake a project using concepts from the course to imagine and interpret lived religion in behaviors or in aspects of the physical or social world. The religions, practices, and sites for study, observation, and interpretation—as well as the assignments—may vary each time the course is offered. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2310 World Christianities (4 Credits)**

This class will be an exploration of the variety of Christian expressions that have developed around the globe. As Christianity has spread through conquest, missionary work, immigration, trade, and other means, new converts and their offspring have had to reconcile Christian doctrines, rituals, and ethics with the beliefs and practices of their own cultures. This has led to what some scholars have referred to variously as mixing, syncretism, hybridity, creolization, contextualization and/or enculturation. This class, while considering the value of these terms, will, however, take the following as its foundational perspective: from the early Christian community to contemporary denominational specificity, all forms of Christianity have emerged as a result of cultural contextualization. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2401 Social Justice in a Global Context: Theory and Practice (4 Credits)**

Theories of social justice, beginning with the ancient Hebrews and Greeks and running up through the modern era. The religious sources of these ideas, drawn primarily from the monotheistic faiths of Judaism, Christianity, and Islam, are profiled. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2501 Islam on Film (4 Credits)**

This course uses the medium of film to introduce students to the history, faith, practice, culture(s), and politics of Islam. Focusing on feature films and documentaries, it employs film to open up a broad spectrum of questions relating to personal piety, gender equity, generational conflicts, social class, governmental repression, and ritual practice. Proceeding thematically along a broad historical frame, the course focuses on the late twentieth and early twenty-first centuries, presenting a balanced picture of life in Muslim-majority and Muslim-minority countries and highlighting the complex picture of Muslim life today. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2600 Religion and Popular Culture (4 Credits)**

Although religion and popular culture are often seen as separate conceptual spheres—the former dealing with the “sacred” and the latter with the “profane”—these two spheres are deeply intertwined and shape one another. Religion often expresses itself in popular culture through the arts and various forms of media, while popular religion frequently expresses itself through religious memes and other representations. This course will explore the complex relationship between religion and popular culture. By studying film, comics, music, tattooing, and other cultural products, we will discover how beliefs, ideals, practices, institutions from various religious traditions shape popular culture and how symbols that are embedded in popular culture shape religious traditions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RLGS 2980 Internship (1-4 Credits)**

Designed to provide undergraduate majors and minors with valuable experience in non-profit, educational, faith-based, governmental, and related organizations. It helps students translate the knowledge and analytical skills learned in Religious Studies courses into a professional context, while exploring potential career paths and professional opportunities. Students interested in pursuing an internship must meet with the Undergraduate Advisor at the start of the previous quarter to discuss internship goals and identify potential placements. Students meet weekly with a faculty supervisor to monitor their internship experience, and complete the internship by writing a reflective essay. Restrictions: junior or senior standing; at least 20 credits of RLGS courses for majors or at least 12 credits for minors.

**RLGS 3001 Judaism (4 Credits)**

A literary and historical journey through Judaism. This course examines the "Jewish story" from its roots to its modern-day manifestations, focusing on select, classic Jewish texts in their historical contexts. From them, students explore Jewish tradition and practice and actively engage with and in the vivid interpretive imagination of the authors of Judaism throughout the ages. Cross listed with JUST 3001.

**RLGS 3002 Creation & Humanity (4 Credits)**

Why am I here and what is my place in the world? In this class, students engage a wide-variety of answers to this timeless question. We focus on primary texts regarding the creation of the world and humanity's role within the world from multiple religious traditions, from ancient Near Eastern mythologies to modern spiritualities and film. Themes of the course include humanity's relation to the divine, nature, and one another; we also discuss issues of inequality and sustainability. Students also learn to perform fruitful cross-cultural comparison.

**RLGS 3003 The Moses Traditions: Jewish, Christian, and Muslim Traditions about Moses from Past to Present (4 Credits)**

The "Abrahamic Traditions" (Judaism, Christianity & Islam) are described as such because each tradition situates its origin in the figure of Abraham, yet there is another foundational figure who looms even larger in all three traditions — Moses. The Moses Traditions traces Jewish, Christian, and Islamic traditions about Moses from the Hebrew Bible through modern America, and in so doing brings into the foreground the religious and inter-religious importance of this beloved figure. Drawing from over 2,500 years of texts and traditions, students come away with a deeper understanding of: 1) how the figure of Moses is shaped and reshaped throughout history and across the globe, 2) how religious traditions portray and redescribe foundational figures to suit the ever-changing needs of their communities, and 3) how to engage a multi-faceted, culturally-embedded, and millennia-long collection of traditions in a way that yields fruitful insight into the inner workings of the religious imagination. This course is cross-listed with JUST 3003.

**RLGS 3023 Great Thinkers: Maimonides (4 Credits)**

Using "The Guide for the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), one of the central figures in medieval philosophy and Jewish thought. Our study includes analyses of his ideas on principles of faith, human perfection, intellectual vs. "imaginational" approaches to truth, pedagogy and politics, reasons for the commandments, the nature of God and divine will, the limits of human knowledge, the mechanics of prophecy, and the parameters and implications of providence. Cross listed with PHIL 3023 and JUST 3023. Prerequisite: junior standing or instructor's permission.

**RLGS 3024 Maimonides: Greek, Islamic, and Christian Encounters (4 Credits)**

Using the "Guide of the Perplexed" as our central text, we explore the complex philosophical ideas of Moses Maimonides (1135-1204), a central figure in the history of philosophy and in the history of Jewish thought. In this course, we examine in depth the relationship between Maimonides' core ideas and various Greek, Muslim and Christian thinkers, including: Aristotle, Plotinus, al-Farabi, Avicenna (Ibn Sina), al-Ghazali, Averroes (Ibn Rushd), and Aquinas. Topics to be explored include: what is "metaphysics?"; God's unity and essence as existence itself; the mystery of knowing and not knowing God (including a consideration of God's ways as well as "negative theology"—viz. the extent to which we do not know God); God as pure intellect; the nature of the cosmos and the "separate intellects"; creation vs. eternity vs. emanation: philosophical and religious perspectives on the origins of the universe and implications for "living in the world with/out God." In our study, we will also address the methodological implications of cross-religious and cross-language analyses, and how to spot and address (in your own work and in the work of others) tacit cultural biases at play in the interpretive process. Cross listed with JUST 3024 and PHIL 3024. Prerequisite: Junior standing or instructor's permission.

**RLGS 3086 The Emergence of Monotheism (4 Credits)**

This course is cross-listed with JUST 3086. Monotheism, the belief in a singular deity, did not arise out of nothing. Rather, the emergence of monotheism was a multi-stage process spanning several millennia and involving numerous religious traditions, primarily Judaism, Christianity, and Islam. This process was marked by internal and external conflict, as individuals and communities struggled to distinguish themselves from their non-monotheistic predecessors and neighbors, while often attempting to convince others to do the same. In this class, we begin with the ancient Near Eastern religious environment in which the idea of monotheism first appeared, then turn our attention to how the movement toward monotheism shapes the texts of the Hebrew Bible, New Testament, and Quran. We also look to archaeological sites and case studies in material culture to fill out our understanding of the lived experiences at play in the emergence of monotheism.

**RLGS 3090 God and Giving? Religion and Philanthropy in America (4 Credits)**

This course is cross-listed with JUST 3090 and ANTH 3090. The United States is notable for its high levels of religious participation and for its well-established and rapidly expanding nonprofit sector. In this course, we will explore these phenomena from a variety of disciplinary perspectives including anthropology, history, and religious studies in order to understand the intersections of religion and philanthropy. By looking at religious ideologies, social theory, and legal and economic contexts, we will consider how religion, government, and philanthropy shape and are shaped by one another. We will examine a number of case studies including faith responses to Hurricane Katrina, the history of philanthropy in Denver, and U.S.-based religious global giving. We will explore key questions regarding community and social responsibility and ask which actors get to define key societal problems and who is ultimately responsible for responding to these problems.

**RLGS 3102 Early Judaism (4 Credits)**

This course traces the development of Judaism in history and literature from the Babylonian Exile and the end of the biblical period through the origins of Rabbinic Judaism and the completion of the Babylonian Talmud (c. 650 CE). However, special emphasis is placed on Jewish culture in the late Second Temple period (c. 200 BCE to 100 CE) and its impact on the early Christian movement, including Jewish literature from the time of Jesus, lost texts of the Bible, new evidence from the Dead Sea Scrolls, and the few surviving historical sources of the Second Temple Period. In addition, students analyze how the Bible came to be and understand how sacred texts and their interpretations eventually became the new center of both Judaism and Christianity. Cross listed with JUST 3102.

**RLGS 3150 The Bible & Dead Sea Scrolls (4 Credits)**

This course includes an advanced study of the Dead Sea Scrolls with a particular focus on the Bible as it appears in the Qumran library. We will discuss the variant versions of the Bible, some of which were previously unknown before the discovery of the Scrolls, and how the findings of the Scrolls may question the very idea of "Bible" itself in the context of the late Second Temple Judaism. Further, we will place particular emphasis on studying the way biblical texts were engaged, interpreted and even written by the authors of the Dead Sea Scrolls. In this way, we shall explore the origins of biblical interpretation and how the notion of the Bible came to be. Cross listed with JUST 3150. Prerequisites: None. The Scrolls will be read in English translation, but those with Hebrew reading skills will have an opportunity to read/translate portions of the Scrolls in community.

**RLGS 3151 Dead Sea Scrolls (4 Credits)**

The Dead Sea Scrolls represent one of the greatest manuscript finds of the twentieth century and have been said to be the most important discovery in biblical archaeology. These scrolls offer a rare window into early Judaism and Christianity and offer us the earliest and most important witnesses to the (Hebrew) Bible. This course covers the Dead Sea Scrolls in their historical, literary and religious context in English translation, together with relevant scholarly research. Cross listed with JUST 3151.

**RLGS 3192 Christian Literature (4 Credits)**

Reading and discussion of influential historic books pertaining to Christianity. This course will focus on a selection of primary texts either from a specific period of Christianity (such as early Christianity or medieval Christianity) or on a specific topic within the study of Christianity (such as monasticism or mysticism).

**RLGS 3201 Religion and Revelry in Rome (4 Credits)**

Rome is a city filled with references to religion. The Pantheon and the Roman forum remind visitors of the centuries where Romans worshipped gods and goddesses; the Vatican and numerous other Catholic churches exemplify the religion that dominates the current context of Italy: Christianity. This travel course will immerse students in both the ancient and the contemporary religious revelry that is found in Rome and the surrounding regions. Students will experience Italy through visits to museums, community dinners, archaeological sites, tours, food, and dialogue.

**RLGS 3203 Christianity (4 Credits)**

This is an introductory course about the Christian religion, with a substantial component devoted to experiential learning. The primary goal of the course is to acquaint students with the richness, dynamism and diversity of one of the world's largest and most influential religious traditions. Even those students who have some general knowledge of Christianity benefit from the disciplined approach of the academic study of religion.

**RLGS 3205 Native Americans and Christianity in USA (4 Credits)**

This class will help students explore the forms of Christianity that have emerged among the indigenous peoples of North America. In their struggles against and adaptation to Euro-American cultural forms, indigenous peoples have developed "contextualized" forms of Christian religiosity. Students will develop a careful understanding of the multiplicity and historical contingency of Christianity as it has spread throughout the world.

**RLGS 3300 Psychology of Religion (4 Credits)**

Beliefs, feelings and actions representing human religious response of experience; function of religion in individual life.

**RLGS 3302 Islamic Fundamentalism (4 Credits)**

This writing-intensive course introduces students to the history and scope of fundamentalist movements in the Muslim world, focusing on the Middle East. Beginning with a look at the internal traditions of renewal and reform built around the idea of a return to the fundament or origins of Islam, the course examines the rise of major movements from the 1700s to the present. Students will engage with key questions, including the following: What distinguishes fundamentalism from radicalism? How do Sunni and Shii fundamentalisms differ? What roles have these movements played in politics and society, and how might these evolve in the future? How might policy makers and others best approach fundamentalist groups? A basic knowledge of Islam is assumed; students wishing to enroll without this background knowledge will be provided supplementary readings.

**RLGS 3315 Religion & Moral Psychology (4 Credits)**

Philosophical foundations and research strategies of psychological studies of moral thought; Aristotelian, Kantian and utilitarian thought included, as well as religious dimensions of morality.

**RLGS 3350 Culture, Psyche, and Religion (4 Credits)****RLGS 3370 Freud, Psychology, & Religion (4 Credits)**

Readings, discussion, and papers help students learn about the life, intellectual and social environment, and clinical and theoretical work of Sigmund Freud. Attention is given to the influence of Freud's work on the understanding of religion at the beginning of the 21st century.

**RLGS 3448 Theory of the Subject: From Hegel to Žižek (4 Credits)**

The great French philosopher Michel Foucault in his Collège de France lectures in the early 1980s characterized the theory of the subject as the very key to the development both of Western philosophy and Western thinking in general. This course will explore Foucault's thesis with reference to different theoretical models of subjectivity and "subjectification" (as Jacques Lacan calls it). It will do so through close readings of selections from the works of G.W.F. Hegel, Søren Kierkegaard, Lacan, Alain Badiou, and Slavoj Žižek as well as select portions of Foucault's 1981-82 lectures entitled The Hermeneutics of the Subject. This course is cross-listed with PHIL 3448.

**RLGS 3452 Political Theology (4 Credits)**

A general inquiry, focusing on the modern and postmodern eras, into various forms of philosophical reflection on the relationship between religion and political theory. Survey of the seminal ideas of such major thinkers as Kant, Hegel, Schmidt, Strauss, Derrida, Agamben, Asad, and Žižek.

**RLGS 3453 Is God a Racist Sexist?: Black Liberation and Womanist Theology (4 Credits)**

What is God's race? Does God have a gender? Is God on the side of the oppressed? Black liberation and Womanist theologies have asked these questions based on experience of black oppression in the context of the United States. African Americans have compelled to make sense of God in light of chattel slavery, Jim Crow laws, the Civil Rights Movement, and the Black Power Movement. This questioning continues in light of today's social environment. This seminar course will discuss the many strands of liberation theology in the United States, including Womanist theology. In addition to black liberation theology's methodologies and its challenges to the theological discipline, we will explore the origins and development of theological discourse in the late 1960s during the later part of the Civil Rights Movement and the emergence of the Black Power Movement. Black Theology is a theological perspective which draws on the diverse sources, including religious experience, art, literature, music, and lived narratives. These sources will inform our study. Students will engage critical voices that have shaped the movement such as James Cone, but also engage critiques of Cone and Black Theology. The course will also explore how liberation theologies attempt to deal with the problems of race, class, and gender. Student will be introduced to theological construction in African American communities and analyze the similarities and differences between these theological constructions.

**RLGS 3454 Capitalism, Religion, Democracy (4 Credits)**

The course explores the historical and contemporary relationship between capitalism, religion, and democracy at a theoretical level. Focus will be on the question of what exactly is capitalism as understood by key political philosophers and social theorists in relationship to the religious world views and values that authorize it. At the same time, the course will examine in what measure these world views and values also promote liberal democracy, or work against it, while offering a genealogical account of such phenomena as slavery, colonialism, gender and class domination, along with present day iterations of ethno-nationalism and neoliberal hegemony.

**RLGS 3456 Kant on Religion (4 Credits)**

A study of the philosopher Immanuel Kant's major writings on religion and their subsequent influence on critical theory and the philosophy of religion.

**RLGS 3460 Nietzsche & the Death of God (4 Credits)**

This course will involve an intensive reading and discussion of Friedrich Nietzsche's 'Thus Spake Zarathustra,' together with relevant associated materials, especially 'The Gay Science.' Cross listed with PHIL 3460.

**RLGS 3465 Derrida and Postmodernism (4 Credits)**

Cross listed with PHIL 3465.

**RLGS 3470 Mysticism & Psychedelics (4 Credits)**

The course will examine various texts, traditions, and practice from indigenous to New Age religions that fall under the general category of what has been historically labelled "mysticism." Special emphasis will be placed on chemical or plant-induced forms of altered consciousness, commonly known as "psychedelics" or "entheogens". that both simulate, and are frequently employed by different peoples in different times and places in tandem with, mystical experiences. The course will also examine the transcultural as well as the syncretic nature of mystical practices, spiritual disciplines, and the use of mind-altering substances, in particular with reference to the misuse of these forms by secular enthusiasts who are responsible for what is known as "cultural appropriation" or "neocolonial" misrepresentation.

**RLGS 3475 Deleuze and Semiotics (4 Credits)**

Examines the development of the thought of the famous French postmodern thinker Gilles Deleuze with special attention to his cultural and semiotic theory to the degree that it is relevant to the philosophy of religion. The course also investigates how Deleuze's work has shaped, and is beginning to push in new directions, contemporary postmodern philosophy. Prerequisites: must be at least junior standing and have completed at least two undergraduate courses in philosophy.

**RLGS 3500 Islam (4 Credits)**

Introduction to the history, faith, practice, culture(s), and politics of Islam, starting with the Judeo-Christian Near Eastern context in which it emerged and tracing its theological development and geographic spread around the world. Proceeding thematically along a broad historical frame, the course ends with an examination of the numerous, often competing, trends in contemporary Muslim communities.

**RLGS 3502 Contemporary Islam (4 Credits)**

This course introduces students to contemporary Islam. After a historical overview, the course looks thematically at different spheres of Muslim life. It considers changes that relate to political systems and forms of governance, styles of education, labor and professional work, changes in daily life habits such as timing and organization, changes in gender relations, and changes in religious authority. It also pays attention to the ways in which faith and practice are articulated through cultural practices like pop music and film.

**RLGS 3503 Quran and Hadith (4 Credits)**

This course introduces students to the key texts of Islam—the Qur'an and Hadith—including their origins and meaning as well as how they have been interpreted by Muslims over time. It focuses as well on case studies that highlight issues of crucial relevance for today and the future.

**RLGS 3504 Islam and Gender (4 Credits)**

This upper-level course introduces students to key debates, historical developments, and thematic issues in the study of Islam and gender. It grounds this study in theoretical texts but takes a lived religions approach, focusing primarily on the production of "modern" gender norms in the colonial and post-colonial era. It proceeds thematically, with class sessions on sexualities, dress, reproduction, family roles, masculinities, pious self-construction, and the gendering of pilgrimage, and concludes with a look at contemporary and likely future debates.

**RLGS 3505 Gender and Politics in Muslim Pop Cultures (4 Credits)**

This undergraduate/graduate course introduces students to contemporary Muslim popular cultures, in the United States and around the world. It uses gender and politics as thematic lenses, taking a lived religions approach to phenomena that range from pious television programming to online efforts to spread Islamophobia.

**RLGS 3570 Religion and Morality in the American Public Square (4 Credits)**

Close focus on one or two moral issues in which religion is drawn into public debate in the contemporary U.S. Observation of the debate first hand at demonstrations, town meetings, and discussion groups, etc. Analysis of these observations is facilitated by readings on the subject and class discussion.

**RLGS 3642 Martin Luther King, Jr., Malcolm X and Civil Rights (4 Credits)**

In this course, students will explore the lives and religious thought of Martin Luther King, Jr. and Malcolm X, two of the most prominent black religious leaders during the height of the US Civil Rights Movement, often perceived as ideological opposites. Through engaging with their autobiographies, speeches, students will compare and contrast their thoughts on religion, race, and politics in the United States. During the course, students will be able to identify religious and political similarities and differences between the two leaders. We will also explore the development of their religious and ideological shifts in the context of the struggle for civil rights. Ultimately, we explore how their vision for racial justice developed into a call for social and economic equality and human rights.

**RLGS 3645 Religious Nationalisms: A Comparative Approach to White Christian Nationalism and Hindu Nationalism (4 Credits)**

This course examines the religious nationalism in the context of South Asia and the US. We investigate the religion, identity, politics, and power with readings/materials that explore historical memory, religious symbols/rituals/canon, political upheavals, and violent actions in both of these regions. In the context of South Asia, we will examine the British colonial period and post-independence India. In the US, we will focus our attention on post-Civil War politics and the development of the modern US polity. We necessarily interrogate the history and dynamism of important terms such as "religion", "nationalism", and "secular" in the context of Hindu Nationalism and white Christian Nationalism in South Asia and the US respectively. At the core of our inquiry is how specific religious traditions have been invoked in political contexts (and vice-versa), public displays of religiosity, and the complex dynamics of religion and the state.

**RLGS 3693 Religion and the Media (4 Credits)**

Interactions between religion and all forms of communications media in American life.

**RLGS 3694 Religion in the Virtual Space: A Critical Theory Approach (4 Credits)**

This course uses a critical theory lens to consider religious praxis, traditions, beliefs, canons, and rituals within virtual/digital spaces (e.g. websites, apps, social media, digital platforms for gaming, etc.). Students will be introduced to several scholars of virtual religious spaces and practices who use both netnography techniques and critical theory approaches (e.g. Wendy Chun, Lisa Nakamura, Michelle Zappavigna, Oliver Roy, etc.) as well classical scholars of semiotics and language (Judith Butler, Jacques Derrida, Walter Benjamin, Julia Kristeva, and others). Theoretical works are paired with ethnographic, historical and/or public scholarship/experiential to offer students a "lived perspective" critical approach to the topic of digital or virtual religion.

**RLGS 3695 Digital Religion (4 Credits)**

This course introduces students to the study of digital religion from a lived religions perspective. It begins with an examination of the history, concepts and methods of the field, and continues with thematic explorations of digital religion scholarship across varied religious traditions. Students develop an understanding of how scholars study religion and spiritual identities, beliefs, and practices online, and how the religious and digital arenas influence and shape one another.

**RLGS 3701 Topics in Religious Studies (1-4 Credits)**

An exploration of various topics and issues related to the academic study of religion. The subject matter of the course varies and may be taught by the regular faculty of the department or a visiting scholar. Some offerings may include a travel component.

**RLGS 3707 Religion and Film (4 Credits)**

Understanding religion requires us to take culture seriously. In doing so, we must consider products of culture, including popular culture. This course engages both classic and more recent films as "texts" to be analyzed, not as mere entertainments or diversions. We focus not only on those films that identify themselves explicitly as "religious" or reflect a particular religious tradition, but also moved that render the subject more obliquely, which reveal – via image and sound – religion as a complex human activity.

**RLGS 3708 First Americans in Film: Religion, Land, and Identity (4 Credits)**

This course will explore, using a chronological approach, the history of Indigenous portrayal in the US Western Cinematic tradition. Students will be exposed to a variety of interweaving historical processes; including colonial history (with particular interest in Indigenous experience), the history of the film industry, the history of Indigenous representation in film, and the history of the 20 Century United States (with particular interest in Indigenous experience). The first two weeks of the course will be dedicated to the development of a theoretical toolbox. This toolbox – consisting of a series of theoretical concepts and analytical approaches – will function as the bedrock of the class and empower students, supplying the necessary lenses through which to analyze the films that will be screened throughout the quarter.

**RLGS 3732 Feminist and Queer Theory in Religion (4 Credits)**

This course explores the intersection of feminist and queer theories with religious studies. Beginning with feminist theory, we will trace the beginning of the feminist movement and consider the ways in which religion participated in and also resisted feminism. Moving into queer theory, we will critically examine gender and sexuality and center these topics in the field of religious studies. During the course, students will reinterpret religious texts through the use of feminist and queer theory, providing a challenging critique, an imaginative reframing, or even a queering of a sacred text.

**RLGS 3740 Bodies and Souls (4 Credits)**

This course examines the unique place of the body in biblical religion. We ask how the Bible and its interpreters have shaped current views on sex and the gendered body in Western society. How has the Bible been (mis)used in relation to current understandings of the physical body? Is the saying that a "human" does not have a body, but is a body as true for the Hebrew Bible as the Christian New Testament? How have Judaism and Christianity (de)valued sexuality, procreation, and celibacy? How do the biblical traditions shape our modern opinions about the ideal physical body and body modifications? How can we understand "out-of-body" experiences and notions of death and afterlife in Western religion? Students are encouraged to interpret the Bible and their own beliefs from a uniquely embodied perspective. Cross listed with GWST 3740, JUST 3740.

**RLGS 3760 Globalization and Religion: Theory and Methods (4 Credits)**

This course explores how religious movements around the world both affect, and are affected by, the process of globalization. A major segment of the course is devoted to various theories of globalization and how they account for the increasingly important role of religion. Focus is largely on the relationship between Christianity, Judaism, and Islam.

**RLGS 3814 Modern Hinduism (4 Credits)**

Doctrines, practices and history of South Asian Hinduism; conceptions of Gods and gods; image worship and temples; and the influences of caste and gender on the experience of Hinduism.

**RLGS 3820 Buddhism (4 Credits)**

Buddhist life and thought from origins to present in India, Tibet, Japan and China.

**RLGS 3832 Religious Lives: The Dalai Lamas (4 Credits)**

This course explores the many lives of the Dalai Lamas and the transformation of a reincarnated religious teacher into the political leader of Tibet and, eventually, a worldwide religious personality. In order to understand that transformation, the course investigates the institution of the Dalai Lamas from historical, doctrinal, and ritual perspectives. We will look at the role of the Dalai Lama as an embodiment of the bodhisattva of compassion at the center of a tapestry of religious ceremony and ritual performances. The course will also consider the religious, ethical, and political thought of several of the most prominent Dalai Lamas, with significant attention given to the writings and work of the current, fourteenth, Dalai Lama.

**RLGS 3885 Islamic Mysticism (4 Credits)**

The origins and development of Islamic mysticism, including asceticism and the Sufi orders.

**RLGS 3890 Religion and Diaspora (4 Credits)**

When forced to leave a homeland, displaced communities frequently turn to religion to maintain identity and adapt to—or resist—new surrounding culture(s). This course examines the role of religion and identity in three Jewish and Christian communities living in diaspora and poses questions such as the following: What is the relationship between religion and (home)land? How have the biblical themes of exodus, diaspora, promise and restoration been applied to contemporary experiences? And how have our American stories been interpreted through the lens of the Bible? As part of the service learning component, students have the opportunity to work with religious and immigrant aid organizations in the Denver community. Cross listed with JUST 3890.

**RLGS 3891 Justice: A Biblical Perspective (4 Credits)**

This is a service learning course designed for religious studies undergraduate majors, though non-majors are welcome to enroll. Cross listed with JUST 3891.

**RLGS 3892 Grant Writing for Community Engagement and Research (4 Credits)**

This community engagement course introduces student to non-profit work and to scholarship on non-profit activities. It connects students with community partners, continuing the department's commitment to experiential learning and to engagement with living faith communities. Students spend course time discussing scholarship on grant writing and non-profit grant support and discussing logistical and other issues related to their community engagement partners. This course is intended to help provide advanced undergraduate and graduate students with arenas for future research, including possible thesis topics, while also offering a practical opportunity for professional development. Understanding 501(c)3 corporations and experience in writing grant proposals will be an asset for students planning to work in non-profits as well as for those continuing on to doctoral work.

**RLGS 3893 Buddhism and Social Justice (4 Credits)**

This course examines Buddhist theories and practices of social justice, with a focus on the contemporary global movements known as "Humanistic Buddhism" and "Socially Engaged Buddhism." The course covers topics such as: the roots of engaged Buddhism in social and political movements of 19th and 20-century Asia, the role of meditation and other Buddhist practices as both a support for and a means of social engagement, and Buddhist approaches to contemporary issues of racial justice, equality, economic development, and the environment. In the final analysis, the course asks whether the concept of justice makes sense within a Buddhist worldview, or if Buddhist concerns for social welfare hinge on an entirely different paradigm. This course is a community-engaged service learning course. As part of the course, students work with a local community partner to further their own community engagement work.

**RLGS 3898 Dharamsala: Myth, Land, and Traditions (4 Credits)**

This course explores the myths and stories that root cultural, religious, social and political traditions in the material landscape of India. It will explore the sacred spaces, images, rituals, and belief-traditions of the Himalayan region surrounding Dharamsala, India. As a study-abroad course, the materials, site visits, and community-engaged learning projects interrogate how myths operate as both cultural “glue” and demarcations of difference. Students participate in community-engaged learning placements to learn how myth creates and fosters cultural communities. Through site visits and readings we will learn how the “lived experience” of cultural belief-traditions, social and political practices, and sacred images and spaces are products of a unique marriage of land, story, and community. We will also have lectures and a Canvas site with pre-travel readings that will prepare you for the cultural and social belief-traditions we will encounter within Dharamsala. While in India, we will continue to read about ritual, devotion, stories of the land, social and political identities rooted in the land, and more. This course will be cross-listed with INTS for undergraduate and graduate elective credit.

**RLGS 3988 Study Abroad Resident Credit (0-18 Credits)****RLGS 3991 Independent Study (1-10 Credits)****RLGS 3995 Independent Research (1-10 Credits)**

## Russian (RUSS)

**RUSS 1001 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of “Novice High” or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Russian 1001 is designed for students with no prior knowledge of Russian. Students who have experience with the Russian language should complete the placement test to determine the appropriate course level for their background.

**RUSS 1002 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of “Novice High” or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1001 or permission of instructor.

**RUSS 1003 Elementary Russian (4 Credits)**

The elementary Russian sequence provides a comprehensive introduction to Russian language and culture, while ensuring a solid command of fundamental grammatical structures. By the completion of this course, all students are expected to acquire a proficiency level of “Novice High” or better in listening, speaking, reading, and writing. In addition, the course offers students meaningful opportunities to analyze and explore common beliefs, attitudes, and behavioral patterns of Russian-speaking people in a global comparative context. As a result, students will develop the capacity to identify their own cultural patterns, compare and contrast with others, and adapt empathetically to unfamiliar ways of being. Prerequisite: RUSS 1002 or permission of instructor.

**RUSS 1416 Introduction to Russian Culture: The Wondrous and the Supernatural (4 Credits)**

How do we explain the enchanting and mysterious world of Russian Culture? How have Russians imagined their world and themselves? To answer these questions, we will examine the various manifestations of the wondrous and the supernatural in Russian art. We will begin by reading Russian fairy tales to learn about the people’s folk beliefs and their Eastern Orthodox faith. We will then trace the Russian fantastic tradition by studying the works of nineteenth- and twentieth-century writers who wrestled to explain the marvelous and the demonic myths at the foundation of Russian culture. We will focus our attention on Russia’s cultural capitals St. Petersburg and Moscow and discuss how supernatural themes reflected social and historical realities. Authors may include Pushkin, Gogol, Dostoevsky, Bely, and Bulgakov. No knowledge of Russian is necessary; all class discussions, readings, and writing are in English. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1613 Introduction to Russian Culture and Civilization (4 Credits)**

This course surveys Russia’s cultural past and present—from the beginnings of the Russian state over a thousand years ago through the Soviet Union and, after its disintegration in 1991, to the Russian Federation. The course explores the various attitudes of Russian thinkers and authors towards the question of national identity and national destiny. Examples of Russian high culture (literature, art, music, ballet, film) and Russian religious faith (Orthodoxy) are discussed alongside daily life and folkloric beliefs. By working across disciplines, students will discover the fascinating cultural interconnectedness of Russian politics, art, faith, and national identity. Knowledge of Russian language and history is not required. The course format consists of lectures, slides, video and audio presentations, as well as whole-class and small-group discussions. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 1860 The Russian Short Story (4 Credits)**

This course will introduce students to Russian literature through some of its shorter “masterpieces” of fiction. Students will explore the lives and ideas of some of Russia’s greatest writers, the literary movements of which they were a part, and the broader cultural and historical periods in which they wrote. Students will read and analyze works from the end of the 18th century to the Post-Soviet era, including stories by Pushkin, Gogol, Chekhov, and others. All course materials in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 1922 The Soviet Experiment in Literature and Film (4 Credits)**

Architects of the Soviet experiment claimed to create a radically new type of society and person, superior to all that came before. What were the defining features and founding myths of the Soviet identity, as propagandized by the government? How did this imagined identity clash with realities of life in the USSR? What cultural figures opposed the official discourse, and what artistic modes of resistance did they develop? To explore these questions, we read fiction and poetry by authors central to defining and contesting the Soviet experiment, including Maiakovski, Gladkov, Ginzburg, Pelevin, Dovlatov, and Petrushevskaya, and watch ground-breaking films by Vertov, Tarkovsky, Daneliya and others. All materials are in English. No prior knowledge of Russian literature or culture is required. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2001 Second Stage Russian (4 Credits)**

Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 1003 or equivalent. First quarter of two quarter sequence.

**RUSS 2002 Second Stage Russian II (4 Credits)**

Review of grammar, development of all language and cultural skills. Prerequisite: RUSS 2001 or equivalent. Second quarter of two quarter sequence.

**RUSS 2003 Second Stage Russian III (4 Credits)**

This course concludes the second-year Russian 2001/2002/2003 sequence designed to develop your proficiency in all language skills. You will continue to acquire conversation, reading, and writing skills at the intermediate level, with an emphasis on everyday situations and communicative contexts. A great deal of attention will be devoted to the learning of grammar in conjunction with the immediate activation of it in conversation. Contemporary texts will acquaint you with Russian culture and life. Literary texts, songs, films, and activities will supplement textbook materials. Prerequisite: RUSS 2002.

**RUSS 2110 Russian in a Cultural Context: Russian Fairy Tales (4 Credits)**

Continued development of Russian language and cultural skills with focus on all aspects of Russian culture by studying Russian fairy tales. Prerequisite: RUSS 2003 or equivalent.

**RUSS 2116 Russian 19th-Century Novel: Society, Identity, and the Rise of Prose Fiction (4 Credits)**

This course introduces students to classical Russian novels by world-famous authors, including Pushkin, Lermontov, Turgenev, Dostoevsky, and Tolstoy. Students develop an ability to interpret each work with a dual focus on text and context. Students deepen their appreciation of literary texts as works of art through learning to read closely and focusing on literary devices such as the narrator’s voice, plot, structure, and figurative language. Students also learn to relate novels to their historical and cultural context, the better to understand how Russian writers responded to their country’s intractable problems that included a crisis of cultural identity, the injustices of serfdom, and debates about women’s place in society. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 2350 Russian Language and Culture through Film (4 Credits)**

Film has played a significant role in the Soviet culture and continues to be an important cultural expression today. Many Soviet comedies also enriched conversational Russian with unforgettable formulaic expressions and sayings. In this course we will work with some of the most famous films produced in the USSR and contemporary Russia. Our goals will be close viewing to understand cultural symbolism of the images, the stylistics of different genres of speech, and the work of the camera and actors. This will allow you to further advance your Russian language skills by expanding your vocabulary and by incorporating more idiomatic expressions and the so-called “precedented” text in your speech. In the area of grammar and syntax, we will continue working on the Russian pronominal case system, verb conjugation, but also develop new skills, such as: composing complex sentences and using correct punctuation. This course is taught in Russian. By the end of quarter, all students are expected to acquire a proficiency level of “Intermediate Mid” or better in listening, speaking, reading, and writing. Prerequisites: RUSS 2003 or instructor permission.

**RUSS 2461 Russian Science Fiction (4 Credits)**

This course studies the fascinating world of Russian science fiction in the twentieth and twenty-first centuries. Throughout the term, students will examine how Russian and Soviet writers and film-makers reimagined society, science, technology, and space. We will discuss Soviet futuristic utopias, interplanetary voyages, and post-apocalyptic visions. Students will further probe the figure of the alien as a dissident or cultural Other, as Soviet authors grappled with questions of cultural and ideological difference. We will examine how sci-fi writers glorify or critique Soviet society in their visions of space flight, technologically advanced societies, alien worlds, or post-nuclear disasters. Ultimately, we will reflect on the philosophical quandaries that Russian science fiction explores. Works include pre-revolutionary sci-fi texts by Bryusov and Kuprin; Soviet dystopias by Zamiatin and Bulgakov; sci-fi classics by the Strugatsky Brothers; Tarkovsky’s filmic masterpieces; and post-Soviet science fiction by Viktor Pelevin and Sergei Lukyanenko. This course is taught in English. All readings are in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 2917 Russian Revolution in Literature and History (4 Credits)**

The course introduces students to the literature, history, and art of the Russian revolution of 1917. Students examine how Russian literature helped pave the way for the revolution and how literature and film helped Russians make sense of the radical transformation of their society. Students gain insight into the reciprocal relationship of art and politics, learning how literature shaped the revolutionary movement and how the revolution inspired new forms of artistic expression. All readings in English translation. This course counts toward the Analytical Inquiry: Society and Culture requirement. No prerequisites.

**RUSS 3101 Advanced Conversation & Composition (4 Credits)**

Continued improvement of Russian language skills in areas of style and syntax. First quarter of two quarter sequence. Prerequisite: RUSS 2110 or RUSS 2003 or equivalent.

**RUSS 3102 Advanced Conversation & Composition II (4 Credits)**

Advanced Composition and Conversation focuses on the continued improvement of Russian language skills in areas of style and syntax in all four modalities (speaking, writing, listening, and reading). At an advanced level, the class will focus on developing high-level oral and written communication skills that will enable students to study and critically evaluate authentic materials from the target culture. The textual, audio and video materials used in the course will serve to enrich your understanding and knowledge of Russian culture. Prerequisite: RUSS 2003 or equivalent.

**RUSS 3103 Advanced Conversation and Composition III (4 Credits)**

Advanced Composition and Conversation III focuses on the continued improvement of Russian language skills in areas of style and syntax in all four modalities (speaking, writing, listening, and reading). At an advanced level, the class will focus on developing high-level oral and written communication skills that will enable students to study and critically evaluate authentic materials from the target culture. Part of the RUSS 3101-3102-3103 Advanced Russian language series, the course will review aspects of the case system and the Russian verbs of motion. The textual, audio, and video materials used in the course will serve to enrich your understanding and knowledge of Russian culture. Prerequisite: RUSS 2003 or equivalent.

**RUSS 3200 Seminar: Russian Short Story (4 Credits)**

Russia through the study of selected short stories. Prerequisite: RUSS 2110 or 2111 or equivalent.

**RUSS 3232 Russian Avant-Garde (4 Credits)**

This interdisciplinary course addresses various manifestations of Russian Modernism and the Russian avant-garde in art, literature, poetry, music, theatre, and film in the late 19th – early 20th century. Its objective is to provide an understanding of the time's rapid, drastic, and often conflicting cultural and artistic transformations by examining in depth major Russian Modernist works. Students will explore such artistic and literary movements as Symbolism, Cubo-Futurism, Neo-Primitivism, Suprematism, Rayonism, and Constructivism in the context of Russian late Imperial, revolutionary, and early Soviet social, political, and philosophical developments. We will pay special attention to the cultural dialogues between Russia and the West and investigate the aesthetic, erotic, and social utopias of Russian Modernism. The course examines philosophical essays, films, plays, poems, short stories, music, and art created during the period, beginning with the first modernist experimentation of the Silver Age (turn of the century) through the imposition of Socialist Realism in the 1930s. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**RUSS 3300 Short Russian Prose (4 Credits)**

An advanced conversation and composition course based on Russian prose. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3650 Soviet and Post Soviet Cinema (4 Credits)**

Film course concentrating on the works of Andrei Tarkovskii. Open to non-Russian speaking students. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3701 Topics in Russian Literature (4 Credits)**

Selected topics, authors and movements in medieval, Russian, Soviet and post-Soviet literature. May be repeated for credit. Prerequisite: RUSS 3101 or RUSS 3102 or RUSS 3103 or equivalent, or permission of instructor.

**RUSS 3850 Working with Russian Media (4 Credits)**

Multimedia course emphasizing new media in Russian culture and society. Prerequisite: RUSS 3101 or equivalent, or permission of instructor.

**RUSS 3977 Russian: Learn Through Service (1-5 Credits)**

Internship and/or service learning for credit with local organizations in the Russian-speaking community. Must be approved by both Russian faculty and organization participating.

**RUSS 3991 Independent Study (1-5 Credits)****RUSS 3995 Independent Research (1-5 Credits)****RUSS 3997 Russian: Learn Through Service (1-5 Credits)**

Internship and/or service learning for credit with local organizations in the Russian-speaking community. Must be approved by both Russian faculty and organization participating.

**RUSS 3998 Honors Thesis (1-4 Credits)**

## Science and Technology (ST)

**ST 2050 Scientific & Critical Thinking (4 Credits)**

Using scientific topics drawn from the headlines, the following questions will be addressed: What is the scientific method and how is it used appropriately? How are problems formulated, research questions designed, tests, and other measurements constructed, data gathered and analyzed, conclusions drawn, and findings incorporated into theories? In addition, critical thinking processes and models of decision-making and problem-solving will be discussed. The suitability and effectiveness of critical-thinking models in achieving positive organizational outcomes will be emphasized.

**ST 2100 The Digital Age (4 Credits)**

Digitalization influences nearly all aspects of life today: how we communicate, conduct business, operate governments, and how we behave as consumers. This course provides opportunities to explore controversies and ethical dilemmas spawned by digital transformation. Students also reflect on how digital technologies are transforming our world and create a plan for the future.

**ST 3050 Quantitative Reasoning (4 Credits)**

Numbers provide a language for reasoning. Numbers are used to quantify data, analyze trends and exceptions, and establish the reliability of conclusions. Using practical problems from business, health care, social services, and government operations, this course provides the opportunity to learn how basic concepts from mathematics can be applied in organizational settings.

## Social Justice (SJUS)

**SJUS 2010 Social Justice: Exploring Oppression (1,2 Credit)**

This course critically examines ideas, figures, and texts from the social justice tradition, allowing students the opportunity to develop a deeper understanding of the broad philosophical and historical contexts in which their own social justice efforts take shape. Particularly focused on racial justice, this course also lays the foundation for work that Social Justice LLC students will do in their second and third quarters, as well as work they will do in the Denver community. Restricted to Social Justice LLC students.

**SJUS 2020 SJLLC: Inequality in Society (1,2 Credit)**

This course focuses primarily on poverty and the connections between economic justice and sexual and gender identity. Students will examine how economic and political systems create and sustain inequality within society, as well as how they can build a collaborative community of social justice activism and inquiry on campus and beyond. Restricted to Social Justice LLC students.

**SJUS 2030 SJLLC: Social Justice, Digital Activism, and Local Activism (1,2 Credit)**

This course will expand upon the fall and winter SJUS courses, building from history to advocacy. Students will further their knowledge of racial, economic, and gender inequality through digital storytelling. Students will be encouraged to engage meaningfully and creatively in the struggle for social justice, both across campus and within the Denver community. Restricted to Social Justice LLC students.

**SJUS 2100 Justice Across Cultures: Cultural Perspectives on Social Justice (4 Credits)**

Social justice is a complex and multi-faceted issue. That which constitutes social justice has been understood in a variety of ways across cultures and time. Students in this course explore the concepts of social justice by examining a variety of cultural and religious approaches to the subject paying explicit attention to non-western perspectives. The course pays particular focus on current controversies over global policy issues, including the UN Declaration of Human Rights, and students examine the divergent ideologies of social justice that lie behind these complex debates.

## Social Sciences (SS)

**SS 2583 Spectator to Citizen: From Public Good Theory to Action (2 Credits)**

This course is the final course of the three-course sequence offered by the Center for Community Engagement to advance Scholarship and Learning (CCESL). Through this course, you will integrate your personal, professional, and academic goals with a focus on social change culminating in a clear sense of your identity as a public good scholar as well as a personal action plan that you can implement to address a social justice issue of your choosing. You will apply an anti-oppression analysis to your plan including how the Four I's of Oppression manifest in your selected topic, ways you center the knowledge/voices of the communities most impacted by the injustice/systemic oppression, and how white supremacy shows up in your issue and how the plan could actively work against it.

**SS 3980 Critical Race and Ethnic Studi (1-4 Credits)****SS 3982 Social Science Internship (1-4 Credits)****SS 3991 Independent Study (1-4 Credits)**

## Social Work (SOWK)

**SOWK 2900 Introduction to Social Work (4 Credits)**

Introduces students to the profession and practice of social work. Examines the history of the profession and its place within the structure of the social welfare system; explores core values and ethics, as well as the knowledge and skills necessary for effective social work practice. Also identifies various fields of practice and the range of social problems addressed by the profession.

**SOWK 3991 Independent Study (1-10 Credits)**

## Sociology (SOCI)

**SOCI 1810 Understanding Social Life (4 Credits)**

This course is an introduction to the discipline of sociology and to the insights it provides into the human condition. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 1988 Study Abroad Resident Credit (0-18 Credits)****SOCI 2002 Homicide in Colorado (4 Credits)**

This course examines homicide trends in Colorado in order to understand how serious violent offending varies across time and place. Students will analyze diverse data at the state and local level to explore how homicide patterns differ in urban, suburban and rural areas, and how homicide is related to other types of violent offending. We will also explore differences in offenders and victim characteristics, including in-depth case studies of individual homicide cases to understand relationships between victims and offenders and the dynamics that lead to homicide. We will then consider how well current criminological theories explain homicide and serious violent offenses in Colorado. We will conclude by assessing how likely current law enforcement strategies and state correctional policies are to affect state and local trends. Students will hone research skills and work independently and in small teams on a collaborative final project that will be shared with lawmakers and community organizations working to reduce lethal violence in Colorado.

**SOCI 2005 Sociological Imagination and Inquiry--Part A (4 Credits)**

This course is the first of a two-quarter sequence on sociological research methods and focuses on introducing students to the many qualitative methods used in sociological research. We explore what social research is, what the goals of such research are, and how research questions guide the selection of different methodologies. The remainder of the course focuses on qualitative data collection, including in-depth interviewing, ethnographic methods, historical comparative and content analysis methods, and other qualitative methods. Prerequisites: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2006 Sociological Imagination and Inquiry--Part B (4 Credits)**

This course is the second of a two-quarter sequence on sociological research methods, and examines how sociological research questions can be answered using quantitative methods. Specifically, the course focuses on survey research design and statistics. Prerequisites: SOCI 2005 and sophomore standing or permission of instructor.

**SOCI 2020 Sociological Classics (4 Credits)**

Two or more classic works read and discussed in detail; emphasis on understanding particular classical work and its place in sociological tradition. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2060 Self and Society (4 Credits)**

Impact of social groups and socialization processes on formation of individual perceptions, thoughts, emotions and self-awareness; both normal and deviant formations considered. Prerequisite: SOCI 1810.

**SOCI 2120 Methods of Socio-Legal Inquiry (4 Credits)**

This course provides a broad overview of socio-legal research methods. Specifically, the course examines how qualitative and quantitative research methods are used to answer socio-legal research questions. Students participate in research in order to understand the process of designing a project, collecting data, analyzing data, and reporting findings.

**SOCI 2210 The Family (4 Credits)**

Emphasis on different kinds of families and on contemporary issues of changing gender roles, intimacy, childbearing, family breakup and reconstitution, and family's relationships with other social institutions. Cross listed with GWST 2210. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2220 Sociology of Childhood (4 Credits)**

This course explores the social meanings of childhood. In this course we will examine aspects of the symbolic meanings of childhood as well as the experiences of being a child. The commercialization of childhood through marketing to children, contradictory messages about children as innocent or problematic, the experience of gender socialization for children, and the expectations of creating perfect children will be explored in detail. Cross listed with GWST 2220. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2224 Race, Crime, and Documentaries (4 Credits)**

Students in this course will view, interrogate, and write about full-length urban crime documentaries through the lenses of critical theories of race and ethnicity and criminological scholarship on the media's distortion of crime reporting. A significant portion of class time will be spent investigating how crime documentaries frame urban racial minority communities that host the highest rates of violent crime and how race plays a role in what the larger society is taught about urban crime through the documentary genre. This focus has a goal of stimulating a more critical consumption of popular media.

**SOCI 2240 Sociology of Health (4 Credits)**

This course explores questions of how individuals experience health and illness, how they interact with institutions and providers, and how these experiences are filtered through social structures that lead to inequality. Using a sociological perspective, we analyze how individuals' experiences of health and illness, medical institutions, and work in the health professions are influenced by racial/ethnic background, gender, social class, sexual identity, and age. We analyze these concepts by looking at who gets to define health and illness as well as how medical decisions are made, including who has the right to make decisions, what are the limits on the kinds of decisions that can be made, and how are decisions enforced and challenged by law. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2250 Criminology (4 Credits)**

Social meaning of criminal behavior; relationship between crime and society in particular, how production and distribution of economic, political and cultural resources shape construction of law, order and crime; different types of crime, criminals and victims, and efforts to understand and control them. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2255 Juvenile Delinquency (4 Credits)**

Introduction to sociological study of delinquency in American society; history of juvenile delinquency, the creation of delinquent misconduct as a social and legal category, and current state of delinquent behavior. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2260 Deviance and Society (4 Credits)**

Examines some behaviors often called deviant, such as mental illness, substance abuse, governmental crime and unconventional lifestyles, and asks what groups call them deviant, why and how behavior affects community. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2270 Sociology of Religion (4 Credits)**

Sociological investigation of religion; how religion has influenced society, politics, gender equality; how society has influenced religion; why people participate in religion. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2320 Race and Ethnic Relations (4 Credits)**

Relationship of racial and ethnic minority groups to systems of social stratification; emphasis on United States. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2420 Social Inequality (4 Credits)**

Dimensions of social class and its effect on economic, political and social institutions as well as style of life. Cross listed with GWST 2420. Prerequisite: SOCI 1810 and sophomore standing or permission of instructor.

**SOCI 2500 Schooling and Society (4 Credits)**

The objective of this course is to examine the relationship between schooling and the larger social inequalities (e.g., racism, poverty, and gender) that profoundly shape education. The major focus in this seminar will be on U.S. K-12 public education. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2540 Current Social Problems (4 Credits)**

We often think about social problems in our social worlds. However, rarely do we consider how certain situations come to be defined as problems and why some "problems" remain a focal point of public attention while others fade, even when the circumstances around that issue have not improved. In this course, we look at these very issues. Using current social problems, we explore how a social phenomenon comes to be seen as a social problem, what is at stake in this process, and how these dynamics matter in terms of thinking about inequality. This course counts toward the Scientific Inquiry: Society and Culture requirement.

**SOCI 2565 Men and Masculinities (4 Credits)**

Many of us believe that anatomy is what determines our behavior and that our bodies dictate our social and psychological temperament. Looking specifically at men and masculinities, this course tests that general notion, investigates the various ways male behavior is gendered and critically explores the meanings of masculinity in contemporary institutions. Throughout the course, we look at the multidimensional and multicultural ways masculinity is produced, constructed, enacted, and resisted; how masculinities structure power and resources; and how masculinities benefit, regulate, and hurt men's lives. Cross listed with GWST 2565. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2611 Research Practicum (1-4 Credits)**

Research process of hypothesis formation, data collection, data analysis and interpretation of results through collaboration with ongoing faculty research or through developing a guided individual research project. Prerequisites: SOCI 1810 and junior or senior standing.

**SOCI 2612 Research Practicum (1-4 Credits)**

Research process of hypothesis formation, data collection, data analysis and interpretation of results through collaboration with ongoing faculty research or through developing a guided individual research project. Prerequisites: SOCI 1810 and junior or senior standing.

**SOCI 2613 Research Practicum (1-4 Credits)**

Research process of hypothesis formation, data collection, data analysis and interpretation of results through collaboration with ongoing faculty research or through developing a guided individual research project. Prerequisites: SOCI 1810 and junior or senior standing.

**SOCI 2620 Crime over Time (4 Credits)**

This course examines the long-term decline of human violence across thousands of years, including: the extent of the decline, the causes of the decline, and the reasons why most people find it hard to believe that human violence has indeed declined precipitously. Prerequisite: SOCI 1810.

**SOCI 2622 Deportation Nation (4 Credits)**

This service-learning course examines the nexus of the criminal justice and immigration—or, crimmigration—system. Through a scholarly analysis situated of the historical, social, and political processes that have informed contemporary immigration law and policy, the course focuses on the shift to enhanced enforcement, detention, and mass deportation. Prerequisite: SOCI 1810.

**SOCI 2624 Labor and the Contemporary Prison System (4 Credits)**

Sociology is the "study of society" that examines and questions patterns of social behavior. Criminology is the study of crime, its changing definitions, its causes, and responses to it. In this course, we will explore sociological and criminological concepts and theories central to understanding labor in, at, around, and tied to the contemporary prison. We will move beyond common-sense understandings of these topics. The goal is for you to learn to critically evaluate the institution of penal labor, the work of prisoners and other individuals in and surrounding the prison, the impacts of penal labor on the economy, and challenges that different groups encounter in the face of these phenomena. Throughout the session, you will learn to use sociological and criminological "tools" to evaluate these elements of the social world to gain a better understanding of your life and the lives of those around you. Prerequisite: SOCI 1810.

**SOCI 2626 Sociology of Popular Culture (4 Credits)**

Sociology is the "study of society" that examines and questions patterns of social behavior. In this course, we will focus on one prominent aspect of social life: popular culture. You will explore theories and concepts central to the sociological study of popular culture in an effort to move beyond a common-sense understanding of ubiquitous cultural objects and their producers. The goal is for you to more critically evaluate and appreciate pop culture in regard to its production, consumption, meanings, and use. Throughout the quarter, we will discuss music, television, film, literature, comic books, sports, art, fashion, and other pop culture topics. You will learn to use sociological theory and concepts to evaluate these elements of the social world in order to gain a better understanding of your life and the lives of those around you. Prerequisite: SOCI 1810.

**SOCI 2628 Mass Incarceration (4 Credits)**

This course is designed for upper-level students interested in social policy, politics, inequality and law. It explores the "carceral state" or the institutions and policies that create a system of criminalization and punishment in the United States. Within the carceral state, the focus of the course is on the history and policies in the United States that led to the highest per capita incarceration rate in the world. The course examines and moves beyond various common explanations for mass incarceration, including crime, politics, public opinion, racism and the "prison industrial complex." We then explore specific policies and practices that created and sustain high levels of incarceration, including sentencing, prison programming, and prosecutorial discretion, and the ways that these factors are deeply intertwined with America's history of race and inequality. We will study mass incarceration's complexity by exploring variation in punishment across federal, state and local levels. Finally, the course addresses recent attempts at reform, including policies around re-entry, drug courts and prison conditions. Prerequisite: SOCI 1810.

**SOCI 2650 Sociology of Immigration (4 Credits)**

This course applies a sociological approach to the study of international migration. Students examine early and contemporary waves of migration to the U.S.; theories of migration; processes of settlement and incorporation; the construction of immigration and citizenship; and institutional responses to immigration across and within immigrant groups. The course also examines variation in immigrant experiences along the lines of race/ethnicity, gender, and sexual and age identities. The course culminates in an examination of the impact of migration on the U.S. and on immigrants' sending communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2655 Latina/os in American Society (4 Credits)**

Latinas and Latinos constitute one of the largest and fastest growing ethnic groups in the United States. This course uses a sociological lens to understand Latina/os' experiences in the U.S. Specifically, we address Latinas' and Latinos' historical experiences and migration trajectories; assimilation, incorporation and racial/ethnic identity formation; the family, schools and labor markets; and political participation. In so doing, we discuss and challenge stereotypes about Latina/os, present alternative perspectives about Latina/o experiences in the U.S. and most importantly, understand their contributions to their families, their communities, and to the nation as a whole. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2701 Topics in Sociology (4 Credits)**

Topics vary. Recent topics have included: Sociology of Debt, Sociology of Poverty, Sociology of Sexuality, and Sociology of Religion. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2703 Topics in Sociology and Criminology (4 Credits)**

Topics vary. Recent topics have included: Environmental Justice; Work, Law, and Inequality; Immigration Law. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2710 Crime and Inequality (4 Credits)**

This course conducts a systematic investigation of the nature of inequality as it is related to crime and criminal justice in America. Racial, gender and class disparities are explored at critical stages of the criminal justice process, including crime commission, law-making, policing, court actions, and sentencing. This course considers the effects of inequality - particularly on system functions, employment opportunities, family stability and offenders' communities. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2715 Violence in Society (4 Credits)**

This course surveys how social scientists examine and understand violence in society. The first section of the course examines historical trends in violence over the past 500 years. We will then examine patterns of criminal violence in American society along with modern criminological theories. The final section of the course examines how sociological theories can help us understand newer forms of violence like genocide, terrorism, and state repression of movements. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2719 Social Movements (4 Credits)**

Studies in range of perspectives and research issues pertinent to understanding of social movements (groups operating without clear-cut direction from established social structure and culture). Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2720 Guns and Society (4 Credits)**

Guns are a fact of life in the United States; there are more guns in the US civilian stockpile than any other nation. In this course, we will take a step back from the partisan debates and assess both the history of guns and gun policy in the United States as well as the current state of knowledge around firearms in society. During the course of this class we will explore how science, politics, and culture converge to make guns a controversial topic in the US and what it means for society and policy. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2722 Criminal Justice Reform in the U.S. (4 Credits)**

Events in 2020 have left many people wondering why our criminal justice system looks as it does today and asking what we can do to make it better. Despite the wave of political and cultural support for reform, little has changed. Why? The answers lie in the complicated historical processes that created the loose network of institutions that we refer to as "the criminal justice system," and in the contemporary socioeconomic and political structures that sustain these institutions. To better understand the contemporary state of reform, we will study the forces that gave rise to them, including race's central role in the politics of criminal justice, and the complexities of American federalism. We will research contemporary reform efforts targeting policing, mass incarceration, prosecutorial discretion, and other issues. Prerequisite: SOCI 1810.

**SOCI 2724 Law and Social Control (4 Credits)**

Why do people obey the law even when doing so is not to their benefit? How do legal systems mobilize the threat of punishment to compel obedience? How do legal issues and institutions reflect deeper forces rooted in social life? This course explores these questions and examines how socio-legal and sociology of punishment scholarship help explain contemporary and historical developments in law and social control. We emphasize law's role in establishing and maintaining particular forms of social order, and explore how this becomes manifest in modern institutions, especially criminal justice systems. Prerequisite: SOCI 1810.

**SOCI 2730 Gender in Society (4 Credits)**

How the biological fact of sex is transformed into socially created gender roles. How individuals learn they are male and female, and how their behaviors are learned. A look at gender distinctions built into language, education, mass media, religion, law, health systems and the workplace. Cross listed with GWST 2730. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2737 The Sociology of Denial and Acknowledgment (4 Credits)**

Humans are adept at downplaying, excusing, and outright ignoring uncomfortable truths. In our everyday encounters, we overlook our stumbles, mistakes, and blemishes to avoid embarrassing each other. In this way, denial allows us to maintain smooth social interactions, even in the face of disturbances. At the same time, denial permits us to live with extreme forms of inequality, deep and abiding social problems, and violations of others' rights. Many of us rationalize inaction in the face of others' suffering or overlook the bad decisions – and crimes too – of our political allies. In this class, we will investigate denial and its functions. We will also examine the efforts people make to overcome collective denial through interventions, acknowledgment, and memorialization. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2741 Work and Occupations (4 Credits)**

How individuals fit into, are influenced by and in turn influence business institutions; changes in structure and meaning of workplace; different types of business and work relationships, forms of work, business roles and organizational structures; how business institutions affect society as a whole. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2750 Sociology of Law (4 Credits)**

Overview of theory and research about relationship between law and society; legal rules, roles, organizations and inter-institutional relations; activities of legal profession, courts, juries, legislatures and regulatory agencies. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2751 Masculinities and Sexualities (4 Credits)**

This course takes an interdisciplinary approach to explore the intersections of masculinities and sexualities in our culture. Through scholarly works in the studies of media, gender, sexualities, sociology, anthropology, and history, we will examine personal narratives, art, film, media, and literature to uncover power and inequality as they are complicated by a hierarchy of multiple masculine and sexual identities. Beyond gender and sexuality, we will also consider the significance of race, class, and disabilities as they also impact the lived experiences of people who claim masculine and sexual identities. This course will employ a variety of methods for uncovering what it means to be masculine and a sexual person in our contemporary culture. Prerequisite: SOCI 1810.

**SOCI 2752 Youth in Society (4 Credits)**

Although commonly understood to be a natural and universal phase in the life course, many scholars argue that "youth" is socially constructed. The goal of this course is to examine how young people in the United States are both "constructed" as a distinct social group by institutions such as media, schooling, criminal justice, and work, and how youth in turn construct their own social worlds and even spark social change. This is a hands-on exploratory course about youth cultures, youth issues, generational differences, and age as an axis of inequality. This means that in addition to reading about historic and contemporary youth, students will get a chance to explore a youth issue, controversy, or subculture in real time by reviewing relevant sociological research and collecting original data. Prerequisite: SOCI 1810.

**SOCI 2753 Immigration and the Law (4 Credits)**

International migration to the US and the political and legal questions it raises are seemingly omnipresent and ever controversial. This class will seek to make sense of immigration law with a focus on the contemporary era. We will focus on the construction of illegality of immigrants, and the "criminalization" of immigration law. What explains such trends? How have they played out amongst the public and policymakers, in the courts, and in the federal bureaucracy? How have states and local governments acted? What are the consequences for immigrants, their families, and communities when some must live in states of uncertain legality? Finally, how do immigrants and their allies resist these broader trends? By examining causes and consequences of US immigration law in the contemporary era, students will be able to make sense of an ever-controversial topic. Prerequisite: SOCI 1810.

**SOCI 2757 State Violence (4 Credits)**

This course applies a socio-legal approach to the study of state violence. We will explore the ways that social institutions, culture, and law shape states' uses of violence both internationally and domestically. We will also examine the socio-legal foundations of efforts to control and collectively respond to state violence. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2760 Discipline and Punishment (4 Credits)**

Institutional mechanisms for imposing discipline and for punishing wayward individuals and groups; contradictory social objectives of punishment and corrections; organizational settings for administering punishment and identifying predominant institutional routines in coercive environments. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2762 Work, Law and Inequality (4 Credits)**

Work is a central institution of modern societies. Much of our adult lives revolve around paid employment: finding it, keeping it, and deciding whether and when to change it up. Whether jobs are plentiful or scarce, highly paid or undervalued, safe or dangerous, are not just market questions, but legal and political ones. In this course, we will examine the relationship between work and the law in recent U.S. history, focusing on the transition from a legal regime that provided for well-paying and secure jobs to one in which precarity reigns, illegal conditions have become endemic in many industries, and a significant number of jobs in the so-called "platform" economy exist beyond the reach of workplace laws. Prerequisite: SOCI 1810.

**SOCI 2765 The Female Offender (4 Credits)**

Female offenders are one of the fastest growing segments in both the juvenile and adult justice systems. This course introduces students to debates and issues surrounding girls, women, and crime; explores different theoretical perspectives of gender and crime; and examines the impact of gender on the construction and treatment of female offenders by the justice system. In addition, this course specifically looks at girls' and women's pathways to offending and incarcerations; understanding girls' violence in the inner city; exploring the reality of prison life for women, with a particular focus on the gender-sensitive programming for incarcerated mothers; and ending with an examination of how capital punishment has affected women offenders historically and contemporarily. Cross listed with GWST 2765. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2770 Kids and Courts (4 Credits)**

This course examines how American society has responded to the problem of at-risk and delinquent youth in the twentieth and twenty-first centuries. The primary focus will be on the juvenile court's and the encompassing juvenile justice system's efforts to address this problem. The court's and the system's ameliorative attempts to help at-risk children/adolescents as well as their more punitive policies directed at serious and violent young offenders will be investigated. Differences in juvenile court policies and practices over time and across jurisdictions (both in the United States and in other countries) will be considered. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2775 Wrongful Conviction (4 Credits)**

The criminal justice system was once considered infallible—innocent people did not end up in prison. But DNA evidence has revealed that innocents are incarcerated and perhaps even executed. This course focuses on the prevalence of wrongful conviction; the harms caused by wrongful conviction; the causes of wrongful conviction; strategies for reducing wrongful conviction; and the prospect of compensating the wrongfully convicted. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2780 Women and the Law (4 Credits)**

This course explores the relationship between women and the law, looking at the way the categories of sex and gender have been produced and reproduced through law. Through a look at case law and sociological research, students will examine women as bodies, workers and family members. This course also explores the development and current status of American law in the areas of women's constitutional equality, pay equity and equal opportunity, women's access to education, women in the workplace and violence against women. Cross listed with GWST 2780. Prerequisite: SOCI 1810 or permission of the instructor.

**SOCI 2785 Family and the Law (4 Credits)**

The government is actively involved in deciding who gets to be a family and what families should look like. The state and its laws are involved in shaping family life, making decisions for family members, and mediating familial conflict. This course looks at the appropriate role of the state in family life by examining state legislation and court decisions and social research on a variety of topics. Cross listed with GWST 2785. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2790 Policing Society (4 Credits)**

Emergence and development of police organizations and tactics; factors that influence policing styles and objectives; historical precedents; policing the street; policing the board room; policing the world; and policing everyday life. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2795 Capital Punishment (4 Credits)**

This course examines three main topics: the history of capital punishment (facts and trends, public opinion, legislation, and landmark Supreme Court cases); arguments often made for abolition (arbitrariness, cost, and innocence); and arguments often made for retention (deterrence, incapacitation, and retribution). Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2800 Sociology of Sport (4 Credits)**

Locating contemporary sport within context of history of work and leisure to explore sociological forces that have shaped the way we work and play; emphasis on how sport fits into the American culture; aspects such as race, gender, class, intercollegiate athletics, socialization, professionalization, economics, politics and social change. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2801 Topics in Criminology (4 Credits)**

Topics vary. Recent topics have included: Homicide in Colorado, Criminology from a Radical Perspective, and Gangs in America. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2820 Drugs and Society (4 Credits)**

Relationship between drug use, drug control and social contexts; various sociological themes relating to use and control of drugs in American society. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2825 Sexualities and the Law (4 Credits)**

This course provides an overall conceptual and applied understanding of sexualities (sexual identities, relationships, behavior, and choices), law, and punishment in the United States. All of the following areas will be examined: sexual minorities' rights (with a focus on marriage equality) and relationships; reproductive regulation; sex industry; pornography; and responses to sex offenses (with a focus on responses to college sexual assault). Students in this course will identify the ways legislation and the courts define and regulate sexualities in society. Prerequisite: SOCI 1810.

**SOCI 2830 White-Collar Crime (4 Credits)**

Organization and control of white-collar crime, including fraud, corruption, price fixing, embezzlement, regulatory violations and other crimes committed by high-status individuals for and against organizations. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2835 Victimology (4 Credits)**

This course provides an overview of various aspects of crime victimization, including theories, policies, and practices relevant to victims of crime and the history of the crime victims' movement. It will also focus on the impact of victimization, legal rights for crime victims, system responses to victims of crime, and the interaction of victims with the American legal system. Selected current and emerging issues and programs in the victim services field will be explored, including analysis and discussion of alternative methods of justice. Prerequisite: SOCI 1810.

**SOCI 2850 Sociology of Poverty (4 Credits)**

Causes, incidence and consequences of poverty; the various "pockets" of poverty: aged, urban, ethnic minorities, women; exploration of poverty in the U.S. and cross-culturally. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2855 Crime and the Media (4 Credits)**

This course explores the complex relationship between crime and the media. We use sociological and cultural theories to examine how crime, criminals, and the criminal justice system are portrayed in print and visual media outlets. We explore the media's role in shaping crime control and other public policies. We investigate the influence of offender and victim characteristics (e.g., race, gender, class, celebrity status) on how crime is presented. We also "turn the tables" to learn about how media itself may influence patterns of criminal offending (think violent video games). The overarching goal of this class is to teach students to watch/read crime media with an educated, critical eye. Prerequisite: SOCI 1810 or permission of instructor.

**SOCI 2860 Conflict and the Law (4 Credits)**

This course focuses on Sociologist Donald Black's theoretical models to examine: the cause of human conflict; the conditions that lead disputants to turn to the legal system to handle conflict; and the impact of the disputants' social characteristics on the outcome of the case.

**SOCI 2988 Study Abroad Resident Credit (0-18 Credits)****SOCI 3701 Topics in Sociology (4 Credits)**

Topics vary. Recent topics have included criminal justice policy; qualitative methods and data analysis; environmental governance; advanced ethnographic methods; community values. Prerequisites: junior or senior standing and permission of instructor.

**SOCI 3981 Internship (1-4 Credits)**

Opportunity to gain valuable work experience, explore various career options, develop job competencies and apply theoretical knowledge to practical concerns of the world. Must have junior or senior standing, be sociology or criminology major or minor, have a cumulative GPA of 3.0, and have taken at least three sociology- and/or criminology-related courses beyond SOCI 1810.

**SOCI 3982 Internship (1-4 Credits)**

Opportunity to gain valuable work experience, explore various career options, develop job competencies and apply theoretical knowledge to practical concerns of the world. Must have junior or senior standing, be sociology or criminology major or minor, have a cumulative GPA of 3.0, and have taken at least three sociology- and/or criminology-related courses beyond SOCI 1810.

**SOCI 3985 Thesis Research Seminar (2 Credits)**

This course is designed to provide support and structure for students working on their senior thesis. The course presumes that students have completed a methods sequence, have chosen a thesis topic, and have a plan for how they will develop their thesis. Prerequisites: SOCI 2005 and SOCI 2006; permission of the instructor.

**SOCI 3986 Thesis Writing Seminar (2 Credits)**

This course is designed to provide continued support and structure for students working on their senior thesis. The class helps students with the structure of writing and defending their thesis. The course presumes that students have begun their projects, are significantly or nearly finished with data collection and organization, and are ready for analysis and writing. Prerequisites: SOCI 2005, SOCI 2006 and SOCI 3985; permission of the instructor.

**SOCI 3988 Study Abroad Resident Credit (0-18 Credits)****SOCI 3991 Independent Study (1-8 Credits)****SOCI 3998 Criminology Assessment (0 Credits)**

This course involves a required assessment of graduating sociology and criminology majors' knowledge of the discipline based on courses taken. Prerequisites: SOCI 1810, SOCI 2005, SOCI 2006, SOCI 2020, and SOCI 2250; permission of instructor.

**SOCI 3999 Sociology Assessment (0 Credits)**

This course involves a required assessment of graduating sociology and criminology majors' knowledge of the discipline based on courses taken. Prerequisites: SOCI 1810, SOCI 2005, SOCI 2006, SOCI 2020, and SOCI 2420; permission of instructor.

# Spanish (SPAN)

## **SPAN 1001 Beginning Spanish (4 Credits)**

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Span 1001 is designed for students with no previous Spanish experience. Students with more than 2 years of high school Spanish or who grew up in a Spanish-speaking environment must take the placement exam and enroll in a higher-level course.

## **SPAN 1002 Beginning Spanish (4 Credits)**

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1001 or equivalent.

## **SPAN 1003 Beginning Spanish (4 Credits)**

The Beginning Spanish sequence aims to provide practical language skills for meaningful communication in real situations, with the goal of connecting with the diverse Spanish-speaking populations around the world and in the US. Three quarter sequence. Prerequisite: SPAN 1002 or equivalent.

## **SPAN 1701 Topics:Practice Spanish Abroad (4 Credits)**

This course is designed for 1003-level SPAN students who want to enhance their Spanish language skills in an immersive, real-world setting in a Spanish-speaking country while preparing for the next level of language study. Students will strengthen their language proficiency and cultural competence through structured learning and real-world practice, equipping them for more advanced Spanish coursework. The course includes a 2-3 week-long stay in a Spanish-speaking country. This course is offered for elective credit only.

## **SPAN 1988 Study Abroad Resident Credit (0-18 Credits)**

## **SPAN 2001 Intermediate Spanish (4 Credits)**

Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 1003 or equivalent. Three quarter sequence.

## **SPAN 2002 Intermediate Spanish (4 Credits)**

Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 2001 or equivalent. Three quarter sequence.

## **SPAN 2003 Intermediate Spanish (4 Credits)**

Grammatical structures, close rapid conversation, reading of cultural and literary materials. Prerequisite: SPAN 2002 or equivalent. Three quarter sequence.

## **SPAN 2050 Form, Meaning and Communication in Spanish (4 Credits)**

This course is an overview of advanced Spanish grammatical structures necessary for creating meaning and communication through a cultural, political and social framework. As such, it emphasizes that the Spanish language has a variable grammatical system that changes across its communities and according to contexts of use. This course offers extensive oral and written practice to improve students' standard grammatical accuracy as well as an overall understanding of the structure of the language. This course provides the metalinguistic knowledge necessary for students to successfully communicate in Spanish both in oral and written form and prepare for upper-level courses, while validating and honoring the rich linguistic differences that characterize the Spanish-speaking world.

## **SPAN 2100 Conversation and Composition (4 Credits)**

Targeted practice in topics related to written and oral development in Spanish. Subject areas may include: literacy and cultural readings, contemporary politics, films, podcasts, music, and contemporary music articles. Prerequisite: SPAN 2003 or equivalent.

## **SPAN 2200 Spanish for Heritage/Bilingual Speakers I (4 Credits)**

Development of the linguistic, literacy and academic language skills of bilingual/heritage speakers of Spanish for preparation to advanced courses and professional settings. Overview of topics relevant to Spanish-speaking communities in the United States. This section is for bilingual/heritage speakers of Spanish only.

## **SPAN 2250 Spanish for Heritage Speakers II (4 Credits)**

Second course of the 2-course sequence for heritage speakers. Continuation of the development of linguistic, literacy and academic language skills of bilingual/heritage speakers of Spanish for preparation to advanced courses and professional settings. This section is for heritage speakers of Spanish only.

## **SPAN 2300 Iberian Culture & Civilization (4 Credits)**

Intensive study of culture of Spain; manifestations of culture found in history, art, architecture, music, literature, and politics of early and modern Spain. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2350 Latin American Culture and Societies (4 Credits)**

An introductory and interdisciplinary course on the political, historical, and cultural dynamics that have shaped Latin America, the Caribbean and U.S. Latinos. An examination of the political and intellectual movements and economic forces embedded in relations of power from pre-Colombian civilizations, colonialism, independence, nation building, and imperialism to the struggle for democracy. Analysis of diverse cultural practices such as literature, music, film, and visual art within a national and transnational context. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2400 Latino Cultures in the United States (4 Credits)**

Interdisciplinary study of Latino contemporary issues in the United States incorporating aspects of the distinct socio-historical, political, economic, and cultural dynamics that have contributed to the shaping, development and increasing prominence of Latino communities. Includes an examination of how Latino cultural forms and practices intersect with socio-historical, economic, and political forces as a framework for understanding the Mexicano/Chicano, Puerto Rican, Cuban, Dominican and other Latino communities embedded in the very fabric of what constitutes the United States. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisite: SPAN 2100 or 2200 or 2250 or equivalent.

**SPAN 2701 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisites: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 2702 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2300 or equivalent.

**SPAN 2703 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2350 or equivalent.

**SPAN 2704 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisites: SPAN 2300 and SPAN 2350.

**SPAN 2705 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: SPAN 2400.

**SPAN 2801 Writing, Memory & Terror: Post-Dictatorship Literature of the Southern Cone (4 Credits)**

This course explores the representation of violence, repression and disappearance in the post-dictatorship literature of Argentina, Chile and Uruguay in literature and memorialization projects. Students will examine literary testimony in a variety of genres: narrative, poetry, theatre, and critical essays in their social, political and historical contexts, as well as its manifestations in music and film. We will discuss the role of memory in reconstructing discourses; testimonial literature and the modern and postmodern views of representation and memorialization; and points of convergence between this literature and other survivor testimonial narratives, particularly those of the Shoah. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2802 Afro-Latinos in the US (4 Credits)**

Afro-Latin@s (Afro-Latinos and Afro-Latinas) is a group designation for a community that, until recently, had not tended to call itself, or to have been called, in that way. The group's past, however, demonstrates a sense of tradition and shared social and cultural realities, and the term is increasingly being used in the twenty-first century. Particular to the USA context, as opposed to Latin American countries, is that here the Afro-Latin@ experience has to do with the cross-cultural relation between the Afro and the Latin@, which means most conspicuously the relation between Latin@s and African Americans. It is important, however, not to limit the concept to that connection and recognize the presence of a group that embodies both at once. This class explores the history of Afro-Latin@s in the USA, as well as examples of unique lived experiences of Afro-Latin@ individuals navigating their social identities as they intersect with other Blacks and Latin@s. The identity field linking Black Latin Americans and Latin@s across national and regional lines will remain within focus. The class will be grounded in the analysis and discussion of a variety of texts and artifacts including essays, poetry, narrative, and film. This class will be conducted in English and will not count toward the major or minor in Spanish. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**SPAN 2803 Religion and Violence in Latin America (4 Credits)**

The Spanish and Portuguese imposed Catholicism in the Americas during the conquest and colonization, brutally repressing indigenous religious expression through persecution and forced conversions. While Catholic doctrine officially replaced the polytheism, animism and ancestor worship of indigenous religions, in actuality, the Colonial period saw great diversity in religious practice, as indigenous populations and African slaves developed systems of religious syncretism adapting the Catholic dogma to their beliefs and practices. However, although Latin America is currently home to more than 425 million Catholics—an estimated 40% of the Catholic population worldwide—and the Roman Catholic Church now has a Latin American pope for the first time in its history, the region is far from being religiously homogeneous. Since independence, immigration, politics, and economics have played an important role in effectively changing the religious demography of Latin America. This course will examine religion and violence in Latin America, from pre-Columbian times until 1983, focusing on the relationship between religion and political power. We will explore pre-Columbian religions; the role of religion in the conquest and colonization of the Americas; African religion and slave religious ritual; religious syncretism; religious art; immigration and religion; revolution and religion; and the political implications of Protestantism and Liberation Theology. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class will be conducted in English and will not count toward the major or minor in Spanish.

**SPAN 2804 Latin American Popular Culture (4 Credits)**

This course is an introduction to the study of Latin American popular culture. Basic theoretical notions about the subject will be introduced but the emphasis of the class will be on the discussion of literature analyzing specific situations, events or expressions drawn from various Latin American countries during the nineteenth and twentieth centuries as well as the United States in the twentieth century. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2805 The Sociopolitics of a Majority-Minority Language in the U.S. (4 Credits)**

This course is an introduction and critical exploration of the sociohistorical, sociopolitical and sociolinguistic implications of Spanish as a language of use in local communities across the United States. Because the primary focus of exploration, in this case, is the social and political issues related to Spanish in the U.S., we will focus on its use and representation, rather than on its linguistic representation. Similarly, we will conceive of language—any language—as social action, particularly the ways in which people use language to convey social and political meanings. To achieve such an undertaking, students will be exposed to an interdisciplinary, sociopolitical approach to a language spoken by more than 40 million people in the United States today (American Community Survey, 2020), exploring the complex historical context that makes Spanish the de facto second language spoken locally as well as nationally. Key to this analysis will be the introduction of social constructionism and other critical sociolinguistic notions that explain social categories such as race, language, gender and class as not fixed but rather, socially constructed. In all, this course will explore how Spanish, as a minority-majority language, presents fertile ground for recognizing the social and political implications of language use. Students will engage with the material through course lectures, active discussions, and analyses of real-life examples of Spanish use on the ground. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2806 Latin American Food Landscapes (4 Credits)**

This course focuses on the ways in which Latin American food landscapes—alimentary cultivation, production, purveyance, preparation, and consumption—reveal the complexities of various political, socioeconomic, ecological, and cultural contexts. Students will be challenged to consider the ways in which, throughout the Américas and since the pre-conquest era, diverse food landscapes have often provided marginalized individuals and communities with opportunities to creatively resist policies or prejudices aimed at erasing local food and agricultural practices and preferences. Course lectures and readings are informed by key tenets of global and interdisciplinary food studies and offer students with the opportunity to explore a variety of genres and areas of knowledge. Course topics include the intersections of Latin American Food Landscapes and: notions of freedom, identity, and nationality; gastro-imperialism; culinary arts and seduction; food-related religious and spiritual practices; agroecology & Indigenous epistemologies; agrarian reform & food security activism; urban agriculture; breastfeeding practices and polemics; gastrotourism; cross-cultural food & mountain studies. No knowledge of Spanish is required or expected, although interested students may choose to complete select course readings or assignments in Spanish, Portuguese, and/or Quechua. This course counts toward the Analytical Inquiry: Society and Culture requirement. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2807 Salvador Dalí and His Surrealist Friends (4 Credits)**

This interdisciplinary course is an exploration of Salvador Dalí's Surrealist art and life, focusing particularly on the influence that his early friendships had on his work. Students will analyze surrealist art while also learning about Dalí's fertile artistic collaborations and personal relationships with a select group of artists such as filmmaker Luis Buñuel, writer Federico García Lorca (both intimate friends of Dalí); poets André Breton and Paul Éluard (leading voices in the Surrealist group); Éluard's wife, the enigmatic Gala (who will ultimately become Dalí's wife, muse and business manager); and Sigmund Freud who personally met Dalí and whose ideas about the subconscious became the ideological foundation for this experimental movement. Students will also learn about other Avant-Garde movements such as Dadaism, Ultraism and futurism.

**SPAN 2808 Inventing Latin America (4 Credits)**

In this course we will explore the Idea of Latin America in a broader context of social constructs and social formations using theoretical frameworks from History, Anthropology, Geography and Semiotics. Students in this course will learn and assimilate theoretical tools to identify what a social construct is, how it is built, used, and how it changes. Based on readings focused on specific examples in the history of the mass of land called first new world, first America, west indies and later, Latin America, we will analyze the ways in which temporal and spatial dimensions are enforced to build these and other concepts that are part of the global process of cultural negotiations. Modernity, traditional, underdeveloped, exotic, "western" or "not western" are part of the vocabulary that informs what has been called "politics of time and politics of space". We will focus specially on the ways the binominal Latino/a and Latin America is used in the context of the multicultural idea of the USA, underlaying the difference in meaning when the term has been employed in the context of national discourses in Latin America. This course counts toward the Analytical Inquiry: Society and Culture requirement. No knowledge of Spanish is required or expected. This class will be conducted in English and will not count toward the minor in Spanish. A total of only 4 credits from any SPAN28XX course may count toward the major in Spanish.

**SPAN 2900 Introduction to Literary and Cultural Studies (4 Credits)**

Intended as a transition between 2000-level advanced language and cultural courses and 3000-level cultural and literature analysis courses, SPAN 2600 presents students with the opportunity to refine their analytical and interpretive skills, by examining a wide variety of Spanish language texts drawn from the literary cultural milieus of Latin America, Spain, and the United States. Throughout this course, students will acquire and utilize fundamental tools and strategies for contemporary literary and cultural studies in Spanish, including: gender and sexuality studies; race and ethnicity; decolonial thinking; pop culture; nationalism; ideology; and formal elements of interpreting texts. At the end of this course, students should be able to demonstrate relationships between distinct texts of varied media and genre (journalism, essay, short story, autobiography/memoir, historiography, oral tradition, film, photography, the plastic arts, etc.) in the interdisciplinary perspective that characterizes literary and cultural studies in the 21st century. This course counts toward the Analytical Inquiry: Society and Culture requirement. Prerequisites: SPAN 2100 and SPAN 2300 or SPAN 2350.

**SPAN 2930 From Tenochtitlan to A Global City: Urban Landscapes in the Making of Modern Mexico (4 Credits)**

This course is an intensive examination of the past and present of one of the most fascinating cities in the world, Mexico City. Paying particular attention to space and place, we will examine the historical processes (political, intellectual, ecological, social, and cultural) that are manifest in the urban development of the megacity. By taking this class in Mexico City, students will be able to visit some of the landmarks of Mexican History, as well as several other significant museums and archaeological sites. Similarly, by engaging in an in-depth reflection structured along textual, visual, and in-sight materials and experiences, students will be invited to reflect about matters of change and continuity as well as how national socio-political trends are reflected in local contexts, thus also learning to reflect about the interpretive relationship between the micro-macro levels of analysis. Prerequisite: SPAN 2350.

**SPAN 2988 Study Abroad Resident Credit (0-18 Credits)****SPAN 3200 Eroticism and Nation in the Latin American Novel (4 Credits)**

A study of the foundational fictions of Latin America and their twentieth-century rewriting. Nineteenth-century novels showcasing the interplay of sentimental love, eroticism, class struggle, and political agendas in the formative years of the Latin American nations are analyzed and contrasted with twentieth-century narratives where such nation (and narrative) building is put to question. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3230 Musicalized Literature (4 Credits)**

Introduction to musicalized literature: a study of literary texts that provoke in the reader a sense of being related to music or prompt a "musical" experience while reading. The course focuses on various Latin American narrative texts whose relation with songs or genres of popular music is more or less explicit. The analysis aims first to illuminate their musical aspects, but also addresses other angles (social, historical, political). Basic information about several genres of popular music is provided in order to facilitate comprehension. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3300 Travel Narratives (4 Credits)**

Travel accounts, rather than candid and unbiased testimonies about places and people, are challenging texts that require critical analysis. This class offers an overview of the evolution of travel narratives, from the times of the Grand Tour to contemporary accounts representing cross-cultural interactions between Spaniards and their 'others'. Travelogues by authors such as Washington Irving, Domingo Faustino Sarmiento, Julio Camba and Juan Goytisolo. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3320 Class and Gender in 19th-Century Spain (4 Credits)**

Spain underwent social and political revolutions during the nineteenth century from which new values emerged. Through the analysis of literary, political and cultural texts from the late nineteenth-century, students explore the changed view of gender and class identity. Students will read and critically examine several works by prominent authors of the Spanish Realist tradition, including Benito Pérez Galdós, Leopoldo Alas (Clarín) and Emilia Pardo Bazán. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3330 Rebels, Lovers and Outlaws in Spanish Romanticism (4 Credits)**

This course studies the literary and cultural tropes of Spanish Romanticism. Themes discussed include the rebellion against an unjust social order, the portrayal of marginal social groups and the creation of subjectivity in the Spanish Romantic tradition. The literary genres studied are drama, essay and poetry; the primary authors include Larra, Zorrilla, Espronceda, Bécquer, and de Castro. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3333 The Fertile Friendship: Bunuel, Lorca, Dali and Spanish Surrealism (4 Credits)**

An interdisciplinary study of the relationships of three Spanish artists (Salvador Dalí, Federico García Lorca and Luis Buñuel) and the development of Surrealism in Spain. Through the intriguing intersections of the life and art of the painter, the poet, and the filmmaker, a better understanding of this fascinating artistic movement is achieved. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3400 Spanish Theatre in Performance (4 Credits)**

Reading, discussion and performance of plays written in Spanish. The focus will be on improving pronunciation, intonation and dramatic expression as well as providing a better understanding of contemporary theatrical movements in the Spanish speaking world such as teatro del absurdo, teatro posibilista or teatro campesino. The course includes a final performance (in front of a real audience) of the play. Plays by authors such as Susana Torres Molina (argentine), Federico Garcia Lorca (Spain), Emilio Carballido (Mexico), and other authors from the Spanish speaking world. No prior experience in theater is required. Prerequisite: SPAN 2300 or SPAN 2350 or equivalent.

**SPAN 3420 Contemporary Film in Spain (4 Credits)**

Through contemporary Spanish film and essays this course examines the representation of key cultural aspects of Spanish society, such as national and regional identities, immigration, and gender issues. Students critically evaluate the causes, cultural manifestations and consequences of the social themes studied first by reading about them and then by viewing films that consider the same issues. They learn to identify the formal elements of film and develop a critical vocabulary with which they analyze and write about them. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3490 The Quixote Archive: Cervantes in Context (4 Credits)**

This course offers students a critical introduction to one of the most influential texts ever written: Miguel de Cervantes' "Don Quixote" (1605, 1615). Careful attention will be paid to the historical, social, political, and literary contexts with which Cervantes' text dialogues. We will also assess a variety of adaptations of Cervantes' work in other media, and will engage with the substantive body of secondary critical literature informing interpretations of "Don Quixote" for the past 400 years. Prerequisite: SPAN 2300 or equivalent.

**SPAN 3500 Interrogating 'convivencia': Muslims, Christians, and Jews in Iberia (4 Credits)**

This course proposes to critically interrogate the complex relationship between the Muslim, Christian, and Jewish communities of the Iberian Peninsula, and the lasting impact of the historical relationship between these communities on the culture, literature, art, politics, and economy of Spain, with particular emphasis on the period 711-1700. Special attention is paid to problematizing the notion of 'convivencia' and to considering how diverse representations of the 'three cultures' are appropriated in the construction of national(ist) ideals that are overtly reflected in literature and art, both in Medieval and Early Modern Iberia and in contemporary Spain. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400, or equivalent.

**SPAN 3510 Sex, Bodies, and Power in Imperial Spain (4 Credits)**

This course considers the body a key locus of social and political struggle in the 16th and 17th Centuries in Spain and in the Indies. Contemplating the role of a variety of discourses from diverse fields (medicine, law, philosophy, theology, politics), we will ask such questions as: What is the body and how does it work in physical terms? How is the body used to perform or problematize legal, moral, and social identities? How is the body used as a mechanism to marginalize, control, or exclude individuals or groups, or to legitimize the authority and power of other individuals or groups? We will contemplate representations of the body in diverse media and genres (painting, sculpture, engravings, theater, novels, poetry, autobiography, medical treatises, moralizing tracts) in order to reconstruct the complex epistemology through which the body, and especially problems of race, gender, and sexuality, was conceptualized in the 16th and 17th Centuries. Particular attention will be paid to the representation of the materiality of the body (physiology as a key to moral and cultural difference), eroticism, homosexuality, cross-dressing, 'monsters,' sickness, and reproduction, considering the representation of such corporeal phenomena to be a privileged space for interrogating the ideologies and structures upon which Power is built. Enforced Prerequisites and Restrictions: SPAN 2300, 2350, 2400 or equivalent.

**SPAN 3600 Caribbean Blackness: Conflictive Identity (4 Credits)**

Introduces the student to the Caribbean region, particularly examining cultural characteristics of the Spanish speaking Caribbean, with an emphasis on race relations and the contributions of peoples of African descent. The focus is interdisciplinary and includes readings on anthropology, religion, and history among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3650 The Andean World: Artistic Representations of Power, Resistance and Social Change (4 Credits)**

Survey of Andean literature and art created during the nineteenth, twentieth and twenty-first centuries; artists' portrayals of strategies for resistance and the struggle for social justice in modern Andean society. Study of a wide variety of genres including short stories, novels, testimonials, poetry, essays, songs, visual art and film. Class discussions, theoretical texts and student analyses focus on the central theme of representations of power, resistance and social change in the Andes. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3660 The Fantastic Short Story in Latin America (4 Credits)**

Introduction to the genre of the fantastic short story in nineteenth- and twentieth-century Latin American literature. Study of the rise of the short story genre in Latin America and the ways in which we can understand the Fantastic and its relationship to the Gothic and the Magical Real. Assigned readings by authors such as Horacio Quiroga, Jorge Luis Borges, Julio Cortazar, Gabriel Garcia Marquez, Carlos Fuentes, Silvina Ocampo and Rosario Ferre. Class discussions, theoretical texts and student analyses focus on a text's themes, literary devices, and writing styles, as well as metatextual and historical references. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3670 Exploring the Amazon: A Literary, Filmic and Ethnographic Journey (4 Credits)**

Introduces the student to the Amazonian region of South America and the ways in which this fascinating landscape and the diverse peoples who inhabit it have been portrayed and exploited by "outsider" novelists, filmmakers, explorers, anthropologists, businessmen, and scientists beginning in the sixteenth century. This course also includes a survey of texts selected from the oral traditions of indigenous Amazonian groups such as the Ashanika, Machiguenga, Cashinahua and Ese'ija. Assigned readings underscore the course's interdisciplinary focus and encourage students to hone their course reading and analytical writing skills through the study of anthropological, historical, literary and filmic texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3680 Food, Power and Identity in Latin American Literatures and Cultures (4 Credits)**

A study of culinary representations and the role of food in Latin American literature, film, culture and politics. Assigned texts include short stories, novels, films and a selection of literary, historical and political essays that relate to food politics and poetics. A review of key food policies and politics throughout colonial and contemporary Latin America reveal legacies of colonial power struggles, as well as the important intersections between food and constructions of identity, nationality, and socioeconomic and cultural emancipation. The course also explores themes such as the art of cooking as a tool for seduction, culinary witchcraft, and contemporary national and regional struggles to achieve food sovereignty in an era of globalization and neoliberal politics. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3702 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3703 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3704 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3705 Topics in Spanish (4 Credits)**

Selected topics, genres, authors and/or literary, cultural, sociopolitical, or historical movements in the Spanish-speaking world. Course with same number but with a different topic may be repeated for credit. Prerequisite: at least one of SPAN 2300, SPAN 2350 or equivalent.

**SPAN 3800 Central American Blackness: Forgotten Roots (4 Credits)**

Introduces the student to the Central American region, with an emphasis on race relations and the cultural contributions of peoples of African descent. The focus is interdisciplinary and includes readings in history and demography among other subjects, together with close readings of literary texts. Prerequisite: SPAN 2350 or equivalent.

**SPAN 3988 Study Abroad Resident Credit (0-18 Credits)****SPAN 3990 Senior Seminar (4 Credits)**

This is the capstone course of the Spanish major and requires students to complete an in depth, scholarly study of a topic or issue pertinent to their seminar's central theme(s). Spanish majors must take a minimum of one senior seminar and this course must be taken at DU once a student has reached senior standing. Prerequisites: SPAN 2300, SPAN 2350 (or equivalent) and at least twelve credits at the 3000 level. A selection of seminar topics includes Latin American Popular Culture, Contemporary Spanish Novel, Pre-Columbian and Colonial Andean Literature and Culture, Puerto Rican Literature and Society, Layqas, Ñakáqs and Saqras: Representations of the 'Supernatural' in Quechua Oral Traditions, Latin American Narrative, El Romancero, Contemporary Socio-Political Poetry in Latin America, Latin American Women Poets, and Masterpieces of Latin American Literature. Prerequisites: SPAN 2300, SPAN 2350 (or equivalent) and at least twelve credits at the 3000 level and senior standing.

**SPAN 3991 Independent Study (1-4 Credits)****SPAN 3997 Internship in Spanish (1-10 Credits)**

This course serves as curricular, intellectual, and professional support to a 10-week Spanish internship. Students will be matched to an internship with a community partner (private or public agency, institutional office, non-profit or community organizer) whose mission aligns with students' professional aspirations in a variety of disciplines. Through the exploration of notions in critical service-learning, students will be given the opportunity to reflect upon their own positionality and its implications for issues in social justice, equity and linguistic diversity as they participate in an internship site. Students are expected to mobilize their linguistic skills in Spanish as part of the experience, and especially as part of their role in supporting community partners explore and understand better ways to serve Spanish-speaking communities across the Denver Metro area. Students will engage with readings, workshops, reflections and a portfolio that showcases their community-engaged work while furthering an understanding of the sociolinguistic implications of Spanish as a U.S. language which is spoken and used in a variety of communities across Denver. An end-of-term showcase will be expected as part of participation in this course. Prerequisite: SPAN 2200, SPAN 2250, or SPAN 2400.

**SPAN 3998 Honors Thesis (1-10 Credits)**

## Theatre (THEA)

**THEA 1010 Stage Movement & Dance (1 Credit)**

Movement class for dancers and non-dancers alike. Topics may include Stage Combat, Broadway, Period Movement, Tai Chi, Masks & Storytelling, World Dance Styles, Movement Analysis, etc. Check with department for quarterly offerings.

**THEA 1200 Tech Studio (1 Credit)**

Tech studio is a basic course in the principles of scenic construction and preparation for department productions: hands-on training and application of technical theatre skills. Includes scenic construction, properties crafts, sound engineering, lighting electrics, scene painting, and related theatrical design elements, as defined by the needs of the departmental production season. Special emphasis on developing core competencies within a framework of professionally-modeled safety protocols.

**THEA 1300 Costume Studio (1 Credit)**

Costume Studio is a basic course in the principles of costume construction and preparation for departmental productions: hands-on training and application of costume building skills. Includes sewing, patterning, draping, tailoring, dyeing, maintenance/upkeep, and related skills necessary to the successful realization of the costume design process within the context of the departmental production season. Special emphasis on developing core competencies within a framework of professionally-modeled safety protocols.

**THEA 1325 Costume Tech Bootcamp: Construction Skills & Craft Intensive – Introduction to Pattern & Fit (1 Credit)**

The intention of this garment-building intensive is to introduce and solidify certain foundational technical skills and craft competencies of early-career costume students, so that they may take their costume or fashion design studies to the next level. Through an aggressive series of exercises and projects focused on patterning and fit technique, in a hands-on studio setting, students will finish the week of instruction with a skills portfolio prepared according to industry standards as set forth by the United States Institute for Theatre Technology Costume Commission. Specialized technique, proper and safe operation of industrial equipment, historical construction practices and 3-dimensional interpretation and pre-visualization are all topics for inclusion. The exact makeup and focus of study will be determined by the interests of the group.

**THEA 1400 Production Performance Studio (0 Credits)**

Production Performance Studio is a course that provides hands-on training and application of acting and/or production performance skills. Includes acting, stage management, directing, designing, light/sound board operations, stage crew, wardrobe, and related roles in the production and performance process, applied within the context of departmental productions. Builds upon the foundation provided by departmental courses. Audition and/or faculty permission required for enrollment.

**THEA 1600 Stagecraft for Theatre (4 Credits)**

Stagecraft introduces students to the basic skills that allow us to realize the art of Theatre. Students will have the chance to learn construction, craft and design skills in the scenic and costume areas that can be applied in advanced Theatre classes, and in everyday life. Theatre technicians and artisans need breadth and problem-solving skills with a wide range of techniques and materials, and an awareness of the performance from all aspects. Having technical awareness makes all students better at what they do. 1. Learn through doing: experience the work of the theatre technician through complex hands-on projects in which the students have opportunities to work as craftsman and artist. 2. Learn and use the fundamental vocabulary and tools of design, as they apply to theatre production 3. Learn about -and experience creating- following the process that theatre technicians use to create multi-phase artistic projects. 4. Be introduced to the intersection of theatre design and theatre production as we practice it today in the profession- personnel, practices, the collaborative nature of the art form and our industry. 5. Students will learn safety practices, including personal protection equipment, fire code, safe tool handling, and environmental health and safety practices for the beginning artist. 6. Students will learn to use power tools, including saws, sanders, pneumatic tools and hand tools. 7. Students will learn techniques for hand and machine sewing. 8. Students will learn to select materials and techniques to build projects. 9. Students will plan a project from idea to scaled drawing to realizing the project using power and hand tools. 10. Students will learn painting techniques, and plan and execute a multi-step painted surface. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1810 The Process of Theatre: Page to Stage (4 Credits)**

Exploration of the process playwrights, directors, actors, and designers use in creating a theatrical production. Individual sections may focus on single areas only—please see department for current offerings. In this course, students will demonstrate the ability to create or interpret the texts, ideas or artifacts of human culture. They will also identify and analyze the connections between these things and the human experience/perception of the world. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1861 Theatre Imagination (4 Credits)**

Beginning exploration of nature of theatricality through exercises and study of specific plays; explore acting, directing, designing and writing. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1862 How to Read a Play (4 Credits)**

Close analysis of selected dramatic texts from Aeschylus to Caryl Churchill. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1880 Fundamentals of Theatre Design (4 Credits)**

The work of the theatre designer is to transform a text into visual and aural expression, by planning and creating the physical environment of a live performance. Students will learn about – and learn appreciation for – theatre design in order to be better theatre artists (and audience members) themselves, through the applied practice of designing a "paper" production, collaboratively with a small team. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 1988 Study Abroad Resident Credit (0-18 Credits)****THEA 2200 Voice for the Actor (4 Credits)**

In this course we learn the art and craft of compelling communication. All speakers are nervous; in this course we develop skills for managing the nerves associated with public speaking as well as learn analytical skills for unearthing and sharing complicated, and uncomplicated, text. We spend a good amount of time and effort diving into vocal training to harness the power of your voice, cultivating clarity and resonance. We explore and play with rhetorical analysis, learning to decode and employ persuasive techniques. We study and embody the intricacies of meaning-making, learning how to craft messages that resonate with authenticity and impact. All public speaking is storytelling and in this class we discover the nuances that captivate audiences and breathe life into narratives. Whether you're stepping onto the stage or addressing a crowd, this course equips you with tools to communicate clearly. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2230 Movement and Voice for Actors (4 Credits)**

Actors often learn movement and vocal training separately, despite the fact that speaking is a physical act and that an actor's voice and body are constantly working in relationship to each other. This course has two main objectives: 1) to train your actor instrument through rigorous physical and vocal training, and 2) to help you understand the essential and dynamic relationship between an actor's breath, body, and voice. You'll explore how physical actor training strengthens and improves the ability to speak while ultimately allowing you to embody a character more successfully. Drawing from many areas of study in movement and voice, you will connect physical and vocal action through a series of exercises and explorations. Specifically, we'll investigate 1) how to prepare your body for performance circumstances and to successfully support your vocal needs, and 2) how your body and voice can work symbiotically during performance to deliver a more powerful, precise, engaging performance. The course will begin with extensive physical and vocal actor training; then we'll apply this training to specific theatrical texts; it will culminate in a collaborative performance that will provide opportunities for both individual and group performances. This work will strengthen stage presence and characterization and will heighten your emotional and physical power and commitment to each moment onstage. By the end of the quarter, if you do the work, you will be vocally and physically transformed, armed with a new approach to moving and speaking onstage. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2870 Acting I (4 Credits)**

Exploration of acting through physical and vocal exercises, followed by scene study. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2871 Acting I (4 Credits)**

Exploration of acting through physical and vocal exercises, followed by scene study.

**THEA 2880 Scene Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming scenic concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2881 Lighting Design I (4 Credits)**

Exploration of methods, techniques and procedures involved in transforming lighting concepts into actual practice. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2882 Costume Design I (4 Credits)**

The process of Costume Design for live performance will be explored as a unique form of artistic expression and as a collaborative process. Through a series of reading, writing, and drawing exercises as well larger multi-step design projects, students will experience the process and begin developing the skills necessary to: - read and see plays (and dance, opera, and film) as costume designers do - respond to, explore, and develop design ideas using the media, tools and techniques of costume designers - present design concepts using the graphic style(s) and language of the industry - appreciate the professional theatrical production process There will be particular emphasis on understanding and analyzing dramatic texts and interpreting characters visually in a 2D format. We will be exploring the elements and principles of design as they relate to dressing performers for the live stage. This will include an introduction to textiles and will concern itself with many production concerns, but it should be noted that this is not a sewing/construction class. The student will acquire foundational criteria for effectively processing, evaluating, and articulating their reactions to - and opinions of - theatre design and how costume affects the performance experience as a whole. The collaborative nature of performance design is a common thread running through this seminar in theatre design practice – effective teamwork and large group discussion skills are important.

**THEA 2883 Sound Design I (4 Credits)**

Exploring methods, techniques and procedures involved in transforming sound effects/sound design into actual practice.

**THEA 2884 Theatre Management (4 Credits)**

Theatre Management examines the process and systems of running and supporting an arts organization. Through case studies and collaborative work, the class explores strategies for creating mission-driven, sustainable models that mutually benefit artists, audiences and arts organizations.

**THEA 2885 Directing I (4 Credits)**

Theory and practice of staging plays. Prerequisites: THEA 1861, THEA 1862, THEA 2870.

**THEA 2890 Theatre History I (4 Credits)**

This course examines the development of Western theatre and drama from the Ancient Greeks to the 19th-Century, concentrating on the intellectual, social and artistic foundations of theatre and drama. The course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among the students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from Fifth-Century B.C.E. into the early 19th-Century. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2891 Theatre History II (4 Credits)**

This course examines the development of Western theatre and drama from the 19th-Century to the present. Concentrating on the intellectual, social and artistic foundations of theatre and drama, this course is designed to engage theatre from its theatrical, social, cultural, and historical contexts. The lecture-discussion format of this course is intended to foster an active engagement among students with the theatre and drama of the past. Through in-class readings, discussions of the readings, written assignments, and presentations, students are encouraged to consider the material under investigation from sociohistorical and theatrical perspectives, as well as from the material's relation and relevance to the present. The focus is on theatre and drama representative of the major styles, authors, and genres from the 19th-Century to the present. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**THEA 2893 History of Global Fashion Trends (4 Credits)**

In this course, students will study global fashion trends throughout human history. We will delve into how and why humans choose to cover their bodies, investigate how our contemporary fashion marketplace is affecting the planet at large, and analyze how contemporary artists influence our perceptions of global fashion.

**THEA 2988 Study Abroad Resident Credit (0-18 Credits)****THEA 3700 Topics in Theatre (1-4 Credits)****THEA 3701 Topics in Theatre (1-4 Credits)****THEA 3702 Topics in Theatre (1-4 Credits)****THEA 3703 Topics in Theatre (1-4 Credits)****THEA 3704 Topics in Theatre (1-4 Credits)****THEA 3711 Playwriting (4 Credits)**

Introductory course designed to provide students with the necessary tools to create dramatic texts for reading and performance. Through textbook and published play reading assignments engineered to highlight successful practices, and exercises devised to tap into different modes of creative generation, students will discover different methodologies for developing new work for the stage.

**THEA 3760 Stage Management (4 Credits)**

Survey, exploration, and application of the component parts of the stage manager's role, based upon current methods practiced by professional theatre companies in the United States. Stage managers facilitate the creation of a fully-realized work of theatrical art, born of the collaboration of numerous artists, craftspeople and technicians.

**THEA 3861 Junior Seminar (2 Credits)**

Roundtable discussions of play-selection, production requirements and creative strategies taken the year prior to the Senior Practicum Project (THEA 3862). Additionally, students will consider their post-graduation goals and receive practical advice on advanced studies or a career in the theatre.

**THEA 3862 Practicum in Theatre (1 Credit)**

Senior capstone project synthesizing all aspects of the BA program. As a "principal artist" (actor, director, designer, playwright, etc.) on a production of the student's choosing, each graduating senior will be given the chance to put "theory into practice" and fully mount a play for an audience.

**THEA 3865 Seminar in Dramatic Literature (4 Credits)**

Selected problems and periods.

**THEA 3870 Acting II (4 Credits)**

Continuing exploration of acting through text analysis, scansion, vocal technique and scene presentation. Prerequisite: THEA 2870.

**THEA 3873 Acting III (4 Credits)**

Advanced exploration of acting through scene study, intense physical and vocal work and rehearsal techniques. Prerequisites: THEA 2870, THEA 3870.

**THEA 3883 Stage Makeup (2 Credits)**

Hands-on instruction in application and design of theatrical makeup.

**THEA 3884 Scene Painting (4 Credits)**

Exploration of two- and three-dimensional techniques for painting stage scenery.

**THEA 3980 Theatre Internship (1-12 Credits)**

Internships in theatre include everything from front of house jobs to acting on stage. Internships can be for any entertainment related field and include theme parks, cruise ships and regional theatres.

**THEA 3988 Study Abroad Resident Credit (0-18 Credits)****THEA 3991 Independent Study (1-10 Credits)**

In-depth exploration of a specific topic or project of the student's choosing, undertaken in consultation with and under the close supervision of a faculty advisor. These courses may also be taken in preparation for an honor's thesis in any theatrical discipline.

## Wellness (WELL)

**WELL 2050 Foundations of Health Promotion (1-2 Credits)**

Health promotion starts with understanding all that goes into wellness and wellbeing. Wellness is a unifying concept that weaves together many disciplines, curricula, and facets of experience. This class will explore multiple dimensions of wellness, such as emotional, spiritual, intellectual, physical, environmental, financial, occupational, and social. Students will learn about each dimension along with examples of behaviors that promote each dimension of wellness and demonstrate how they are interconnected. The course is designed to help students critically analyze concepts and theories of wellness and draw connections to wellness in their everyday lives. An emphasis will be placed on the research and application of knowledge and skills to increase personal awareness of health and to promote wellness and quality of life.

**WELL 2051 Applications in Health Promotion (1-2 Credits)**

This course provides an understanding and broad overview of the practice of health promotion. Health promotion is the development of individual, group, institutional, community and systemic strategies to improve health knowledge, attitudes, skills and behavior. The course will consider the practicalities of designing, delivering, and evaluating health promotion interventions as well as how health promotion practices intersect with issues of health equity and the social determinants of health. Students will learn about key behavioral theories and models that support program planning as well as understanding the ability to impact health behavior. Students will have opportunities to explore applications of health promotion concepts.

**WELL 2052 Future Directions in Health Promotion (1-2 Credits)**

Motivating a society to actively encourage good health is no small task – made even more difficult by inequities that constrain people's choices in ways that affect health, from food to leisure to work. Improving public health takes legions of professional health educators working in every possible venue, from schools and mass media to workplaces and legislative offices. This course will explore how professionals from different disciplines approach health promotion, such as in social service, corporate wellness, healthcare, school, and public health systems as well as Injury Prevention, Research, Health Technology, and even Entrepreneurship. The class will also explore emerging trends in health promotion, including as relates to health equity and well-being.

**WELL 2053 Foundations of Global Mental Health (1-2 Credits)**

This course introduces students to foundational concepts of mental health from a global and interprofessional perspective. Students will explore cultural concepts of distress and wellbeing through a decolonization framework, from Indigenous understandings and practices to modern diagnostic and intervention models grounded in a variety of disciplines. Students will be invited to bring their passion, values, and lived experience to think critically through the challenges and opportunities presented by this diverse, essential, and rapidly-evolving field.

**WELL 2054 Applications in Global Mental Health (1-2 Credits)**

This course provides students with an opportunity to integrate the theoretical and conceptual underpinnings of global mental health with meaningful community-engaged experiences. Students will be challenged to collaborate across professional disciplines to research and incorporate best practices grounded in principles of equity, diversity, and inclusion, centering the needs and voices of community stakeholders.

**WELL 2055 Future Directions in Global Mental Health (1-2 Credits)**

This course challenges students to look beyond here and now, to the future of global mental health, and prepares students for the next phases of their training and careers. Building on both didactic and experiential learning, this course will address the needs and obstacles facing global mental health fields today—ranging from inequities in health care access to identity-based violence to ecological injustice—and will create a space for curiosity about what tomorrow may hold, and what role each student may play in addressing some of the most pressing concerns of their time. Themes include cultural awareness and humility, global majority dynamics, and systemic bias, as well as the importance of self assessment around personal worldviews, gaps in learning, and areas of ongoing growth.

**WELL 2070 Introduction to Mental Health and Wellness Studies (4 Credits)**

This course introduces students to foundational concepts of mental health and wellness through a framework that emphasizes diversity, equity, and inclusion as well as interprofessional perspectives. Students will explore concepts of mental health, wellness, and distress drawing on perspectives that range from Indigenous understandings and practices to modern diagnostic and intervention models grounded. For example, students will explore multiple dimensions of wellness as well as diverse professional approaches to mental health and wellness. Students will be invited to explore their passion, values, and lived experiences to think critically through the challenges and opportunities available in the diverse field of mental health and wellness.

**WELL 2100 Writing for Wellness (4 Credits)**

Mental health problems among college students have increased significantly in recent years, and student depression rates have doubled since 2009. However, a growing body of research suggests that many individuals can improve feelings of wellbeing through a variety of writing practices, including journaling, critical reflection, and expressive writing. Inspired, in part, by Yale University's most popular course, "The Science of Wellbeing," this wellness course explores current research on wellbeing, and engages students in the role writing can play in personal, academic, and professional wellness. In this course, students explore academic research on writing for wellness, experiment with wellness writing approaches themselves, and design a wellness writing self-study.

**WELL 2700 Leveraging Eco-Distress to Create a Regenerative Future (4 Credits)**

This course looks at wellness and mental health through the lens of addressing global environmental change through imagining and co-creating a future that is equitable, just, joyful, and based on thriving, mutually beneficial relationships with other humans, all other species, and the natural world. Emphasis will be placed on building resilience to climate grief, solastalgia, eco-anxiety, and climate trauma utilizing a strengths-based perspective and frameworks such as social permaculture, regenerative design, and futures thinking. Students will develop knowledge and awareness of how global environmental change and the polycrisis impact our thoughts, emotions, and behavior, and will learn skills and mindsets to support them in feeling empowered in their ability to take hopeful and intentional action in the creation of a regenerative future for all beings and the Earth.

**WELL 3020 Mental Health and Wellness for the Public Good (2 Credits)**

This capstone course of the Mental Health and Wellness Minor requires students to integrate knowledge related to diverse understandings of wellness and origins of mental health inequities learned in prior Minor courses. Through structured, critical reflections and discussions, students will identify community-relevant ways in which mental health and wellness promotion could be enhanced. They will use the interdisciplinary perspectives gleaned from earlier courses to create and execute an applied project or experiential learning activity with the objective of promoting mental health, wellness, and equity for the public good.

**WELL 3028 Internship (1-2 Credits)**

This internship is designed to help you develop interprofessional skills to address mental health and wellness issues. During the internship, you will have opportunities to transfer learning from classes to projects that address complex problems of importance to the student and the public good; have agency and play a key role in defining and carrying out collaborative projects; and receive individualized mentoring.

**WELL 3991 Independent Study (1-10 Credits)**

An Independent Study in Mental Health & Wellness.

## Writing (WRIT)

**WRIT 1022 English for Academic Purposes (4 Credits)**

This 4-credit course is designed to facilitate the acquisition of US English for Academic Purposes (EAP) by multilingual students who use English as an additional language. In this class, students will be immersed into the academic world that the University of Denver participates in, to develop proficiency in usage conventions while paying attention to the reading, writing, speaking, and listening skills that are necessary for a student's holistic participation in diverse academic cultures. In addition to classroom instruction and working in the language lab, we will spend a significant amount of time interacting with the community around DU to gain experience communicating in different contexts and rhetorical situations. Students are encouraged to use all resources (including languages they are proficient in) available to them as they work to improve their EAP proficiency.

**WRIT 1122 Rhetoric and Academic Writing (4 Credits)**

WRIT 1122 teaches strategies that are vital in writing for diverse audiences, primarily in situations that require students to present and justify positions. The course teaches rhetorical analysis and practices, the effective use of readings and source materials, and techniques for generating, revising, and editing texts produced to meet specific situations. WRIT 1122 provides sustained practice in writing, with systematic instructor feedback, across multiple assignments and drafts, totaling 3,000-5,000 words by quarter's end.

**WRIT 1133 Writing and Research (4 Credits)**

This course builds on the writing and rhetorical skills learned in WRIT 1122 by shifting attention from general rhetorical strategies to specific rhetorical strategies that shape different kinds of academic inquiry. Through introduction to quantitative, qualitative, and textual research traditions, students identify how written reasoning varies in terms of the questions posed, the kind of evidence used to answer them, and the nature of the audience or forum for the result. In addition, the course teaches how to shape research into substantive academic arguments, with attention to the ethical consequences of their rhetorical choices. Students are asked to develop further their linguistic, design, and reasoning competencies, with added consideration of citation conventions. Students complete at least 20 pages of revised and polished writing, in multiple assignments, as well as numerous additional exercises, in projects requiring library-based research as well as other types. Final portfolio. Prerequisite: WRIT 1122.

**WRIT 1533 Writing and Research (4 Credits)**

This course, designed for transfer students, builds on the writing and rhetorical skills learned in WRIT 1122 by shifting attention from general rhetorical strategies to specific rhetorical strategies that shape different kinds of academic inquiry. Through introduction to quantitative, qualitative, and textual research traditions, students identify how written reasoning varies in terms of the questions posed, the kind of evidence used to answer them, and the nature of the audience or forum for the result. In addition, the course teaches how to shape research into substantive academic arguments, with attention to the ethical consequences of their rhetorical choices. Students are asked to develop further their linguistic, design, and reasoning competencies, with added consideration of citation conventions. Students complete at least 20 pages of revised and polished writing, in multiple assignments, as well as numerous additional exercises, in projects requiring library-based research as well as other types. Final Portfolio. For transfer students. Prerequisite: WRIT 1122 or transfer equivalent and permission of instructor.

**WRIT 1622 Advanced Rhetoric and Writing (4 Credits)**

A writing course for advanced first-year students, emphasizing rhetorical strategies for different academic and civic audiences and purposes; critical reading and analysis; and research. Course sections focus on a coherent set of texts, usually on an issue or theme; contact the Writing Program for specific information each quarter. Students complete at least 20 pages of polished prose in multiple assignments. Final portfolio. Satisfies the same graduation requirement as WRIT 1122. Prerequisite (one of the following): Admission to honors program; score of three or better on AP Language and Composition or Language and Literature exams, or four on the IB English; or specific permission of the director of writing.

**WRIT 1633 Advanced Writing and Research (4 Credits)**

A continuation of WRIT 1622, this is a writing course for advanced first-year students, emphasizing rhetorical strategies for different academic and civic audiences and purposes; critical reading and analysis; and research. The course has a significant research component. Course sections focus on a coherent set of texts, usually on an issue or theme; contract the Writing Program for specific information each quarter. Students complete at least 20 pages of polished prose in multiple assignments. Final portfolio. Satisfies the same graduation requirement as WRIT 1133. Prerequisites: WRIT 1122 or 1622, plus one of the following: either admission to the honors program; score of three or better on AP Language and Composition or Language and Literature exams, or four on the IB English; or specific permission of the director of writing.

**WRIT 1733 Honors Writing (4 Credits)**

Honors Writing is designed for students who will benefit from a particularly rigorous and in-depth experience with language. This class offers a theme around which students read serious and challenging texts, including some primary readings in rhetorical theory, and write at least 25 pages of polished prose, with additional less formal writings. The course offers advanced instruction in rhetorical theory and practice, as well as writing in multiple research traditions in the academy. Class has a highly participatory discussion format and students will have latitude in choosing and directing much of their work. Topics vary from section to section. Required for honors students. Prerequisites: admission to the honors program and either WRIT 1622 or WRIT 1122; or permission of the director of writing, in consultation with the director of honors.

**WRIT 1991 Independent Study (1-4 Credits)****WRIT 2000 Theories of Writing (4 Credits)**

This course introduces a number of theories of writing, providing an overview of complex issues and research into the state and status of writing and writers. It takes up such questions as these: What is writing? Where did it come from? How did it develop—and did it do so the same or differently in other cultures? How do writers develop—and what accounts for differences? What are different types of writing, different situations for writing, different tools and practices—and how do these interconnect? What does it mean to study writing? How have major figures theorized writing, and what tensions emerge among their theories? What are relationships among thought, speech, and writing—and among image, film/video, and sound? How do such theories change our notions of what texts are and what texts do? Students will learn how various theorists, historians, and researchers answer these questions, and they will apply that knowledge to their own projects. Prerequisites: WRIT 1133, 1533, 1633, or 1733.

**WRIT 2040 Memoir and Personal Writing (2,4 Credits)**

In learning to write memoirs, a writer is learning how to analyze memory, select experiences, invent narratives—all while still being "truthful." In this course, students distinguish memoir from other forms of writing about the self, including autobiography, diaries and journals, blogs, and letters. They read excerpts of published memoirs and drafts of memoirs they write during the course, with a particular interest in how these writers shape and represent their experiences textually: how do people construct the stories they tell about their lives? What is the value of personal writing for writers and readers? And perhaps most importantly, how can we begin to create stories of experiences in compelling ways? Students complete multiple writing projects, including at least one polished short memoir.

**WRIT 2050 Style and Rhetorical Grammar (4 Credits)**

Be concise. Don't split infinitives. Write with flow. Don't end a sentence with a preposition. Avoid the passive voice. Never use "I" in academic writing. Everyone has heard these maxims about writing and grammar. This course will interrogate those maxims, and provide systematic ways to draft, revise, and polish prose based on the needs and demands of the audience. More specifically, students consider matters of sentence structure and sentence rhythm, cohesion, and concision, as well as voice and point of view. Through a series of shorter and longer writing assignments, in-class exercises and activities, and course readings, students hone their writing and grammar skills, all with the goal of writing with improved clarity and grace. The course is open to all students who want to take their writing to another level of sophistication, clarity, and range. Prerequisite: WRIT 1122 or permission of instructor.

**WRIT 2100 Internship in Writing and Rhetoric (0-4 Credits)**

The Internship in Writing and Rhetoric provides academic credit for professional or paraprofessional work in applied rhetoric or writing directed by a University Writing Program faculty member, perhaps in collaboration with one of the Program's community partners. Internship opportunities are individually designed as experiences for students who have completed the first-year WRIT sequence, and they require approval from the Executive Director of Writing. Enforced Prerequisites and Restrictions: WRIT 1133, or WRIT 1633, or WRIT 1733.

**WRIT 2120 Writing for Wellness (4 Credits)**

Mental health problems among college students have increased significantly in recent years, and student depression rates have doubled since 2009. However, a growing body of research suggests that many individuals can improve feelings of wellbeing through a variety of writing practices, including journaling, critical reflection, and expressive writing. Inspired, in part, by Yale University's most popular course, "The Science of Wellbeing," this wellness course explores current research on wellbeing, and engages students in the role writing can play in personal, academic, and professional wellness. In this course, students explore academic research on writing for wellness, experiment with wellness writing approaches themselves, and design a wellness writing self-study. Cross-listed with WELL 2100.

**WRIT 2200 Environmental Writing (4 Credits)**

This writing course examines humanity's relationship with the natural world by developing writing abilities in traditional and emerging environmental genres. Using sustainability and interconnectedness as guiding principles, the course considers the wide range of interactions and encounters that humans can have with nature and place, while also exploring topics that might include climate change, environmental justice, and green rhetoric. Assignments include a range of non-fiction genres that communicate complex ecological concepts, perform advocacy work, or create aesthetic experiences. Prerequisite: WRIT 1122 or permission of instructor.

**WRIT 2300 Professional Writing (4 Credits)**

This course introduces modes and approaches vital to communicating in contemporary workplaces and organizations. As an applied writing course, it covers strategies and requires practice in techniques for composing genres commonly used in professional settings: rhetorically effective emails, memos, instructions, visual data, social media presences, and others. It also includes approaches to document management and communication workflows that support collaboration and composing processes. The course, which fulfills a requirement for the Minor in Writing Practices, is appropriate, beneficial, and open to students from all majors, whether in sciences, humanities, social sciences, the arts, or professional fields.

**WRIT 2400 Editing and Publishing (4 Credits)**

Editors wear several hats: they are readers and writers, researchers, fact-checkers, curators, and deciders. They are coaches and critics. They are gatekeepers and beta readers. The work editors do is partly mechanical—making specific changes to texts in light of recognizable conventions; and it is also intellectual—deciding how and when to apply and adapt those conventions to meet, respect, and challenge the needs of readers and writers. Depending on their responsibilities, editors may also help develop and sustain a publication's mission or vision, communicate with authors and reviewers, design visually effective page layouts and other materials, and create social media and other marketing campaigns attracting readers to the publication. Through hands-on practice with specific publications, primarily campus/student publications, this course teaches several kinds of editing: 1) copyediting texts for consistent, mechanics, and adherence to language conventions within particular publishing contexts; 2) comprehensively editing texts for content, organization, style, design, and relationship to source texts; and 3) editing from the perspective of an academic journal or periodical.

**WRIT 2500 Topics in Writing Theory, History, Research (4 Credits)**

This course provides curricular space for various subjects and foci related to theories about writing, histories of writing and its status and development, or research about writing. Specific offerings of the course will vary according to professor or student needs, interests, and opportunities, and to developing knowledge and research in the field. Examples of possible topics might include multimodality and writing, relationships between visual and verbal rhetoric, the development of specific genres over time, the relationship between academic and civic writing, the history of writing in specific schools or settings, research into the acquisition of writing skills, social policies and practices that affect writing, ethical issues in writing practices, the effects of technologies on writing, and so on. The preceding list is illustrative, not exclusive. Prerequisites: WRIT 1133.

**WRIT 2555 Diverse Rhetorics (4 Credits)**

Rhetoric's origins in classical texts, in the western canon, developed to serve early forms of democracy and civic participation. Despite classical rhetoric's formative impact, plenty of languages and cultures have their own means of persuasion and civic participation. This course introduces ways that rhetoric is practiced in diverse contexts, not as a stable idea, but as an adaptive practice situated in cultures, identities, and languages, bridging writer, audience and purpose. This course starts with classical Western rhetoric, but then explores the varied practices and theories of, for example, African American, Asian, Latinx, Indigenous, and queer rhetorics, to name a few. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**WRIT 2600 Travel Writing (4 Credits)**

Travel writing captures and sometimes invents a place for an audience. We see it expressed in many different genres and purposes, from literary nonfiction, to travel guides, to online reviews. How best can writers convey their experiences of a place as an outsider? What writing strategies are best for creating a narrative of experiences and enticing an audience? This applied writing course involves writing in several genres and for different audiences.

**WRIT 2625 Food Writing (4 Credits)**

Food writing emerges in many forms—from (written or oral/embodied) recipes we've inherited from relatives, to restaurant reviews we might consider when going on a trip or a special dinner out, to cooking blogs we peruse for dinner ideas (or just the beautiful photographs), to the labor and food systems exposés that help us understand the complex origins of our food, and lead us toward food activism. Many people write about food as a hobby or passion, and some turn that into a career. In Food Writing, you'll practice composing in many different food-related genres.

**WRIT 2630 Game Writing (4 Credits)**

This course introduces the fundamentals of writing with, for, and about games in rhetorically responsive ways. Writing "with" games means that students will create original interactive texts, both digital and analog. Writing "for" games means that students will compose documents linked to the design and business of games. Writing "about" games means that students will compose critical and QA reports. Topics include procedural rhetoric, narrative, interactive structure, and worldbuilding for computer and tabletop games. By the end of the course, students will produce a portfolio to showcase their work.

**WRIT 2650 Digital Rhetorics (4 Credits)**

Digital media and online spaces have both introduced and challenged how we write and interact. This course covers contemporary theories and genres of rhetorical practice including network literacies, remix and re-appropriation, theories of social media, sonic, visual, procedural and algorithmic rhetorics. This course emphasizes through theory and practice new rhetorical skills including design thinking, multimedia production, iterative composing, and social media engagement. This course counts toward the Analytical Inquiry: Society and Culture requirement.

**WRIT 2681 Reflection & Learning: Making Sense of Your College Experiences (1 Credit)**

Designed for graduating seniors, this course engages reflective practice as a tool for contemplation, growth, and life design. This immersive learning experience provides students space to reflect on their time at the University of Denver, and explore ways to interpret and transfer learning to future experiences and contexts. The one-day short course takes place dually on the DU main campus and the Kennedy Mountain Campus. Course activities are informed by each location, with students invited to practice reflection among the panoramic views and scenic habitats of the mountain campus, and consider critical transitions that occurred during their time in Denver. By exploring reflective theory (in a multitude of disciplines), students will learn ways reflection enhances communication and knowledge transfer in a variety of contexts. Students will read, write, and reflect as part of this course and develop a multi-modal project at its conclusion.

**WRIT 2700 Collect, Select, Reflect: Learning through ePortfolios (2 Credits)**

This course focuses on developing an ePortfolio through an intentional reflective framework, to foster meaningful connections across students' experiences (academic, co-curricular, and community) that help develop critical thinking skills and the ability to be reflective practitioners. It focuses on three portfolio elements: artifacts (things the maker has created, including papers, projects, recordings, presentations); reflection and interpretation (the analysis of artifacts selected, the nature of learning); and design (skillfully and engagingly presenting the portfolio to an audience). Students create an electronic portfolio, learning to use different kinds of platforms and tools. The course presumes no technical knowledge or experience with those tools.

**WRIT 2701 Topics in Applied Writing (4 Credits)**

Individual offerings of this Topics course teach skills and strategies for writing in a specific professional or public context or for improving in a specific type of writing. The focus is on the texts, genres, conventions, habits, and critical questions salient to writers in a given situation. Each offering will focus on a topic not available in existing courses. Benefitting the course, the primary writing focus will be on producing texts for/within the topical focus, with emphasis on drafting, revision, and design. Students will also write responses to and analyses of assigned readings (including the work of other students). Prerequisites: WRIT 1133 or permission of the Executive Director of Writing.

**WRIT 2800 Community Writing (4 Credits)**

Writing plays an integral role in advocacy, civic responsibility, and engagement between and among groups. This course explored the history and theory of community writing, including the rhetorical constraints and opportunities afforded to writing with/for/in communities. The course includes opportunities to practice and analyze different rhetorical situations, such as writing for nonprofits, writing with community partners, grant writing, theories of community-engaged writing, writing for the public good, and community-engaged writing research. The course may count as one of the applied courses in the Minor in Writing Practices. Prerequisite: WRIT 1122 or permission of the Executive Director of Writing.

**WRIT 2900 Life Back from Abroad (1 Credit)**

This course focuses on life back from abroad – generating understanding(s) about integration back into American culture, specifically life at the University of Denver. This will be a pop-up style course which means it will meet for 10 hours, 1 evening a week. The course will have an intentional focus on reflection as a way to foster meaningful connections across cultural learning experiences. The final project's focus on an artifact students "collected" while abroad – a blog they created, a series of images they took, a video they made, etc. – and they will revise it to add to their ePortfolio.

**WRIT 2910 Undergraduate Peer Tutoring in Writing (4 Credits)**

Helping others to write is a collaborative process that can help tutors—as well as writers—to enhance their writing practices and their rhetorical skills and flexibility. This course entails participating in conversations about writing in and beyond the University Writing Center. The complexities of learning how to write motivate entire fields of study, from rhetoric and composition to literacy, genre, and writing center studies. The course features broad reading in these fields to develop a repertoire of lenses and strategies for working with writers in diverse disciplines. It introduces literacy and learning theories; revision strategies; ethical considerations in writing and tutoring; methods of tutoring; tutoring roles and responsibilities; working in genres across academic disciplines; and writing center history. Students regularly observe, analyze, and reflect on tutoring sessions at the University Writing Center and develop their own tutoring practices. Students who successfully complete this course will be invited to apply to work at the University Writing Center. Prerequisite: WRIT 1133 or permission of instructor.

**WRIT 3500 Capstone: Writing Design and Circulation (4 Credits)**

The primary goal of this capstone course for the Minor in Writing Practices is to create and present a professional electronic/web-based portfolio synthesizing university writing experiences. The portfolio showcases and offers reflective insight into a student's writings, demonstrating the writer's ability to navigate diverse rhetorical situations. Students will learn theories and practices for selecting, arranging, and circulating/publishing written work, culminating in a required portfolio that synthesizes their university writing experiences. In addition to practicing principles of editing and design, students will produce a substantive revision of a previous piece of their own writing. The course covers design considerations and strategies and offers studio time for peer and instructor feedback. It culminates with a public showcase. Prerequisites: WRIT 2000 and completion of at least two other courses in the Writing Practices minor.

**WRIT 3600 Black Studies Capstone (4 Credits)**

This capstone course is designed for students completing the Minor in Black Studies at the University of Denver. The primary goal of this course is to create an original capstone project that demonstrates synthesis of their study in the field and deepens their skills in research. Black Studies minors should plan to enroll in BLST 3600 after completing all course work for the minor. As part of this capstone course, each student will complete a capstone project, of their own design, that explores some aspect of Black/African American life, history, culture, or experience. This course encourages creative capstone projects that allow students to present their work in a form other than the standard written thesis model. This course will guide the capstone projects for students conducting intensive research on topics in Black Studies. Drawing from disciplinary and interdisciplinary methodologies, theories, and concepts in the humanities and social sciences, capstone project topics will cover broadly defined themes in Black Studies such as the effects of Atlantic slavery on the United States, the Americas, Africa, and Europe; the Black freedom struggle in the United States; and women, gender, and sexuality in Black America. Through a collaborative learning process, students will define clear project objectives, refine their analytical skills, effectively engage major issues in their research materials, and make critical intellectual interventions. Students will be encouraged to critically explore topics from courses they have taken in Black Studies and related disciplines as topics for their capstone research projects.

**WRIT 3818 Composition Theories and Pedagogies (4 Credits)**

This course focuses on the vast body of theory, research, and practice in the discipline of Composition Studies, primarily focusing on developments since 1963, though with some attention to the field's roots in classical, medieval, and modern rhetoric and in 19th American universities. Course topics include rhetoric and composition, cognitive development and composition, social theories of writing, process theories and research, contemporary threshold concepts in writing, linguistics and writing, digital and multimodal composition, research design, writing across the curriculum, writing pedagogies, assessment, theories of literacy (including race, class, and gender implications), and some relationships between composition and related areas of writing studies. Prerequisite: WRIT 1133.

**WRIT 3991 Independent Study (1-4 Credits)**

Independent Study.
